Washington, D.C. 20549

FORM 10-Q

Quarterly report pursuant to section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended March 31, 2016
OR

Transition report pursuant to section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____
COMMISSION FILE NUMBER 001-34653

First Interstate BancSystem, Inc.
(Exact name of registrant as specified in its charter)

Montana 81-0331430
(State or other jurisdiction of (IRS Employer
incorporation or organization) Identification No.)

401 North 31st Street, Billings, MT 59116-0918
(Address of principal executive offices) (Zip Code)
Registrant's telephone number, including area code: 406/255-5390

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files.)

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

Indicate the number of shares outstanding of each of the Registrant's classes of common stock:

March 31, 2016 – Class A common stock 21,007,483

March 31, 2016 – Class B common stock 23,700,002

FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES
 NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
 (Dollars in thousands, except share and per share data)

(1)Basis of Presentation

In the opinion of management, the accompanying unaudited consolidated financial statements of First Interstate BancSystem, Inc. and subsidiaries (the "Company") contain all adjustments (all of which are of a normal recurring nature) necessary to present fairly the financial position of the Company at March 31, 2016 and December 31, 2015, and the results of operations and cash flows for each of the three month periods ended March 31, 2016 and 2015 in conformity with U.S. generally accepted accounting principles. The balance sheet information at December 31, 2015 is derived from audited consolidated financial statements. Certain reclassifications, none of which were material, have been made to conform prior year financial statements to the March 31, 2016 presentation. These reclassifications did not change previously reported net income or stockholders' equity.

These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015. Operating results for the three months ended March 31, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016.

(2)Acquisitions

Flathead Bank. On April 6, 2016, the Company's bank subsidiary, First Interstate Bank, entered into a stock purchase agreement to acquire all of the outstanding stock of Flathead Bank of Bigfork ("Flathead Bank"), a Montana-based bank wholly owned by Flathead Holding Company. With total assets of \$231,574 as of December 31, 2015, Flathead Bank operates seven branches in western and northwestern Montana. Upon closing of the transaction, which is expected to occur during the third quarter of 2016 subject to regulatory approval, all Flathead Bank branches will become branches of First Interstate Bank. Pursuant to the Purchase Agreement, First Interstate Bank will pay cash consideration of approximately \$34,237 for the stock, subject to certain financial performance and other adjustments, the amount of which will be determined prior to the closing date of the transaction.

Absarokee Bancorporation, Inc. On July 24, 2015, the Company acquired all of the outstanding stock of Absarokee Bancorporation, Inc. ("Absarokee"), a Montana-based bank holding company that operated one subsidiary bank, United Bank. The Company merged United Bank with and into First Interstate Bank immediately subsequent to the acquisition. During March 2016, the Company completed its review of Absarokee's tax items and finalized the fair value of the acquired deferred tax asset. Finalization of provisional estimates resulted in a \$42 decrease in goodwill.

(3)Investment Securities

The amortized cost and approximate fair values of investment securities are summarized as follows:

March 31, 2016	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value

The investment portfolio is evaluated quarterly for other-than-temporary declines in the market value of each individual investment security. The Company had 109 and 198 individual investment securities that were in an unrealized loss position as of March 31, 2016 and December 31, 2015, respectively. As of March 31, 2016, the Company had the intent and ability to hold these investment securities for a period of time sufficient to allow for an anticipated recovery. Furthermore, the Company does not have the intent to sell any of the available-for-sale securities in the above table and it is more likely than not that the Company will not have to sell any securities before a recovery in cost. No impairment losses were recorded during three months ended March 31, 2016 and 2015.

Maturities of investment securities at March 31, 2016 are shown below. Maturities of mortgage-backed securities have been adjusted to reflect shorter maturities based upon estimated prepayments of principal. All other investment securities maturities are shown at contractual maturity dates.

March 31, 2016	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Within one year	\$317,502	\$320,927	\$87,930	\$90,154
After one year but within five years	1,089,290	1,099,333	328,090	333,231

The amount of interest income recognized by the Company within the period that the loans were impaired was primarily related to loans modified in a troubled debt restructuring that remained on accrual status. Interest payments received on non-accrual impaired loans are applied to principal. Interest income is subsequently recognized only to the extent cash payments are received in excess of principal due. If interest on impaired loans had been accrued, interest income on impaired loans would have been approximately \$929 and \$1,035 for the three months ended March 31, 2016 and 2015.

Collateralized impaired loans are generally recorded at the fair value of the underlying collateral using discounted cash flows, independent appraisals and management estimates based upon current market conditions. For loans measured under the present value of cash flows method, the change in present value attributable to the passage of time, if applicable, is recognized in the provision for loan losses and thus no interest income is recognized.

Modifications of performing loans are made in the ordinary course of business and are completed on a case-by-case basis as negotiated with the borrower. Loan modifications typically include interest rate concessions, interest only periods of less than twelve months, short-term payment deferrals and extension of amortization periods to provide payment relief. A loan modification is considered a troubled debt restructuring if the borrower is experiencing financial difficulties and the Company, for economic or legal reasons, grants a concession to the borrower that it would not otherwise consider. Certain troubled debt restructurings are on non-accrual status at the time of restructuring and are typically returned to accrual status after considering the borrower's sustained repayment performance in accordance with the restructuring agreement for a period of at least six months and management is reasonably assured of future performance. If the troubled debt restructuring meets these performance criteria and the interest rate granted at the modification is equal to or greater than the rate that the Company was willing to accept at the time of the restructuring for a new loan with comparable risk, then the loan will return to performing status and the

accrual of interest will resume.

The Company had loans renegotiated in troubled debt restructurings of \$34,344 as of March 31, 2016, of which \$22,274 were included in non-accrual loans and \$12,070 were on accrual status. The Company had loans renegotiated in troubled debt restructurings of \$40,330 as of December 31, 2015, of which \$24,911 were included in non-accrual loans and \$15,419 were on accrual status.

17

Table of Contents

FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES
 NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
 (Dollars in thousands, except share and per share data)

The following table presents information on the Company's troubled debt restructurings that occurred during the three months ended March 31, 2016.

Three Months Ended March 31, 2016	Number of Notes	Type of		Principal Balance at Restructure Date
		Concession	Extension of terms or maturity	
Commercial Real Estate	3	\$ 576	\$ 204	\$ 780
Total loans restructured during period	3	\$ 576	\$ 204	\$ 780

For troubled debt restructurings that were on non-accrual status or otherwise deemed impaired before the modification, a specific reserve may already be recorded. In periods subsequent to modification, the Company continues to evaluate all troubled debt restructurings for possible impairment and recognizes impairment through the allowance. Additionally these loans continue to work their way through the credit cycle through charge-off, pay-off or foreclosure. Financial effects of modifications of troubled debt restructurings may include principal loan forgiveness or other charge-offs directly related to the restructuring. The Company had no charge-offs directly related to modifying troubled debt restructurings during the three months ended March 31, 2016 or 2015.

The following table presents information on the Company's troubled debt restructurings during the previous 12 months for which there was a payment default during the three months ended March 31, 2016. The Company considers a payment default to occur on troubled debt restructurings when the loan is 90 days or more past due or was placed on non-accrual status after the modification.

	Three Months Ended March 31, 2016	
	Number of Notes	Balance
Commercial Real Estate	1	\$ 203
Total	1	\$ 203

At March 31, 2016, there were no material commitments to lend additional funds to borrowers whose existing loans have been renegotiated or are classified as non-accrual.

As part of the on-going and continuous monitoring of the credit quality of the Company's loan portfolio, management tracks internally assigned risk classifications of loans. The Company adheres to a Uniform Classification System developed jointly by the various bank regulatory agencies to internally risk rate loans. The Uniform Classification System defines three broad categories of criticized assets, which the Company uses as credit quality indicators:

Other Assets Especially Mentioned — includes loans that exhibit weaknesses in financial condition, loan structure or documentation, which if not promptly corrected, may lead to the development of abnormal risk elements.

Substandard — includes loans that are inadequately protected by the current sound worth and paying capacity of the borrower. Although the primary source of repayment for a substandard loan is not currently sufficient, collateral or other sources of repayment are sufficient to satisfy the debt. Continuance of a substandard loan is not warranted unless positive steps are taken to improve the worthiness of the credit.

Doubtful — includes loans that exhibit pronounced weaknesses to a point where collection or liquidation in full, on the basis of currently existing facts, conditions and values, is highly questionable and improbable. Doubtful loans are required to be placed on non-accrual status and are assigned specific loss exposure.

Company management undertakes the same process for assigning risk ratings to acquired loans as it does for originated loans. Acquired loans rated as substandard or lower or that were on non-accrual status or designated as troubled debt restructurings at the time of acquisition are deemed to be acquired credit impaired loans accounted for under ASC Topic 310-30, regardless of whether they are classified as performing or non-performing loans.

Table of ContentsFIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

The Company performs a quarterly assessment of the adequacy of its allowance for loan losses in accordance with generally accepted accounting principles. The methodology used to assess the adequacy is consistently applied to the Company's loan portfolio and consists of three elements: (1) specific valuation allowances based on probable losses on impaired loans; (2) historical valuation allowances based on loan loss experience for similar loans with similar characteristics and trends; and (3) general valuation allowances determined based on changes in the nature of the loan portfolio, overall portfolio quality, industry concentrations, delinquency trends, general economic conditions and other qualitative risk factors both internal and external to the Company.

Specific allowances are established for loans where management has determined that probability of a loss exists by analyzing the borrower's ability to repay amounts owed, collateral deficiencies and any relevant qualitative or economic factors impacting the loan. Historical valuation allowances are determined by applying percentage loss factors to the credit exposures from outstanding loans. For commercial, agricultural and real estate loans, loss factors are applied based on the internal risk classifications of these loans. For consumer loans, loss factors are applied on a portfolio basis. For commercial, agriculture and real estate loans, loss factor percentages are based on a migration analysis of our historical loss experience, designed to account for credit deterioration. For consumer loans, loss factor percentages are based on a one-year loss history. General valuation allowances are determined by evaluating, on a quarterly basis, changes in the nature and volume of the loan portfolio, overall portfolio quality, industry concentrations, current economic and regulatory conditions and the estimated impact of these factors on historical loss rates.

An allowance for loan losses is established for loans acquired credit impaired and for which the Company projects a decrease in the expected cash flows in periods subsequent to the acquisition of such loans. As of March 31, 2016 and December 31, 2015, the Company's allowance for loan losses included \$393 and \$287, respectively, related to loans acquired credit impaired.

(6) Other Real Estate Owned

Information with respect to the Company's other real estate owned follows:

	Three Months Ended March 31,	
	2016	2015
Beginning balance	\$6,254	\$13,554
Additions	3,227	3,257
Valuation adjustments (17)	(106)	
Dispositions (207)	(1,571)	
Ending balance	\$9,257	\$15,134

Foreclosed residential real estate properties of \$4,087 and \$1,686 were included in other real estate owned as of March 31, 2016 and December 31, 2015, respectively. The Company did not have any consumer mortgage loans collateralized by residential real estate property that were in the process of foreclosure as of March 31, 2016 or December 31, 2015.

(7) Derivatives and Hedging Activities

Interest Rate Swap Contracts Designated as Hedges. For asset and liability management purposes, the Company has entered into interest rate swap contracts to hedge against changes in forecasted cash flows due to interest rate exposures. The swap agreements are derivative instruments and convert a portion of the Company's forecasted variable rate debt to a fixed rate (i.e., cash flow hedge) over the payment term of the interest rate swap. The effective portion of the gain or loss on cash flow hedging instruments is initially reported as a component of other comprehensive income and subsequently reclassified into earnings in the same period during which the transaction affects earnings. The ineffective portion of the gain or loss on derivative instruments, if any, is recognized in earnings. The Company does not enter into interest rate swap agreements for trading or speculative purposes.

Table of Contents

FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

On September 22, 2015, the Company entered into an interest rate swap contract with a notional amount of \$100,000 that was designated as a cash flow hedge. Under the terms of the interest rate swap contract, the Company pays a fixed interest rate of 1.94% and the counterparty pays to the Company a variable interest rate equal to the three-month LIBOR. No cash is exchanged until the effective date, which begins on September 15, 2017 and ends on September 15, 2020. The Company designated the interest payments related to Federal Home Loan Bank borrowings as the cash flow hedge. The hedge was fully effective during the current period. As such, no amount of ineffectiveness was included in the Company's income statement for the three months ended March 31, 2016. The Company expects the hedge to remain highly effective during the remaining term of the interest rate swap.

Non-Hedging Interest Rate Swap Contracts. The Company enters into certain interest rate swap contracts that are not designated as hedging instruments. These derivative contracts relate to transactions in which the Company enters into an interest rate swap with a customer while at the same time entering into an offsetting interest rate swap with a third party financial institution. Because the Company acts as an intermediary for the customer, changes in the fair value of the underlying derivative contracts for the most part offset each other and do not significantly impact the Company's results of operations.

Interest Rate Lock Commitments and Forward Loan Sales Contracts. In the normal course of business, the Company enters into interest rate lock commitments to finance residential mortgage loans that are not designated as accounting hedges. These commitments, which contain fixed expiration dates, offer the borrower an interest rate guarantee provided the loan meets underwriting guidelines and closes within the timeframe established by the Company. Interest rate risk arises on these commitments and subsequently closed loans if interest rates change between the time of the interest rate lock and the delivery of the loan to the investor. Loan commitments related to residential mortgage loans intended to be sold are considered derivatives and are marked to market through earnings. In addition to the effects of the change in market interest rate, the fair value measurement of the derivative also contemplates the expected cash flows to be received from the counterparty to the future sale of the loan.

The Company sells residential mortgage loans on either a best efforts or mandatory delivery basis. The Company mitigates the effect of the interest rate risk inherent in providing interest rate lock commitments by entering into a forward loan sales contract. During the interest rate lock commitment period, these forward loan sales contracts are marked to market through earnings and are not designated as accounting hedges. Exclusive of the fair value component associated with the projected cash flows from the loan delivery to the investor, the changes in fair value related to movements in market rates of the interest rate lock commitments and the forward loan sales contracts generally move in opposite directions, and the net impact of changes in these valuations on net income during the loan commitment period is generally inconsequential. When the loan is funded to the borrower, the interest rate lock commitment derivative expires and the Company records a loan held for sale. The forward loan sales contract acts as a hedge against the variability in cash to be received from the loan sale.

The changes in measurement of the estimated fair values of the interest rate lock commitments and forward loan sales contracts are included in mortgage banking revenues in the accompanying consolidated statements of income.

 (Dollars in thousands, except share and per share data)

The notional amounts and estimated fair values of the Company's derivatives are presented in the following table. Fair value estimates are obtained from third parties and are based on pricing models.

	March 31, 2016		December 31, 2015	
	Notional Amount	Estimated Fair Value	Notional Amount	Estimated Fair Value
Derivative Assets (included in other assets on balance sheet):				
Derivatives designated as hedges:				
Interest rate swap contracts	\$—	\$ —	\$ 100,000	\$ 165
Non-hedging interest rate derivatives:				
Interest rate swap contracts	9,281	1,102	9,369	788
Interest rate lock commitments	112,705	1,036	—	—
Total derivative assets	\$ 121,986	\$ 2,138	\$ 109,369	\$ 953

Derivative Liabilities (included in accounts payable and accrued expenses on balance sheet):

Derivatives designated as hedges:				
Interest rate swap contracts	\$ 100,000	\$ 2,032	\$ —	\$ —
Non-hedging interest rate derivatives:				
Interest rate swap contracts	9,281	1,173	9,369	829
Forward loan sales contracts	77,329	414	—	—
Total derivative liabilities	\$ 186,610	\$ 3,619	\$ 9,369	\$ 829

The following table presents the pre-tax gains or losses related to derivative contracts that were recorded in accumulated other comprehensive income and other non-interest income in the Company's statements of income for the periods indicated:

	Three months ended	
	March 31, 2016	March 31, 2015
Derivatives designated as hedges:		
Amount of loss recognized in other comprehensive income (effective portion)	\$(2,197)	\$ —
Non-hedging interest rate derivatives:		
Amount of loss recognized in other non-interest income	(29)	(7)
Amount of gains recognized in mortgage banking revenues	695	—

(8) Capital Stock

The Company had 21,007,483 shares of Class A common stock and 23,700,002 shares of Class B common stock outstanding as of March 31, 2016. The Company had 21,698,594 shares of Class A common stock and 23,729,631 shares of Class B common stock outstanding as of December 31, 2015.

During the three months ended March 31, 2016, the Company repurchased and retired 948,242 shares of its Class A common stock in open market transactions at an aggregate purchase price of \$24,792. During the three months ended March 31, 2015, the Company repurchased and retired 565,875 shares of its Class A common stock in a privately negotiated transaction at an aggregate purchase price of \$14,674. The repurchases were made pursuant to stock repurchase programs approved by the Company's Board of Directors. Under the terms of the current stock repurchase program, the Company may repurchase up to an additional 51,758 shares of its Class A common stock. All other stock repurchases during the three months ended March 31, 2016 and 2015 were redemptions of vested restricted shares tendered in lieu of cash for payment of income tax withholding amounts by participants of the Company's equity compensation plans.

 (Dollars in thousands, except share and per share data)

(9) Earnings per Common Share

Basic earnings per common share is calculated by dividing net income by the weighted average number of common shares outstanding during the period presented, excluding unvested restricted stock. Diluted earnings per share is calculated by dividing net income by the weighted average number of common shares determined for the basic earnings per share computation plus the dilutive effects of stock-based compensation using the treasury stock method.

The following table sets forth the computation of basic and diluted earnings per share for the three month periods ended March 31, 2016 and 2015.

	Three Months Ended March 31,	
	2016	2015
Net income	\$20,124	\$ 20,980
Weighted average common shares outstanding for basic earnings per share computation	44,719,248	43,378,230
Dilutive effects of stock-based compensation	394,834	461,961
Weighted average common shares outstanding for diluted earnings per common share computation	45,114,082	43,840,191
Basic earnings per common share	\$0.45	\$ 0.46
Diluted earnings per common share	\$0.45	\$ 0.46

The Company had 226,821 and 166,770 shares of unvested restricted stock as of March 31, 2016 and 2015, respectively, that were not included in the computation of diluted earnings per common share because performance conditions for vesting had not been met. In addition, the Company had 40,865 and 5,000 shares of unvested time restricted stock and stock options outstanding as of March 31, 2016 and as of March 31, 2015, respectively, that were not included in the computation of diluted earnings per common shares because their effect would be anti-dilutive.

(10) Regulatory Capital

On July 2, 2013, the Board of Governors of the Federal Reserve Bank issued a final rule implementing a revised regulatory capital framework for U.S. banks in accordance with the Basel III international accord, ("Basel III"). Basel III includes a more stringent definition of capital and introduces a new common equity tier 1, or CET1, capital requirement, sets forth a comprehensive methodology for calculating risk-weighted assets, introduces a conservation buffer and sets out minimum capital ratios and overall capital adequacy standards. Under Basel III, certain deductions and adjustments to regulatory capital began to phase in starting January 1, 2015 and will be fully implemented on January 1, 2018. The capital conservation buffer required under Basel III began to phase in starting January 1, 2016 and will be fully implemented on January 1, 2019.

Table of Contents

FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES
 NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
 (Dollars in thousands, except share and per share data)

(11) Commitments and Contingencies

In the normal course of business, the Company is involved in various other claims and litigation. In the opinion of management, following consultation with legal counsel, the ultimate liability or disposition thereof of all other claims and litigation is not expected to have a material adverse effect on the consolidated financial condition, results of operations or liquidity of the Company.

As of March 31, 2016, the Company had a commitment under a forward starting interest rate swap contract with a notional amount of \$100,000. For additional information about the forward starting interest rate swap contract, see Note 7 — Derivatives and Hedging Activity.

Residential mortgage loans sold to investors in the secondary market are sold with varying recourse provisions. Essentially all of the loan sales agreements require the repurchase of a mortgage loan by the seller in situations such as breach of representation, warranty or covenant; untimely document delivery; false or misleading statements; failure to obtain certain certificates or insurance; unmarketability; etc. Certain loan sales agreements contain repurchase requirements based on payment-related defects that are defined in terms of the number of days or months since the purchase, the sequence number of the payment, and/or the number of days of payment delinquency. Based on the specific terms stated in the agreements, the Company had \$3,465 of sold residential mortgage loans with recourse provisions still in effect as of March 31, 2016.

(12) Financial Instruments with Off-Balance Sheet Risk

The Company is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the commitment contract. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. At March 31, 2016, commitments to extend credit to existing and new borrowers approximated \$1,582,107, which included \$562,367 on unused credit card lines and \$400,922 with commitment maturities beyond one year.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. At March 31, 2016, the Company had outstanding standby letters of credit of \$52,402. The estimated fair value of the obligation undertaken by the Company in issuing the standby letters of credit is included in other liabilities in the Company's consolidated balance sheet.

(13) Other Comprehensive Income/Loss

The gross amounts of each component of other comprehensive income and the related tax effects are as follows:

Net unrealized gain (loss) on derivatives	(1,262)	100
Net actuarial loss on defined benefit post-retirement benefit plans	(369)	(378)
Net accumulated other comprehensive income	\$ 4,601	\$ 406

(14) Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. There is a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The three levels of inputs that may be used to measure fair value are as follows:

- Level 1 - Quoted prices in active markets for identical assets or liabilities
- Level 2 - Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities
- Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of assets or liabilities

The methodologies used by the Company in determining the fair values of each class of financial instruments are based primarily on the use of independent, market-based data to reflect a value that would be reasonably expected in an orderly transaction between market participants at the measurement date, and therefore as classified within Level 2 of the valuation hierarchy. There were no transfers between fair value hierarchy levels during the three months ended March 31, 2016 and 2015.

Further details on the methods used to estimate the fair value of each class of financial instruments above are discussed below:

Investment Securities Available-for-Sale. The Company obtains fair value measurements for investment securities from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the investment's terms and conditions, among other things. Vendors chosen by the Company are widely recognized vendors whose evaluations support the pricing functions of financial institutions, investment and mutual funds, and portfolio managers. If needed, a broker may be utilized to determine the reported fair value of investment securities .

Loans Held for Sale. Fair value measurements for loans held for sale are obtained from an independent pricing service. The fair value measurements consider observable data that may include binding contracts or quotes or bids from third party investors.

Interest Rate Swap Contracts. Fair values for derivative interest rate swap contracts are based upon the estimated amounts to settle the contracts considering current interest rates and are calculated using discounted cash flows that are observable or that can be corroborated by observable market data. The inputs used to determine fair value include the 3 month LIBOR forward curve to estimate variable rate cash inflows and the fed funds effective swap rate to estimate the discount rate. The estimated variable rate cash inflows are compared to the fixed rate outflows and such difference is discounted to a present value to estimate the fair value of the interest rate swaps. The change in the value of derivative assets attributable to basis risk, or the risk that offsetting investments in a hedging strategy will not experience price changes in entirely opposite directions from each other, was not significant in the reported periods. The Company also obtains and compares the reasonableness of the pricing from an independent third party.

Table of Contents

FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES
 NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
 (Dollars in thousands, except share and per share data)

Interest Rate Lock Commitments. Fair value measurements for interest rate lock commitments are obtained from an independent pricing service. The fair value measurements consider observable data that may include prices available from secondary market investors taking into consideration various characteristics of the loan, including the loan amount, interest rate, value of the servicing and loan to value ratio, among other things, adjusted to reflect changes in interest rates, the estimated pull-through rate and estimated direct costs necessary to complete the commitment into a closed loan.

Forward Loan Sales Contracts. The fair value measurements for forward loan sales contracts are obtained from an independent pricing service. The fair value measurements consider observable data that includes sales of similar loans and mortgage-backed securities that are traded publicly in active exchange markets.

Deferred Compensation Plan Assets and Liabilities. The fair values of deferred compensation plan assets are based primarily on the use of independent, market-based data to reflect a value that would be reasonably expected in an orderly transaction between market participants at the measurement date. These investments are in the same funds and purchased in the same amounts as the participants' selected investments, which represent the underlying liabilities to plan participants. Deferred compensation plan liabilities are recorded at amounts due to participants, based on the fair value of participants' selected investments.

Financial assets and financial liabilities measured at fair value on a recurring basis are as follows:

	Balance	Fair Value Measurements at Reporting Date Using Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investment securities available-for-sale:				
U.S. Treasury Notes	\$ 3,935	\$ -3,935		\$ —
Obligations of U.S. government agencies	531,432	-531,432		—

Deferred compensation plan liabilities	10,149	—	10,149	—

Additionally, from time to time, certain assets are measured at fair value on a non-recurring basis. Adjustments to fair value generally result from the application of lower-of-cost-or-market accounting or write-downs of individual assets due to impairment. The following table presents information about the Company's assets and liabilities measured at fair value on a non-recurring basis.

As of March 31, 2016	Balance	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans	\$ 19,363	\$ —	\$ —	\$ 19,363
Other real estate owned	3,464	—	—	3,464
Long-lived assets to be disposed of by sale	1,506	—	—	1,506

As of December 31, 2015	Balance	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans	\$20,875	\$ —	\$ —	\$ 20,875
Other real estate owned	1,789	—	—	1,789
Long-lived assets to be disposed of by sale	1,506	—	—	1,506

Impaired Loans. Collateralized impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from collateral. The impaired loans are reported at fair value through specific valuation allowance allocations. In addition, when it is determined that the fair value of an impaired loan is less than the recorded investment in the loan, the carrying value of the loan is adjusted to fair value through a charge to the allowance for loan losses. Collateral values are estimated using independent appraisals and management estimates of current market conditions. As of March 31, 2016, certain impaired loans with a carrying value of \$42,700 were reduced by specific valuation allowance allocations of \$13,946 and partial loan charge-offs of \$9,391 resulting in a reported fair value of \$19,363. As of December 31, 2015, certain impaired loans with a carrying value of \$42,679 were reduced by specific valuation allowance allocations of \$11,575 and partial loan charge-offs of \$10,229 resulting in a reported fair value of \$20,875.

Table of Contents

FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES
 NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
 (Dollars in thousands, except share and per share data)

OREO. The fair values of OREO are estimated using independent appraisals and management estimates of current market conditions. Upon initial recognition, write-downs based on the foreclosed asset's fair value at foreclosure are reported through charges to the allowance for loan losses. Periodically, the fair value of foreclosed assets is remeasured with any subsequent write-downs charged to OREO expense in the period in which they are identified. Write-downs of \$17 during the three months ended March 31, 2016 included \$11 directly related to receipt of updated appraisals and \$6 based on management estimates of the current fair value of properties. Write downs of \$106 during the three months ended March 31, 2015 were based on management's estimate of the current fair value of the properties.

Long-lived Assets to be Disposed of by Sale. Long-lived assets to be disposed of by sale are carried at the lower of carrying value or fair value less estimated costs to sell. The fair values of long-lived assets to be disposed of by sale are based upon observable market data and management estimates of current market conditions. As of March 31, 2016 and December 31, 2015, the Company had long-lived assets to be disposed of by sale with carrying values aggregating \$2,363 that were reduced by write-downs of \$857 resulting in an aggregate fair value of \$1,506.

The following table presents additional quantitative information about assets measured at fair value on a non-recurring basis and for which the Company has utilized Level 3 inputs to determine fair values:

	Fair Value As of		Valuation Technique	Unobservable Inputs	Range (Weighted Average)
	March 31, 2016	December 31, 2015			
Impaired loans	\$19,363	\$20,875	Appraisal	Appraisal adjustment	0% - 53% (38%)
Other real estate owned	3,464	1,789	Appraisal	Appraisal adjustment	2% - 96% (19%)
Long-lived assets to be disposed of by sale	1,506	1,506	Appraisal	Appraisal adjustment	0% - 9% (6%)

The Company is required to disclose the fair value of financial instruments for which it is practical to estimate fair value. The methodologies for estimating the fair value of financial instruments that are measured at fair value on a recurring or non-recurring basis are discussed above. The methodologies for estimating the fair value of other financial instruments are discussed below. For financial instruments bearing a variable interest rate where no credit risk exists, it is presumed that recorded book values are reasonable estimates of fair value.

Financial Assets. Carrying values of cash, cash equivalents and accrued interest receivable approximate fair values due to the liquid and/or short-term nature of these instruments. Fair values for investment securities held-to-maturity are obtained from an independent pricing service, which considers observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the investment's terms and conditions, among other things. Fair values of fixed rate loans and variable rate loans that reprice on an infrequent basis are estimated by discounting future cash flows using current interest rates at which similar loans with similar terms would be made to borrowers of similar credit quality. Carrying values of variable rate loans that reprice frequently, and with no change in credit risk, approximate the fair values of these instruments.

Financial Liabilities. The fair values of demand deposits, savings accounts, securities sold under repurchase agreements and accrued interest payable are the amounts payable on demand at the reporting date. The fair values of fixed-maturity certificates of deposit are estimated using external market rates currently offered for deposits with

similar remaining maturities. The fair values of derivative liabilities are obtained from an independent pricing service, which considers observable data that may include the three-month LIBOR forward curve, the federal funds effective swap rate and cash flows, among other things. The carrying values of the interest bearing demand notes to the United States Treasury are deemed an approximation of fair values due to the frequent repayment and repricing at market rates. The fixed and floating rate subordinated debentures, floating rate subordinated term loan, notes payable to the FHLB, fixed rate subordinated term debt, and capital lease obligation are estimated by discounting future cash flows using current rates for advances with similar characteristics.

Commitments to Extend Credit and Standby Letters of Credit. The fair value of commitments to extend credit and standby letters of credit, based on fees currently charged to enter into similar agreements, is not significant.

(15) Recent Authoritative Accounting Guidance

ASU 2014-09 "Revenue from Contracts with Customers." The amendments in Accounting Standards Update ("ASU") 2014-09 introduce a new five-step revenue recognition model in which an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 also requires disclosures sufficient to enable users to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers, including qualitative and quantitative disclosures about contracts with customers, significant judgments and changes in judgments, and assets recognized from the costs to obtain or fulfill a contract. ASU 2015-14, "Revenue from Contracts with Customers (Topic 606) – Deferral of the Effective Date" was released in August

of 2015 deferring the effective date of 2014-09 for all entities by one year until January 1, 2018. The Company is evaluating the new guidance to determine the impact it will have on its consolidated financial statements, results of operations or liquidity.

Table of Contents

FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

ASU 2014-12 "Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could be Achieved after the Requisite Service Period." ASU 2014-12 amends Accounting Standards Codification ("ASC") Topic 718, Compensation-Stock Compensation, to clarify that a performance target that affects the vesting of a share-based payment award and that could be achieved after the requisite service period should be treated as a performance condition that affects the vesting of the award. ASU 2014-12 further clarifies that the requisite service period ends when the employees can cease rendering service and still be eligible to vest in the award if the performance target is achieved. The Company adopted the amendments in ASU 2014-12 effective January 1, 2016. The adoption did not have a material impact on the Company's consolidated financial statements, results of operations or liquidity.

ASU 2014-16 "Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share is More Akin to Debt or to Equity." The amendments in ASU 2014-16 clarify that an entity should consider all relevant terms and features-including the embedded derivative feature being evaluated for bifurcation-in evaluating the nature of the host contract within a hybrid financial instrument. The amendments further clarify that no single term or feature would necessarily determine the economic characteristics and risk of the host contract. Rather, the nature of the host contract depends upon the economic characteristics and risk of the entire hybrid financial instrument. The Company adopted the amendments in ASU 2014-16 effective January 1, 2016. The adoption did not have a material impact on the Company's consolidated financial statements, results of operations or liquidity.

ASU 2015-02 "Amendments to the Consolidation Analysis." The amendments in ASU 2015-02 (i) modify the evaluation of whether limited partnerships and similar legal entities are variable interest entities or voting interest entities, (ii) eliminate the presumption that a general partner should consolidate a limited partnership, (iii) affect the consolidation analysis of reporting entities that are involved with variable interest entities, particularly those that have fee arrangements and related party relationships, and (iv) provide scope exceptions from consolidation guidance for reporting entities with interest in legal entities that are required to comply or operate in accordance with requirements of the Investment Company Act of 1940 for registered market funds. The Company adopted the amendments in ASU 2015-02 effective January 1, 2016. The adoption did not have a material impact on the Company's consolidated financial statements, results of operations or liquidity.

ASU 2015-03 "Simplifying the Presentation of Debt Issuance Costs." The amendments in ASU 2015-03 require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, rather than as a deferred charge. The guidance in ASU 2015-03 did not address presentation or subsequent measurement of debt issues costs related to line-of-credit arrangements. ASU 2015-15, "Interest – Imputation of Interest (Subtopic 835-30) – Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements, Amendments to SEC Paragraphs Pursuant to Staff Announcement at June 18, 2015 EITF Meeting," addresses this gap. ASU 2015-15 adds that the SEC staff would not object to an entity deferring and presenting debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. The Company adopted the amendments in ASU 2015-03 and ASU 2015-15 effective January 1, 2016. The adoption did not have a material impact on the Company's consolidated financial statements, results of operations or liquidity.

ASU 2015-05 "Intangibles-Goodwill and Other Internal-Use Software." The amendments in ASU 2015-05 provide guidance about whether a cloud computing arrangement includes a software license. Under the guidance in ASU

2015-05, if a cloud computing arrangement includes a software license, the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The Company adopted the amendments in ASU 2015-05 effective January 1, 2016. The adoption did not have a material impact on the Company's consolidated financial statements, results of operations or liquidity.

Table of Contents

FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

ASU 2015-10 "Technical Corrections and Improvements." The amendments in ASU 2015-10 represent changes to clarify the codification, correct unintended application of guidance, or make minor improvements to the codification that are not expected to have a significant effect on current accounting practice or create a significant administrative cost to most entities. The Company adopted the amendments in ASU 2015-10 effective January 1, 2016. The adoption did not have a material impact on the Company's consolidated financial statements, results of operations or liquidity.

ASU 2015-16 "Business Combinations-Simplifying the Accounting for Measurement-Period Adjustments." The amendments in ASU 2015-16 eliminate the requirement to retrospectively account for adjustments made to provisional amounts recognized as part of a business combination. Under the amendments in ASU 2015-16, an acquirer must recognize adjustments to the provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The amendments in ASU 2015-16 require that the acquirer record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. The Company adopted the amendments in ASU 2015-16 effective January 1, 2016. The adoption did not have a material impact on the Company's consolidated financial statements, results of operations or liquidity.

ASU 2016-01 "Financial Instruments-Overall: Recognition and Measurement of Financial Assets and Financial Liabilities." The amendments in ASU 2016-1, among other things, (i) require equity investments, with certain exceptions, to be measured at fair value with changes in fair value recognized in net income, (ii) simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment, (iii) eliminates the requirement for public business entities to disclose the methods and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet, (iv) requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes, (v) requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments, (vi) requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or the accompanying notes to the financial statements and (viii) clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale investment securities. The amendments in ASU 2016-1 will be effective for the Company on January 1, 2018, and are not expected to have a significant impact on the Company's consolidated financial statements, results of operations or liquidity.

ASU 2016-02 "Leases (Topic 842)." On February 25, 2016, the Financial Accounting Standards Board issued new lease accounting guidance in ASU No. 2016-02. Under the new guidance, lessees will be required to recognize a lease liability and a right of use asset for all leases (with the exception of short-term leases) at the commencement date of the lease and disclose key information about leasing arrangements. Accounting by lessors is largely unchanged. ASU 2016-02 will be effective for the Company on January 1, 2019 and will be applied using a modified retrospective approach. The Company is evaluating the new guidance to determine the impact ASU 2016-02 will have on its consolidated financial statements, results of operations or liquidity.

ASU 2016-05 "Derivatives and Hedging (Topic 815): Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships." The amendments in ASU 2016-05 clarify that a change in the counterparty to a derivative

instrument that has been designated as the hedging instrument under ASC Topic 815 does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria continue to be met. The amendments in ASU 2016-05 will be effective for the Company on January 1, 2017, and are not expected to have a significant impact on the Company's consolidated financial statements, results of operations or liquidity.

ASU 2016-07 "Investments - Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting." The amendments in ASU 2016-07 eliminate the requirement that when an investment qualified for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investments, results of operations and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods hat the investment had been held. The amendments

Table of Contents

FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

in ASU 2016-07 also simplify the transition to the equity method of accounting by eliminating retroactive adjustment of the investment when an investment qualifies for use of the equity method, among other things. The amendments in ASU 2016-07 will be effective for the Company on January 1, 2017, and are not expected to have a significant impact on the Company's consolidated financial statements, results of operations or liquidity.

ASU 2016-08 "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)." The amendments in ASU 2016-08 were issued to clarify certain principal versus agent considerations within the implementation guidance of ASC Topic 606, "Revenue from Contracts with Customers." The effective date and transition of ASU 2016-08 is the same as the effective date and transition of ASU 2014-09, Revenue from Contracts with Customers (Topic 606), as discussed above. The Company is continuing to evaluate the new guidance to determine the impact it will have on its consolidated financial statements, results of operations or liquidity.

ASU 2016-09 "Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting." Under the amendments in ASU 2016-09, all excess tax benefits and tax deficiencies related to share-based payment awards should be recognized as income tax expense or benefit in the income statement during the period in which they occur. Previously, such amounts were recorded in the pool of excess tax benefits included in additional paid-in capital, if such pool was available. Because excess tax benefits are no longer recognized in additional paid-in capital, the assumed proceeds from applying the treasury stock method when computing earnings per share should exclude the amount of excess tax benefits that would have previously been recognized in additional paid-in capital. Additionally, excess tax benefits should be classified along with other income tax cash flows as an operating activity rather than a financing activity, as was previously the case. The amendments in ASU 2016-09 also provide that an entity can make an entity-wide accounting policy election to either estimate the number of awards that are expected to vest (current GAAP) or account for forfeitures when they occur. The amendments in ASU 2016-09 change the threshold to qualify for equity classification to permit withholding up to the maximum statutory tax rates (rather than the minimum as was previously the case) in the applicable jurisdictions. The amendments in ASU 2016-09 will be effective for the Company on January 1, 2017, and are not expected to have a significant impact on impact on the Company's consolidated financial statements, results of operations or liquidity.

ASU No. 2016-10 "Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing." The amendments in ASU 2016-10 were issued to clarify ASC Topic 606, "Revenue from Contracts with Customers" related to (i) identifying performance obligations; and (ii) the licensing implementation guidance. The effective date and transition of ASU 2016-10 is the same as the effective date and transition of ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)," as discussed above. The Company is continuing to evaluate the new guidance to determine the impact it will have on its consolidated financial statements, results of operations or liquidity.

(16) Subsequent Events

Subsequent events have been evaluated for potential recognition and disclosure through the date financial statements were filed with the Securities and Exchange Commission. On April 18, 2016, the Company declared a quarterly dividend to common shareholders of \$0.22 per share, to be paid on May 13, 2016 to shareholders of record as of May 2, 2016.

No other events requiring recognition or disclosure were identified.

Item 2.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2015, including the audited financial statements contained therein, filed with the Securities and Exchange Commission, or SEC.

When we refer to "we," "our," and "us" in this report, we mean First Interstate BancSystem, Inc. and our consolidated subsidiaries, unless the context indicates that we refer only to the parent company, First Interstate BancSystem, Inc.

Cautionary Note Regarding Forward-Looking Statements and Factors that Could Affect Future Results

"Forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Rule 175 promulgated thereunder, and Section 21E of the Securities Exchange Act of 1934, as amended, and Rule 3b-6 promulgated thereunder, that involve inherent risks and uncertainties. Any statements about our plans, objectives, expectations, strategies, beliefs, or future performance or events constitute forward-looking statements. Such statements are identified as those that include words or phrases such as "believes," "expects," "anticipates," "plans," "trend," "objective," "continue" or similar expressions or future or conditional verbs such as "will," "would," "should," "could," "might," "may" or similar expressions. Forward-looking statements involve known and unknown risks, uncertainties, assumptions, estimates and other important factors that could cause actual results to differ materially from any results, performance or events expressed or implied by such forward-looking statements. The following factors, among others, may cause actual results to differ materially from current expectations in the forward-looking statements, including those set forth in this report: declining business and economic conditions, credit losses, adverse economic conditions affecting Montana, Wyoming and South Dakota, declining oil and gas prices, lending risk, adequacy of the allowance for loan losses, impairment of goodwill, failure to integrate or profitably operate acquired organizations, additional regulatory requirements if our assets exceed \$10 billion, access to low-cost funding sources, changes in interest rates, dependence on the Company's management team, ability to attract and retain qualified employees, governmental regulation and changes in regulatory, tax and accounting rules and interpretations, failure of technology, cyber-security, unfavorable resolution of litigation, inability to meet liquidity requirements, environmental remediation and other costs, ineffective internal operational controls, competition, reliance on external vendors, implementation of new lines of business or new product or service offerings, soundness of other financial institutions, failure to effectively implement technology-driven products and services, inability of our bank subsidiary to pay dividends, risks associated with introducing new lines of business, products or services, litigation pertaining to fiduciary responsibilities, change in dividend policy, uninsured nature of any investment in Class A common stock, volatility of Class A common stock, decline in market price of Class A common stock, voting control of Class B stockholders, anti-takeover provisions, dilution as a result of future equity issuances, controlled company status, and subordination of common stock to Company debt.

A more detailed discussion of each of the foregoing risks is included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015, filed March 1, 2016. These factors and the other risk factors described in the Company's periodic and current reports filed with the SEC from time to time, however, are not necessarily all of the important factors that could cause the Company's actual results, performance or achievements to differ materially from those expressed in or implied by any of the Company's forward-looking statements. Other unknown or unpredictable factors also could harm the Company's results. Investors and others are encouraged to read the more detailed discussion of the Company's risks contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements set forth above. Forward-looking statements speak only as of the date they are made and we do not undertake or assume any obligation to update publicly any of these statements to reflect actual results, new information or future events, changes in assumptions or changes in other factors affecting forward-looking statements, except to the extent required by applicable laws. If we update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements.

Executive Overview

We are a financial holding company headquartered in Billings, Montana. As of March 31, 2016, we had consolidated assets of \$8,691 million, deposits of \$7,107 million, loans of \$5,244 million and total stockholders' equity of \$942 million. We currently operate 79 banking offices, including detached drive-up facilities, in 45 communities located in Montana, Wyoming and South Dakota. Through our bank subsidiary, First Interstate Bank, or FIB, we deliver a comprehensive range of banking products and services to individuals, businesses, municipalities and other entities throughout our market areas. Our customers participate in a wide variety of industries, including energy, tourism, agriculture, healthcare, professional services, education, governmental services, construction, mining, retail and wholesale trade.

Table of Contents

Our Business

Our principal business activity is lending to and accepting deposits from individuals, businesses, municipalities and other entities. We derive our income principally from interest charged on loans and, to a lesser extent, from interest and dividends earned on investments. We also derive income from non-interest sources such as fees received in connection with various lending and deposit services; trust, employee benefit, investment and insurance services; mortgage loan originations, sales and servicing; merchant and electronic banking services; and from time to time, gains on sales of assets. Our principal expenses include interest expense on deposits and borrowings, operating expenses, provisions for loan losses and income tax expense.

Our loan portfolio consists of a mix of real estate, consumer, commercial, agricultural and other loans, including fixed and variable rate loans. Our real estate loans comprise commercial real estate, construction (including residential, commercial and land development loans), residential, agricultural and other real estate loans. Fluctuations in the loan portfolio are directly related to the economies of the communities we serve. While each loan originated generally must meet minimum underwriting standards established in our credit policies, lending officers are granted discretion within pre-approved limits in approving and pricing loans to assure that the banking offices are responsive to competitive issues and community needs in each market area. We fund our loan portfolio primarily with the core deposits from our customers, generally without utilizing brokered deposits and with minimal reliance on wholesale funding sources.

Recent Developments

On April 6, 2016, the Company's bank subsidiary, First Interstate Bank, entered into a stock purchase agreement to acquire all of the outstanding stock of Flathead Bank of Bigfork ("Flathead Bank"), a Montana-based bank wholly owned by Flathead Holding Company. With total assets of \$231.6 million as of December 31, 2015, Flathead Bank operates seven branches in western and northwestern Montana. Upon closing of the transaction, which is expected to occur during the third quarter of 2016 subject to regulatory approval, all Flathead Bank branches will become branches of First Interstate Bank. Pursuant to the Purchase Agreement, First Interstate Bank will pay cash consideration of approximately \$34.2 million for the stock, subject to certain financial performance and other adjustments, the amount of which will be determined prior to the closing date of the transaction.

On July 2, 2013, the Board of Governors of the Federal Reserve Bank issued a final rule implementing a revised regulatory capital framework for U.S. banks in accordance with the Basel III international accord, or Basel III. Under Basel II, certain deductions and adjustments to regulatory capital began phasing in starting January 1, 2015 and will be fully implemented on January 1, 2018. The capital conservation buffer phases in beginning January 1, 2016 and will be fully implemented on January 1, 2019. As of March 31, 2016 and December 31, 2015, we had capital levels that, in all cases, exceeded the well-capitalized guidelines. For additional information regarding our capital levels, see "Capital Resources and Liquidity Management" included herein and "Note 11 – Regulatory Capital" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report.

Primary Factors Used in Evaluating Our Business

As a banking institution, we manage and evaluate various aspects of both our financial condition and our results of operations. We monitor our financial condition and performance and evaluate the levels and trends of the line items included in our balance sheet and statements of income, as well as various financial ratios that are commonly used in our industry. We analyze these ratios and financial trends against both our own historical levels and the financial condition and performance of comparable banking institutions in our region and nationally.

Results of Operations

Principal factors used in managing and evaluating our results of operations include return on average equity, net interest income, non-interest income, non-interest expense and net income. Net interest income is affected by the level of interest rates, changes in interest rates and changes in the volume and composition of interest earning assets and interest bearing liabilities. The most significant impact on our net interest income between periods is derived from the interaction of changes in the rates earned or paid on interest earning assets and interest bearing liabilities, which we refer to as interest rate spread. The volume of loans, investment securities and other interest earning assets, compared to the volume of interest bearing deposits and indebtedness, combined with the interest rate spread, produces changes in our net interest income between periods. Non-interest bearing sources of funds, such as demand deposits and stockholders' equity, also support earning assets.

The impact of free funding sources is captured in the net interest margin, which is calculated as net interest income divided by average earning assets. We evaluate our net interest income on factors that include the yields on our loans and other earning assets, the costs of our deposits and other funding sources, the levels of our net interest spread and net interest margin.

Table of Contents

We seek to increase our non-interest income over time and we evaluate our non-interest income relative to the trends of the individual types of non-interest income in view of prevailing market conditions.

We manage our non-interest expenses in consideration of growth opportunities and our community banking model that emphasizes customer service and responsiveness. We evaluate our non-interest expense on factors that include our non-interest expense relative to our average assets, our efficiency ratio and the trends of the individual categories of non-interest expense.

Finally, we seek to increase our net income and provide favorable shareholder returns over time, and we evaluate our net income relative to the performance of other bank holding companies on factors that include return on average assets, return on average equity, total shareholder return and growth in earnings.

Financial Condition

Principal areas of focus in managing and evaluating our financial condition include liquidity, the diversification and quality of our loans, the adequacy of our allowance for loan losses, the diversification and terms of our deposits and other funding sources, the re-pricing characteristics and maturities of our assets and liabilities, including potential interest rate exposure and the adequacy of our capital levels. We seek to maintain sufficient levels of cash and investment securities to meet potential payment and funding obligations, and we evaluate our liquidity on factors that include the levels of cash and highly liquid assets relative to our liabilities, the quality and maturities of our investment securities, the ratio of loans to deposits and any reliance on brokered certificates of deposit or other wholesale funding sources.

We seek to maintain a diverse and high quality loan portfolio and evaluate our asset quality on factors that include the allocation of our loans among loan types, credit exposure to any single borrower or industry type, non-performing assets as a percentage of total loans and OREO, and loan charge-offs as a percentage of average loans. We seek to maintain our allowance for loan losses at a level adequate to absorb probable losses inherent in our loan portfolio at each balance sheet date, and we evaluate the level of our allowance for loan losses relative to our overall loan portfolio and the level of non-performing loans and potential charge-offs.

We seek to fund our assets primarily using core customer deposits spread among various deposit categories, and we evaluate our deposit and funding mix on factors that include the allocation of our deposits among deposit types, the level of our non-interest bearing deposits, the ratio of our core deposits (i.e. excluding time deposits above \$100,000) to our total deposits and our reliance on brokered deposits or other wholesale funding sources, such as borrowings from other banks or agencies. We seek to manage the mix, maturities and re-pricing characteristics of our assets and liabilities to maintain relative stability of our net interest rate margin in a changing interest rate environment, and we evaluate our asset-liability management using models to evaluate the changes to our net interest income under different interest rate scenarios.

Finally, we seek to maintain adequate capital levels to absorb unforeseen operating losses and to help support the growth of our balance sheet. We evaluate our capital adequacy using the regulatory and financial capital ratios including leverage capital ratio, tier 1 risk-based capital ratio, total risk-based capital ratio, tangible common equity to tangible assets and tier 1 common capital to total risk-weighted assets.

Critical Accounting Estimates and Significant Accounting Policies

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States and follow general practices within the industries in which we operate. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. The most significant accounting policies we follow are summarized in Note 1 of the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2015.

Our critical accounting estimates are summarized below. Management considers an accounting estimate to be critical if: (1) the accounting estimate requires management to make particularly difficult, subjective and/or complex judgments about matters that are inherently uncertain and (2) changes in the estimate that are reasonably likely to occur from period to period, or the use of different estimates that management could have reasonably used in the current period, would have a material impact on our consolidated financial statements, results of operations or liquidity.

Table of Contents

Allowance for Loan Losses

The provision for loan losses creates an allowance for loan losses known and inherent in the loan portfolio at each balance sheet date. The allowance for loan losses represents management's estimate of probable credit losses inherent in the loan portfolio.

We perform a quarterly assessment of the risks inherent in our loan portfolio, as well as a detailed review of each significant loan with identified weaknesses. Based on this analysis, we record a provision for loan losses in order to maintain the allowance for loan losses at appropriate levels. In determining the allowance for loan losses, we estimate losses on specific loans, or groups of loans, where the probable loss can be identified and reasonably determined. Determining the amount of the allowance for loan losses is considered a critical accounting estimate because it requires significant judgment and the use of subjective measurements, including management's assessment of the internal risk classifications of loans, historical loan loss rates, changes in the nature of the loan portfolio, overall portfolio quality, industry concentrations, delinquency trends and the impact of current local, regional and national economic factors on the quality of the loan portfolio. Changes in these estimates and assumptions are possible and may have a material impact on our allowance, and therefore our consolidated financial statements or results of operations. The allowance for loan losses is maintained at an amount we believe is sufficient to provide for estimated losses inherent in our loan portfolio at each balance sheet date, and fluctuations in the provision for loan losses result from management's assessment of the adequacy of the allowance for loan losses. Management monitors qualitative and quantitative trends in the loan portfolio, including changes in the levels of past due, internally classified and non-performing loans. Note 1 of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2015 describes the methodology used to determine the allowance for loan losses. A discussion of the factors driving changes in the amount of the allowance for loan losses is included herein under the heading "Asset Quality."

Goodwill

The excess purchase price over the fair value of net assets from acquisitions, or goodwill, is evaluated for impairment at least annually and on an interim basis if an event or circumstance indicates that it is likely impairment has occurred. In any given year, the Company may elect to perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is in excess of its carrying value. If it is not more likely than not that the fair value of the reporting unit is in excess of the carrying value, or if the Company elects to bypass the qualitative assessment, a two-step quantitative impairment test is performed. In performing a quantitative test for impairment, the fair value of net assets is estimated based on an analysis of our market value, discounted cash flows and peer values. Determining the fair value of goodwill is considered a critical accounting estimate because of its sensitivity to market-based economics. In addition, any allocation of the fair value of goodwill to assets and liabilities requires significant management judgment and the use of subjective measurements. Variability in market conditions and key assumptions or subjective measurements used to estimate and allocate fair value are reasonably possible and could have a material impact on our consolidated financial statements or results of operations. Note 1 of the Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2015 describes our accounting policy with regard to goodwill.

Our annual goodwill impairment test is performed each year as of July 1st. Upon completion of the most recent evaluation, it was determined that the estimated fair value of net assets was greater than the carrying value of the Company. We will continue to monitor our performance and evaluate our goodwill for impairment annually or more frequently as needed.

Fair Values of Loans Acquired in Business Combinations

Loans acquired in business combinations are initially recorded at fair value with no carryover of the related allowance for credit losses. Determining the fair value of the loans involves estimating the amount and timing of principal and interest cash flows initially expected to be collected on the loans and discounting those cash flows at an appropriate market rate of interest. Going forward, the Company continues to evaluate reasonableness of expectations for the timing and the amount of cash to be collected. Subsequent decreases in expected cash flows may result in changes in the amortization or accretion of fair market value adjustments, and in some cases may result in the loan being considered impaired. For collateral dependent loans with deteriorated credit quality, the Company estimates the fair value of the underlying collateral of the loans. These values are discounted using market derived rates of return, with consideration given to the period of time and costs associated with the foreclosure and disposition of the collateral. Note 1 of the Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2015 describes our accounting policy with regard to acquired loans.

Table of Contents

Results of Operations

The following discussion and analysis is intended to provide greater details of the results of our operations and financial condition.

Net Interest Income. The most significant impact on our net interest income between periods is derived from the interaction of changes in the volume of and rates earned or paid on interest earning assets and interest bearing liabilities. The volume of loans, investment securities and other interest earning assets, compared to the volume of interest bearing deposits and indebtedness, combined with the interest rate spread, produces changes in the net interest income between periods.

The following tables present, for the periods indicated, condensed average balance sheet information, together with interest income and yields earned on average interest earning assets and interest expense and rates paid on average interest bearing liabilities.

Average Balance Sheets, Yields and Rates

(Dollars in thousands)

	Three Months Ended March 31,					
	2016			2015		
	Average Balance	Interest	Average Rate	Average Balance	Interest	Average Rate
Interest earning assets:						
Loans (1) (2)	\$5,222,905	\$63,371	4.88 %	\$4,895,146	\$59,816	4.96 %
Investment securities (2)	2,107,977	9,424	1.80	2,294,433	9,641	1.70
Interest bearing deposits in banks	506,839	645	0.51	546,583	389	0.29
Federal funds sold	1,292	2	0.62	1,174	2	0.69
Total interest earnings assets	7,839,013	73,442	3.77	7,737,336	69,848	3.66
Non-earning assets	754,962			752,077		
Total assets	\$8,593,975			\$8,489,413		
Interest bearing liabilities:						
Demand deposits	\$2,147,532	\$558	0.10 %	\$2,089,203	\$506	0.10 %
Savings deposits	1,985,233	650	0.13	1,882,816	628	0.14
Time deposits	1,118,049	2,020	0.73	1,220,590	2,175	0.72
Repurchase agreements	477,207	90	0.08	479,525	54	0.05
Other borrowed funds	8	—	—	4	—	—
Long-term debt	29,129	449	6.20	38,113	515	5.48
Subordinated debentures held by subsidiary trusts	82,477	663	3.23	82,477	589	2.90
Total interest bearing liabilities	5,839,635	4,430	0.31	5,792,728	4,467	0.31
Non-interest bearing deposits	1,755,515			1,723,001		
Other non-interest bearing liabilities	57,145			66,391		
Stockholders' equity	941,680			907,293		
Total liabilities and stockholders' equity	\$8,593,975			\$8,489,413		
Net FTE interest income		69,012			65,381	
Less FTE adjustments (2)		(1,062)			(1,056)	
Net interest income from consolidated statements of income		\$67,950			\$64,325	
Interest rate spread			3.46 %			3.35 %
Net FTE interest margin (3)			3.54 %			3.43 %
Cost of funds, including non-interest bearing demand deposits (4)			0.23 %			0.24 %

- (1) Average loan balances include non-accrual loans. Interest income on loans includes amortization of deferred loan fees net of deferred loan costs, which is not material.
- (2) Interest income and average rates for tax exempt loans and securities are presented on an FTE basis.
Net FTE interest margin during the period equals (i) the difference between annualized interest income on interest
- (3) earning assets and the annualized interest expense on interest bearing liabilities, divided by (ii) average interest earning assets for the period.
- (4) Calculated by dividing total annualized interest on interest bearing liabilities by the sum of total interest bearing liabilities plus non-interest bearing deposits.

Table of Contents

Our net interest income on a fully taxable equivalent, or FTE, basis increased \$3.6 million, or 5.6%, to \$69.0 million during the three months ended March 31, 2016, as compared to \$65.4 million for the same period in 2015. First quarter 2016 included one additional accrual day, as compared to first quarter 2015 as a result of leap year. This additional accrual day added approximately \$750 thousand to net FTE interest income during the first quarter of 2016. Excluding the impact of the additional accrual day during first quarter 2016, net FTE interest income increased approximately \$2.9 million, as compared to first quarter 2015, primarily due to increases in average loans outstanding, higher yields earned on investment securities and interest bearing deposits in banks and a shift in the mix of interest earning assets away from lower yielding assets into higher yielding loans, which made up approximately 67% of average interest-earning assets during the first quarter of 2016 compared to 63% during the first quarter of 2015.

Also positively impacting our net interest income during the three months ended March 31, 2016, as compared to the same period in the prior year, was interest accretion related to the fair valuation of acquired loans. Interest accretion related to the fair valuation of acquired loans was \$1.6 million during the three months ended March 31, 2016, of which \$549 thousand was the result of early loan payoffs. This compares to interest accretion of \$1.1 million during the three months ended March 31, 2015, of which \$351 thousand was the result of early loan payoffs. In addition, we recorded recoveries of previously charged-off interest of \$265 thousand during first quarter 2016, compared to \$591 thousand during first quarter 2015.

Our net interest margin ratio increased 11 basis points to 3.54% during first quarter 2016, as compared to 3.43% during first quarter 2015. Exclusive of the accelerated interest accretion related to early payoffs of acquired loans and the impact of recoveries of charged-off interest, our net interest margin ratio increased 15 basis points to 3.53% during first quarter 2016, compared to 3.38% during first quarter 2015. The increase in net interest margin ratio was primarily due to an 11 basis point increase in the yield on average interest earnings assets to 3.77% during first quarter 2016, as compared to 3.66% during first quarter 2015. The increase in the average yield on interest earning assets was primarily due to higher yields earned on interest-bearing deposits in bank and investment securities.

The table below sets forth, for the periods indicated, a summary of the changes in interest income and interest expense resulting from estimated changes in average asset and liability balances (volume) and estimated changes in average interest rates (rate). Changes which are not due solely to volume or rate have been allocated to these categories based on the respective percent changes in average volume and average rate as they compare to each other.

Analysis of Interest Changes Due to Volume and Rates

(Dollars in thousands)	Three Months Ended March 31, 2016		
	compared with Three Months Ended March 31, 2015		
	Volume	Rate	Net
Interest earning assets:			
Loans (1)	\$4,005	\$(450)	\$3,555
Investment securities (1)	(783)	566	(217)
Interest bearing deposits in banks	(28)	284	256
Federal funds sold	—	—	—
Total change	3,194	400	3,594
Interest bearing liabilities:			
Demand deposits	14	38	52
Savings deposits	34	(12)	22
Time deposits	(183)	28	(155)

Edgar Filing: FIRST INTERSTATE BANCSYSTEM INC - Form 10-Q

Other borrowed funds	—	—	—
Long-term debt	(121)	55	(66)
Subordinated debentures held by subsidiary trusts	—	74	74
Total change	(256)	219	(37)
Increase in FTE net interest income	\$ 3,450	\$ 181	\$ 3,631

(1)Interest income for tax exempt loans and securities are presented on an FTE basis.

Table of Contents

Provision for Loan Losses. Fluctuations in the provision for loan losses reflect management's estimate of possible loan losses based upon evaluation of the borrowers' ability to repay, collateral value underlying loans, loan loss trends and estimated effects of current economic conditions on our loan portfolio. During the three months ended March 31, 2016, we recorded a provision for loan losses of \$4.0 million, as compared to \$1.1 million during the same period in 2015. Our first quarter 2016 provision was elevated due to increases in specific reserves on impaired energy loans, the application of historical loss factors to downgraded credits and an increase in the general economic loss factor applied to loans in our Wyoming markets as a result of stress in the energy sector. For additional information regarding our provision for loan losses, see "Allowance for Loan Losses" included herein.

Non-interest Income. Our principal sources of non-interest income primarily include fee-based revenues such as payment services, mortgage banking and wealth management revenues, service charges on deposit accounts and other service charges, commissions and fees. Non-interest income decreased \$539 thousand or 1.9%, to \$27.2 million for the three months ended March 31, 2016, as compared to \$27.8 million for the same period in 2015. Significant components of this decrease are discussed below.

Payment services revenues consist of interchange fees that merchants pay for processing electronic payment transactions and ATM service fees. Payment services revenues increased \$619 thousand, or 8.4%, to \$8.0 million during the three months ended March 31, 2016, as compared to \$7.4 million for the same period in 2015, due to additional interchange income resulting from higher payment card transaction volumes.

Wealth management revenues are comprised principally of fees earned for management of trust assets and investment services revenues. Fees earned for management of trust assets are generally based on the market value of assets managed. Volatility in the equity and bond markets impacts the market value of trust assets and the related trust asset management fees. As of March 31, 2016, we had assets under management of \$4.6 billion, as compared to \$4.5 billion as of December 31, 2015. Wealth management revenues decreased \$362 thousand, or 7.3%, to \$4.6 million during the three months ended March 31, 2016, as compared to \$4.9 million during the same period in 2015, primarily due to decreases in the market values of assets under trust management.

Other income includes company-owned life insurance revenues, net gains or losses on securities held under deferred compensation plans, check printing income, agency stock dividends and gains on sales of miscellaneous assets. Other income decreased \$1.6 million, or 52.4%, to \$1.5 million during the three months ended March 31, 2016, as compared to \$3.1 million during the same period in 2015. During first quarter 2015, other income included the reversal of a \$1.0 million expense accrual due to final settlement of secondary investor claims assumed as part of acquisitions in 2014. The remaining decrease is primarily due to lower earnings on assets held under deferred compensation plans during first quarter 2016, as compared to the same period in 2015.

Non-interest Expense. Non-interest expense increased \$1.3 million, or 2.1%, to \$60.9 million for the three months ended March 31, 2016, as compared to \$59.6 million for the same period in 2015. Significant components of the increase are discussed below.

Salaries and wages expense decreased \$667 thousand, or 2.6%, to \$24.7 million during the three months ended March 31, 2016, as compared to \$25.3 million during the same period in 2015, primarily due to lower incentive bonus expense, which was partially offset by one-time separation and special bonus expense of \$1.2 million recorded during first quarter 2016 and inflationary increases in salary expense.

Employee benefits expense increased \$1.0 million, or 13.1%, to \$8.8 million for the three months ended March 31, 2016, as compared to \$7.8 million during the same period in 2015, primarily due to increases in payroll taxes, group health insurance and profit sharing expenses. These increases were partially offset by lower earnings on assets held

under deferred compensation plans.

Furniture and equipment expense decreased \$1.5 million or 40.5%, to \$2.3 million for the three months ended March 31, 2016, as compared to \$3.8 million during the same period in 2015. Effective January 1, 2016, we began capturing certain software costs separately from equipment costs, resulting in a decrease in furniture and equipment expense of approximately \$2.1 million and a corresponding increase in outsourced technology expenses during first quarter 2016, as compared to fourth quarter 2015.

Outsourced technology services expense increased \$2.4 million or 96.2%, to \$4.8 million for the three months ended March 31, 2016, as compared to \$2.5 million during the same period in 2015, primarily due to the classification of approximately \$2.1 million of software costs as outsourced technology services expense in the current year versus classification as furniture and equipment expense in the prior year.

Table of Contents

Income Tax Expense. Our effective federal income tax rate was 29.8% for the three months ended March 31, 2016 and 29.0% for the three months ended March 31, 2015. State income tax applies primarily to pretax earnings generated within Montana and South Dakota. Our effective state tax rate was 3.8% for the three months ended March 31, 2016 and 4.2% for the three months ended March 31, 2015. Fluctuations in our effective income tax rates were primarily due to the timing of tax credits.

Financial Condition

Total assets decreased \$37 million, or less than 1.0%, to \$8,691 million as of March 31, 2016, from \$8,728 million as of December 31, 2015. Significant fluctuations in balance sheet accounts are discussed below.

Loans. Total loans remained stable at \$5,244 million and \$5,246 million as of March 31, 2016 and December 31, 2015, respectively. Loan categories with the most notable fluctuations are discussed below.

Commercial loans are typically made to small and medium-sized manufacturing, wholesale, retail and service businesses for working capital needs and business expansions. The loans are generally made with business operations as the primary source of repayment, but also include loans collateralized by inventory, accounts receivable, equipment and/or personal guarantees. Commercial loans increased \$33 million, or 4.1%, to \$825 million as of March 31, 2016, from \$792 million as of December 31, 2015, primarily due to continuing business expansion in the Company's market areas.

Commercial real estate loans include loans for property and improvements used commercially by the borrower or for lease to others for the production of goods or services. Approximately 50% of our commercial real estate loans were owner occupied as of March 31, 2016 and December 31, 2015. Commercial real estate loans decreased \$29 million, or 1.6%, to \$1,764 million as of March 31, 2016, from \$1,793 million as of December 31, 2015, primarily due to the repayment of one large loan and an increase in loan participations sold.

Indirect loans include consumer loan contracts advanced for the purchase of automobiles, recreational vehicles, boats and other consumer goods that we acquire from the consumer product dealer network within the market areas we serve. Indirect consumer loans increased \$29 million, or 4.6%, to \$651 million as of March 31, 2016, from \$623 million as of December 31, 2015, primarily due to the continued expansion of our indirect lending program within our existing market areas and increases in the average loan amounts advanced.

Agricultural loans generally consist of short and medium-term loans and lines of credit that are primarily used for crops, livestock, equipment and general operations that are ordinarily secured by assets such as livestock or equipment and are repaid from the operations of the farm or ranch. Agricultural loans decreased \$16 million, or 11.2%, to \$126 million as of March 31, 2016, from \$142 million as of December 31, 2015. Management attributes this decrease to seasonal reductions in credit lines that typically occur during the first quarter of each year.

Non-performing Assets. Non-performing assets include non-accrual loans, loans contractually past due 90 days or more and still accruing interest and OREO. The following table sets forth information regarding non-performing assets as of the dates indicated:

Nonperforming Assets and Troubled Debt Restructurings

(Dollars in thousands)	March 31, 2016	December 31, 2015	September 30, 2015	June 30, 2015	March 31, 2015

Table of Contents

Non-performing loans. Non-performing loans include non-accrual loans and loans contractually past due 90 days or more. We monitor and evaluate collateral values on non-performing loans quarterly. Appraisals are required on all non-performing loans every 18-24 months, or sooner as conditions necessitate. We update valuations on collateral underlying oil and gas credits based on recent market-based oil price forecasts. We also monitor real estate values by market for our larger market areas. Based on trends in real estate values, adjustments may be made to the appraised value based on time elapsed between the appraisal date and the impairment analysis or a new appraisal may be ordered. Appraised values in our smaller market areas may be adjusted based on trends identified through discussions with local realtors and appraisers. Appraisals are also adjusted for selling costs. The collateral valuation is then compared to the loan balance and any resulting shortfall is recorded in the allowance for loan losses as a specific valuation allowance. Overall increases in specific valuation allowances will result in higher provisions for loan losses. Provisions for loan losses are also impacted by changes in the historical or general valuation elements of the allowance for loan losses.

The following table sets forth the allocation of our non-performing loans among our various loan categories as of the dates indicated:

Non-Performing Loans by Loan Type

(Dollars in thousands)	March 31, 2016	Percent of Total	December 31, 2015	Percent of Total
Real estate:				
Commercial	\$22,841	33.5 %	\$ 24,189	33.6 %
Construction:				
Land acquisition and development	7,154	10.6 %	7,956	11.1 %
Commercial	1,055	1.5 %	955	1.3 %
Residential	283	0.4 %	293	0.4 %
Total construction	8,492	12.5 %	9,204	12.8 %
Residential	4,851	7.1 %	7,305	10.1 %
Agricultural	5,604	8.2 %	5,355	7.4 %
Total real estate	41,788	61.3 %	46,053	63.9 %
Consumer	2,074	3.0 %	1,918	2.7 %
Commercial	22,811	33.4 %	23,012	32.0 %
Agricultural	1,214	1.8 %	690	1.0 %
Other	312	0.5 %	314	0.4 %
Total non-performing loans	\$68,199	100.0 %	\$ 71,987	100.0 %

Non-accrual loans. We generally place loans, excluding acquired credit impaired loans, on non-accrual when they become 90 days past due, unless they are well secured and in the process of collection. When a loan is placed on non-accrual status, any interest previously accrued but not collected is reversed from income. If all loans on non-accrual had been current in accordance with their original terms, gross income of approximately \$790 thousand and \$832 thousand would have been accrued for the three months ended March 31, 2016 and 2015, respectively. Non-accrual loans, the largest component of non-performing assets, decreased \$2 million, to \$64 million as of March 31, 2016, from \$66 million as of December 31, 2015, primarily due to the movement of lower quality loans out of the portfolio through foreclosure.

OREO. OREO consists of real property acquired through foreclosure on the collateral underlying defaulted loans. We initially record OREO at fair value less estimated selling costs. Any excess of loan carrying value over the fair value of the real estate acquired is recorded as a charge against the allowance for loan losses. Estimated losses that result from the ongoing periodic valuation of these properties are charged to earnings in the period in which they are

identified. The fair values of OREO properties are estimated using appraisals and management estimates of current market conditions. OREO properties are appraised every 18-24 months unless deterioration in local market conditions indicates the need to obtain new appraisals sooner. OREO properties are evaluated by management quarterly to determine if additional write-downs are appropriate or necessary based on current market conditions. Quarterly evaluations include a review of the most recent appraisal of the property and reviews of recent appraisals and comparable sales data for similar properties in the same or adjacent market areas. Commercial and agricultural OREO properties are listed with unrelated third party professional real estate agents or brokers local to the areas where the marketed properties are located. Residential properties are typically listed with local realtors, after any redemption period has expired. We rely on these local real estate agents and/or brokers to list the properties on the local multiple listing system, to provide marketing materials and advertisements for the properties and to conduct open houses.

Table of Contents

OREO increased \$3 million, or 48.0%, to \$9 million as of March 31, 2016, from \$6 million as of December 31, 2015, primarily due to foreclosures on one residential real estate property and one land development property during first quarter 2016. As of March 31, 2016, the composition of OREO properties was 44% residential real estate, 31% land and land development, 21% commercial, 3% agricultural real estate and 1% commercial construction.

Allowance for Loan Losses. The Company performs a quarterly assessment of the adequacy of its allowance for loan losses in accordance with generally accepted accounting principles. The methodology used to assess the adequacy is consistently applied to the Company's loan portfolio. The allowance for loan losses is established through a provision for loan losses based on our evaluation of known and inherent risk in our loan portfolio at each balance sheet date. In determining the allowance for loan losses, we estimate losses on specific loans, or groups of loans, where the probable loss can be identified and reasonably determined. The balance of the allowance for loan losses is based on internally assigned risk classifications of loans, historical loan loss rates, changes in the nature of the loan portfolio, overall portfolio quality, industry concentrations, delinquency trends, current economic factors and the estimated impact of current economic conditions on certain historical loan loss rates. See the discussion under "Critical Accounting Estimates and Significant Accounting Policies — Allowance for Loan Losses."

The allowance for loan losses is increased by provisions charged against earnings and net recoveries of charged-off loans and is reduced by negative provisions credited to earnings and net loan charge-offs. The allowance for loan losses consists of three elements:

Specific valuation allowances associated with impaired loans. Specific valuation allowances are determined based on assessment of the fair value of the collateral underlying the loans as determined through independent appraisals, (1) the present value of future cash flows, observable market prices and any relevant qualitative or environmental factors impacting the loan. No specific valuation allowances are recorded for impaired loans that are adequately secured.

Historical valuation allowances based on loan loss experience for similar loans with similar characteristics and trends. Historical valuation allowances are determined by applying percentage loss factors to the credit exposures from outstanding loans. For commercial, agricultural and real estate loans, loss factors are applied based on the (2) internal risk classifications of these loans. For consumer loans, loss factors are applied on a portfolio basis. For commercial, agriculture and real estate loans, loss factor percentages are based on a migration analysis of our historical loss experience, designed to account for credit deterioration. For consumer loans, loss factor percentages are based on a one-year loss history.

General valuation allowances determined based on changes in the nature of the loan portfolio, overall portfolio (3) quality, industry concentrations, delinquency trends, general economic conditions and other qualitative risk factors both internal and external to us.

Based on the assessment of the adequacy of the allowance for loan losses, management records provisions for loan losses to maintain the allowance for loan losses at appropriate levels.

During fourth quarter 2015, we added a general economic qualitative loss factor to our allowance for loan loss calculation to estimate the potential impact of economic stresses in the energy sector on loans to borrowers in our Wyoming markets, which are heavily impacted by energy prices. As of March 31, 2016, our direct exposure to the energy sector was approximately \$69 million in outstanding loans, including approximately \$50 million related to drilling and extraction activity and approximately \$19 million advanced to service companies. We also had commitments to lend an additional \$27 million to energy borrowers. Reserves allocated to energy loans as a percentage of total energy loans totaled 11.7% as of March 31, 2016, compared to 7.8% as of December 31, 2015. The

increase in reserves allocated to energy loans was primarily due to specific valuation allowances related to the loans of two energy borrowers and an increase in the general economic loss factor applied to loans in our Wyoming markets.

Loans acquired in business combinations are recorded at fair value with no allowance for loan losses on the date of acquisition. Subsequent to the acquisition date, an allowance for loan loss is recorded for the emergence of new probable and estimable losses on loans acquired without evidence of credit impairment. Loans acquired with evidence of credit impairment are regularly monitored and to the extent that the performance has deteriorated from management's expectations at the date of acquisition, an allowance for loan losses is established. As of March 31, 2016, management determined that an allowance for loan losses related to acquired loans of \$455 thousand was required under generally accepted accounting principles.

Loans, or portions thereof, are charged-off against the allowance for loan losses when management believes that the collectability of the principal is unlikely, or, with respect to consumer installment loans, according to an established delinquency schedule. Generally, loans are charged-off when (1) there has been no material principal reduction within the previous 90 days

Table of Contents

and there is no pending sale of collateral or other assets, (2) there is no significant or pending event which will result in principal reduction within the upcoming 90 days, (3) it is clear that we will not be able to collect all or a portion of the loan, (4) payments on the loan are sporadic, will result in an excessive amortization or are not consistent with the collateral held and (5) foreclosure or repossession actions are pending. Loan charge-offs do not directly correspond with the receipt of independent appraisals or the use of observable market data if the collateral value is determined to be sufficient to repay the principal balance of the loan.

If the impaired loan is adequately collateralized, a specific valuation allowance is not recorded. As such, significant changes in impaired and non-performing loans do not necessarily correspond proportionally with changes in the specific valuation component of the allowance for loan losses. Additionally, management expects the timing of charge-offs will vary between quarters and will not necessarily correspond proportionally to changes in the allowance for loan losses or changes in non-performing or impaired loans due to timing differences among the initial identification of an impaired loan, recording of a specific valuation allowance for the impaired loan and any resulting charge-off of uncollectible principal.

The following table sets forth information regarding our allowance for loan losses as of and for the periods indicated. Allowance for Loan Losses

(Dollars in thousands)	Three Months Ended				
	March 31 2016	December 31 2015	September 30, 2015	June 30, 2015	March 31, 2015

Average loans	5,222,905	5,194,970	5,222,905	4,991,416	4,895,146

Edgar Filing: FIRST INTERSTATE BANCSYSTEM INC - Form 10-Q

Net loans charged-off to average loans, annualized	0.07	% 0.06	% 0.26	% 0.01	% —	%
Allowance to period end loans	1.52	% 1.46	% 1.43	% 1.50	% 1.53	%

Our allowance for loan losses as a percentage of period end loans increased to 1.52% as of March 31, 2016, as compared to 1.46% as of December 31, 2015.

Although we have established our allowance for loan losses in accordance with accounting principles generally accepted in the United States and we believe that our allowance for loan losses is adequate to provide for known and inherent losses in the portfolio at all times, future provisions will be subject to on-going evaluations of the risks in the loan portfolio. If the economy declines or asset quality deteriorates, material additional provisions could be required.

Table of Contents

Investment Securities. We manage our investment portfolio to obtain the highest yield possible, while meeting our risk tolerance and liquidity guidelines and satisfying the pledging requirements for deposits of state and political subdivisions and securities sold under repurchase agreements. Investment securities increased \$87 million, or 4.2%, to \$2,145 million, or 24.7% of total assets, as of March 31, 2016, from \$2,058 million, or 23.6% of total assets, as of December 31, 2015. As of March 31, 2016, the estimated duration of our investment portfolio was 2.4 years, as compared to 2.8 years as of December 31, 2015.

We evaluate our investment portfolio quarterly for other-than-temporary declines in the market value of individual investment securities. This evaluation includes monitoring credit ratings; market, industry and corporate news; volatility in market prices; and, determining whether the market value of a security has been below its cost for an extended period of time. As of March 31, 2016, we had investment securities with fair values aggregating \$89 million that had been in a continuous loss position more than twelve months. Gross unrealized losses on these securities of \$1.2 million as of March 31, 2016 were attributable to changes in interest rates. No impairment losses were recorded during the three months ended March 31, 2016 and 2015.

Cash and Cash Equivalents. Cash and cash equivalents decreased \$124 million, or 16.0%, to \$656 million as of March 31, 2016, from \$780 million as of December 31, 2015. During the first three months of 2016, stock repurchases were funded through available funds resulting in decreases in cash and cash equivalents from December 31, 2015 to March 31, 2016. Remaining decreases in cash and cash equivalents occurred in the normal course of business and are not reflective of changes in business plan or strategy.

Goodwill. Goodwill decreased \$42 thousand to \$204 million as of March 31, 2016, from \$205 million as of December 31, 2015. During first quarter 2016, we finalized the fair valuation of deferred tax assets acquired in the Absarokee Bancorporation, Inc. acquisition resulting in a \$42 thousand decrease in recorded goodwill.

Deposits. Our deposits consist of non-interest bearing and interest bearing demand, savings, individual retirement and time deposit accounts. Total deposits increased \$19 million, or less than 1.0%, to \$7,107 million as of March 31, 2016, from \$7,089 million as of December 31, 2015. The following table summarizes our deposits as of the dates indicated:

Deposits

(Dollars in thousands)	March 31, 2016	Percent of Total	December 31, 2015	Percent of Total
Non-interest bearing demand	\$1,860,472	26.2 %	\$ 1,823,716	25.5 %
Interest bearing:				
Demand	2,142,326	30.1	2,133,273	30.5
Savings	2,001,329	28.2	1,843,355	26.3
Time, \$100 and over	478,527	6.7	520,125	7.4
Time, other (1)	624,809	8.8	718,095	10.2
Total interest bearing	5,246,991	73.8	5,214,848	74.5
Total deposits	\$7,107,463	100.0%	\$ 7,038,564	100.0%

(1) Included in Time, other are Certificate of Deposit Account Registry Service, or CDAR, deposits of \$32 million as of March 31, 2016 and \$38 million as of December 31, 2015.

Securities Sold Under Repurchase Agreements. In addition to deposits, repurchase agreements with commercial depositors, which include municipalities, provide an additional source of funds. Under repurchase agreements, deposit balances are invested in short-term U.S. government agency securities overnight and are then repurchased the following day. All outstanding repurchase agreements are due in one day. Repurchase agreement balances decreased \$45 million, or 8.8%, to \$466 million as of March 31, 2016, from \$511 million as of December 31, 2015. Fluctuations in repurchase agreement balances correspond with fluctuations in the liquidity of our customers.

Deferred Tax Liability. Our net deferred tax liability increased \$2 million, or 22.7%, to \$12 million as of March 31, 2016, from \$10 million as of December 31, 2015, primarily due to increases in deferred tax liabilities related to unrealized gains on available-for sale investment securities.

Accounts Payable and Accrued Expenses. Accounts payable and accrued expenses decreased \$5 million, or 9.3%, to \$48 million as of March 31, 2016, from \$53 million as of December 31, 2015. This decrease is due to fluctuations in the timing and amounts of corporate income tax payments.

Table of Contents

Capital Resources and Liquidity Management

Stockholders' equity is influenced primarily by earnings, dividends, sales and redemptions of common stock and changes in the unrealized holding gains or losses, net of taxes, on available-for-sale investment securities. Stockholders' equity decreased \$9 million, or less than 1.0%, to \$942 million as of March 31, 2016, from \$950 million as of December 31, 2015. During the three months ended March 31, 2016, increases in stockholders' equity due to the retention of earnings, increases in unrealized holding gains, net of taxes, on available-for-sale investment securities and proceeds from the issuance of stock options were more than offset by the repurchase and retirement of Class A common shares. During first quarter 2016, we repurchased and retired 948,242 shares of our Class A common stock in open market transactions at an aggregate purchase price of \$24.8 million. The repurchases were made pursuant to a stock purchase plan approved by our Board of Directors. For additional information regarding the repurchase, see "Note 8 – Capital Stock" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report.

On April 18, 2016, we declared a quarterly dividend to common stockholders of \$0.22 per share payable on May 13, 2016 to to shareholders of record as of May 2, 2016. This dividend equates to a 3.3% annual yield based on the \$27.09 average closing price of the Company's common stock during first quarter 2016.

On July 2, 2013, the Board of Governors of the Federal Reserve Bank issued a final rule implementing a revised regulatory capital framework for U.S. banks in accordance with the Basel III international accord, or Basel III. Under Basel II, certain deductions and adjustments to regulatory capital began phasing in starting January 1, 2015 and will be fully implemented on January 1, 2018. The capital conservation buffer phases in beginning January 1, 2016 and will be fully implemented on January 1, 2019. As of March 31, 2016 and December 31, 2015, we had capital levels that, in all cases, exceeded the well-capitalized guidelines. For additional information regarding our capital levels, see "Note 11 – Regulatory Capital" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report.

As of March 31, 2016 and December 31, 2015, we had capital levels that, in all cases, exceeded the well-capitalized guidelines. For additional information regarding our capital levels, see "Note 11 – Regulatory Capital" in the accompanying "Notes to Unaudited Consolidated Financial Statements" included in this report.

Liquidity. Liquidity measures our ability to meet current and future cash flow needs on a timely basis and at a reasonable cost. We manage our liquidity position to meet the daily cash flow needs of customers, while maintaining an appropriate balance between assets and liabilities to meet the return on investment objectives of our shareholders. Our liquidity position is supported by management of liquid assets and liabilities and access to alternative sources of funds. Liquid assets include cash, interest bearing deposits in banks, federal funds sold, available-for-sale investment securities and maturing or prepaying balances in our held-to-maturity investment and loan portfolios. Liquid liabilities include core deposits, federal funds purchased, securities sold under repurchase agreements and borrowings. Other sources of liquidity include the sale of loans, the ability to acquire additional national market funds through non-core deposits, the issuance of additional collateralized borrowings such as FHLB advances, the issuance of debt securities, additional borrowings through the Federal Reserve's discount window and the issuance of preferred or common securities.

Our short-term and long-term liquidity requirements are primarily to fund on-going operations, including payment of interest on deposits and debt, extensions of credit to borrowers, capital expenditures and shareholder dividends. These liquidity requirements are met primarily through cash flow from operations, redeployment of prepaying and maturing balances in our loan and investment portfolios, debt financing and increases in customer deposits. For additional information regarding our operating, investing and financing cash flows, see the unaudited "Consolidated Statements of Cash Flows," included in Part I, Item 1.

As a holding company, we are a corporation separate and apart from the Bank and, therefore, we provide for our own liquidity. Our main sources of funding include management fees and dividends declared and paid by the Bank and access to capital markets. There are statutory, regulatory and debt covenant limitations that affect the ability of our subsidiary bank to pay dividends to us. Management believes that such limitations will not impact our ability to meet our ongoing short-term cash obligations.

Management continuously monitors our liquidity position and adjustments are made to the balance between sources and uses of funds as deemed appropriate. Our management is not aware of any events that are reasonably likely to have a material adverse effect on our liquidity, capital resources or operations. In addition, our management is not aware of any regulatory recommendations regarding liquidity, which if implemented, would have a material adverse effect on us.

Recent Accounting Pronouncements

See “Note 15 – Recent Authoritative Accounting Guidance” in the accompanying “Notes to Unaudited Consolidated Financial Statements” included in this report for details of recently issued accounting pronouncements and their expected impact on our financial statements.

Item 3.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As of March 31, 2016, there have been no material changes in the quantitative and qualitative information about market risk provided pursuant to Item 305 of Regulation S-K as presented in our Annual Report on Form 10-K for the year ended December 31, 2015.

Item 4.

CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined under Rules 13a-15(e) and 15d-15(e) of the Exchange Act. As of March 31, 2016, an evaluation was performed, under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of March 31, 2016, were effective in ensuring that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods required by the SEC’s rules and forms, and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting for the quarter ended March 31, 2016, that have materially affected, or are reasonably likely to materially affect, such control.

Limitations on Controls and Procedures

The effectiveness of our disclosure controls and procedures and our internal control over financial reporting is subject to various inherent limitations, including cost limitations, judgments used in decision making, assumptions about the likelihood of future events, the soundness of our systems, the possibility of human error, and the risk of fraud. Moreover, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions and the risk that the degree of compliance with policies or procedures may deteriorate over time. Because of these limitations, any system of disclosure controls and procedures or internal control over financial reporting may not be successful in preventing all errors or fraud or in making all material information known in a timely manner to the appropriate levels of management.

PART II.

OTHER INFORMATION

Item 1. Legal Proceedings

There have been no material changes in legal proceedings as described in our Annual Report on Form 10-K for the year ended December 31, 2015.

Item 1A. Risk Factors

There have been no material changes in risk factors described in our Annual Report on Form 10-K for the year ended December 31, 2015.
