**INTRABIOTICS PHARMACEUTICALS, INC.**

**NOTES TO CONDENSED FINANCIAL STATEMENTS**

**(Unaudited)**

**Note 1. Basis of Presentation and Summary of Significant Accounting Policies**

The accompanying condensed financial statements are unaudited and have been prepared by IntraBiotics Pharmaceuticals, Inc. (the Company) in accordance with the rules and regulations of the Securities and Exchange Commission for interim financial information, and in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X.

Certain information and footnote disclosures normally included in the Company's annual audited financial statements (as required by accounting principles generally accepted in the United States) have been condensed or omitted. The interim condensed financial statements, in the opinion of management, reflect all adjustments (consisting entirely of normal recurring adjustments) necessary for a fair presentation of the Company's financial position as of June 30, 2005, the results of its operations for the three and six months ended June 30, 2005 and 2004 and cash flows for the six months ended June 30, 2005 and 2004.

The results of operations for the interim periods are not necessarily indicative of the results of operations to be expected for the entire fiscal year. These interim condensed financial statements should be read in conjunction with the audited financial statements for the year ended December 31, 2004, which are contained in the Company's Annual Report on Form 10-K, and filed with the Securities and Exchange Commission on March 10, 2005. The condensed balance sheet as of December 31, 2004 is derived from such audited financial statements.

*Use of Estimates*

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes, including amounts accrued for clinical trial costs and stock-based compensation.

The Company's estimate of accrued costs is based on historical experience, information received from third parties and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could therefore differ materially from those estimates under different assumptions or conditions.

**Note 2. Stock-Based Compensation**

As permitted by Statement of Financial Accounting Standards No. 123 (SFAS 123), Accounting for Stock-Based Compensation, as amended by Statement of Financial Accounting Standards No. 148, Accounting for Stock-Based Compensation Transition and Disclosure, the Company has elected to follow Accounting Principles Board Opinion No. 25 (APB 25), Accounting for Stock Issued to Employees and related interpretations in accounting for stock-based employee compensation. Under APB 25, if the exercise price of an employee or director stock option is set equal or in excess of the fair market value of the underlying stock on the date of grant, no compensation expense is recognized. In February 2003, certain stock options issued to employees for which the exercise prices had originally been set at less than the fair market value of the underlying stock on the grant date were cancelled and re-granted in a one-for-one exchange. The Company had recorded deferred compensation for the difference between the original exercise price and the fair market value of the underlying stock on the grant date as a component of stockholders' equity, and the total

was being amortized on a straight-line basis over the vesting period of the original awards, ranging from four to six years. The related re-granted options all vest over a four-year period, and the remaining unamortized deferred compensation as of the re-grant date is now being amortized over the new four-year vesting schedule, commencing at the date of re-grant.

In February 2003, the Board of Directors approved a cancellation and re-grant of 308,835 unexercised stock options held by existing employees and directors of the Company in a one-for-one exchange and 12,500 options that were re-granted in connection with the cancellation of 54,166 unexercised stock options held by a director of the Company. The re-granted options have an exercise price equal to the closing price of the Company's common stock on the NASDAQ National Market on February 5, 2003, or \$2.76 per share. The options generally vest over a four-year period and will expire in February 2008 if not previously exercised. Variable accounting is being applied to the re-granted options throughout their term.

**Table of Contents**

Options or stock awards issued to non-employees are recorded at their fair value as determined in accordance with SFAS 123 and the FASB's Emerging Issues Task Force issue No. 96-18, "Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services", and are recognized over the related service period and are periodically re-measured as the underlying options vest. This resulted in stock compensation expense of \$69,000 and \$62,000 during the three months ended June 30, 2005 and 2004, respectively and \$125,000 and \$375,000 during the six months ended June 30, 2005 and 2004, respectively. In order to calculate such stock compensation expense, the Company used the Black-Scholes option pricing model with the following weighted-average assumptions for the three and six months ended June 30, 2005; risk-free interest rate 3.87% and 4.12%, volatility 0.89 and 0.89, remaining contractual term 8.92 and 8.87 years and a dividend yield 0% and 0%, respectively and for the for the three and six months ended June 30, 2004; risk-free interest rate 3.70% and 3.75%, volatility 1.00 and 1.00, remaining contractual term 9.43 and 8.87 years and a dividend yield 0% and 0%, respectively.

The following table illustrates the effect on net loss and net loss per share applicable to common stockholders if the Company had applied the fair value recognition provisions of SFAS 123 to stock-based employee compensation. For purposes of this pro-forma disclosure, the value of the options is estimated using a Black-Scholes option pricing model and amortized ratably to expense over the options' vesting periods.

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2005</b>	<b>2004</b>	<b>2005</b>	<b>2004</b>
	<b>(In thousands, except per share amounts)</b>		<b>(In thousands, except per share amounts)</b>	
Net loss applicable to common stockholders, as reported	\$ (1,306)	\$ (5,203)	\$ (2,440)	\$ (11,505)
Add: Stock-based employee compensation expense (recovery) included in reported net loss applicable to common stockholders	11	(953)	(20)	(662)
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards	(529)	(1,071)	(1,363)	(1,685)
Net loss applicable to common stockholders, pro forma	\$ (1,824)	\$ (7,227)	\$ (3,823)	\$ (13,852)
Net loss per share applicable to common stockholders:				
Basic and diluted as reported	\$ (0.14)	\$ (0.73)	\$ (0.27)	\$ (1.84)
Basic and diluted pro forma	\$ (0.20)	\$ (1.01)	\$ (0.42)	\$ (2.22)

The fair value of stock options granted to employees was estimated at the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2005</b>	<b>2004</b>	<b>2005</b>	<b>2004</b>

Edgar Filing: INTRABIOTICS PHARMACEUTICALS INC /DE - Form 10-Q

Risk-free interest rate	n/a	3.70%	3.79%	3.40%
Volatility	n/a	1.00	0.89	1.00
Dividend yield	n/a	0.00%	0.00%	0.00%
		5.0	6.1	5.0
Expected life of option	n/a	years	years	years

No stock options were granted to employees during the three months ended June 30, 2005.

**Table of Contents****Note 3. Comprehensive Loss**

The components of comprehensive loss in each period presented are as follows:

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2005</b>	<b>2004</b>	<b>2005</b>	<b>2004</b>
	<b>(In thousands)</b>		<b>(In thousands)</b>	
Net loss	\$ (1,246)	\$ (5,138)	\$ (2,320)	\$ (11,375)
Unrealized gain (loss) on available-for-sale securities	51	(56)	(2)	(58)
Comprehensive loss	\$ (1,195)	\$ (5,194)	\$ (2,322)	\$ (11,433)

**Note 4. Net Loss Per Share**

Basic and diluted net loss per share applicable to common stockholders is presented in accordance with Financial Accounting Standards Board Statement No. 128, Earnings Per Share, and is calculated using the weighted-average number of shares of common stock outstanding during the period. As the Company's potentially dilutive securities (stock options, warrants and convertible preferred stock) were anti-dilutive for all periods presented, they are not included in the calculations of diluted net loss per share applicable to common stockholders. The total number of shares underlying the stock options, warrants and convertible preferred stock excluded from the calculations of net loss per share applicable to common stockholders was 3,233,024 and 3,670,296 for the three months ended June 30, 2005 and 2004, respectively and 3,280,453 and 3,502,796 for the six months ended June 30, 2005 and 2004, respectively.

**Note 5. Stockholders' Equity**

In February 2005, a holder of 25 shares of Preferred Stock converted the shares into 131,529 shares of common stock. At the same time, the same investor exercised warrants to purchase 65,764 shares of common stock, using the net exercise method, resulting in the issuance of 30,704 shares of common stock. There were no cash proceeds to the Company resulting from these transactions.

In January 2005, the Company issued 16,620 shares of common stock in connection with dividends payable to holders of preferred stock on December 31, 2004. In April 2005, the Company issued 16,425 shares of common stock in connection with dividends payable to holders of preferred stock on March 31, 2005. In addition, during the six months ended June 30, 2005, the Company issued 18,288 shares of common stock in connection with the exercise of stock options for cash proceeds of \$49,000.

**Note 6. Commitments**

At June 30, 2005, the Company had no operating leases commitments.

In accordance with various severance plans that covered employees terminated in June of 2005, the Company is obligated pay for certain health costs. These commitments totaled \$39,000 as of June 30, 2005. See Note 7 Restructuring Charges for additional information regarding payments under severance plans.

**Note 7. Restructuring Charges**

In June 2004, the Company discontinued its clinical trial of iseganan for the prevention of ventilator-associated pneumonia ( VAP ), following a recommendation of the independent data monitoring committee. As a result, the Company terminated its iseganan development program in August 2004; implemented a restructuring plan (the 2004 Restructuring ) terminating employees and various operating lease commitments; and focused its efforts on evaluating various strategic options. On May 5, 2005, after considering a variety of strategic alternatives, none of which was determined by management and the Board of Directors to be in the best interests of the Company and its shareholders, the Board of Directors decided to suspend the Company s active strategic evaluation process and reduce operating expenses to a minimum appropriate level (the 2005 Restructuring ). In accordance with these plans, the Company terminated all of its remaining employees on June 15, 2005. All restructuring charges are accounted for in accordance with Statement of Financial Accounting Standards No. 146 ( SFAS 146 ), Accounting for Costs Associated with Exit or Disposal Activities.

**Table of Contents**

*2005 Restructuring*

The Company recorded a restructuring charge of \$675,000 during the three months ended June 30, 2005, all of which related to employee termination benefits. As of June 30, 2005, \$636,000 of the restructuring charge had been settled in cash. The remaining amount of \$39,000 was unpaid and is included under the caption "Other accrued liabilities" on the accompanying balance sheet. This liability relates to certain health and other benefits that will be provided to terminated employees and will be settled in cash by December 2006.

*2004 Restructuring*

The Company had recorded a liability of \$5,000 as of December 31, 2004 related to the 2004 restructuring, which was settled in cash during the six months ended June 30, 2005

**ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

*The following discussion and analysis of our financial condition and results of operations should be read together with our financial statements and related notes included in our quarterly report on this Form 10-Q and in our annual report on Form 10-K for the year ended December 31, 2004. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. The actual results may differ materially from those anticipated in these forward-looking statements as a result of many factors, including but not limited to those set forth under "Factors That Could Affect Future Results". All forward-looking statements included in this document are based on information available to us on the date of this document and we assume no obligation to update any forward-looking statements contained in this Form 10-Q.*

**Overview**

Since inception in 1994, we have devoted substantially all of our efforts to research and development of anti-microbial drugs, and have generated no product revenues. From the fourth quarter of 2002 until June 2004 we focused our attention on developing iseganan for the prevention of ventilator-associated pneumonia ( VAP ). In June 2004, the Company discontinued its clinical trial of iseganan for the prevention of VAP following a recommendation of the independent data monitoring committee. Subsequently, the Company terminated the iseganan development program, reduced employees, and evaluated strategic alternatives, including mergers, acquisitions, in-licensing opportunities, and liquidation of the Company. On May 5, 2005, after considering a variety of strategic alternatives, none of which was determined by management and the Board of Directors to be in the best interests of the Company and its shareholders, the Board of Directors decided to suspend the Company's active evaluation process and reduce operating expenses to a minimum appropriate level. In accordance with these plans, the Company terminated all of its remaining regular employees on June 15, 2005. The Company will continue to pursue strategic alternatives in the biotech industry with the support of consultants and the active participation of its board. In addition, the Company engaged Hickey & Hill, Inc. of Lafayette, California, a firm specializing in managing companies in transition, to assume the responsibilities of day-to-day administration of the Company, and appointed Denis Hickey of Hickey & Hill, Inc. as its Chief Executive Officer.

The registrant plans to conduct its affairs in the most financially efficient manner practical for a public company. During the period that Hickey & Hill, Inc. will handle the administration of the Company's affairs, the Board of Directors and selected consultants will evaluate any strategic alternatives that come to the Company's attention.

On June 30, 2005, the Company had a total of \$48.2 million in cash, cash equivalents, and short-term investments, and recorded liabilities of \$0.4 million. Based on current projections, the Company expects net cash, cash equivalents

and short-term investments at December 31, 2005 to be in the range of \$47 to \$48 million. This estimate does not include any costs that may be associated with completing any strategic alternative, liquidation of the Company or the disposition of securities litigation referred to in Part II, Item 1 (a) of this Form 10-Q ( Securities Litigation ). There can be no assurance that such a range will be achieved, as actual expenditures and interest income may differ significantly from projected levels.

In February 2003, the Board of Directors approved a cancellation and re-grant of 308,835 unexercised stock options held by existing employees and directors of the Company in a one-for-one exchange and 12,500 options that were re-granted in connection with the cancellation of 54,166 unexercised stock options held by a director of the Company. The re-granted options have an exercise price equal to the closing price of the Company's common stock on the NASDAQ National Market on February 5, 2003, or \$2.76 per share. The options generally vest over a four-year period and will expire in February 2008 if not previously exercised. Variable accounting is being applied to the re-granted options throughout their term. The related compensation expense depends on both the

## **Table of Contents**

cumulative vesting of outstanding options and the price of the Company's common stock at each quarter end, and therefore may have a significant impact on the Company's future results of operations. In connection with variable accounting for re-granted stock options we recorded non-cash stock compensation recovery of \$3,000 and \$48,000, respectively, during the three months and six months ended June 30, 2005, as compared to non-cash stock compensation recovery of \$968,000 and \$693,000, respectively, during the three months and six months ended June 30, 2004.

In addition, in connection with the grant of certain stock options to employees and officers on, or prior to, the Company's initial public offering on March 20, 2000, we recorded stock compensation expense related to the amortization of deferred stock compensation of \$14,000 and \$15,000 during the three months ended June 30, 2005 and 2004, respectively and \$28,000 and \$31,000 during the six months ended June 30, 2005 and 2004 respectively. In addition, we have granted stock options to consultants, which resulted in stock compensation expense of \$69,000 and \$62,000 during the three months ended June 30, 2005 and 2004, respectively and \$125,000 and \$375,000 during the six months ended June 30, 2005 and 2004 respectively.

We intend that the following discussion of our results of operations and financial condition will provide information to assist in the understanding of our financial statements, the changes in certain key items in those financial statements from year to year, and the primary factors that accounted for those changes, as well as how certain accounting principles, policies and estimates affect our financial statements.

## **Critical Accounting Policies**

### ***General***

An accounting policy is deemed to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, and if different estimates that reasonably could have been used, or changes in the accounting estimates that are reasonably likely to occur periodically, could materially impact the financial statements. Management believes the following critical accounting policies reflect its more significant estimates and assumptions used in the preparation of the financial statements. We review the accounting policies used in our financial statements on a regular basis. In addition, management has reviewed these critical accounting policies and related disclosures with our Audit Committee.

Our discussion and analysis of our financial condition and results of operations is based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities and expenses, and related disclosures. On an ongoing basis, we evaluate these estimates, including those related to clinical trial accruals, income taxes (including the valuation allowance for deferred tax assets), restructuring costs and stock-based compensation. Estimates are based on historical experience, information received from third parties and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could therefore differ materially from those estimates under different assumptions or conditions.

### ***Stock-Based Compensation***

In February 2003, the Board of Directors approved a cancellation and re-grant of 308,835 unexercised stock options held by existing employees and directors of the Company in a one-for-one exchange and 12,500 options that were re-granted in connection with the cancellation of 54,166 unexercised stock options held by a director of the Company. The re-granted options have an exercise price equal to the closing price of the Company's common stock on

the NASDAQ National Market on February 5, 2003, or \$2.76 per share. The options generally vest over a four-year period and will expire in February 2008 if not previously exercised. Variable accounting is being applied to the re-granted options throughout their term. The related compensation expense depends on both the cumulative vesting of outstanding options and the price of the Company's common stock at each quarter end, and therefore may have a significant impact on the Company's future results of operations. No adjustments for material changes in estimates have been recognized in any period presented.

As permitted by Statement of Financial Accounting Standards No. 123 ( SFAS 123 ), Accounting for Stock-Based Compensation , as amended by Statement of Financial Accounting Standards No. 148, Accounting for Stock-Based Compensation Transition and Disclosure, the Company has elected to follow Accounting Principles Board Opinion No. 25 ( APB 25 ), Accounting for Stock Issued to Employees and related interpretations in accounting for stock-based employee compensation. Under APB 25, if the exercise price of an employee or director stock option is set equal or in excess of the fair market value of the

## **Table of Contents**

underlying stock on the date of grant, no compensation expense is recognized. In February 2003, certain employee and director stock options for which the exercise prices had originally been set at less than the fair market value of the underlying stock on the grant date, were cancelled and re-granted in a one-for-one exchange. The Company had recorded deferred compensation for the difference between the original exercise price and the fair market value of the underlying stock on the grant date as a component of stockholders' equity, and the total was being amortized on a straight-line basis over the vesting period of the original awards, ranging from four to six years. The related re-granted options all vest over a four-year period, and the remaining unamortized deferred compensation as of the re-grant date is now being amortized over the new four-year vesting schedule, commencing at the date of re-grant. The amount of deferred stock compensation expense to be recorded in future periods could decrease if options, for which accrued but unvested compensation has been recognized, are forfeited prior to vesting. No adjustments for material changes in estimates have been recognized in any period presented.

Options or stock awards issued to non-employees are recorded at their fair value as determined in accordance with SFAS 123 and the FASB's Emerging Issues Task Force issue No. 96-18, "Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services", and are recognized over the related service period and are periodically re-measured as the underlying options vest. The fair values are estimated using the Black-Scholes option pricing model, and are periodically re-measured as the underlying options vest. The option-pricing model is dependent on a number of inputs, which may change over time. Other option pricing models may produce fair values that are substantially different from the Black-Scholes model. No adjustments for material changes in estimates have been recognized in any period presented.

### ***Clinical Trial Accruals***

The Company's accrued costs for clinical trial activities are based upon estimates of the services received and related expenses incurred that have yet to be invoiced by the contract research organizations (CROs), investigators, drug processors, laboratories, consultants, or other clinical trial service providers that perform the activities. Related contracts vary significantly in length, and may be for a fixed amount, a variable amount based on actual costs incurred, capped at a certain limit, or for a combination of these elements. All estimates may differ significantly from the actual amount subsequently invoiced. No adjustments for material changes in estimates have been recognized in any period presented. As of June 30, 2005 amounts accrued related to clinical trials total approximately \$92,000. This amount is lower than in prior periods due to the cessation of clinical trial activity.

## **Results of Operations**

### ***Three and Six-Month Periods Ended June 30, 2005 and 2004***

#### ***Research and Development***

Research and development expenses primarily include clinical trial expenses, research and development payroll expense, drug substance expense, allocated facilities costs and non-cash stock compensation charges. Research and development expenses decreased to \$59,000 and \$248,000 during the three months and six months ended June 30, 2005 from \$ 4.4 million and \$ 8.9 million during the three months and six months ended June 30, 2004. The decrease is due to the termination of our iseganan development project in June 2004. We expect current research and development costs to cease in the future as a result of our decision to reduce operating expenses to a minimum appropriate level.

#### ***General and Administrative***

General and administrative costs primarily include administrative payroll expense, outside contractors, legal and accounting fees, insurance, non-cash stock compensation charges, facilities and other general administrative expenses and expenses associated with the evaluation of our strategic options. General and administrative expenses were \$851,000 and \$838,000 during the three months ended June 30, 2005 and 2004. The increase between the three-month periods is primarily due to a non-cash stock compensation cost of \$76,000 during the three months ended June 30, 2005 versus a recovery of \$932,000 in the second quarter of 2004. The 2004 credit results from variable accounting being applied to re-priced stock options from February 2003, and the decrease in the Company's common stock price from prior periods. This increase in non-cash stock compensation was offset by lower facilities (\$99,000), travel-related (\$63,000), outside contractor (\$494,000) and personnel (\$275,000) expenses during the three months ended June 30, 2005 as

## **Table of Contents**

compared to the three months ended June 30, 2004. For the six months ended June 30, 2005, general and administrative expenses decreased to \$2.0 million from \$2.7 million for the corresponding period in 2004. This decrease was primarily due to lower facilities (\$147,000), travel-related (\$62,000), outside contractors (\$360,000) and personnel expense (\$475,000), offset by an increase in stock compensation expense of \$407,000. Stock compensation expense was \$97,000 during the six months ended June 30, 2005 as compared to a stock compensation recovery of \$310,000 during the six months ended June 30, 2004.

We expect general and administrative costs to decrease substantially in the future as a result of our decision to reduce operating expenses to a minimum appropriate level.

Restructuring charges were \$675,000 during the three and six months ended June 30, 2005 related to the termination of all remaining employees in June 2005. There were no restructurings during the six months ended June 30, 2004.

### *Interest Income*

Interest income was \$339,000 and \$648,000, respectively, during the three months and six months ended June 30, 2005, as compared to \$114,000 and \$187,000 in the three and six months ended June 30, 2004, respectively. Interest income increased primarily because of substantially higher average interest earning investment balances and higher average interest rates during the 2005 periods.

### *Net Loss and Net Loss Applicable to Common Stockholders*

Net loss applicable to common stockholders was \$1.3 million and \$2.4 million, respectively, during the three and six months ended June 30, 2005 as compared to \$5.2 million and \$11.5 million during the three and six months ended June 30, 2004. The difference in 2005 versus 2004 is primarily attributable to the reduction of research and development and general and administrative expenses as described above. Net loss applicable to common stockholders also includes the impact of Series A preferred stock dividends of \$60,000 and \$120,000 in the three and six months ended June 30, 2005, respectively, and \$65,000 and \$130,000 during the three and six months ended June 30, 2004, respectively. Preferred stock dividends represents the 8% annual dividends payable quarterly in common stock to the holders of our Series A preferred stock, and is lower during the three and six months ended June 30, 2005 as compared to the same period in 2004 as a result of the conversion of some preferred stock into common stock in February 2005.

## **Liquidity and Capital Resources**

At June 30, 2005, we had total cash, cash equivalents, and short-term investments of \$48.2 million verses \$50.7 million at December 31, 2004. Cash and cash equivalents were \$7.9 million as compared to \$1.8 million as of December 31, 2004. Short-term investments were \$40.3 million at June 30, 2005 as compared to \$49.0 million at December 31, 2004. We had no debt outstanding as of June 30, 2005. We invest excess funds in short-term money market funds and securities pursuant to our investment policy guidelines.

Net cash used in operating activities for the six months ended June 30, 2005 and 2004 was \$2.6 million and \$9.7 million, respectively. The cash used consisted primarily of the net loss for each period, adjusted for non-cash stock compensation expense and changes in prepaid expenses and accrued clinical liabilities.

Net cash provided by investing activities was \$8.7 million during the six months ended June 30, 2005 as compared to cash used in investing activities of \$23.8 million during the six months ended June 30, 2004. The cash provided by or used in both periods primarily represents purchases of short-term investments offset by proceeds from the sale or

maturity of short-term investments.

Net cash provided by financing activities during the six months ended June 30, 2005 and 2004 was \$49,000 and \$41.7 million, respectively, primarily from the issuance of common stock. The cash provided in the six months ended 2005 related to the exercise of stock options.

We expect to continue to incur operating losses and will not receive any product revenues in the foreseeable future. Our efforts are focused on reducing operating expenses to a minimum appropriate level, conducting our affairs in the most financially efficient manner practical for a public company, litigating the Securities Litigation aggressively and pursuing strategic alternatives in the biotech industry. Based on current projections, the Company expects cash, cash equivalents and short-term investments at December 31, 2005 to be in the range of \$47 to \$48 million. This estimate does not include any costs that may be associated with completing any strategic alternative, liquidation of the Company or the disposition of the Securities Litigation. We currently anticipate our cash, cash equivalents and short-term investments to be sufficient to fund the foregoing efforts for at least the next 12 months. This forecast is a forward-looking statement that involves risks and uncertainties, and actual results could vary.

### **Contractual Obligations**

As of June 30, 2005, the Company had no operating lease obligations, no long-term debt obligations, no capital lease obligations or purchase obligations (each as defined under item 303 (a) (ii) of regulation S-K).

## **Table of Contents**

The holders of our Series A preferred stock are entitled to receive cumulative dividends at the rate of 8% per annum of the original purchase price of \$10,000 per share of Series A preferred stock. Based on the number of shares of preferred stock outstanding as of June 30, 2005 this equates to \$240,000 per year. The dividends are payable quarterly in shares of common stock, and the number of shares payable are determined based on the average closing sale price of the common stock on the NASDAQ National Market or other market on which our common stock is traded for each of the five trading days immediately preceding the applicable dividend payment date. We do not currently anticipate paying any cash dividends in the foreseeable future.

## **Off-Balance Sheet Arrangements**

We do not have any off-balance sheet arrangements (as that term is defined in Rule 303 of Regulation S-K) that are reasonably likely to have a current or future material effect on our financial condition, results of operations, liquidity, capital expenditures or capital resources.

## **Indemnifications**

In the ordinary course of business, we enter into contractual arrangements under which we may agree to indemnify the third party to such arrangement from any losses incurred relating to the services they perform on behalf of IntraBiotics or for losses arising from certain events as defined within the particular contract, which may include, for example, litigation or claims relating to past performance. Such indemnification obligations may not be subject to maximum loss clauses. Historically, payments made related to these indemnifications have been immaterial. In addition, we have entered into indemnity agreements with each of our directors and executive officers and Hickey & Hill. Such indemnity agreements contain provisions, which are in some respects broader than the specific indemnification provisions contained in Delaware law. We also maintain an insurance policy for our directors and executive officers insuring against certain liabilities arising in their capacities as such.

## **Factors That Could Affect Future Results**

Our business faces significant risks and the risks described below may not be the only risks we face. Additional risks that we do not know of, or that we currently believe are immaterial, may also impair our business operations. If any of the events or circumstances described in the following risks actually occurs, our business, financial condition, or results of operations could be materially adversely affected.

***A delisting of our common stock could have a substantial effect on the price and liquidity of our common stock.***

On July 6, 2005, the Company announced it had received a letter from the staff of the NASDAQ Stock Market (the Staff ) advising it that the Company may be deemed to be a public shell, which raises public interest concerns as set forth in Marketplace Rules 4300 and 4330(a)(3). The letter stated that the Staff will review the Company's eligibility for continued listing on the NASDAQ Stock Market. The letter requested that the Company provide certain information to the Staff, including a description of its current operations and its plan for future operations and compliance with continued listing requirements not later than July 15, 2005. The Company provided the requested information on July 15<sup>th</sup>.

Although the Company's common stock remains listed on the NASDAQ Stock Market and the Staff has not yet determined to delist our common stock, we cannot assure you that the Staff will not seek to implement a delisting proceeding. A delisting of our common stock could materially reduce the liquidity of our common stock and cause a material reduction in the price of our common stock.

**Table of Contents**

In addition, the Company issued warrants to purchase shares of its common stock in connection with its Series A convertible preferred stock offering on May 1, 2003 which provide that if the Company's common stock is delisted from the NASDAQ National Market, the exercise price for the underlying stock of the warrants will be reduced by 50% without any concomitant increase in the number of shares of common stock for which the warrants are then exercisable. As of June 30, 2005 the Company had outstanding warrants to purchase 789,171 shares of common stock at an exercise price of \$2.066 per share with such provisions. As of June 30, 2005 the Company had approximately 11.1 million common equivalent shares outstanding assuming the net exercise of in the money warrants and options to acquire common stock.

***We are currently a party to a securities litigation class action lawsuit, which, if determined adversely, could negatively affect or limit our strategic alternatives, our financial results or business.***

We are currently a party to litigation that is described in detail below in Part II, Item 1 (a) of this Form 10-Q. The cost of defense and ultimate disposition of the Securities Litigation could be material. We will continue to incur expenses in defending the Securities Litigation and, although we believe this litigation is without merit, we may incur monetary losses in connection with the final disposition of this litigation that may be material. The Company and the individual defendants are insured under the Company's directors' and officers' insurance policies, with \$15 million in total coverage, and a \$500,000 deductible, which has been met. However, the Company may incur expenses in the defense or disposition of the litigation beyond what is covered by insurance. In addition, the litigation has been, and may continue to be, time-consuming and costly and could divert the attention of our remaining management personnel.

***Directors, executive officers, principal stockholders and affiliated entities beneficially own or control at least 47% of our capital stock and may be able to exert control over our activities, and the results of our operations and financial condition may suffer.***

As of June 30, 2005, our directors, executive officers, principal stockholders and affiliated entities beneficially own or control securities representing, in the aggregate, at least 47% of our outstanding common stock. These stockholders, if they determine to vote in the same manner, may be able to control the outcome of any matter requiring approval by our stockholders, including the election of directors and the approval of mergers or other business combination transactions or terms of any liquidation.

***The holders of our Series A preferred stock have rights that they could exercise against your best interests.***

The holders of our Series A preferred stock have rights to designate two members of our Board. The holders of Series A preferred stock are entitled to receive cumulative annual dividends of 8% of the original purchase price of \$10,000 per share, payable in common stock. In addition, upon our liquidation or dissolution (including a merger or acquisition), the holders of our Series A preferred stock are entitled to receive a liquidation preference in an amount equal to the greater of (i) \$10,000 per share of Series A preferred stock, or approximately \$3.0 million based on the 300 shares of Series A preferred stock currently outstanding, plus any declared but unpaid dividends or (ii) the amount that would have been paid had each such share of Series A preferred stock been converted to common stock. The holders of Series A preferred stock also have a right of first refusal to purchase their pro rata portion of any equity securities we propose to offer to any person. Such right of first refusal is subject to certain customary exclusions, including shares issued pursuant to any options or other stock awards granted to employees, directors or consultants of IntraBiotics, equipment leasing arrangements, debt financings, strategic financings and public offerings that have been approved by the Board. The holders of Series A preferred stock may exercise these rights to the detriment of our common stockholders.

The holders of our Series A preferred stock also have the right at any time to request that we register for resale the shares of our common stock that they acquire upon conversion of their Series A preferred stock or upon exercise of their warrants to purchase our common stock, subject to certain limitations. A registration statement has been filed with the Securities and Exchange Commission and is currently effective for the resale of the shares of common stock issuable upon conversion of our Series A preferred stock and upon the exercise of those warrants. In addition, the holders of our Series A preferred stock may convert their Series A preferred stock into common stock and sell those shares of the common stock, acquired upon such conversion, in the public market in reliance upon Rule 144, subject in some cases to volume and other limitations. Future sales in the public market of such common stock, or the perception that such sales might occur, could adversely affect the market price of our common stock.

**Table of Contents**

***Anti-takeover provisions in our charter documents and under Delaware law may make it more difficult to acquire us.***

Provisions of our certificate of incorporation and bylaws could make it more difficult for a third party to acquire us, even if doing so would be beneficial to our stockholders. These provisions:

- provide for a classified board of directors of which approximately one-third of the directors will be elected each year;
- allow the authorized number of directors to be changed only by resolution of the Board;
- require that stockholder actions must be effected at a duly called stockholder meeting and prohibit stockholder action by written consent;
- establish advance notice requirements for nominations to the Board or for proposals that can be acted on at stockholder meetings;
- authorize our Board to issue blank check preferred stock to increase the amount of outstanding shares; and
- limit who may call stockholder meetings.

In addition, because we are incorporated in Delaware, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, which may prohibit large stockholders from consummating a merger with, or acquisition of us. These provisions may prevent a merger or acquisition that would be attractive to stockholders and could limit the price that investors would be willing to pay in the future for our common stock.

***Our stock price has been, and will be volatile, and the value of your investment may continue to decline.***

During the eighteen months ended June 30, 2005, our closing stock prices ranged from a low of \$3.34 to a high of \$19.25, and in 2003 ranged from a low of \$1.54 to a high of \$17.50. Announcements regarding strategic alternatives, including a merger or sale of the Company, or the Securities Litigation, in addition to the other risk factors described in this section, may have a significant impact on the market price of our common stock.

***We expect to continue to incur operating losses.***

Our accumulated deficit as of June 30, 2005 was \$234.6 million, and we expect operating losses to continue at least through the end of 2005. During this period we intend to reduce operating expenses to a minimum appropriate level while conducting our affairs in the most financially efficient manner practical for a public company and litigating the Securities Litigation aggressively. We expect operating losses to continue into future years, but we cannot predict the magnitude and duration of such losses.

***We may not be able to complete the strategic alternative we initially elected to pursue, resulting in increased expenses and a delay in finally completing a selected alternative.***

We may select a strategic alternative that we may not be able to complete for various reasons, including a decision of our principal stockholders not to approve such alternative, our inability to obtain regulatory approval, actions of other companies or litigation involving the selected alternative or other matters. In addition, the pendency and or resolution of the Securities Litigation may adversely affect or limit our strategic alternatives, including adversely affecting our financial results or our ability to liquidate, or deterring other companies from entering into a merger or

acquisition with us.

***We face risks associated with clinical trial liability claims in the event that the prior use, or misuse, of our product candidates in clinical trials, that have since been terminated, results in personal injury or death.***

From the fourth quarter of 2002 until June 2004, we conducted clinical trials focusing on developing iseganan for the prevention of ventilator-associated pneumonia ( VAP ). In June 2004, we discontinued our clinical trial of iseganan for the prevention of VAP following a recommendation of the independent data monitoring committee. We face a risk of clinical trial liability claims in the event that the prior use, or misuse, of our product candidates during such clinical trials results in personal injury or death. Our clinical liability insurance coverage may not be sufficient to cover claims that may be made against us. Any claims against us, regardless of their merit, could severely harm our financial condition and strain our management and other resources.

**Table of Contents**

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK**

The primary objective of our investment activities is to preserve our capital until it is required to fund operations while at the same time maximizing the income we receive from our investments without significantly increasing risk. As of June 30, 2005, we own financial instruments that are sensitive to market risk as part of our investment portfolio. To minimize this risk, in accordance with our investment policy guidelines, we place investments with high credit quality issuers (rated A1/P1 for short-term investments and Aa3/AA- for long-term investments) and limit the amount of credit exposure to any one issuer to the greater of 5% of the investment portfolio or \$1 million, whichever is greater. There are no concentration limits set for obligations of the government of the United States of America and its federal agencies. The average duration of our investment portfolio as of June 30, 2005 was less than one year and the maximum term allowed for any investment was 15 months. Due to the short-term nature of these investments, a 50 basis point movement in market interest rates would not have a material impact on the fair value of our portfolio as of June 30, 2005. We have no investments denominated in foreign currencies and therefore our investments are not subject to foreign currency exchange risk.

**ITEM 4. CONTROLS AND PROCEDURES**

**Controls Evaluation and Related CEO and CFO Certifications**

We have evaluated the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the Exchange Act), as of the end of the period covered by this Report. The controls evaluation was done under the supervision and with the participation of management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO) and has allowed us to make conclusions, as set forth below, regarding the state of our disclosure controls and procedures.

Attached as exhibits to this Report are certifications of the CEO and the CFO, which are required in accordance with Rule 13a-14 of the Exchange Act. This Controls and Procedures section includes the information concerning the controls evaluation referred to in the certifications and it should be read in conjunction with the certifications for a more complete understanding of the topics presented.

**Disclosure Controls and Procedures**

Our disclosure controls and procedures are designed to ensure that information required to be disclosed in our reports filed under the Exchange Act, such as this Report, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Our disclosure controls and procedures are also designed to ensure that such information is accumulated and communicated to our management, including the CEO and CFO, to allow timely decisions regarding required disclosure. Our disclosure controls include components of our internal control over financial reporting, which consists of control processes designed to ensure the reliability of our financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles in the United States. To the extent that components of our internal control over financial reporting are included within our disclosure controls, they are included in the scope of our quarterly controls evaluation.

**Limitations on the Effectiveness of Controls**

Management, including our CEO and CFO, does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system

will be attained. Furthermore, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in a cost-effective control system, no evaluation of controls can provide absolute assurance that all misstatements due to error or fraud, if any, may occur and not be detected on a timely basis. These inherent limitations include the possibility that judgments in decision-making can be faulty and that breakdowns can occur because of errors or mistakes. Our disclosure controls and procedures can also be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Furthermore, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

**Table of Contents**

**Scope of the Controls Evaluation**

The evaluation of our disclosure controls and procedures included a review of the controls' objectives and design, the Company's implementation of the controls and the effect of the controls on the information generated for use in this Report. During the evaluation of our controls and procedures, we looked to identify data errors, control problems or acts of fraud and confirm that appropriate corrective action (including process improvements) was being undertaken. This evaluation is performed on a quarterly basis so that the conclusions of management, including the CEO and CFO, concerning the effectiveness of the disclosure controls and procedures can be reported in our Quarterly Reports on Form 10-Q and to supplement our disclosures made in our Annual Report on Form 10-K. The overall goal of the evaluation activity is to monitor our disclosure controls and procedures, and to modify them as necessary. We intend to maintain our disclosure controls and procedures as a dynamic system that changes as conditions warrant.

We also considered whether our evaluation identified any significant deficiencies or material weaknesses in our internal control over financial reporting, and whether we identified any acts of fraud involving personnel with a significant role in our internal control over financial reporting. Emphasis was placed on this information as it was important both for the controls evaluation and because item 5 in the certifications of the CEO and CFO requires that they disclose that information to our Board of Directors' Audit Committee and to our independent auditors. In the professional auditing literature, significant deficiencies are defined as a control deficiency, or combination of deficiencies, that adversely affects the Company's ability to initiate, authorize, record, process or report external financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the Company's financial statements that is more than inconsequential will not be prevented or detected. Auditing literature defines material weakness as a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected.

**Changes in Internal Control Over Financial Reporting**

There was no change in our internal control over financial reporting during the quarter ended June 30, 2005 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**Conclusions**

Based upon the evaluation of the effectiveness of our disclosure controls and procedures, our CEO and CFO have concluded that our disclosure controls and procedures were effective to ensure that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rulings and forms.

Pursuant to section 404 of Sarbanes-Oxley Act of 2002, we will be required to furnish a report of management's assessment of the effectiveness of our internal control over financial reporting as part of our Annual Report on Form 10-K for the fiscal year ended December 31, 2006. Our independent public accountants will then be required to attest to, and report on, our assessment. In order to issue our report, management must document both the design of our internal controls and the processes that support management's evaluation and conclusion. Our management has begun the necessary processes and procedures for issuing its report. However, we may face significant challenges in implementing the required processes and procedures. There can be no assurance that we will be able to complete the work necessary for management to issue its report in a timely manner or that management will be able to report that our internal control over financial reporting are effective.

**Table of Contents**

**PART II. OTHER INFORMATION**

**Item 1. Legal Proceedings**

- (a) Beginning on July 2, 2004, three purported class action shareholder complaints were filed in the United States District Court for the Northern of California against IntraBiotics and several of its officers. The actions were consolidated and a consolidated amended complaint has been filed, purportedly brought on behalf of purchasers of IntraBiotics common stock between September 5, 2003 and June 22, 2004. The amended complaint generally alleges that IntraBiotics and several of its officers and directors made false or misleading statements concerning the clinical trial of iseganan. The plaintiffs seek unspecified monetary damages. On February 28, 2005, the Company and the individual defendants filed a motion to dismiss the amended complaint. A hearing on the motion to dismiss was held on June 17, 2005 and a ruling on the motion is pending. The Company believes the suit to be without merit and intends to defend itself vigorously. Due to the uncertainties surrounding the final outcome of this matter, no amounts have been accrued at June 30, 2005. The Company and the individual defendants are insured under the Company's directors' and officers' insurance policies, with \$15 million in total coverage, and a \$500,000 deductible, which has been met. However, the Company may incur expenses in the defense or disposition of the litigation beyond what is covered by insurance.
