Sidebar text: WE THINK YOUR NUVEEN FUND CAN BE AN IMPORTANT BUILDING BLOCK IN A PORTFOLIO DESIGNED TO PERFORM WELL THROUGH A VARIETY OF MARKET CONDITIONS.

Dear
SHAREHOLDER

I am very pleased to report that for the six months ended November 30, 2003, your Nuveen Fund continued to provide you with attractive monthly tax-free income.

Your Nuveen Fund is managed with a value investing strategy that puts an emphasis on finding securities that we think are undervalued or underrated. We believe that there are always some municipal bonds that the market is not properly valuing, and that by using a consistent, research-oriented management approach we have the opportunity to find them for your Fund.

In this low-rate environment, many have begun to wonder whether interest rates will soon start to rise, and whether that possibility should cause them to adjust their holdings of fixed-income investments. We believe that by constructing a carefully balanced portfolio with the help of a trusted investment professional you may be able to reduce your overall investment risk and give yourself a better chance to meet your financial goals. We think that municipal bond investments like your Nuveen Fund can be important building blocks in a portfolio designed to perform well through a variety of market conditions.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification, and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

/s/ Timothy R. Schwertfeger

Nuveen Municipal Closed-End Exchange-Traded Funds
(NTC, NFC, NGK, NGO, NMT, NMB, NGX, NOM)

Portfolio Managers'
COMMENTS

Portfolio managers Paul Brennan, Tom O'Shaughnessy, and Scott Romans discuss national and state economic and market conditions, key investment strategies, and the recent performance of these eight Nuveen Funds. With 12 years of investment experience, Paul has managed NTC since 1999, NFC since 2001, NGK and

Edgar Filing: NUVEEN CONNECTICUT DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS

NGO since 2002, and NMT and NMB since January 2003. Tom, a 20-year veteran of Nuveen, assumed portfolio management responsibility for NGX in January 2003. Scott, who joined Nuveen in 2000, took over management responsibility for NOM in November 2003.

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE SIX-MONTH REPORTING PERIOD ENDED NOVEMBER 30, 2003?

Over the past six month period, the two greatest influences on the general economy and the municipal market continued to be historically low interest rates and the overall pace of economic improvement. In June 2003, the Federal Reserve reduced the fed funds rate to 1.0%, the lowest level since 1958. The Fed's accommodative monetary policy, coupled with Washington's tax relief measures and increased spending for defense and national security, helped to fuel a jump of 8.2% (annualized) in the third-quarter gross domestic product (GDP), up from 3.3% in the second quarter. At the same time, inflation remained under control.

In the municipal market, the slow rate of economic recovery over the majority of this period, low interest rates, and lack of inflationary pressures helped many municipal bonds perform well. During the summer of 2003, however, stronger-than-expected economic data precipitated a spike in bond yields and a corresponding drop in bond prices that impacted results across all fixed-income markets, including the municipal market, for the six-month period ended November 30, 2003.

During the first 11 months of 2003, municipal supply nationally remained on a record-setting pace, with \$347.1 billion in new bonds, up 5% over the same period in 2002.

HOW WERE ECONOMIC AND MARKET CONDITIONS IN CONNECTICUT AND MASSACHUSETTS?

Despite a heavy debt load and weak employment trends, Connecticut continued to feature a diverse economy and the highest per capita income in the nation. Health and education services, financial services, and retail served as the major drivers of the economy over the six month period, while biopharmaceutical firms also showed growth. However, continued losses in manufacturing, information technology, and construction offset these gains. As of November 2003, unemployment in the state had risen to 5.0% from 4.6% a year earlier, remaining below the current national average of 5.9%.

During the first 11 months of 2003, Connecticut issued \$5.6 billion in new municipal paper, an increase of 16% over the same period in 2002. In July 2003, citing the state's fiscal problems and the delay in adopting a plan to close a \$2.3 billion gap in the state budget, Moody's downgraded Connecticut's general obligation (GO) debt to Aa3 from Aa2, while Standard & Poor's maintained a rating of AA for the state.

2

Massachusetts continued to grapple with a sluggish economy and budgetary stress brought on by a drop in tax revenues and aggravated by cuts in the state's personal income tax. While Massachusetts' manufacturing sector continued to shed jobs, signs of increased export activity have emerged, and defense contractors may benefit from increased government spending. In November 2003, unemployment was 5.4%, down from 5.8% in August 2003 and on par with the jobless rate a year earlier.

During the first 11 months of 2003, municipal issuance in Massachusetts decreased 15% from the same period during 2002, totaling \$10.4 billion. In

Edgar Filing: NUVEEN CONNECTICUT DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS

September 2003, Moody's reconfirmed its Aa2 rating for Massachusetts GO paper, while S&P reaffirmed its AA- outlook in October 2003.

WHAT WERE ECONOMIC AND MARKET CONDITIONS FOR MISSOURI?

Despite a job growth picture that remained extremely weak, Missouri continued to benefit from a diverse industrial base, sound financial operations, low debt levels, and the ability to build reserve balances. Along with job losses in the manufacturing, construction, and wholesale trade sectors, the state also experienced a lack of new job growth in non-manufacturing sectors. Even under these conditions, Missouri's unemployment rate declined to 5.0% in November 2003, down from 5.6% 12 months earlier. The state's reserve position enabled Missouri to maintain financial flexibility and an adequate cushion.

In the first 11 months of 2003, Missouri issued \$5.3 billion in new debt, an increase of 3% over 2002 levels. As of November 2003, Missouri general obligation bonds were rated Aaa/AAA by Moody's and S&P, respectively.

HOW DID THESE NUVEEN FUNDS PERFORM OVER THE 12 MONTHS ENDED NOVEMBER 30, 2003?

Individual results for these Funds, as well as for relevant benchmarks, are presented in the accompanying table.

Past performance is not predictive of future results.

For additional information, see the individual Performance Overview for your Fund in this report.

For the 12-month period ended November 30, 2003, the total return of all seven of the noninsured Funds in this report outperformed the unleveraged Lehman Brothers Municipal Bond Index, while NGX outperformed its insured Lehman benchmark. NFC, NGK, NGO, and NMB also outperformed or performed in line with their Lipper peer group average, while the remaining Funds (NTC, NMT, NGX and NOM) trailed this measure.

The use of leverage was one of the factors that influenced the total return performances of these Funds relative to the Lehman indexes. While leveraging creates increased volatility, this strategy can also provide opportunities for

Edgar Filing: NUVEEN CONNECTICUT DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS

additional income for common shareholders, especially during periods of low short-term interest rates, and income is an important component of total return for any bond investment.

- 1 The total annual returns on common share net asset value (NAV) for the noninsured Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds. The total annual return for NGX is compared with the total annual return of the Lehman Insured Municipal Bond Index, an unleveraged, unmanaged national index comprising a broad range of insured municipal bonds. Results for the Lehman indexes do not reflect any expenses.
- 2 The total returns of these Funds are compared with the average annualized return of the 43 funds in the Lipper Other States Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends. It should be noted that the performance of the Lipper Other States category represents the overall average of annual returns for funds from 10 different states with a wide variety of economic and municipal market conditions and investment guidelines, making direct comparisons less applicable.
- 3 The taxable-equivalent yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. With respect to investments that generate qualified dividend income that is taxable at a maximum rate of 15%, the taxable-equivalent yield is lower. The taxable-equivalent yield is calculated using the current market yield and a federal income tax rate of 28% plus the applicable state income tax rate. The combined federal and state tax rates used in this report are as follows: Connecticut 31.5%, Massachusetts 32%, and Missouri 32.5%. The yields shown highlight the added value of owning shares that are exempt from state as well as federal income taxes.

3

In addition to leverage, factors such as call exposure, portfolio trading activity, and the price movement of specific sectors and holdings also had an impact on the Funds' relative performances during this period. For example, holdings of multifamily housing bonds in NMT and NGX of 11% and 9% of their portfolios, respectively, contributed to their trailing the other Funds in this report. This was due largely to the decline in interest rates, which led to dramatic growth in mortgage refinancings and increased the rate of prepayments, adversely affecting both the prices and yields of housing bonds.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

With short-term interest rates remaining at historically low levels, the dividend-payment capabilities of these Funds benefited from their use of leverage. During the 12-months ended November 30, 2003, continued low short-term rates enabled us to implement two dividend increases in NFC, NGK, and NMB and one in NTC and NOM. Leverage also helped to support the dividends of NMT, which has provided shareholders with 42 consecutive months of steady or increasing dividends. NGO and NGX have paid shareholders attractive, stable dividends for 13 and 11 consecutive months, respectively.

Each Fund seeks to pay dividends at a rate that reflects the past and projected

Edgar Filing: NUVEEN CONNECTICUT DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS

performance of the Fund. To permit a Fund to maintain a more stable monthly dividend, the Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If the Fund has cumulatively earned more than it has paid in dividends, it will hold the excess in reserve as undistributed net investment income (UNII) as part of the Fund's net asset value. Conversely, if the Fund has cumulatively paid in dividends more than it has earned, the excess will constitute a negative UNII which will likewise be reflected in the Fund's net asset value. Each Fund will, over time, pay all its net investment income as dividends to shareholders. As of November 30, 2003, NTC, NFC, NGK, NGO, NMT, NMB and NOM had positive UNII, while NGX had negative UNII.

The share prices and net asset values of these Funds ended the period higher than they had been at the beginning. The exceptions were NGO and NMB, which saw their share prices decline over the 12-month period. As of November 30, 2003, the Funds were trading at premiums to their common share NAVs, with the exception of NGK and NGO which were trading at a discount (see individual Performance Overview pages).

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE 12 MONTHS ENDED NOVEMBER 30, 2003?

For this 12 month period, we continued to place strong emphasis on keeping the Funds fully invested and well diversified, improving call protection, and enhancing dividend-payment capabilities. A major focus continued to be management of the Funds' durations as a way of enhancing our ability to mitigate interest rate risk and produce potentially more consistent returns over time. Interest rate risk is the risk that the value of a Fund's portfolio will decline when market interest rates rise (since bond prices move in the opposite direction of interest rates). The longer the duration of a Fund's portfolio, the greater its interest rate risk.

4

Over the 12 month period, the durations of the newer Funds shortened significantly. However, we kept the duration of NGX (11.37) slightly longer to provide additional support for this newest Fund's income stream in the current market environment.

In keeping with the steepness of the municipal yield curve, the majority of our purchase activity over the past year focused on value opportunities in the long intermediate part of the yield curve (i.e., bonds that mature in 15 to 20 years) in the older Funds and in the 10-year to 15-year part of the yield in the newer Funds. In many cases, bonds in these parts of the curve offered yields similar to those of longer-term bonds but, had less inherent interest rate risk.

HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF NOVEMBER 30, 2003?

We believe that, given the current geopolitical and economic climate, maintaining strong credit quality remains a vital requirement. As of November 30, 2003, the seven noninsured Funds offered excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 77% to 87%. NGX, which is allowed to invest up to 20% in uninsured investment-grade quality securities, held 83% of its portfolio in insured bonds as of November 30, 2003.

Looking at bond calls, these Funds generally offer good levels of call protection over the next three years, with potential call exposure (as of November 30, 2003) ranging from 2% in NMB to 20% in NTC during 2004- 2006. In

Edgar Filing: NUVEEN CONNECTICUT DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS

coming months, the number of actual bond calls in all of these Funds will depend largely on market interest rates.

In general, we believe that these Nuveen Funds can continue to serve as attractive sources of tax-free income, while simultaneously offering the potential for considerable portfolio diversification. In our opinion, the Funds represent a quality component a well-balanced core investment portfolio that can continue to benefit shareholders over time.

- 1 Taxable-equivalent yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. With respect to investments that generate qualified dividend income that is taxable at a maximum rate of 15%, the taxable-equivalent yield is lower. The taxable-equivalent yield is calculated using the current market yield and a federal income tax rate of 28%. The rate shown for federal and state highlights the added value of owning shares that are also exempt from state income taxes. It is based on a combined federal and state income tax rate of 31.5%.
- 2 The Fund also paid shareholders a capital gains distribution in December 2002 of \$0.0623 per share.

FINANCIAL STATEMENTS (Unaudited)

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state Funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen Connecticut Premium Income Municipal Fund (NTC), Nuveen Connecticut Dividend Advantage Municipal Fund (NFC), Nuveen Connecticut Dividend Advantage Municipal Fund 2 (NGK), Nuveen Connecticut Dividend Advantage Municipal Fund 3 (NGO), Nuveen Massachusetts Premium Income Municipal Fund (NMT), Nuveen Massachusetts Dividend Advantage

Edgar Filing: NUVEEN CONNECTICUT DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS

Municipal Fund (NMB), Nuveen Insured Massachusetts Tax-Free Advantage Municipal Fund (NGX) and Nuveen Missouri Premium Income Municipal Fund (NOM). Common shares of Connecticut Premium Income (NTC) and Massachusetts Premium Income (NMT) are traded on the New York Stock Exchange while Common shares of Connecticut Dividend Advantage (NFC), Connecticut Dividend Advantage 2 (NGK), Connecticut Dividend Advantage 3 (NGO), Massachusetts Dividend Advantage (NMB), Insured Massachusetts Tax-Free Advantage (NGX) and Missouri Premium Income (NOM) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Prior to the commencement of operations of Connecticut Dividend Advantage 3 (NGO) and Insured Massachusetts Tax-Free Advantage (NGX), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 per Fund by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc., and the recording of the organization expenses (\$11,500 per Fund) and their reimbursement by Nuveen Investments, LLC, also a wholly owned subsidiary of Nuveen Investments, Inc.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes, and in the case of Insured Massachusetts Tax-Free Advantage (NGX) the alternative minimum tax applicable to individuals, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At November 30, 2003, Connecticut Premium Income (NTC), Connecticut Dividend Advantage 3 (NGO) and Missouri Premium Income (NOM) had outstanding when-issued purchase commitments of \$521,702, \$521,702 and \$500,729, respectively. There were no such outstanding purchase commitments in any of the other Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of

discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, and in the case of Insured Massachusetts Tax-Free Advantage (NGX) the alternative minimum tax applicable to individuals, to retain such tax-exempt status when distributed to shareholders of the Funds.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding for each Fund is as follows:

Insurance

Insured Massachusetts Tax-Free Advantage (NGX) invests at least 80% of its net assets (including net assets applicable to Preferred shares) in municipal securities that are covered by insurance. The Fund may also invest up to 20% of its net assets (including net assets applicable to Preferred shares) in municipal securities which are either (i) backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, or (ii) municipal bonds that are rated, at the time of investment, within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch) or unrated but judged to be of comparable quality by the Adviser.

Each insured municipal security is covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance. Such insurance does not guarantee the market value of the municipal securities or the value of the Fund's Common shares. Original Issue Insurance and Secondary Market Insurance remain in effect as long as the municipal securities covered thereby remain outstanding and the insurer remains in business, regardless of whether the Fund ultimately disposes of such municipal securities. Consequently, the market value of the municipal securities covered by Original Issue Insurance or Secondary Market Insurance may reflect value attributable to the insurance. Portfolio Insurance is effective only while the municipal securities are held by the Fund. Accordingly, neither the prices used in determining the market value of the underlying municipal securities nor the Common share net asset value of the Fund includes value, if any, attributable to the Portfolio Insurance. Each policy of the Portfolio Insurance does, however, give the Fund the right to obtain permanent insurance with respect to the municipal security covered by the Portfolio Insurance policy at the time of its sale.

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the six months ended November 30, 2003.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments, LLC has agreed to pay all Common share offering costs (other than the sales load) that exceed \$.03 per Common share for Connecticut Dividend

Edgar Filing: NUVEEN CONNECTICUT DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS

Advantage 3 (NGO) and Insured Massachusetts Tax-Free Advantage (NGX). Connecticut Dividend Advantage 3's (NGO) and Insured Massachusetts Tax-Free Advantage's (NGX) share of Common share offering costs (\$129,330 and \$81,000, respectively) were recorded as a reduction of the proceeds from the sale of Common shares.

Costs incurred by Connecticut Dividend Advantage 3 (NGO) and Insured Massachusetts Tax-Free Advantage (NGX) in connection with their offering of Preferred shares (\$774,013 and \$548,378, respectively) were recorded as a reduction to paid-in surplus.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Build Your Wealth
AUTOMATICALLY

Sidebar text: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

PROXY VOTING POLICIES AND PROCEDURES

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling Nuveen Investments at (800) 257-8787; and (ii) on the Commission's website at <http://www.sec.gov>.

GLOSSARY OF TERMS USED IN THIS REPORT

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

Average Effective Maturity: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Leverage-Adjusted Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number

of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the six month period ended November 30, 2003. Any future repurchases will be reported to shareholders in the next annual or semiannual report.
