8,000,000 Shares

P. H. Glatfelter Company

Common Stock

The shares of common stock are being sold by the selling shareholders. We will not receive any of the proceeds from the shares of common stock sold by the selling shareholders.

Our common stock is listed on the New York Stock Exchange under the symbol GLT. The last reported sale price on September 21, 2004 was \$11.94 per share.

The underwriters have an option to purchase a maximum of 1,200,000 additional shares within 30 days following the date of this prospectus to cover over-allotments of shares.

Investing in our common stock involves risks. See Risk Factors beginning on page 8.

	Price to Public	Underwriting Discounts and Commissions	Proceeds to Selling Shareholders
Per Share	\$ 11.000	\$ 0.605	\$ 10.395
Total	\$ 88,000,000	\$ 4,840,000	\$ 83,160,000

Delivery of the shares of common stock will be made on or about September 27, 2004.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

PROSPECTUS SUMMARY

*This summary highlights basic information contained in this prospectus. The summary may not contain all of the information that is important to you, and it is qualified in its entirety by the more detailed information and historical consolidated financial statements, including the notes to those financial statements, that are part of our reports filed with the SEC and included or incorporated by reference in this prospectus. You should carefully consider the information contained in and incorporated by reference in the entire prospectus, including the information set forth under the heading *Risk Factors* in this prospectus. In this prospectus, the terms *we*, *us*, *our*, *the Company* and *Glatfelter* refer to P. H. Glatfelter Company and its subsidiaries unless the context indicates otherwise.*

Our Business

Glatfelter began operations in 1864 and today we believe we are one of the world's leading manufacturers of specialty papers and engineered products. Headquartered in York, Pennsylvania, we own and operate paper mills located in Spring Grove, Pennsylvania, Neenah, Wisconsin, Gernsbach, Germany and Scaër, France, as well as an abaca pulp mill in the Philippines. We serve customers in numerous markets, including book publishing, envelope converting, food and beverage, pressure-sensitive, digital imaging, composite laminates, and other highly technical niche markets. Many of the markets in which we operate are characterized by higher-value-added products and, in some cases, by higher growth prospects and lower cyclicity than commodity paper markets. Examples of some of our key product offerings include papers for:

Tea bags and coffee filters;

Trade book publishing;

Specialized envelopes;

Playing cards;

Pressure-sensitive postage stamps;

Metallized labels for beer bottles; and

Digital imaging applications.

We market our products worldwide through wholesale paper merchants, brokers and agents, and directly to our customers. In 2003, our revenue was \$543.2 million.

Our Business Units

We operate three primary business units: Engineered Products; Long Fiber & Overlay Papers; and Printing & Converting Papers.

Engineered Products

Engineered Products focuses on highly technical engineered paper products designed for multiple end uses, such as papers for pressure-sensitive postage stamps, disposable medical garments, playing cards and digital imaging applications. Many of the products in this segment are utilized in demanding, specialized customer and end-user applications and, therefore, command higher per ton values and generally exhibit greater pricing stability relative to commodity grade paper products. In 2003, our net sales of Engineered Products were \$108.5 million.

Long Fiber & Overlay Papers

Long Fiber & Overlay Papers focuses on higher-value-added products, such as paper for tea bags and coffee filters, decorative laminates used for furniture and flooring, and metallized products used in the labeling of beer bottles. Long fiber papers, which is the generic term we use to describe products made

Table of Contents

from abaca pulp (primarily tea bag and coffee filter papers), account for the majority of this business unit's sales. Our focus on long fiber papers has made us one of the world's largest suppliers of tea bag papers. The balance of this unit's sales represents overlay and technical specialty products, which include flooring and furniture overlay papers, metallized products, adhesive tapes, vacuum bags, holographic labels and gift wrap. In 2003, our net sales of Long Fiber & Overlay Papers were \$165.4 million.

Printing & Converting Papers

Printing & Converting Papers focuses on papers for the production of high-quality hardbound books and other book publishing needs. Total book publishing papers account for the majority of this business unit's sales, and we believe we are the leading supplier of papers for this market in the United States. This business unit also produces other papers, including paper that is converted into specialized envelopes in a wide array of colors, finishes and capabilities. These markets are generally more mature and, therefore, have modest growth characteristics. In 2003, our net sales of Printing & Converting Papers were \$249.5 million.

Our Competitive Strengths

Since commencing operations 140 years ago, we believe that Glatfelter has developed into one of the world's leading manufacturers of specialty papers and engineered products. We believe that the following competitive strengths have contributed to our success:

Leading market positions in higher-value, niche segments. We have focused our resources to achieve market-leading positions in certain higher-value, niche segments. Our products include various highly specialized paper products designed for technically demanding end uses. Consequently, many of our products achieve premium pricing that is significantly above that of commodity paper grades. In 2003, approximately 70% of our sales were derived from these higher-value, niche products. The specialized nature of these products generally provides greater pricing stability relative to commodity paper products.

Customer-centric business focus. We offer a unique and diverse product line that can be customized to serve the individual needs of our customers. Our size allows us to develop close relationships with our key customers and to be adaptable in our product development, manufacturing, sales and marketing practices. We believe that this approach has led to the development of excellent customer relationships, defensible market positions and increased pricing stability relative to commodity paper products.

Significant investment in product development. In order to keep up with our customers' ever-changing needs, we continually enhance our product offerings through significant investment in product development. In each of the past three years, we invested approximately \$5.1 million on product development. Revenue generated from products developed, enhanced or improved within the five previous years as a result of these activities represented approximately 25%, 37% and 47% of our sales during 2001, 2002 and 2003, respectively.

Geographic diversity. In 1998, we expanded our global reach with the acquisition of Schoeller & Hoesch GmbH & Co. KG. Schoeller & Hoesch operates paper mills in Gernsbach, Germany and Scaër, France, as well as an abaca pulp mill in the Philippines. The Schoeller & Hoesch product lines serve multiple end markets, including tea bags, coffee filters, laminate furniture and flooring, labels and packaging, and adhesive tapes. During 2003, we sold our products to customers in approximately 80 countries throughout the world.

Integrated production. As a partially integrated producer, we are less subject to changes in the costs of certain raw materials and energy than non-integrated producers. Our Spring Grove mill is a vertically integrated operation producing in excess of 85% of the annual pulp required for its paper production. The principal raw material used to produce this pulp is pulpwood. We obtain approximately 25% of our pulpwood requirements from Company-owned timberlands, which helps

Table of Contents

stabilize our fiber costs in a highly fragmented market. Our Spring Grove facility also generates 100% of the steam and electricity required for its operations. In addition, our Philippine mill processes abaca fiber to produce abaca pulp, which is a key raw material used by our Long Fiber & Overlay business unit in Gernsbach and Scaër.

Our Business Strategy

Our vision is to become the global supplier of choice in specialty papers and engineered products. We are continuously developing and refining strategies to strengthen our business and position it for the future. Execution of these strategies is intended to capitalize on our strengths in customer relationships, technology and people, as well as our leadership positions in certain markets. To be successful in the current market environment, our strategy is focused on aggressively reducing costs and continually repositioning our product portfolio to increase our focus on higher-value, niche products. Implementation of our strategy may include the pursuit of acquisitions or other strategic opportunities. Certain key elements of our strategy are outlined below:

Reposition our product portfolio. By leveraging our leadership positions in several specialty niche markets, we plan to accelerate growth, improve margins and generate better financial returns through the optimization of our product portfolio. In 2003, approximately 70% of our total sales were derived from what we consider to be higher-value, niche products. Over time, we plan to increase our concentration on such products by driving growth in our sales of trade book papers, uncoated specialty products, long fiber and overlay products, and other specialty products. We believe that this strategy will realign our business more closely with our customers' needs and further reduce our exposure to the higher level of cyclicality experienced in commodity paper grades.

Employ commodity cost approach to specialty product manufacturing. While we are focused on higher-value, niche products, we seek to employ a commodity-like, low-cost approach to our manufacturing activities. In September 2003, we initiated a restructuring of our Neenah facility, and during the second quarter of 2004, we began to implement our North American Restructuring Program. Together, these actions comprise a series of initiatives designed to improve our cost position and overall financial performance. We believe that these steps will significantly improve our profitability and cash flow, which will allow us to deploy additional capital to specialty products with higher growth potential and returns.

Maintain our strong balance sheet and preserve financial flexibility for future growth initiatives. We are focused on prudent financial management and the maintenance of a conservative capital structure. Furthermore, we are committed to maintaining an investment grade credit rating and our flexibility to pursue strategic opportunities that will benefit our shareholders. We demonstrated this commitment in 2003, during which we maintained a stable debt level despite significant investments in capital equipment.

Execute Long Fiber & Overlay Papers growth plan. A core component of our long-term strategy is to drive growth in our Long Fiber & Overlay Papers business unit. Currently, we are one of the leading producers of tea bag papers in the world, and we believe that this market has promising growth characteristics as certain markets move toward tea bags versus loose tea leaves. We believe that we are well positioned to capitalize on this growth by leveraging our strong customer relationships and market-leading position in this segment. In addition, our rebuilt paper machine in Gernsbach will allow us to penetrate certain technical specialty markets, including the wall covering, textile/apparel and industrial markets.

Background to the Offering

Since Glatfelter was founded in 1864 by Philip H. Glatfelter, his descendants have retained a significant ownership interest in the Company. Throughout this prospectus, we refer to the descendants of Philip H. Glatfelter as the Glatfelter Family. Members of the Glatfelter Family have also played a key role in the management of our company, including our current Chairman and Chief Executive Officer,

Table of Contents

George H. Glatfelter II, a direct descendant of our founder. Today, there are over 100 members of the Glatfelter Family, none of whom are involved in the day-to-day management of our business, other than George H. Glatfelter II. For a more detailed discussion of the relationships between certain members of the Glatfelter Family and the Company, please see Certain Relationships and Related Transactions included elsewhere in this prospectus.

We estimate that, as of August 31, 2004, approximately 35% of our outstanding common stock was held by or for the benefit of the Glatfelter Family. The selling shareholders in this offering are trusts created by or for the benefit of members of the Glatfelter Family as well as a member of the Glatfelter Family. Following consummation of this offering, we estimate that the Glatfelter Family, including those not participating in this offering, will beneficially own approximately 17% of our outstanding common stock (or approximately 14%, if the underwriters exercise their over-allotment option in full).

We have agreed to undertake this offering following a request received from representatives of the Glatfelter Family. We have been informed by the selling shareholders that the decision to offer stock in this offering has been motivated by the desire to diversify their investments in a manner consistent with prudent investment principles.

The Glatfelter Family does not possess registration rights with regard to our common stock and substantially all of our common stock that the Glatfelter Family will own following this offering will be unregistered. In connection with this offering, the holders of substantially all of the shares of our common stock held by or for the benefit of the Glatfelter Family have agreed, subject to certain exceptions, not to offer or sell shares of our common stock for a period of 180 days after the date of this prospectus. These members of the Glatfelter Family have also agreed not to seek registration rights from us with respect to their remaining shares for a period of 365 days after the date of this prospectus. See Underwriting included elsewhere in this prospectus for more information on these agreements.

Risks Relating to Our Business

You should carefully consider the matters discussed in the Risk Factors section beginning on page 8 of this prospectus prior to deciding whether to invest in shares of our common stock. Some of the risks include:

Our business and financial performance may be adversely affected by downturns in the target markets that we serve;

Our industry is highly competitive and many of our competitors have greater financial resources than we do. Increased competition could adversely affect our financial performance;

Increases in the cost of raw materials and energy used to manufacture our products will increase our production costs and may adversely affect our financial performance; and

We are subject to substantial costs and potential liability related to environmental regulations and environmental remediation activities. We may face increasing compliance and remediation costs which could adversely affect our financial performance.

Company Information

We are incorporated under the laws of the Commonwealth of Pennsylvania. Our executive offices are located at 96 South George Street, Suite 500, York, Pennsylvania 17401. Our telephone number is (717) 225-4711. Our Web site address is www.glatfelter.com. The information on our Web site is not part of this prospectus.

Table of Contents

The Offering

Common stock offered by the selling shareholders	8,000,000 shares (or 9,200,000 shares if the underwriters exercise the over-allotment option in full)
Common stock outstanding before and after this offering	43,882,744 shares
Use of proceeds	We will not receive any proceeds from the sale of common stock by the selling shareholders.
New York Stock Exchange symbol	GLT

All of the shares offered by this prospectus are being offered by the selling shareholders.

The number of shares of common stock outstanding is based on the number of shares outstanding as of August 31, 2004 and excludes:

2,188,262 shares of common stock reserved for issuance upon the exercise of outstanding stock options at a weighted average exercise price per share of \$14.60;

279,620 shares of common stock reserved for issuance upon the vesting of restricted stock awards and restricted stock units; and

1,159,990 shares of common stock reserved for future awards under our 1992 Key Employee Long-Term Incentive Plan.

As of August 31, 2004 the selling shareholders held approximately 32% of our outstanding common stock. After giving effect to this offering, the selling shareholders will own approximately 13% of our outstanding common stock (or approximately 11% if the underwriters over-allotment option is exercised in full).

Unless otherwise indicated, the information in this prospectus assumes that the underwriters will not exercise the over-allotment option granted to them by the selling shareholders.

Table of Contents**Summary Consolidated Financial Information**

The following summary consolidated financial information should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations, Selected Historical Financial Data and our consolidated financial statements and related notes included elsewhere in this prospectus. The summary consolidated financial information for the years ended December 31, 2001, 2002, and 2003, and as of December 31, 2002 and 2003 is derived from our audited consolidated financial statements included elsewhere in this prospectus. In July 2003, we completed the sale of our Wisches, France subsidiary and, in accordance with accounting principles generally accepted in the United States of America, the consolidated financial information for all periods presented in this Summary Consolidated Financial Information has been adjusted to reflect this subsidiary as a discontinued operation. As a result of such adjustment, the summary consolidated financial information for the years ended December 31, 1999 and 2000 and as of December 31, 1999, 2000 and 2001 is unaudited. The summary consolidated financial information for the six months ended June 30, 2003 and 2004 is unaudited. The historical results are not necessarily indicative of our future results of operations or financial performance.

Table of Contents

RISK FACTORS

An investment in our common stock involves risks. You should carefully consider, in addition to the other information contained or incorporated by reference in this prospectus, the following risk factors before deciding to purchase any shares of our common stock. If any of the following risks occur, our business, prospects, reputation, results of operations or financial condition could be harmed. In that case, the trading price of our common stock could decline, and you could lose some or all of your investment. This prospectus also contains forward-looking statements that involve risks and uncertainties (see Cautionary Note Regarding Forward-Looking Statements included elsewhere in this prospectus). Our actual results could differ materially from those anticipated in the forward-looking statements as a result of specific factors, including the risks described below and elsewhere in this prospectus.

Risks Related to Our Business

Our business and financial performance may be adversely affected by downturns in the target markets that we serve.

Demand for our products in the markets we serve is primarily driven by consumption of the products we produce, which is often affected by general economic conditions. In recent years, the global paper industry in which we compete has been adversely impacted by paper producing capacity exceeding the demand for products. Our Printing & Converting Papers business unit, in particular, has been negatively affected by such over capacity. Downturns in our target markets could result in decreased demand for our products. In particular, our business may be adversely affected during periods of economic weakness by the general softness in these target markets. Our results could be adversely affected if economic conditions weaken or fail to improve. Also, there may be periods during which demand for our products is insufficient to enable us to operate our production facilities in an economical manner. These conditions are beyond our ability to control and have had, and may continue to have, a significant impact on our sales and results of operations.

In addition to fluctuations in demand for our products in the markets we serve, the markets for our paper products are also significantly affected by changes in industry capacity and output levels. There have been periods of supply/ demand imbalance in the pulp and paper industry which have caused pulp and paper prices to be volatile. The timing and magnitude of price increases or decreases in the pulp and paper market have generally varied by region and by product type. A sustained period of weak demand or excess supply would likely adversely affect pulp and paper prices. This could have a material adverse affect on our operating and financial results.

Our industry is highly competitive and increased competition could reduce our sales and profitability.

We offer our products throughout the United States and globally in approximately 80 countries. We compete on the basis of the quality of our products, customer service, product development activities, price and distribution. Our competition in the markets in which we participate comes from companies of various sizes, some of which have greater financial and other resources than we do. In our Engineered Products and Long Fiber & Overlay Papers business units, we compete with specialty divisions of large companies such as Ahlstrom, International Paper, MeadWestvaco, Sappi and Stora Enso, as well as other companies such as J R Crompton. In our Printing & Converting Papers business unit, we compete with companies such as Domtar and Weyerhaeuser, with respect to book publishing papers. In the envelope sector, we compete with companies such as Blue Ridge, International Paper and Weyerhaeuser. Increased competition could force us to lower our prices or to offer additional services at a higher cost to us, which could reduce our gross margins and net income. The greater financial resources of certain of our competitors may enable them to commit larger amounts of capital in response to changing market conditions. Certain competitors may also have the ability to develop product or service innovations that could put us at a disadvantage.

Table of Contents

Some of the factors that may adversely affect our ability to compete in the markets in which we participate include:

- the entry of new competitors into the markets we serve, including foreign producers;
- the willingness of commodity-based paper producers to enter our specialty markets when they are unable to compete or when demand softens in their traditional markets;
- the aggressiveness of our competitors' pricing strategies, which could force us to decrease prices in order to maintain market share;
- our failure to anticipate and respond to changing customer preferences;
- our inability to develop new, improved or enhanced products; and
- our inability to maintain the cost efficiency of our facilities.

If we cannot effectively compete in the markets in which we operate, our sales and operating results are likely to be adversely affected.

The cost of raw materials and energy used to manufacture our products could increase.

We require access to sufficient and reasonably priced quantities of pulpwood, wood and other pulps, pulp substitutes, abaca fiber and certain other raw materials. Although our manufacturing facility in Spring Grove is a vertically integrated operation that uses wood acquired from our own timberlands and others to make pulp, our Neenah facility purchases wood and other pulps for use in the manufacture of its products. In addition, our Philippines facility purchases abaca fiber to make pulp, which we use to manufacture our long fiber products in Gernsbach, Germany and Scaër, France. We may not be able to pass increased raw materials prices on to our customers if the market or existing agreements with our customers do not allow us to raise the prices of our finished products. Moreover, if we elect to pass-through increased raw materials costs, the resulting increase in the selling prices for the products we produce could reduce the volume of units we sell and decrease our revenues. If price adjustments significantly trail the increase in raw materials prices or if we cannot effectively hedge against price increases, our operating results will be adversely affected.

With the exception of our Neenah facility, our production facilities generate all of the steam required for their operations. The Neenah facility purchases steam under a long-term agreement with a third party supplier. The cost of the purchased steam is based on the market price of natural gas, and we are required to purchase an annual minimum amount. We have experienced significant volatility and increases in natural gas prices. If prices continue to increase, or if we are unsuccessful in any actions to mitigate such price increases, our operating results could be adversely impacted.

We are subject to substantial costs and potential liability for environmental matters.

We are subject to various environmental laws and regulations that govern our operations, including discharges into the environment, and the handling and disposal of hazardous substances and wastes. We are also subject to laws and regulations that impose liability and clean-up responsibility for releases of hazardous substances into the environment.

To comply with environmental laws and regulations, we have incurred, and will continue to incur, substantial capital and operating expenditures. We anticipate that environmental regulation of our operations will continue to become more burdensome and that capital and operating expenditures necessary to comply with environmental regulations will continue, and perhaps increase, in the future. Because environmental regulations are not consistent worldwide, our ability to compete in the world marketplace may be adversely affected by capital and operating expenditures required for environmental compliance.

In addition, we may incur obligations to remove or mitigate any adverse effects on the environment, such as air and water quality, resulting from mills we operate or have operated. Potential obligations

Table of Contents

include compensation for the restoration of natural resources, personal injury and property damages. In connection with the sale of our Ecusta Division in 2001, we are incurring landfill closure costs and may incur additional environmental-related costs. We are also liable for the costs of clean-up related to the presence of polychlorinated biphenyls, or PCBs, in the lower Fox River on which our Neenah, Wisconsin mill is located. We have financial reserves for environmental matters but we cannot be certain that those reserves will be adequate to provide for future obligations related to these matters, that our share of costs and/or damages for these matters will not exceed our available resources, or that such obligations will not have a long-term, material adverse effect on our consolidated financial position, liquidity or results of operations.

Our environmental issues are complicated and should be reviewed in context; please see a more detailed discussion of these matters in Management's Discussion and Analysis of Financial Condition and Results of Operations, Liquidity and Capital Resources, Environmental Matters and Business Environmental Matters included elsewhere in this prospectus.

We have operations in a politically and economically unstable location.

We own and operate a pulp mill in the Philippines where the operating environment is unstable and subject to political unrest. Our Philippine pulp mill produces abaca pulp, a significant raw material used by our Gernsbach, Germany and Scaër, France facilities in the production of our long fiber-based products. Our Philippine pulp mill is currently our sole provider of abaca pulp. There are limited suitable alternative sources of readily available abaca pulp in the world. In the event of a disruption in supply from our Philippine mill, there is no guarantee that we could obtain adequate amounts of abaca pulp from alternative sources at a reasonable price or at all. As a consequence, any civil disturbance, unrest, political instability or other event that causes a disruption in supply could limit the availability of abaca pulp and would increase our cost of obtaining abaca pulp. Such occurrences could adversely impact our sales volumes, revenues and operating results.

We may not effectively implement our North American Restructuring Program.

The North American Restructuring Program, which we began to implement in the second quarter of 2004, is designed to improve operating results by enhancing product and service offerings in Printing & Converting Papers book publishing markets, reducing our workforce in Spring Grove, Pennsylvania by approximately 20%, and implementing revised sourcing strategies, end-to-end planning and scheduling processes.

The realization of financial benefits from these efforts is dependent on many factors, including, but not limited to, customer acceptance of streamlined product and service offerings, the ability to effectively revise and enhance our production planning and effective supply chain management. It is also possible that disruptions to our operations may occur during the implementation phase of the program. In addition, our anticipated cost savings are based upon certain estimates that may prove to be inaccurate. For example, if sales are lower than our expectations, our cost saving programs may not achieve the benefits we expect. In this case, we may be forced to take additional cost saving steps that could result in unforeseen charges and materially affect our ability to compete or implement our North American Restructuring Program. In the event that we do not effectively implement our North American Restructuring Program, we may not achieve the financial benefits we anticipate from such program and production costs could increase and production quality could be adversely affected.

We may be unable to maintain our relationships with organized labor unions.

Approximately 68% of our global workforce is represented by various labor unions. While we believe we enjoy satisfactory relationships with all of the labor organizations that represent our employees, we cannot guarantee that labor-related disputes will not arise. Labor disputes could result in disruptions in production and could also cause increases in production costs, which could harm our relationships with our

Table of Contents

customers and adversely affect our business and financial results. In addition, any labor disputes could adversely impact our ability to successfully implement the North American Restructuring Program.

We may be unable to achieve the expected financial benefits from the Neenah restructuring.

In September 2003, we announced a restructuring program designed to improve financial performance at Neenah which included the shutdown of the deinking pulp mill and one paper machine and a 50% workforce reduction at the facility. This restructuring program was expected to yield approximately \$8 million to \$11 million in annual pre-tax financial benefits. During the implementation of this program, we have experienced production costs in excess of our initial expectations due to delays and complications associated with the headcount reduction and related manufacturing process changes. While we have taken measures to improve our financial performance at Neenah, we may not achieve the financial benefits originally anticipated from the Neenah restructuring. In addition to the difficulties we have experienced in implementing our restructuring plan, increasing purchased pulp and natural gas prices have adversely affected our results at Neenah and may offset any financial benefits we ultimately realize from our restructuring actions. Continued underperformance as a result of complications with the implementation of the restructuring program or the impact of increasing purchased pulp and natural gas prices may require us to implement additional restructuring activities, which could result in unforeseen charges and may have an adverse impact on our operating results.

We may not be able to develop new products acceptable to our customers.

Our business strategy is market focused and includes investments in developing new products to meet the changing needs of our customers and to maintain our market share. Our success will depend in large part on our ability to develop and introduce new and enhanced products that keep pace with introductions by our competitors and changing customer preferences. If we fail to anticipate or respond adequately to these factors, then we may lose opportunities for business with both current and potential customers.

The success of our new product offerings will depend on several factors, including our ability to:

anticipate and properly identify our customers' needs and industry trends;

price our products competitively;

develop and commercialize new products and applications in a timely manner;

differentiate our products from our competitors' products; and

invest in research and development activities efficiently.

Our inability to develop new products could adversely impact our business and ultimately harm our profitability.

If we fail to maintain satisfactory relationships with our larger customers, our business may be harmed.

We generally have not entered into long-term fixed quantity supply agreements with our customers. We regularly submit bids for new business or renewal of existing business. Due to competition or other factors we may lose business from our customers, either partially or completely. The loss of one or more of our significant customers, or a substantial reduction of orders by any of our significant customers, could harm our business and results of operations. Moreover, our customers may vary their order levels significantly from period to period, and customers may not continue to place orders with us in the future at the same levels as in prior periods. In the event we lose any of our larger customers, we may not be able to replace that revenue source, which could harm our financial results.

Our international operations pose certain risks that may adversely impact sales and earnings.

We have significant operations and assets located in Germany, France and the Philippines. Our international sales and operations are subject to a number of special risks, in addition to the risks of our

Table of Contents

domestic sales and operations, including differing protections of intellectual property, trade barriers, labor unrest, exchange controls, regional economic uncertainty, differing (and possibly more stringent) labor regulation, risk of governmental expropriation, domestic and foreign customs and tariffs, differing regulatory environments, difficulty in obtaining distribution support, difficulty in managing widespread operations and political instability and unrest. These factors may adversely affect our future profits. Also, in some foreign jurisdictions we may be subject to laws limiting the right and ability of entities organized or operating therein to pay dividends or remit earnings to affiliated companies unless specified conditions are met. Any such limitations would restrict our flexibility in using funds generated in those jurisdictions.

Foreign currency exchange rate fluctuations could adversely affect our results of operations.

We own and operate paper mills in Germany and France, where the local currency is the Euro, and a pulp mill in the Philippines, where the local currency is the Peso. For the first six months of 2004, our operations in these countries generated approximately 33% of our sales and 32% of our operating expenses. The translation of results from these international operations into U.S. dollars is subject to changes in foreign currency exchange rates. Such changes will lead to fluctuations in our results of operations. Our ability to maintain our products' price competitiveness for our operations based in Germany and France is reliant, in part, on the relative strength of the currency in which the product is denominated compared to the currency of the market into which it is sold and the functional currency of our competitors. Changes in the rate of exchange of foreign currencies in relation to the U.S. dollar and other currencies may adversely impact our ability to offer products in certain markets at acceptable prices or our results of operations.

We may be unable to generate sufficient cash flow to simultaneously fund our operations, finance capital expenditures, satisfy obligations and make dividend payments on our common stock.

Our business is capital intensive and requires significant expenditures for equipment maintenance and new or enhanced equipment, for environmental compliance matters and to support our business strategies and research and development efforts. We expect to meet all of our near- and longer-term cash needs from a combination of operating cash flow, cash and cash equivalents, sale of timberlands, proceeds from insurance recoveries, our existing credit facility or other bank lines of credit and other long-term debt. If we are unable to generate sufficient cash flow from these sources, we could be unable to meet our near- and longer-term cash needs or make dividend payments.

We may be unable to fully realize the value of our deferred tax assets.

At December 31, 2003, we had approximately \$60 million in deferred tax assets. We may be unable to generate sufficient taxable income to realize the benefits from these assets. If we continue to operate at a loss in certain jurisdictions or are unable to generate sufficient future taxable income, or if there is a material change in the actual effective tax rates or time period within which the underlying temporary differences become taxable or deductible, we could be required to increase the valuation allowance against our deferred tax assets resulting in a substantial increase in our effective tax rate and a material adverse impact on our operating results.

Risks Related to Our Common Stock

Our common stock price may be volatile, which could cause the value of an investment in our shares to decline.

The realization of any of the risks described in this "Risk Factors" section or other unseen risks could have an adverse effect on the market price of our common stock. As a result, investors who purchase shares of our common stock in this offering may experience a decrease, which could be substantial, in the value of those shares. In addition to factors affecting our business, securities markets worldwide experience significant price and volume fluctuations. This market volatility, as well as general economic, market or political conditions, could reduce the market price of our common stock notwithstanding our operating performance. In addition, our operating results could be below the expectations of public analysts and

Table of Contents

investors, and, in response, the market price of our common stock could decrease significantly. Purchasers of our shares in this offering may be unable to resell such shares at or above the initial public offering price.

The sale of our shares in this offering or future sales of our shares could depress the market price of our common stock.

As of July 31, 2004, the number of shares of our outstanding common stock freely tradeable on the New York Stock Exchange and not owned by our officers, directors or other affiliates was approximately 29,030,407 shares. This offering will result in a substantial amount of previously unregistered shares of our common stock being registered and sold, which may depress the market price of our common stock. The market price of our common stock could also decline as a result of sales of a large number of shares of our common stock in the market after this offering or the perception that these sales could occur. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate.

The selling shareholders in this offering are trusts created by or for the benefit of members of the Glatfelter Family as well as a member of the Glatfelter Family. Following this offering, the selling shareholders, together with other members of the Glatfelter Family who are not offering common stock in this offering, will, in our best estimate, own approximately 17% of our total shares of common stock outstanding (or 14% if the underwriters exercise their over-allotment option in full). Those persons will be able to sell their shares in the public market from time to time, subject to certain limitations on the timing, amount and method of those sales imposed by securities laws. The holders of substantially all of the shares of our common stock held by or for the benefit of the Glatfelter Family have agreed to a lock-up period with the underwriters, meaning that such shareholders may not, subject to certain exceptions, sell any of their shares without the prior consent of Credit Suisse First Boston LLC for 180 days after the date of this prospectus. If one or more members of the Glatfelter Family were to sell a large number of their shares, the market price of our stock could decline significantly. In addition, the perception in the public markets that sales by members of the Glatfelter Family might occur could also adversely affect the market price of our common stock.

In addition to the Glatfelter Family's lock-up period, sales of our common stock are also restricted by lock-up agreements that our directors and officers have entered into with the underwriters. The lock-up agreements restrict our directors and officers and certain non-selling members of the Glatfelter Family, subject to specified exceptions, from selling or otherwise disposing of any shares for a period of 180 days after the date of this prospectus without the prior consent of Credit Suisse First Boston LLC. Pursuant to the underwriting agreement among us, the underwriters and the selling shareholders, we will be restricted from selling or otherwise disposing of any shares for a period of 180 days after the date of this prospectus without the prior consent of Credit Suisse First Boston LLC. Credit Suisse First Boston LLC may, however, in its sole discretion and without notice, release all or any portion of the shares from the restrictions in the lock-up agreements.

In the future, we may issue our securities, including in connection with making new investments. The amount of our common stock issued in connection with an investment could constitute a material portion of our then outstanding common stock.

Certain anti-takeover provisions in state law and our Articles of Incorporation could make it more difficult to acquire us.

Our Articles of Incorporation, as amended, and the Pennsylvania Business Corporation Law of 1988, as amended, contain certain provisions which could delay or impede the removal of incumbent directors and could make a merger, tender offer or proxy contest involving us difficult or discourage a third party from attempting to acquire control of us. In particular, the classification of our Board of Directors, which makes it difficult for shareholders to change the composition of our Board of Directors in any one year, could have the effect of delaying a change in control. These anti-takeover provisions could, in some limited instances, impede the ability of our shareholders to benefit from a change in control or to change our management or Board of Directors.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

The statements contained in this prospectus, including those under the captions Prospectus Summary, Risk Factors, Business, Management Discussion and Analysis of Financial Condition and Results of Operations and other sections of this prospectus that are not purely historical, are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 or the Exchange Act, and Section 27A of the Securities Act of 1933, or the Securities Act. When used in this prospectus, the words or phrases expects, will continue, estimates, we believe and similar expressions are intended to identify forward-looking statements within the meaning of the Exchange Act and the Securities Act. Forward-looking statements include plans, commitments and objectives of management for future operations. These forward-looking statements involve risks and uncertainties and are based on assumptions that may not be realized. Actual results and outcomes may differ materially from those discussed or anticipated. Some of the forward-looking statements and associated risks relate to the following:

- i. variations in demand for, or pricing of, our products;
- ii. changes in the cost or availability of raw materials we use, in particular market pulp, pulp substitutes, abaca fiber, and changes in energy-related costs;
- iii. our ability to develop new, higher-value-added Engineered Products and Long Fiber & Overlay Papers;
- iv. the impact of competition, changes in industry paper production capacity, including the construction of new mills, the closure of mills and incremental changes due to capital expenditures or productivity increases;
- v. our ability to execute our North American Restructuring Program, growth strategies and cost reduction initiatives;
- vi. costs and other effects of environmental compliance, clean-up, damages, remediation or restoration, or personal injury or property damages related thereto, such as costs associated with the Notice of Violations issued by the Pennsylvania Department of Environmental Protection, the costs of natural resource restoration or damages related to the presence of PCBs in the lower Fox River on which our Neenah mill is located, and the costs of environmental matters at our former Ecusta Division mill;
- vii. the gain or loss of significant customers and/or on-going viability of such customers;
- viii. risks associated with our international operations, including local economic and political environments and fluctuations in currency exchange rates;
- ix. geopolitical events, including war and terrorism;
- x. enactment of adverse state, federal or foreign tax or other legislation or changes in government policy or regulation;
- xi. adverse results in litigation;
- xii. disruptions in production and/or increased costs due to labor disputes;
- xiii. our ability to realize the value of our timberlands;
- xiv. the recovery of environmental-related losses under our insurance policies; and
- xv. our ability to identify, finance and consummate future alliances or acquisitions.

See Risk Factors included elsewhere in this prospectus for a more complete description of the material risks related to our business and an investment in our common stock.

Table of Contents**USE OF PROCEEDS**

We will not receive any proceeds from the sale of our common stock offered by the selling shareholders or the additional shares to be sold by the selling shareholders if the underwriters exercise their over-allotment option.

PRICE RANGE OF OUR COMMON STOCK AND OUR DIVIDEND POLICY

Our common stock is listed on the New York Stock Exchange and trades under the symbol GLT. The following table is based upon the information available to us and sets forth the range of the high and low sales prices for our common stock for the following periods during 2002, 2003 and 2004, based upon quotations on the New York Stock Exchange:

	Price Per Share		Dividend Per Share
	High	Low	
2002			
First Quarter	\$ 18.84	\$ 14.65	\$.175
Second Quarter	19.35	16.32	.175
Third Quarter	18.94	11.50	.175
Fourth Quarter	14.05	10.22	.175
2003			
First Quarter	\$ 14.15	\$ 9.65	\$.175
Second Quarter	15.05	10.70	.175
Third Quarter	15.45	11.67	.09
Fourth Quarter	13.29	11.70	.09
2004			
First Quarter	\$ 12.93	\$ 10.44	\$.09
Second Quarter	14.09	10.45	.09
Third Quarter (through September 21, 2004)	14.23	11.55	.09

On September 21, 2004, the closing sale price of our common stock as reported on the New York Stock Exchange was \$11.94 per share. At August 31, 2004, there were 2,168 holders of record of our common stock, based on the shareholders list maintained by our transfer agent.

We paid quarterly dividends on our common stock as set forth in the table above. Our Board of Directors determines what, if any, dividends will be paid to our shareholders. Dividend payment decisions are based upon then-existing factors and conditions and, therefore, historical trends of dividend payments are not necessarily indicative of the amount or frequency of any future payments.

Table of Contents**CAPITALIZATION**

The following table sets forth our cash and cash equivalents and capitalization as of June 30, 2004. We have not provided an adjusted capitalization table because we will not receive any of the proceeds from this offering. This table should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements, related notes and other financial information included elsewhere in this prospectus.

<i>Dollars in thousands, except share amounts</i>	As of June 30, 2004
Cash and cash equivalents	\$ 11,097
Short-term debt	\$ 4,500
Long-term debt:	
Revolving credit facility, due June 2006 ⁽¹⁾	27,528
6 7/8% Notes, due July 2007	150,000
Note payable SunTrust, due March 2008	34,000
Other notes, various	794
Total long-term debt	212,322
Shareholders' equity ⁽²⁾	
Preferred stock, \$50 par value; authorized 40,000 shares; issued and outstanding 0 shares	
Common stock, \$.01 par value; authorized 120,000,000 shares; issued 54,361,980 shares (including treasury shares 10,498,150 shares)	544
Additional paid in capital	42,181
Retained earnings	511,497
Deferred compensation	(1,581)
Accumulated other comprehensive loss	(308)
Treasury stock	(156,355)
Total shareholders' equity	395,978
Total capitalization	\$ 612,800

- (1) Borrowings of up to \$125 million are available at any one time under our revolving credit facility. This facility permits us to make borrowings for time periods between one day and six months. We incur interest on this facility at an interest rate based on the domestic prime rate or a Eurocurrency rate, at our option, plus a margin ranging from 0.525 to 1.05 basis points.
- (2) Shareholders' equity includes the number of shares of our common stock outstanding as of June 30, 2004. This table does not reflect 2,262,422 shares of our common stock issuable upon exercise of outstanding stock options, 279,620 shares of our common stock issuable upon the vesting of restricted stock awards and restricted stock units and 1,115,255 shares of our common stock reserved for future issuance under our 1992 Key Employee Long-Term Incentive Plan.

Table of Contents**SELECTED CONSOLIDATED FINANCIAL DATA**

You should read the selected consolidated financial data set forth below in conjunction with our consolidated financial statements and related notes and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this prospectus, including the documents incorporated by reference. The selected consolidated financial data for the years ended December 31, 2001, 2002 and 2003 and as of December 31, 2002 and 2003 is derived from our audited financial statements included elsewhere in this prospectus. In July 2003, we completed the sale of our Wisches, France subsidiary and, in accordance with accounting principles generally accepted in the United States of America, the consolidated financial data for all periods presented in this Selected Consolidated Financial Data has been adjusted to reflect this subsidiary as a discontinued operation. As a result of this adjustment, the selected consolidated financial data for the years ended December 31, 1999 and 2000 and as of December 31, 1999, 2000 and 2001 is unaudited. The selected consolidated financial data for the six months ended June 30, 2003 and 2004 is unaudited. The historical results are not necessarily indicative of our future results of operations or financial performance.

<i>Dollars in thousands, except per share amounts</i>	Year Ended December 31,					Six Months Ended June 30,

Table of Contents

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

You should read the following discussion in conjunction with Selected Consolidated Financial Data and the consolidated financial statements and related notes thereto, included elsewhere in this prospectus, including the documents incorporated by reference herein. This discussion contains forward-looking statements that we based on our current expectations, estimates and projections about our business and operations. Our actual results may differ materially from those currently anticipated and expressed in such forward-looking statements as a result of a number of factors, including those we discuss under Cautionary Note Regarding Forward-Looking Statements and elsewhere in this prospectus.

Overview

We manufacture, both domestically and internationally, a wide array of specialty papers and engineered products. Substantially all of our revenue is earned from the sale of our products to customers in numerous markets, including book publishing, food and beverage, decorative laminates for furniture and flooring, and certain other highly technical niche markets.

Our industry has been adversely impacted by an imbalance between supply and demand for certain of our products. In this environment, during 2003 we experienced declining sales volumes and lower average selling prices, primarily in our more commodity-like products offered by our Printing & Converting Papers business unit.

Results of Operations

Six Months Ended June 30, 2004 Compared to Six Months Ended June 30, 2003

Introduction

A number of events occurred that impacted our results of operations and financial condition in the first six months of 2004, including:

Unit volumes in Engineered Products increased by 10.4% and in Long Fiber & Overlay Papers by 12.0% when compared with the same period a year ago.

Pricing in our Printing & Converting Papers business declined throughout 2003 and, as a result, was significantly lower in the first half of 2004 compared to the same period of 2003.

Approximately 57% of total sales were from products developed, enhanced or improved in the last five years.

We completed \$30.3 million in sales of timberlands and successfully negotiated the receipt of \$25.5 million in insurance recoveries related to the Fox River environmental matter, thereby strengthening our balance sheet.

We reduced our long-term debt outstanding by approximately \$37 million since the end of 2003.

Table of Contents

The following table sets forth summarized results of operations:

<i>Dollars in thousands, except per share amounts</i>	Six Months Ended June 30,	
	2004	2003
Net sales	\$ 261,106	\$ 271,906
Gross profit	36,541	48,576
Operating income	64,091	50,206
Income from continuing operations	34,630	27,371
Loss from discontinued operations		(325)
Net income	34,630	27,046
Earnings per diluted share from continuing operations	0.79	0.63
Earnings per diluted share	0.79	0.62

The consolidated results of operations for the six months ended June 30, 2004 and 2003 include the following significant items:

<i>Dollars in thousands, except per share amounts</i>	After-tax Income (loss)	Earnings Per Share
2004		
Timberland sales	\$ 18,103	\$0.41
Insurance recoveries	15,402	0.35
Corporate aircraft sale	1,543	0.04
Restructuring charge	(524)	(0.01)
2003		
Timberland sales	\$ 19,965	\$0.46
Write-off of certain papermaking equipment	(654)	(0.02)

The above items increased earnings from continuing operations by \$34.5 million, or \$0.79 per diluted share, in the first six months of 2004 and by \$19.3 million, or \$0.44 per share, in the comparable period of 2003. The decline in earnings before the items discussed above was primarily due to lower selling prices in our Printing & Converting Papers business unit and, to a lesser extent, in the Engineered Products and Long Fiber & Overlay Papers business units.

Business Units

We manage our organization along separate business units: Engineered Products, Long Fiber & Overlay Papers and Printing & Converting Papers, as well as Tobacco Papers, which were sold pursuant to a supply agreement that expired at the end of July 2004. Effective January 1, 2004, we implemented organizational changes and as a result we realigned and reclassified the presentation of certain product offerings of the business units. All segment data herein for prior periods has been restated to give effect to the further refinement of our organizational structure discussed above.

Table of Contents

The following table sets forth operating profit (loss) by business unit and the composition of consolidated income from continuing operations before income taxes:

<i>Dollars in millions</i>	Six Months Ended June 30,	
	2004	2003
Business Unit		
Engineered Products	\$(3.3)	\$ 1.0
Long-Fiber & Overlay Papers	6.9	7.3
Printing & Converting Papers	(11.3)	(0.7)
Tobacco Papers	(0.2)	(2.8)
	<hr/>	<hr/>
Total Business Unit	(7.9)	4.8
Energy sales, net	5.3	5.0
Pension income, net	8.7	9.0
Restructuring charge	(0.9)	
Gain on dispositions of plant, equipment and timberlands	33.4	31.4
Gain on insurance recoveries	25.5	
	<hr/>	<hr/>
Total operating income	64.1	50.2
Interest expense	(6.7)	(7.1)
Other income (expense), net	0.8	(0.3)
	<hr/>	<hr/>
Income from continuing operations before income taxes	\$58.2	\$42.8
	<hr/>	<hr/>

Results of individual business units are presented based on our management accounting practices and management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to accounting principles generally accepted in the United States of America; therefore, the financial results of individual business units are not necessarily comparable with similar information for any other company. The management accounting process uses assumptions and allocations to measure performance of the business units. Methodologies are refined from time to time as management accounting practices are enhanced and businesses change. Costs to produce products sold are allocated to the respective business unit based on standard costs and a proportion of manufacturing variances. The costs incurred by support areas not directly aligned with a business unit are allocated primarily based on an estimated utilization of support area services.

Management evaluates results of operations before energy sales, non-cash pension income, restructuring related charges, unusual items and effects of asset dispositions because it believes this is a more meaningful representation of the operating performance of its core papermaking businesses, the profitability of business units and the extent of cash flow generated from core operations. This presentation is closely aligned with the management and operating structure of our Company. It is also on this basis that the Company's performance is evaluated internally and by our Board of Directors.

Table of Contents*Sales and Costs of Products Sold*

The following table sets forth information with respect to net sales, costs of products sold and gross profit:

<i>Dollars in thousands</i>	Six Months Ended June 30,		Change
	2004	2003	
Net sales	\$ 261,106	\$ 271,906	\$ (10,800)
Energy sales net	5,308	5,052	256
Total revenues	266,414	276,958	(10,544)
Cost of products sold	229,873	228,382	1,491
Gross profit	\$ 36,541	\$ 48,576	\$ (12,035)
Gross margin as a percent of net sales	14.0%	17.9%	

The decline in net sales was primarily attributable to lower sales volumes totaling \$3.6 million primarily related to the fourth quarter of 2003 shutdown of a papermaking machine at our Neenah, Wisconsin facility, which primarily served our Printing & Converting Papers business unit. In addition, average selling prices declined, on a constant currency basis, an aggregate of \$12.7 million, primarily in the Printing & Converting Papers business unit and, to a lesser extent, in Engineered Products and Long Fiber & Overlay Papers. Pricing for Printing & Converting Papers products improved in the second quarter of 2004 relative to the first quarter of 2004 and prices for certain of the unit's product offerings are expected to increase further during the third quarter of this year.

The impact of the decline in selling prices and the Neenah shutdown was partially offset by a 10.4% and 12.0% unit volume increase in our Engineered Products and Long Fiber & Overlay Papers business units, respectively. In addition, the favorable effect of a weaker U.S. dollar on translated results of international operations increased reported net sales by approximately \$8.5 million. However, the weaker U.S. dollar relative to the Euro adversely affected the price competitiveness of Long Fiber & Overlay Papers products in certain geographic markets.

The following tables set forth net sales information by business unit:

<i>Dollars in millions</i>	Six Months Ended June 30,		Percent of Total	
	2004	2003	2004	2003
Business Unit				
Engineered Products	\$ 55.1	\$ 51.9	21.1%	19.0%
Long-Fiber & Overlay Papers	97.3	79.7	37.3	29.3
Printing & Converting Papers	107.9	134.0	41.3	49.4
Tobacco Papers	0.8	6.3	0.3	2.3
Total	\$ 261.1	\$ 271.9	100.0%	100.0%

Costs of products sold increased \$1.5 million in the comparison. The increase was primarily due to a \$6.5 million unfavorable effect of foreign currency translation adjustments, a \$5.0 million increase in costs due to higher purchased fiber and energy costs at the Neenah facility and transition-related operating inefficiencies related to the 2003 Neenah restructuring, partially offset by \$7.8 million of lower production costs related to the decline in sales volumes. During the second quarters of 2004 and 2003, we completed the annually scheduled maintenance shutdown of our Spring Grove facility. These shutdowns result in increased maintenance spending and reduced production leading to unfavorable manufacturing variances that increase costs of products sold. The Spring Grove maintenance shutdown had an estimated impact on

gross profit of approximately \$5.5 million in the first six months of 2004 and \$6.1 million in the comparable period a year ago.

Table of Contents*Non-Cash Pension Income*

Non-cash pension income results from the considerably over-funded status of our plans. The amount of pension income recognized each year is determined using various actuarial assumptions and certain other factors, including the fair value of our pension assets as of the beginning of the year. The following summarizes non-cash pension income for each quarter:

<i>Dollars in thousands</i>	Six Months Ended June 30,		Change
	2004	2003	
<i>Recorded as:</i>			
Costs of products sold	\$7,978	\$7,884	\$ 94
Selling, general and administrative expense	705	1,114	(409)
Total	\$8,683	\$8,998	\$(315)

Non-cash pension income for the full year of 2004 is expected to approximate amounts recognized in 2003.

Operating Expenses

<i>Dollars in thousands</i>	Six Months Ended June 30,		Change
	2004	2003	
Selling, general and administrative expenses	\$ 30,513	\$ 29,771	\$ 742
Restructuring charges	867		867
Gains on dispositions of plant, equipment and timberlands	(33,430)	(31,401)	(2,029)
Gains from insurance recoveries	(25,500)		(25,500)

Selling, General and Administrative

Selling, general and administrative expenses increased during the first six months of 2004 compared to the same period of 2003 primarily due to higher legal fees associated with \$25.5 million of insurance recoveries, costs associated with implementing the North American Restructuring Program, and the unfavorable impact of foreign currency translation adjustments.

Restructuring Charges

Restructuring charges in the first six months of 2004 totaled \$0.9 million for severance and related benefits associated with the elimination of approximately 25 non-union positions in connection with the North American Restructuring Program and for increases to the 2003 Neenah restructuring accrual.

As discussed elsewhere in this prospectus, we expect to record, in the third quarter of 2004, a restructuring charge associated with the North American Restructuring Program of between approximately \$13 million and \$20 million. The charge is primarily for enhanced pension benefits, post-retirement medical benefits and other related employee severance costs associated with the reduction of our Spring Grove facility workforce. The workforce reduction is expected to be completed by the end of 2004. Pension related charges will be recorded as a reduction of the prepaid pension benefit costs. The cash required to complete the Spring Grove facility workforce reduction is expected to total approximately \$3 million to \$7 million.

Table of Contents*Gains on Dispositions of Plant, Equipment and Timberlands*

During the first six months of 2004 and 2003, we completed sales of timberlands and, in 2004, the corporate aircraft. The following table summarizes these transactions.

<i>Dollars in thousands</i>	Six Months Ended June 30,					
	2004			2003		
	Acres	Proceeds	Gain	Acres	Proceeds	Gain
Timberlands	2,332	\$ 30,283	\$ 29,972	25,500	\$ 37,850	\$ 31,234
Corporate aircraft	n/a	2,861	2,554			
Other	n/a	964	904	n/a	1,080	167
Total		\$ 34,108	\$ 33,430		\$ 38,930	\$ 31,401

All property sales completed in the first six months of 2004 were sold for cash. As consideration for the Timberlands sold in the first six months of 2003, we received a 10-year note from a subsidiary of The Conservation Fund in the principal amount of \$37.9 million, which is included in Other assets in our condensed consolidated balance sheet as of June 30, 2004 and December 31, 2003 included elsewhere in this prospectus.

Gains from Insurance Recoveries

During the first six months of 2004, we reached successful resolution of certain claims under insurance policies related to the Fox River environmental matter. Insurance recoveries included in the results of operations for the first six months of 2004 totaled \$25.5 million and were received in cash prior to June 30, 2004.

On August 6, 2004, we received an additional \$7.3 million of insurance recoveries related to the Fox River environmental matter that will be recorded in the third quarter of 2004. We continue to pursue legal actions against certain other insurers that we believe are liable under similar policies related to the Fox River environmental matter.

Income Taxes

Our provision for income taxes for the first six months of 2004 and 2003, totaled \$23.6 million and \$15.4 million, respectively, and the effective tax rate in the same periods was 40.5% and 36.0%, respectively. The increase in the effective tax rate was due to the effect of changes in certain German tax laws that limited the deductibility of interest expense based on the ratio of debt to equity and other factors. In the first six months of 2004, substantially all of our income from operations, excluding gains from sales of property and insurance recoveries, was generated overseas where our effective tax rate was 46%. Based on interpretations recently issued by German taxing authorities and our tax planning initiatives, we expect our effective tax rate for international operations to be approximately 46% for the 2004 fiscal year.

Foreign Currency

We own and operate paper and pulp mills in Germany, France and the Philippines. The local currency in Germany and France is the Euro, while in the Philippines the currency is the Peso. These operations generated approximately 33% of our sales and approximately 32% of our operating expenses during the first six months of 2004. The translation of the results from these international operations into U.S. dollars is subject to changes in foreign currency exchange rates.

Table of Contents

The following table summarizes the effect from foreign currency translation on reported results compared to the first six months of 2003:

<i>Dollars in millions</i>	Six Months Ended June 30, 2004
	Favorable (unfavorable)
Net sales	\$ 8.5
Costs of products sold	(6.5)
Selling, general and administrative expenses	(0.8)
Income taxes and other	(0.1)
	—
Net income	\$ 1.1

The above table only presents the financial reporting impact of foreign currency translations. It does not present the impact of certain competitive advantages or disadvantages of operating or competing in a global, multi-currency environment. The strengthening of the Euro relative to certain other currencies, in the first six months of 2004 compared to the same period of 2003, adversely affected average selling prices of products sold by our Long Fiber & Overlay Papers business unit that is based in Germany.

Discontinued Operations

In July 2003, we sold our Wisches, France subsidiary for approximately \$2.0 million and the assumption of approximately \$1.1 million of debt owed to us by our subsidiary. At closing, we received \$1.7 million and the remaining amount is to be paid in annual installments, the first of which was received in July 2004. The financial results of this subsidiary are reported as discontinued operations for all periods presented. Revenue included in determining results from discontinued operations totaled \$2.6 million for the first six months of 2003. The financial results of this operation were previously reported in the Engineered Products business unit.

North American Restructuring Program

The North American Restructuring Program, which we began to implement during the second quarter of 2004, is a comprehensive series of initiatives designed to improve financial performance by focusing on:

Improving product and service offerings in Printing & Converting Paper's book publishing markets;

Growing revenue from uncoated specialty papers;

Achieving a Spring Grove workforce reduction targeted at approximately 20%;

Reducing our costs to produce by implementing improved and expanded sourcing strategies and redesigning end-to-end planning and scheduling processes; and

Reducing selling, general and administrative costs.

The financial benefits from these efforts will begin to phase-in during the latter part of 2004, and are expected to approximate \$15 million to \$20 million annually, pre-tax, beginning in 2006. During the second quarter of 2004, we eliminated 25 positions not represented by labor unions. Further, we negotiated a new labor agreement that enables us to reduce workforce levels at our Spring Grove, Pennsylvania facility by approximately 20%. The union membership at this location ratified the agreement on July 20, 2004. In accordance with this agreement, we offered a voluntary early retirement program to eligible union employees. Based on this contract and the extent of acceptance through August 31, 2004 by members of the union workforce of certain voluntary benefit enhancements, we expect to record, in the third quarter of 2004, a restructuring charge of between approximately \$13 million and \$20 million, substantially all of which is for enhanced pension benefits, post-retirement medical benefits and other related employee severance costs. See Risk Factors Risks Related to Our Business We may not effectively implement

Table of Contents

our North American Restructuring Program included elsewhere in this prospectus for a discussion of some of the difficulties we may face in implementing this Program.

Year Ended December 31, 2003 Compared to Year Ended December 31, 2002

The following table sets forth summarized results of operations:

<i>Dollars in thousands, except per share amounts</i>	Year Ended December 31,	
	2003	2002
Net sales	\$533,193	\$540,347
Gross profit	79,546	126,281
Operating income	34,250	71,645
Income from continuing operations	12,986	37,637
Net loss from discontinued operations	(325)	(42)
Net income	12,661	37,595
Earnings per diluted share from continuing operations	0.30	0.86
Earnings per diluted share	0.29	0.86

The consolidated results of operations for the years ended December 31, 2003 and 2002 include the following significant items:

<i>Dollars in thousands, except per share amounts</i>	After-tax Income (loss)	Earnings Per Share
2003		
Gain on sale of timberlands	\$19,965	\$ 0.46
Restructuring related charges	(8,582)	(0.20)
Ecusta related reserves	(7,315)	(0.17)
Asset write downs	(2,124)	(0.05)
2002		
Escrow settlement	\$ 2,315	\$ 0.05
Restructuring charges	(2,719)	(0.06)
Environmental matters	(1,500)	(0.03)

The above items increased earnings from continuing operations by \$1.9 million, or \$0.04 per diluted share, in 2003, and decreased earnings from continuing operations in 2002 by \$1.9 million, or \$0.04 per share. The decline in earnings was primarily due to lower sales volumes and selling prices in the Printing & Converting Papers business unit and higher costs of products sold, primarily due to lower non-cash pension income, higher raw material prices and increased market-related down time.

Business Units

We manage our organization along separate business units: Engineered Products, Long Fiber & Overlay Papers and Printing & Converting Papers, as well as Tobacco Papers, which are sold pursuant to a supply agreement that expires at the end of July 2004. In the latter part of 2002, we completed the implementation of a new information system to provide, among other things, more complete business unit reporting. However, we are unable to provide detailed business unit profitability reporting for periods prior to the system implementation, including full-year 2002.

Effective January 1, 2004, we implemented organizational changes and as a result we reclassified the presentation of certain product offerings of the business units. The following segment data for prior periods has been restated to give effect to such reclassification. The following table sets forth operating profit

Table of Contents

(loss) by business unit and the composition of consolidated income from continuing operations before income taxes:

<i>Dollars in thousands</i>	Year Ended December 31, 2003	
	Operating Profit (Loss)	Operating Margin
Business Unit		
Engineered Products	\$ (3,902)	(3.6)%
Long Fiber & Overlay Papers	17,882	10.8
Printing & Converting Papers	(8,500)	(3.4)
Tobacco Papers	(5,758)	(58.7)
Total Business Unit	(278)	(0.1)
Energy sales, net	10,040	
Pension income, net	17,149	
Restructuring charges Costs of products sold	(6,511)	
Restructuring charges Selling, general and administrative	(6,983)	
Unusual items	(11,501)	
Gains on dispositions of plant, equipment and timberlands	32,334	
Total operating income	34,250	
Interest expense	(14,269)	
Other income (expense), net	435	
Income from continuing operations before income taxes	\$ 20,416	

Results of individual business units are presented based on our management accounting practices and management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to accounting principles generally accepted in the United States of America; therefore, the financial results of individual business units are not necessarily comparable with similar information for any other company. The management accounting process uses assumptions and allocations to measure performance of the business units. Methodologies are refined from time to time as management accounting practices are enhanced and businesses change. The costs incurred by support areas not directly aligned with the business unit are allocated primarily based on an estimated utilization of support area services.

Management evaluates results of operations before energy sales, non-cash pension income, restructuring related charges, unusual items and effects of asset dispositions because it believes this is a more meaningful representation of the operating performance of its core papermaking businesses, the profitability of business units and the extent of cash flow generated from core operations. This presentation is closely aligned with the management and operating structure of our Company. It is also on this basis that our performance is evaluated internally and by our Board of Directors.

Table of Contents*Sales and Costs of Products Sold*

<i>Dollars in thousands</i>	Year Ended December 31,		Change
	2003	2002	
Net sales	\$ 533,193	\$ 540,347	\$ (7,154)
Energy sales net	10,040	9,814	226
Total revenues	543,233	550,161	(6,928)
Costs of products sold	463,687	423,880	39,807
Gross profit	\$ 79,546	\$ 126,281	\$(46,735)
Gross profit as a percent of net sales	14.9%	23.4%	

The decline in net sales in 2003 was primarily due to a \$19.8 million net sales volume-related decline as lower volumes in our Printing & Converting Papers and Tobacco Papers more than offset sales volume growth in our Engineered Products and Long Fiber & Overlay Papers business units. In addition each business unit experienced lower average selling prices, in constant currency rates, aggregating \$13.3 million. The impact of lower sales volumes and selling prices was partially offset by a \$27.9 million favorable effect of a weaker U.S. dollar on translated international results.

The following tables set forth net sales information by business unit:

<i>Dollars in thousands</i>	Year Ended December 31,	
	2003	2002
Business Unit		
Engineered Products	\$ 108,489	\$ 99,900
Long Fiber & Overlay Papers	165,389	135,715
Printing & Converting Papers	249,500	284,884
Tobacco Papers	9,815	19,848
Total	\$ 533,193	\$ 540,347

Business Unit	Percent of Total	
	2003	2002
Engineered Products	20.4%	18.5%
Long Fiber & Overlay Papers	31.0	25.1
Printing & Converting Papers	46.8	52.7
Tobacco Papers	1.8	3.7
Total	100.0%	100.0%

Table of Contents

Costs of products sold increased \$39.8 million in 2003 due to the following significant items:

<i>Dollars in millions</i>	Year Ended December 31, 2003
	(Favorable) unfavorable
Foreign currency	\$ 19.8
Lower pension income	11.9
Higher raw material and energy prices	10.4
Restructuring related	6.5
Lower sales volume	(17.9)
Other	9.1
Total	\$ 39.8

In the preceding table, other primarily consisted of depreciation, market-related downtime and asset write-offs.

The market price of natural gas is a significant component of our Neenah facility's production costs as the cost of the facility's steam is dependent on natural gas market prices. During 2003 we experienced increases in natural gas market prices. Based on expected production levels and contractual obligations, a \$1 per decatherm increase in the cost of natural gas is expected to increase the cost of operating our Neenah facility by approximately \$1.4 million per year.

Non-Cash Pension Income

Non-cash pension income results from the considerably over-funded status of our plans. The amount of pension income recognized each year is determined using various actuarial assumptions and certain other factors, including the fair value of our pension assets as of the beginning of the year. Because the value of our plan assets as of January 1, 2003, was lower than the previous year and, due to changes in actuarial assumptions, the amount of non-cash pension income recognized in 2003 was less than 2002. The following summarizes non-cash pension income for each year.

<i>Dollars in thousands</i>	Year Ended December 31,		Change
	2003	2002	
<i>Recorded as:</i>			
Costs of products sold	\$ 15,007	\$ 26,900	\$(11,893)
Selling, general and administrative expense	2,142	5,748	(3,606)
Total	\$ 17,149	\$ 32,648	\$(15,499)

Non-cash pension income in 2004 is expected to approximate amounts recognized in 2003.

Operating Expenses

Edgar Filing: GLATFELTER P H CO - Form 424B4

<i>Dollars in thousands</i>	Year Ended December 31,		Change
	2003	2002	
Selling, general and administrative expenses	\$ 59,146	\$53,699	\$ 5,447
Restructuring charge	6,983	4,249	2,734
Unusual items	11,501	(2,008)	13,509
Gains on dispositions of plant, equipment and timberlands	(32,334)	(1,304)	(31,030)

Table of Contents*Selling, General and Administrative*

Selling, general and administrative expenses increased \$5.4 million during 2003 compared to 2002. During 2003, a weaker U.S. dollar resulted in a \$2.6 million increase in translated selling, general and administrative expenses for our international operations. The remaining increase was primarily due to a lower benefit from non-cash pension income and higher depreciation, primarily attributable to an information technology system implemented in the latter part of 2002.

Restructuring Charge

In September 2003, we announced the decision to permanently shut down a paper making machine and the deinking process at our Neenah, Wisconsin facility. The abandoned machines and processes had been primarily supporting our Printing & Converting Papers business unit. The Neenah restructuring was initiated to allow us to reallocate resources to more fully support opportunities in higher growth, more profitable specialty markets. These initiatives have resulted in the elimination of approximately 190 positions. The results of operations include related pre-tax charges of approximately \$13.5 million, of which \$6.5 million are reflected in the consolidated income statements as components of costs of products sold, and \$7.0 million are reflected as restructuring charges.

The following table sets forth information with respect to Neenah restructuring charges:

<i>Dollars in thousands</i>	Year Ended December 31, 2003
Depreciation on abandoned equipment	\$ 5,974
Severance and benefit continuation	1,874
Pension and other retirement benefits	4,878
Other	768
	<hr/>
Total	\$13,494
	<hr/>

Additional charges may be required in 2004 depending on the resolution of certain contractual matters.

In 2002, we recorded a \$4.2 million charge related to a workforce reduction at our corporate and Spring Grove locations.

Unusual Items

Unusual items during 2003 reflect a charge of \$11.5 million related to our former Ecusta Division, which was sold in 2001 to a group of related buyers. Under the Ecusta Division acquisition agreement, we are indemnified for certain liabilities that have been assumed by the buyers. We had previously accrued liabilities related to certain post-retirement benefits, workers' compensation claims and vendor payables and established a corresponding receivable due from the buyers. We paid the portion of these liabilities that became due and sought reimbursement from the buyers, which, to date, they have refused. The 2003 charge includes \$5.5 million to fully reserve such receivables and an additional \$6.0 million related to contingent landfill closure costs at the Ecusta facility. In 2002, we recognized a \$3.5 million gain from the settlement of an escrow account with the previous owners of our Schoeller & Hoesch subsidiary. This was partially offset by a \$1.5 million charge for certain environmental matters related to actions by the Pennsylvania DEP.

Gains on Dispositions of Plant, Equipment and Timberlands

During 2003, we recognized a net gain from the sale of plant, equipment and timberlands of \$32.3 million. This primarily includes a \$31.2 million pre-tax gain from the March 2003 sale of approximately 25,500 acres of timberlands in Maryland to a subsidiary of The Conservation Fund, a non-profit land conservation fund, who we refer to throughout this prospectus as the Timberland Buyer.

Table of Contents*Foreign Currency*

We own and operate paper and pulp mills in Germany, France and the Philippines. The local currency in Germany and France is the Euro, and in the Philippines the local currency is the Peso. These operations generated approximately 31% of our sales and operating expenses for the year ended December 31, 2003. The translation of the results from these international operations into U.S. dollars is subject to changes in foreign currency exchange rates.

The following table summarizes the effect from foreign currency translation on reported results compared to 2002:

<i>Dollars in thousands</i>	Year Ended December 31, 2003
	Favorable (unfavorable)
Net sales	\$ 27,869
Costs of products sold	(19,776)
Selling, general and administrative expenses	(2,648)
Income taxes and other	(1,278)
Net income	\$ 4,167

The above table only presents the financial reporting impact of foreign currency translations. It does not present the impact of certain competitive advantages or disadvantages of operating or competing in a global, multi-currency environment. In 2003, the strengthening of the Euro relative to certain other currencies adversely affected average selling prices, in the functional currency, of products sold by our Schoeller & Hoesch GmbH & Co. KG subsidiary.

Discontinued Operations

In July 2003, we sold our subsidiary in Wisches, France for approximately \$2.0 million and the assumption by the buyer of approximately \$1.1 million of debt owed to us by our subsidiary. At closing, we received \$1.7 million and the remaining amounts are to be paid in annual installments over two years beginning July 2004. The financial results of this subsidiary are reported as discontinued operations for all periods presented. Prior to the sale, the underlying assets were recorded at the lower of carrying amount or fair value less costs to sell. Accordingly, loss from discontinued operations for the year ended December 31, 2003, includes a charge of \$0.5 million, after tax, to write-down the carrying value of the assets prior to the sale. Revenue included in determining results from discontinued operations totaled \$2.6 million and \$3.5 million for 2003 and 2002, respectively. The financial results of this operation were previously reported in the Engineered Products business unit.

Year Ended December 31, 2002 Compared to Year Ended December 31, 2001

The following table sets forth our summarized results of operations:

<i>Dollars in thousands</i>	Year Ended December 31,	
	2002	2001
Net sales	\$ 540,347	\$ 632,602
Gross profit	126,281	141,121
Operating Income	71,645	22,003
Income from continuing operations	37,637	6,829
Net gain (loss) from discontinued operations	(42)	129

Edgar Filing: GLATFELTER P H CO - Form 424B4

Earnings per diluted share from continuing operations	0.86	0.16
Earnings per diluted share	0.86	0.16

Table of Contents

For the year ended December 31, 2002, net income totaled \$37.6 million, or \$0.86 per diluted share, compared with \$7.0 million and \$0.16 per diluted share in 2001. Unusual items discussed in detail below affect the comparison of reported results.

Net Sales

Net sales decreased \$92.3 million in 2002 compared with 2001. The decline was substantially due to the Ecusta divestiture in 2001. Excluding Ecusta Division net sales in 2001, net sales declined \$1.5 million, or 0.2%. On this basis, the decline was primarily due to the effect of a 3.5% decrease in average net selling price partially offset by the effect of a 2.1% increase in net sales volume. The decline in average net selling price was also mitigated by the effect of a stronger Euro relative to the U.S. dollar resulting in an increase of approximately \$6.4 million in translated net sales in 2002 versus 2001.

During 2002, sales volume for our Engineered Products business unit increased by approximately 12% compared to 2001, offset somewhat by lower average selling prices. Our Long Fiber & Overlay Papers business unit experienced increased sales volume for its products that more than offset adverse pricing pressures it experienced during the year. In the Printing & Converting Papers business unit, our net sales volume was substantially the same as the prior year at lower average selling prices. During the fourth quarter of 2002, our Printing & Converting Papers business unit experienced declining prices, reversing favorable pricing trends that were seen during the third quarter of 2002.

Costs of Products Sold and Gross Profit

Costs of products sold declined \$77.3 million, or 15.4%, in the year-to-year comparison. Excluding the Ecusta Division, cost of products sold increased \$1.8 million, or 0.3%. The increase in costs of products sold is primarily due to the increase in net sales volume. Costs of products sold is approximately \$4.3 million higher in 2002 than in 2001 due to the weakening of the U.S. dollar compared to the Euro and the resulting impact on translated international results. These factors more than offset the effect of a decrease in the unit cost of pulp and benefits of our cost control initiatives. As a percent of sales, our gross margin increased to 23.0% for the full year 2002 from 22.3% in 2001. Excluding the Ecusta Division, our gross margin was slightly lower in 2002 than in 2001.

Our gross margin includes net non-cash pension income resulting from the overfunded status of our defined benefit pension plans. Cost of products sold was reduced for such income by \$26.9 million in 2002 and by \$24.4 million in 2001. Partially offsetting this benefit was expense attributable to other post-retirement benefits totaling \$4.6 million and \$2.9 million in 2002 and 2001, respectively. The primary cause of the increase in other-post retirement benefits was a change in our estimate of liability based upon recent claims history.

Selling, General and Administrative

Selling, general and administrative expenses declined \$6.5 million, or 10.8%, in the year-to-year comparison due to the Ecusta divestiture together with disciplined cost control initiatives. Excluding the Ecusta Division, expenses declined 1.4%. Selling, general and administrative expense is approximately \$0.7 million higher in 2002 than in 2001 due to the weakening of the U.S. dollar compared to the Euro, and the resulting impact on translated U.S. dollar results. Costs incurred in 2002 include resources dedicated to implementing our strategic initiatives, including depreciation expense and increased service fees related to implementing information technology. Selling, general and administrative expenses were also lower in 2002 compared with 2001 due to a decrease in compensation expense related to certain stock awards that varies with the price of our common stock. Our common stock price declined during 2002.

Net non-cash pension income reduced reported selling, general and administrative expenses by \$5.7 million in 2002 and by \$6.3 million in 2001. Post-retirement expense included in selling, general and administrative expenses was \$1.0 million and \$0.5 million in 2002 and 2001, respectively. The primary cause of the increase in post-retirement expense was a change in our estimate of liability based upon recent claims history.

Table of Contents*Gains on Sales of Plant, Equipment and Timberlands*

During 2002, we recorded \$1.3 million gain from the sale of certain fixed assets compared with a gain of \$2.0 million in 2001. The gain in 2001 primarily resulted from the sale of a 413-acre tract of land from which we recognized a \$1.7 million gain. There were no significant sales of properties completed in 2002.

Unusual Items

Unusual items totaled a gain of \$2.0 million and a charge of \$60.9 million in 2002 and 2001, respectively. Amounts recorded in 2002 included a \$3.5 million one-time, pretax gain for the settlement of certain escrow claims, including interest and associated liabilities related to the 1998 acquisition of our Schoeller & Hoesch GmbH & Co. KG subsidiary. The gain was partially offset by a \$1.5 million liability related to actions by the Pennsylvania DEP.

On August 9, 2001, we completed the sale of the Ecusta Division, consisting of our Ecusta paper-making facility and two of its operating subsidiaries, including plant and equipment, inventory, accounts receivable and essentially all other operating assets and certain other receivables related to our Tobacco Papers business. As part of this transaction, the buyer assumed certain liabilities related to the operation of the Ecusta Division. Our total charge to earnings associated with the sale was \$58.4 million, including a \$50.0 million impairment charge recognized during the second quarter of 2001. We also recognized a \$2.5 million pretax charge in the second quarter of 2001 due to the settlement of an environmental matter in connection with the Spring Grove, Pennsylvania facility's wastewater discharge permit.

Liquidity and Capital Resources

Our business is capital intensive and requires significant expenditures for new or enhanced equipment, for environmental compliance matters and to support our business strategy and research and development efforts. Liquidity is provided by cash generated from operations, monetization of non-strategic or undervalued assets, such as timberlands, and borrowings under our \$125 million revolving credit facility.

The following table summarizes cash flow information for each of the periods presented:

<i>Dollars in millions</i>	Six Months Ended June 30,		Year Ended December 31,	
	2004	2003	2003	2002
Cash and cash equivalents at beginning of period	\$ 15.6	\$ 32.2	\$ 32.2	\$ 87.9
Cash provided by (used for)				
Operating activities	16.8	32.0	47.0	77.7
Investing activities	23.0	(44.5)	(62.3)	(49.6)
Financing activities	(44.0)	6.6	(2.5)	(84.6)
Discontinued operations		(0.3)	(0.3)	0.3
Effect of exchange rate changes on cash	(0.3)	1.4	1.5	0.5
Net cash used	(4.5)	(4.8)	(16.6)	(55.7)
Cash and cash equivalents at end of period	\$ 11.1	\$ 27.4	\$ 15.6	\$ 32.2

Operating Activities

Cash generated from operations in the first six months of 2004 decreased \$15.2 million when compared with the first six months of 2003 primarily due to the use of \$26.5 million of cash to fund payments pursuant to the Consent Decree we entered into with the various government agencies related to the remediation of Operable Unit 1 of the lower Fox River, a \$12.0 million decline in gross profit and changes in working capital, which decreases were partially offset by a \$25.5 million gain from insurance recoveries related to claims associated with the Fox River

environmental matter. The recoveries were fully received in cash during the first six months of 2004 and were used to reduce long-term debt.

Table of Contents

Cash generated from operations for the year ended December 31, 2003 declined \$30.7 million when compared with the year ended December 31, 2002 primarily due to a decline in earnings primarily attributable to lower sales volumes and selling prices in the Printing & Converting Papers business unit in the year-over-year comparison.

Investing Activities

During the first six months of 2004, investing activities provided \$23.0 million of cash primarily from sales of 2,332 acres of timberland and the sale of our corporate aircraft. Aggregate cash proceeds from these transactions totaled \$33.1 million.

Through the year ended December 31, 2003, we completed a period of significant capital expenditures related to investments in a new paper making machine, a voluntary initiative to improve the impact on the environment of certain processes at our Spring Grove, Pennsylvania facility, and the installation of an enterprise resource planning system. Cash spent in 2003 on investing activities primarily reflects the investments made to install a state-of-the-art inclined wire paper machine, or PM #9, to support growth opportunities in the Long Fiber & Overlay Papers business unit and capital expenditures for the New Century project. The New Century Project was an initiative we completed at our Spring Grove facility under the Voluntary Advanced Technical Incentive Program as set forth by the Environmental Protection Agency's Cluster Rule. In 2002, cash spent on investing activities included the implementation of an enterprise resource planning system (IMPACT), the New Century Project, and the rebuild of PM #9. This project included new hardwood brownstock washing, installation of hardwood oxygen delignification, 100% chlorine dioxide substitution on both the hardwood and softwood fiber lines, and a hardwood ozone bleaching system. To comply with the Cluster Rule, we also installed equipment to reduce air emissions of air pollutants and odorous compounds.

The following table summarizes capital spending by major project, by year:

<i>Dollars in millions</i>	Year Ended December 31,	
	2003	2002
PM #9	\$29.6	\$ 5.6
New Century Project	22.2	9.9
IMPACT		19.9
Others	15.0	15.7
Total	\$66.8	\$51.1

Capital expenditures in 2004 are expected to approximate one-half of our annual depreciation expense. The reduction in capital expenditures is not expected to have a significant effect on our results of operations, as we will continue to complete necessary repairs and maintenance activities.

Financing Activities

During the six months ended June 30, 2004 cash used for financing activities totaled \$44.0 million reflecting a reduction of long-term debt and cash paid for common stock dividends.

For the year ended December 31, 2002, cash used for financing activities totaled \$84.6 million reflecting the refinancing of our revolving credit facility and the payment of common stock dividends. In connection with the refinancing in 2002, we repaid \$133.0 million in borrowings under the previously existing \$200.0 million revolving credit agreement. This repayment was made using \$71.1 million of existing cash and a \$62.0 million borrowing under the new revolving credit facility.

Table of Contents

The following table sets forth our outstanding long-term indebtedness:

<i>Dollars in thousands</i>	As of	As of December 31,	
	June 30, 2004	2003	2002
Revolving credit facility, due June 2006	\$ 27,528	\$ 64,047	\$ 67,681
6 7/8% Notes, due July 2007	150,000	150,000	150,000
Note payable SunTrust, due March 2008	34,000	34,000	
Other notes, various	794	1,228	1,823
	<u>212,322</u>	<u>249,275</u>	<u>219,504</u>
Total long-term debt	212,322	249,275	219,504
Less current portion	(785)	(806)	(795)
	<u>\$211,537</u>	<u>\$248,469</u>	<u>\$218,709</u>
Long-term debt, excluding current portion	\$211,537	\$248,469	\$218,709

On June 24, 2002, we entered into an unsecured \$102.5 million multi-currency revolving credit facility with a syndicate of three major banks. An additional \$22.5 million was added to the revolving credit facility on September 24, 2002 with a fourth major bank. The revolving credit facility, which replaced an old facility, enables us to borrow up to the equivalent of \$125.0 million in certain currencies. Borrowings can be made for any time period from one day to six months and incur interest based on the domestic prime rate or a Eurocurrency rate, at our option, plus a margin ranging from .525 to 1.05. The margin and a facility fee on the commitment balance are based on the higher of our debt ratings as published by Standard & Poor's and Moody's. The revolving credit facility requires us to meet certain leverage and interest coverage ratios, with both of which we were in compliance at June 30, 2004.

On July 22, 1997, we issued \$150.0 million principal amount of 6 7/8% Notes due July 15, 2007. Interest on the 6 7/8% Notes is payable semiannually on January 15 and July 15. The 6 7/8% Notes are redeemable, in whole or in part, at our option at any time at a calculated redemption price plus accrued and unpaid interest to the date of redemption, and constitute unsecured and unsubordinated indebtedness. The net proceeds from the sale of the 6 7/8% Notes were used primarily to repay certain short-term unsecured debt and related interest.

On March 21, 2003, we sold approximately 25,500 acres of timberlands and received as consideration a \$37.9 million 10-year interest bearing note receivable from the Timberland Buyer. We pledged the note as collateral under a \$34.0 million promissory note payable to SunTrust Financial. The \$34.0 million promissory note bears interest at a fixed rate of 3.82% for five years at which time we can elect to renew the obligation. In connection with the sale of timberland in Maryland, we entered into a Supply Agreement with the Timberland Buyer pursuant to which we agreed to purchase from the Timberland Buyer at market prices, a minimum annual amount of pine pulpwood averaging 34,425 tons per annum over the eight-year term of the Supply Agreement.

P. H. Glatfelter Company guarantees debt obligations of all its subsidiaries. All such obligations are recorded in the consolidated financial statements.

At June 30, 2004, we had \$4.3 million of letters of credit issued to us by a financial institution. The letters of credit are for the benefit of certain state workers' compensation insurance agencies in conjunction with our self-insurance program. No amounts were outstanding under the letters of credit. We bear the credit risk on this amount to the extent that we do not comply with the provisions of certain agreements. The letters of credit do not reduce the amount available under our lines of credit.

Dividend Payments

During the first six months of 2004 and 2003, cash dividends paid on common stock totaled \$7.9 million and \$15.3 million, respectively. During 2003 and 2002, cash dividends paid on common stock totaled \$26.9 million and \$30.3 million, respectively. Our Board of Directors determines what, if any, dividends will be paid to our shareholders. Dividend payment decisions are based upon then-existing factors and conditions and, therefore, historical trends of dividend payments are not necessarily indicative

Table of Contents

of the amount or frequency of any future payments. Beginning in the third quarter of 2003, our Board of Directors declared a \$0.09 per common share quarterly cash dividend, or 49% lower than previous quarterly dividends. On an annualized basis, this reduced dividend will conserve approximately \$15.0 million in cash.

Environmental Matters

We are subject to loss contingencies resulting from regulation by various federal, state, local and foreign governmental authorities with respect to the environmental impact of mills we operate, or have operated. To comply with environmental laws and regulations, we have incurred substantial capital and operating expenditures in past years. We anticipate that environmental regulation of our operations will continue to become more burdensome and that capital and operating expenditures necessary to comply with environmental regulations will continue, and perhaps increase, in the future. In addition, we may incur obligations to remove or mitigate any adverse effects on the environment resulting from our operations, including the restoration of natural resources and liability for personal injury and for damages to property and natural resources. Because environmental regulations are not consistent worldwide, our ability to compete in the world marketplace may be adversely affected by capital and operating expenditures required for environmental compliance.

As more fully discussed in Note 15 to our unaudited condensed consolidated financial statements for the three months and six months ended June 30, 2004 and 2003 included elsewhere in this prospectus, we entered into a Consent Decree with the various governmental agencies related to the remediation of Operable Unit 1, or OU1, of the lower Fox River.

The OU1 Consent Decree required us to pay amounts under the following schedule:

<i>Dollars in thousands</i>	
November 1, 2003	\$ 525
January 31, 2004	250
March 31, 2004	10,500
June 30, 2004	15,750
	<hr/>
Total	\$27,025
	<hr/>

All amounts were paid pursuant to the terms of the Consent Decree.

We expect to meet all of our other near- and longer-term cash needs from a combination of operating cash flow, cash and cash equivalents, sale of additional timberlands, potential additional proceeds from insurance recoveries associated with the Fox River environmental liability, our existing credit facility or other bank lines of credit and other long-term debt. An unfavorable outcome of various environmental matters could have a material adverse impact on our consolidated financial position, liquidity and/or results of operations.

Off-Balance Sheet Arrangements

As of June 30, 2004 and December 31, 2003 and 2002, we had not entered into any off-balance sheet arrangements. All derivative financial instruments to which we are a party and guarantees of indebtedness, which solely consist of our subsidiaries' obligations, are reflected in the consolidated balance sheets included elsewhere in this prospectus.

Table of Contents*Contractual Obligations*

The following table sets forth contractual obligations as of December 31, 2003:

Payments Due During the Year Ended December 31,

<i>Dollars in thousands</i>	Total	2004	2005 to 2006	2007 to 2008	2009 and Beyond
Long-term debt ⁽¹⁾	\$ 249,275	\$ 806	\$ 64,469	\$ 184,000	\$
Operating leases ⁽²⁾	18,277	3,674	3,023	1,390	10,190
Purchase obligations ⁽³⁾	153,928	40,615	19,776	16,639	76,898
Other long term obligations ⁽⁴⁾	53,467	6,694	12,118	10,731	23,924
Total	\$ 474,947	\$ 51,789	\$ 99,386	\$ 212,760	\$ 111,012

- (1) Represents principal payments due on long-term debt. We have \$150 million of debt maturing in July 2007 and bearing a fixed rate of interest at 6 7/8%, payable semiannually, \$34 million, maturing in March 2008 and bearing a fixed rate of interest of 3.82%. In addition, at December 31, 2003, \$64 million, bearing a variable interest rate, was outstanding under our revolving credit facility.
- (2) Represents rental agreements for various land, buildings, and computer and office equipment.
- (3) Represents open purchase order commitments and other obligations, primarily for energy and pulpwood contracts with minimum annual purchase obligations. In certain situations, prices are subject to variations based on market prices. In such situations, the information above is based on prices in effect at December 31, 2003 or expectations based on historical experience and/or current market conditions.
- (4) Represents expected benefits to be paid pursuant to medical retirement plans and nonqualified pension plans over the next ten years.

Since December 31, 2003, there have been no significant changes to contractual obligations as set forth above other than with respect to a \$37.4 million reduction in long-term debt that occurred in the first six months of 2004.

Critical Accounting Policies

We believe the following represent the most significant and subjective estimates used in the preparation of our consolidated financial statements.

Inventory Reserves We maintain reserves for excess and obsolete inventories to reflect our inventory at the lower of its stated cost or market value. Our estimate for excess and obsolete inventory is based upon our assumptions about future demand and market conditions. If actual market conditions are more or less favorable than those we have projected, we may need to increase or decrease our reserves for excess and obsolete inventories, which could affect our reported results of operations.

Long-lived Assets We evaluate the recoverability of our long-lived assets, including property, equipment and intangible assets periodically or whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. Our evaluations include analyses based on the cash flows generated by the underlying assets, profitability information, including estimated future operating results, trends or other determinants of fair value. If the value of an asset determined by these evaluations is less than its carrying amount, a loss is recognized for the difference between the fair value and the carrying value of the asset. Future adverse changes in market conditions or poor operating results of the related business may indicate an inability to recover the carrying value of the assets, thereby possibly requiring an impairment charge in the future.

Pension and Other Post-Retirement Obligations Accounting for defined-benefit pension plans, and any curtailments thereof, requires various assumptions, including, but not limited to, discount rates, expected rates of return on plan assets and future compensation growth rates. Accounting for our retiree

Table of Contents

medical plans, and any curtailments thereof, also requires various assumptions, which include, but are not limited to, discount rates and annual rates of increase in the per capita costs of health care benefits. We evaluate these assumptions at least once each year or as facts and circumstances dictate and make changes as conditions warrant. Changes to these assumptions will increase or decrease our reported income, which will result in changes to the recorded benefit plan assets and liabilities.

Environmental Liabilities We maintain accruals for losses associated with environmental obligations when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated based on existing legislation and remediation technologies. These accruals are adjusted periodically as assessment and remediation actions continue and/or further legal or technical information develops. Such undiscounted liabilities are exclusive of any insurance or other claims against third parties. Recoveries of environmental remediation costs from other parties, including insurance carriers, are recorded as assets when their receipt is assured beyond a reasonable doubt.

Income Taxes We record the estimated future tax effects of temporary differences between the tax bases of assets and liabilities and amounts reported in our balance sheets, as well as operating loss and tax credit carry forwards. We regularly review our deferred tax assets for recoverability based on historical taxable income, projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies. If we continue to operate at a loss in certain jurisdictions or are unable to generate sufficient future taxable income, or if there is a material change in the actual effective tax rates or time period within which the underlying temporary differences become taxable or deductible, we could be required to increase the valuation allowance against our deferred tax assets resulting in a substantial increase in our effective tax rate and a material adverse impact on our reported results.

Other significant accounting policies, not involving the same level of uncertainties as those discussed above, are nevertheless important to an understanding of the consolidated financial statements. Refer to Note 2 to our consolidated financial statements for the years ended December 31, 2003, 2002 and 2001, included elsewhere in this prospectus.

Recent Accounting Pronouncements

SFAS No. 143, *Accounting for Asset Retirement Obligations*, was issued in June 2001 and applies to legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development and/or the normal operation of a long-lived asset. We adopted SFAS No. 143 on January 1, 2003, and it did not impact our consolidated financial position or results of operations.

SFAS No. 145, *Rescission of SFAS No. 4, 44 and 64, Amendment of SFAS No. 13, and Technical Corrections*, was issued April 2002 and was effective for fiscal years beginning after May 15, 2002. This statement, among other things, rescinds the requirement to classify a gain or loss upon the extinguishments of debt as an extraordinary item on the income statement. It also requires lessees to account for certain modifications to lease agreements in a manner consistent with sale-leaseback transaction accounting. We adopted SFAS No. 145 on January 1, 2003, and it did not impact our consolidated financial position or results of operations.

SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, was issued in June 2002 and requires recognition of costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. This statement was to be applied prospectively to exit or disposal activities initiated after December 31, 2002. We adopted SFAS No. 146 on January 1, 2003, and it did not impact our consolidated financial position or results of operations.

In November of 2002, the Financial Accounting Standards Board, or FASB, issued Interpretation No. 45, *Guarantors Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of the Indebtedness of Others*, or FIN No. 45. FIN No. 45 requires entities to establish liabilities for certain types of guarantees, and expands financial statement disclosures for others. The accounting requirements of FIN No. 45 were effective for guarantees issued or modified after

Table of Contents

December 31, 2002, and the disclosure requirements were effective for financial statements for interim or annual periods ended after December 15, 2002. The adoption on January 1, 2003, of FIN No. 45 did not have any significant accounting implications for us as all of our commitments and guarantees are on behalf of our subsidiaries.

SFAS No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities, was issued in April 2003, and it amends and clarifies accounting for derivative instruments including derivative instruments embedded in other contracts, and for hedging activities under SFAS No. 133. This standard was effective for contracts entered into or modified after June 30, 2003, and its adoption did not have an impact on our consolidated financial position or results of operations.

In May 2003, the FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity. This Statement requires an issuer to classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). SFAS No. 150 was effective for financial instruments entered into or modified after May 31, 2003, except for certain provisions that were deferred, and otherwise was effective at the beginning of the third quarter of 2003. Based on the financial instruments we currently use, the adoption of SFAS No. 150 did not impact our financial statements.

Financial Interpretation No. 46, Consolidation of Variable Interest Entities or FIN 46, issued in January 2003, clarifies the application of Accounting Research Bulletin No. 51, Consolidated Financial Statements, to certain entities in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. FIN 46 applies immediately to variable interest entities created after January 31, 2003, and must be applied in the first period beginning after December 15, 2003 for entities in which an enterprise holds a variable interest entity that it acquired before February 1, 2003. We do not have entities with these characteristics. Accordingly, the provisions of FIN 46 and related revisions, FIN 46R, had no impact on our consolidated financial position or results of operations.

In May 2004, FASB Staff Position FAS No. 106-2, Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003, or FSP FAS 106-2 was issued. FSP FAS 106-2 is applicable to employers that sponsor benefit plans providing post-age 65 prescription drug benefits and that are expected to receive a subsidy provided by the Medicare Prescription Drug, Improvement and Modernization Act of 2003, or the 2003 Act. FSP FAS 106-2 is effective for financial statements for periods beginning after June 15, 2004. We do not consider the 2003 Act to be a significant event for our plan nor is the adoption of FSP FAS 106-2 expected to have a material impact on our consolidated financial position or results of operations.

Table of Contents**BUSINESS****Our Business**

Glatfelter began operations in 1864 and today we believe we are one of the world's leading manufacturers of specialty papers and engineered products. Headquartered in York, Pennsylvania, we own and operate paper mills located in Spring Grove, Pennsylvania, Neenah, Wisconsin, Gernsbach, Germany and Scaër, France, as well as an abaca pulp mill in the Philippines. We serve customers in numerous markets, including book publishing, envelope converting, food and beverage, pressure-sensitive, digital imaging, composite laminates, and other highly technical niche markets. Many of the markets in which we operate are characterized by higher-value-added products and, in some cases, by higher growth prospects and lower cyclicality than commodity paper markets. Examples of some of our key product offerings include papers for:

Tea bags and coffee filters;

Trade book publishing;

Specialized envelopes;

Playing cards;

Pressure-sensitive postage stamps;

Metallized labels for beer bottles; and

Digital imaging applications.

We market our products worldwide either through wholesale paper merchants, brokers and agents, and directly to our customers.

Our Business Units

We operate three primary business units: Engineered Products, Long Fiber & Overlay Papers, and Printing & Converting Papers. Effective January 1, 2004, we implemented organizational changes, and as a result, we realigned and reclassified the presentation of certain product offerings of our business units. The following segment data has been restated to give effect to our new organizational structure. The following table summarizes consolidated net sales and the relative net sales contribution of each of our business units for our past three fiscal years:

<i>Dollars in thousands</i>	Six Months Ended June 30, 2004	Year Ended December 31,		
		2003	2002	2001 ⁽¹⁾
Net sales	\$261,106	\$533,193	\$540,347	\$632,602
Business Unit				
Engineered Products	21%	20%	18%	14%
Long Fiber & Overlay Papers	37	31	25	20
Printing & Converting Papers	42	47	53	54
Tobacco Papers		2	4	12
Total	100%	100%	100%	100%

- (1) In August 2001, we completed the divestiture of our Ecusta Division, a supplier of paper primarily to the tobacco and financial printing industries. Product sales for the Ecusta Division totaled approximately \$90.8 million in 2001.

Engineered Products

Engineered Products focuses on highly technical engineered paper products designed for multiple end uses, such as papers for pressure-sensitive postage stamps, disposable medical garments, playing cards and digital imaging applications. This business unit comprises an array of products in distinct business niches

Table of Contents

that are in a continuous state of evolution. Such markets include digital imaging, casting and specialty release, pressure-sensitive, and industrial specialty. Many of the products in this segment are utilized in demanding, specialized customer and end-user applications and, therefore, command higher per ton values and generally exhibit greater pricing stability relative to commodity grade paper products. Some of our products are new and high growth while others are more mature and further along on the development curve. Because many of the products in this business unit are technically complex and involve substantial customer-supplier development collaboration, product pricing in this business unit has remained relatively stable. In 2003, our net sales and net tons sold of Engineered Products were \$108.5 million and 97.8 thousand tons, respectively.

Long Fiber & Overlay Papers

Long Fiber & Overlay Papers focuses on higher-value-added products, such as paper for tea bags and coffee filters, decorative laminates used for furniture and flooring, and metallized products used in the labeling of beer bottles. Long fiber papers, which is the generic term we use to describe products made from abaca pulp (primarily tea bag and coffee filter papers), accounted for approximately 56%, 56% and 59% of this business unit's sales in 2001, 2002 and 2003, respectively. This focus on long fiber papers has made us one of the world's largest producers of tea bag papers. The balance of this unit's sales are comprised of overlay and technical specialty products, which include flooring and furniture overlay papers, metallized products, adhesive tapes, vacuum bags, holographic labels and gift wrap. Similar to our engineered paper products, many long fiber and overlay papers are technically sophisticated. We believe we are well positioned to produce these extremely lightweight papers because we understand their complexities, which require the use of highly specialized fiber and specifically designed papermaking equipment. In 2003, our net sales and net tons sold of Long Fiber & Overlay Papers were \$165.4 million and 43.8 thousand tons, respectively.

Printing & Converting Papers

Printing & Converting Papers focuses on papers for the production of high-quality hardbound books and other book publishing needs. Total book publishing papers represented 64%, 73% and 69% of this business unit's sales in 2001, 2002 and 2003, respectively. We believe we are the leading supplier of book publishing papers in the United States. This business unit also produces other papers, including paper that is converted into specialized envelopes in a wide array of colors, finishes and capabilities. These markets are generally more mature and, therefore, have modest growth characteristics. In 2003, our net sales and net tons sold of Printing & Converting Papers were \$249.5 million and 348.0 thousand tons, respectively.

Other

In August 2001, we completed the divestiture of our Ecusta Division, a supplier of paper primarily to the tobacco and financial printing industries. Product sales for the Ecusta Division totaled approximately \$90.8 million in 2001. We continue to supply tobacco papers to fulfill our obligations under a supply agreement entered into in connection with the sale of our Ecusta Division. This supply agreement expired at the end of July 2004, and we no longer manufacture or sell tobacco paper products. In 2003, our net sales and net tons sold of tobacco paper products were \$9.8 million and 5.4 thousand tons, respectively.

Our Competitive Strengths

Since commencing operations 140 years ago, we believe that Glatfelter has developed into one of the world's leading manufacturers of specialty papers and engineered products. We believe that the following competitive strengths have contributed to our success:

Leading market positions in higher-value, niche segments. We have focused our resources to achieve market-leading positions in certain higher-value, niche segments. Our products include various highly specialized paper products designed for technically demanding end uses. Consequently, many of our products achieve premium pricing relative to that of commodity paper

Table of Contents

grades. In 2003, approximately 70% of our sales were derived from these higher-value, niche products. The specialized nature of these products generally provides greater pricing stability relative to commodity paper products.

Customer-centric business focus. We offer a unique and diverse product line that can be customized to serve the individual needs of our customers. Our size allows us to develop close relationships with our key customers and to be adaptable in our product development, manufacturing, sales and marketing practices. We believe that this approach has led to the development of excellent customer relationships, defensible market positions, and increased pricing stability relative to commodity paper producers. Additionally, our customer-centric focus has been a key driver to our success in new product development.

Significant investment in product development. In order to keep up with our customers' ever-changing needs, we continually enhance our product offerings through significant investment in product development. In each of the past three years, we invested approximately \$5.1 million in product development activities. We derive a significant portion of our revenue from products developed, enhanced or improved as a result of these activities. Revenue generated from products developed, enhanced or improved within the five previous years as a result of these activities represented approximately 25%, 37% and 47% of our sales during 2001, 2002 and 2003, respectively.

Geographic diversity. In 1998, we expanded our global reach with the acquisition of Schoeller & Hoesch GmbH & Co. KG. Based in Gernsbach, Germany, Schoeller & Hoesch operates paper mills in Gernsbach, Germany and Scaër, France, as well as an abaca pulp mill in the Philippines. The Schoeller & Hoesch product lines serve multiple end markets, including tea bags, coffee filters, laminated furniture and flooring, labels and packaging, and adhesive tapes. During 2003, we sold our products to customers in approximately 80 countries throughout the world.

Integrated production. As a partially integrated producer, we are able to mitigate our changes in the costs of certain raw materials and energy. Our Spring Grove mill is a vertically integrated operation producing in excess of 85% of the annual pulp required for its paper production. The principal raw material used to produce this pulp is pulpwood, consisting of both hardwoods and softwoods. We own approximately 86,000 acres of timberlands, and we have a long-term supply agreement with the buyers of approximately 25,500 acres of timberlands that we sold in 2003. We obtain approximately 25% of our pulpwood requirements for our Spring Grove facility from Company-owned timberlands, which helps stabilize our fiber costs in a highly fragmented market. Our Spring Grove facility also generates 100% of the steam and electricity required for its operations. In addition, our Philippine mill processes abaca fiber to produce abaca pulp, which is a key raw material used by our Long Fiber & Overlay business unit in Gernsbach and Scaër.

Our Business Strategy

Our vision is to become the global supplier of choice in specialty papers and engineered products. We are continuously developing and refining strategies to strengthen our business and position it for the future. Execution of these strategies is intended to capitalize on our strengths in customer relationships, technology, and people, as well as our leadership positions in certain markets. In recent years, our industry has been challenged by a supply and demand imbalance, particularly for commodity-like products. To be successful in the current market environment, our strategy is focused on aggressively reducing costs and continually repositioning our product portfolio to increase our focus on higher-value, niche products and to better align our product offerings with our customers' ever-changing needs. Implementation of our strategy may include the pursuit of acquisitions or other strategic opportunities. Our goal is to become the global supplier of choice in specialty papers and engineered products. Certain key elements of our business strategy are outlined below:

Reposition our product portfolio. By leveraging our leadership positions in several specialty niche markets, we plan to accelerate growth, improve margins and generate better financial returns through the optimization of our product portfolio. In 2003, approximately 70% of our total sales

Table of Contents

were derived from what we consider to be higher-value, niche products. Over time, we plan to increase our concentration on such products by driving growth in our sales of trade book papers, uncoated specialty products, long fiber and overlay products, and other specialty products. We believe that this strategy will realign our business more closely with our customers' needs and further reduce our exposure to the higher level of cyclicity experienced in commodity paper grades.

Employ commodity cost approach to specialty product manufacturing. While we are focused on higher-value, niche products, we seek to employ a commodity-like, low-cost approach to our manufacturing activities. In September 2003, we initiated a restructuring of our Neenah facility aimed at reducing headcount and other costs, improving product mix, and increasing operating flexibility. During the second quarter of 2004, we began to implement our North American Restructuring Program. Initiatives that we have taken or intend to take in the near-term under the North American Restructuring Program include: redesigning our sourcing strategy to reduce spending on raw materials, freight, services and supplies, implementing targeted workforce reductions throughout the organization, reducing selling, general and administrative costs, and implementing manufacturing efficiency improvements at Neenah and Spring Grove. Together, the Neenah restructuring and North American Restructuring Program comprise a series of initiatives designed to improve our cost position and overall financial performance. We believe that these steps will significantly improve our profitability and cash flow, which will allow us to deploy additional capital to specialty products with higher growth potential and returns.

Maintain a strong balance sheet and preserve financial flexibility for future growth initiatives. We are focused on prudent financial management and the maintenance of a conservative capital structure. Concurrent with the announcement of certain restructuring initiatives in 2003, we reduced our dividend in order to conserve approximately \$15 million in annual cash flow to retain financial flexibility and strengthen our balance sheet. Furthermore, we are committed to maintaining an investment grade credit rating and our flexibility to pursue strategic opportunities that will benefit our shareholders. We demonstrated this commitment in 2003, during which we maintained a stable debt level despite significant investments in capital equipment.

Execute Long Fiber & Overlay Papers growth plan. A core component of our long-term strategy is to drive growth in our Long Fiber & Overlay Papers business unit. Currently, we are one of the leading producers of tea bag papers in the world, and we believe that this segment has promising growth characteristics as certain markets move toward tea bags versus loose tea leaves. We believe that we are well positioned to capitalize on this growth by leveraging our strong customer relationships and market-leading position in this segment. In addition, our rebuilt paper machine in Gernsbach will allow us to penetrate certain technical specialty markets, including the wall coverings, textile/apparel and industrial markets.

Table of Contents**Raw Material and Energy**

The following table provides an overview of the amount of principal raw materials estimated to be used by each of our manufacturing facilities on an annual basis:

	Estimated Annual Quantity (short tons)	Percent of Principal Raw Materials Purchased
<i>Domestic</i>		
Spring Grove		
Pulpwood	960,000	75%
Wood- and other pulps	29,000	100
Neenah		
Wood- and other pulps	49,700	100
Pulp substitutes	51,000	100
<i>International</i>		
Gernsbach		
Wood- and other pulps	28,500	100
Abaca pulp	6,800	0
Synthetic fiber	2,000	100
Scaër		
Wood pulp	1,700	100
Abaca pulp	1,600	0
Synthetic fiber	1,200	100
Philippines		
Abaca fiber	14,000	100

Our Spring Grove mill is a vertically integrated operation producing in excess of 85% of the annual pulp required for paper production. The principal raw material used to produce this pulp is pulpwood, of which both hardwoods and softwoods are used. At June 30, 2004, we owned approximately 86,000 acres of woodlands. During 2003, we sold approximately 25,500 acres of timberland and we entered into a Supply Agreement with the buyers of the timberlands pursuant to which we agreed to purchase from the buyer, at market prices, a minimum annual amount of pine pulpwood averaging 34,425 tons per annum over the eight-year term of the agreement.

In addition to these sources, hardwoods are available within a relatively short distance of our Spring Grove mill. Softwoods are obtained primarily from Maryland, Delaware and Virginia. To protect our sources of pulpwood, we actively promote conservation and forest management among suppliers and woodland owners.

Our Spring Grove, Pennsylvania facility generates 100% of the steam and electricity required for its operations. Principal fuel sources used by the Spring Grove facility are coal, recycled pulping chemicals, bark and wood waste, and oil (#2 and #6). This facility also produces excess electricity that is sold to the local power company under a long-term co-generation contract expiring in 2010. Net energy sales were \$9.7 million, \$9.8 million and \$10.0 million in 2001, 2002 and 2003, respectively.

Until the fourth quarter of 2003, our Neenah, Wisconsin facility recycled high-grade wastepaper as its primary raw material. Since the initiation of the restructuring at the Neenah facility, the pulp requirements for this facility are fulfilled with purchased pulp and hardwood pulp substitutes.

The Neenah facility purchases steam under a twenty-year contract, expiring in 2018, from a third party steam supplier which processes sludge from our Neenah facility and from other mills in the Neenah area. Under the contract, the cost of the steam is based on the market price of natural gas and we are required to purchase an annual minimum of 1.1 million k lbs. of steam. Based on expected production

Table of Contents

levels in 2004, we anticipate our needs will approximate 1 million k lbs. The Neenah facility generated approximately 15% of its required electrical power and purchases the remainder.

Our Philippine mill processes abaca fiber to produce abaca pulp. This abaca pulp production provides a unique advantage by supplying a key raw material used by our Long Fiber & Overlay business unit in Gernsbach and Scaër. Events may arise from the relatively unstable political and economic environment in which the Philippine facility operates that could interrupt the production of abaca pulp. Management periodically evaluates the supply chain, including the supply of abaca pulp to our Gernsbach and Scaër facilities. Any extended interruption of the Philippine operation could have a material impact on our consolidated financial position and/or results of operations. We believe we have approximately four months of abaca pulp supply available to us. In addition, we have established contingency plans for alternative sources of abaca pulp. However, the cost of obtaining abaca pulp from such alternative sources would likely be higher.

The Gernsbach and Scaër facilities both generate all the steam required for their operations. The Gernsbach facility generated approximately 30% of its 2003 electricity needs and purchased the balance. Natural gas was used to produce substantially all of Gernsbach's internally generated energy during 2003. The Scaër facility purchased all of its 2003 electric power requirements.

Based on information currently available, we believe that we will continue to have ready access, for the foreseeable future, to all principal raw materials used in the production of our products. The cost of our raw material is subject to change, including, but not limited to, costs of wood and pulp products and gas and oil energy costs.

New Product Development

In order to keep up with our customers' ever-changing needs, we are continually enhancing our product offerings through significant investment in product development activities, including product customizations developed in partnership or close collaboration with our customers. In each of the past three years, we invested approximately \$5.1 million on product development. Revenue generated from products developed, enhanced or improved within the five previous years as a result of these activities represented approximately 25%, 37% and 47% of consolidated revenue in 2001, 2002 and 2003, respectively. In determining revenue attributable to product development activities, we utilize an independently developed framework, which we believe to be generally accepted in the field of new product management. This framework categorizes products developed, enhanced or improved as those that (i) are new to the world, (ii) represent a product line new to our Company, (iii) are a new product within an existing product line, (iv) are a significant improvement of an existing product, (v) are repositioned into a new application or market, or (vi) are a lower cost alternative to an existing product of the Company and seen by our customers as a new offering. Approximately 40% of our revenue attributable to developed, enhanced or improved products come from products that fit within category (ii) and (iii), above.

Concentration of Customers

In 2003 and 2002, no single customer represented more than 10% of our consolidated net sales. In 2001, net sales to one customer, Central National Gottesman, Inc. (which buys paper through its division, Lindenmeyr Book Publishing) were approximately 11% of net sales, excluding the Ecusta Division.

Competition

The competitiveness of the markets in which we sell our products varies. In our Engineered Products and Long Fiber & Overlay Papers business units, competition is product line specific as the necessity for technical expertise and specialized manufacturing equipment limits the number of companies offering multiple product lines. We compete with specialty divisions of large companies such as, among others, Ahlstrom, International Paper, MeadWestvaco, Sappi and Stora Enso as well as other companies such as J R Crompton. Service, product performance, technological advances and product pricing are important

Table of Contents

competitive factors with respect to all our products. We believe our reputation in these areas continues to be excellent.

There are a number of companies in the United States that manufacture printing and converting papers. We believe we are the recognized leader in book publishing papers and compete in these markets with, among others, Domtar and Weyerhaeuser. In the envelope sector we compete with, among others, Blue Ridge, International Paper and Weyerhaeuser. Capacity in the worldwide uncoated free-sheet industry, which includes specialty papers, has exceeded demand in recent years. Although we believe demand increases will narrow this gap, the worldwide excess capacity is not expected to decline significantly for the next few years.

Our ability to compete in a global market place is also influenced by the relative value of the functional currency of our operations compared to the currency of the markets in which we sell our products and the location of our competitors. Due to the significant strengthening of the Euro relative to the U.S. dollar and other currencies over the last year, our European-based facilities have seen increasing pricing and competitive pressures.

Environmental Matters

We are subject to loss contingencies resulting from regulation by various federal, state, local and foreign governmental authorities with respect to the environmental impact of our mills. To comply with environmental laws and regulations, we have incurred substantial capital and operating expenditures in past years. We anticipate that environmental regulation of our operations will continue to become more burdensome and that capital and operating expenditures necessary to comply with environmental regulations will continue, and perhaps increase, in the future. In addition, we may incur obligations to remove or mitigate any adverse effects on the environment resulting from our operations, including the restoration of natural resources and liability for personal injury and for damages to property and natural resources. Because environmental regulations are not consistent worldwide, our ability to compete in the world marketplace may be adversely affected by capital and operating expenditures required for environmental compliance.

Spring Grove, Pennsylvania

We are subject to the Cluster Rule, a 1998 federal regulation in which the United States Environmental Protection Agency, or EPA, aims to regulate air and water emissions from certain pulp and paper mills, including kraft pulp mills, such as our Spring Grove facility. Issued under both the Clean Air Act and the Clean Water Act, the Cluster Rule establishes baseline emissions limits for toxic and conventional pollutant releases to both water and air.

We undertook an initiative at our Spring Grove facility under the Voluntary Advanced Technical Incentive Program set forth by the EPA in the Cluster Rule. This initiative, the New Century Project, required capital expenditures of approximately \$36 million, substantially all of which were made prior to 2004. The New Century Project included improvements in brownstock washing, installation of an oxygen delignification bleaching process, 100% chlorine dioxide substitution, and a hardwood ozone bleaching system.

In 1999, the Pennsylvania Department of Environmental Protection, or the Pennsylvania DEP, issued to us a Notice of Violation, or NOV, alleging violations of air pollution control laws, primarily for purportedly failing to obtain appropriate pre-construction air quality permits in conjunction with the installation of a turbine generator at our Spring Grove facility.

The Pennsylvania DEP's NOV pertained to a modification for which we did not receive a pre-construction permit. We conducted an evaluation at the time of this modification and determined that the pre-construction permit cited by the Pennsylvania DEP was not required. We have been informed that the Pennsylvania DEP will seek substantial emissions reductions, as well as civil penalties, to which we believe we have meritorious defenses. We are also in discussions with the Pennsylvania DEP and, based on these discussions, we do not expect that the resolution of these matters will have a material impact on our

Table of Contents

consolidated financial position or results of operations. We are unable to predict whether we will be successful in these discussions or whether our defenses would prevail in litigation. Should the Pennsylvania DEP obtain a judgment against us regarding these matters, it could be material to our consolidated financial position and our results of operations.

Neenah, Wisconsin

We have previously reported with respect to potential environmental claims arising out of the presence of PCBs in sediments in the lower Fox River and in the Bay of Green Bay, downstream of our Neenah, Wisconsin facility. We acquired the Neenah facility in 1979 as part of the acquisition of the Bergstrom Paper Company. In part, this facility used wastepaper as a source of fiber. At no time did the Neenah facility utilize PCBs in the pulp and paper making process, but discharges from the facility containing PCBs from wastepaper may have occurred from 1954 to the late 1970s. Any PCBs that the Neenah facility discharged into the Fox River resulted from the presence of NCR®-brand carbonless copy paper in the wastepaper that was received from others and recycled.

As described below, various state and federal governmental agencies have formally notified nine potentially responsible parties, including us, that they are potentially responsible for response costs and natural resource damages, or NRDs, arising from PCB contamination in the lower Fox River and in the Bay of Green Bay, under the Comprehensive Environmental Response, Compensation and Liability Act, or CERCLA, and other statutes. The other identified potentially responsible parties are NCR Corporation, Appleton Papers Inc., Georgia Pacific Corp. (formerly Fort Howard Corp. and Fort James), WTM I Co. (a subsidiary of Chesapeake Corp.), Riverside Paper Corporation, U.S. Paper Mills Corp. (a subsidiary of Sonoco Products Company), Sonoco Products Company, and Menasha Corporation.

CERCLA establishes a two-part liability structure that makes responsible parties liable for (1) response costs associated with the remediation of a release of hazardous substances and (2) NRDs related to that release. Courts have interpreted CERCLA to impose joint and several liabilities on responsible parties for response costs, subject to equitable allocation in certain instances. Prior to a final settlement by all responsible parties and the final cleanup of the contamination, uncertainty regarding the application of such liability will persist.

The areas of the lower Fox River and in the Bay of Green Bay in which the contamination exists are commonly referred to as Operable Unit 1, or OU1, which consists of Little Lake Butte des Morts, the portion of the river that is closest to our Neenah facility, Operable Unit 2, or OU2, which is the portion of the river between dams at Appleton and Little Rapids and Operable Units 3 through 5, or OU3-5, an area approximately 20 miles downstream of our Neenah facility.

The following summarizes the status of our potential exposure:

Response Actions

OU1 and OU2. On January 7, 2003, the Wisconsin Department of Natural Resources, or the Wisconsin DNR, and EPA issued a Record of Decision, or ROD, for the cleanup of OU1 and OU2. Subject to extenuating circumstances and alternative solutions arising during the cleanup, the ROD requires the removal of approximately 784,000 cubic yards of sediment from OU1 and no active remediation of OU2. The ROD also requires the monitoring of the two operable units. Wisconsin DNR and EPA estimate that the remedy for these two reaches will cost approximately \$75 million but could cost within a range from approximately \$52 million to \$112 million.

On July 1, 2003, WTM I entered into an Administrative Order on Consent with EPA and the Wisconsin DNR regarding the implementation of the Remedial Design for OU1.

On October 1, 2003, the U.S. Department of Justice lodged a Consent Decree regarding OU1 with the U.S. District Court for the Eastern District of Wisconsin. In the first quarter of 2004, the United States District Court for the Eastern District of Wisconsin entered the OU1 Consent Decree. Under terms of the OU1 Consent Decree, Glatfelter and WTM I each agreed to pay approximately \$27 million. This

Table of Contents

includes \$25.5 million from each to be escrowed to fund response work associated with remedial actions specified in the ROD. In addition, EPA agreed to take steps to place \$10 million from another source into escrow for the OU1 cleanup. The response work will be managed and/or performed by Glatfelter and WTM I, with governmental oversight, and funded by the amounts placed into escrow. Based on information currently available to us, we believe the required remedial actions can be completed with the amount of monies agreed upon under the Consent Decree. If the Consent Decree is terminated due to an insufficiency of escrow funds, Glatfelter and WTM I each remain potentially responsible for the costs necessary to complete the remedial actions.

The terms of the OU1 Consent Decree include provisions to be followed should the escrow account be depleted prior to completion of the response work. In this event, each company would be notified and be provided an opportunity to contribute additional funds to the escrow account and thereby to preserve the OU1 Consent Decree. Should the OU1 Consent Decree be terminated for this reason, each company would lose the protections contained in the settlement and the governments may turn to one or both parties for the completion of OU1 clean up. In such a situation, the governments may also seek response work from a third party, or perform the work themselves and seek response costs from any of the identified potentially responsible parties, including us.

The following table sets forth payments made by us pursuant to the terms of the OU1 Consent Decree:

<i>Dollars in thousands</i>	Amount
Payment for:	
Remediation activities	\$ 25,000
NRD and NRD assessment	1,650
Past costs	375
	<hr/>
Total	\$ 27,025
	<hr/>

During the first six months of 2004, pursuant to the terms of the OU1 Consent Decree, we transferred approximately \$26.3 million to an escrow account at a financial institution. The terms of the OU1 Consent Decree and the underlying escrow agreement restrict the use of the funds to qualifying remediation activities or restoration activities at the lower Fox River. At June 30, 2004, \$3.0 million is recorded under the caption Prepaid expenses and other current assets and \$23.3 million is included under the caption Other assets in the condensed consolidated balance sheet as of June 30, 2004, appearing elsewhere in this prospectus.

The OU1 Consent Decree required that each company pay the governments \$375,000 for past response costs. These payments were made in return for credit to be applied toward each settling company's potential liability for governmental response costs associated with the entire river. The OU1 Consent Decree also required the companies to pay certain NRD-related amounts, which are discussed below.

OU3 5. On July 28, 2003, the EPA and the Wisconsin DNR issued a ROD for the cleanup of OU3 5. The second ROD calls for the removal of 6.5 million cubic yards of sediment and certain monitoring at an estimated cost of \$324.4 million but could, according to the second ROD, cost within a range from approximately \$227.0 million to \$486.6 million. The most significant component of the estimated costs is attributable to large-scale sediment removal by dredging.

During the first quarter of 2004, NCR Corp. and Georgia Pacific Corp. entered into an Administrative Order on Consent with the EPA under which they agreed to perform the Remedial Design for OU3 5, thereby accomplishing a first step towards remediation.

We do not believe that we have more than a de minimis share of any equitable distribution of responsibility for OU3 5 after taking into account the location of our Neenah facility relative to the site and considering other work or funds committed or expended by us. However, uncertainty regarding

Table of Contents

responsibilities for the cleanup of these sites continues due to disagreement over a fair allocation or apportionment of responsibility.

Natural Resource Damages

Neither ROD issued by the EPA and the Wisconsin DNR places any value on claims for NRDs associated with this matter. As noted above, NRD claims are distinct from costs related to the primary remediation of a Superfund site. Calculating the value of NRD claims is difficult, especially in the absence of a completed remedy for the underlying contamination. The State of Wisconsin, the United States Fish and Wildlife Service, the National Oceanic and Atmospheric Administration, four Indian tribes and the Michigan Attorney General have asserted that they possess NRD claims related to the lower Fox River and the Bay of Green Bay.

In June 1994, the United States Fish and Wildlife Service notified the then identified potentially responsible parties that it considered them potentially responsible for NRDs. The federal, tribal and Michigan agencies claiming to be NRD trustees have proceeded with the preparation of an NRD assessment. While the final assessment has yet to be completed, the federal trustees released a plan on October 25, 2000 that values their NRDs for injured natural resources between \$176 million and \$333 million. We believe that the federal NRD assessment is technically and procedurally flawed. We also believe that the NRD claims alleged by the various alleged trustees are legally and factually without merit.

On March 19, 2004, the U.S. District Court for the Eastern District of Wisconsin entered a consent decree among the United States, the State of Wisconsin and the Fort James Operating Company. The consent decree resolves certain outstanding claims, primarily NRD claims, against Fort James and a related entity. Under the terms of the consent decree, Fort James would pay \$6.2 million in cash to the United States and the State of Wisconsin in settlement of various claims related to NRDs and cost recovery related to dredging of sediments at Deposits 56/57 (downstream from OU1 and OU2). Fort James also agrees to convey 1,063 acres of land to the State and to perform delineated NRD restoration projects at a cost of up to \$3.9 million.

Because the factual and legal justification the plaintiffs provided for the settlement is both vague and specific to the Fort James situation, and because the court's decision entering the decree is similarly situation specific, we are not able to extrapolate an estimated settlement amount for Glatfelter from the Fort James consent decree.

The OU1 Consent Decree required that Glatfelter and WTM I each pay the governments \$1.5 million for NRDs for the Fox River site, and \$150,000 for NRD assessment costs. Each of these payments was made in return for credit to be applied toward each settling company's potential liability for NRDs associated with the entire river.

Other Information

The Wisconsin DNR and United States Fish and Wildlife Service have published studies, the latter in draft form, estimating the amount of PCBs discharged by each identified potentially responsible party to the lower Fox River and the Bay of Green Bay. These reports estimate our Neenah facility's share of the volumetric discharge to be as high as 27%. We do not believe the volumetric estimates used in these studies are accurate because the studies themselves disclose that they are not accurate and are based on assumptions for which there exists no evidence. We believe that our volumetric contribution is significantly lower than the estimates. Further, we do not believe that a volumetric allocation would constitute an equitable distribution of the potential liability for the contamination. Other factors, such as the location of contamination, location of discharge and a party's role in causing discharge must be considered in order for the allocation to be equitable.

We have entered into interim cost-sharing agreements with four of the other potentially responsible parties, pursuant to which such potentially responsible parties have agreed to share both defense costs and costs for scientific studies relating to PCBs discharged into the lower Fox River. These interim cost-sharing

Table of Contents

agreements have no bearing on the final allocation of costs related to this matter. Based upon our evaluation of the magnitude, nature and location of the various discharges of PCBs to the river and the relationship of those discharges to identified contamination, we believe our share of any liability among the identified potentially responsible parties is much less than our per capita share of the cost sharing agreement.

We also believe that there exist additional potentially responsible parties other than the identified potentially responsible parties. For instance, certain of the identified potentially responsible parties discharged their wastewater through public wastewater treatment facilities, which we believe makes the owners of such facilities potentially responsible in this matter. We also believe that entities providing wastepaper containing PCBs to each of the recycling mills are also potentially responsible for this matter.

We believe the OU1 Consent Decree is a significant milestone in our continuing negotiations to resolve any exposure we may have with regard to the Fox River site and that the agreement provides further clarity on the financial commitment that may be required of us. Notwithstanding these developments, the OU1 Consent Decree does not completely resolve our potential liability related to the Fox River site. We continue to believe that this matter may result in litigation, but cannot predict the timing, nature, extent or magnitude of such litigation. We currently are unable to predict our ultimate cost related to this matter.

Reserves for Environmental Liabilities

We have reserves for environmental liabilities with contractual obligations and for those environmental matters for which it is probable that a claim will be made, that an obligation may exist and for which the amount of the obligation is reasonably estimable. The following table summarizes information with respect to such reserves as of June 30, 2004 and December 31, 2003.

<i>Dollars in millions</i>	June 30, 2004	December 31, 2003
<i>Recorded as:</i>		
Environmental liabilities	\$ 3.5	\$27.0
Other long-term liabilities	25.2	2.4
	—	—
Total	\$28.7	\$29.4
	—	—

The classification of our environmental liabilities is based on the development of the underlying remediation plan and execution of the related escrow agreement for the funding thereof. The reserve balance declined as a result of payments associated with the OU1 Consent Decree and items related to the Fox River matter. We did not record charges to our results of operations during 2004 or 2003 related to these matters.

Other than with respect to the OU1 Consent Decree, the amount and timing of future expenditures for environmental compliance, cleanup, remediation and personal injury, NRDs and property damage liabilities cannot be ascertained with any certainty due to, among other things, the unknown extent and nature of any contamination, the extent and timing of any technological advances for pollution abatement, the response actions that may be required, the availability of qualified remediation contractors, equipment and landfill space and the number and financial resources of any other parties.

Range of Reasonably Possible Outcomes - Neenah, Wisconsin

Based on currently available information, we believe that the remediation of OU1 will be satisfactorily completed for the amounts expected to be committed under the OU1 Consent Decree. The OU1 Consent Decree does not address response costs necessary to remediate the remainder of the Fox River site and only addresses NRDs and claims for reimbursement of government expenses to a limited extent. Due to judicial interpretations that find CERCLA imposes joint and several liability, uncertainty persists regarding our exposure with respect to the remainder of the Fox River site.

Table of Contents

Based on analysis of currently available information and experience regarding the cleanup of hazardous substances, we believe that it is reasonably possible that our costs associated with the lower Fox River and the Bay of Green Bay may exceed current reserves by amounts that may prove to be insignificant or that could range, in the aggregate, up to approximately \$125 million, over a period that is undeterminable but could range beyond 20 years. We believe that the likelihood of an outcome in the upper end of the monetary range is significantly less than other possible outcomes within the range and that the possibility of an outcome in excess of the upper end of the monetary range is remote.

In our estimate of the upper end of the range, we have considered: (i) the remedial actions agreed to in the OU1 Consent Decree and our belief that the required actions can be accomplished with the funds to be escrowed under the OU1 Consent Decree; and (ii) no active remediation of OU2. We have also assumed dredging for the remainder of the River and the Bay of Green Bay, as set forth in the second ROD, although at a significantly higher cost than estimated in the second ROD. We have also assumed our share of the ultimate liability to be 18%, which is significantly higher than we believe is appropriate or than we will incur and a level of NRD claims and claims for reimbursement of expenses from other parties that, although reasonably possible, is unlikely.

In estimating both our current reserves for environmental remediation and other environmental liabilities and the possible range of additional costs, we have not assumed that we will bear the entire cost of remediation and damages to the exclusion of other known potentially responsible parties who may be jointly and severally liable. The ability of other potentially responsible parties to participate has been taken into account, generally based on their financial condition and probable contribution. Our evaluation of the other potentially responsible parties financial condition included the review of publicly disclosed financial information. Furthermore, we believe certain of these potentially responsible parties have corporate or contractual relationships with additional entities that may shift monetary obligations arising from the lower Fox River and Bay of Green Bay. The relative probable contribution is based upon our knowledge that at least two potentially responsible parties manufactured the paper and arranged for the disposal of the wastepaper that included the PCBs and as such, in our opinion, bear a higher level of responsibility.

In addition, our assessment is based upon the magnitude, nature and location of the various discharges of PCBs to the river and the relationship of those discharges to identified contamination. We have also considered that over a number of years, certain facilities were under the ownership of large multinational companies that appear to retain some liability for this matter. We continue to evaluate our exposure and the level of our reserves, including, but not limited to, our potential share of the costs and NRDs, if any, associated with the lower Fox River and the Bay of Green Bay.

We believe that we are insured against certain losses related to the lower Fox River and the Bay of Green Bay, depending on the nature and amount of the losses. On July 30, 2003, we filed a Complaint in the Circuit Court for the County of Milwaukee, Wisconsin, against our insurers, seeking damages for breach of contract and declaratory relief related to such losses. One of the insurers that is a defendant in our Wisconsin litigation has filed a counter-suit against us in the U.S. District Court for the Middle District of Pennsylvania. The filing of our lawsuit followed the issuance of a Wisconsin Supreme Court opinion regarding environmental coverage issues that is favorable to policyholders. During the first six months of 2004, we reached successful resolution of certain claims under insurance policies related to the Fox River environmental matter. Insurance recoveries included in the results of operations for the first six months of 2004 totaled \$25.5 million and were fully received in cash prior to June 30, 2004.

Summary

Our current assessment is that we should be able to manage these environmental matters without a long-term, material adverse impact on us. These matters could, however, at any particular time or for any particular year or years, have a material adverse effect on our consolidated financial position, liquidity and/or results of operations or could result in a default under our loan covenants. Moreover, there can be no assurance that our reserves will be adequate to provide for future obligations related to these matters, that our share of costs and/or damages for these matters will not exceed our available resources, or that

Table of Contents

such obligations will not have a long-term, material adverse effect on our consolidated financial position, liquidity or results of operations. With regard to the lower Fox River and the Bay of Green Bay, if we are not successful in managing the implementation of the OU1 Consent Decree and/or if we are ordered to implement the remedy proposed in the second ROD, such developments would have a material adverse effect on our consolidated financial position, liquidity and results of operations and may result in a default under our loan covenants.

Employees

The following table summarizes our workforce as of July 31, 2004:

<i>Location</i>	Union	Non-union	Total
<i>Domestic</i>			
Corporate/ Spring Grove ⁽¹⁾	685	333	1,018
Neenah	148	49	197
	833	382	1,215
<i>International</i>			
Gernsbach	404	195	599
Scaër	90	56	146
Philippines	54	26	80
	548	277	825
Total	1,381	659	2,040

- (1) As discussed elsewhere in this prospectus, during the second quarter of 2004 we began an initiative to reduce our Spring Grove facility workforce by approximately 20%.

Different locals of the Paper, Allied-Industrial, Chemical and Energy Workers International Union, or PACE, represent the hourly employees at our US facilities.

A five-year labor agreement that covers employees in Spring Grove was ratified in November 2002 effective for the five-year period ending January 2008. Among other changes, the contract provides for wage increases of 2.5% in each of the first two years of the contract and 3% for the remaining years.

On October 22, 2002, hourly employees at our Neenah, Wisconsin facility ratified a five-year labor agreement with an expiration date of August 1, 2007. Under this agreement, effective August 1st of each year, wages increase 3% for the duration of the agreement.

Various unions represent employees at our Schoeller & Hoesch facility. One-year labor agreements covering employees at the Gernsbach, Germany and Scaër, France facilities were entered into during 2004. The terms of the agreements provide for wage increases in 2004 of approximately 1.5%. Negotiations to renew the agreements are expected to begin in February 2005. The terms and conditions of the agreements will remain in effect until new agreements are reached, although any wage increase negotiated in the new agreements will be retroactive to the respective expiration dates of the old agreements.

Employees at our pulpmill in the Philippines are covered by a five-year labor agreement, which was negotiated at the end of 2002.

We consider the overall relationship with our employees to be satisfactory.

Properties

Our leased executive offices are located in York, Pennsylvania. We own and operate paper mills located in Spring Grove, Pennsylvania; Neenah, Wisconsin; Gernsbach, Germany; and Scaër, France. In addition, we own and operate a pulp mill in the Philippines.

Table of Contents

We own substantially all of the properties used in our papermaking operations. We own our operating equipment with the exception of some leased vehicles. All of our properties, other than those that are leased, are free from any material liens or encumbrances. We consider all of our buildings to be in good structural condition and well maintained and our properties to be suitable and adequate for present operations.

The following table sets forth our estimated annual production capacity in short tons:

Spring Grove	310,000	Uncoated
	66,000	Coated
Neenah	125,000	Uncoated
Gernsbach	38,000	Lightweight
	8,800	Metallized
Scaër	4,400	Lightweight
Philippines	9,300	Abaca pulp

The Spring Grove facility includes five uncoated paper machines that have been rebuilt and modernized from time to time. The Spring Grove facility has an off-line combi-blade coater and a Specialty Coater, or S-Coater, which yield a potential annual production capacity for coated paper of approximately 66,000 tons. Since uncoated paper is used in producing coated paper, this does not represent an increase in the Spring Grove mill capacity. We view the S-Coater as an important asset that allows us to expand our more profitable engineered paper products business.

The Spring Grove facility also includes a pulpmill that has a production capacity of approximately 650 tons of bleached pulp per day. We have a precipitated calcium carbonate, or PCC, plant at our Spring Grove facility that produces PCC at a lower cost than could be purchased from others and lowers the need for higher-priced raw material typically used for increasing the opacity and brightness of certain papers.

Our wholly-owned subsidiary, Schoeller & Hoesch GmbH & Co. KG, owns and operates paper mills in Gernsbach, Germany and Scaër, France. Schoeller & Hoesch also owns a pulpmill in the Philippines that supplies substantially all of the abaca pulp requirements of the Schoeller & Hoesch paper mills.

In 2004, our Philippine facility, which supplies abaca pulp to Schoeller & Hoesch, expects to begin operation of a new globe digester that should increase our annual abaca pulp production by approximately 8%.

The Gernsbach facility includes five uncoated paper machines with an aggregate annual lightweight capacity of approximately 38,000 tons. As discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this prospectus, in 2003, we rebuilt a paper machine with a new state-of-the-art inclined wire paper machine. We believe this machine provides us greater flexibility and technological capabilities. The Gernsbach facility also has the capacity to produce 8,800 tons of metallized papers annually, using a lacquering machine and two metalizers. We purchase the base paper used to manufacture the metallized paper.

Legal Proceedings

We are involved in various lawsuits that we consider to be ordinary and incidental to our business. The ultimate outcome of these lawsuits cannot be predicted with certainty; however, we do not expect such lawsuits, in the aggregate or individually, will have a material adverse effect on our consolidated financial position, liquidity or results of operations.

For a discussion of commitments, contingencies and legal proceedings, see Note 15 of our notes to our unaudited condensed consolidated financial statements for the three months and six months ended June 30, 2004 and 2003 included elsewhere in this prospectus.

Table of Contents**MANAGEMENT**

The following table sets forth certain information with respect to the directors and executive officers of Glatfelter.

Name	Age	Position with the Company
Kathleen A. Dahlberg	51	Director
Nicholas DeBenedictis	58	Director
J. Robert Hall	52	Director
Richard C. III	61	Director
M. Alanson Johnson II	71	Director
Ronald J. Naples	59	Director
Richard L. Smoot	64	Director
Lee C. Stewart	56	Director
George H. Glatfelter II	52	Chairman, Chief Executive Officer and Director
John P. Jacunski	38	Vice President and Corporate Controller
Markus R. Mueller(1)	43	General Counsel, Secretary and Director of Policy & Compliance
Dante C. Parrini	40	Senior Vice President and General Manager
C. Matthew Smith	46	Vice President and Treasurer
John C. van Roden, Jr.	55	Senior Vice President and Chief Financial Officer
William T. Yanavitch II	44	Vice President Human Resources

- (1) On August 23, 2004, Mr. Mueller submitted his resignation from the Company effective September 30, 2004.

The following individuals serve as directors of Glatfelter:

Kathleen A. Dahlberg is Founder and President/ Chief Executive Officer of Open Vision Partners, a consortium of business and technical professionals bringing new technologies and businesses to market, and, since September 2001, a consultant to businesses on the application of new technologies for business improvement and process change. Ms. Dahlberg was Vice President of Worldwide Restaurant Solutions at McDonald's Corporation from July 2002 until June 2004. From 1997 to 2001, Ms. Dahlberg was Vice President e-business at BP Amoco.

Nicholas DeBenedictis has been Chairman, Chief Executive Officer and Director of Aqua America Corporation (formerly Philadelphia Suburban Corporation) since May 1993. He also serves as a director of Met-Pro Corporation and Exelon Corporation.

J. Robert Hall has been Chief Executive Officer of Ardale Enterprises LLC since 1998. He served as Chairman of PEP Snack Foods, Inc., a holding company for Wise Foods, Inc., a leading regional snack food company from 2000 to 2002 and now serves as Vice Chairman and as a director of Custom Food Products, Inc. and Chung's Gourmet Foods, Inc.

Richard C. III has been President, Chief Executive Officer and director of Triumph Group, Inc., a leading international aviation services company, since 1993. Mr. III is a member of the Board of Governors of the Aerospace Industries Association and on the Advisory Board of Outward Bound USA, as well as a member of the Board of Directors of Airgas, Inc. and Denman and Davis, Inc.

M. Alanson Johnson II has been retired since 1993. From September 1981 until his retirement, he served as our Executive Vice President, Treasurer and Chief Financial Officer.

Table of Contents

Ronald J. Naples has been Chairman and Chief Executive Officer of Quaker Chemical Corporation since May 1997. Mr. Naples is also the Chairman of the Board of Directors of The Federal Reserve Bank of Philadelphia.

Richard L. Smoot has been retired since September 2002. He was Regional Chairman, PNC Bank, National Association, Philadelphia/South Jersey markets from December 2000 to September 2002; and President and Chief Executive Officer, PNC Bank, National Association, Philadelphia/South Jersey markets, from July 1991 to December 2000. Mr. Smoot also serves as a director of Aqua America Corporation (formerly Philadelphia Suburban Corporation).

Lee C. Stewart has been an investment banker associated with Daniel Stewart & Company, a private investment and equity bank located in London, England, since May 2001. He was Executive Vice President and Chief Financial Officer of Foamex International, Inc., from March 2001 to May 2001 and a Vice President of Union Carbide Corporation from 1996 to 2001. Mr. Stewart is also a director of AEP Industries, Inc. and Marsulex, Inc., and he is member of the Advisory Board of Daniel Stewart & Company.

George H. Glatfelter II is the Chairman and Chief Executive Officer of the Company. From April 2000 to February 2001, Mr. Glatfelter was Chairman, President and Chief Executive Officer. From June 1998 to April 2000, he was Chief Executive Officer and President. Mr. Glatfelter serves as a director of Met-Pro Corporation; the American Forest and Paper Association; the National Council for Air and Stream Improvements; and the Alliance for the Chesapeake Bay. Mr. Glatfelter is also a trustee of the York College of Pennsylvania.

The following individuals are executive officers of Glatfelter:

John P. Jacunski joined us in October 2003, and currently serves as Vice President & Corporate Controller. Mr. Jacunski was previously Vice President and Chief Financial Officer at WCI Steel, Inc. from June 1999 to October 2003. From May 1995 to June 1999 he was WCI's Corporate Controller. Prior to joining WCI, Mr. Jacunski was with KPMG, an international accounting and consulting firm, where he served in various capacities.

Markus R. Mueller has served as General Counsel since April 2004. Mr. Mueller has also served as Director of Policy & Compliance since June 2000 and as Secretary since December 1999. He served as Corporate Counsel from June 2000 to April 2004. From June 1998 to June 2000, Mr. Mueller was our Associate Counsel. Mr. Mueller announced his resignation from the Company effective September 30, 2004.

Dante C. Parrini became Senior Vice President and General Manager in January 2003. From December 2000 until January 2003, Mr. Parrini was Vice President Sales and Marketing. From July 2000 to December 2000, he was Vice President Sales and Marketing, Glatfelter Division and Corporate Strategic Marketing. From June 1999 to July 2000, he was Vice President Sales and Marketing, Glatfelter Division. From August 1998 to June 1999, he was National Sales and Marketing Manager, Glatfelter Division.

C. Matthew Smith has served as Vice President and Treasurer since December 2003. From September 2001 to December 2003, Mr. Smith served as Corporate Controller. From June 2000 to September 2001, Mr. Smith was Chief Financial Officer and continued to serve as Assistant Secretary. From December 1999 to June 2000, he was Assistant Secretary and Vice President Finance. From December 1998 to December 1999, he was Vice President Finance.

John C. van Roden, Jr. has served as Senior Vice President and Chief Financial Officer since April 2003. From September 1998 to September 2002, Mr. van Roden was Senior Vice President and Chief Financial Officer of Conectiv of Wilmington, DE. Mr. van Roden is a Director of HB Fuller Company and Ascendant Capital Partners, LLC.

Table of Contents

William T. Yanavitch II became Vice President Human Resources in July 2000. From October 1998 to July 2000, Mr. Yanavitch was Director of Human Resources for the Ceramco and Trubyte Divisions of Dentsply.

Officers are elected to serve at the pleasure of the Board of Directors. Except in the case of officers elected to fill a new position or a vacancy occurring at some other date, officers are generally elected at the organizational meeting of the Board of Directors held immediately after the annual meeting of shareholders.

In addition to the above executive officers of our Company, the following individuals serve in a significant capacity with business unit responsibilities and/or policy-making responsibilities:

William W. Beible, Jr. is our Vice President Business Improvement. In this capacity, Mr. Beible is responsible for program management of all significant corporate projects including the North American Restructuring Program. Other key responsibilities include corporate information technology and leadership of sustainable business improvement efforts. Mr. Beible joined Glatfelter in May 2003.

John R. Blind serves as our Director of Manufacturing Specialty Papers. Mr. Blind has over 22 years of experience with our company in various capacities including Director of Manufacturing North America, Mill Manager of our Neenah facility, production management and other technical and engineering related positions.

Timothy R. Hess is our Director of Specialty Papers Business. Prior to being promoted to this position in January 2004, Mr. Hess was our Engineered Products Business Unit Director. Since joining Glatfelter in 1994, Mr. Hess has held various technical, manufacturing, sales and business development positions in the specialty papers arena.

Werner A. Ruckebrod is Vice President Long Fiber & Overlay Papers with responsibilities for the operations and performance of this business unit. Mr. Ruckebrod joined our subsidiary, S&H, in 1984. Since joining our Company, Mr. Ruckebrod has held various production related positions.

Mark A. Sullivan joined our Company in December 2003, as Chief Procurement Officer. Mr. Sullivan's experience includes a broad array of operations and supply chain management responsibilities during 20 years with the DuPont Company. He served with T-Mobile USA as an independent contractor during 2003, and Concur Technologies from 1999 until 2002.

Independence of Board Members

Each of our directors other than Messrs. Glatfelter and Stewart qualify as independent in accordance with the published listing requirements of the New York Stock Exchange. The New York Stock Exchange independence definition includes a series of objective tests, such as that the director is not an employee of the Company and has not engaged in various types of business dealings with the Company. In addition, as further required by New York Stock Exchange rules, the Board and the nominating and corporate governance committee have each made a subjective determination as to each independent director that no relationships exist which, in the opinion of the Board, would interfere with the exercise of independent judgment in carrying out the responsibilities of a director. In making these determinations, the directors reviewed and discussed information provided by the directors and the Company with regard to each director's business and personal activities as they may relate to us and our management.

Committees of Our Board

Our Board currently has, and appoints the members of, audit, compensation, finance and the nominating and corporate governance committees. Each member of the audit, compensation and nominating and corporate governance committees is an independent director in accordance with New York Stock Exchange standards. In addition, as required by New York Stock Exchange rules, each member of the audit committee qualifies as independent under special standards established by the SEC for members of audit committees.

Table of Contents

Audit Committee. The audit committee assists our Board in its oversight of Glatfelter's financial reporting practices, internal controls and audit functions and compliance with Glatfelter's Code of Business Conduct, and is solely and directly responsible for the appointment, retention, compensation, oversight and evaluation of the work of our independent auditors. The audit committee assists our Board in fulfilling its responsibilities with respect to the general oversight of our financial accounting and reporting, systems of internal control, and all audit processes and results. Our management has primary responsibility for preparing our financial statements, as well as our financial reporting process.

Compensation Committee. The compensation committee determines the compensation of our Chief Executive Officer and the base salaries of all of our other officers and recommends to the Board for approval bonus, profit sharing, equity and other compensation of our other officers. The committee also reviews and reassesses annually the compensation paid to non-employee directors for their service on our Board and on committees of our Board and recommends any changes to such compensation to the Board. In addition, the committee authorizes all stock option and other equity based awards to employees under our stock option and equity incentive plan.

Finance Committee. The finance committee is responsible for overseeing the management of Glatfelter's financial affairs. In particular, the finance committee is responsible for such matters as the oversight of our budgeting process, the review of certain capital expenditures, making recommendations to our Board with respect to dividend payments, oversight of our pension plans and other matters important to the operation of our Company.

Nominating and Corporate Governance Committee. The nominating and corporate governance committee reviews and reports to our Board on a periodic basis with regard to matters of corporate governance. This committee also makes recommendations to our Board regarding the size and composition of our Board. The nominating and corporate governance committee is responsible for reviewing with our Board from time to time the appropriate skills and characteristics required of Board members in the context of the current size and make-up of our Board. This assessment includes issues of diversity and other factors such as professional or business experience and qualifications. These factors, and any other qualifications considered useful by the committee, are reviewed in the context of an assessment of the perceived needs of our Board at a particular point in time. As a result, the priorities and emphasis of the nominating and corporate governance committee and of our Board may change from time to time to take into account changes in business and other trends, and the portfolio of skills and experience of current and prospective Board members. The nominating and corporate governance committee establishes procedures for the nomination process, recommends candidates for election to our Board and also nominates officers for appointment by our Board.

Table of Contents

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

George H. Glatfelter II, our Chairman and Chief Executive Officer, is a member of the Glatfelter Family and is the co-trustee with PNC Bank of a trust which holds 480,000 shares and will offer for sale 240,000 shares in this offering. He does not have voting or dispositive power with respect to any of the other shares being offered by the selling shareholders and is not the primary beneficiary of any of the trusts which are selling shares in this offering. PNC Bank, as trustee, however, has discretion to pay a portion of the income to George H. Glatfelter II from the following three trusts, which own a total of 475,276 shares of the Company: the Trust under Deed of Philip H. Glatfelter dated December 8, 1955; the Trust under Deed of Philip H. Glatfelter dated September 19, 1939, as appointed by Cassandra McC. Glatfelter; and Trust III under Deed of Cassandra McC. Glatfelter dated August 10, 1945, as amended. These trusts are offering for sale a total of 315,205 shares in this offering. In addition, Mr. Glatfelter, together with Ronald J. Naples and J. Robert Hall, has been appointed by our Board of Directors to a committee which will make final determinations regarding whether to proceed with this offering and the terms thereof.

George H. Glatfelter, the father of George H. Glatfelter II, is the beneficiary, a trustee or other beneficial owner with respect to trusts that are offering for sale a total of 3,555,879 shares in this offering. Mr. Glatfelter is a retired officer of Glatfelter and served on our Board of Directors from 1970 until 2002.

Patricia G. Foulkrod, a member of the Glatfelter Family and first cousin of George H. Glatfelter II, served on our Board of Directors from 1999 until 2003. Ms. Foulkrod is a beneficiary or trustee of trusts that are offering for sale a total of 802,424 shares in this offering.

PNC Bank, National Association serves as a trustee or co-trustee for all of the trusts of the Glatfelter Family selling shares in this offering, except for the Probasco Family Living Trust and the Karen E. Glatfelter Revocable Trust under Deed dated 2/4/04. Also, the shares of the Company owned by Janet V. Eyster, the Karen E. Glatfelter Revocable Trust under Deed dated 2/4/04 and the Probasco Family Living Trust are currently held in investment accounts through PNC Bank and PNC Bank has the power to vote the shares held in such accounts. In addition, Mr. Smoot, one of our directors, was President and Chief Executive Officer until December 2000, and had been Regional Chairman until September 2002, of PNC Bank, National Association, Philadelphia/ South Jersey markets. PNC Bank, National Association, an indirect subsidiary of PNC Financial Services Group, Inc., has a banking relationship with us and provides general banking services and credit facilities. PNC Bank is one of four lending institutions under a \$125.0 million Credit Agreement dated June 24, 2002, which is used to finance the Company's working capital needs. PNC Bank's committed share of this credit facility is \$32.5 million. As of June 30, 2004, our borrowing under the Credit Agreement was approximately \$27.5 million. PNC Bank's portion of this loan was approximately \$6.9 million. All transactions between us and PNC Bank have been made in the ordinary course of business and on substantially the same terms as those prevailing at the time for comparable transactions with other persons.

Table of Contents**PRINCIPAL AND SELLING SHAREHOLDERS**

The table sets forth certain information as of July 31, 2004 (except as otherwise noted) regarding beneficial ownership of shares of our common stock prior to and after the offering, assuming no exercise of the underwriters' over-allotment option, by (i) each person who is known by us to own beneficially more than 5% of our common stock, (ii) the selling shareholders, (iii) each of our directors and executive officers and (iv) all of our directors and executive officers as a group.

Beneficial ownership is determined in accordance with the rules of the SEC. In computing the number of shares beneficially owned by a person and the percentage ownership of that person, shares of common stock subject to options held by that person that are currently exercisable or exercisable within 60 days of July 31, 2004 are deemed issued and outstanding. These shares, however, are not deemed outstanding for purposes of computing percentage ownership of each other shareholder.

Name of Beneficial Owner ⁽¹⁾	Shares of Common Stock Beneficially Owned Before the Offering ⁽²⁾		Number of Shares Offered for Sale	Shares of Common Stock Beneficially Owned After Completion of the Offering ⁽²⁾	
	Number of Shares	Percentage of Common Stock		Number of Shares	Percentage of Common Stock
Principal Shareholders					
The PNC Financial Services Group, Inc. (formerly PNC Bank Corp.)(3)	14,780,960	33.7%	8,000,000	6,780,960	15.5%

* Represents less than 1%.

- (1) Unless otherwise indicated, the address for each principal shareholder and each of our directors and executive officers is 96 S. George Street, Suite 500, York, Pennsylvania 17401.
- (2) For purposes of the table, shares of common stock are considered beneficially owned by a person if such person has or shares voting or investment power with respect to such stock. As a result, more than one person may beneficially own the same security and, in some cases, the same shares are listed opposite more than one name in the table.
- (3) The following table sets forth The PNC Financial Services Group, Inc.'s voting and dispositive power regarding the shares of Glatfelter that PNC beneficially owns.

	<u>No. of Shares</u>
Sole voting power	12,044,258
Shared voting power	2,663,902
Total voting power	14,708,160
Sole dispositive power	11,169,654
Shared dispositive power	3,582,120
Total dispositive power	14,751,774

The amounts specified for shared voting power and shared investment power both include 717,933 shares held by PNC Bank, National Association, or PNC Bank, as co-trustee with G. H. Glatfelter, and 480,000 shares held by PNC Bank as co-trustee with G. H. Glatfelter II. The PNC Financial Services Group, Inc. beneficially owns all of the shares being offered for sale by the selling shareholders in this offering. All shares beneficially held by The PNC Financial Services Group, Inc. are also considered to be beneficially held by its subsidiary, PNC Bancorp, Inc., and by PNC Bank, a subsidiary of PNC Bancorp, Inc. The address of The PNC Financial Services Group, Inc. is Fifth Avenue & Wood Street, Pittsburgh, Pennsylvania 15265.

- (4) Represents (i) 6,000 shares issuable upon the exercise of options; (ii) 717,933 shares held as co-trustee with PNC Bank; 905,477 shares (of which 635,333 shares are also included in the number of shares which he holds as co-trustee) which G. H. Glatfelter has the right to withdraw from certain trusts of which PNC Bank is trustee; and (iii) 2,793,810 shares which G. H. Glatfelter has the right, on certain conditions, to purchase from certain trusts of which PNC Bank is trustee. The address of George H. Glatfelter is c/o PNC Bank, National Association, 1600 Market Street, Philadelphia, Pennsylvania 19103.
- (5) Represents 2,938,803 shares beneficially owned, as of December 31, 2003, by Barclays Global Investors, NA. and certain other entities, which include banks as defined in Section 3(a)(6) of the Securities Exchange Act of 1934 and an investment adviser in accordance with Section 240.13d(b)(1)(ii)(E) of the Investment Advisers Act of 1940 filing together. Barclays Global Investors, NA. and the other entities are holding these shares in trust accounts for the economic benefit of the beneficiaries of those accounts. The 2,938,803 shares include 2,658,675 shares with respect to which Barclays Global Investors, NA. and the other entities have sole power to vote or to direct the vote of and sole power to dispose of or to direct the disposition of. The address of Barclays Global Investors, NA. is 45 Fremont Street, San Francisco, California 94105.
- (6) Represents 2,702,100 shares beneficially owned, as of December 31, 2003, by Dimensional Fund Advisors Inc. Dimensional Fund Advisors, an investment advisor registered under Section 203 of the Investment Advisers Act of 1940, furnishes investment advice to four investment companies registered under the Investment Company Act of 1940, and serves as investment manager to certain other commingled group trusts and separate accounts. These investment companies, trusts and accounts are the Funds. In its role as investment adviser or manager, Dimensional Fund Advisors possesses voting and/or investment power over shares that are owned by the Funds. All

Table of Contents

2,702,100 shares are owned by the Funds. Dimensional Fund Advisors disclaims beneficial ownership of such shares. The address of Dimensional Fund Advisors Inc. is 1299 Ocean Avenue, 11th Floor, Santa Monica, California 90401.

- (7) Represents 2,619,900 shares beneficially owned, as of December 31, 2003, by Capital Group International, Inc., or CGI, the parent holding company of a group of investment management companies that hold investment power and, in some cases, voting power over these shares. The investment management companies, which include a bank as defined in Section 3(a)(6) of the Securities Exchange Act of 1934, and several investment advisers registered under Section 203 of the Investment Advisers Act of 1940, provide investment advisory and management services for their respective clients, which include registered investment companies and institutional accounts. CGI does not have investment power or voting power over any of the 2,619,900 shares and holds them solely for investment purposes in the ordinary course of business. The address of Capital Group International, Inc. is 11100 Santa Monica Boulevard, Los Angeles, California 90025.
- (8) Except for the Probasco Family Living Trust, the Karen E. Glatfelter Revocable Trust under Deed dated 2/4/04 and the trusts next to which a # appears in the table above, PNC Bank is sole trustee of each of the trusts offering for sale shares in the offering and has sole voting and dispositive power with respect to the shares held by the trusts. For each of the trusts marked with a #, PNC Bank acts as a co-trustee with certain members of the Glatfelter Family. The following table sets forth PNC Bank's co-trustees:

Co-Trustee(s)	Trust
Cassandra E. Savitz	Trust under Deed of Cassandra McC. Glatfelter dated 8/10/45, as amended, I Trust under Deed of Elizabeth G. Rosenmiller dated 11/5/92 I Trust under Deed of Philip H. Glatfelter 9/19/39, apptd by C. McC. Glatfelter I

Sherry M. Glatfelter	Trust under Deed of William L. Glatfelter III dated 2/1/88

Sherry M. Glatfelter, Karen E. Glatfelter and William L. Glatfelter, III act as co-trustees of the Karen E. Glatfelter Revocable Trust under Deed dated 2/4/04. In addition, the shares of the Company owned by Janet V. Eyster, the Karen E. Glatfelter Revocable Trust under Deed dated 2/4/04 and the Probasco Family Living Trust are currently held in investment accounts through PNC Bank and PNC Bank has the power to vote the shares held in such accounts. Unless otherwise indicated, the address for each selling shareholder is c/o PNC Bank, National Association, 1600 Market Street, Philadelphia, Pennsylvania 19103.

- (9) Robert Probasco and Peggy Gitt act as co-trustees with respect to the Probasco Family Living Trust. PNC Bank does not have dispositive power with respect to the shares held by the Probasco Family Living Trust.
- (10) Represents (i) 2,348 shares directly owned and (ii) 5,000 shares issuable upon exercise of options.
- (11) Represents (i) 7,348 shares directly owned and (ii) 11,000 shares issuable upon exercise of options.
- (12) Represents (i) 13,663 shares directly owned and (ii) 417,256 shares issuable upon exercise of options and (iii) 480,000 shares held as co-trustee with PNC Bank of the Trust under Deed of George H. Glatfelter dated 10/19/76, which is offering for sale 240,000 shares in this offering. In addition, PNC Bank, as trustee, has discretion to pay a portion of the income to G. H. Glatfelter II from the following three trusts: the Trust under Deed of Philip H. Glatfelter dated December 8, 1955, the Trust under Deed of Philip H. Glatfelter dated September 19, 1939, as appointed by Cassandra McC. Glatfelter, and Trust III under Deed of Cassandra McC. Glatfelter dated August 10, 1945, as amended.
- (13) Represents (i) 12,892 shares directly owned and (ii) 11,000 shares issuable upon exercise of options and (iii) 1,536 shares owned by his wife, as to which Mr. Johnson disclaims beneficial ownership.

Table of Contents

- (14) Represents (i) 370 shares directly owned and (ii) 23,725 shares issuable upon exercise of options.
- (15) Represents (i) 1,000 shares directly owned and (ii) 6,500 shares issuable upon exercise of options.
- (16) Represents (i) 1,086 shares directly owned and (ii) 52,171 shares issuable upon exercise of options.

- (21) Represents 25,730 shares issuable upon exercise of options.

Table of Contents

SHARES ELIGIBLE FOR FUTURE SALE

We cannot predict what effect, if any, market sales of shares of our common stock or the availability of shares of our common stock for sale will have on the market price of our common stock. Future sales of substantial amounts of our common stock in the public market, or the perception that these sales could occur, could materially and adversely affect the trading price of our common stock and could impair our future ability to raise capital through the sale of our equity or equity related securities at a time and price that we deem appropriate.

As of the close of business on August 31, 2004, we had outstanding an aggregate of 43,882,744 shares of common stock. This offering will not affect the number of our outstanding shares. All the shares sold in this offering will be freely tradable without restriction or further registration under the Securities Act, except that any shares held by our Affiliates, as that term is defined under Rule 144 of the Securities Act, may be sold only in compliance with the limitations described below.

Rule 144

In general, under Rule 144 as currently in effect, a person (or persons whose shares are required to be aggregated), including an affiliate, who has beneficially owned shares of our common stock for at least one year is entitled to sell in any three-month period a number of shares that does not exceed the greater of:

1% of then-outstanding shares of common stock, which is currently 438,827 shares; and,

the average weekly trading volume in the common stock on the New York Stock Exchange during the four calendar weeks preceding the date on which notice of sale is filed, subject to restrictions.

Sales under Rule 144 are also subject to manner of sale provisions and notice requirements and to the availability of current public information about us.

Rule 144(k)

In addition, a person who is not deemed to have been an affiliate of ours at any time during the 90 days preceding a sale and who has beneficially owned the shares proposed to be sold for at least two years, would be entitled to sell those shares under Rule 144(k) without regard to the manner of sale, public information, volume limitation or notice requirements of Rule 144. To the extent that our affiliates sell their shares, other than pursuant to Rule 144 or a registration statement under the Securities Act, the purchaser's holding period for the purpose of effecting a sale under Rule 144 commences on the date of transfer from the affiliate.

Lock-Up Agreements

The selling shareholders, certain holders of shares of our common stock held by or for the benefit of Glatfelter Family members and our directors and officers have entered into lock-up agreements. See Underwriting included elsewhere in this prospectus.

Table of Contents**UNDERWRITING**

Under the terms and subject to the conditions contained in an underwriting agreement dated September 21, 2004 the selling shareholders have agreed to sell to the underwriters named below, for whom Credit Suisse First Boston LLC is acting as representative, the following respective numbers of shares of common stock:

Underwriter	Number of Shares
Credit Suisse First Boston LLC	5,000,000
Merrill Lynch, Pierce, Fenner & Smith Incorporated	3,000,000
Total	8,000,000

The underwriting agreement provides that the underwriters are obligated to purchase all the shares of common stock in the offering if any are purchased, other than those shares covered by the over-allotment option described below. The underwriting agreement also provides that if an underwriter defaults, the purchase commitments of non-defaulting underwriters may be increased or the offering may be terminated.

The selling shareholders have granted to the underwriters a 30-day option to purchase on a pro rata basis up to 1,200,000 additional shares from the selling shareholders at the initial public offering price less the underwriting discounts and commissions. The option may be exercised only to cover any over-allotments of common stock.

The underwriters propose to offer the shares of common stock initially at the public offering price on the cover page of this prospectus and to selling group members at that price less a selling concession of \$0.363 per share. The underwriters and selling group members may allow a discount of \$0.100 per share on sales to other broker/ dealers. After the initial public offering, the representative may change the public offering price and concession and discount to broker/ dealers.

The following table summarizes the compensation and estimated expenses we and the selling shareholders will pay:

	Per Share		Total	
	Without Over-allotment	With Over-allotment	Without Over-allotment	With Over-allotment
Expenses payable by us	\$0.010	\$0.009	\$ 85,000	\$ 85,000
Underwriting discounts and commissions paid by selling shareholders	\$0.605	\$0.605	\$4,840,000	\$5,566,000
Expenses payable by the selling shareholders	\$0.098	\$0.085	\$ 786,000	\$ 786,000

We have agreed that we will not offer, sell, contract to sell, pledge or otherwise dispose of, directly or indirectly, or file with the SEC a registration statement under the Securities Act relating to, any shares of our common stock or securities convertible into or exchangeable or exercisable for any shares of our common stock, or publicly disclose the intention to make any offer, sale, pledge, disposition or filing, without the prior written consent of Credit Suisse First Boston LLC for a period of 180 days after the date of this prospectus, except issuances pursuant to the exercise of employee stock options or awards of restricted stock outstanding on the date hereof or pursuant to our incentive and benefit plans.

Our officers, directors, selling shareholders and a non-selling shareholder, whom collectively we refer to as the Restricted Group in this prospectus, have agreed that they will not offer, sell, contract to sell, pledge or otherwise dispose of, directly or indirectly, any shares of our common stock or securities convertible into or exchangeable or exercisable for any shares of our common stock, enter into a transaction that

would have the same effect, or enter into any swap, hedge or other arrangement that transfers, in whole or in part, any of the economic consequences of ownership of our common stock,

Table of Contents

whether any of these transactions are to be settled by delivery of our common stock or other securities, in cash or otherwise, or publicly disclose the intention to make any offer, sale, pledge or disposition, or to enter into any transaction, swap, hedge or other arrangement, without, in each case, the prior written consent of Credit Suisse First Boston LLC for a period of 180 days after the date of this prospectus, other than transactions by any person relating to shares of common stock or our other securities acquired in open market transactions after the date of this prospectus. Within the 180 day period after the date of this prospectus, the Restricted Group may sell or otherwise dispose of shares of our common stock if, during that period, the Company (i) enters into certain corporate transactions such that shares of our common stock held by the Restricted Group would become exchangeable for consideration pursuant to such corporate transaction, or (ii) a fully financed tender offer for our common stock is made. In each case, the relevant shares of our common stock will only be released from the restrictions described above, to the extent that such shares are actually exchanged in a qualifying corporate transaction or tendered in response to a fully financed tender offer. In addition to the restrictions described above, the selling shareholders have agreed that they will not make any demand for or exercise any right with respect to, the registration of any shares of our common stock or securities convertible into or exchangeable or exercisable for any shares of our common stock for a period of 365 days after the date of this prospectus.

We and the selling shareholders have agreed to indemnify the underwriters against liabilities under the Securities Act or contribute to payments that the underwriters may be required to make in that respect.

In connection with the offering the underwriters may engage in stabilizing transactions, over-allotment transactions, syndicate covering transactions and penalty bids in accordance with Regulation M under the Exchange Act.

Stabilizing transactions permit bids to purchase the underlying security so long as the stabilizing bids do not exceed a specified maximum.

Over-allotment involves sales by the underwriters of shares in excess of the number of shares the underwriters are obligated to purchase, which creates a syndicate short position. The short position may be either a covered short position or a naked short position. In a covered short position, the number of shares over-allotted by the underwriters is not greater than the number of shares that they may purchase in the over-allotment option. In a naked short position, the number of shares involved is greater than the number of shares in the over-allotment option. The underwriters may close out any covered short position by either exercising their over-allotment option and/or purchasing shares in the open market.

Syndicate covering transactions involve purchases of the common stock in the open market after the distribution has been completed in order to cover syndicate short positions. In determining the source of shares to close out the short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared to the price at which they may purchase shares through the over-allotment option. If the underwriters sell more shares than could be covered by the over-allotment option, a naked short position, the position can only be closed out by buying shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there could be downward pressure on the price of the shares in the open market after pricing that could adversely affect investors who purchase in the offering.

Penalty bids permit the representative to reclaim a selling concession from a syndicate member when the common stock originally sold by the syndicate member is purchased in a stabilizing or syndicate covering transaction to cover syndicate short positions.

These stabilizing transactions, syndicate covering transactions and penalty bids may have the effect of raising or maintaining the market price of our common stock or preventing or retarding a decline in the market price of our common stock. As a result the price of our common stock may be higher than the price that might otherwise exist in the open market. These transactions may be effected on the New York Stock Exchange and, if commenced, may be discontinued at any time.

Table of Contents

A prospectus in electronic format may be made available on the web sites maintained by one or more of the underwriters, or selling group members, if any, participating in this offering and one or more of the underwriters participating in this offering may distribute prospectuses electronically. The representative may agree to allocate a number of shares to underwriters and selling group members for sale to their online brokerage account holders. Internet distributions will be allocated by the underwriters and selling group members that will make internet distributions on the same basis as other allocations.

In the ordinary course of business, Credit Suisse First Boston LLC has provided financial advisory, investment banking and general financing and banking services to us from time to time, for which it has received customary compensation. Credit Suisse First Boston LLC and its affiliates may provide such services for us in the future, for which they would receive customary compensation. Merrill Lynch, Pierce, Fenner & Smith Incorporated, or Merrill Lynch, was engaged from May 2003 to September 2003 as exclusive advisor to PNC Bank as trustee of the various Glatfelter Family trusts to provide financial advisory services. These services included assisting PNC Bank as trustee of the Glatfelter Family trusts in analyzing options for diversifying some or all of the trusts' holdings in shares of the Company. Merrill Lynch received a monthly retainer fee for these services. Since September 2003, Merrill Lynch has not received a monthly retainer but Merrill Lynch has continued to provide similar services to PNC Bank, as trustee of the Glatfelter Family trusts, and Merrill Lynch may continue to provide similar services in the future for which it would receive customary compensation.

NOTICE TO CANADIAN RESIDENTS

Resale Restrictions

The distribution of the common stock in Canada is being made only on a private placement basis exempt from the requirement that we and the selling shareholders prepare and file a prospectus with the securities regulatory authorities in each province where trades of common stock are made. Any resale of the common stock in Canada must be made under applicable securities laws which will vary depending on the relevant jurisdiction, and which may require resales to be made under available statutory exemptions or under a discretionary exemption granted by the applicable Canadian securities regulatory authority. Purchasers are advised to seek legal advice prior to any resale of the common stock.

Representations of Purchasers

By purchasing common stock in Canada and accepting a purchase confirmation a purchaser is representing to us, the selling shareholders and the dealer from whom the purchase confirmation is received that:

the purchaser is entitled under applicable provincial securities laws to purchase the common stock without the benefit of a prospectus qualified under those securities laws,

where required by law, that the purchaser is purchasing as principal and not as agent, and

the purchaser has reviewed the text above under Resale Restrictions.

Rights of Action – Ontario Purchasers Only

Under Ontario securities legislation, a purchaser who purchases a security offered by this prospectus during the period of distribution will have a statutory right of action for damages, or while still the owner of the shares, for rescission against us and the selling shareholders in the event that this circular contains a misrepresentation. A purchaser will be deemed to have relied on the misrepresentation. The right of action for damages is exercisable not later than the earlier of 180 days from the date the purchaser first had knowledge of the facts giving rise to the cause of action and three years from the date on which payment is made for the shares. The right of action for rescission is exercisable not later than 180 days from the date on which payment is made for the shares. If a purchaser elects to exercise the right of action for rescission, the purchaser will have no right of action for damages against us or the selling shareholders. In no case will the amount recoverable in any action exceed the price at which the shares were offered to the purchaser and if the purchaser is shown to have purchased the securities with knowledge of the misrepresentation, we and the selling shareholders will have no liability. In the case of an action for damages, we and the selling shareholders will not be liable for all or any portion of the damages that are proven to not represent the depreciation in value of the shares as a result of the misrepresentation relied upon. These rights are in addition to, and without derogation from, any other rights or remedies available at law to an Ontario purchaser. The foregoing is a summary of the rights available to an Ontario purchaser. Ontario purchasers should refer to the complete text of the relevant statutory provisions.

Enforcement of Legal Rights

All of our directors and officers as well as the experts named herein and the selling shareholders may be located outside of Canada and, as a result, it may not be possible for Canadian purchasers to effect service of process within Canada upon us or those persons. All or a substantial portion of our assets and the assets of those persons may be located outside of Canada and, as a result, it may not be possible to satisfy a judgment against us or those persons in Canada or to enforce a judgment obtained in Canadian courts against us or those persons outside of Canada.

Taxation and Eligibility for Investment

Canadian purchasers of common stock should consult their own legal and tax advisors with respect to the tax consequences of an investment in the common stock in their particular circumstances and about the eligibility of the common stock for investment by the purchaser under relevant Canadian legislation.

Table of Contents

LEGAL MATTERS

Ballard Spahr Andrews & Ingersoll, LLP, Philadelphia, Pennsylvania, will pass on the validity of the common stock offered by this prospectus for us. The underwriters have been represented by Cravath, Swaine & Moore LLP, New York, New York.

EXPERTS

The consolidated financial statements as of December 31, 2003 and 2002, and for each of the three years in the period ended December 31, 2003, and the related financial statement schedule included in this prospectus have been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report, which is included herein (which report expresses an unqualified opinion and includes an explanatory paragraph relating to the adoption of Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets, effective January 1, 2002), and have been so included in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

With respect to the unaudited condensed consolidated interim financial information for the periods ended March 31, 2004 and 2003, and June 30, 2004 and 2003, which is incorporated herein by reference and included and incorporated herein by reference, respectively, Deloitte & Touche LLP, an independent registered public accounting firm, have applied limited procedures in accordance with standards of the Public Company Accounting Oversight Board (United States) for a review of such information. However, as stated in their reports included in the Company's Quarterly Reports on Form 10-Q for the quarters ended March 31, 2004 and June 30, 2004 and incorporated by reference herein, they did not audit and they do not express an opinion on that interim financial information. Accordingly, the degree of reliance on their reports on such information should be restricted in light of the limited nature of the review procedures applied. Deloitte & Touche LLP are not subject to the liability provisions of Section 11 of the Securities Act for their reports on the unaudited condensed consolidated interim financial information because those reports are not reports or a part of the registration statement prepared or certified by an accountant within the meaning of Sections 7 and 11 of the Securities Act.

WHERE YOU CAN FIND MORE INFORMATION

We are a reporting company and file annual, quarterly and current reports, proxy statements, and other information with the SEC. We have also filed with the SEC a registration statement on Form S-3 to register our common stock. This prospectus, which forms part of the registration statement, does not contain all of the information included in the registration statement. For further information about us and our common stock offered in this prospectus, you should refer to the registration statement and its exhibits. You may read and copy the registration statement and any other document we file with the SEC at the SEC's public reference room located at 450 Fifth Street, N.W., Washington, DC 20549. You can request copies of these documents by writing to the SEC and paying a fee for the copying cost. Please call the SEC at 1-800-SEC-0330 for more information about the operation of the public reference rooms. Our SEC filings are also available at the SEC's web site at www.sec.gov.

INCORPORATION OF DOCUMENTS BY REFERENCE

The SEC allows us to incorporate by reference information that we file with it, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is an important part of this prospectus, and information that we file in the future with the SEC will automatically update and supersede this information. We incorporate by reference the documents listed below and any future filings we will make with the SEC under Section 13(a), 13(c), 14 or 15(d) of the Exchange Act prior to the termination of the offering (other than Current Reports on Form 8-K containing only Regulation FD and/or Regulation G disclosure furnished to the SEC and

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

P. H. Glatfelter Company,

Its Shareholders and Directors:

We have audited the accompanying consolidated balance sheets of P. H. Glatfelter Company and subsidiaries as of December 31, 2003 and 2002, and the related consolidated statements of income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2003. Our audits also included the financial statement schedule which appears on page F-37 of this prospectus. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of P. H. Glatfelter Company and subsidiaries at December 31, 2003 and 2002, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2003, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As discussed in Note 15 to the consolidated financial statements, the Company adopted Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets, effective January 1, 2002.

Table of Contents

P. H. GLATFELTER COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization

P. H. Glatfelter Company and subsidiaries (Glatfelter) is a manufacturer of specialty papers and engineered products. Headquartered in York, Pennsylvania, our manufacturing facilities are located in Spring Grove, Pennsylvania; Neenah, Wisconsin; Gernsbach, Germany; Scaër, France and the Philippines. Our products are marketed throughout the United States and in many foreign countries, either through wholesale paper merchants, brokers and agents or directly to customers.

2. Accounting Policies

Principles of Consolidation The consolidated financial statements include the accounts of Glatfelter and its wholly owned subsidiaries. All intercompany balances and transactions have been eliminated.

Accounting Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingencies as of the balance sheet date and the reported amounts of revenues and expenses during the reporting period. Management believes the estimates and assumptions used in the preparation of these consolidated financial statements are reasonable, based upon currently available facts and known circumstances, but recognizes that actual results may differ from those estimates and assumptions.

Reclassifications Certain reclassifications have been made to the prior years consolidated financial statements, and notes thereto, to conform to those classifications used in the current year.

Cash and Cash Equivalents We classify all highly liquid instruments with an original maturity of three months or less at the time of purchase as cash equivalents.

Inventories Inventories are stated at the lower of cost or market. Raw materials and in-process and finished inventories of our domestic manufacturing operations are valued using the last-in, first-out (LIFO) method, and the supplies inventories are valued principally using the average-cost method. Inventories at our foreign operations are valued using a method that approximates average cost.

Plant, Equipment and Timberlands For financial reporting purposes, depreciation is computed using the straight-line method over the estimated useful lives of the respective assets. For income taxes purposes, depreciation is primarily calculated using accelerated methods over lives established by statute or U.S. Treasury Department procedures. Provision is made for deferred income taxes applicable to this difference.

The range of estimated service lives used to calculate financial reporting depreciation for principal items of plant and equipment are as follows:
