Tax Basis

The cost basis of investments for federal income tax purposes at September 30, 2015 for Babson Capital Global Short Duration High Yield Fund (the “Fund”) was as follows*:

Cost of investments	\$591,723,026
Gross unrealized appreciation	7,704,185
Gross unrealized depreciation	(74,284,658)
Net unrealized depreciation	\$(66,580,473)

*The above table only reflects tax adjustments through December 31, 2014. For the previous fiscal year’s federal income tax information, please refer to the Notes to Financial Statements section in the Fund’s most recent annual report.

Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A three-tier hierarchy is utilized to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. For example, market participants would consider the risk inherent in a particular valuation technique used to measure fair value, such as a pricing model, and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability and are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity’s own assumptions about the assumptions market participants would use in pricing the asset or liability and are developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 – quoted prices in active markets for identical securities

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments)

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The following is a summary of the inputs used as of September 30, 2015 in valuing the Fund's investments

B. Cash and Cash Equivalents

Cash and cash equivalents consist principally of short term investments that are readily convertible into cash and have original maturities of three months or less. At September 30, 2015, all cash and cash equivalents are held by U.S. Bank, N.A.

C. Investment Transactions, Related Investment Income and Expenses

Investment transactions are accounted for on a trade-date basis. Interest income is recorded on the accrual basis, including the amortization of premiums and accretion of discounts on bonds held using the yield-to-maturity method.

Realized gains and losses on investment transactions and unrealized appreciation and depreciation of investments are reported for financial statement and Federal income tax purposes on the identified cost method.

Expenses are recorded on the accrual basis as incurred.

D. Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

E. Federal Income Taxation

The Fund has elected to be taxed as a Regulated Investment Company (“RIC”) under sub-chapter M of the U.S. Internal Revenue Code of 1986, as amended, and intends to maintain this qualification and to distribute substantially all of its net taxable income to its shareholders.

F. Dividends and Distributions

The Fund declares and pays dividends monthly from net investment income. To the extent that these distributions exceed net investment income, they may be classified as return of capital. The Fund also pays a distribution at least annually from its net realized capital gains, if any. Dividends and distributions are recorded on the ex-dividend date. All common shares have equal dividend and other distribution rights. A notice disclosing the source(s) of a distribution will be provided if payment is made from any source other than net investment income. Any such notice would be provided only for informational purposes in order to comply with the requirements of Section 19(a) of the 1940 Act and not for tax reporting purposes. The tax composition of the Fund’s distributions for each calendar year is reported on Internal Revenue Service Form 1099-DIV.

Dividends from net investment income and distributions from realized gains from investment transactions have been determined in accordance with Federal income tax regulations and may differ from net investment income and realized gains recorded by the Fund for financial reporting purposes. These differences, which could be temporary or permanent in nature may result in reclassification of distributions; however, net investment income, net realized gains and losses, and net assets are not affected.

G. Derivative Instruments

The following is a description of the derivative instruments that the Fund utilizes as part of its investment strategy, including the primary underlying risk exposures related to the instrument.

Forward Foreign Exchange Contracts – The Fund is subject to foreign currency exchange rate risk in the normal course of pursuing its investment objectives. The Fund transacted in and currently holds forward foreign exchange contracts to hedge against changes in the value of foreign currencies. The Fund entered into forward foreign exchange contracts obligating the Fund to deliver or receive a currency at a specified future date. Forward foreign exchange contracts are valued daily and unrealized appreciation or depreciation is recorded daily as the difference between the contract exchange rate and the closing forward rate applied to the face amount of the contract. A realized gain or loss is recorded at the time the forward contract expires. Credit risk may arise as a result of the failure of the counterparty to comply with the terms of the contract. The Fund considers the creditworthiness of each counterparty to a contract in evaluating potential credit risk quarterly. The Fund is also subject to credit risk with respect to the counterparties to the derivative contracts which are not cleared through a central counterparty but instead are traded over-the-counter between two counterparties. If a counterparty to an over-the-counter derivative becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances. The counterparty risk for cleared derivatives is generally lower than for uncleared over-the-counter derivative transactions since generally a clearing organization becomes substituted for each counterparty to a cleared derivative contract and, in effect, guarantees the parties' performance under the contract as each party to a trade looks only to the clearing house for performance of financial obligations. However, there can be no assurance that the clearing house, or its members, will satisfy its obligations to the Fund. In addition, in the event of a bankruptcy of a clearing house, the Fund could experience a loss of the funds deposited with such clearing house as margin and of any profits on its open positions. The counter party risk to the Fund is limited to the net unrealized gain, in any, on the contract.

The use of forward foreign exchange contracts does not eliminate fluctuations in the underlying prices of the Fund's investment securities; however, it does establish a rate of exchange that can be achieved in the future. The use of forward foreign exchange contracts involves the risk that anticipated currency movements will not be accurately predicted. A forward foreign exchange contract would limit the risk of loss due to a decline in the value of a particular currency; however it would also limit any potential gain that might result should the value of the currency increase instead of decrease. These contracts may involve market risk in excess of the amount of receivable or payable reflected on the Statement of Assets and Liabilities.

The Fund recognized an asset on the Statement of Assets and Liabilities as a result of forward foreign exchange contracts with Morgan Stanley and J.P. Morgan. The Fund's policy is to recognize an asset equal to the net value of all forward foreign exchange contracts with an unrealized gain and a liability equal to the net value of all forward foreign exchange contracts with an unrealized loss. The Fund has recognized an asset of \$1,793,956 in net unrealized appreciation and a liability of \$85,658 in net unrealized depreciation on forward foreign exchange contracts. Outstanding forward foreign exchange contracts as of September 30, 2015 are indicative of the volume of activity during the period.

For the period from January 1, 2015 through September 30, 2015, the Fund's direct investment in derivatives consisted of forward foreign exchange contracts.

The following is a summary of the fair value of derivative instruments held directly by the Fund as of September 30, 2015. These derivatives are presented in the Schedule of Investments.
