Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

(Former name or address, if changed since last report)

Section 7 - Regulation FD

Item 7.01. Regulation FD Disclosure.

On October 30, 2006 we issued a press release announcing that our KG#15 well located on the KG Block off the eastern coast of India had completed drilling to a total depth of 5,745 meters. In addition, we announced that a testing program is expected to commence in mid-November 2006. A copy of the press release is attached hereto as Exhibit 99.1.

The information disclosed in this Item 7.01 and the related exhibit are being furnished solely to comply with Regulation FD and are not considered to be “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and are not subject to the liabilities of that section unless we specifically incorporate it by reference in a document filed under the Securities Act of 1933 or the Exchange Act. By filing this Current Report on Form 8-K and furnishing this information, we make no admission as to the materiality of any information in this Current Report on Form 8-K.

Section 9 - Financial Statements and Exhibits

Item 9.01. Financial Statements and Exhibits.

(a) Financial statements of business acquired.

Not applicable

(b) Pro forma financial information

Not applicable

(c) Exhibits:

99.1 Press release dated October 30, 2006 (furnished, but not filed).

SIGNATURES

Pursuant to the requirement of the Securities Exchange Act of 1934, the Registrant has duly caused this Report to be signed on its behalf by the undersigned thereunto duly authorized.

Dated: October 30, 2006
GEOGLOBAL RESOURCES INC.
(Registrant)

EXHIBIT 99.1
GEOGLOBAL TO TEST KG#15 WELL

Calgary, Alberta, Canada, October 30, 2006 - GeoGlobal Resources Inc. (Amex: GGR) reports that Gujarat State Petroleum Corporation ("GSPC"), the operator of the KG Block, has completed drilling the KG#15 well to a total depth ("TD") of 5,745 meters (5,669 meters total vertical depth ("TVD")).

A complete suite of modern logs have been run and the well is currently being cased with a 7 inch liner to TD. A testing program is being designed based upon independent log analyses, as well as core samples, MDT's ("Modular Formation Dynamics Tester") and hydrocarbon shows while drilling. The testing program is expected to commence mid-November, 2006.

Drilling of the KG#15 well commenced on July 17, 2006 from the KG#8 well platform. The well was drilled directionally to a location 750 meters SSE of the KG#8 platform to delineate the extent of the reservoir section tested in KG#8 and to seek to prove additional reserves.

GeoGlobal Resources Inc., headquartered in Calgary, Alberta, Canada, is a US publicly traded oil and gas company, which through its subsidiaries, is engaged primarily in the pursuit of petroleum and natural gas through exploration and development in India. Since inception, the Company's efforts have been devoted to the pursuit of Production Sharing Contracts with the Government of India. Currently, the Company is focused on the development of high potential exploration targets in the Krishna Godavari, Cambay and the Deccan Syncline basin areas.

Cautionary Statement to Investors

This press release contains statements which constitute forward-looking statements within the meaning of the US Private Securities Litigation Reform Act of 1995, including statements regarding the plans, intentions, beliefs and current expectations of GeoGlobal Resources Inc., its directors, or its officers with respect to the oil and gas exploration, development and drilling activities being conducted and intended to be conducted and the outcome of those activities on the exploration blocks in which the Company has an interest. Statements regarding the work commitments to be fulfilled, the surveys to be conducted, and the results of fulfilling those work commitments, the timing and outcome of drilling and testing of wells drilled on the exploration blocks and the timing of any commercial production that may be established are forward-looking statements. There can be no assurance as to the outcome of those surveys conducted, the exploratory drilling and the testing and evaluation that may be conducted or that has been conducted on the wells drilled or as to the quantity of recoverable reserves that may exist in the areas of any wells drilled or when, if ever, that the Company may realize revenues from those wells. The Company's forward-looking statements include the estimated cost and timing of its exploration activities, including the estimated costs of fulfilling its work commitments and any exploratory drilling conducted as a consequence of the outcome of the surveys conducted, the extent of activities conducted and the outcome of those activities. Investors are cautioned that any such forward-looking statements are not guarantees of the success of the Company's oil and gas exploration, development and drilling activities or the commercial success of any of its wells and the wells the Company may drill involve risks and uncertainties. There can be no assurance as to the outcome of the exploratory well drilling and testing being conducted on the KG Block, or as to the outcome of further testing of wells or as to the success of drilling additional or appraisal wells. There can be no assurance that the entire exploration, development, drilling and testing program presently intended to be undertaken on the KG Block will be completed. These activities are dependent upon the availability of drilling rigs, other services equipment and operating personnel at reasonable prices. There can be no assurance as to their availability and their unavailability would adversely affect the plans of the operator. The Company's actual results may differ materially from those projected in the forward-looking statements. There are numerous risks and uncertainties involved in the Company's acquisition of unproved minority and majority interests in the exploration areas, including the possibilities that no discoveries of hydrocarbons are made on the exploration blocks or, if discovered, that such discoveries are determined not to be commercially

productive. There can be no assurance that the Company's drilling program will be successful or that the entire program on any exploration block will be drilled. There can be no assurance that the Company's estimates as to the time to fulfill work commitments and complete drilling operations will be accurate. The blocks are highly speculative exploration opportunities and pursuing the development of the exploration blocks involves material risks to the Company. The Company's interests in its exploration blocks are participating interests and there can be no assurance that such funds as are required to meet the Company's obligations under the production sharing contracts will be available to the Company in the amounts and when required. The Company's failure to have such funds available at the times and in the amounts required could materially adversely affect the fulfillment of the Company's business plans and its interest in those exploration blocks. The first phase of the exploration period relating to the production sharing contract for the KG Block has expired, as extended on August 29, 2005 through March 11, 2006, without the required minimum of at least fourteen wells being drilled during the first phase. On February 24, 2006, the management committee for the KG Block recommended a further extension the first phase of twelve months to March 11, 2007. As at October 30, 2006, approval of this extension from the Government of India is still outstanding. Unless this further extension is granted, the Company may be liable for consequences of non-fulfillment of the minimum work commitment in a given time frame under the PSC. The PSC has provisions for termination of the PSC on account of various reasons specified therein including material breach of the contract. Termination rights can be exercised after giving ninety days written notice. This failure to timely complete the minimum work commitment, though there is no precedence, may be deemed by the Government of India to be a failure to comply with the provisions of the contract in a material particular. The Company has been advised by the operator that it is unaware of any precedent for such an occurrence. The termination of the production sharing contract by the Government of India would result in the loss of the Company's interest in the KG Block other than areas determined to encompass "commercial discoveries". No areas on the KG Block have been determined to encompass "commercial discoveries" as that term is defined under the Production Sharing Contract as of October 30, 2006. Additional risks and uncertainties arise out of seeking to do business overseas in India where political and other world events may disrupt the Company's plans and intentions. The presence of hydrocarbon reserves on adjacent or contiguous properties is no assurance or necessary or probable indication that hydrocarbons will be found in commercially marketable quantities on the exploration blocks in which the Company holds an interest. Additional important risk factors are described in the Company's periodic filings with the Securities and Exchange Commission, including the Company's annual report on Form 10-KSB and quarterly reports on Form 10-QSB. The filings may be viewed at <http://www.sec.gov> and www.sedar.com.
