Madison, WI 53701

Approximate date of proposed public offering: From time to time after the effective date of this Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a dividend reinvestment plan, check the following box:

It is proposed that this filing will become effective (check appropriate box):

When declared effective pursuant to Section 8(c).

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities	Proposed		Proposed	
	Amount Being Registered (1)	Offering Price Per Share	Aggregate Offering Price (2)	Amount of Registration Fee(3)
Shares of Beneficial Interest, \$0.01 par value per share		\$	\$150,000,000	\$17,430
Subscription Rights for Shares				
Total				

- (1) There is being registered hereunder an indeterminate number of shares of beneficial interest and/or subscription rights to purchase shares of beneficial interest to be offered on an immediate, continuous or delayed basis.
- (2) Estimated solely for the purpose of determining the registration fee pursuant to Rule 457(o). In no event will the aggregate offering price of all securities offered from time to time pursuant to this Registration Statement exceed \$150 million.
- (3) Previously paid with respect to initial filing.

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(a) OF THE SECURITIES ACT OF 1933 OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE SECURITIES AND EXCHANGE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(a), MAY DETERMINE.

THE INFORMATION IN THIS PROSPECTUS IS NOT COMPLETE AND MAY BE CHANGED. THE DIVIDEND AND INCOME FUND MAY NOT SELL THESE SECURITIES UNTIL THE REGISTRATION STATEMENT FILED WITH THE SECURITIES AND EXCHANGE COMMISSION IS EFFECTIVE. THIS PROSPECTUS IS NOT AN OFFER TO SELL THESE SECURITIES AND IT IS NOT SOLICITING AN OFFER TO BUY THESE SECURITIES IN ANY JURISDICTION WHERE THE OFFER AND SALE IS NOT PERMITTED.

BASE PROSPECTUS

DIVIDEND AND INCOME FUND

\$150 million

Shares of Beneficial Interest (\$0.01 par value per Share)

Subscription Rights for Shares of Beneficial Interest (\$0.01 par value per Share)

Dividend and Income Fund (the Fund) is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the 1940 Act), as a diversified, closed end management investment company. The Fund's primary investment objective is to seek high current income. Capital appreciation is a secondary objective. The Fund seeks to achieve its objectives by investing, under normal circumstances, at least 50% of its total assets in income generating equity securities, including dividend paying common stocks, convertible securities, preferred stocks, securities of registered investment companies (including, but not limited to, closed end and open end management investment companies, and business development companies) (collectively, investment companies), exchange-traded funds organized as investment companies or otherwise, real estate investment trusts, depositary receipts, and other equity related securities (collectively, Income Generating Equity Securities). The Fund may invest in fixed income securities, including bonds issued by domestic and foreign corporate and government issuers. The Fund may also invest in equity securities of other issuers, including investment companies, exchange-traded funds and real estate investment trusts, deemed by Bexil Advisers LLC, the Fund's investment manager (the Investment Manager), not to be Income Generating Equity Securities based on the issuer's income generation, objectives, policies, holdings, or similar criteria. Securities in which the Fund may invest include high yield, high risk securities which are rated below investment grade (commonly referred to as junk bonds), including the lowest rating categories, or are unrated but are determined by the Investment Manager to be of comparable quality, and are considered speculative and subject to certain risks that may be greater than those of higher rated securities. The Fund has used leverage in the past and is currently using leverage; however, there can be no assurance that the Fund will continue to engage in any leveraging techniques. There is no assurance the Fund will achieve its investment objectives.

The Fund may offer, from time to time, in one or more offerings, including through rights offerings, shares of beneficial interest (Shares), each having a par value of \$0.01 per share. Shares may be offered at prices and on terms to be set forth in one or more supplements to this Prospectus (each a Prospectus Supplement). You should read this Prospectus and the applicable Prospectus Supplement carefully before you invest in Shares of the Fund.

Shares may be offered directly to one or more purchasers, including existing shareholders in a rights offering, through agents designated from time to time by the Fund, or to or through underwriters or dealers. The Prospectus Supplement

Edgar Filing: DIVIDEND & INCOME FUND - Form POS 8C

relating to the offering will identify any agents or underwriters involved in the sale of Fund Shares, and will set forth any applicable purchase price, fee, commission, or discount arrangement between the Fund and its agents or underwriters, or among underwriters, or the basis upon which such amount may be calculated. The Prospectus Supplement relating to any offering of subscription rights will set forth the number of Shares issuable upon the exercise of each right (or number of rights) and the other terms of such rights offering. The Fund may not sell any of its securities directly or through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular offering. Shares of the Fund are listed on the New York Stock Exchange (NYSE) under the symbol DNI. The last reported sale price of Shares, as reported by the NYSE on [], was \$[] per Share. The net asset value (NAV) per Share as of the close of business on [] was \$[].

Table of Contents

Shares of closed end funds often trade at a discount from NAV. This creates a risk of loss for an investor purchasing shares in a public offering at or above NAV.

Investing in Shares of the Fund involves risks. Please see Special Considerations and Risk Factors beginning on page 29 of this Prospectus to learn more about the risks you should carefully consider before investing, including the risks of investing in below investment grade securities and the risks of leverage. Certain of these risks are summarized in Prospectus Summary Risks beginning on page 4 of this Prospectus.

This Prospectus may not be used to consummate sales of Shares by the Fund directly or through agents, underwriters, or dealers unless accompanied by a Prospectus Supplement.

This Prospectus sets forth concisely information you should know before investing. Please read it carefully before investing and keep it for future reference. Additional information about the Fund, including a Statement of Additional Information dated December 13, 2017 (SAI), which SAI is hereby incorporated by reference in its entirety into this Prospectus, has been filed with the Securities and Exchange Commission (SEC). You can review the table of contents for the SAI on page 57 of this Prospectus. You may obtain additional information about the Fund, including its SAI and annual and semi-annual reports, without charge (i) upon request, by calling 1-855-411-6432; (ii) on the Fund's website at <http://www.DividendandIncomeFund.com>; and (iii) on the SEC's website at <http://www.sec.gov>. You may make any other shareholder inquiries by calling the Fund at 1-855-411-6432. The Shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

Neither the SEC nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

PROSPECTUS SUMMARY

*This following information is only a summary. It is not complete and may not contain all of the information that you may want to consider. You should read carefully the more detailed information contained in the Prospectus and any related Prospectus Supplement and in the SAI before purchasing Shares. In particular, you should consider the information set forth under *Special Considerations and Risk Factors* on page 29 of the Prospectus.*

- The Fund:** The Fund is a diversified, closed end management investment company with Shares listed on the NYSE under the symbol DNI. As of October 6, 2017, the Fund had 10,688,250 Shares outstanding. Registered under the 1940 Act, the Fund was incorporated under the laws of the State of Maryland on April 6, 1998 and commenced investment operations on June 29, 1998 under the name Chartwell Dividend and Income Fund, Inc., which was shortened effective February 1, 2011 to Dividend and Income Fund, Inc. On May 14, 2012, the Fund reorganized into a Delaware statutory trust and changed its name to Dividend and Income Fund. See The Fund.
- The Offering:** The Fund's registration statement, allowing it to offer, from time to time, in one or more offerings, including through rights offerings, up to \$150 million of Shares, was declared effective by the SEC on June 30, 2015. On November 2, 2015, the Fund issued \$21,162,983 of Shares pursuant to a rights offering, leaving the Fund with \$128,837,017 of Shares still available to issue. The Shares may be offered at prices and on terms to be set forth in one or more Prospectus Supplements. The offering price per Share will not be less than the NAV per Share at the time of the offering, exclusive of any underwriting commission or discounts, provided that rights offerings may be offered at a price below the then current NAV, subject to certain conditions. You should read this Prospectus and the applicable Prospectus Supplement carefully before you invest in Shares of the Fund. Shares may be offered directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters or dealers. The Prospectus Supplement relating to the offering will identify any agents, underwriters or dealers involved in the sale of Shares, and will set forth any applicable purchase price, fee, commission or discount arrangement between the Fund and its agents or underwriters, or among underwriters, or the basis upon which such amount may be calculated. The Prospectus Supplement relating to any offering of rights will set forth the number of Shares issuable upon the exercise of each right (or number of rights) and the other terms of such rights offering. The Fund may not sell any of its securities directly or through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular offering. See Plan of Distribution. The last reported sale price of Shares, as reported by the NYSE on [], was \$[] per Share. The NAV per Share as of the close of business on [] was \$[].
- Use of Proceeds:** The Fund will use the net proceeds from the offering to invest in accordance with its investment objectives and policies as appropriate investment opportunities are identified, which is expected to substantially be completed within three months; however, changes in market conditions could result in the Fund's anticipated investment period extending to as long as six months. See Use of Proceeds.

Investment Objectives and Policies: The Fund's primary investment objective is to seek high current income. Capital appreciation is a secondary objective. The Fund seeks to achieve its objectives by investing, under normal circumstances, at least 50% of its total assets in income generating equity securities, including dividend paying common stocks, convertible securities, preferred stocks, securities of registered investment companies (including, but not limited to, closed end management investment companies (closed end funds), open end management investment companies (open end funds), and business development companies (BDCs) (collectively, investment companies), exchange-traded funds (ETFs) organized as investment companies or otherwise, real

Table of Contents

estate investment trusts (REITs), depositary receipts, including American Depositary Receipts (ADRs), European Depositary Receipts (EDRs), Global Depositary Receipts (GDRs), and other equity related securities (collectively, Income Generating Equity Securities). The Fund may invest in fixed income securities (Debt Securities), including bonds issued by domestic and foreign corporate and government issuers. The Debt Securities in which the Fund may invest may be structured as fixed rate debt, floating rate debt, and debt that may not pay interest at the time of issuance. The Fund may also invest in equity securities of other issuers, including investment companies, ETFs and REITs, deemed by the Investment Manager not to be Income Generating Equity Securities based on the issuer's income generation, objectives, policies, holdings, or similar criteria. The Fund may invest in securities of domestic or foreign issuers of any size. There is no assurance the Fund will achieve its investment objectives.

The Debt Securities in which the Fund may invest include high yield, high risk securities which are rated below investment grade, including the lowest rating categories, or are unrated but are determined by the Investment Manager to be of comparable quality, and are considered speculative and subject to certain risks that may be greater than those of higher rated securities. Securities rated below investment grade are those rated below Baa by Moody's Investors Service, Inc. (Moody's) or below BBB by S&P Global Ratings (S&P). The Fund normally will not invest more than 50% of its total assets in below investment grade Debt Securities, commonly known as junk bonds. Certain Income Generating Equity Securities in which the Fund may invest, including convertible securities and preferred stocks, may also be rated below investment grade and generally will have characteristics similar to those of lower rated Debt Securities. The Fund will not, however, normally invest in convertible securities rated below C by Moody's or CC by S&P. Such investments are in addition to investments in below investment grade Debt Securities. For a description of the risks associated with an investment in securities rated below investment grade, see Special Considerations and Risk Factors below.

The Fund is permitted to invest in shares of registered investment companies, including money market fund shares, to the extent permitted by the 1940 Act. Investment company shares held by the Fund may be deemed by the Investment Manager to be Income Generating Equity Securities, Debt Securities (such as money market fund shares), or otherwise, depending on the income generation, objectives, policies, holdings, or similar criteria of the investment company. In accordance with the 1940 Act, the Fund normally will be limited in the amount the Fund and its affiliates can invest in any one investment company to 3% of the investment company's total outstanding stock. As a result, the Fund may hold a smaller position in such investment company than if it were not subject to this restriction. To comply with provisions of the 1940 Act, on any matter upon which the Fund is solicited to vote as a shareholder in an investment company in which it invests, the Investment Manager normally seeks to vote such shares in the same general proportion as shares held by other shareholders of that investment company. The Fund does not invest in any investment companies managed by the Investment Manager or its affiliates. Investment companies typically incur advisory fees and other expenses. The Fund, as a shareholder, will indirectly bear *its pro rata* portion of such fees and expenses in addition to the Fund's direct fees and expenses.

In seeking to enhance returns, the Fund may employ leverage to the extent permitted under the 1940 Act. See Use of Leverage below and Investment Objectives, Policies,

and Strategies Leverage. The Fund may also buy and sell put and call options. The Fund may trade securities actively in pursuit of its investment objectives. The Fund also may lend its portfolio securities to brokers, dealers, and other financial institutions.

Table of Contents

The Fund may, from time to time, make temporary investments for defensive purposes that are inconsistent with the Fund's principal investment strategies in attempting to respond to adverse market, economic, political, or other conditions, pending investment of the proceeds of sales of portfolio securities, pending investment of the proceeds from Share offerings, or at other times when suitable investments are not otherwise available. To the extent the Fund takes temporary defensive positions, it may not achieve its investment objectives.

See "Investment Objectives, Policies, and Strategies" in this Prospectus and "Additional Information About the Fund's Investment Program" in the Fund's SAI.

Investment Strategy:

When selecting Income Generating Equity Securities for the Fund, the Investment Manager will normally emphasize primarily those offering high current income and secondarily potential for capital appreciation. In evaluating investments, the Investment Manager will typically apply fundamental investment analysis, which may consider yield, financial strength, profitability, growth potential, and risks, in view of market valuation and relative strength, as well as other considerations, such as market, sector, or industry diversification, to select the Fund's specific portfolio securities. Except for securities related to the U.S. government, at the time a transaction is effected, the Fund will not concentrate its investments in the securities of one or more issuers conducting their principal business activities in the same industry.

When selecting Debt Securities for the Fund, the Investment Manager will usually seek investments that offer a high level of current income consistent with reasonable risk in light of the nature of the investments. Debt Securities under consideration for the Fund's portfolio normally will be analyzed by the Investment Manager based on fundamental factors, including yield, financial and operating strength, and risk, and other considerations, including marketability, relative value characteristics, and general credit trends. The Fund will generally invest in such securities presenting, in the Investment Manager's opinion, the potential for investment returns consistent with the Fund's investment objectives.

The Investment Manager generally considers a variety of factors when determining whether to sell a security in the Fund's portfolio and may sell a security at any time in its discretion. An investment is typically sold when its potential to meet the Fund's investment objectives is deemed by the Investment Manager to be limited or exceeded by another potential investment or when it no longer appears to meet the Fund's investment objectives.

See "Investment Objectives, Policies, and Strategies" - Investment Strategy.

Use of Leverage:

The Fund has used investment leverage in the past and is currently using leverage; however, there can be no assurance that the Fund will continue to engage in any leveraging techniques. The Fund currently has a liquidity agreement (the "Liquidity Agreement") with State Street Bank and Trust Company, the Fund's custodian and securities lending agent, and as of [], had drawn \$[] under the Liquidity Agreement.

The percentage amount of the Fund's leverage outstanding as of [] was []% of its

total assets (including the proceeds of such leverage). The Fund reserves the right to adjust leverage from time to time. Although the Fund's fundamental investment restrictions permit it to borrow money and issue senior securities to the extent permitted under the 1940 Act, the Fund's Liquidity Agreement allows the Fund to draw up to \$35 million currently. Generally, the Fund pledges its assets as collateral to secure its obligations under the Liquidity Agreement. The Fund may also enter into transactions other than those noted above that may give rise to other forms of leverage

Table of Contents

including, among others, derivative transactions, loans of portfolio securities, and when-issued, delayed delivery and forward commitment transactions. These other forms of leverage are not included in the Fund's fundamental restriction discussed above. The Fund may also determine to issue preferred shares to add leverage to its portfolio. See Investment Objectives, Policies, and Strategies Leverage, Special Considerations and Risk Factors Risks of Investing in the Fund Leverage and Borrowing Risk, and Description of the Securities Preferred Shares.

Risks (see generally Special Considerations and Risk Factors for more information on these and other risks):

Market Risk. An investment in the Fund is subject to market risk, including the possible loss of the entire principal amount that you invest. Your investment in Shares represents an indirect investment in the securities owned by the Fund. The value of these securities, like other market investments, may move up or down, sometimes rapidly and unpredictably, and these fluctuations are likely to have a greater impact on the value of the Shares during periods in which the Fund utilizes leverage.

Recent Events. Recent developments in the U.S. and foreign financial markets and other market history suggest that economic, market, and specific investment analysis and forecasting is difficult, often wrong, and that the assumptions of certain conditions cannot be relied on with any certainty. Assumptions regarding the regulation of these markets and the participants therein may change. The U.S. government and certain foreign governments have and may again take unprecedented actions designed to support certain financial institutions or segments of the financial markets. Federal, state, and other governments, their regulatory agencies or self-regulatory organizations may take actions that affect the regulation of the securities in which the Fund invests, or the issuers of such securities in which the Fund invests, in unforeseeable ways that could have a material adverse effect on the Fund's business and operations. Such legislation or regulation could limit or preclude the Fund's ability to achieve its investment objectives. Furthermore, volatile or adverse financial markets can expose the Fund to greater market and liquidity risk and potential difficulty in valuing portfolio instruments held by the Fund.

Equity Securities Risk. Investing in the Fund involves equity securities risk, which is the risk that the equity securities held by the Fund will fall in market value due to adverse market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, and the particular circumstances and performance of particular companies whose securities the Fund holds. The general risks associated with equity securities may be greater for equity securities issued by companies with smaller market capitalizations as these companies may have limited product lines, markets, or financial resources or may depend on a few key employees.

Common Stock Risk. Although common stocks can generate higher average returns than debt and other equity securities, common stocks can also experience more volatility in those returns. An adverse event, such as an unfavorable earnings report, may depress the value of a particular common stock held by the Fund. Also, the prices of common stocks are sensitive to general movements in the stock market. A drop in the stock market may depress the price of common stocks held by the Fund or to which the Fund has exposure. In the event of a company's liquidation, the holders of its common stock have rights to its assets only after bondholders, other debt holders, and preferred shareholders have been satisfied.

Credit Risk. Because the Fund may invest in bonds and other debt securities with credit risk, investing in the Fund involves credit risk, which is the risk that an issuer of bonds and other debt securities will be unable to pay interest or principal when due. The prices of bonds and other debt securities are affected by the credit risk and quality of the issuer. Below investment grade debt securities normally are lower quality and

Table of Contents

have greater credit risk because the companies that issue them typically are not as financially strong as companies that issue higher quality, investment grade debt securities. Changes in the financial condition of an issuer, general economic conditions, and specific economic conditions that affect a particular type of issuer can impact the credit quality of an issuer. Such changes may weaken an issuer's ability to make payments of principal or interest, or cause an issuer to fail to make timely payments of interest or principal. The downgrade of a security may further decrease its value, although a grade rating by a rating agency only represents the service's opinion as to the general credit quality of the security being rated and is not an absolute standard of quality or guarantee as to the creditworthiness of an issuer. Lower quality debt securities generally tend to be more sensitive to these changes than higher quality debt securities, but the lowest rating category of investment grade securities may have speculative characteristics as well. See *Additional Risks of Certain Securities – Below Investment Grade Securities Risks* below. Credit risk also applies to securities issued by the U.S. government's agencies and instrumentalities that are not backed by the U.S. government's full faith and credit. Although securities backed by the full faith and credit of the U.S. government are generally considered to present minimal credit risk, credit risk may also apply to these securities.

Interest Rate Risk. Generally, when market interest rates rise, the prices of debt obligations fall, and vice versa. Interest rate risk is the risk that debt obligations and other instruments in the Fund's portfolio will decline in value because of increases in market interest rates. This risk may be particularly acute because market interest rates are currently near historically low levels. The prices of long-term debt obligations generally fluctuate more than prices of short-term debt obligations as interest rates change. The Fund's use of leverage will tend to increase interest rate risk.

Prepayment and Extension Risk. If interest rates fall, the principal on the debt securities held by the Fund may be paid earlier than expected. If this happens, the proceeds from a prepaid security may be reinvested by the Fund in securities bearing lower interest rates, resulting in a possible decline in the Fund's income and distributions to shareholders. Alternatively, the Fund is subject to the risk that an issuer will exercise its right to pay principal on an obligation held by that Fund later than expected. This may happen when there is a rise in interest rates. These events may lengthen the duration (*i.e.*, interest rate sensitivity) and potentially reduce the value of these securities.

Corporate Bonds Risk. Investments in corporate bonds are subject to a number of the risks described in this Prospectus, including credit risk, interest rate risk, prepayment and extension risk, inflation/deflation risk, below investment grade securities risk, foreign securities risk, illiquid and restricted securities risk, management risk, valuation risk, and similar risks.

Leverage and Borrowing Risk. Borrowing for investment purposes creates an opportunity for increased return but, at the same time, involves special risk considerations. Borrowing increases the likelihood of greater volatility of the NAV and market price of the Shares. If the total return that the Fund earns on the additional securities purchased fails to cover the costs it incurs on the monies borrowed, the NAV of the Fund (and the return of the Fund) would be lower than if borrowing had not been incurred. In addition, when the Fund borrows at a variable interest rate, there is a risk

that fluctuations in the interest rate may adversely affect the return to the Fund's shareholders. Interest payments and fees incurred in connection with such borrowings may reduce the amount of net income available for distribution to shareholders if the income that the Fund earns on the additional securities purchased is less than such payments and fees. There is no assurance that a borrowing strategy will

Table of Contents

be successful during any period in which it is employed. Borrowing on a secured basis results in certain additional risks. Should securities that are pledged as collateral to secure the loan decline in value, the Fund may be required to pledge additional assets in the form of cash or securities to the lender to avoid liquidation of the pledged assets. In the event of a steep drop in the value of pledged securities, it might not be possible to liquidate assets quickly enough and this could result in mandatory liquidation of the pledged assets in a declining market at relatively low prices. Furthermore, the Investment Manager's ability to sell the pledged securities is limited by the terms of the Liquidity Agreement, which may reduce the Fund's investment flexibility over the pledged securities. The rights of the lender to receive payments of interest on and repayments of principal will be senior to the rights of the Fund's shareholders.

Inflation/Deflation Risk. Inflation risk is the risk that the value of assets or income from the Fund's investments will be worth less in the future as inflation decreases the present value of fixed payments at future dates. Deflation risk is the risk that prices throughout the economy may decline over time – the opposite of inflation. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of the Fund's portfolio.

Below Investment Grade Securities Risk. Below investment grade securities are commonly referred to as "junk bonds." Below investment grade securities are regarded as being predominantly speculative as to the issuer's ability to make payments of principal and interest. The risks associated with acquiring the securities of such issuers generally are greater than is the case with higher rated securities. For example, during an economic downturn or a sustained period of rising interest rates, issuers of below investment grade securities may be more likely to experience financial stress, especially if such issuers are highly leveraged. During periods of economic downturn, such issuers may not have sufficient revenues to meet their interest payment obligations. The issuer's ability to service its debt obligations also may be adversely affected by specific issuer developments, the issuer's inability to meet specific projected business forecasts, or the unavailability of additional financing. Therefore, there can be no assurance that in the future there will not exist a higher default rate relative to the rates currently existing in the market for below investment grade securities. The risk of loss due to default by the issuer is significantly greater for the holders of below investment grade securities because such securities may be unsecured and may be subordinate to other creditors of the issuer. Below investment grade securities have been in the past, and may again in the future be, more volatile and less liquid than higher rated fixed income securities, so that adverse economic events may have a greater impact on the prices of below investment grade securities than on higher rated fixed income securities.

Options Risks. There are several risks associated with transactions in options on securities, as follows:

There are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives.

As the writer of a covered call option, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline.

Table of Contents

The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it may not be able to effect a closing purchase transaction in order to terminate its obligation under the option and must then deliver the underlying security at the exercise price.

There can be no assurance that a liquid market will exist when the Fund seeks to close out an option position. If the Fund were unable to close out a covered call option that it had written on a security, it would not be able to sell the underlying security unless the option expired without exercise.

The hours of trading for options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that cannot be reflected in the options markets.

The value of call options will be affected by changes in the value and dividend rates of the underlying securities, an increase in interest rates, changes in the actual or perceived volatility of the stock market and the underlying securities and the remaining time to the options' expiration. Additionally, the exercise price of an option may be adjusted downward before the option's expiration as a result of the occurrence of events affecting the underlying security. A reduction in the exercise price of an option would reduce the Fund's capital appreciation potential on the underlying security.

If a call option purchased by the Fund is not sold when it has remaining value, and if the market price of the underlying security remains equal to or less than the exercise price, the Fund will lose its entire investment in the option.

If a put option purchased by the Fund is not sold when it has remaining value, and if the market price of the underlying security remains equal to or greater than the exercise price, the Fund will lose its entire investment in the option.

Real Estate Investment Trusts Risks. REITs pool investors' capital to purchase or finance real estate. The market value of REIT shares and the ability of REITs to distribute income may be adversely affected by numerous factors, including rising interest rates, changes in the national, state and local economic climate and real estate conditions, perceptions of prospective tenants of the safety, convenience, and attractiveness of the properties, the ability of the owners to provide adequate management, maintenance, and

insurance, the cost of complying with the Americans with Disabilities Act, increasing competition and compliance with environmental laws, changes in real estate taxes and other operating expenses, adverse changes in governmental rules and fiscal policies, adverse changes in zoning laws, and other factors beyond the control of the issuers. In addition, distributions received by the Fund from REITs may be attributable to net investment income, net realized capital gains, and/or returns of capital. Dividends paid by REITs generally do not qualify for the reduced federal income tax rates applicable to qualified dividend income under the Internal Revenue Code of 1986, as amended (the Code). See Tax Considerations in the SAI. REITs are subject to interest rate risk and prepayment risk. Changes in prevailing interest rates affect not only the value of REIT shares but may impact the market value of the REIT's holdings of real estate and real estate related securities. Investing in REITs also involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. REITs are dependent upon the skills of their managers and are not diversified by industry. REITs are generally dependent upon maintaining cash flows to repay borrowings and to make distributions to shareholders and are subject to the risk of default by lessees or borrowers. REITs may have limited financial resources and may trade less frequently and in a more limited volume, and may be subject to more abrupt or erratic price movements than larger company securities.

Table of Contents

Securities of Other Investment Companies Risks. An investment in shares of other investment companies involves substantially the same risks as investing directly in the underlying instruments that such investment companies hold and the risk that the price of the shares of the investment company can fluctuate up or down. There can be no assurance that the investment objective of any investment company in which the Fund invests will be achieved. Consequently, the Fund could lose money investing in another investment company if the prices of the securities owned by the investment company decline in value. Investment companies typically incur advisory fees and other expenses. The Fund, as a shareholder, will indirectly bear its *pro rata* portion of such fees and expenses in addition to the Fund's direct fees and expenses, so shareholders of the Fund will be subject to duplication of fees on investments by the Fund in other investment companies.

In addition, closed end funds, ETFs, and BDCs in which the Fund may invest are subject to the following risks that do not apply to open end funds: (i) market price of shares may trade above or below their NAV; (ii) an active trading market for shares may not develop or be maintained; and (iii) trading of shares may be halted. In the case of leveraged closed end funds, their share price and NAV may fluctuate to a greater extent and be more volatile than un-leveraged closed end funds.

Business Development Companies Risk. Because BDCs typically invest in small and medium-sized companies, a BDC's portfolio is subject to the risks inherent in investing in smaller companies, including that portfolio companies may be dependent on a small number of products or services and may be more adversely affected by poor economic or market conditions. Some BDCs invest substantially, or even exclusively, in one sector or industry group and therefore the BDC may be susceptible to adverse conditions and economic or regulatory occurrences affecting the sector or industry group, which tends to increase volatility and result in higher risk. Investments in BDCs are also subject to management risk, including management's ability to meet the BDC's investment objective, and to manage the BDC's portfolio during periods of market turmoil and as investor's perceptions regarding a BDC or its underlying investments change.

Securities of Small and Mid-Capitalization Companies Risks. The Fund may invest in small or mid-sized companies (generally a market capitalization of \$5 billion or less). Accordingly, the Fund may be subject to the additional risks associated with investment in these companies. The market prices of the securities of such companies tend to be more volatile than those of larger companies. Further, these securities tend to trade at a lower volume than those of larger companies. If the Fund is heavily invested in these securities and the value of these securities declines, the Fund may be susceptible to significant losses.

Table of Contents

Preferred Stock Risks. In addition to equity securities risk and possibly below investment grade securities risk, investment in preferred stocks involves certain other risks. Certain preferred stocks contain provisions that allow an issuer under certain conditions to skip or defer distributions. Preferred stocks often are subject to legal provisions that allow for redemption in the event of certain tax or legal changes or at the issuer's call. In the event of redemption, the Fund may not be able to reinvest the proceeds at comparable rates of return. Preferred stocks are subordinated to bonds and other debt securities in an issuer's capital structure in terms of priority for corporate income and liquidation payments, and therefore will be subject to greater credit risk than those debt securities. Preferred stocks may trade less frequently and in a more limited volume and may be subject to more abrupt or erratic price movements than many other securities, such as common stocks and debt securities of corporate and government issuers.

Foreign Securities Risks. The Fund may invest in securities of issuers domiciled outside the United States. Investing in the securities of foreign issuers may involve additional risks and considerations that are not typically associated with investing in the securities of U.S. issuers. Since the securities of foreign issuers are normally denominated in foreign currencies, the Fund may be affected favorably or unfavorably by changes in currency rates and in exchange control regulations, and may incur costs in connection with conversions between various currencies. As foreign issuers are not generally subject to accounting, auditing, tax, and financial reporting standards and practices comparable to those applicable to U.S. issuers, comparable information may not be readily available about certain foreign issuers. Some securities of foreign issuers may be less liquid and more volatile than securities of comparable U.S. issuers. In addition, in certain foreign countries, there is the possibility of expropriation or confiscatory taxation, political, or social instability, or diplomatic developments that could affect U.S. investments in the securities of issuers domiciled in those countries.

U.S. Government Securities Risks. Historically, U.S. government securities have not been perceived to involve the general credit risks associated with investments in other types of debt securities and, as a result, the yields available from U.S. government securities are generally lower than the yields available from other debt securities. Like other debt securities, however, the values of U.S. government securities change as interest rates fluctuate. Fluctuations in the value of portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund's NAV.

Illiquid and Restricted Securities Risks. Liquidity relates to the time in which the Fund reasonably expects an investment would be convertible to cash in current market conditions without significantly changing the market value of the investment. An illiquid investment is an investment that the Fund reasonably expects cannot be sold in current market conditions in seven calendar days without significantly changing the market value of the investment. The relative illiquidity of some of the Fund's portfolio securities may adversely affect the ability of the Fund to dispose of such securities in a timely manner and at a fair price at times when it might be necessary or advantageous for the Fund to liquidate portfolio securities. The market for less liquid securities tends to be more volatile than the market for more liquid securities and market values of relatively illiquid securities may be more susceptible to change as a result of adverse publicity and investor perceptions than are the market values of more liquid securities. Restricted

securities have contractual or legal restrictions on resale to the general public or certain institutions, which may make it more difficult to value them, limit the Fund's ability to dispose of them, and lower the amount the Fund could realize upon their sale.

Table of Contents

Counterparty Risk. The Fund will be subject to credit and performance risk with respect to the counterparties to an options contract, repurchase agreement, loan of portfolio securities, or other future obligation. While the Fund does not employ specific creditworthiness standards when selecting counterparties, it seeks to engage in transactions with creditworthy and otherwise dependable counterparties. Certain entities that have served as counterparties have incurred significant losses and financial hardships, including bankruptcy, which may reduce their creditworthiness and willingness or ability to perform their counterparty obligations. There can be no assurance that the Fund's counterparties will not experience similar difficulties, possibly resulting in losses to the Fund. The Fund has no limit on the amount of assets it may subject to any one counterparty.

Master Limited Partnership Risk. Limited partners in a master limited partnership (MLP) typically have limited control and limited rights to vote on matters affecting the partnership. There also are certain tax risks associated with the MLPs in which the Fund may invest, including the possibility that the Internal Revenue Service (IRS) could challenge the federal income tax treatment of the MLPs in which the Fund invests. The tax risks of investing in an MLP are generally those inherent in investing in a partnership as compared to a corporation. Since cash distributions received by the Fund from an MLP may not correspond to the amount of income allocated to the Fund by the MLP in any given taxable year, the Fund may have to dispose of its portfolio investments under disadvantageous circumstances in order to generate sufficient cash to satisfy the distribution requirements for maintaining the Fund's status as a RIC and avoiding any income and excise taxes at the Fund level. If an MLP in which the Fund invests fails to qualify as a qualified publicly traded partnership, as defined in the Code (and is not otherwise taxed as a corporation), income generated by such an MLP may not constitute good income and may thus jeopardize the Fund's status as a RIC for federal income tax purposes. MLPs may also be subject to state taxes in some jurisdictions. These tax risks, and any adverse determination with respect thereto, could have a negative impact on the after-tax income available for distribution by the MLPs and the value of the Fund's investments in an MLP.

Market Discount from Net Asset Value. Shares of closed end funds frequently trade at a discount from their NAV. This characteristic is a risk separate and distinct from the risk that the Fund's NAV has in the past, and therefore could in the future, decrease as a result of its investment activities. Neither the Investment Manager nor the Fund can predict whether Shares will trade at, below or above NAV. The risk of holding Shares that might trade at a discount is more pronounced for investors expecting to sell their Shares in a relatively short period of time after acquiring them because, for those investors, realization of a gain or loss on their investments is likely to be more dependent upon the existence of a premium or discount than upon portfolio performance. The Shares are designed primarily for long term investors and should not be considered a vehicle for trading purposes. The NAV of the Shares will fluctuate with price changes of the Fund's portfolio securities, and these fluctuations are likely to be greater in the case of a fund which uses leverage, such as the Fund.

Distribution Policy Risk. The Fund makes quarterly dividend payments or other distributions to its shareholders that reflect its distribution policy to provide shareholders with a relatively stable cash flow per share, although the dividend amount per share was adjusted lower in 2016 and 2017 from prior periods. The distribution policy and amount per share may be changed or discontinued without notice. Such distributions do not match the Fund's investment income and capital gains and do not represent yield or investment return. The distributions are paid from net investment income and any net capital gains, with the balance representing return of capital.

Table of Contents

A return of capital will generally not be taxable, but will reduce each shareholder's cost basis in Fund shares (but not below zero) and will result in a higher reported capital gain or lower reported capital loss when those shares on which the distributions were received are ultimately sold. Any return of capital in excess of a shareholder's basis, however, is taxable as a capital gain. A substantial portion of the Fund's annual distributions have historically consisted of returns of capital. Even though the Fund may realize current year capital gains, such gains may be offset, in whole or in part, by the Fund's capital loss carryovers from prior years. Capital losses incurred in taxable years beginning after December 22, 2010, are allowed to be carried forward indefinitely and retain the character of the original loss. As a transition rule, post-enactment net capital losses are required to be utilized before pre-enactment net capital losses. The Fund has a net capital loss carryover as of December 31, 2016 of \$1,442,265 which expires in 2018. Pursuant to the 1940 Act and other applicable laws, a notice normally will accompany each distribution estimating the source(s) of the distribution when it is from a source other than the Fund's accumulated undistributed net income or net income for the current or preceding fiscal year. The actual determination of the source of the Fund's distributions can be made only after year end.

The distribution policy may, under certain circumstances, have certain adverse consequences to the Fund and its shareholders. If the Fund's investments do not generate sufficient income, the Fund may be required to liquidate a portion of its portfolio to fund these distributions at a time when it would otherwise not do so. If the Fund distributes amounts in excess of its net investment income and realized net capital gains, such distributions will decrease the Fund's capital and, therefore, have the potential effect of increasing the Fund's expense ratio. In addition, the maintenance of the Fund's distribution policy may cause the Fund's assets to be less fully invested than would otherwise be the case, which could reduce the Fund's total investment return. Furthermore, the Fund may need to raise additional capital in order to maintain the distribution policy.

Securities Lending Risk. Securities lending involves possible delay in recovery or loss of the lent securities or possible loss of rights in the lent securities or collateral or both should the borrower fail to perform due to financial inability or otherwise. As a result, the value of the Shares may fall. The value of the Shares could also fall if a loan is called and the Fund is required to liquidate collateral at a loss or if the Investment Manager is unable to invest cash collateral at rates which exceed the costs involved.

Management Risk. The Fund is subject to management risk because it is an actively managed investment portfolio. The Investment Manager will seek to achieve the investment objectives of the Fund, but there can be no guarantee that it will be successful. Moreover, the Fund may, from time to time, make temporary investments for defensive purposes that are inconsistent with the Fund's principal investment strategies in attempting to respond to adverse market, economic, political, or other conditions, pending investment of the proceeds of sales of portfolio securities, pending investment of the proceeds from Share offerings, or at other times when suitable investments are not otherwise available. To the extent the Fund takes temporary defensive positions, it may

not achieve its investment objectives.

Valuation Risk. The Fund may invest in securities and other assets for which market quotations are not readily available or reliable. For example, unlike most publicly traded common stocks which trade on national exchanges, bonds generally do not trade on national exchanges but rather trade in the over-the-counter markets. These markets often may not provide readily available or reliable market quotations and consequently the valuation of bonds may carry more risk than that of publicly traded

Table of Contents

common stock. Securities for which market quotations are not readily available or reliable and other assets may be valued as determined in good faith by the Investment Manager under the direction of or pursuant to procedures approved by the Fund's Board of Trustees (the Board). Certain securities may be priced through pricing services that may utilize a matrix pricing system which takes into consideration factors such as yields, prices, maturities, call features, and ratings on comparable securities or according to prices quoted by a securities dealer that offers pricing services. Uncertainties in the conditions of the financial market, unreliable reference data, lack of transparency, and inconsistency of valuation models and processes may lead to inaccurate asset pricing. Due to the inherent uncertainty of valuation, such fair value pricing values may differ from the values that would have been used had a readily available market for the securities existed. These differences in valuation could be material. A security's valuation may differ depending on the method used for determining value. The use of fair value pricing by the Fund may cause the NAV of its shares to differ from the NAV that would be calculated using market prices. A fair value price is an estimate and there is no assurance that such price will be at or close to the price at which a security is next quoted or next trades.

Cybersecurity Risk. With the increased use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. Cyber incidents affecting the Fund or its service providers may cause disruption and impact business operations, potentially resulting in financial losses, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional related costs.

Anti-Takeover Provisions. The Fund has certain provisions in its Amended and Restated Agreement and Declaration of Trust (Declaration of Trust) and Bylaws (together with the Declaration of Trust, the Governing Documents) that may be regarded as anti-takeover provisions. These provisions could have the effect of limiting (i) the ability of other entities or persons to acquire control of the Fund; (ii) the Fund's freedom to engage in certain transactions; (iii) the ability of the Board or shareholders to amend the Governing Documents or effectuate changes in the Fund's management; or (iv) the ability of the Fund's shareholders to make derivative claims against the Fund. The overall effect of these provisions is to render more difficult the accomplishment of a merger with, or the assumption of control by, a shareholder, or the conversion of the Fund to open end status. These provisions may have the effect of depriving Fund shareholders of an opportunity to sell their Shares at a premium above the prevailing market price by discouraging a third party from seeking to obtain control of the Fund. See Description of the Securities Certain Anti-Takeover Provisions in the Governing Documents.

Status as a Regulated
Investment Company:

The Fund intends to continue to qualify for treatment as a regulated investment company (as defined in section 851(a) of the Code) (RIC) under the Code. Qualification requires, among other things, compliance by the Fund with certain distribution requirements. See Tax Considerations in the SAI.

Investment Manager:

Bexil Advisers LLC acts as the Fund's Investment Manager pursuant to an investment management agreement (the Investment Management Agreement) between the Investment Manager and the Fund. Under the terms of the Investment Management

Agreement, the Fund pays the Investment Manager a fee at an annual rate of 0.95% of the Fund's managed assets and reimburses the Investment Manager for certain costs. Because the Investment Manager receives a fee based on the Fund's assets, the Investment Manager will benefit from any increase in assets that results from the offering of Shares. Thomas B. Winmill and William M. Winmill are co-portfolio managers of the Fund. Mr. Thomas B. Winmill currently serves as President, Chief

Table of Contents

Executive Officer, Chief Legal Officer, and a Trustee or Director of the Fund, Foxby Corp., and Midas Series Trust. He is President, Chief Executive Officer, and Chief Legal Officer of the Investment Manager and Midas Management Corporation (registered investment advisers) (the Advisers), Bexil Securities LLC and Midas Securities Group, Inc. (registered broker-dealers), Bexil Corporation, Bexil American Mortgage Inc., and Winmill & Co. Incorporated. He is a Director of Global Self Storage, Inc. He is Chairman of the Investment Policy Committee of each of the Advisers, and he is also a portfolio manager of Midas Fund, Midas Magic, and Foxby Corp. Mr. William M. Winmill currently also serves as co-portfolio manager of Foxby Corp., Vice President of the Fund, Foxby Corp., and Midas Series Trust, and Vice President and Investment Analyst of the Advisers and Vice President or Assistant Vice President of Bexil Corporation, Global Self Storage, Inc., Tuxis Corporation, Winmill & Co. Incorporated, and certain of their subsidiaries. From February 1, 2011 through February 28, 2014, the daily portfolio management of the Fund was provided by the Investment Policy Committee of the Investment Manager, of which Thomas B. Winmill was a member. Effective March 1, 2014, Thomas B. Winmill assumed sole portfolio management responsibility for the Fund. William M. Winmill became a co-portfolio manager of the Fund effective September 1, 2017.

Pursuant to the Investment Management Agreement, the Fund reimburses the Investment Manager for providing at cost certain administrative services including compliance and accounting services. See Management of the Fund The Investment Manager.

Share Repurchases and
Tender Offers:

The Board has determined that it normally is in the best interests of the Fund and its shareholders to increase the assets of the Fund, and that (i) increased assets permit the Fund to be in a better position to more fully take advantage of investment opportunities that may arise and seek to enhance the Fund's future returns; (ii) a larger number of outstanding Shares could increase the level of market interest in and visibility of the Fund and improve the trading liquidity of the Fund's Shares; and (iii) the increase in assets may result in a lower expense ratio for the Fund by spreading the Fund's fixed costs over a larger asset base. Accordingly, no assurance can be given that the Board would authorize actions that would decrease the assets of the Fund, such as share repurchases and tender offers. Under certain circumstances, a shareholder vote may be required to authorize such actions. See Description of the Securities Share Repurchases and Tender Offers.

Distribution Policy:

The Fund makes quarterly dividend payments or other distributions to its shareholders that reflect its distribution policy to provide shareholders with a relatively stable cash flow per share. The dividend amount per share was adjusted lower in 2016 and 2017 to more closely reflect the net income generated by the Fund's investments, the current market price and net asset value of the Fund's shares, the total distribution amount relative to the Fund's net assets, and related matters. The distribution policy and amount per share may be changed or discontinued without notice. The distributions are paid from net investment income and any net capital gains, with the balance representing return of capital. If, for any distribution, the sum of previously undistributed net

investment income and net realized capital gains is less than the amount of the distribution, the difference, i.e., the return of capital, will be charged against the Fund's capital. The Fund's distributions do not match its net investment income and net realized capital gains and do not represent yield or investment return. The Fund's final distribution for each calendar year may include remaining net investment income and net capital gains otherwise undistributed during the year. See "Tax Considerations" in the SAI.

Table of Contents

If, for any taxable year of the Fund (which ends on December 31), the total distributions exceed the sum of the Fund's net investment income and net realized short and long term capital gains, the excess will generally be treated first as ordinary dividend income (up to the amount, if any, of the Fund's current and accumulated earnings and profits, which takes into account taxable distributions) and then as a return of capital (tax-free for a shareholder up to the amount of its tax basis in its Shares). The amount treated as a tax-free return of capital will reduce a shareholder's adjusted basis in its Shares, thereby increasing the shareholder's potential gain or reducing its potential loss on the subsequent sale of those Shares. Any return of capital in excess of a shareholder's basis is taxable as a capital gain. A substantial portion of the Fund's annual distributions have historically consisted of returns of capital. This distribution policy may, under certain circumstances, have certain adverse consequences to the Fund and its shareholders. Under the 1940 Act, the Fund may not declare any dividend or other distribution upon any capital Shares, or purchase any such capital Shares, unless the aggregate indebtedness of the Fund has, at the time of the declaration of any such dividend or other distribution or at the time of any such purchase, an asset coverage of at least 300% after deducting the amount of such dividend, other distribution, or purchase price, as the case may be. In addition, certain lenders may impose additional restrictions on the payment of dividends or other distributions on the Shares in the event of a default on the Fund's borrowings. Any limitation on the Fund's ability to make distributions to the holders of its Shares could, under certain circumstances, impair its ability to maintain its qualification for taxation as a RIC. See "Distribution Policy" in this Prospectus and "Tax Considerations" in the SAI.

Dividend Reinvestment Plan:	The Fund has a Dividend Reinvestment Plan. Under the plan, all dividends and other distributions are automatically reinvested in additional Shares unless a shareholder elects to receive them in cash. See "Dividend Reinvestment Plan."
Custodian and Transfer Agent:	State Street Bank and Trust Company acts as custodian of the Fund's investments and may appoint one or more sub-custodians. The custodian is responsible for the safekeeping of Fund assets and, with its affiliates, may act as a securities lending and borrowing agent and a securities broker for portfolio transactions by the Fund. American Stock Transfer & Trust Company, LLC acts as the Fund's transfer and dividend disbursing agent.

FEES AND EXPENSES

The following table contains information about the costs and expenses that shareholders will bear directly or indirectly. The table is based on management fees, interest, and other expenses incurred during the Fund's fiscal year ended December 31, 2016, [as adjusted for higher expenses accrued in 2017] and after giving effect to the offer and sale of \$150 million of Shares. The purpose of the table and the example below is to help you understand the fees and expenses that you, as a holder of Shares, would bear directly or indirectly.

Shareholder Transaction Expenses

Sales Load (as a percentage of offering price) ⁽¹⁾	N/A
Offering Expenses (as a percentage of offering price) ⁽²⁾	[]%
Dividend Reinvestment Plan Fees ⁽³⁾	None

Edgar Filing: DIVIDEND & INCOME FUND - Form POS 8C

Annual Expenses (as a percentage of net assets attributable to Shares)	
Management Fees ⁽⁴⁾	[]%
Interest Payments on Borrowed Funds ⁽⁵⁾	[]%
Acquired Fund Fees and Expenses	0.04%
Other Expenses ⁽⁶⁾	[]%
Total Annual Fund Operating Expenses ⁽⁷⁾	[]%

- (1) Not available at this time. Should a sales load apply with respect to a particular offering of Shares, the applicable Prospectus Supplement will disclose the amount of any such sales load.

Table of Contents

- (2) Estimated maximum amount based on offering \$150 million in Shares (\$150 million in Shares is used here because this is the total value of Shares being registered under the registration statement of which this Prospectus is a part). The actual amounts in connection with any offering will be set forth in the Prospectus Supplement if applicable.
- (3) See Dividend Reinvestment Plan.
- (4) The Fund pays a management fee to the Investment Manager at an annual rate of 0.95% of the Fund's managed assets. Managed assets means the average weekly value of the Fund's total assets minus the sum of the Fund's liabilities, which liabilities exclude debt relating to leverage, short-term debt and the aggregate liquidation preference of any outstanding preferred stock (financial leverage). In accordance with the requirements of the SEC, the table above shows the Fund's management fee as a percentage of average net assets. In calculating the management fee rate based on net assets, the Fund derived the amount of management fees based upon outstanding financial leverage of []% of the Fund's managed assets (which is the average level of financial leverage employed during the Fund's fiscal year ended December 31, 2016). If financial leverage of more than []% is used, the management fee shown would be higher.
- (5) Based upon the Fund's outstanding borrowings as of December 31, 2016 of approximately \$[] million and a borrowing rate under the Liquidity Agreement as of December 31, 2016 of []%.
- (6) Other Expenses are based upon those expenses incurred during the fiscal year ended December 31, 2016.
- (7) Total Annual Fund Operating Expenses for the fiscal year ended December 31, 2016 were []%. [The []% figure set forth in the table above results from 2016 Fund expenses as adjusted for higher expenses accrued in 2017 being spread over a larger net asset base as a result of the assumed sale of \$[] of Shares.]

Example

The following example illustrates the expenses that you would pay on a \$1,000 investment in Shares, assuming (1) a 5% annual return, (2) total annual operating expenses of []%, (3) offering expenses of []%, and (4) reinvestment of all dividends and other distributions at NAV. The actual expenses in connection with any offering will be set forth in the Prospectus Supplement if applicable.

1 Year	3 Years	5 Years	10 Years
\$[]	\$[]	\$[]	\$[]

The purpose of the table and example above is to help you understand the various costs and expenses that an investor in the Fund may bear directly or indirectly. **The example should not be considered a representation of future expenses. The Fund's actual expenses may be more or less than those shown and the Fund's actual rate of return will vary and may be higher or lower than the hypothetical 5% annual return used to calculate the example.**

Table of Contents**FINANCIAL HIGHLIGHTS**

The table below sets forth certain specified information for a Share outstanding throughout each period presented. This information is derived from the financial and accounting records of the Fund. The financial highlights for the fiscal years ended December 31, 2012 through December 31, 2016, the one month ended December 31, 2011, and the year ended November 30, 2011 have been audited by Tait, Weller & Baker LLP, an independent registered public accounting firm. The prior financial highlights for the fiscal years ended November 30, 2007 through November 30, 2010 were audited by other independent registered public accounting firms, whose reports with respect to those periods were unqualified. Information for the six-month period ended June 30, 2017 has not been audited. The information below should be read in conjunction with (i) the Fund's audited financial statements and the accompanying notes thereto for the fiscal year ended December 31, 2016, which, together with the report of the Fund's independent registered public accounting firm, have been incorporated by reference in the SAI, and (ii) the Fund's Semi-Annual Report for the six-month period ended June 30, 2017, which is also incorporated by reference in the SAI. The Annual and Semi-Annual Reports are available without charge by calling toll-free at 1-855-411-6432.

Bexil Advisers LLC became the Fund's Investment Manager effective February 1, 2011.

Per share data, including the proportionate impact to market price, has been restated to reflect the effects of a 1-for-4 reverse stock split effective as of the start of trading on the NYSE on December 10, 2012.

(1) Unaudited.

(2) The Fund changed its fiscal year from November 30 to December 31, effective December 31, 2011.

(3) The per share amounts were calculated using the average number of Shares outstanding during the period.

(4) The Fund implemented a 1-for-4 reverse stock split with an ex-dividend date of December 10, 2012. Prior period net asset values and per share amounts have been restated to reflect the impact of the reverse stock split. The net asset value and market price report at the original dates prior to the reverse stock split were as follows:

Table of Contents

	For the Years Ended November 30,					
	One Month Ended					
	Dec 31,					
	2011⁽²⁾	2011	2010	2009	2008	2007
Net asset value	\$ 3.87	\$ 4.22	\$ 4.34	\$ 4.19	\$ 3.67	\$ 8.16
Market value	\$ 3.43	\$ 3.46	\$ 4.23	\$ 3.65	\$ 2.60	\$ 7.35

- (5) Total return on a market value basis is calculated assuming a purchase of Shares on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Generally, total return on a net asset value basis will be higher than total return on a market value basis in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total return on a net asset value basis will be lower than total return on a market value basis in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total return calculated for a period of less than one year is not annualized. The calculation does not reflect brokerage commissions, if any.
- (6) Expenses and income ratios do not include expenses incurred by the acquired funds in which the Fund invests.
- (7) Total expenses are the expenses of the Fund as presented in the Statement of Operations before fee waivers and expense reductions.
- (8) The ratio of total expenses excluding interest expense and fees incurred from the use of leverage to average net assets was 1.43%** for the six months ended June 30, 2017 and 1.46%, 1.51%, 1.47%, 1.72% and 2.30% for the years ended December 31, 2016, 2015, 2014, 2013 and 2012, respectively.
- (9) Net expenses are the expenses of the Fund presented in the Statement of Operations after fee waivers and expense reductions.
- (10) Effective July 28, 2016, the Fund replaced its prior bank credit facility with the Liquidity Agreement.
- (11) Effective April 26, 2010, the Fund replaced its commercial paper program with a bank credit facility.
- (12) Represents the value of total assets less liabilities not represented by senior securities representing indebtedness divided by the total number of senior indebtedness units, where one unit equals \$1,000 of senior indebtedness. For purposes of this calculation, the bank credit facility/Liquidity Agreement is considered a senior security representing indebtedness.

* Less than \$0.01 per share.

** Annualized.

N/A means not applicable.

USE OF PROCEEDS

The Investment Manager expects that it will initially invest the proceeds of any offering by reducing borrowings, if any, and the balance in high quality short-term debt securities, money market fund shares, or similar securities. The Investment Manager anticipates that the investment of the proceeds will be made in accordance with the Fund's investment objectives and policies as appropriate investment opportunities are identified, which is expected to substantially be completed within three months; however, changes in market conditions could result in the Fund's anticipated investment period extending to as long as six months. Depending on market conditions and operations, a portion of the cash held by Fund, including any proceeds raised from an offering, may be used to pay distributions in accordance with the Fund's distribution policy. The Fund does not currently anticipate an increase in leverage immediately following the completion of any Share offerings; however, the Fund reserves the right to adjust leverage from time to time. See "Investment Objectives, Policies, and Strategies" - Leverage.

THE FUND

The Fund is a diversified, closed end management investment company with Shares listed on the NYSE under the symbol DNI. As of October 6, 2017, the Fund had 10,688,250 Shares outstanding. Registered under the 1940 Act, the Fund was incorporated under the laws of the State of Maryland on April 6, 1998 and commenced investment operations on June 29, 1998 under the name Chartwell Dividend and Income Fund, Inc., which was shortened effective February 1, 2011 to Dividend and Income Fund, Inc. On May 14, 2012, the Fund reorganized into a Delaware statutory trust and changed its name to Dividend and Income Fund. The Fund's principal office is located at 11 Hanover Square, New York, New York 10005.

INVESTMENT OBJECTIVES, POLICIES, AND STRATEGIES

Investment Objectives and Policies

The Fund's primary investment objective is to seek high current income. Capital appreciation is a secondary objective. The investment objectives of the Fund are fundamental policies that may not be changed without a vote of a majority of the outstanding voting securities of the Fund. The Fund is also subject to certain investment restrictions, set forth in its SAI, that are fundamental and cannot be changed without a vote of a majority of the Fund's outstanding voting securities. A majority of the outstanding voting securities of the Fund is defined under the 1940 Act as the lesser of: (i) 67% or more of the Fund's Shares present at a meeting if more than 50% of the outstanding Shares of the Fund are present and represented by proxy; or (ii) more than 50% of the outstanding Shares of the Fund. All other investment strategies, policies, and restrictions described herein and in the SAI are not fundamental and may be changed by the Board without shareholder approval except as required by law.

The Fund seeks to achieve its objectives by investing, under normal circumstances, at least 50% of its total assets in Income Generating Equity Securities. The Fund may invest in Debt Securities, including bonds issued by domestic and foreign corporate and government issuers. The Debt Securities in which the Fund may invest may be structured as fixed rate debt, floating rate debt, and debt that may not pay interest at the time of issuance. The Fund may also invest in equity securities of other issuers, including investment companies, ETFs and REITs, deemed by the Investment Manager not to be Income Generating Equity Securities based on the issuer's income generation, objectives, policies, holdings, or similar criteria. The Fund may invest in securities of domestic or foreign issuers of any size. There is no assurance the Fund will achieve its investment objectives.

The Debt Securities in which the Fund may invest include high yield, high risk securities which are rated below investment grade, including the lowest rating categories, or are unrated but are determined by the Investment Manager to be of comparable quality, and are considered speculative and subject to certain risks that may be greater than those of higher rated securities. Securities rated below investment grade are those rated below Baa by Moody's or below BBB by S&P. The Fund normally will not invest more than 50% of its total assets in below investment grade Debt Securities, commonly known as junk bonds. Certain Income Generating Equity Securities in which the Fund may invest, including convertible securities and preferred stocks, may also be rated below investment grade and generally will have characteristics similar to those of lower rated Debt Securities. The Fund will not, however, normally invest in convertible securities rated below C by Moody's or CC by S&P. Such investments are in addition to investments in below investment grade Debt Securities. For a description of the risks associated with an investment in securities rated below investment grade, see Special Considerations and Risk Factors below.

Table of Contents

The Fund is permitted to invest in shares of registered investment companies, including money market fund shares, to the extent permitted by the 1940 Act. Investment company shares held by the Fund may be deemed by the Investment Manager to be Income Generating Equity Securities, Debt Securities (such as money market fund shares), or otherwise, depending on the income generation, objectives, policies, holdings, or similar criteria of the investment company. In accordance with the 1940 Act, the Fund normally will be limited in the amount the Fund and its affiliates can invest in any one investment company to 3% of the investment company's total outstanding stock. As a result, the Fund may hold a smaller position in such investment company than if it were not subject to this restriction. To comply with provisions of the 1940 Act, on any matter upon which the Fund is solicited to vote as a shareholder in an investment company in which it invests, the Investment Manager normally seeks to vote such shares in the same general proportion as shares held by other shareholders of that investment company. The Fund does not invest in any investment companies managed by the Investment Manager or its affiliates. Investment companies typically incur advisory fees and other expenses. The Fund, as a shareholder, will indirectly bear its pro rata portion of such fees and expenses in addition to the Fund's direct fees and expenses.

In seeking to enhance returns, the Fund may employ leverage to the extent permitted under the 1940 Act. See [Leverage](#) below. The Fund may also buy and sell put and call options. The Fund may trade securities actively in pursuit of its investment objectives. The Fund also may lend its portfolio securities to brokers, dealers, and other financial institutions.

The Fund may, from time to time, make temporary investments for defensive purposes that are inconsistent with the Fund's principal investment strategies in attempting to respond to adverse market, economic, political, or other conditions, pending investment of the proceeds of sales of portfolio securities, pending investment of the proceeds from Share offerings, or at other times when suitable investments are not otherwise available. To the extent the Fund takes temporary defensive positions, it may not achieve its investment objectives.

See [Additional Information About the Fund's Investment Program](#) in the SAI.

Investment Strategy

When allocating the Fund's assets between Income Generating Equity Securities and Debt Securities, the Investment Manager focuses on the Fund's objective of high current income, with capital appreciation as a secondary objective, and accordingly seeks to evaluate relative yields and potential for capital appreciation, as well as associated risks, on macroeconomic levels, by sector, and by specific security.

When selecting Income Generating Equity Securities for the Fund, the Investment Manager will normally emphasize primarily those offering high current income and secondarily potential for capital appreciation. In evaluating investments, the Investment Manager will typically apply fundamental investment analysis, which may consider yield, financial strength, profitability, growth potential, and risks, in view of market valuation and relative strength, as well as other considerations, such as market, sector, or industry diversification, to select the Fund's specific portfolio securities. Except for securities issued or guaranteed by the U.S. government or other issuers not considered to be members of any industry, at the time a transaction is effected the Fund will not concentrate its investments in the securities of one or more issuers conducting their principal business activities in the same industry.

When selecting Debt Securities for the Fund, the Investment Manager will seek investments that offer a high level of current income consistent with reasonable risk in light of the nature of the investments. Debt Securities under consideration for the Fund's portfolio normally will be analyzed by the Investment Manager based on fundamental factors, including yield, financial and operating strength, and risk, and other considerations, including marketability, relative value characteristics, and general credit trends. The Fund will generally invest in such securities presenting, in

the Investment Manager's opinion, the potential for investment returns consistent with the Fund's investment objectives.

Table of Contents

The Investment Manager generally considers a variety of factors when determining whether to sell a security in the Fund's portfolio and may sell a security at any time in its discretion. An investment is typically sold when its potential to meet the Fund's investment objectives is deemed by the Investment Manager to be limited or exceeded by another potential investment or when it no longer appears to meet the Fund's investment objectives.

The following is additional information about the securities in which the Fund may invest and the investment techniques the Fund may use. For additional information about the Fund's investment policies and strategies, see *Additional Information About the Fund's Investment Program* in the SAI.

Income Generating Equity Securities. Equity securities include common stocks, preferred stocks, and convertible securities. Inasmuch as the Fund's primary investment objective is to seek high current income and capital appreciation is a secondary objective, when selecting equity securities for investment, the Investment Manager typically will focus primarily on a security's income paying capacity, and secondarily on its potential for capital appreciation. The Fund may hold or have exposure to equity securities of issuers of any size (in terms of market capitalization or otherwise) and in any industry or sector. The equity securities in which the Investment Manager expects to invest on behalf of the Fund consist primarily of common stocks and preferred stocks (each discussed below).

Common Stock. Common stock represents an equity ownership interest in a corporation, typically providing voting rights and entitling the holder to a share of the company's success through dividends and/or capital appreciation. In the event of liquidation, common shareholders have rights to a company's remaining assets after bond holders, other debt holders, and preferred shareholders have been paid in full. Typically, common shareholders are entitled to one vote per share to elect the company's board of directors (although the number of votes is not always directly proportionate to the number of shares owned). Common shareholders also normally receive voting rights regarding other company matters, such as mergers and other extraordinary matters.

Preferred Stock. Preferred stock represents an equity ownership interest in a corporation, but generally entitles the holder to receive, in preference to the holders of other stocks such as common stocks, dividends and a fixed share of the proceeds resulting from liquidation of the company. Some preferred stock also entitles their holders to receive additional liquidation proceeds on the same basis as holders of a company's common stock. Some preferred stock offers a fixed rate of return with no maturity date. Preferred stock with no maturity may perform similarly to long term bonds, and can be more volatile than other types of preferred stock with heightened sensitivity to changes in interest rates. Other preferred stock has a variable dividend, generally determined on a quarterly or other periodic basis. Because preferred stock represents an equity ownership interest in a company, its value usually will react more strongly than bonds and other debt instruments to actual or perceived changes in a company's financial condition or prospects or to fluctuations in the equity markets. Unlike common stock, preferred stock does not usually have voting rights absent the occurrence of specified events; preferred stock, in some instances, is convertible into common stock. In order to be payable, dividends on preferred stock must be declared by the issuer's board of directors. There is, however, no assurance that dividends will be declared by the boards of directors of issuers of the preferred stocks in which the Fund invests.

Debt Securities. A debt security represents money borrowed that must be repaid. Debt securities include bonds, bills, notes, debentures, commercial paper, and other debt obligations. Unlike common and preferred stock, a debt security does not represent an equity interest in the issuer. However, a debt security has a priority of claim over common shareholders if the issuer is liquidated. The Fund may invest in a wide variety of Debt Securities, although the Investment Manager anticipates, under normal market conditions, the Debt Securities in which the Fund invests will be primarily corporate bonds and U.S. government securities.

Table of Contents

Corporate Bonds. Corporate bonds are debt obligations issued by U.S. and foreign corporations and other business entities. Corporate bonds may be either secured or unsecured. Collateral used for secured corporate debt includes, but is not limited to, real property, machinery, equipment, accounts receivable, stocks, bonds, or notes. If a corporate bond is unsecured, it is known as a debenture. Bondholders, as creditors, have a prior legal claim over common and preferred shareholders as to both income and assets of the corporation for the principal and interest due them and may have a prior claim over other creditors if liens or mortgages are involved. Interest on corporate bonds may be fixed rate, floating rate, adjustable rate, zero coupon, contingent, deferred, or have payment-in-kind features. Interest on corporate bonds is typically paid semi-annually and is fully taxable to the bondholder. Corporate bonds contain elements of both interest rate risk and credit risk. The market value of a corporate bond generally may be expected to rise and fall inversely with interest rates and may also be affected by the credit rating of the corporation, the corporation's performance, and perceptions of the corporation in the marketplace. Corporate bonds usually yield more than government or agency bonds due to the presence of credit risk.

U.S. Government Securities. The obligations issued or guaranteed by the U.S. government in which the Fund may invest include direct obligations of the U.S. Treasury and obligations issued by U.S. government agencies and instrumentalities. Included among direct obligations of the United States are Treasury Bills, Treasury Notes, and Treasury Bonds, which differ in terms of their interest rates, maturities, and dates of issuance. Not all securities issued by the U.S. government and its agencies and instrumentalities are backed by the full faith and credit of the U.S. Treasury. Included among the obligations issued by agencies and instrumentalities and government sponsored enterprises of the United States are instruments that are supported by the full faith and credit of the United States (such as certificates issued by the Government National Mortgage Association (Ginnie Mae)), instruments that are supported by the right of the issuer to borrow from the U.S. Treasury (such as securities of Federal Home Loan Banks), and instruments that are supported only by the credit of the instrumentality (such as Federal National Mortgage Association (Fannie Mae) or the Federal Home Loan Mortgage Corporation (Freddie Mac) bonds). Although the Fund may hold securities that carry U.S. government guarantees, these guarantees do not extend to Shares of the Fund itself and do not guarantee the market price of the securities.

Below Investment Grade Securities. Below investment grade securities are securities rated below investment grade quality (lower than Baa by Moody's or lower than BBB by S&P or comparably rated by another rating agency or the Investment Manager). Below investment grade securities are commonly referred to as junk bonds. Such securities are considered to have speculative elements, with higher vulnerability to default than corporate securities with higher ratings. For a description of securities ratings, please see Appendix A Description of Securities Ratings in the SAI. Subsequent to its purchase by the Fund, an issue of rated securities may cease to be rated or its rating may be reduced below its rating when purchased by the Fund. Neither event will require sale of such securities by the Fund, although the Investment Manager may consider such event in its determination of whether the Fund should continue to hold the securities.

The ratings of Moody's, S&P, and the other rating agencies represent their opinions as to the quality of the obligations which they undertake to rate. Ratings are relative and subjective and, although ratings may be useful in evaluating the safety of interest and principal payments, they do not evaluate the market value risk of such obligations. Rating agencies may fail to make timely changes in credit ratings and an issuer's current financial condition may be better or worse than a rating indicates.

Investment Grade Securities. Investment grade debt securities are securities of medium to high quality that are rated Baa or higher by Moody's, BBB or higher by S&P, or comparably rated by another rating agency or, if unrated, are deemed by the Investment Manager to be of comparable quality. Moody's deems securities rated in its fourth highest category (Baa) to have speculative characteristics; a change in economic factors could lead to a weakened capacity of the issuer to repay.

Securities of Other Investment Companies. The Fund may invest in the securities of other investment companies, including closed end funds, open end funds, ETFs, BDCs, and unit investment trusts, to the extent permitted by the 1940 Act. An investment in an investment company involves risks similar to those of investing directly in the investment company's portfolio securities, including the risk that the value of the portfolio securities may fluctuate in accordance with changes in the financial condition of their issuers, the value of stocks and other securities generally, and other market factors.

Table of Contents

The Fund may lose money by investing in securities of other investment companies, including money market mutual funds. Generally, money market mutual funds are registered investment companies that seek to earn income consistent with the preservation of capital and maintenance of liquidity by investing primarily in high quality money market instruments, including U.S. government obligations, bank obligations and short-term corporate debt instruments. An investment in a money market mutual fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The value of a money market mutual fund may be affected by changes in interest rates, credit ratings of the investments, and recent changes in SEC rules governing money market funds. If a significant amount of the Fund's assets are invested in money market mutual funds, it may be more difficult for the Fund to achieve its investment objective.

In addition, investing in other investment companies involves certain other risks, costs, and expenses for the Fund. To the extent that the Fund invests in the securities of other investment companies, the Fund's shareholders will indirectly bear a *pro rata* share of the investment company's expenses in addition to the expenses associated with an investment in the Fund. In addition, the Fund could incur a sales charge in connection with purchasing an investment company security or a redemption fee upon the redemption of such security.

Closed end funds, ETFs, and BDCs differ from open end funds in that they do not redeem their shares at the option of the shareholder and generally list their shares for trading on a securities exchange. In comparison to open end funds, closed end funds, ETFs, and BDCs have greater flexibility in the employment of financial leverage and in the ability to make certain types of investments, including investments in illiquid securities. Shares of closed end funds frequently trade at a discount from their NAV. An investment in the shares of a closed end fund may also involve the payment of a substantial premium over, while sales of such shares may be made at a substantial discount from, the NAV of the issuer's portfolio securities. BDCs are vehicles whose principal business is to invest in, lend capital to, or provide services to privately held companies.

Exchange-Traded Funds. The Fund may invest in ETFs. ETFs usually are units of beneficial interest in an investment trust or represent undivided ownership interests in a portfolio of securities. Most ETFs are designed to provide investment results that generally correspond to the price and yield performance of the component securities of the benchmark index that they seek to track, although some are actively managed. ETFs do not sell individual shares directly to investors and only issue their shares in large blocks known as creation units. The investor purchasing a creation unit may sell the individual shares on a secondary market. Therefore, the liquidity of ETFs depends on the adequacy of the secondary market.

An investment in an ETF involves risks similar to investing directly in the component securities of the ETF, including the risk that the value of the component securities may fluctuate in accordance with changes in the financial condition of their issuers, the value of stocks and other securities generally, and other market factors. Investments in ETFs that are designed to correspond to an equity index involve certain inherent risks generally associated with investments in a broadly based portfolio of common stocks, including the risk that the general level of stock prices may decline, thereby adversely affecting the value of ETFs invested in by the Fund. There can be no assurance that an ETF's investment objective will be achieved, as ETFs based on an index may not replicate and maintain exactly the composition and relative weightings of securities in the index.

Typically, ETFs bear their own operational expenses, reducing its NAV and dividends potentially payable to investors. To the extent that the Fund invests in ETFs, the Fund's shareholders will indirectly bear a *pro rata* share of the ETF's expenses in addition to the expenses associated with an investment in the Fund. Typically, ETFs are investment companies. However, the term is used in the industry in a broad way to include securities issued by entities that are not investment companies. To the extent an ETF is an investment company, the limitations applicable to the Fund's ability to purchase securities issued by other investment companies will apply.

Business Development Companies. BDCs are a type of closed end company regulated under the 1940 Act, which typically invest in and lend to small and medium-sized private companies that may lack access to public equity markets for capital raising. Under the 1940 Act, BDCs must invest at least 70% of the value of their total assets in certain asset types, which are typically the securities of private U.S. businesses. In addition, BDCs are required to make available significant managerial assistance to the issuers of such securities.

Table of Contents

Real Estate Investment Trusts. The Fund may invest in REITs, which pool investors' capital to purchase or finance real estate. REITs are generally classified as equity REITs, mortgage REITs, or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of interest payments. REITs are not taxed on income distributed to shareholders provided they comply with the applicable requirements of the Code.

Foreign Securities. The Fund may invest in debt and equity securities of corporate, governmental, and supra-national issuers located outside the United States, including issuers in developed and emerging markets. Foreign securities include securities issued or guaranteed by companies organized under the laws of countries other than the United States and securities issued or guaranteed by foreign governments, their agencies or instrumentalities and supra-national governmental entities, such as the World Bank. Foreign securities also include U.S. dollar-denominated debt obligations, such as Yankee Dollar obligations, of foreign issuers and of supra-national government entities. Yankee Dollar obligations are U.S. dollar-denominated obligations issued in the U.S. capital markets by foreign corporations, banks, and governments. Foreign securities also may be traded on foreign securities exchanges or in over-the-counter (OTC) capital markets.

Depository Receipts. The Fund may make foreign investments through the purchase and sale of ADRs, EDRs, GDRs, or other securities representing underlying shares of foreign issuers. Positions in those securities are not necessarily denominated in the same currency as the underlying shares they represent. ADRs are receipts typically issued by a U.S. bank or trust company evidencing ownership of the underlying securities issued by foreign issuers. EDRs are European receipts listed on the Luxembourg Stock Exchange evidencing a similar arrangement. GDRs are U.S. dollar-denominated receipts evidencing ownership of foreign securities. Generally, ADRs, in registered form, are designed for the U.S. securities markets and EDRs and GDRs, in bearer form, are designed for use in foreign securities markets. The Fund may invest in sponsored or unsponsored ADRs. Sponsored ADRs are issued jointly by the issuer of the underlying security and a depository, whereas unsponsored ADRs are issued without participation of the issuer of the deposited security. Holders of unsponsored ADRs generally bear all the costs of such facilities and the depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts in respect of the deposited securities. Therefore, there may not be a correlation between information about the issuer of the security and the market value of an unsponsored ADR. Investments in depository receipts also involve risks similar to those accompanying direct investments in foreign securities. Certain of these risks are described below under Special Considerations and Risk Factors Foreign Securities Risks.

Options Trading. The Fund may engage in the purchase and sale of call and puts options, sale of covered call options and straddle and similar options strategies.

Purchase of Call Options. The Fund may purchase call options on securities (both equity and debt) that the Investment Manager intends to include in the Fund's portfolio in order to fix the cost of a future purchase. Call options also may be used as a means of enhancing returns by, for example, participating in an anticipated price increase of a security. In the event of a decline in the price of the underlying security, use of this strategy may serve to limit the potential loss to the Fund to the option premium paid. Conversely, if the market price of the underlying security increases above the exercise price and the Fund either sells or exercises the option, any profit eventually realized may be reduced by the premium paid.

Sale of Call Options. The Fund may write call options on securities and commodities, including covered call options on equity securities (including ETFs) and financial indices, for hedging purposes or to increase return in the form of

premiums received from the purchasers of the options. A call option gives the purchaser of the option the right to buy, and the writer (seller) the obligation to sell, the underlying security at the exercise price during or at the end of the option period. This strategy may be used to provide limited protection against a decrease in the market price of the security, in an amount equal to the premium received for writing the call option less any transaction costs. Thus, if the market price of the underlying

Table of Contents

security held by the Fund declines, the amount of such decline normally will be offset wholly or in part by the amount of the premium received by the Fund. If, however, the market price of the underlying security increases to a level in excess of the option exercise price, and the option is exercised, the Fund will be obligated to sell the security at less than its market value. In addition, the Fund could lose the ability to participate in an increase in the value of such securities above the exercise price of the call option because such an increase may likely be offset by an increase in the cost of closing out the call option (or could be negated if the buyer chooses to exercise the call option at an exercise price below the current market value). The Fund generally would give up the ability to sell any portfolio securities used to cover a call option while the call option is outstanding.

Sale of Covered Call Options. The Fund may sell (*i.e.*, write) covered call options on securities (including ETFs), commodities and indices. The Fund expects to sell covered call options principally to generate income. The Fund may cover call options by: (i) owning the same security or, in the case of options on an index, a portfolio of securities substantially replicating the movement of the index underlying the call option until the option is exercised or expires; (ii) segregating cash or other liquid assets with the Fund's custodian in an amount equal to the current market value of the call option; or (iii) other methods consistent with applicable laws, rules, and regulations. The Fund may write covered call options from time to time on such portion of its portfolio without limit to the extent of available cover, as the Investment Manager determines is appropriate in seeking to achieve the Fund's investment objectives.

Purchase of Put Options. The Fund may purchase put options on securities to hedge against a decline in the market value of securities held in its portfolio or to attempt to enhance return. A put option enables the Fund to sell the underlying security at the predetermined exercise price; thus, the potential for loss to the Fund below the exercise price is limited to the option premium paid. If the market price of the underlying security is lower than the exercise price of the put option, any profit the Fund realizes on the sale of the security may be reduced by the premium paid for the put option.

The Fund may, on certain occasions, wish to hedge against a decline in the market value of securities held in its portfolio at a time when put options on those particular securities are not available or attractive for purchase. The Fund may therefore purchase a put option on other selected securities, the values of which historically have or are anticipated to have positive correlation to the value of such portfolio securities. If the Investment Manager's judgment is correct, changes in the value of the put options should generally offset changes in the value of the portfolio securities being hedged. However, the correlation between the two values may not be as close in these transactions as in transactions in which the Fund purchases a put option on a security held in its portfolio. The put option may not provide complete protection against a decline in the value of those securities below the level sought to be protected by the put option if, for example, the Investment Manager's judgment is not correct and the value of the securities underlying the put option decreases less than the value of the Fund's portfolio securities.

Sale of Put Options. The Fund also may sell (*i.e.*, write) put options on securities. A put option gives the purchaser of the option the right to sell, and the writer the obligation to buy, the underlying security at the exercise price during the option period. So long as the obligation of the writer continues, the writer may be required to make payment of the exercise price against delivery of the underlying security. If a written put option is not exercised, the Fund will realize income in the amount of the premium it received. This technique could be used to enhance current return during periods of market uncertainty. The risk in such a transaction would be that the market price of the underlying security would decline below the exercise price less the premiums received, in which case the Fund would expect to suffer a loss.

Put and Call Options on Securities Indices. The Fund may purchase and write put and call options on securities indices in much the same manner as the more traditional securities options discussed above. Index options may serve as a hedge against overall fluctuations in the securities markets (or a market sector) rather than anticipated increases or

decreases in the value of a particular security. A securities index assigns values to the securities included in the index and fluctuates with changes in such values. Settlements of securities index options are effected with cash payments and do not involve delivery of securities. Thus, upon settlement of a securities index option, the purchaser will realize, and the writer will pay, an amount based on the difference between the exercise price and the closing price of the index. The effectiveness of hedging techniques using securities index options may depend on the extent to which price movements in the securities index selected correlate with price movements of the securities in which the Fund invests.

Table of Contents

Straddles on Securities and Securities Indices. The Fund may purchase and write straddles on securities and securities indices. A long straddle is a purchase of a combination of a call and a put on the same security or securities index. The Fund normally will profit from a long straddle if the underlying security or index changes in price more than the cost of the options before the expiration or close of the straddle. A short straddle is a sale combination of a call and a put on the same security or securities index. The Fund normally will profit from short straddles if the underlying security or index changes in price less than the proceeds of the option sales before the expiration or close of the straddle. In the case of a short straddle, the Fund normally will segregate assets, or otherwise cover its obligations under the instruments consistent with SEC guidance by, for example setting aside cash or segregating cash or liquid assets equivalent in value to the amount, if any, by which the put is in-the-money, that is, that amount by which the exercise price of the put exceeds the current market value of the underlying security or securities index.

Exchanged-Traded Options and OTC Options. The Fund may purchase and write (sell) both exchange-traded options and options traded on the OTC market. Exchange-traded options in the United States are issued by a clearing organization affiliated with the exchange on which the option is listed, which, in effect, guarantees completion of its exchange-traded option transaction. In contrast, OTC options are contracts between the Fund and its counterparty with no clearing organization guarantee. Thus, when the Fund purchases an OTC option, it relies on the dealer from which it has purchased the OTC option to make or take delivery of the securities, currencies, or other instrument underlying the option. Failure by the dealer to do so may result in the loss of any premium paid by the Fund as well as the loss of the expected benefit of the transaction.

Closing Options Transactions. The Fund may effectively terminate its right or obligation under an option before expiration of the option period by entering into a closing transaction. If the Fund wishes to terminate its obligation to purchase or sell under a put or a call option it has written, the Fund may purchase a put or a call option of the same series (that is, an option identical in its terms to the option previously written); this is known as a closing purchase transaction. Conversely, in order to terminate its right to purchase or sell under a call or put option it has purchased, the Fund may sell an option of the same series as the option held; this is known as a closing sale transaction. Closing transactions essentially permit the Fund, prior to the exercise or expiration of the related option, to realize profits or limit losses on its option position, to prevent an underlying security from being called, to permit the sale of the underlying security or to enable the Fund to write another option on the underlying security with a different exercise price and/or expiration date.

Securities Lending Transactions. The Fund may lend portfolio securities or other assets for a fee or other benefit to brokers, dealers, and other financial institutions, including in accordance with and subject to the terms of the Liquidity Agreement. By lending its portfolio securities, the Fund may attempt to increase its income through the receipt of a fee or other benefit based on the value of the securities loaned. During the course of the loan, the Fund continues to receive the equivalent of the interest, dividends, or other distributions paid by the issuer of the securities loaned as well as the benefit of any increase and the detriment of any decrease in the market value of the securities loaned and also may have the opportunity to earn a fee or other benefit on the amount of the loan and on the loaned securities collateral. The Fund would have the right to call the loan and obtain the securities loaned normally at any time. The Fund would not have the right to vote the securities during the existence of the loan but would call the loan to permit voting of the securities if, in the Investment Manager's judgment, a material event requiring a shareholder vote would otherwise occur before the loan was repaid. The loan would be continuously secured by collateral consisting of cash, securities issued or guaranteed by the U.S. government, its agencies or instrumentalities, bank letters of credit, other acceptable collateral, or any combination thereof, at all times equal to at least the market value of the assets loaned. Including such collateral as part of the Fund's total assets, the securities on loan normally will not exceed one-third of its total assets. In connection with its securities lending transactions, the Fund may return to the borrower or pay a third party which is acting as a placing broker, some or all of the income earned from the investment of collateral received for securities loaned. There are risks to the Fund of delay in receiving additional collateral and risks of delay

in recovery of, and failure to recover, the assets loaned

Table of Contents

should the borrower fail financially or otherwise violate the terms of the lending agreement. In the event of bankruptcy or other default of the borrower, the Fund could experience both delays in liquidating the loan collateral or recovering the loaned securities and losses, including (i) possible decline in the value of the collateral or in the value of the securities loaned during the period while the Fund seeks to enforce its rights thereto, (ii) possible subnormal levels of income and lack of access to income during this period, and (iii) expenses of enforcing its rights. The Fund may also experience losses as a result of the diminution in value of its cash collateral investments. Any loan made by the Fund will typically provide that it may be terminated by either party upon reasonable notice to the other party.

Future Developments. From time to time, the Fund may also invest in certain Income Generating Equity Securities, Debt Securities, or other investment assets that have features other than those that are typical for such investments and which have in the past been offered or may be offered in the future. In the past, for example, securities have been issued to replicate the performance of a certain component or components of a particular security or combination of securities and/or to hedge or reduce the risks associated with certain securities or market trends. The Fund may invest in these investments if the Investment Manager believes that doing so would be consistent with the Fund's investment objectives and policies. Since the market for these investments may be new, the Fund may have difficulty disposing of them at a suitable price and time. In addition to limited liquidity, these investments may present other risks, such as high price volatility. The unavailability of such innovative investments may adversely affect the Fund's ability to achieve its investment objectives.

Temporary Investments. The Fund may make temporary investments for defensive purposes that are inconsistent with the Fund's principal investment strategies in response to adverse market, economic, political, or other conditions, pending investment of the proceeds of sales of portfolio securities, pending investment of the proceeds from Share offerings, or at other times when suitable investments are not otherwise available. In addition to money market funds, money market instruments, and cash, the Fund is permitted to temporarily invest without limit in: (i) debt securities issued by the U.S. government, its agencies or instrumentalities; (ii) commercial paper; (iii) certificates of deposit or bankers' acceptances; and (iv) repurchase agreements with respect to any of the foregoing investments. It is impossible to predict if, or for how long, the Fund will use any of such temporary defensive strategies. For a description of the types of temporary investments the Fund may make, please see "Additional Information About the Fund's Investment Program" in the SAI.

Leverage

The Fund may borrow for leverage to the maximum extent permitted under the 1940 Act. The Fund may obtain leverage through indebtedness (including through the use of reverse repurchase agreements, firm commitment agreements, standby commitment agreements, short sales, written options, futures, dollar rolls, bank loans, commercial paper or other credit facilities, credit default swaps and other derivative transactions, loans of portfolio securities, and when-issued, delayed delivery, and forward commitment transactions), the issuance of short-term debt securities, or the issuance of shares of preferred stock (collectively, "Senior Securities"). The 1940 Act generally prohibits the Fund from engaging in most forms of leverage other than preferred shares, unless immediately after the borrowing, the Fund has satisfied the asset coverage test with respect to Senior Securities representing indebtedness prescribed by the 1940 Act—that is, the value of the Fund's total assets less liabilities (other than the leverage and other Senior Securities) is at least 300% of the principal amount of such leverage and other Senior Securities (*i.e.*, effectively limiting the use of such leverage and other Senior Securities representing indebtedness to 33 1/3 % of the Fund's total assets, including assets attributable to the leverage and other Senior Securities). The Fund may (but is not required to) cover its commitments under derivatives and certain other instruments by the segregation of liquid assets, or by entering into offsetting transactions (*e.g.*, the Fund may offset its contractual obligation to deliver a security by purchasing a second contract pursuant to which the Fund will obtain the same or a substantially similar security on the same date) or by owning positions covering its obligations. For instance, the Fund may cover its position in a reverse

repurchase agreement by segregating liquid assets at least equal in amount to its forward purchase commitment. To the extent that certain of these instruments are so covered, they will not be considered senior securities under the 1940 Act and therefore will not be subject to the 300% asset coverage requirement otherwise applicable to forms of leverage (other than preferred shares) used by the Fund.

Table of Contents

Under the 1940 Act, the Fund is not permitted to issue new preferred shares unless immediately after such issuance, the value of the Fund's total assets is at least 200% of the liquidation value of outstanding preferred shares and the newly issued preferred shares plus the aggregate amount of any Senior Securities of the Fund representing indebtedness (*i.e.*, such liquidation value plus the aggregate amount of Senior Securities representing indebtedness may not exceed 50% of the Fund's total assets). In addition, the Fund is not permitted to declare any cash dividend or other distribution on its common shares unless, at the time of such declaration, the value of the Fund's total assets satisfies the above-referenced 200% coverage requirement.

The net proceeds of the offering of any Senior Securities will be invested in accordance with the Fund's investment objectives and policies. The Fund seeks a leverage ratio, based on a variety of factors including market conditions and the Investment Manager's market outlook, where the rate of return, net of applicable Fund expenses, on the Fund's investment portfolio investments purchased with leverage exceeds the costs associated with such leverage.

The Fund has used investment leverage in the past and is currently using leverage; however, there can be no assurance that the Fund will continue to engage in any leveraging techniques. The Fund is currently a party to the Liquidity Agreement and as of [], had drawn \$[] million under the Liquidity Agreement.

The percentage amount of the Fund's leverage outstanding as of [] was []% of its total assets (including the proceeds of such leverage). The Fund does not currently anticipate an increase in leverage immediately following the completion of any Share offerings; however, the Fund reserves the right to adjust leverage from time to time. Although the Fund's fundamental investment restrictions permit it to borrow money and issue senior securities to the extent permitted by the 1940 Act, as described above, the Fund's Liquidity Agreement allows the Fund to draw up to \$35 million currently. Generally, the Fund pledges its assets as collateral to secure its obligations under the Liquidity Agreement. The Fund may enter into transactions that may give rise to other forms of leverage including, among others, derivative transactions, loans of portfolio securities, and when-issued, delayed delivery and forward commitment transactions. These other forms of leverage are not included in the Fund's fundamental investment restrictions discussed above. Although it has no current intention to do so, the Fund may also determine to issue preferred shares to add leverage to its portfolio.

Other Investment Practices

Illiquid and Restricted Securities. An illiquid investment is an investment that the fund reasonably expects cannot be sold in current market conditions in seven calendar days without significantly changing the market value of the investment. The Fund may invest without limit in illiquid securities, including securities with legal or contractual conditions or restrictions on resale, repurchase agreements maturing in greater than seven days, and other securities which are not readily marketable. Investing in such securities entails certain risks. The primary risk is that the Fund may not be able to dispose of a security at the desired price at the time it wishes to make such disposition. In addition, such securities often sell at a discount from liquid and freely tradable securities of the same class or type, although they are also usually purchased at an equivalent discount, which enhances yield while the securities are held by the Fund. In the absence of readily available market quotations, illiquid securities will be valued at fair value as determined in good faith and pursuant to a method approved by the Board. Valuing illiquid securities typically requires greater judgment than valuing securities for which there is an active trading market. Investment of the Fund's assets in illiquid securities may restrict the Fund's ability to take advantage of market opportunities.

The Fund may invest in restricted securities, which are securities that may not be sold to the public without an effective registration statement under the Securities Act of 1933, as amended (the Securities Act). The restriction on public sale may make it more difficult to value such securities, limit the Fund's ability to dispose of them, and lower the amount the Fund could realize upon their sale. Before they are registered, restricted securities may be sold only in

a privately negotiated transaction or pursuant to an exemption from registration. Rule 144A under the Securities Act establishes a safe harbor from the registration requirements of the Securities Act for resales of certain securities to qualified institutional buyers. To the extent that, for a period of time, qualified institutional buyers cease purchasing restricted securities pursuant to Rule 144A, the Fund's investing in such securities may have the effect of increasing the level of illiquidity in its investment portfolio during such period.

When-Issued and Delayed Delivery Securities. The Fund may purchase securities on a when-issued or delayed delivery basis. Securities purchased on a when-issued or delayed delivery basis are purchased for delivery beyond the normal settlement date at a stated price and yield. No income accrues to the purchaser of a security on a when-issued or delayed delivery basis before delivery. Such securities are recorded as an asset and are subject to changes in value based upon changes in the general level of interest rates and other factors. Purchasing a security on a when-issued or delayed delivery basis can involve a risk that the market price at the time of delivery may be lower than the agreed-upon purchase price, in which case there could be an unrealized loss at the time of delivery. Although the Fund will enter into when-issued or delayed delivery transactions with the intention of acquiring the securities, the Fund may sell the securities prior thereto for investment reasons, which may result in a gain or loss. The Fund may purchase securities on a when-issued or delayed delivery basis without complying with the asset coverage and other requirements noted above under Leverage, provided it segregates assets consistent with SEC guidance, or otherwise covers its obligations under the instruments. Failure of the issuer to deliver the security may result in the Fund incurring a loss or missing an opportunity to make an alternative investment.

Table of Contents

SPECIAL CONSIDERATIONS AND RISK FACTORS

An investment in the Shares is subject to many risks. The risks and uncertainties described below are not the only ones facing the Fund. There are additional risks, including those that the Fund does not currently foresee or consider material. You should carefully consider these risks, together with all of the other information included or incorporated by reference in this Prospectus and in any Prospectus Supplement before investing in the Shares. By itself, the Fund does not constitute a complete investment program and you could lose money by investing in the Fund.

Risks of Investing in the Fund

Market Risk. An investment in the Fund is subject to market risk, including the possible loss of the entire amount that you invest. Your investment in Shares represents an indirect investment in the securities owned by the Fund. The value of these securities, like other market investments, may move up or down, sometimes rapidly and unpredictably, and these fluctuations are likely to have a greater impact on the value of the Shares during periods in which the Fund utilizes leverage. If the economy contracts, the ability of issuers of the Debt Securities and other securities in which the Fund invests to service their obligations could be materially and adversely affected. Certain events, such as natural disasters, terrorism, war, and other geopolitical events, can have a dramatic adverse effect on the investments held by the Fund.

Recent Events. Recent developments in the U.S. and foreign financial markets and other market history suggest that economic, market, and specific investment analysis and forecasting is difficult, often wrong, and that the assumptions of certain conditions cannot be relied on with any certainty. Assumptions regarding the regulation of these markets and the participants therein may change. The U.S. government and certain foreign governments have and may again take unprecedented actions designed to support certain financial institutions or segments of the financial markets. Federal, state, and other governments, their regulatory agencies or self-regulatory organizations may take actions that affect the regulation of the securities in which the Fund invests, or the issuers of such securities in which the Fund invests, in unforeseeable ways that could have a material adverse effect on the Fund's business and operations. Such legislation or regulation could limit or preclude the Fund's ability to achieve its investment objectives. Furthermore, volatile or adverse financial markets can expose the Fund to greater market and liquidity risk and potential difficulty in valuing portfolio instruments held by the Fund.

Equity Securities Risk. Investing in the Fund involves equity securities risk, which is the risk that the equity securities held by the Fund will fall in market value due to adverse market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, and the particular circumstances and performance of particular companies whose securities the Fund holds. The general risks associated with equity securities may be greater for equity securities issued by companies with smaller market capitalizations as these companies may have limited product lines, markets or financial resources, or may depend on a few key employees. As a result, issuers with smaller market capitalization may be subject to greater levels of credit, market, and issuer risk.

Common Stock Risk. Although common stocks can generate higher average returns than debt and other equity securities, common stocks can also experience more volatility in those returns. An adverse event, such as an unfavorable earnings report, may depress the value of a particular common stock held by the Fund. Also, the prices of common stocks are sensitive to general movements in the stock market. A drop in the stock market may depress the price of common stocks held by the Fund or to which the Fund has exposure. In the event of a company's liquidation, the holders of its common stock have rights to its assets only after bondholders, other debt holders, and preferred shareholders have been satisfied.

Table of Contents

Credit Risk. Because the Fund may invest in bonds and other securities with credit risk (e.g., preferred stock), investing in the Fund involves credit risk, which is the risk that an issuer of the security will be unable to pay interest or principal when due. The prices of these securities are affected by the credit quality of the issuer. Below investment grade debt securities normally are lower quality and have greater credit risk because the companies that issue them typically are not as financially strong as companies that issue higher quality, investment grade debt securities. Changes in the financial condition of an issuer, general economic conditions, and specific economic conditions that affect a particular type of issuer can impact the credit quality of an issuer. Such changes may weaken an issuer's ability to make payments of principal or interest, or cause an issuer to fail to make timely payments of interest or principal. The downgrade of a security may further decrease its value, although a grade rating by a rating agency only represents the service's opinion as to the general credit quality of the security being rated and is not an absolute standard of quality or guarantee as to the creditworthiness of an issuer. Lower quality debt securities generally tend to be more sensitive to these changes than higher quality debt securities, but the lowest rating category of investment grade securities may have speculative characteristics as well. See *Additional Risks of Certain Securities* Below *Investment Grade Securities Risks* below. Credit risk also applies to securities issued by the U.S. government's agencies and instrumentalities that are not backed by the U.S. government's full faith and credit. Although securities backed by the full faith and credit of the U.S. government are generally considered to present minimal credit risk, credit risk may also apply to these securities.

Interest Rate Risk. Generally, when market interest rates rise, the prices of debt obligations fall, and vice versa. Interest rate risk is the risk that debt obligations and other instruments in the Fund's portfolio will decline in value because of increases in market interest rates. This risk may be particularly acute because market interest rates are currently near historically low levels. The prices of long-term debt obligations generally fluctuate more than prices of short-term debt obligations as interest rates change. The Fund's use of leverage will tend to increase interest rate risk.

Investments in floating rate debt instruments, although generally less sensitive to interest rate changes than longer duration fixed rate instruments, may nevertheless decline in value in response to rising interest rates if, for example, the rates at which they pay interest do not rise as much, or as quickly, as market interest rates in general. Conversely, floating rate instruments will not generally increase in value if interest rates decline. Inverse floating rate debt securities may also exhibit greater price volatility than a fixed rate debt obligation with similar credit quality. To the extent the Fund holds floating rate instruments, a decrease (or, in the case of inverse floating rate securities, an increase) in market interest rates will adversely affect the income received from such securities and may negatively affect the value of the securities.

Prepayment and Extension Risk. If interest rates fall, the principal on the debt securities held by the Fund may be paid earlier than expected. If this happens, the proceeds from a prepaid security may be reinvested by the Fund in securities bearing lower interest rates, resulting in a possible decline in the Fund's income and distributions to shareholders. Alternatively, the Fund is subject to the risk that an issuer will exercise its right to pay principal on an obligation held by that Fund later than expected, which might happen when there is a rise in interest rates, and thereby lengthen the duration (*i.e.*, interest rate sensitivity) and potentially reduce the value of these securities.

Corporate Bonds Risk. Investments in corporate bonds are subject to a number of the risks described in this Prospectus, including credit risk, interest rate risk, prepayment and extension risk, inflation/deflation risk, below investment grade securities risk, foreign securities risk, illiquid and restricted securities risk, management risk, valuation risk, and similar risks.

Leverage and Borrowing Risk. Borrowing for investment purposes creates an opportunity for increased return but, at the same time, involves special risk considerations. Borrowing increases the likelihood of greater volatility of NAV and market price of the Shares. If the total return that the Fund earns on the additional securities purchased fails to

cover the costs it incurs on the monies borrowed, the NAV of the Fund (and the return of the Fund) would be lower than if borrowing had not been incurred. In addition, when the Fund borrows at a variable interest rate, there is a risk that fluctuations in the interest rate may adversely affect the return to the Fund's shareholders. Interest payments and fees incurred in connection with such borrowings may reduce the amount of net income available for distribution to shareholders if the income that the Fund earns on the additional securities purchased is less than such payments and fees. There is no assurance that a borrowing strategy will be successful during any period in which it is employed.

Table of Contents

Borrowing on a secured basis results in certain additional risks. Should securities that are pledged as collateral to secure the loan decline in value, the Fund may be required to pledge additional assets in the form of cash or securities to the lender to avoid liquidation of the pledged assets. In the event of a steep drop in the value of pledged securities, it might not be possible to liquidate assets quickly enough and this could result in mandatory liquidation of the pledged assets in a declining market at relatively low prices. Furthermore, the Investment Manager's ability to sell the pledged securities is limited by the terms of the Liquidity Agreement, which may reduce the Fund's investment flexibility over the pledged securities. The rights of the lender to receive payments of interest on and repayments of principal will be senior to the rights of the Fund's shareholders.

To illustrate the concepts above, assume the Fund's net assets are \$150 million and borrowing available to it under a line of credit is an additional \$30 million, creating a total value of \$180 million available for investment. If the Fund's line of credit has an applicable interest rate of 3% and the Fund can purchase investments yielding 6%, the Fund's cost of borrowing would be less than the return on its investment of the loan proceeds and, therefore, the Fund would benefit from the \$30 million of leverage. If, however, the line of credit's applicable interest rate were to rise, or the yield on available investments were to decline, the beneficial yield difference between borrowing cost and investment yield would be reduced or eliminated, or even reverse and cause a loss to the Fund, which may cause the market value of the Shares to decline. Conversely, if yields on investments rise, their prices normally decline, and to the extent it is leveraged the Fund's NAV will decline more with the decline in price of its affected portfolio's investments than would be the case were it not leveraged. In addition to the decline in NAV, the market value of the Shares may also decline.

In addition, the requirements of any loan documents to which the Fund is a party may limit the Fund's ability to make distributions to its shareholders for so long as any payments on the loan are in arrears or in default, may limit the Fund's ability to take advantage of certain investments that may otherwise be available, may require the Fund to invest a greater portion of its assets in more highly rated, potentially lower yielding securities than the Fund might do otherwise, and may require the Fund to sell a portion of its assets when it might otherwise be disadvantageous to do so. If the Fund is required to restructure its portfolio by selling assets to satisfy the requirements set forth above, such sales of portfolio securities would cause the Fund to incur related transaction costs. In addition, in the event of a limitation on distributions, the Fund may be unable to distribute all of its net investment income to shareholders. To qualify for federal tax treatment as a RIC for a taxable year, the Fund must distribute at least 90% of the sum of its net investment income, the excess of net short-term capital gain over net long term capital loss, and certain other amounts earned or realized during that year. See "Tax Considerations" in the SAI.

As of [], the Fund utilized the Liquidity Agreement to borrow \$[] at a variable interest rate equal to []% per annum. Based on fiscal year 2016 Liquidity Agreement interest payments and commitment fees, the Fund's total investments at December 31, 2016 must experience an annual return of []% to cover such expenses. The following table explains the potential effects of leverage on the equity returns of the Fund's shareholders based on the Fund's average total net assets, leverage, and weighted interest rate in the fiscal year ended December 31, 2016.

Assumed Return on Portfolio (net of expenses)	(10.00)%	(5.00)%	0%	5.00%	10.00%
Corresponding Return to Shareholders	(10.61)%	(5.34)%	(0.08)%	5.19%	10.46%

All figures appearing above are hypothetical returns generated to assist investors in understanding the effects of leverage. Actual returns may be more or less than those appearing in the table.

During periods in which the Fund is utilizing leverage, the fees payable to the Investment Manager will be higher than if the Fund did not utilize financial leverage because the fees are calculated as a percentage of the Fund's assets, including those purchased with leverage, which may create a conflict of interest between the Investment Manager and

shareholders. The Investment Manager will utilize leverage only if it believes such action would likely result in a net benefit to the Fund's shareholders after taking into account the higher fees and expenses associated with leverage (including higher management fees).

Table of Contents

Inflation/Deflation Risk. Inflation risk is the risk that the value of assets or income from the Fund's investments will be worth less in the future as inflation decreases the present value of fixed payments at future dates. Deflation risk is the risk that prices throughout the economy may decline over time—the opposite of inflation. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of the Fund's portfolio.

Additional Risks of Certain Securities

Below Investment Grade Securities Risks. Below investment grade securities are commonly referred to as junk bonds. Below investment grade securities are regarded as being predominantly speculative as to the issuer's ability to make payments of principal and interest. The risks associated with acquiring the securities of such issuers generally are greater than is the case with higher rated securities. For example, during an economic downturn or a sustained period of rising interest rates, issuers of below investment grade securities may be more likely to experience financial stress, especially if such issuers are highly leveraged. During periods of economic downturn, such issuers may not have sufficient revenues to meet their interest payment obligations. The issuer's ability to service its debt obligations also may be adversely affected by specific issuer developments, the issuer's inability to meet specific projected business forecasts, or the unavailability of additional financing. Therefore, there can be no assurance that in the future there will not exist a higher default rate relative to the rates currently existing in the market for below investment grade securities. The risk of loss due to default by the issuer is significantly greater for the holders of below investment grade securities because such securities may be unsecured and may be subordinate to other creditors of the issuer. The below investment grade securities in which the Fund may invest do not normally include instruments which, at the time of investment, are in default or the issuers of which are in bankruptcy. There can be no assurance, however, that such events will not occur after the Fund purchases a particular security, in which case the Fund may experience losses and incur costs. Below investment grade securities frequently have call or redemption features that would permit an issuer to repurchase the security from the Fund. If a call were exercised by the issuer during a period of declining interest rates, the Fund is likely to have to replace such called security with a lower yielding security, thus decreasing the net investment income to the Fund and dividends to shareholders.

Below investment grade securities have been in the past, and may again in the future be, more volatile and less liquid than higher rated fixed income securities, so that adverse economic events may have a greater impact on the prices of below investment grade securities than on higher rated fixed income securities. Factors adversely affecting the market value of such securities are likely to affect adversely the Fund's NAV. Since 2008, demand for some below investment grade securities has increased and the difference between the yields paid by below investment grade securities and investment grade securities (*i.e.*, the spread) has narrowed. To the extent this differential increases, the value of below investment grade securities in the Fund's portfolio could be adversely affected.

Like higher rated fixed income securities, below investment grade securities generally are purchased and sold through dealers who make a market in such securities for their own accounts. However, there may be fewer dealers in the below investment grade securities market, which market may be less liquid than the market for higher rated fixed income securities, even under normal economic conditions. Also, there may be significant disparities in the prices quoted for below investment grade securities by various dealers. As a result, during periods of high demand in the below investment grade securities market, it may be difficult to acquire below investment grade securities appropriate for investment by the Fund. Adverse economic conditions and investor perceptions thereof (whether or not based on economic reality) may impair liquidity in the below investment grade securities market and may cause the prices the Fund receives for its below investment grade securities to be reduced. In addition, the Fund may experience difficulty in liquidating a portion of its portfolio when necessary to meet the Fund's liquidity needs or in response to a specific economic event such as deterioration in the creditworthiness of the issuers. Under such conditions, judgment based on non-observable inputs may play a greater role in valuing certain of the Fund's portfolio instruments than in the case of

instruments trading in a more liquid market. In addition, the Fund may incur additional expense to the extent that it is required to seek recovery upon a default on a portfolio holding or to participate in the restructuring of the obligation.

Table of Contents

Credit ratings are determined by credit rating agencies such as S&P and Moody's. Any shortcomings or inefficiencies in credit rating agencies' processes for determining credit ratings may adversely affect the credit ratings of securities held by the Fund and, as a result, may adversely affect those securities' perceived or actual credit risk.

Options Risk. There are several risks associated with transactions in options on securities, as follows:

There are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives.

As the writer of a covered call option, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline.

The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it may not be able to effect a closing purchase transaction in order to terminate its obligation under the option and must then deliver the underlying security at the exercise price.

There can be no assurance that a liquid market will exist when the Fund seeks to close out an option position. If the Fund were unable to close out a covered call option that it had written on a security, it would not be able to sell the underlying security unless the option expired without exercise.

The hours of trading for options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that cannot be reflected in the options markets.

The value of call options will be affected by changes in the value and dividend rates of the underlying securities, an increase in interest rates, changes in the actual or perceived volatility of the stock market and the underlying securities and the remaining time to the option's expiration. Additionally, the exercise price of an option may be adjusted downward before the option's expiration as a result of the occurrence of events affecting the underlying security. A reduction in the exercise price of an option would reduce the Fund's capital appreciation potential on the underlying security.

If a call option purchased by the Fund is not sold when it has remaining value, and if the market price of the underlying security remains equal to or less than the exercise price, the Fund will lose its entire investment in the option.

If a put option purchased by the Fund is not sold when it has remaining value, and if the market price of the underlying security remains equal to or greater than the exercise price, the Fund will lose its entire investment in the option.

Real Estate Investment Trusts Risks. REITs pool investors' capital to purchase or finance real estate. The market value of REIT shares and the ability of REITs to distribute income may be adversely affected by numerous factors, including rising interest rates, changes in the national, state, and local economic climate and real estate conditions, perceptions of prospective tenants of the safety, convenience and attractiveness of the properties, the ability of the owners to provide adequate management, maintenance and insurance, the cost of complying with the Americans with Disabilities Act, increasing competition and compliance with environmental laws, changes in real estate taxes and other operating expenses, adverse changes in governmental rules and fiscal policies, adverse changes in zoning laws, and other factors beyond the control of the issuers. In addition, distributions received by the Fund from REITs may be attributable to net investment income, net realized capital gains, and/or returns of capital. Dividends paid by REITs generally do not qualify for the reduced federal income tax rates applicable to qualified dividend income under the Code. See *Tax Considerations* in the SAI. REITs are subject to interest rate risk and prepayment risk. Changes in prevailing interest rates affect not only the value of REIT shares but may impact the market value of the REIT's investment real estate. Investing in REITs also involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. REITs are dependent upon the skills of their managers and are not diversified by industry. REITs are generally dependent upon maintaining cash flows to repay borrowings and to make distributions to shareholders and are subject to the risk of default by lessees or borrowers. REITs may have limited financial resources and may trade less frequently and in a more limited volume, and may be subject to more abrupt or erratic price movements than larger company securities.

Table of Contents

Securities of Other Investment Companies Risks. An investment in shares of other investment companies involves substantially the same risks as investing directly in the underlying instruments that such investment companies hold, including the risk that the value of the portfolio securities may fluctuate in accordance with changes in the financial condition of their issuers, the value of stocks and other securities generally, and other market factors, and the risk that the price of the shares of the investment company can fluctuate up or down. There can be no assurance that the investment objective of any investment company in which the Fund invests will be achieved. Consequently, the Fund could lose money investing in another investment company if the prices of the securities owned by the investment company decline in value. Investment companies typically incur advisory fees and other expenses. The Fund, as a shareholder, will indirectly bear its *pro rata* portion of such fees and expenses in addition to the Fund's direct fees and expenses, so shareholders of the Fund will be subject to duplication of fees on investments by the Fund in other investment companies. In addition, the Fund could incur a sales charge in connection with purchasing an investment company security or a redemption fee upon the redemption of such security.

In addition, closed end funds, ETFs, and BDCs in which the Fund may invest are subject to the following risks that do not apply to open end funds: (i) market price of shares may trade above or below their NAV; (ii) an active trading market for shares may not develop or be maintained; and (iii) trading of shares may be halted if the listing exchange's officials deem such action appropriate, the shares are delisted from the exchange, or the activation of market wide circuit breakers (which are tied to large decreases in stock prices) halts stock trading. In the case of leveraged closed end funds, ETFs, and BDCs, their share price and NAV may fluctuate to a greater extent and be more volatile than un-leveraged closed end funds, ETFs, and BDCs.

Business Development Companies Risk. Because BDCs typically invest in small and medium-sized companies, a BDC's portfolio is subject to the risks inherent in investing in smaller companies, including that portfolio companies may be dependent on a small number of products or services and may be more adversely affected by poor economic or market conditions. Some BDCs invest substantially, or even exclusively, in one sector or industry group and therefore the BDC may be susceptible to adverse conditions and economic or regulatory occurrences affecting the sector or industry group, which tends to increase volatility and result in higher risk. Investments in BDCs are also subject to management risk, including management's ability to meet the BDC's investment objective, and to manage the BDC's portfolio during periods of market turmoil and as investor's perceptions regarding a BDC or its underlying investments change.

Securities of Small and Mid-Capitalization Companies Risks. The Fund may invest in small or mid-sized companies (generally a market capitalization of \$5 billion or less). Accordingly, the Fund may be subject to the additional risks associated with investment in these companies. The market prices of the securities of such companies tend to be more volatile than those of larger companies. Further, these securities tend to trade at a lower volume than those of larger companies. If the Fund is heavily invested in these securities and the value of these securities declines, the Fund may be susceptible to significant losses.

Preferred Stock Risks. In addition to equity securities risk and possibly below investment grade securities risk, investment in preferred stocks involves certain other risks. Certain preferred stocks contain provisions that allow an issuer under certain conditions to skip or defer distributions. Preferred stocks often are subject to legal provisions that allow for redemption in the event of certain tax or legal changes or at the issuer's call. In the event of redemption, the Fund may not be able to reinvest the proceeds at comparable rates of return. Preferred stocks are subordinated to bonds and other debt securities in an issuer's capital structure in terms of priority for corporate income and liquidation payments, and therefore will be subject to greater credit risk than those debt securities. Preferred stocks may trade less frequently and in a more limited volume and may be subject to more abrupt or erratic price movements than many other securities, such as common stocks, corporate debt securities, and U.S. government securities.

Table of Contents

If the Fund owns preferred stock on which the dividend otherwise payable thereon is deferred, the Fund may be required to include the amount of the deferred dividend in its gross income for tax purposes despite the fact that it does not currently receive such amount. In order to receive the special treatment accorded to RICs and their shareholders under the Code and to avoid federal income and/or excise taxes at the Fund level, the Fund may be required to distribute this income to its shareholders in the taxable year in which the income is included (without a corresponding receipt of cash). See *Tax Considerations* in the SAI. Therefore, the Fund may be required to pay out as an income distribution in any such taxable year an amount greater than the total amount of cash income the Fund actually received and to sell portfolio securities, including at potentially disadvantageous times or prices, to obtain cash needed for that distribution.

Foreign Securities Risks. The Fund may invest in securities of issuers domiciled outside the United States. Investing in the securities of foreign companies may involve additional risks and considerations that are not typically associated with investing in the securities of U.S. companies. Since the securities of foreign companies are normally denominated in foreign currencies, the Fund may be affected favorably or unfavorably by changes in currency rates and in exchange control regulations, and may incur costs in connection with conversions between various currencies. As foreign companies are not generally subject to accounting, auditing, tax, and financial reporting standards, practices and requirements comparable to those applicable to U.S. companies, comparable information may not be readily available about certain foreign companies. Some securities of foreign companies may be less liquid and more volatile than securities of comparable U.S. companies. In addition, in certain foreign countries, there is the possibility of expropriation or confiscatory taxation, political or social instability, or diplomatic developments that could affect U.S. investments in the securities of issuers domiciled in those countries.

U.S. Government Securities Risks. Historically, U.S. government securities have not been perceived to involve the general credit risks associated with investments in other types of debt securities and, as a result, the yields available from U.S. government securities are generally lower than the yields available from other debt securities. Like other debt securities, however, the values of U.S. government securities change as interest rates fluctuate. Fluctuations in the value of portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund's NAV. In addition, not all securities issued by the U.S. government and its agencies and instrumentalities are backed by the full faith and credit of the U.S. Treasury. Although the Fund may hold securities that carry U.S. government guarantees, these guarantees do not extend to Shares of the Fund itself and do not guarantee the market price of the securities.

Illiquid and Restricted Securities Risks. Liquidity relates to the time in which the Fund reasonably expects an investment would be convertible to cash in current market conditions without significantly changing the market value of the investment. An illiquid investment is an investment that the Fund reasonably expects cannot be sold in current market conditions in seven calendar days without significantly changing the market value of the investment. The relative illiquidity of some of the Fund's portfolio securities may adversely affect the ability of the Fund to dispose of such securities in a timely manner and at a fair price at times when it might be necessary or advantageous for the Fund to liquidate portfolio securities. Investing in Rule 144A securities could have the effect of increasing the level of Fund illiquidity to the extent that qualified institutional buyers become, for a time, uninterested in purchasing these securities. The risks associated with these investments will be greater during times the Fund's operations require cash, such as if the Fund pays distributions, and could result in the Fund borrowing to meet short-term cash requirements or incurring capital losses on the sale of these investments. The market for less liquid securities tends to be more volatile than the market for more liquid securities and market values of relatively illiquid securities may be more susceptible to change as a result of adverse publicity and investor perceptions than are the market values of more liquid securities. Restricted securities have contractual or legal restrictions on resale to the general public or certain institutions, which may make it more difficult to value them, limit the Fund's ability to dispose of them, and lower the amount the Fund could realize upon their sale.

Counterparty Risk. The Fund will be subject to credit risk with respect to the counterparties to an options contract, repurchase agreement, loan of portfolio securities, or other future obligation. While the Fund does not employ specific creditworthiness standards when selecting counterparties, it seeks to engage in transactions with creditworthy counterparties. Certain entities that have served as counterparties have incurred significant losses and financial hardships, including bankruptcy. There can be no assurance that the Fund's counterparties will not experience continuing difficulties, possibly resulting in losses to the Fund. If a counterparty becomes bankrupt, or otherwise fails to perform its obligations due to financial difficulties or otherwise, the Fund may experience significant delays in obtaining any recovery in a bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances. The Fund has no limit on the amount of assets it may subject to any one counterparty.

Table of Contents

Master Limited Partnership Risk. Limited partners in an MLP typically have limited control and limited rights to vote on matters affecting the partnership. There also are certain tax risks associated with the MLPs in which the Fund may invest, including the possibility that the IRS could challenge the federal income tax treatment of the MLPs in which the Fund invests. The tax risks of investing in an MLP are generally those inherent in investing in a partnership as compared to a corporation. Since cash distributions received by the Fund from an MLP may not correspond to the amount of income allocated to the Fund by the MLP in any given taxable year, the Fund may have to dispose of its portfolio investments under disadvantageous circumstances in order to generate sufficient cash to satisfy the distribution requirements for maintaining the Fund's status as a RIC and avoiding any income and excise taxes at the Fund level. If an MLP in which the Fund invests fails to qualify as a qualified publicly traded partnership, as defined in the Code (and is not otherwise taxed as a corporation), income generated by such an MLP may not constitute good income and may thus jeopardize the Fund's status as a RIC for federal income tax purposes. MLPs may also be subject to state taxes in some jurisdictions. These tax risks, and any adverse determination with respect thereto, could have a negative impact on the after-tax income available for distribution by the MLPs and the value of the Fund's investments in an MLP.

Other Risks to Consider

Market Discount from Net Asset Value. Shares of closed end funds frequently trade at a discount from their NAV. This characteristic is a risk separate and distinct from the risk that the Fund's NAV has in the past, and therefore could in the future, decrease as a result of its investment activities. The Fund and the Investment Manager cannot predict whether Shares will trade at, below or above NAV. The risk of holding Shares that might trade at a discount is more pronounced for investors expecting to sell their Shares in a relatively short period of time after acquiring them because, for those investors, realization of a gain or loss on their investments is likely to be more dependent upon the existence of a premium or discount than upon portfolio performance. The Shares are designed primarily for long term investors and should not be considered a vehicle for trading purposes. The NAV of the Shares will fluctuate with price changes of the Fund's portfolio securities, and these fluctuations are likely to be greater to the extent that the Fund uses leverage.

Distribution Policy Risk. The Fund makes quarterly dividend payments or other distributions to its shareholders that reflect its distribution policy to provide shareholders with a relatively stable cash flow per share, although the dividend amount per share was adjusted lower in 2016 and 2017 from prior periods. The distribution policy and amount per share may be changed or discontinued without notice. Such distributions do not match the Fund's investment income and capital gains and do not represent yield or investment return. The distributions are paid from net investment income and any net capital gains, with the balance representing return of capital.

A return of capital will generally not be taxable, but will reduce each shareholder's cost basis in Fund shares (but not below zero) and will result in a higher reported capital gain or lower reported capital loss when those shares on which the distributions were received are ultimately sold. Any return of capital in excess of a shareholder's basis, however, is taxable as a capital gain. A substantial portion of the Fund's annual distributions have historically consisted of returns of capital. Even though the Fund may realize current year capital gains, such gains may be offset, in whole or in part, by the Fund's capital loss carryovers from prior years. Capital losses incurred in taxable years beginning after December 22, 2010, are allowed to be carried forward indefinitely and retain the character of the original loss. As a transition rule, post-enactment net capital losses are required to be utilized before pre-enactment net capital losses. The Fund has a net capital loss carryover as of December 31, 2016 of \$1,442,265 which expires in 2018. Pursuant to the 1940 Act and other applicable laws, a notice normally will accompany each distribution estimating the source(s) of the distribution when it is from a source other than the Fund's accumulated undistributed net income or net income for the current or preceding fiscal year. The actual determination of the source of the Fund's distributions can be made only after year end.

The distribution policy may, under certain circumstances, have certain adverse consequences to the Fund and its shareholders. If the Fund's investments do not generate sufficient income, the Fund may be required to liquidate a portion of its portfolio to fund these distributions at a time when it would otherwise not do so. If the Fund distributes amounts in excess of its net investment income and realized net capital gains, such distributions will decrease the Fund's capital and, therefore, have the potential effect of increasing the Fund's expense ratio. In addition, the maintenance of the Fund's distribution policy may cause the Fund's assets to be less fully invested than would otherwise be the case, which could reduce the Fund's total investment return. Furthermore, the Fund may need to raise additional capital in order to maintain the distribution policy.

Table of Contents

Securities Lending Risk. Securities lending involves possible delay in recovery or loss of the lent securities or possible loss of rights in the lent securities or collateral or both should the borrower fail to perform due to financial inability or otherwise. As a result, the value of the Shares may fall. The value of the Shares could also fall if a loan is called and the Fund is required to liquidate collateral at a loss or if the Investment Manager is unable to invest cash collateral at rates which exceed the costs involved.

Management Risk. The Fund is subject to management risk because it is an actively managed investment portfolio. The Investment Manager will seek to achieve the investment objectives of the Fund, but there can be no guarantee that it will be successful. Moreover, the Fund may, from time to time, make temporary investments for defensive purposes that are inconsistent with the Fund's principal investment strategies in attempting to respond to adverse market, economic, political, or other conditions, pending investment of the proceeds of sales of portfolio securities, pending investment of the proceeds from Share offerings, or at other times when suitable investments are not otherwise available. To the extent the Fund takes temporary defensive positions, it may not achieve its investment objectives.

Valuation Risk. The Fund may invest in securities and other assets for which market quotations are not readily available or reliable. For example, unlike most publicly traded common stocks which trade on national exchanges, bonds generally do not trade on national exchanges but rather trade in the over-the-counter markets. These markets often may not provide readily available or reliable market quotations and consequently the valuation of bonds may carry more risk than that of publicly traded common stock. Securities for which market quotations are not readily available or reliable and other assets may be valued as determined in good faith by the Investment Manager's Valuation Committee under the direction of or pursuant to procedures approved by the Board. Certain securities may be priced through pricing services that may utilize a matrix pricing system which takes into consideration factors such as yields, prices, maturities, call features, and ratings on comparable securities or according to prices quoted by a securities dealer that offers pricing services. Uncertainties in the conditions of the financial market, unreliable reference data, lack of transparency, and inconsistency of valuation models and processes may lead to inaccurate asset pricing. Due to the inherent uncertainty of valuation, such fair value pricing values may differ from the values that would have been used had a readily available market for the securities existed. These differences in valuation could be material. A security's valuation may differ depending on the method used for determining value. The use of fair value pricing by the Fund may cause the NAV of its shares to differ from the NAV that would be calculated using market prices. A fair value price is an estimate and there is no assurance that such price will be at or close to the price at which a security is next quoted or next trades.

Cybersecurity Risk. With the increased use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through hacking or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (*i.e.*, efforts to make network services unavailable to intended users). Cyber incidents affecting the Fund or its service providers may cause disruptions and impact business operations, potentially resulting in financial losses, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional related costs. Similar adverse consequences could result from cyber incidents affecting issuers of securities in which the Fund invests, counterparties with which the Fund engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for shareholders) and other parties. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. While the Fund's service providers may have established business continuity plans in the event of, and risk management systems to prevent, such cyber

incidents, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified. Furthermore, the Fund cannot control the cyber security plans and systems put in place by its service providers or any other third parties whose operations may affect the Fund or its shareholders. As a result, in the event of a cyber incident, the Fund and its shareholders could be negatively impacted.

Table of Contents

Anti-Takeover Provisions

The Fund has certain provisions in its Governing Documents that may be regarded as anti-takeover provisions. These provisions could have the effect of limiting, among other things: (i) the ability of other entities or persons to acquire control of the Fund; (ii) the Fund's freedom to engage in certain transactions; (iii) the ability of the Board or shareholders to amend the Governing Documents or effectuate changes in the Fund's management; or (iv) the ability of the Fund's shareholders to make derivative claims against the Fund. The overall effect of these provisions is to render more difficult the accomplishment of a merger with, or the assumption of control by, a shareholder, or the conversion of the Fund to open end status. These provisions may have the effect of depriving Fund shareholders of an opportunity to sell their Shares at a premium above the prevailing market price by discouraging a third party from seeking to obtain control of the Fund. See Description of the Securities Certain Anti-Takeover Provisions in the Governing Documents.

CAUTIONARY NOTICE REGARDING FORWARD-LOOKING STATEMENTS

This Prospectus and the SAI contain forward-looking statements. Forward-looking statements can be identified by the words may, will, intend, expect, estimate, continue, plan, anticipate, and similar terms and the negative By their nature, all forward-looking statements involve risks and uncertainties, and actual results could differ materially from those contemplated by the forward-looking statements. Several factors that could materially affect the Fund's actual results are the performance of the portfolio of securities the Fund holds, the conditions in the U.S. and international financial and other markets, the price at which the Shares will trade, and other factors discussed in the Fund's periodic filings with the SEC.

Actual results could differ materially from those projected or assumed in the forward-looking statements. The Fund's future financial condition and results of operations, as well as any forward-looking statements, are subject to change and are subject to inherent risks and uncertainties, such as those disclosed in the Special Considerations and Risk Factors section of this Prospectus. All forward-looking statements contained or incorporated by reference in this Prospectus and any Prospectus Supplement are made as of the date set forth on the applicable cover page. Except for the Fund's ongoing obligations under the federal securities laws, the Fund does not intend, and it undertakes no obligation, to update any forward-looking statement. Any forward-looking statements contained in this Prospectus and any Prospectus Supplement are excluded from the safe harbor protection provided by Section 27A of the Securities Act.

Currently known risk factors that could cause actual results to differ materially from the Fund's expectations include, but are not limited to, the factors described in the Special Considerations and Risk Factors section of this Prospectus. You are urged to review carefully that section for a more complete discussion of the risks of an investment in the Shares.

MANAGEMENT OF THE FUND

Board of Trustees

The management of the Fund, including general supervision and oversight of the duties performed by the Investment Manager, is the responsibility of the Board. The Board is currently comprised of four Trustees, one of whom is an interested person (as defined in the 1940 Act) of the Fund. For certain information regarding the Trustees and Officers of the Fund, see Management of the Fund Board of Trustees and Executive Officers in the SAI.

The Investment Manager

The Fund's Investment Manager is Bexil Advisers LLC, a Maryland limited liability company organized in 2010 and registered as an investment adviser under the Investment Advisers Act of 1940, as amended. The Investment Manager became the investment manager of the Fund on February 1, 2011. It does not currently manage any other

Table of Contents

investment companies, although its portfolio management personnel, individually and collectively, provide investment management services to one other closed end fund and two open end funds (collectively with the Fund, the Fund Complex) through an affiliated registered investment adviser. The Investment Manager's principal business address is 11 Hanover Square, New York, New York 10005. It is a wholly owned subsidiary of Bexil Corporation, a holding company, which has another subsidiary, Bexil Securities LLC, a registered broker-dealer.

The Investment Manager manages the Fund's portfolio and the investment and reinvestment of the Fund's assets, including the regular furnishing of advice with respect to the Fund's portfolio transactions, subject at all times to the control and oversight of the Board. For these services, the Fund pays the Investment Manager a monthly fee at the annual rate of 0.95% of the Fund's managed assets. Managed assets means the average weekly value of the Fund's total assets minus the sum of the Fund's liabilities, which liabilities exclude debt relating to leverage, short-term debt and the aggregate liquidation preference of any outstanding preferred stock. During periods in which the Fund is utilizing leverage, the fees payable to the Investment Manager will be greater than if the Fund did not utilize a leveraged capital structure because the fees are calculated as a percentage of the Fund's assets, including those purchased with leverage. The Board annually considers the continuance of the Investment Management Agreement with the Investment Manager. A discussion regarding the basis for the approval of the current Investment Management Agreement with the Investment Manager is available in the Fund's Semi-Annual Report to Shareholders for the period ended June 30, 2017.

Because the Investment Manager receives a fee based on the Fund's assets, the Investment Manager will benefit from an increase in assets that results from the offering of Shares. It is not possible to state precisely the amount of additional compensation that the Investment Manager might receive as a result of an offering of Shares because it is not known how many Shares will be sold and because the proceeds of any offering will be invested in additional portfolio securities, which will fluctuate in value. Nevertheless, set forth below is an illustration of the immediate impact the Fund's prior rights offerings had on the Investment Manager's compensation.

Year	Net Proceeds from Sale of Shares	
	in Prior Rights Offerings	Investment Management Fees on Net Proceeds
2011	\$	\$
2013	\$	\$
2015	\$	\$

Portfolio Management

From February 1, 2011 through February 28, 2014, the daily portfolio management of the Fund was provided by the Investment Policy Committee of the Investment Manager, comprised of: Thomas B. Winmill, Chairman; John F. Ramirez, Director of Fixed Income; Heidi Keating, Vice President-Trading; and Mark C. Winmill, Chief Investment Strategist. From March 1, 2014 to August 31, 2017, Thomas Winmill had sole portfolio management responsibility for the Fund. Effective September 1, 2017, Thomas Winmill and William M. Winmill serve as co-portfolio managers of the Fund.

Mr. Thomas B. Winmill currently serves as Chairman, President, Chief Executive Officer, Chief Legal Officer, and a Trustee or Director of the Fund, Foxby Corp., and Midas Series Trust. He is Chairman, President, Chief Executive Officer, and Chief Legal Officer, as applicable, of the Investment Manager and Midas Management Corporation (registered investment advisers), Bexil Securities LLC and Midas Securities Group, Inc. (registered broker-dealers), Bexil Corporation, Winmill & Co. Incorporated, and their subsidiaries. He is a Director of Global Self Storage, Inc.

He is Chairman of the Investment Policy Committee of each of the Advisers, and he is a portfolio manager of Midas Fund, Midas Magic and Foxby Corp. He is the father of William M. Winmill and brother of Mark C. Winmill.

Mr. William M. Winmill currently serves as co-portfolio manager of Foxby Corp., Vice President of the Fund, Foxby Corp., and Midas Series Trust, Vice President and Investment Analyst of the Investment Manager and Midas Management Corporation, and Vice President or Assistant Vice President of Bexil Corporation, Global Self Storage, Inc., Tuxis Corporation, Winmill & Co. Incorporated, and certain of their subsidiaries. From 2014 to 2016, he served these companies as Compliance Assistant and Accounting Assistant, after graduating from Bowdoin College in 2014. He is a member of the Investment Policy Committee of each of the Advisers. He is the son of Thomas B. Winmill and nephew of Mark C. Winmill.

Table of Contents

The SAI provides additional information about Mr. Thomas B. Winmill's and Mr. William M. Winmill's compensation, other accounts managed, and ownership of Shares.

Custodian, Securities Lending Agent, and Liquidity Agreement Counterparty, and Transfer and Dividend Disbursing Agent

State Street Bank and Trust Company, 801 Pennsylvania, Kansas City, MO 64105, acts as custodian of the Fund's investments and may appoint one or more sub-custodians. The custodian is responsible for the safekeeping of Fund assets and, with its affiliates, acts as a securities lending and borrowing agent and a securities broker for portfolio transactions by the Fund. In addition, the Fund has entered into the Liquidity Agreement with State Street Bank and Trust Company. American Stock Transfer & Trust Company, LLC, 6201 15th Avenue, Brooklyn, NY 11219, acts as the Fund's transfer and dividend disbursing agent and plan agent for the Fund's Dividend Reinvestment Plan.

Fund Expenses

The Fund pays all the expenses required for the conduct of its business including, but not limited to: fees of the Investment Manager; fees and commissions in connection with the purchase and sale of portfolio securities for the Fund; costs, including the interest expense, of borrowing money; fees and premiums for the fidelity bond required by Section 17(g) of the 1940 Act, or other insurance; taxes levied against the Fund and the expenses of preparing tax returns and reports; auditing fees and expenses; legal fees and expenses (including reasonable fees for legal services rendered to the Fund by the Investment Manager or its affiliates); salaries and other compensation of (i) any of the Fund's officers and employees who are not officers, trustees, members or employees of the Investment Manager or any of its affiliates, and (ii) the Fund's chief compliance officer to the extent determined by the Trustees who are not interested persons of the Investment Manager or its affiliates (as defined by the 1940 Act) (Independent Trustees); fees and expenses incidental to Board and shareholder meetings of the Fund, the preparation and mailings of proxy material, prospectuses, and reports of the Fund to its shareholders, the filing of reports with regulatory bodies, and the maintenance of the Fund's legal existence; costs of the listing (and maintenance of such listing) of the Shares on stock exchanges, and the registration of Shares with federal and state securities authorities; payment of dividends; costs of stock certificates; fees and expenses of the Independent Trustees; fees and expenses for accounting, administration, bookkeeping, broker-dealer record keeping, clerical, compliance, custody, dividend disbursing, fulfillment of requests for Fund information, proxy soliciting, securities pricing, registrar, and transfer agent services (including costs and out-of-pocket expenses payable to the Investment Manager or its affiliates for such services); costs of necessary office space rental and Fund web site development and maintenance; costs of membership dues and charges of investment company industry trade associations; and such non-recurring expenses as may arise, including, without limitation, actions, suits or proceedings affecting the Fund and the legal obligation which the Fund may have to indemnify its officers and Trustees or settlements made.

The Investment Manager will supply the Fund and the Board with reports and statistical data, as reasonably requested. In addition, if requested by the Board, the Investment Manager or its affiliates may provide services to the Fund such as, without limitation, accounting, administration, bookkeeping, broker-dealer record keeping, clerical, compliance, custody, dividend disbursing, fulfillment of requests for Fund information, proxy soliciting, securities pricing, registrar, and transfer agent services. Any reports, statistical data, and services so requested or approved by the Board, and supplied or performed by the Investment Manager, will be for the account of the Fund and the costs and out-of-pocket charges of the Investment Manager and its affiliates in providing such reports, statistical data, or services shall be paid by the Fund, subject to periodic reporting to and examination by the Independent Trustees.

Portfolio Transactions

Under the Investment Management Agreement, the Investment Manager shall direct portfolio transactions to broker-dealers for execution on terms and at rates which it believes, in good faith, to be reasonable in view of the overall nature and quality of services provided by a particular broker-dealer, including brokerage and research services. Subject to the foregoing and applicable laws, rules, and regulations, the Investment Manager may also allocate

Table of Contents

portfolio transactions to broker-dealers that remit a portion of their commissions as a credit against Fund expenses. With respect to brokerage and research services, the Investment Manager may consider in the selection of broker-dealers, brokerage or research provided and payment may be made of a fee higher than that charged by another broker-dealer that does not furnish brokerage or research services or that furnishes brokerage or research services deemed to be of lesser value, so long as the criteria of applicable provisions of the Securities Exchange Act of 1934, as amended (the Exchange Act), or other applicable laws are met.

Although the Investment Manager may direct portfolio transactions without necessarily obtaining the lowest price at which a broker-dealer, or another, may be willing to do business, the Investment Manager shall seek the best value for the Fund on each trade that circumstances in the market place permit, including the value inherent in on-going relationships with quality brokers. To the extent any such brokerage or research services may be deemed to be additional compensation to the Investment Manager from the Fund, it is authorized by the terms of the Investment Management Agreement.

The Investment Manager may place brokerage for the Fund through an affiliate of the Investment Manager, provided that such brokerage is undertaken in compliance with applicable law. The Investment Manager's fees under the Investment Management Agreement will not be reduced by reason of any commissions, fees or other remuneration received by an affiliate of the Investment Manager from the Fund for brokerage services.

CALCULATION OF NET ASSET VALUE PER SHARE

The NAV per Share is computed as of the scheduled close of regular trading (regardless of an actual, unscheduled earlier closing due to weather, equipment failure, or other factors) on the NYSE (ordinarily 4:00 p.m., ET, and typically 1:00 p.m., ET around certain holidays), once a week on the last business day of each week on which the NYSE is open and on the last business day of each month on which the NYSE is open. The NYSE is scheduled to be open Monday through Friday throughout the year except for New Year's Day, Martin Luther King, Jr. Day, Presidents Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas. When the NYSE is closed, the Fund will generally be closed and NAV calculations will not be made.

The Fund's NAV per Share is computed by adding the value of all securities and other assets in the Fund's portfolio, deducting any liabilities (including accrued expenses, dividends payable on Shares and any borrowings of the Fund), and dividing the result by the number of Shares outstanding. Portfolio securities are valued by various methods depending on the primary market or exchange on which they trade. Most equity securities for which the primary market is in the United States are valued at the official closing price, last sale price or, if no sale has occurred, at the closing bid price. Most equity securities for which the primary market is outside the United States are usually valued using the official closing price or the last sale price in the principal market in which they are traded. If the last sale price on the local exchange is unavailable, the last evaluated quote or closing bid price normally is used. In the event of an unexpected closing of the primary market or exchange, a security may continue to trade on one or more other markets, and the price as reflected on those other trading venues may be more reflective of the security's value than an earlier price from the primary market or exchange. Accordingly, the Fund may seek to use these additional sources of pricing data or information when prices from the primary market or exchange are unavailable, or are earlier and less representative of current market value. Certain securities may be priced through pricing services that may utilize a matrix pricing system which takes into consideration factors such as yields, prices, maturities, call features, and ratings on comparable securities or according to prices quoted by a securities dealer that offers pricing services. Open end investment companies are valued at their NAV. Foreign securities markets may be open on days when the U.S. markets are closed. For this reason, the value of any foreign securities owned by the Fund could change on a day when shareholders cannot buy or sell shares of the Fund. Securities for which market quotations are not readily available or

reliable and other assets may be valued as determined in good faith by the Investment Manager's Valuation Committee under the direction of or pursuant to procedures approved by the Board. Due to the inherent uncertainty of valuation, fair value pricing values may differ from the values that would have been used had a readily available or reliable market quotation for the securities existed. These differences in valuation could be material. A security's valuation may differ depending on the method used for determining value. The use of fair value pricing by the Fund may cause the NAV of its Shares to differ from the NAV that would be calculated using market prices. A fair value price is an estimate and there is no assurance that such price will be at or close to the price at which a security is next quoted or next trades.

Table of Contents**MARKET PRICE INFORMATION**

The Fund's outstanding Shares are, and when issued, the Shares offered by this Prospectus will be, publicly held and listed and traded on the NYSE under the symbol DNI. The following table sets forth for the calendar quarters indicated: (i) the high and low closing sales prices per Share as reported by the NYSE; (ii) the NAV per Share on the day of the high or low closing sales price; and (iii) the percentage by which the Shares traded at a premium over, or discount from, the Fund's high and low NAVs per Share. The table also sets forth the number of Shares traded on the NYSE during the respective quarters.

Quarter Ended	High Sales Price	High Net Asset Value	Premium	Low Sales Price	Low Net Asset Value	Premium	Trading Volume
			(Discount) to High NAV			(Discount) to Low NAV	
3/31/16	\$ 11.16	\$ 13.54	17.58%	\$ 9.48	\$ 11.93	20.54%	3,070,604
6/30/16	\$ 11.41	\$ 13.59	16.04%	\$ 10.51	\$ 12.38	15.11%	2,559,093
9/30/16	\$ 11.81	\$ 13.95	15.34%	\$ 10.85	\$ 12.99	16.51%	2,077,926
12/31/16	\$ 12.09	\$ 14.81	18.37%	\$ 10.60	\$ 13.07	18.90%	2,970,266
3/31/17	\$ 12.56	\$ 15.07	16.66%	\$ 11.88	\$ 14.51	18.13%	2,943,635
6/30/17	\$ 12.38	\$ 14.96	17.25%	\$ 11.86	\$ 14.44	17.87%	3,188,065
9/30/17	\$ 12.86	\$ 15.44	16.71%	\$ 12.09	\$ 14.76	18.09%	2,216,112

The Shares have traded in the market at a premium to, at, and at a discount from NAV since the commencement of the Fund's operations in June 1998. There is no guarantee that the Fund's current distribution policy to provide shareholders with a relatively stable cash flow per share will have the effect of reducing or eliminating the discount. The distribution policy may be changed or discontinued without notice.

Although the Shares may trade in the market for a substantial period of time at a substantial discount from the Fund's then current NAV per share, the Board has no fiduciary duty to take action, or to consider taking action, to narrow any such discount, and no assurance can be given that the Board will consider or take action to authorize any activities related to the discount, or if such activities are undertaken, the Shares will thereafter trade at less of a discount. Under certain circumstances, a shareholder vote may be required to authorize such activities. See Description of the Securities Share Repurchases and Tender Offers.

On [insert latest practicable date], the last reported sales price of the Shares on the NYSE was \$[] and the NAV per Share was \$[], representing a discount from NAV per Share of []%.

DISTRIBUTION POLICY

The Fund makes quarterly dividend payments or other distributions to its shareholders that reflect its distribution policy to provide shareholders with a relatively stable cash flow per share. The dividend amount per share was adjusted lower in 2016 and 2017 to more closely reflect the net income generated by the Fund's investments, the current market price and net asset value of the Fund's shares, the total distribution amount relative to the Fund's net assets, and related matters. The distribution policy and amount per share may be changed or discontinued without notice. The distributions are paid from net investment income and any net capital gains, with the balance representing return of capital. If, for any distribution, the sum of previously undistributed net investment income and net realized capital gains is less than the amount of the distribution, the difference, i.e., the return of capital, will be charged against the Fund's capital. The Fund's distributions do not match its net investment income and net realized capital

gains and do not represent yield or investment return. The Fund's final distribution for each calendar year may include remaining net investment income and net capital gains otherwise undistributed during the year. See Tax Considerations in the SAI.

If, for any taxable year of the Fund (which ends on December 31), the total distributions exceed the sum of the Fund's net investment income and net realized short and long term capital gains, the excess will generally be treated first as ordinary dividend income (up to the amount, if any, of the Fund's current and accumulated earnings and

Table of Contents

profits, which takes into account taxable distributions) and then as a return of capital (tax-free for a shareholder up to the amount of its tax basis in its Shares). The amount treated as a tax-free return of capital will reduce a shareholder's adjusted basis in its Shares, thereby increasing the shareholder's potential gain or reducing its potential loss on the subsequent sale of those Shares. Any return of capital in excess of a shareholder's basis is taxable as a capital gain. A return of capital represents a return of a shareholder's original investment in the Shares and should not be confused with income or capital gain from this investment. See "Tax Considerations" in the SAI.

Dividends and other distributions generally will be taxable to shareholders, except to the extent treated as a tax-free return of capital, whether they are reinvested in Shares or received in cash. Pursuant to the 1940 Act and other applicable laws, a notice normally will accompany each distribution estimating the source(s) of the distribution when it is from a source other than the Fund's accumulated undistributed net income or net income for the current or preceding fiscal year.

The distribution policy may, under certain circumstances, have certain adverse consequences to the Fund and its shareholders. If the Fund's investments do not generate sufficient income, the Fund may be required to liquidate a portion of its portfolio to fund these distributions at a time when it would otherwise not do so. If the Fund distributes amounts in excess of its net investment income and realized net capital gains, such distributions will decrease the Fund's capital and, therefore, have the potential effect of increasing the Fund's expense ratio. In addition, the maintenance of the Fund's distribution policy may cause the Fund's assets to be less fully invested than would otherwise be the case, which could reduce the Fund's total investment return. Furthermore, the Fund may need to raise additional capital in order to maintain the distribution policy.

Under the 1940 Act, the Fund may not declare any dividend or other distribution upon any capital Shares, or purchase any such capital Shares, unless the aggregate indebtedness of the Fund has, at the time of the declaration of any such dividend or other distribution or at the time of any such purchase, an asset coverage of at least 300% after deducting the amount of such dividend, other distribution, or purchase price, as the case may be. In addition, certain lenders may impose additional restrictions on the payment of dividends or other distributions on the Shares in the event of a default on the Fund's borrowings. Any limitation on the Fund's ability to make distributions to the holders of its Shares could, under certain circumstances, impair its ability to maintain its qualification for taxation as a RIC. See "Tax Considerations" in the SAI.

DIVIDEND REINVESTMENT PLAN

The Fund has a Dividend Reinvestment Plan (the "Plan"). Each registered shareholder of the Fund will automatically be a participant in the Plan, unless the shareholder specifically elects to receive all dividends and capital gains in cash by notice to American Stock Transfer & Trust Company, LLC, 6201 15th Avenue, Brooklyn, NY 11219, 1-800-278-4353, as agent under the Plan (the "Agent"). The Agent will open an account for each shareholder under the Plan in the same name in which such shareholder's Shares are registered.

Whenever the Fund declares a capital gain distribution or an income dividend payable in Shares or cash, participating shareholders will take the distribution or dividend entirely in Shares and the Agent will automatically receive the Shares, including fractions, for the shareholder's account in accordance with the following: Whenever the Market Price (as defined below) per Share is equal to or exceeds the NAV per Share at the time Shares are valued for the purpose of determining the number of Shares equivalent to the cash dividend or capital gain distribution (the "Valuation Date"), participants will be issued additional Shares equal to the amount of such dividend divided by the lower of the Fund's NAV per Share or the Fund's Market Price per Share. Whenever the Market Price per Share is less than such NAV on the Valuation Date, participants will be issued additional Shares equal to the amount of such dividend divided by the

Market Price. The Valuation Date is the business day before the dividend or distribution payment date.

If the Fund should declare a dividend or capital gain distribution payable only in cash, the Agent will, as purchasing agent for the participating shareholders, buy Shares in the open market, or elsewhere, for such shareholders' accounts after the payment date, except that the Agent will endeavor to terminate purchases in the open market and cause the Fund to issue the remaining Shares if, following the commencement of the purchases, the Market Price of the Shares exceeds the NAV. These remaining Shares will be issued by the Fund at a price equal to the lower of the Fund's NAV per Share or the Market Price. In a case where the Agent has terminated open market purchases and

Table of Contents

caused the issuance of remaining Shares by the Fund, the number of Shares received by the participant in respect of the cash dividend or distribution will be based on the weighted average of prices paid for Shares purchased in the open market and the price at which the Fund issues remaining Shares. To the extent that the Agent is unable to terminate purchases in the open market before it has completed its purchases, or remaining Shares cannot be issued by the Fund because the Fund declared a dividend or distribution payable only in cash, and the Market Price exceeds the NAV of the Shares, the average Share purchase price paid by the Agent may exceed the NAV of the Shares, resulting in the acquisition of fewer Shares than if the dividend or capital gain distribution had been paid in Shares issued by the Fund.

The Agent will apply all cash received as a dividend or capital gain distribution to purchase Shares on the open market as soon as practicable after the payment date of the dividend or capital gain distribution, but in no event later than 45 days after that date, except when necessary to comply with applicable provisions of the federal securities laws.

For all purposes of the Plan: (i) the Market Price of the Shares on a particular date shall be the average of the volume weighted average sale prices or, if no sale occurred then the mean between the closing bid and asked quotations, for the Shares quoted on the NYSE on each of the five business days the Shares traded ex-dividend on the NYSE immediately prior to such date; and (ii) the NAV per Share on a particular date shall be as determined by or on behalf of the Fund.

The open market purchases provided for above may be made on any securities exchange on which the Shares are traded, in the over the counter market, or in negotiated transactions, and may be on such terms as to price, delivery and otherwise as the Agent shall determine. Funds held by the Agent uninvested will not bear interest, and it is understood that, in any event, the Agent shall have no liability in connection with any inability to purchase Shares within 45 days after the initial date of such purchase as provided in the Plan, or with the timing of any purchases effected. The Agent shall have no responsibility as to the value of the Shares acquired for the shareholder's account.

The Agent will hold Shares acquired pursuant to the Plan in non-certificated form in the Agent's name or that of its nominee. At no additional cost, a shareholder participating in the Plan may send to the Agent for deposit into its Plan account those certificated Shares of the Fund in its possession. These Shares will be combined with those unissued full and fractional Shares acquired under the Plan and held by the Agent. Shortly thereafter, such shareholder will receive a statement showing its combined holdings. The Agent will forward to the shareholder any proxy solicitation material and will vote any Shares so held for the shareholder only in accordance with the proxy returned by the shareholder to the Fund.

The Agent will confirm to the shareholder each acquisition for the shareholder's account as soon as practicable but not later than 60 days after the date thereof. Although the shareholder may from time to time have an individual fractional interest (computed to three decimal places) in a Share, no certificates for fractional Shares will be issued. However, dividends and distributions on fractional Shares will be credited to shareholders' accounts. In the event of a termination of a shareholder's account under the Plan, the Agent will adjust for any such undivided fractional interest in cash at the opening market value of the Shares at the time of termination.

Any stock dividends or split Shares distributed by the Fund on Shares held by the Agent for the shareholder will be credited to the shareholder's account. In the event that the Fund makes available to the shareholder the right to purchase additional Shares or other securities, the Shares held for a shareholder under the Plan will be added to other Shares held by the shareholder in calculating the number of rights to be issued to such shareholder. Transaction processing may either be curtailed or suspended until the completion of any stock dividend, stock split, or corporate action.

Edgar Filing: DIVIDEND & INCOME FUND - Form POS 8C

The Agent's service fee for handling capital gain distributions or income dividends will be paid by the Fund. The shareholder will be charged a *pro rata* share of brokerage commissions on all open market purchases. The shareholder may terminate the account under the Plan by notifying the Agent. A termination will be effective immediately if notice is received by the Agent three days prior to any dividend or distribution payment date. If the request is received less than three days prior to the payment date, then that dividend will be invested, and all subsequent dividends will be paid in cash.

Table of Contents

The above terms and conditions may be amended or supplemented by the Fund at any time or times but, except when necessary or appropriate to comply with applicable law or the rules or policies of the SEC or any other regulatory authority, only by mailing to the shareholder appropriate written notice at least 30 days prior to the effective date thereof. The amendment or supplement shall be deemed to be accepted by the shareholder unless, prior to the effective date thereof, the Agent receives written notice of the termination of such shareholder's account under the Plan. Any such amendment may include an appointment by the Fund of a successor agent in its place and stead under these terms and conditions, with full power and authority to perform all or any of the acts to be performed by the Agent. Upon any such appointment of an Agent for the purpose of receiving dividends and distributions, the Fund will be authorized to pay to such successor Agent all dividends and distributions payable on Shares held in the shareholder's name or under the Plan for retention or application by such successor Agent as provided in the Plan.

In the case of shareholders, such as banks, brokers or nominees, which hold Shares for others who are the beneficial owners, the Agent will administer the Plan on the basis of the number of Shares certified from time to time by the shareholders as representing the total amount registered in the shareholder's name and held for the account of beneficial owners who are to participate in the Plan.

Under the Plan, the Agent shall at all times act in good faith and agree to use its best efforts within reasonable limits to insure the accuracy of all services performed under the Plan and to comply with applicable law, but assumes no responsibility and shall not be liable for loss or damage due to errors unless the errors are caused by its negligence, bad faith or willful misconduct or that of its employees. Neither the Fund or the Agent will be liable for any act performed in good faith or for any good faith omission to act, including without limitation, any claim of liability arising out of (i) failure to terminate a shareholder's account, sell Shares, or purchase Shares, (ii) the prices which Shares are purchased or sold for the shareholder's account, and (iii) the time such purchases or sales are made, including price fluctuation in market value after such purchases or sales.

The automatic reinvestment of dividends and distributions will not relieve participants in the Plan of any federal, state or local income taxes that may be payable (or required to be withheld) on such dividends and distributions.

Shareholders participating in the Plan may receive benefits not available to shareholders not participating in the Plan. If the Market Price of, plus commissions on, the Shares is above their NAV, participants in the Plan will receive Shares at less than they could otherwise purchase them and will have Shares with a cash value greater than the value of any cash dividend or distribution they would have received on their Shares. If the Market Price of, plus commissions on, the Shares is below their NAV, participants will receive distributions in Shares with a NAV greater than the value of any cash distribution they would have received on their Shares. However, there may be insufficient Shares available in the market to make distributions in Shares at prices below the NAV. Also, since the Fund does not redeem its Shares, the price on resale may be more or less than the NAV.

The Fund reserves the right to amend or terminate the Plan at any time. There is no direct service charge to participants in the Plan, although the Fund reserves the right to amend the Plan to include a service charge payable by participants in the Plan.

All communications concerning the Plan should be directed to the Plan Agent at American Stock Transfer & Trust Company, LLC, 6201 15th Avenue, Brooklyn, NY 11219, 1-800-278-4353.

CERTAIN FEDERAL INCOME TAX CONSEQUENCES

The following discussion is a brief summary of certain federal income tax considerations affecting the Fund and the purchase, ownership, and disposition of the Shares. A more complete discussion of the tax rules applicable to the Fund and its shareholders can be found in the SAI that is incorporated by reference into this Prospectus. This discussion assumes you are a U.S. person (as defined for U.S. federal income tax purposes) and that you hold your Shares as capital assets. This discussion is based upon current provisions of the Code, the Treasury Regulations promulgated thereunder, and judicial and administrative authorities, all of which are subject to change or differing interpretations by the courts or the IRS, possibly with retroactive effect. No ruling has been or will be sought from the IRS regarding any matter discussed herein. No attempt is made to present a detailed explanation of all federal income tax concerns affecting the Fund and its shareholders.

Table of Contents

The discussion set forth herein does not constitute tax advice and potential investors are urged to consult their own tax advisers to determine the tax consequences to them of investing in the Fund.

Taxation of the Fund

The Fund has elected to be treated and intends to qualify, as a RIC under Subchapter M of the Code. To qualify, the Fund must, among other things, meet the following requirements regarding the source of its income and the diversification of its assets:

The Fund must derive in each taxable year at least 90% of its gross income from the following sources, which are referred to herein as **Qualifying Income** : (i) dividends, interest (including tax-exempt interest), payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities or foreign currencies, and other income (including but not limited to gain from options, futures and forward contracts) derived with respect to its business of investing in such stock, securities or foreign currencies; and (ii) net income derived from interests in qualified publicly traded partnerships (each, a **Qualified Publicly Traded Partnership**).

The Fund must diversify its holdings so that, at the end of each quarter of each taxable year (a) at least 50% of the market value of the Fund's total assets is represented by cash and cash items (including receivables), U.S. government securities, the securities of other RICs, and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the value of the Fund's total assets and not more than 10% of the outstanding voting securities of such issuer, and (b) not more than 25% of the market value of the Fund's total assets is invested in the securities (other than U.S. government securities and the securities of other regulated investment companies) of (i) any one issuer, (ii) any two or more issuers in which the Fund owns 20% or more of the voting stock and that are determined to be engaged in the same business or similar or related trades or businesses, or (iii) any one or more **Qualified Publicly Traded Partnerships**.

As a RIC, the Fund generally will not be subject to U.S. federal income tax on income and gains that the Fund distributes to its shareholders, provided that each taxable year it distributes at least the sum of (i) 90% of the Fund's investment company taxable income (which includes, among other items, dividends, interest and the excess of any net short-term capital gain over net long-term capital loss and other taxable income, other than any net long-term capital gain, reduced by deductible expenses) determined without regard to the deduction for dividends paid; and (ii) 90% of the Fund's net tax-exempt interest, if any (the excess of its gross tax-exempt interest over certain disallowed deductions). The Fund intends to distribute substantially all of such income at least annually. The Fund will be subject to income tax at regular corporate rates on any taxable income or gains that it does not distribute to its shareholders.

The Code imposes a 4% nondeductible excise tax on the Fund to the extent the Fund does not distribute by the end of any calendar year an amount at least equal to the sum of (i) 98% of its ordinary income (not taking into account any capital gain or loss) for the calendar year, and (ii) 98.2% of its capital gain in excess of its capital loss (adjusted for certain ordinary losses) for a one-year period generally ending on October 31 of the calendar year (unless an election is made to use the Fund's fiscal year). In addition, the minimum amounts that must be distributed in any year to avoid the excise tax will be increased to reflect any under-distribution from the previous year. While the Fund intends to distribute any ordinary income and capital gain in the manner necessary to minimize imposition of the 4% excise tax, there can be no assurance that sufficient amounts of the Fund's ordinary income and capital gain will be distributed to entirely avoid the imposition of the excise tax. In that event, the Fund will be liable for the excise tax only on the

amount by which it does not meet the foregoing distribution requirement.

If for any taxable year the Fund does not qualify as a RIC, all of its taxable income (including its net capital gain) will be subject to tax at regular corporate rates without any deduction for distributions to shareholders.

Table of Contents**Taxation of Shareholders**

Distributions paid to you by the Fund from its net realized long-term capital gains, if any, that the Fund reports as capital gains dividends (capital gain dividends) are taxable as long-term capital gains, regardless of how long you have held your shares. All other dividends paid to you by the Fund (including dividends from short-term capital gains) from its current or accumulated earnings and profits (ordinary income dividends) are generally subject to tax as ordinary income. To the extent that the Fund has a net capital loss carryover from Fund tax years beginning before December 1, 2011 (which as of [] totaled \$[], and of which \$[] and \$[] will expire in [] and [], respectively), its net realized long term capital gains, if any, will be reported by the Fund as excess gains and taxable as ordinary income. This tax effect attributable to the Fund's capital loss carryovers (the conversion of nontaxable returns of capital into distributions taxable as ordinary income) will no longer apply to net capital losses of the Fund arising in Fund tax years beginning after November 30, 2011. Rather, any net capital losses arising in such tax years will be carried forward to reduce capital gains realized by the Fund in future taxable years, and the use of such capital loss carryforwards will not give rise to distributions being taxable as ordinary income. Net capital losses arising in Fund tax years beginning after November 30, 2011 may be carried forward without expiration until used in full.

Special rules apply to ordinary income dividends paid to individuals and other non-corporate shareholders. If you are an individual, any such ordinary income dividend that you receive from the Fund generally will be eligible for taxation at the federal rates applicable to long-term capital gains (currently taxed at a maximum rate of 20%) to the extent that (i) the ordinary income dividend is attributable to qualified dividend income (i.e., generally dividends paid by U.S. corporations and certain qualified foreign corporations) received by the Fund, (ii) the Fund satisfies certain holding period and other requirements with respect to the stock on which such qualified dividend income was paid, and (iii) you satisfy certain holding period and other requirements with respect to your Shares. There can be no assurance as to what portion of the Fund's ordinary income dividends will constitute qualified dividend income.

In addition to the federal income tax, certain individuals, trusts and estates may be subject to a Medicare tax of 3.8%. The Medicare tax is imposed on the lesser of: (i) a taxpayer's investment income, net of deductions properly allocable to such income, or (ii) the amount by which such taxpayer's modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals filing jointly, \$200,000 for unmarried individuals, and \$125,000 for married individuals filing separately). The Fund's taxable dividends are includable in a shareholder's investment income for purposes of this Medicare tax. In addition, any capital gain realized by a shareholder upon a sale of Shares is includable in such shareholder's investment income for purposes of this Medicare tax.

Any distributions you receive that are in excess of the Fund's then-current or accumulated earnings and profits will be treated as a tax-free return of capital to the extent of your adjusted tax basis in your shares, and thereafter as capital gain from the sale of shares. The amount of any Fund distribution that is treated as a tax-free return of capital will reduce your adjusted tax basis in your shares, thereby increasing your potential gain or reducing your potential loss on any subsequent sale or other disposition of your shares. A substantial portion of the Fund's annual distributions have historically consisted of returns of capital.

Dividends and other taxable distributions are taxable to you even if they are reinvested in additional Shares. Dividends and other distributions paid by the Fund are generally treated under the Code as received by you at the time the dividend or distribution is made. If, however, the Fund pays you a dividend in January that was declared in the previous October, November, or December and you were the shareholder of record on a specified date in one of such months, then such dividend will be treated for tax purposes as being paid by the Fund and received by you on December 31 of the year in which the dividend was declared.

Edgar Filing: DIVIDEND & INCOME FUND - Form POS 8C

Fund distributions may also subject shareholders to alternative minimum tax liability. Because of the complexity of the alternative minimum tax rules, shareholders should consult with their tax advisers as to the applicability of such rules with regard to an investment in the Fund.

The Fund will send you information after the end of each year setting forth the amount and tax status of any distributions paid to you by the Fund.

The sale or other disposition of Shares will generally result in capital gain or loss to you, and will be long-term capital gain or loss if you have held such Shares for more than one year at the time of sale. Any loss upon the sale or exchange of shares held for six months or less will be treated as long-term capital loss to the extent of any capital gain dividends received (including deemed capital gain dividends) by you with respect to such Shares. Any loss you

Table of Contents

realize on a sale or exchange of Shares will be disallowed if you acquire other Shares (whether through the automatic reinvestment of dividends or otherwise) within a 61-day period beginning 30 days before and ending 30 days after your sale or exchange of the shares. In such case, your tax basis in the Shares acquired will be adjusted to reflect the disallowed loss.

The Fund may be required to withhold, for U.S. federal backup withholding tax purposes, 28% of the dividends, distributions, and redemption proceeds payable to shareholders who fail to provide the Fund (or its agent) with their correct taxpayer identification number (in the case of individuals, generally, their social security number) or make required certifications, or who have been notified by the IRS that they are subject to backup withholding. Certain shareholders are exempt from backup withholding. Backup withholding is not an additional tax and any amount withheld may be refunded or credited against your U.S. federal income tax liability, if any, provided that you furnish the required information to the IRS.

Taxation of Holders of Subscription Rights

A holder's receipt of subscription rights generally should not constitute a taxable event to the holder for federal income tax purposes, and the remainder of this section assumes that result. A holder's tax basis in subscription rights issued to it will be zero, unless either (1) the fair market value of the rights on the date they are issued is 15% or more of the value of the Shares with respect to which the subscription rights were issued (Old Shares), which the Fund does not expect, or (2) the holder elects to allocate to the subscription rights a portion of its basis in the Old Shares (Election). If either (1) or (2) applies, basis will be allocated in proportion to the relative fair market values of the Old Shares and the subscription rights on the date the subscription rights are issued. Basis will be allocated only when Rights are exercised. A holder who wishes to make the Election described in (2) must attach a statement to that effect to its income tax return for the taxable year in which the subscription rights are received. The Election will apply to all subscription rights the holder receives pursuant to the offering and, once made, will be irrevocable. If, as the Fund expects, the value of the subscription rights a holder receives is less than 15% of the value of its Old Shares, the holder should consult its own tax advisor regarding the advisability of making the Election. The Fund will not, however, make any determination regarding the fair market value of the subscription rights. The holding period of subscription rights will be the same as the holding period of the stock on which such right was received.

A holder will not recognize taxable income on the exercise of subscription rights. A holder's basis in any Shares acquired on the exercise of subscription rights (a New Share) will equal the sum of the basis, if any, in those subscription rights and the subscription price for the New Share. A holder's holding period for a New Share will begin with and include the date of exercise of the related subscription rights.

You should consult a tax advisor regarding the tax consequences of acquiring, holding, and exercising subscription rights, and of allowing subscription rights to expire, in your particular circumstances, as well as any tax consequences that may arise under the laws of any state, local, or foreign taxing jurisdiction.

DESCRIPTION OF THE SECURITIES**Shares of Beneficial Interest**

The Fund is authorized to issue an unlimited number of shares of beneficial interest, par value \$0.01 per share, all of which shares, as of the date of this Prospectus, are classified as shares of beneficial interest. The Board may, however, authorize and issue such other securities of the Fund as it determines to be necessary, desirable or appropriate, having such terms, rights, preferences, privileges, limitations and restrictions as the Board sees fit, including rights to

purchase shares, preferred interests, debt securities or other senior securities. In addition, the Board may from time to time divide or combine the shares into a greater or lesser number without materially changing the proportionate beneficial interest in the shares.

All Shares issued by the Fund in accordance with its Governing Documents are fully paid and non-assessable. All Shares have the same dividend, distribution, and voting rights and have no preemptive, conversion, exchange, or redemption rights. Shareholders are entitled to share *pro rata* in the net assets of the Fund available for distribution to shareholders upon liquidation of the Fund. Shareholders are entitled to one vote for each Share held.

Table of Contents

The Fund may use leverage through Senior Securities. If the Board were to determine to leverage the Fund's Shares through the issuance of preferred shares, the Fund would reclassify an amount of unissued shares as preferred shares and, at that time, offer preferred shares representing up to approximately 50% of the Fund's total assets immediately after the issuance of such preferred shares. If the Fund were to issue preferred shares, and so long as any of the Fund's preferred shares remained outstanding, holders of the Fund's Shares would not be entitled to receive any net income or other distributions from the Fund unless all accumulated dividends on any such preferred shares have been paid, and unless asset coverage (as defined under the 1940 Act) with respect to the preferred stock would be at least 200% after giving effect to such distributions. See *Special Considerations and Risk Factors* *Risks of Investing in the Fund* *Leverage and Borrowing Risk* for a discussion of the potential effects and limitations of such borrowing on the Shares.

Share Repurchases and Tender Offers

The Board has determined that it normally is in the best interests of the Fund and its shareholders to increase the assets of the Fund, and that (i) increased assets permit the Fund to be in a better position to more fully take advantage of investment opportunities that may arise and seek to enhance the Fund's future returns; (ii) a larger number of outstanding Shares could increase the level of market interest in and visibility of the Fund and improve the trading liquidity of the Fund's Shares; and (iii) may result in a lower expense ratio for the Fund by spreading the Fund's fixed costs over a larger asset base. Accordingly, no assurance can be given that the Board would authorize actions that would decrease the assets of the Fund, such as share repurchases and tender offers. Should share repurchases and tender offers be made in the future, it is expected that they would be made at prices at or below the NAV per Share.

Under certain circumstances, a shareholder vote may be required to authorize share repurchases and tender offers. In considering whether to recommend to shareholders such authorization, the Board similarly would consider a number of factors including, among other things, limitations that may be placed on the Fund's investment policies as a consequence of such repurchase policy.

Preferred Shares

If the Board determines to issue preferred shares, those shares may be issued in one or more series, with rights as determined by the Board, by Board action without the approval of the holders of the Shares. Under the 1940 Act, the Fund may have more than one series of preferred shares outstanding so long as no single series has a priority over another series as to the distribution of assets of the Fund or the payment of dividends. Holders of the Shares have no preemptive right to buy any preferred shares that may be issued. It is anticipated that the NAV per share of the preferred shares, if issued, will equal its original purchase price per share plus accumulated dividends per share.

Liquidation Preference. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the Fund, the holders of preferred shares will be entitled to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus an amount equal to accumulated and unpaid dividends, whether or not earned or declared) before any distribution of assets is made to holders of the Shares. After payment of the full amount of the liquidating distribution to which they are entitled, the holders of preferred shares will not be entitled to any further participation in any distribution of assets by the Fund. A consolidation or merger of the Fund with or into any other entity or entities or a sale of all or substantially all of the assets of the Fund will not be deemed to be a liquidation, dissolution, or winding up of the Fund.

Voting Rights. The 1940 Act requires that the holders of any preferred shares, voting separately as a single class, have the right to elect at least two Trustees at all times and, subject to the prior rights, if any, of holders of any other class of Senior Securities outstanding, to elect a majority of the Trustees at any time that two full years' dividends on any preferred shares are unpaid. In addition to any approval by shareholders that might otherwise be required, the 1940

Act also requires the approval of the holders of a majority of any outstanding preferred shares, voting separately as a class, to (i) adopt any plan of reorganization that would adversely affect the preferred shares, and (ii) take any action requiring a vote of security holders pursuant to Section 13(a) of the 1940 Act, including, among other things, changes in the Fund's subclassification as a closed end fund or changes in its fundamental investment restrictions. See Certain Anti-Takeover Provisions in the Governing Documents below concerning voting requirements for conversion of the Fund to an open end fund. In addition, except as otherwise indicated in this Prospectus and except as otherwise required by applicable law, holders of preferred shares that are issued likely will have equal voting rights with holders of Shares (one vote per share, unless otherwise required by the 1940 Act), and will vote together with holders of Shares as a single class.

Table of Contents

The affirmative vote of the holders of a majority of the outstanding preferred shares, voting as a separate class, will be required to amend, alter or repeal any of the preferences, rights, or powers of holders of preferred shares so as to affect materially and adversely such preferences, rights, or powers, or increase or decrease the number of preferred shares. The class vote of holders of preferred shares described above will in each case be in addition to any other vote required to authorize the action in question.

Redemption, Purchase, and Sale of Preferred Stock by the Fund. The terms of any preferred shares that are issued are expected to provide that such preferred shares are redeemable by the Fund, in whole or in part, at the original purchase price per share plus accumulated dividends per share, that the Fund may tender for or repurchase preferred shares, and that the Fund may subsequently resell any shares so tendered for or repurchased. Any redemption or repurchase of preferred shares by the Fund will reduce the leverage applicable to Shares, while any resale of preferred shares by the Fund will increase such leverage.

The discussion above describes potential terms of an offering of preferred shares if, and only if, the Board were to elect to issue preferred shares to leverage the Fund. If the Board determines to proceed with such an offering, the terms of the preferred shares may be the same as, or different from, the terms described above, subject to applicable law and the Governing Documents. The Board, without the approval of the holders of the Shares, may authorize an offering of preferred shares or may determine not to authorize such an offering, and may fix the terms of the preferred shares to be offered.

Subscription Rights

General. The Fund may issue subscription rights to holders of its Shares to purchase additional Shares. Subscription rights may be issued independently or together with any other offered security and may or may not be transferable by the person purchasing or receiving the subscription rights. In connection with a subscription rights offering to holders of Shares, the Fund would distribute certificates or other documentation regarding the subscription rights and a Prospectus Supplement to shareholders as of the record date that the Board sets for determining the shareholders eligible to receive subscription rights in such subscription rights offering.

The applicable Prospectus Supplement would describe the following terms of any subscription rights to be offered by the Fund:

the period of time the offering would remain open (which will be open a minimum number of days such that all record holders would be eligible to participate in the offering and will not be open longer than 120 days);

the underwriter or distributor, if any, of the subscription rights and any associated underwriting fees or discounts applicable to purchases of the rights;

the title of the subscription rights;

the exercise price for the subscription rights (or method of calculation thereof);

the number of subscription rights issued in respect of each Share;

the number of rights required to purchase a single Share;

the extent to which the subscription rights are transferable and the market on which they may be traded if they are transferable;

if applicable, a discussion of the material U.S. federal income tax considerations applicable to the issuance or exercise of the subscription rights;

the date on which the right to exercise the subscription rights will commence, and the date on which the rights will expire (subject to any extension);

Table of Contents

the extent to which the subscription rights include an over-subscription privilege with respect to unsubscribed Shares and the terms of such over-subscription privilege;

any termination right the Fund may have in connection with the subscription rights offering; and

any other relevant terms of the subscription rights, including exercise, settlement, and other procedures and limitations relating to the transfer and exercise of the subscription rights.

Exercise of Subscription Rights. A certain number of subscription rights would entitle the holder of the subscription right(s) to purchase for cash such number of Shares at such exercise price as in each case is set forth in, or determinable as set forth in, the Prospectus Supplement relating to the subscription rights offered thereby. Subscription rights would be exercisable at any time from the date on which the right to exercise the subscription rights would commence up to the close of business on the expiration date for such subscription rights, as set forth in the Prospectus Supplement. Subscription rights generally are exercised by tendering payment and duly completed and signed subscription rights certificates or other appropriate documentation to the subscription rights agent. After the close of business on the expiration date, all unexercised subscription rights would become void. After the expiration of the rights offering, the Shares purchased as a result of such rights offering will be issued as soon as practicable. To the extent permissible under applicable law as set forth in the applicable Prospectus Supplement, the Fund may determine to offer any unsubscribed Shares directly to persons other than shareholders, to or through agents, underwriters, or dealers or through a combination of such methods and make available additional Shares to satisfy oversubscription requests.

2015 Rights Offering. The Fund's registration statement allowing the Fund to offer, from time to time, in one or more offerings, including through rights offerings, up to \$150,000,000 Shares was declared effective by the SEC on June 30, 2015. On September 28, 2015, the shareholders of the Fund received one non-transferable right for each Share held on that date rounded up to the nearest number of rights evenly divisible by three. Three rights were required to purchase one additional Share at the subscription price of \$11.62 per share. On November 2, 2015, in connection with this rights offering, the Fund issued 1,821,255 Shares and recorded proceeds of \$21,162,983, prior to the deduction of shelf and rights offering expenses of \$276,827.

Certain Anti-Takeover Provisions in the Governing Documents

The Fund currently has provisions in its Governing Documents which could have the effect of limiting (i) the ability of other entities or persons to acquire control of the Fund; (ii) the Fund's freedom to engage in certain transactions; (iii) the ability of the Fund's Trustees or shareholders to amend the Governing Documents or effectuate changes in the Fund's management; or (iv) the ability of the Fund's shareholders to make derivative claims or bring litigation against the Fund and/or any trustee, officer, employee or affiliate thereof. These provisions of the Governing Documents of the Fund may be regarded as anti-takeover provisions.

Staggered Board. Pursuant to the Fund's Governing Documents, the Board is divided into three classes, each having a term of three years. Each year the term of one class of Trustees will expire. Each Trustee serves for a three year term and until his or her successor is elected and qualified. Accordingly, only those Trustees in one class may be changed in any one year, and it would require a minimum of two years to change the majority of the Board. Unless all nominees for Trustee are approved by a majority of the Continuing Trustees (as defined in the Governing Documents), an affirmative vote of at least 75% of the outstanding Shares of the Fund entitled to be voted are required to elect a Trustee. If all nominees for Trustee are approved by a majority of the Continuing Trustees, a plurality of all the votes cast at a meeting at which a quorum is present shall be sufficient to elect a Trustee. The Fund's Governing

Documents provide that a Trustee may only be removed for cause, defined as (i) willful misconduct or gross negligence which is materially injurious to the Fund, (ii) fraud or embezzlement, or (iii) a conviction of, or a plea of guilty or no contest to a felony, and only by action of shareholders with at least 75% of the votes then entitled to be cast in an election of Trustees, or, in the case of Trustees elected by holders of Senior Securities, if any, only by the action of the holders of such Senior Securities with at least 75% of the votes then entitled to be cast by the holders of such Senior Securities.

Table of Contents

Super-Majority Provisions. As a general matter, the Governing Documents provide that the affirmative vote of a majority of the votes cast at a meeting of shareholders is required to approve any matter presented to shareholders that has been approved by a majority of the Continuing Trustees; however, the affirmative vote of at least 75% of the outstanding Shares is required to approve any matter presented to shareholders that has not been approved by a majority of the Continuing Trustees. In addition, the Governing Documents require the affirmative vote of at least 75% of the outstanding Shares of the Fund to approve, adopt, or authorize any of the following specific transactions:

a merger or consolidation or statutory share exchange of the Fund with any other entity, other than an entity that is 90% or more owned by the Fund;

a sale of all or substantially all of the assets of the Fund (other than in the regular course of its investment activities); or

a liquidation or dissolution of the Fund

unless such action has been approved, adopted, or authorized by the affirmative vote of at least 75% of the total number of Trustees, in which case the affirmative vote of the holders of a majority of the Fund's outstanding Shares is required.

Conversion to Open End Fund. The Governing Documents also provide that, in general, the conversion of the Fund into an open end investment company requires the affirmative vote of: (i) at least 75% of the total number of Trustees, including a majority of the Independent Trustees; (ii) at least 75% of the outstanding Shares of the Fund (which includes common shares and preferred shares together); and (iii) at least 75% of all votes of preferred shares, if any, of the Fund, voting as a separate class. Such a vote also would satisfy a separate requirement in the 1940 Act that the change be approved by the shareholders. Conversion of the Fund to an open end fund would require the redemption of any outstanding preferred shares and any indebtedness not constituting bank loans, which could eliminate or alter the leveraged capital structure of the Fund with respect to the Shares. Following any such conversion, it is also possible that certain of the Fund's investment policies and strategies would have to be modified to assure sufficient portfolio liquidity. Such requirement could cause the Fund to dispose of portfolio securities or other assets at a time when it is not advantageous to do so, and could adversely affect the ability of the Fund to meet its investment objectives. In the event of conversion, the Shares would cease to be listed on the NYSE or other national securities exchange or market system. Shareholders of an open end fund may require the company to redeem their shares at any time (except in certain circumstances as authorized by or under the 1940 Act) at their NAV, less such redemption charge, if any, as might be in effect at the time of redemption. The Fund expects to pay all such redemption requests in cash, but intends to reserve the right to pay redemption requests in a combination of cash or securities. If a payment in securities were made, investors may incur brokerage costs in converting such securities to cash. If the Fund were converted to an open end fund, it is possible that new shares of beneficial interest would be sold at NAV plus a sales load.

Number of Trustees; Vacancies. The Governing Documents provide that only the Board, including the vote of the majority of the Continuing Trustees, shall fix the number of Trustees on the Board. In addition, the Governing Documents vest in the Board the sole power to fill any vacancies on the Board (including an vacancy resulting from an increase in the size of the Board) with the affirmative vote of a majority of the members of a committee of the Board (as provided for in the Governing Documents) consisting of the remaining Continuing Trustees in office, even if the remaining Continuing Trustees do not constitute a quorum. If shareholders of a series or class of shares are entitled to separately elect one or more Trustees, a majority of the remaining Continuing Trustees or the sole

remaining Continuing Trustee elected by that series or class may fill any vacancy among the number of Trustees elected by that series or class. Any Trustee elected to fill a vacancy shall hold office for the remainder of the full term of the trusteeship in which the vacancy occurred and until a successor is elected and qualifies.

Annual and Special Meetings of Shareholders; Nomination Procedures. The Governing Documents provide that, with respect to annual meetings of shareholders, nominations of persons for election to the Board and the proposal of other business to be considered by the shareholders may be made only: (i) pursuant to the Fund's notice of meeting; (ii) by or at the direction of the Board, or any duly constituted committee of the Board; or (iii) by any shareholder who is entitled to vote at the meeting, is a shareholder of the Fund at the time of the meeting, and who has complied with certain procedural and informational requirements of the Governing Documents. With respect to special meetings of shareholders, only the business specified in the Fund's notice of the meeting may be brought before the meeting. Nominations of persons for election to the Board may be made at a special meeting of

Table of Contents

shareholders at which Trustees are to be elected: (i) pursuant to the Fund's notice of meeting; (ii) by or at the direction of the Board; or (iii) provided that the Board has determined that the Trustees shall be elected at such special meeting, by any shareholder who is entitled to vote at the meeting, is a shareholder of the Fund at the time of the giving of notice of such meeting and at the time of the meeting, and who has complied with certain procedural and informational requirements of the Governing Documents. Nominees for election as Trustee must meet certain qualifications set forth in the Governing Documents, the Nominating Committee Charter, and the Fund's Conflict of Interest and Corporate Opportunities Policy.

The Governing Documents provide that special meetings of shareholders may be called by the Board and certain of the Fund's officers. Additionally, the Fund's Governing Documents provide that, subject to the satisfaction of certain procedural and informational requirements by the shareholders requesting the meeting, a special meeting of shareholders may be called upon the written request of shareholders entitled to cast not less than a majority of all of the votes entitled to be cast at such meeting.

The Governing Documents grant special rights with respect to Continuing Trustees. The Continuing Trustees may appoint one or more inspectors of election at shareholder meetings, and may fill any vacancies if an inspector fails to appear or act. Any challenges to or reviews of a report by an inspector of election regarding a shareholder meeting must first be approved by the majority of the Continuing Trustees. In the event of a proposal by anyone other than the Continuing Trustees is submitted to a vote of the Shareholders of the Trust, or in the event of any proxy contest or proxy solicitation or proposal in opposition to any proposal by the officers or Trustees of the Trust, Shares may be voted only by written proxy or in person at a meeting. The Continuing Trustees shall appoint the chairman of shareholder meetings, subject to certain exceptions. If the concurrence of the Continuing Trustees is required to approve an action of the Board, then such action will be valid if approved by a majority of Continuing Trustees present at the meeting. The Trust shall indemnify, among other things, any individual who, while a Continuing Trustee, serves or has served in a similar capacity for another entity and who is made a party to a proceeding by reason of his or her service in that capacity.

Conditional Tender Offer. The Governing Documents require that certain proposed advisory, sub-advisory, or management contracts with an affiliate of current and certain former Independent Trustees be approved by 75% of the Independent Trustees who are not so affiliated. If such a contract or similar contracts are approved, the Governing Documents would provide automatic liquidity to dissatisfied shareholders by requiring the Fund to commence a tender offer to the fullest extent permitted by applicable law, for at least 50% of its outstanding Shares at a price of at least 99% of the Fund's per Share NAV.

Amendment to Bylaws. Shareholders have no authority to make, alter or repeal the Bylaws. The Board has the exclusive power to make, alter or repeal any provision of the Bylaws and make new Bylaws, except where such power is reserved by the Bylaws to the shareholders, and except as otherwise required by the 1940 Act.

Share Control Provisions. The Governing Documents contain provisions that restrict any person from attempting to purchase or otherwise acquire (an Acquisition), without the Board's prior approval, any direct or indirect interest in the Fund's Shares (or, if issued in the future, options, warrants, or other rights to acquire Fund Shares or securities convertible or exchangeable into them), if the Acquisition would either (i) cause the person to become an owner (within the meaning of Section 382 of the Code) or a beneficial owner (within the meaning of Section 13 of the Exchange Act) of more than 4.99% of the Fund's Shares (any such person being referred to as a Restricted Holder), or (ii) increase the percentage of the Fund's Shares a Restricted Holder owns (the Share Limitations). The Governing Documents provide that any Acquisition attempted to be made in violation of the Share Limitations will be null and void *ab initio* to the fullest extent permitted by law and contains detailed terms that seek to achieve that result. The Governing Documents also provide that any person who knowingly violates the Share Limitations, or any persons in

the same control group with such a person, shall be liable to the Fund for, and shall indemnify and hold it harmless against, any and all damages suffered as a result of the violation.

Derivative Claims. The Governing Documents provide that a shareholder does not have the right to bring or maintain any action, proceeding, claim, or suit (Action) on behalf of the Fund (a)(i) unless such shareholder is a shareholder at the time such Action is commenced and such shareholder continues to be a shareholder throughout the duration of such Action and (a)(ii)(1) unless at the time of the transaction or event underlying such Action, such shareholder was a shareholder or (2) unless such shareholder s status as a shareholder devolved upon the

Table of Contents

shareholder by operation of law or pursuant to the terms of the Governing Documents from a person who was a shareholder at the time of the transaction or event underlying such Action; and (b)(i) without first making demand on the Trustees requesting the Trustees to bring or maintain such Action and such demand has the support of shareholders owning a majority of the outstanding Shares of the Fund and (b)(ii) unless such demand meets certain procedural requirements as set forth in the Governing Documents. Such demand shall not be excused under any circumstances unless such shareholder makes a specific showing that irreparable non-monetary injury to the Fund would otherwise result. The Independent Trustees may decide to bring, maintain, or settle such Action or to not bring, maintain, or settle such Action, or may submit the matter to a vote of shareholders, as appropriate. Any decision by the Independent Trustees to bring, maintain, or settle such Action, or to submit the matter to a vote of shareholders, shall be binding upon all shareholders who will be prohibited from maintaining a separate competing Action relating to the same subject matter. Any decision by the Independent Trustees not to bring or maintain an Action on behalf of the Fund shall be subject to the right of the shareholders to vote on whether or not such Action should or should not be brought or maintained as a matter presented for shareholder consideration pursuant to the provisions of the Governing Documents regarding shareholder requested special meetings; and the vote of shareholders required to override the Independent Trustees' decision and to permit the shareholder(s) to proceed with the proposed Action shall be 75% of the outstanding Shares of the Fund. The Board has concluded that it is in the best interest of the Fund's shareholders to include the limitation on derivative suits described above in the Fund's Governing Documents, and believes that such provision is legally enforceable in accordance with its terms. The limitation on derivative suits follows a long-standing corporate law requirement that derivative suits may only proceed after the aggrieved shareholder has requested that the board bring suit.

Limitation of Liability. The Governing Documents provide that the Trustees have no fiduciary duty to take action, or to consider taking any action, to narrow any discount by which the Trust's shares may trade to the net asset value of such shares. The Governing Documents also provide that there shall not be a fiduciary exception to the attorney-client privilege as described in *United States v. Jicarilla*, 564 U.S. 162 (2011), *United States v. Mett*, 178 F.3d 1058 (9th Cir. 1999), or similar law with respect to any communications between any Trustee and legal counsel, regardless of whether, among other things, the Trust pays the legal fees of such counsel, such counsel's legal advice was given for managing the Trust and not for personal advice to the Trustees, and such communications were not made in anticipation of litigation.

Exclusive Forum. The Governing Documents provide that, unless the Trust consents in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware (or, in the event that the Court of Chancery does not have jurisdiction, the Superior Court of the State of Delaware or, if no state court located within the State of Delaware has jurisdiction, the federal district court for the District of Delaware) shall, to the fullest extent permitted by law, be the sole and exclusive forum for (i) any derivative action or proceeding brought on behalf of the Trust, (ii) any action asserting a claim of breach of any duty owed by any Trustee or officer or other employee of the Trust to the Trust or to the shareholders of the Trust, (iii) any action asserting a claim against the Trust or any Trustee or officer or other employee of the Trust arising pursuant to any provision of the Delaware Statutory Trust Act or the Governing Documents, (iv) any action to interpret, apply, enforce or determine the validity of the Governing Documents, or (v) any action asserting a claim against the Trust or any Trustee or officer or other employee of the Trust that is governed by the internal affairs doctrine. The Governing Documents further provide that, if any such action is filed in a court other than the Court of Chancery of the State of Delaware, the Superior Court of the State of Delaware, or the federal district court for the District of Delaware (a Foreign Action) in the name of any shareholder, such shareholder shall be deemed to have consented to (i) the personal jurisdiction of the Court of Chancery of the State of Delaware, the Superior Court of the State of Delaware, or the federal district court for the District of Delaware in connection with any action brought in any such court to enforce this provision, and (ii) having service of process made upon such shareholder in any such action by service upon such shareholder's counsel in the Foreign Action as agent for such shareholder.

The provisions of the Governing Documents described above could have the effect of depriving the owners of Shares in the Fund of opportunities to sell their Shares at a premium over prevailing market prices by discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction or bringing litigation against the Fund and/or any trustee, officer, employee or affiliate thereof. The overall effect of these provisions is to render more difficult the accomplishment of a merger or the assumption of control by a principal shareholder.

Table of Contents

The foregoing summary is subject to the Governing Documents of the Fund, which are on file with the SEC and available on the Fund's website <http://www.DividendandIncomeFund.com>.

Outstanding Securities

As of November 30, 2017, the Fund had [] Shares outstanding and no preferred shares outstanding. The following shows the Fund's outstanding classes of securities as of November 30, 2017.

Title of Class	Amount Authorized	Amount Held by Fund for its own Account	Amount Outstanding Exclusive of Amount Held by Fund
Common Shares	Unlimited	None	[]

CLOSED END FUND STRUCTURE

Closed end funds differ from open end funds (commonly referred to as mutual funds) in that closed end funds generally list their shares for trading on a securities exchange and do not redeem their shares at the option of the shareholder. This means that if a shareholder wishes to sell shares of a closed end fund, he or she must trade them on the market like any other stock at the prevailing market price at that time. In a mutual fund, if the shareholder wishes to sell shares of the fund, the mutual fund will redeem or buy back the shares at NAV. Also, mutual funds generally offer new shares on a continuous basis to new investors, and closed end funds generally do not. The continuous inflows and outflows of assets in a mutual fund can make it difficult to manage the fund's investments. By comparison, closed end funds are generally able to stay more fully invested in securities that are consistent with their investment objectives and also have greater flexibility to make certain types of investments and to use certain investment strategies, such as leverage and investments in illiquid securities.

Shares of closed end funds frequently trade at a discount to their NAV, although in some cases they may trade at a premium. This characteristic of shares of closed end funds is a risk separate and distinct from the risk that the Fund's NAV may decrease. The market price may be affected by trading volume of the shares, general market and economic conditions, and other factors beyond the control of the closed end fund. The foregoing factors may result in the market price of the Shares being greater than, less than, or equal to NAV. Whether a shareholder will realize a gain or loss upon the sale of the Fund's Shares will depend upon whether the market value of the Shares at the time of sale is above or below the price the shareholder paid for the Shares, taking into account transaction costs, and is not directly dependent upon the Fund's NAV. Because the market value of the Shares will be determined by factors such as the relative demand for and supply of the Shares in the market, general market conditions, and other factors beyond the control of the Fund, neither the Fund nor the Investment Manager can predict whether the Shares will trade at, below, or above NAV.

PLAN OF DISTRIBUTION

The Fund may sell Shares through underwriters or dealers, directly to one or more purchasers, including existing holders of Shares in a rights offering, through agents, to or through underwriters or dealers, or through a combination of any such methods of sale. The applicable Prospectus Supplement will identify any underwriter or agent involved in the offer and sale of the Fund's Shares, any sales loads, discounts, commissions, fees, or other compensation paid to any underwriter, dealer, or agent, the offering price, net proceeds and use of proceeds and the terms of any sale. In the

case of a rights offering to existing holders of Shares, the applicable Prospectus Supplement will set forth the number of rights required to purchase a set amount of Shares and the other terms of such rights offering.

The distribution of Shares may be effected from time to time in one or more transactions at a fixed price or prices, which may be changed, at prevailing market prices at the time of sale, at prices related to such prevailing market prices, or at negotiated prices. The offering price per Share will not be less than the NAV per Share at the time of the offering, exclusive of any underwriting commission or discounts, provided that rights offerings may be offered at a price below the then current NAV, subject to certain conditions.

Table of Contents

In connection with the sale of Shares, underwriters or agents may receive compensation from the Fund in the form of discounts, concessions, or commissions. Underwriters may sell Shares to or through dealers, and such dealers may receive compensation in the form of discounts, concessions, or commissions from the underwriters and/or commissions from the purchasers for whom they may act as agents. Underwriters, dealers, and agents that participate in the distribution of Shares may be deemed to be underwriters under the Securities Act, and any discounts and commissions they receive from the Fund and any profit realized by them on the resale of Shares may be deemed to be underwriting discounts and commissions under the Securities Act. Any such underwriter or agent will be identified and any such compensation received from the Fund will be described in the applicable Prospectus Supplement. The maximum commission or discount to be received by any Financial Industry Regulatory Authority, Inc. member or independent broker-dealer will not exceed 8%. The Fund will not pay any compensation to any underwriter or agent in the form of warrants, options, consulting, or structuring fees or similar arrangements.

If a Prospectus Supplement so indicates, the Fund may grant the underwriters an option to purchase additional Shares at the public offering price, less the underwriting discounts and commissions, within 45 days from the date of the Prospectus Supplement, to cover any overallotments.

Under agreements into which the Fund may enter, underwriters, dealers and agents who participate in the distribution of Shares may be entitled to indemnification by the Fund against certain liabilities, including liabilities under the Securities Act. Underwriters, dealers, and agents may engage in transactions with the Fund, or perform services for the Fund, in the ordinary course of business. Bexil Securities LLC, an affiliate of the Fund and the Investment Manager, may act as a dealer in connection with the distribution of Shares. If so indicated in the applicable Prospectus Supplement, the Fund will, or will authorize underwriters or other persons acting as the Fund's agents to, solicit offers by certain institutions to purchase Shares pursuant to contracts providing for payment and delivery on a future date. Institutions with which such contacts may be made include commercial and savings banks, insurance companies, pension funds, investment companies, educational and charitable institutions, and others, but in all cases such institutions must be approved by the Fund. The obligation of any purchaser under any such contract will be subject to the condition that the purchase of the Shares shall not at the time of delivery be prohibited under the laws of the jurisdiction to which such purchaser is subject. The underwriters and such other agents will not have any responsibility in respect of the validity or performance of such contracts. Such contracts will be subject only to those conditions set forth in the Prospectus Supplement, and the Prospectus Supplement will set forth the commission payable for solicitation of such contracts.

To the extent permitted under the 1940 Act and the rules and regulations promulgated thereunder, the underwriters may from time to time act as brokers or dealers and receive fees in connection with the execution of the Fund's portfolio transactions after the underwriters have ceased to be underwriters and, subject to certain restrictions, each may act as a broker while it is an underwriter.

A Prospectus and accompanying Prospectus Supplement in electronic form may be made available on the websites maintained by underwriters. The underwriters may agree to allocate a number of Shares for sale to their online brokerage account holders. Such allocations of Shares for Internet distributions will be made on the same basis as other allocations. In addition, Shares may be sold by the underwriters to securities dealers who resell Shares to online brokerage account holders.

In order to comply with the securities laws of certain states, if applicable, Shares offered hereby will be sold in such jurisdictions only through registered or licensed brokers or dealers.

LEGAL MATTERS

Certain legal matters will be passed upon by Godfrey & Kahn S.C., Madison, Wisconsin, counsel to the Fund, in connection with the offering of the Fund's securities.

Table of Contents**ADDITIONAL INFORMATION**

This Prospectus constitutes part of a registration statement on Form N-2 filed by the Fund with the SEC under the Securities Act and the 1940 Act (the "Registration Statement"). This Prospectus omits certain of the information contained in the Registration Statement, and reference is hereby made to the Registration Statement together with all amendments and related exhibits for further information with respect to the Fund and the securities offered hereby.

In addition to the Registration Statement, the Fund files annual and semi-annual reports, proxy statements and other information with the SEC. You can inspect any materials the Fund files with the SEC, without charge, at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the Public Reference Room. The information the Fund files with the SEC is available free of charge by calling the Fund at 1-855-411-6432 or on the Fund's website at <http://www.DividendandIncomeFund.com>. The SEC also maintains a website that contains reports, proxy statements and other information regarding registrants, including the Fund, that file such information electronically with the SEC. The address of the SEC's web site is <http://www.sec.gov>. Unless specifically incorporated into this Prospectus, documents contained on the Fund's website or on the SEC's web site about the Fund are not incorporated into this Prospectus and should not be considered to be part of this Prospectus.

THE INFORMATION IN THIS PROSPECTUS SUPPLEMENT IS NOT COMPLETE AND MAY BE CHANGED. THE DIVIDEND AND INCOME FUND MAY NOT SELL THESE SECURITIES UNTIL THE REGISTRATION STATEMENT FILED WITH THE SECURITIES AND EXCHANGE COMMISSION IS EFFECTIVE. THIS PROSPECTUS SUPPLEMENT IS NOT AN OFFER TO SELL THESE SECURITIES AND IT IS NOT SOLICITING AN OFFER TO BUY THESE SECURITIES IN ANY JURISDICTION WHERE THE OFFER AND SALE IS NOT PERMITTED.

PROSPECTUS SUPPLEMENT

To Prospectus dated December 13, 2017

DIVIDEND AND INCOME FUND

Up to 3,600,000 Shares of Beneficial Interest (\$0.01 par value per Share)

Issuable Upon Exercise of Non-Transferable Rights to Subscribe for Shares

Dividend and Income Fund (the **Fund**) is issuing to you and its other holders of shares of beneficial interest (the **Shares**) non-transferable subscription rights (the **Rights**). You will receive one Right for each Share of the Fund you own as of the close of business on [] (the **Record Date**) rounded up to the nearest number of Rights evenly divisible by three. These Rights entitle you to buy new Shares of the Fund. For every three Rights that you receive, you can buy one new Share of the Fund, plus in certain circumstances additional new Shares pursuant to an over-subscription privilege (described below). Fractional Shares will not be issued upon the exercise of the Rights. Accordingly, new Shares may be purchased only pursuant to the exercise of Rights in integral multiples of three. The holders of Rights may subscribe in the aggregate for up to 3,600,000 Shares, which the Fund may increase through the exercise of an over-allotment option by up to 25%, or up to an additional 900,000 Shares, for an aggregate total of up to 4,500,000 new Shares.

Your rights may be exercised at any time during the offering period (the **Subscription Period**) which starts on [], and ends at 5:00 p.m., ET, on [] (the **Expiration Date**), unless the Rights offering is terminated or extended.

This Rights offering provides you with the opportunity to purchase additional Shares at a price potentially below market value and net asset value (**NAV**), without paying any commissions. The subscription price per Share will be determined based upon a formula equal to 95% of the market price or 79% of the NAV per Share, whichever is greater, on the Expiration Date. Market price per Share will be determined based on the average of the last reported sales prices of a Share on the New York Stock Exchange (**NYSE**) for the five trading days preceding the Expiration Date (not including the Expiration Date). Because the Expiration Date is the last day of the Subscription Period (defined below), shareholders who choose to exercise their Rights will not know the actual Subscription Price at the time they exercise such Rights.

The Fund's Shares are currently listed, and the Shares issued in this Rights offering will also be listed, on the NYSE under the symbol **DNI**. The last reported sale price of Shares, as reported by the NYSE on [], was \$[] per Share. The NAV per Share as of the close of business on [] was \$[].

The Fund is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified, closed end management investment company. The Fund's primary investment objective is to seek high current income. Capital appreciation is a secondary objective. There is no assurance the Fund will achieve its investment objectives. The Fund's investment manager is Bexil Advisers LLC (the "Investment Manager").

Any Shares issued as a result of the Rights offering will not be record date Shares for the Fund's quarterly distribution to be paid in December 2017, if any, and will not be entitled to receive such distribution.

Exercising your Rights and investing in Shares involves risks. Please see Special Characteristics and Risks of the Rights Offering beginning on page R-19 of this Prospectus Supplement, and Special Considerations and Risk Factors beginning on page 29 of the accompanying Prospectus, to learn more about the risks you should carefully consider before investing.

Table of Contents

Shareholders who do not fully exercise their Rights will, upon the completion of the Rights offering, own a smaller proportional interest in the Fund than they owned prior to the Rights offering, resulting in immediate ownership and voting dilution for such shareholders. In addition, because the expenses associated with the Rights offering will be borne by the Fund (and indirectly by all shareholders, including those who do not exercise their Rights), such expenses will result in an immediate dilution of the NAV per Share for all existing shareholders (i.e., will cause the NAV per Share of the Fund to decrease). Furthermore, if the Subscription Price per Share is less than the NAV per Share as of the Expiration Date, the completion of the Rights offering will result in additional dilution of the NAV per Share for all existing shareholders, and may have the effect of reducing the market price of the Fund's Shares. The Fund cannot state precisely the extent of the dilution of the Fund's NAV per Share because the Fund does not know what the Subscription Price or the NAV per Share will be when the Rights offering expires, how many Shares will be subscribed for, the exact expenses of the Rights offering, or whether the Fund will exercise its over-allotment option. Any such dilution will disproportionately affect shareholders who choose not to exercise their Rights. If the Subscription Price is 79% of the NAV per Share on the Expiration Date and the Fund exercises its over-allotment option, dilution of the Fund's NAV per Share would be approximately []%. For further information on the effect of dilution, see Special Characteristics and Risks of the Rights Offering on page R-18 of this Prospectus Supplement.

	Per Share	Total ⁽⁴⁾
Estimated Subscription Price ⁽¹⁾	\$ []	\$ []
Estimated Underwriting Discounts and Commissions/Sales Load ⁽²⁾	None	None
Estimated Proceeds, before expenses, to the Fund ⁽³⁾	\$ []	\$ []

- (1) Estimated on the basis of the greater of (i) 95% of the average of the last reported sales price of a Share on the NYSE on the five trading days preceding [] (not including []), and (ii) 79% of the NAV per Share on []. Rights holders will not know the Subscription Price at the time of exercise and will be required initially to pay for both the Shares subscribed for pursuant to the primary subscription and any additional Shares subscribed for pursuant to the over-subscription privilege at the estimated price of \$[] per Share.
- (2) The Rights are being offered directly by the Fund without the expense of an underwriter or sales agent.
- (3) Offering expenses borne by the Fund are estimated to be approximately \$220,000 in the aggregate, or \$0.06 per Share (assuming the Rights offering is fully subscribed, but excluding the effect of increasing the number of Shares subject to subscription by 25% pursuant to the over-allotment option). After deduction of such expenses, the per Share and total proceeds to the Fund are estimated at \$[] and \$[], respectively. If the Fund increases the number of Shares subject to subscription pursuant to the over-allotment option, offering expenses are estimated to be approximately \$220,000 in the aggregate, or \$0.05 per Share, and after deduction of such expenses, the per Share and total proceeds to the Fund are estimated at \$[] and \$[], respectively. Offering expenses will be borne by the Fund and indirectly by all of its shareholders, including those who do not exercise their Rights. Accordingly, such expenses will immediately reduce the NAV per Share of the Fund.
- (4) Assumes that the Rights offering is fully subscribed (excluding the effect of the exercise of the over-allotment option) at the estimated Subscription Price. All of the Rights may not be exercised. Pursuant to the over-allotment option, the Fund may, at the discretion of its Board of Trustees, increase the number of Shares subject to subscription by up to 25% of the Shares offered hereby. If the Fund increases the number of Shares subject to subscription by 25%, the Total Estimated Subscription Price will be \$[] and the Total Estimated Proceeds to the Fund (before expenses) will be \$[].

This Prospectus Supplement and the accompanying Prospectus set forth concisely information you should know before investing. Please read them carefully before investing and keep them for future reference. Additional information about the Fund, including a Statement of Additional Information dated December 13, 2017 (SAI), has been filed with the Securities and Exchange Commission (SEC) and is incorporated by reference in its entirety into the accompanying Prospectus. This Prospectus Supplement describes the specific details regarding this offering. If information in this Prospectus Supplement is inconsistent with the accompanying Prospectus or the SAI, you should rely on this Prospectus Supplement. You may obtain additional information about the Fund, including its SAI and annual and semi-annual reports, without charge (i) upon request, by calling 1-855-411-6432; (ii) on the Fund s website at <http://www.DividendandIncomeFund.com>; and (iii) on the SEC s website at <http://www.sec.gov>. You may make any other shareholder inquiries by calling the Fund at 1-855-411-6432. The Shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other government agency.

Table of Contents**CAUTIONARY NOTICE REGARDING FORWARD-LOOKING STATEMENTS**

This Prospectus Supplement, the accompanying Prospectus and the SAI contain forward-looking statements. Forward-looking statements can be identified by the words may, will, intend, expect, estimate, continue, anticipate, and similar terms and the negative of such terms. By their nature, all forward-looking statements involve risks and uncertainties, and actual results could differ materially from those contemplated by the forward-looking statements. Several factors that could materially affect the Fund's actual results are the performance of the portfolio of securities the Fund holds, the conditions in the U.S. and international financial and other markets, the price at which the Shares will trade, and other factors discussed in the Fund's periodic filings with the SEC.

Actual results could differ materially from those projected or assumed in the forward-looking statements. The Fund's future financial condition and results of operations, as well as any forward-looking statements, are subject to change and are subject to inherent risks and uncertainties, such as those disclosed in the Special Considerations and Risk Factors section of the accompanying Prospectus. All forward-looking statements contained or incorporated by reference in this Prospectus Supplement and the Prospectus are made as of the date set forth on the applicable cover page. Except for the Fund's ongoing obligations under the federal securities laws, the Fund does not intend, and it undertakes no obligation, to update any forward-looking statement. Any forward-looking statements contained in this Prospectus Supplement and the Prospectus are excluded from the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended (the Securities Act).

Currently known risk factors that could cause actual results to differ materially from the Fund's expectations include, but are not limited to, the factors described in the Special Characteristics and Risks of the Rights Offering section of this Prospectus Supplement and the Special Considerations and Risk Factors section of the accompanying Prospectus. You are urged to review carefully these sections for a more complete discussion of the risks of an investment in the Shares.

SUMMARY OF THE TERMS OF THE RIGHTS OFFERING**Terms of the Offering**

Dividend and Income Fund (the Fund) is issuing non-transferable subscription rights (the Rights) to its shareholders of record as of 5:00 p.m., ET, on [] (the Record Date), entitling the holders of such Rights to subscribe for up to an aggregate of 3,600,000 shares of beneficial interest of the Fund (the Shares). Holders of Shares on the Record Date (Record Date Shareholders) will receive one Right for each Share held on the Record Date, rounded up to the nearest number of Rights evenly divisible by three. The Rights entitle their holders to purchase one new Share for every three Rights held, plus in certain circumstances additional new Shares pursuant to the Over-Subscription Privilege (defined below). Fractional Shares will not be issued upon the exercise of the Rights. Accordingly, new Shares may be purchased only pursuant to the exercise of Rights in integral multiples of three. Assuming the exercise of all Rights, the offering will result in an approximately 33% increase in the Fund's Shares outstanding. A Record Date Shareholder's right to acquire one Share for every three Rights is referred to as the Primary Subscription and the Shares issued through the Primary Subscription are referred to as Primary Subscription Shares. If a Record Date Shareholder exercises all of the Rights he or she received in the Primary Subscription, that shareholder may also subscribe for additional Shares pursuant to the Over-Subscription

Purpose of the Offering

Privilege. The Rights offering is not contingent upon any number of Rights being exercised. See Description of the Rights Offering Terms of the Rights Offering.

The Board of Trustees of the Fund (the Board) has determined that it would be in the best interests of the Fund and its shareholders to increase the assets of the Fund and that the Rights offering is currently an effective and efficient way to raise additional assets for the Fund.

In connection with its conclusion to approve the Rights offering, the Board considered, among other things, the following factors: (i) the Rights offering provides an exclusive opportunity to Record Date Shareholders to purchase Shares of the Fund at a price potentially below the then current market price and the Fund's net asset value (NAV) per Share; (ii) shareholders who do not

R-1

Table of Contents

fully exercise their Rights will own, upon completion of the Rights offering, a smaller proportional interest in the Fund than they owned before the Rights offering and that the completion of the Rights offering will result in an immediate dilution of the NAV per Share for all existing shareholders, irrespective of whether they exercise all or a portion of their Rights; (iii) the increased equity capital to be available upon completion of a fully subscribed Rights offering, including Shares issued pursuant to the exercise of the Over-Allotment Option, that could be used for making additional investments consistent with the Fund's investment objectives; (iv) various other capital-raising alternatives, including, among other things, conducting a secondary offering of Shares, an at-the-market offering, and/or a transferable rights offering, and the benefits and drawbacks of conducting a transferable versus a non-transferable rights offering; (v) the size of the Rights offering in relation to the number of Shares outstanding; (vi) the belief of Bexil Advisers LLC (the Investment Manager) that it would be in the best interests of the Fund and its shareholders to increase the assets of the Fund thus permitting the Fund to be in a better position to more fully take advantage of investment opportunities that may arise and seek to enhance the Fund's future returns; (vii) the Investment Manager's belief that a larger number of outstanding Shares could increase the level of market interest in and visibility of the Fund and improve the trading liquidity of the Fund's Shares; (viii) the increase in assets may result in a modestly lower expense ratio for the Fund by spreading the Fund's fixed costs over a larger asset base; (ix) the potential impact of the Rights offering on the Fund's distribution policy; and (x) the Investment Manager has an inherent conflict of interest in recommending the Rights offering because the Fund pays fees to the Investment Manager based on a percentage of the Fund's assets and the Investment Manager will benefit from the increase in Fund assets that is expected to result from the Rights offering. The Board also considered that two of the Fund's prior rights offerings in 2011 and 2013 were oversubscribed, resulting in the Fund issuing an additional 1,774,988 (split adjusted) and 2,529,317 Shares, respectively, and that the Fund's most recent rights offering in 2015 was undersubscribed, resulting in the Fund issuing an additional 1,821,255 Shares.

Subscription Price

The subscription price per Share (the Subscription Price) will be determined based upon a formula equal to 95% of the market price or 79% of the NAV per Share, whichever is greater, on the Expiration Date. Market price per Share will be determined based on the average of the last reported sales prices of a Share on the New York Stock Exchange (NYSE) for the five trading days preceding the Expiration Date (not including the Expiration Date). As of [], the average of the last reported sales price of a Share on the NYSE on [] the preceding five trading days (not including []) was \$[] and the NAV per Share was \$[], for an estimated Subscription Price of \$[] per Share. Because the Expiration Date is the last day of the Subscription Period, Rights holders will not know the actual Subscription Price at the time they exercise such Rights and will, therefore, be required initially to pay for both the Shares subscribed for pursuant to the Primary Subscription and any additional Shares subscribed for pursuant to the Over-Subscription Privilege, at the estimated Subscription Price of \$[] per Share. See Description of the Rights Offering Terms of the Rights Offering.

Subscription Period

Rights may be exercised at any time during the offering period (the Subscription Period) which starts on [], and ends at 5:00 p.m., ET, on [] (the Expiration Date), unless the Rights offering is terminated or extended. See Description of the Rights Offering Terms of the Rights Offering, Description of the Rights Offering Expiration of the Offering, and Description of the Rights Offering Termination of the Offering.

R-2

Table of Contents

Notice of NAV Decline	In accordance with SEC regulatory requirements, the Fund has undertaken to suspend the Rights offering until the Fund amends this Prospectus Supplement if, after the effective date of the Fund's Prospectus Supplement, the Fund's NAV declines more than 10% from the Fund's NAV as of that date. If this occurs, the Expiration Date will be extended and the Fund will notify Record Date Shareholders of the decline and permit them to cancel their exercise of Rights. See Description of the Rights Offering Notice of Net Asset Value Decline.
Over-Subscription Shares	Record Date Shareholders who fully exercise their Rights in the Primary Subscription may subscribe for the Primary Subscription Shares not subscribed for by other Rights holders at the same Subscription Price. The entitlement to buy such Shares is called the Over-Subscription Privilege. If enough Primary Subscription Shares are available, all such over-subscription requests will be honored in full. If over-subscription requests exceed the Primary Subscription Shares available, the Fund may, at the discretion of the Board, increase the number of Shares subject to subscription by up to 25% of the Primary Subscription Shares (i.e., up to an additional 900,000 Shares) (the Over-Allotment Shares) pursuant to the exercise of an over-allotment option to cover such over-subscription requests (the Over-Allotment Option). Primary Subscription Shares not bought in the Primary Subscription together with all Over-Allotment Shares, if any, are called Over-Subscription Shares. Requests for Over-Subscription Shares are subject to certain limitations and subject to allotment. See Description of the Rights Offering Over-Subscription Shares and Description of the Rights Offering Allocation of Over-Subscription Shares.
Method for Exercising Rights	Rights are evidenced by subscription certificates (each, a Subscription Certificate) that will be mailed or otherwise transmitted to Record Date Shareholders, which may include your broker, bank, trust company or other intermediary who holds the Fund's Shares for your account, directly or via Cede & Co. (Cede) or other depository or nominee (except as described below with regard to Foreign Shareholders (as defined below)). Accordingly, Rights may be exercised by contacting your broker, bank, trust company or other intermediary who holds the Fund's Shares for your account, which can arrange, on your behalf, to guarantee delivery of payment and of a properly completed and executed Subscription Certificate (referred to as a Notice of Guaranteed Delivery). A fee may be charged for this service by your broker, banker, trust company or other intermediary. In addition, your broker, bank, trust company or other intermediary may impose a deadline for exercising Rights earlier than 5:00 p.m., ET, on the Expiration Date. Rights also may be exercised by completing and signing the Subscription Certificate and mailing it in the envelope provided, or otherwise delivering the completed and signed Subscription Certificate to the Subscription Agent, together with payment in full of the estimated Subscription Price for the Shares subscribed for. Completed Subscription Certificates and payments must be received by the Subscription Agent by 5:00 p.m., ET, on the Expiration Date at the offices of the Subscription Agent. See Description of the Rights Offering Method for Exercising Rights and Description of the Rights Offering Payment for Shares.

Rights holders who have exercised their Rights will have no right to rescind their subscription after receipt by the Subscription Agent of either the completed Subscription Certificate together with payment for Shares subscribed for or a Notice of Guaranteed Delivery, except as described herein. See Description of the Rights Offering Notice of Net Asset Value Decline.

R-3

Table of Contents**Offering Expenses**

The expenses of the Rights offering are expected to be approximately \$220,000 (assuming the Rights offering is fully subscribed, but excluding the effect of the issuance of any Over-Allotment Shares). If the Fund increases the number of Shares subject to subscription pursuant to the over-allotment option for the full amount of Over-Allotment Shares, offering expenses are estimated to be approximately \$220,000. The Fund will bear the expenses of the Rights offering and all such expenses will be borne indirectly by the Fund's shareholders, including those who do not exercise their Rights. Accordingly, such expenses will immediately reduce the NAV per Share of the Fund.

These expenses include, but are not limited to, the expenses of preparing, printing and mailing the prospectus, prospectus supplement, and Rights subscription materials, and the fees assessed by service providers (including the cost of the Fund's counsel and independent registered public accounting firm) in connection with the offering. See Fees and Expenses.

Use of Proceeds

The net proceeds to the Fund from this Rights offering, assuming all Rights issued hereunder are exercised, are estimated to be \$[] or, if pursuant to the over-allotment option, the Fund, at the discretion of the Board, elects to increase the number of Shares subject to subscription in an amount equal to 25% and all Over-Allotment Shares are sold, \$[], in each case after deducting offering expenses.

The Investment Manager expects that it will initially invest the proceeds of the offering by reducing borrowings, if any and as appropriate, and investing the balance in income generating equity securities, high quality short-term debt securities, money market fund shares, or other securities, as applicable. The Investment Manager anticipates that the investment of the proceeds will be made in accordance with the Fund's investment objectives and policies as appropriate investment opportunities are identified, which is expected to substantially be completed within three months; however, changes in market conditions could result in the Fund's anticipated investment period extending to as long as six months. Depending on market conditions and operations, a portion of the cash held by the Fund, including any proceeds raised from the offering, may be used to pay distributions in accordance with the Fund's distribution policy. The Fund does not currently anticipate an increase in leverage immediately following the completion of the offering; however, the Fund reserves the right to adjust leverage from time to time. See Use of Proceeds.

Information and**Subscription Agent**

American Stock Transfer & Trust Company, LLC will act as the subscription agent for the Rights offering (the Subscription Agent). AST Fund Solutions, LLC, an affiliate of the Subscription Agent, will act as the information agent for the Rights offering (the Information Agent). Inquiries regarding the Rights offering by holders of Rights should be directed to the Information Agent toll free at []. See

Description of the Rights Offering Information and Subscription Agent.

Taxation

For U.S. federal income tax purposes, the receipt of Rights by a Record Date Shareholder should not be a taxable event. We urge you to consult your own tax advisor with respect to the particular tax consequences of the Rights offering. See U.S. Federal Income Tax Consequences of the Offering.

⁽²⁾ Additional amount due (in the event the actual Subscription Price exceeds the estimated Subscription Price).

DESCRIPTION OF THE RIGHTS OFFERING**Terms of the Rights Offering**

The Fund is issuing to Record Date Shareholders Rights to subscribe for up to 3,600,000 Shares of the Fund. In certain circumstances described under Over-Subscription Shares, the Fund may increase the number of Shares subject to subscription by up to 25%, or up to an additional 900,000 Over-Allotment Shares, for an aggregate total of up to 4,500,000 Shares. Assuming the exercise of all Rights, the offering will result in an approximately 33% increase in the Fund's Shares outstanding. If the Fund exercises the Over-Allotment Option by issuing the full amount of Over-Allotment Shares, the offering will result in an approximately 42% increase in the Fund's Shares outstanding.

Each Record Date Shareholder is being issued one non-transferable Right for each Share owned on the Record Date, rounded up to the nearest number of Rights evenly divisible by three. The Rights entitle the holder to purchase one new Share for each three Rights held. Fractional Shares will not be issued upon the exercise of the Rights. Accordingly, new Shares may be purchased only pursuant to the exercise of Rights in integral multiples of three. The Rights offering is not contingent upon any number of Rights being exercised and may be terminated at any time and for any reason before the Expiration date. The Shares, once issued, will be listed on the NYSE under the symbol DNI.

Each Share may be purchased by exercising three Rights and paying the Subscription Price, which will be determined based upon a formula equal to 95% of the market price or 79% of the NAV per Share, whichever is greater, on the Expiration Date. Market price per Share will be determined based on the average of the last reported sales prices of a Share on the NYSE for the five trading days preceding the Expiration Date (not including the Expiration Date). Because the Expiration Date is the last day of the Subscription Period, Rights holders will not know the actual Subscription Price at the time they exercise such Rights and will, therefore, be required initially to pay for both the Shares subscribed for pursuant to the Primary Subscription and any additional Shares subscribed for pursuant to the Over-Subscription Privilege, at the estimated Subscription Price of \$[] per Share.

Rights may be exercised at any time during the Subscription Period, unless the Rights offering is terminated or extended. Rights will expire on the Expiration Date and thereafter may not be exercised.

Rights will be evidenced by subscription certificates (Subscription Certificates), with the number of Rights issued to each holder stated thereon. The method by which Rights may be exercised and Shares paid for is set forth below in

Edgar Filing: DIVIDEND & INCOME FUND - Form POS 8C

Method for Exercising Rights and Payment for Shares. A holder of Rights will have no right to rescind a purchase after the Subscription Agent has received a completed Subscription Certificate together with payment for the subscribed Shares, except under the circumstances described below under Notice of Net Asset Value Decline.

Notwithstanding the foregoing, the Fund may cancel the Rights offering during the Subscription Period, even after the Rights have been distributed and subscriptions have been received.

R-5

Table of Contents

Rights holders are entitled to subscribe for additional Shares at the same Subscription Price pursuant to the Over-Subscription Privilege, subject to certain limitations. See [Over-Subscription Privilege](#) below.

For purposes of determining the number of Shares that may be acquired pursuant to the Rights offering, each broker, bank, trust company or other intermediary whose Shares are held of record by Cede & Co. (Cede) or other depository or nominee will be deemed to be the holder of the Rights that are held by Cede or such other depository or nominee on its behalf.

Brokers, banks, trust companies and other intermediaries, depositories, and nominees who hold the Fund's Shares for the account of others, should notify the respective beneficial owners of such Shares as soon as possible to ascertain such beneficial owners' intentions, obtain instructions with respect to the Rights, and, as appropriate, complete the Subscription Certificate and submit it to the Subscription Agent with proper payment. In addition, beneficial owners of Shares or Rights held through brokers, banks, trust companies and other intermediaries, depositories, or nominees should contact the appropriate person to provide instructions with respect to the Rights.

Participants in the Fund's Dividend Reinvestment Plan will be issued Rights in respect of the Shares held in their accounts in the Dividend Reinvestment Plan. Participants wishing to exercise these Rights must exercise the Rights in accordance with the procedures set forth in [Method for Exercising Rights](#) and [Payment for Shares](#).

The Rights are not transferable. You may not purchase or sell them. The Rights will not trade on the NYSE or any other exchange. If you do not exercise your Rights before the conclusion of the Rights offering, your Rights will expire without value.

Purpose of the Rights Offering

The Board has determined that it would be in the best interests of the Fund and its shareholders to increase the assets of the Fund and that the Rights offering is currently an effective and efficient way to do so. In reaching its conclusion to approve the Rights offering on the terms set out in this Prospectus Supplement, the Board considered the advice and recommendations of the Investment Manager and the recommendation of the Rights Offering Committee of the Board, and was advised by Fund counsel.

Beginning in September 2017, the Board considered the Fund's strategy and long range planning initiatives, such as potential strategies for growth and shareholder value, including, among other things, rights offerings. After considering the potential Rights offering at special meetings held on October 25, 2017 and December 13, 2017, the Rights Offering Committee recommended that the Board approve the Rights offering on the terms set out in this Prospectus Supplement, which the Board did at a meeting held on December 13, 2017.

The Rights Offering Committee of the Board, which was established in 2015 in connection with the filing of the registration statement of which this Prospectus Supplement is a part, consists of the three Trustees who are not interested persons of the Fund as defined under the 1940 Act.

In connection with its conclusion to approve the Rights offering, the Board considered, among other things, the following factors:

- (i) *Opportunity to Purchase Potentially Below the Then Current Market Price Per Share and the Fund's Net Asset Value Per Share* The Board considered the Subscription Price noting that the Rights offering provides

an exclusive opportunity for Record Date Shareholders to purchase Shares of the Fund at a price potentially below the then current market price per Share and the Fund's NAV per Share. The Board established the Subscription Price and the 1-for-3 Share for Rights exchange ratio based on the recommendations of the Investment Manager and with a view toward, among other things, providing an incentive to shareholders to exercise the Rights.

R-6

Table of Contents

- (ii) *Potential Ownership, Voting, and Net Asset Value Dilution* The Board took into account that shareholders who do not fully exercise their Rights will own, upon completion of the Rights offering, a smaller proportional interest in the Fund than they owned before the Rights offering, resulting in immediate ownership and voting dilution for such shareholders. The Board also considered the fact that the expenses of the Rights offering will be borne by the Fund, and indirectly by all shareholders, including those who do not exercise their Rights, thus resulting in an immediate dilution of the NAV per Share for all existing shareholders. In addition, the Board considered that to the extent the Subscription Price per Share is less than the then current NAV per Share, the completion of the Rights offering will result in additional dilution of the NAV per Share for all existing shareholders, irrespective of whether they exercise all or a portion of their Rights, although any such dilution will disproportionately affect shareholders who choose not to exercise their Rights. Similarly, the Board noted that Bexil Securities LLC, the Fund's largest shareholder and an affiliate of the Investment Manager, could increase its percentage ownership in and control of the Fund through the exercise of its Rights and the purchase of additional Shares pursuant to the Over-Subscription Privilege and, if available, the purchase of Over-Allotment Shares.
- (iii) *Increase in Capital* The Board considered the increased equity capital to be available upon completion of a fully subscribed Rights offering, including the issuance of Shares pursuant to the Fund's exercise of the Over-Allotment Option, that could be used for making additional investments consistent with the Fund's investment objectives. The Investment Manager advised the Board that it believed such additional capital could be deployed in an effective and timely manner consistent with the Fund's investment objectives. The Board considered that the current market environment for securities in which the Fund may invest could change, which may adversely affect the Fund's ability to invest the proceeds of the Rights offering in securities that provide a yield at least equal to the current yield of the securities in the Fund's portfolio. The Board noted that the anticipated increase in capital does not necessarily mean the Fund may be more or less leveraged than otherwise, as the Fund may change its borrowings from time to time should it determine to adjust its leverage following the completion of the Rights offering.
- (iv) *Alternative Capital Raising Methods* The Board considered various other capital-raising alternatives, including, among other things, conducting secondary offerings of Shares, at-the-market offerings, and other types of rights offerings (e.g., transferrable rights offerings). The Board also considered the effect on the Fund if the Rights offering is undersubscribed. In this regard, the Board noted that two of the Fund's prior rights offerings in 2011 and 2013 were oversubscribed, and the Fund's most recent rights offering in 2015 was undersubscribed. The Board considered the benefits and drawbacks of conducting a transferable versus a non-transferable rights offering. In this regard, the Board considered the conclusions of the Investment Manager, which advised the Board that a non-transferable rights offering under terms generally consistent with the terms in this Prospectus Supplement appeared at that time to be the best alternative for the Fund to raise additional capital and that an underwriter or dealer is not always necessary or desirable for a non-transferable rights offering.

Table of Contents

- (v) *Size of the Rights Offering* The Board considered the size of the Rights offering in relation to the number of Shares outstanding. Based on recommendations from the Investment Manager, the Board decided on a 1-for-3 Rights offering with an Over-Subscription Privilege and an Over-Allotment Option.
- (vi) *Conditions of the Securities Markets* The Board took into account the Investment Manager's belief that the condition of the securities markets appears supportive of a Rights offering by the Fund at this time and, as noted above, the potential to invest the proceeds of the Rights offering in securities in an effective and timely manner consistent with the Fund's investment objectives.
- (vii) *Possible Greater Visibility of the Fund and Liquidity for the Shares* The Board took into account the Investment Manager's belief that a larger number of outstanding Shares could increase the level of market interest in and visibility of the Fund and improve the trading liquidity of the Fund's Shares on the NYSE.
- (viii) *Possible Modest Reduction in Expense Ratio* The Board was advised by the Investment Manager that the increase in assets may result in a modestly lower expense ratio for the Fund by spreading the Fund's fixed costs over a larger asset base. However, the Board considered that savings from a reduced expense ratio would be offset at first by the expenses of the Rights offering and dilution.
- (ix) *Possible Impact on the Fund's Distribution Policy* The Board also considered the potential impact of the Rights offering on the Fund's distribution policy.
- (x) *Investment Manager's Conflict of Interest* The Board considered that the Investment Manager has an inherent conflict of interest in recommending the Rights offering because the Fund pays fees to the Investment Manager based on a percentage of the Fund's assets and the Investment Manager will benefit from the increase in Fund assets that is expected to result from the Rights offering. The Board also considered that one of the Fund's Trustees who voted to authorize the Rights offering is an interested person of the Investment Manager within the meaning of the 1940 Act due to his affiliation with the Investment Manager and may benefit indirectly from the Rights offering because of his interest in the Investment Manager. It is not possible to state precisely the amount of additional compensation the Investment Manager will receive as a result of the Rights offering because it is not known at this time how many Shares will be subscribed for and because the proceeds of the Rights offering will be invested in additional portfolio securities, which will fluctuate in value. However, assuming all Rights are exercised and the Subscription Price is \$[] per Share, and after giving effect to the expenses related to the Rights offering estimated to be \$[], the Investment Manager would receive an additional annualized management fee of approximately \$[] (or approximately \$[], if the Over-Allotment Option is exercised and the full number of Over-Allotment Shares are issued). A majority of the Board members who approved the Rights offering are not interested persons of the Investment Manager.

The Board also considered the Fund's prior rights offerings in 2011, 2013, and 2015, including: (i) the number of exercising shareholders, including the Investment Manager, and dollar amounts subscribed for in the primary subscription, the over-subscription privilege, and any over-allotments, as applicable; (ii) the size of the rights offerings and net proceeds to the Fund; (iii) the dilutive effect of the prior rights offerings; (iv) the offering expenses incurred; and (v) the investments made by the Fund with the proceeds and the Fund's subsequent performance. In the prior rights offerings, shareholders of record on November 14, 2011, August 30, 2013, and September 28, 2015, respectively,

were issued one non-transferable right for each outstanding Share owned, and each shareholder holding rights was entitled to subscribe for one new Share for every three rights held for a subscription price based on a similar formula as the current Subscription Price, although the formula for the 2011 and 2013 rights offerings was 95% of the lower of (a) the Fund's NAV per share or (b) the market price per share, and did not include the 79% and 80% floors found in the, respectively, current Rights offering or the 2015 rights offering. The prior rights offerings expired on December 23, 2011, September 27, 2013, and October 30, 2015, respectively. The Board noted that the 2011 and 2013 rights offerings were oversubscribed, resulting in the Fund issuing 1,774,988 (restated to reflect the effects of the Fund's subsequent 1-for-4 reverse stock split) and 2,529,317 additional Shares, respectively. The Board also noted that the 2015 rights offering was undersubscribed, resulting in the Fund issuing 1,821,255 additional Shares.

R-8

Table of Contents

Expiration of the Offering

The Rights offering will expire at 5:00 p.m., ET, on [] (the Expiration Date), unless extended by the Fund. The Rights will expire on the Expiration Date and thereafter may not be exercised. Any extension of the Rights offering will be followed as promptly as practicable by announcement thereof. Without limiting the manner in which the Fund may choose to make such announcement, the Fund will not, unless otherwise required by law, have any obligation to publish, advertise, or otherwise communicate any such announcement other than by issuing a press release or such other means of announcement as the Fund deems appropriate.

Termination of the Offering

The Fund may terminate the Rights offering at any time and for any reason during the Subscription Period. If the Fund terminates the Rights offering, the Fund will issue a press release announcing such termination and will direct the Subscription Agent to return, without interest, all subscription proceeds received to such shareholders who had elected to purchase Shares.

Notice of Net Asset Value Decline

In accordance with SEC regulatory requirements, the Fund has undertaken to suspend the Rights offering until the Fund amends this Prospectus Supplement if, after the effective date of the Fund's Prospectus Supplement, the Fund's NAV declines more than 10% from the Fund's NAV as of that date. If this occurs, the Expiration Date will be extended and the Fund will notify Record Date Shareholders of the decline and permit them to cancel their exercise of Rights.

Over-Subscription Shares

Record Date Shareholders who fully exercise all Rights issued to them in the Primary Subscription may subscribe for the Primary Subscription Shares not subscribed for by other Rights holders at the same Subscription Price. The entitlement to buy such Shares is called the Over-Subscription Privilege. If enough Primary Subscription Shares are available after completion of the Primary Subscription, all such requests that are timely received will be honored in full. If over-subscription requests exceed the Primary Subscription Shares available, the Fund may, at the discretion of its Board, increase the number of Shares subject to subscription by up to 25% of the Primary Subscription Shares pursuant to the exercise of the Over-Allotment Option to cover such over-subscription requests. The Fund will not offer or sell in this Rights offering any Shares that are not subscribed for pursuant to the Primary Subscription or the Over-Subscription Privilege, although the Fund may offer and sell such Shares in a subsequent offering pursuant to the registration statement of which this Prospectus Supplement and the accompanying Prospectus are a part, subject to applicable law.

Record Date Shareholders who fully exercise all Rights issued to them in the Primary Subscription should indicate, on the Subscription Certificate that they submit with respect to such exercise, how many additional Shares they are requesting pursuant to the Over-Subscription Privilege.

Allocation of Over-Subscription Shares

Regardless of whether the Fund issues Over-Allotment Shares and to the extent sufficient Shares are not available to fulfill all over-subscription requests, Over-Subscription Shares will be allocated pro rata among those Record Date Shareholders who over-subscribe based on the number of Shares owned by them on the Record Date, but in no event will the number of Shares allocated to a shareholder exceed the number the shareholder subscribed for. The allocation

Edgar Filing: DIVIDEND & INCOME FUND - Form POS 8C

process may involve a series of allocations in order to assure that the total number of Over-Subscription Shares is distributed on a pro rata basis.

The formula to be used in allocating the Over-Subscription Shares is as follows:

$$\frac{\text{Record Date Position of Shareholder}}{\text{Total Record Date Position of Shareholders Requesting}} \times \text{Over-Subscription Shares Remaining}$$

Over-Subscription Shares Remaining in that Allocation

Brokers, banks, trust companies and other intermediaries, depositories, and nominees who hold the Fund's Shares for the account of others will be required, before any Over-Subscription Shares may be allocated with respect to any particular beneficial owner, to certify to the Subscription Agent the number of Rights exercised and Shares subscribed for pursuant to the Primary Subscription and the Over-Subscription Privilege by such beneficial owner, and that such beneficial owner's Primary Subscription was exercised in full. Certification forms will be available from the Information Agent.

R-9

Table of Contents

The Fund has been advised that the Investment Manager, its affiliates, and one or more of their officers, and members of the Fund's Board may exercise some or all of the Rights issued to them, and may request additional Shares pursuant to the Over-Subscription Privilege. Any purchases of additional Shares pursuant to the Over-Subscription Privilege by such persons will increase their proportionate voting power and share of the Fund's assets.

Method for Exercising Rights

Rights are evidenced by subscription certificates (each, a Subscription Certificate) that will be mailed or otherwise transmitted to Record Date Shareholders, including your broker, bank, trust company or other intermediary who holds the Fund's Shares for your account, directly or via Cede & Co. (Cede) or other depository or nominee (except as described under Requirements for Foreign Shareholders, below). Accordingly, Rights may be exercised by contacting your broker, bank, trust company or other intermediary who holds the Fund's Shares for your account, which can arrange, on your behalf, to guarantee delivery of payment and a properly completed and executed Subscription Certificate (referred to as a Notice of Guaranteed Delivery). A fee may be charged for this service by your broker, banker, trust company or other intermediary. In addition, your broker, bank, trust company or other intermediary may impose a deadline for exercising Rights earlier than 5:00 p.m., ET, on the Expiration Date. Rights also may be exercised by completing and signing the Subscription Certificate and mailing it in the envelope provided, or otherwise delivering the completed and signed Subscription Certificate to the Subscription Agent, together with payment in full of the estimated Subscription Price for the Shares subscribed for by the Expiration Date as described under Payment for Shares. Completed Subscription Certificates and payments must be received by the Subscription Agent by 5:00 p.m., ET, on the Expiration Date (unless delivery of Subscription Certificate and payment is effected by means of a Notice of Guaranteed Delivery as described under Payment for Shares) at the offices of the Subscription Agent at one of the addresses set forth under Information and Subscription Agent.

Shareholders who are Record Owners. Shareholders who are record owners of Shares can choose between either option set forth under Payment for Shares. If time is of the essence, option (2) will permit delivery of the Subscription Certificate and payment for Shares after the Expiration Date.

Investors whose Shares are Held by Intermediaries, Depositories, or Nominees. Beneficial owners of Shares held through brokers, banks, trust companies and other intermediaries, depositories, or nominees should contact the appropriate person to provide instructions with respect to the Rights and, as appropriate, to complete the Subscription Certificate on behalf of the beneficial owner and arrange for proper payment by one of the methods set forth under Payment for Shares.

Parties Who Hold the Fund's Shares for the Account of Others. Brokers, banks, trust companies and other intermediaries, depositories, and nominees who hold the Fund's Shares for the account of others should notify the respective beneficial owners of such Shares as soon as possible to ascertain such beneficial owners' intentions, obtain instructions with respect to the Rights, and, as appropriate, complete the Subscription Certificate and submit it to the Subscription Agent with proper payment as described under Payment for Shares.

Brokers, banks, trust companies and other intermediaries, depositories, and nominees who hold the Fund's Shares for the account of others will be required, before any Over-Subscription Shares may be allocated with respect to any particular beneficial owner, to certify to the Subscription Agent the number of Rights exercised and Shares subscribed for pursuant to the Primary Subscription and the Over-Subscription Privilege by such beneficial owner, and that such beneficial owner's Primary Subscription was exercised in full. Certification forms will be available from the Information Agent.

Requirements for Foreign Shareholders. Subscription Certificates will only be transmitted to Record Date Shareholders whose addresses are within the United States (other than an APO or FPO address). Record Date Shareholders whose addresses are outside the United States (for these purposes, the United States includes the District of Columbia and the territories and possessions of the United States) or who have an APO or FPO address (collectively Foreign Shareholders) and who wish to subscribe to the Rights offering either in part or in full should contact the Subscription Agent in writing or by recorded telephone conversation no later than five business days prior to the Expiration Date. The Fund will determine whether the Rights offering may be made to any such Record Date Shareholder. The Rights offering will not be made in any jurisdiction where it would be unlawful to do so. If the Subscription Agent has received no instruction by the fifth business day prior to the Expiration Date (or, if the Subscription Period is extended, on or before the fifth business day prior to the extended Expiration Date) or the Fund has determined that the Rights offering may not be made to a particular Record Date Shareholder, the Fund will consider the Rights of such Shareholder as having not been exercised and the underlying Shares shall be available to other Record Date Shareholders pursuant to the Over-Subscription Privilege.

Table of Contents

Information and Subscription Agent

American Stock Transfer & Trust Company, LLC will serve as the Fund's subscription agent in connection with the Rights offering. AST Fund Solutions, LLC, an affiliate of the Subscription Agent, will serve as the Fund's information agent in connection with the Rights offering. The Subscription Agent and Information Agent will collectively receive from the Fund an amount estimated to be approximately \$[], comprised of the fee for their services and the reimbursement for certain expenses related to the Rights offering. The fees and expenses of the Subscription Agent and Information Agent are included in the fees and expenses of the Rights offering and, therefore, will be borne by the Fund and indirectly by all shareholders, including those who do not exercise their Rights.

Inquiries regarding the Rights offering should be directed to the Information Agent toll free at [].

Completed Subscription Certificates must be sent together with payment of the estimated Subscription Price for all Shares subscribed for in the Primary Subscription and the Over-Subscription Privilege to the Subscription Agent by one of the methods described below. Beneficial owners of Shares held through brokers, banks, trust companies and other intermediaries, depositories, or nominees should contact the appropriate person to provide instructions to send Notices of Guaranteed Delivery to the Subscription Agent prior to 5:00 p.m., ET, on the Expiration Date. The Fund will accept only properly completed and executed Subscription Certificates actually received at any of the addresses listed below, prior to 5:00 p.m., ET, on the Expiration Date, or by the close of business on [] following timely receipt of a Notice of Guaranteed Delivery. See Payment for Shares.

The Fund will honor only Subscription Certificates, or Notices of Guaranteed Delivery, received by the Subscription Agent prior to 5:00 p.m., ET, on the Expiration Date at one of the addresses listed above. Delivery to an address other than those listed above will not constitute good delivery.

The Subscription Agent will deposit all funds received by it into a segregated account (interest, if any, paid on the balances in the account will accrue to the benefit of the Fund), pending distribution of the Shares.

Payment for Shares

Rights holders who wish to acquire Shares pursuant to the Primary Subscription and the Over-Subscription Privilege may choose between the following methods of payment:

- (1) A Rights holder can send the properly completed and executed Subscription Certificate together with full payment for Shares to be purchased, based upon the estimated Subscription Price of \$[] per Share, in the form of a personal check drawn upon a U.S. bank payable to the Subscription Agent. A subscription will be accepted when payment, together with the executed Subscription Certificate, is received by the Subscription Agent at one of the addresses set forth under Information and Subscription Agent. The payment and the properly completed and executed Subscription Certificate must be received by the Subscription Agent by 5:00 p.m., ET, on the Expiration Date. The Subscription Agent will deposit all checks and other funds received by it for the purchase of Shares into a segregated account of the Fund pending proration and distribution of Shares.

Table of Contents

A PAYMENT PURSUANT TO THIS METHOD MUST BE IN U.S. DOLLARS AND MAY BE MADE BY PERSONAL CHECK, CERTIFIED CHECK, OR BANK CASHIER'S CHECK DRAWN ON A BANK LOCATED IN THE UNITED STATES, OR BY WIRE TRANSFER, PAYABLE TO **AMERICAN STOCK TRANSFER & TRUST COMPANY, LLC AS SUBSCRIPTION AGENT** AND MUST ACCOMPANY A PROPERLY COMPLETED AND EXECUTED SUBSCRIPTION CERTIFICATE FOR SUCH SUBSCRIPTION TO BE ACCEPTED. WIRE TRANSFER INSTRUCTIONS ARE PROVIDED IN THE SUBSCRIPTION CERTIFICATE.

- (2) Alternatively, a subscription will be accepted by the Subscription Agent if, by 5:00 p.m., ET, on the Expiration Date, the Subscription Agent has duly received a Notice of Guaranteed Delivery from a broker, bank, trust company or other intermediary, depository, or nominee guaranteeing delivery of a properly completed and executed Subscription Certificate and full payment for Shares at the estimated Subscription Price of \$[] per Share. The Notice of Guaranteed Delivery may be delivered to the Subscription Agent in the same manner as Subscription Certificates at the addresses set forth above, or may be transmitted to the Subscription Agent by facsimile transmission to fax number []; telephone number to confirm receipt []. The Subscription Agent will not honor a Notice of Guaranteed Delivery if a properly completed and executed Subscription Certificate and full payment for the Shares at the estimated Subscription Price of \$[] per Share is not received by the Subscription Agent by the close of business on [].

A confirmation will generally be sent within two weeks of the Expiration Date (the Confirmation Date) by the Subscription Agent to each Rights holder exercising its Rights (or, for beneficial owners of Shares held through brokers, banks, trust companies and other intermediaries, depositories, or nominees, to such other intermediaries, depositories, or nominees) showing (i) the number of Shares acquired pursuant to the Primary Subscription, (ii) the number of Shares, if any, acquired pursuant to the Over-Subscription Privilege, (iii) the per Share and total purchase price for the Shares, (iv) any excess to be refunded by the Fund to the Rights holder as a result of payment for Shares pursuant to the Over-Subscription Privilege that the Rights holder is not acquiring, and (v) any additional amount payable to the Fund by the Rights holder or any excess to be refunded by the Fund to the Rights holder, in each case based on the actual Subscription Price as determined on the Expiration Date. Any additional payment required from a Rights holder must be received by the Subscription Agent by the close of business on [] (unless the Subscription Period is extended). Any excess payment to be refunded by the Fund to a Rights holder will be mailed or otherwise transmitted by the Subscription Agent to such Rights holder as promptly as practicable. All payments by a Rights holder must be in U.S. dollars and may be made by personal check, certified check, or bank cashier's check drawn on a bank located in the United States, or by wire transfer, payable to American Stock Transfer & Trust Company, LLC as Subscription Agent.

Whichever of the two methods described above is used, issuance and delivery of the Shares subscribed for are contingent upon actual payment for such Shares. No certificates will be issued or delivered with respect to Shares issued and sold in the Rights offering.

Rights holders who have exercised their Rights will have no right to rescind their subscription after receipt of the completed Subscription Certificate together with payment for Shares by the Subscription Agent, except under the circumstances described above under Notice of Net Asset Value Decline.

If a Rights holder who acquires Shares pursuant to the Primary Subscription or the Over-Subscription Privilege does not make payment of any amounts due by the Expiration Date (or later, if a Notice of Guaranteed Delivery is used), the Fund reserves the right to take any or all of the following actions through all appropriate means: (i) find other Record Date Shareholders for the subscribed and unpaid-for Shares; (ii) apply any payment actually received by the Fund toward the purchase of the greatest whole number of Shares that could be acquired by the Rights holder upon

exercise of such Rights acquired pursuant to the Primary Subscription or the Over-Subscription Privilege; and/or (iii) exercise any and all other rights or remedies to which the Fund may be entitled, including, without limitation, the right to set off against payments actually received by it with respect to such subscribed Shares and to enforce the relevant guarantee of payment.

The method of delivery of completed Subscription Certificates and payment of the Subscription Price to the Subscription Agent will be at the election and risk of exercising Rights holders, but if sent by mail, it is recommended that such forms and payments be sent by registered mail, properly insured, with return receipt requested, and that a sufficient number of days be allowed to ensure delivery to the Subscription Agent and clearance of payment by 5:00 p.m., ET, on the Expiration Date. Because uncertified personal checks may take more than one business day to clear, exercising Rights holders who do not wish to use the wire transfer method of payment are urged to pay, or arrange for payment, by means of certified or cashier's check with the shareholder's name identified on the check.

R-12

Table of Contents

All questions concerning the timeliness, validity, form and eligibility of any exercise of Rights will be determined by the Fund, which determinations will be final and binding. The Fund, in its sole discretion, may waive any defect or irregularity, or permit a defect or irregularity to be corrected within such time as it may determine, or reject the purported exercise of any Right. Subscriptions will not be deemed to have been received or accepted until substantially all irregularities have been waived or cured within such time as the Fund determines in its sole discretion. The Fund will not be under any duty to give notification of any defect or irregularity in connection with the submission of Subscription Certificates or incur any liability for failure to give such notification.

Employee Benefit Plan Considerations

Shareholders that are employee benefit plans subject to the Employee Retirement Income Security Act of 1974, as amended (ERISA) (including corporate savings and 401(k) plans), Keogh plans of self-employed individuals, Individual Retirement Accounts (IRAs) and other plans eligible for special tax treatment under the Internal Revenue Code of 1986, as amended (the Code) (each a Plan and collectively, the Plans) should be aware that additional contributions of cash to the Plan (other than rollover contributions or trustee-to-trustee transfers from other Plans) made in order to exercise Rights would be treated as Plan contributions and, when taken together with contributions previously made, may subject a Plan to excise taxes for excess or nondeductible contributions. In the case of Plans qualified under Section 401(a) of the Code and certain other plans, additional cash contributions could cause the maximum contribution limitations of Section 415 of the Code or other qualification rules to be violated. Plans contemplating the receipt of additional cash contributions to exercise Rights should consult with their counsel prior to receiving or using such contributions.

Plans and other tax exempt entities, including governmental plans, should also be aware that if they borrow in order to finance their exercise of Rights, they may become subject to the tax on unrelated business taxable income under Section 511 of the Code. If any portion of an IRA is used as security for a loan to the individual for whose benefit the IRA is established, the portion so used is also treated as distributed to such individual.

ERISA contains fiduciary responsibility requirements, and ERISA and the Code contain prohibited transaction rules that may impact the exercise of Rights. Due to the complexity of these rules and the penalties for non-compliance, Plans should consult with their counsel regarding the consequences of their exercise of Rights under ERISA and the Code.

Table of Contents**FEES AND EXPENSES**

The following table contains information about the costs and expenses that shareholders will bear directly or indirectly, as a result of the Rights offering. The table is based on management fees, interest, and other expenses incurred during the Fund's fiscal year ended December 31, 2016, [as adjusted for higher expenses accrued in 2017] and after giving effect to the Rights offering (assuming that the Rights offering is fully subscribed and that the Fund, at the discretion of the Board, increases the number of Shares subject to subscription by 25% pursuant to the exercise of the Over-Allotment Option, resulting in the receipt of net proceeds of \$[]). If the Fund issues fewer Shares and the net proceeds to the Fund are less, all other things being equal, the total annual expenses shown would increase. The purpose of the table and the example below is to help you understand the fees and expenses that you, as a holder of Shares, would bear directly or indirectly.

Shareholder Transaction Expenses

Sales Load (as a percentage of estimated Subscription Price) ⁽¹⁾	None
Offering Expenses (as a percentage of estimated Subscription Price) ⁽²⁾	[]%
Dividend Reinvestment Plan Fees ⁽³⁾	None
Annual Expenses (as a percentage of net assets attributable to Shares)	
Management Fees ⁽⁴⁾	[]%
Interest Payments on Borrowed Funds ⁽⁵⁾	[]%
Acquired Fund Fees and Expenses	0.04%
Other Expenses ⁽⁶⁾	[]%
Total Annual Fund Operating Expenses ⁽⁷⁾	[]%

- (1) The Rights are being offered directly by the Fund without the expense of an underwriter or sales agent.
- (2) Assuming the Rights offering is fully subscribed, but excluding the effect of increasing the number of Shares subject to subscription by 25% pursuant to the exercise of the Over-Allotment Option, offering expenses borne by the Fund are estimated to be approximately \$220,000 in the aggregate, or \$0.06 per Share. If the Fund increases the number of Shares subject to subscription pursuant to the exercise of the Over-Allotment Option for the full amount of Over-Allotment Shares, offering expenses are estimated to be approximately \$220,000 in the aggregate, or \$0.05 per Share.
- (3) See Dividend Reinvestment Plan in the accompanying Prospectus.
- (4) The Fund pays a management fee to the Investment Manager at an annual rate of 0.95% of the Fund's managed assets. Managed assets means the average weekly value of the Fund's total assets minus the sum of the Fund's liabilities, which liabilities exclude debt relating to leverage, short-term debt and the aggregate liquidation preference of any outstanding preferred stock (financial leverage). In accordance with the requirements of the SEC, the table above shows the Fund's management fee as a percentage of average net assets. In calculating the management fee rate based on net assets, the Fund derived the amount of management fees based upon outstanding financial leverage of []% of the Fund's managed assets (which is the average level of financial leverage employed during the Fund's fiscal year ended December 31, 2016). If financial leverage of more than []% is used, the management fee shown would be higher.
- (5) Based upon the Fund's outstanding borrowings as of December 31, 2016 of approximately \$27,780,000 and a borrowing rate under the Liquidity Agreement (as defined in the accompanying Prospectus) as of December 31, 2016 of 1.97167%.
- (6) Other Expenses are based upon those expenses incurred during the fiscal year ended December 31, 2016.
- (7)

Edgar Filing: DIVIDEND & INCOME FUND - Form POS 8C

Total Annual Fund Operating Expenses for the fiscal year ended December 31, 2016 were 1.62%. The []% figure set forth in the table above results from 2016 Fund expenses [as adjusted for higher expenses accrued in 2017] being spread over a larger net asset base as a result of giving effect to the Rights offering.

Example

The following example illustrates the expenses that you would pay on a \$1,000 investment in Shares, assuming (1) a 5% annual return, (2) total annual fund operating expenses of [use figure in table]%, (3) offering expenses of []%, and (4) reinvestment of all dividends and other distributions at NAV.

1 Year	3 Years	5 Years	10 Years
\$[]	\$[]	\$[]	\$[]

The purpose of the table and example above is to help you understand the various costs and expenses that an investor in the Fund may bear directly or indirectly. **The example should not be considered a representation of future expenses. The Fund's actual expenses may be more or less than those shown and the Fund's actual rate of return will vary and may be higher or lower than the hypothetical 5% annual return used to calculate the example.**

Table of Contents**FINANCIAL HIGHLIGHTS**

The table below sets forth certain specified information for a Share outstanding throughout each period presented. This information is derived from the financial and accounting records of the Fund. The financial highlights for the fiscal years ended December 31, 2012 through December 31, 2016, the one month ended December 31, 2011, and the year ended November 30, 2011 have been audited by Tait, Weller & Baker LLP, an independent registered public accounting firm. The prior financial highlights for the fiscal years ended November 30, 2007 through November 30, 2010 were audited by other independent registered public accounting firms, whose reports with respect to those periods were unqualified. Information for the six-month period ended June 30, 2017 has not been audited. The information below should be read in conjunction with (i) the Fund's audited financial statements and the accompanying notes thereto for the fiscal year ended December 31, 2016, which, together with the report of the Fund's independent registered public accounting firm, have been incorporated by reference in the SAI, and (ii) the Fund's Semi-Annual Report for the six-month period ended June 30, 2017, which is also incorporated by reference in the SAI. The Annual and Semi-Annual Reports are available without charge by calling toll-free at 1-855-411-6432.

Bexil Advisers LLC became the Fund's Investment Manager effective February 1, 2011.

Per share data, including the proportionate impact to market price, has been restated to reflect the effects of a 1-for-4 reverse stock split effective as of the start of trading on the NYSE on December 10, 2012.

(1) Unaudited.

(2) The Fund changed its fiscal year from November 30 to December 31, effective December 31, 2011.

(3) The per share amounts were calculated using the average number of Shares outstanding during the period.

(4) The Fund implemented a 1-for-4 reverse stock split with an ex-dividend date of December 10, 2012. Prior period net asset values and per share amounts have been restated to reflect the impact of the reverse stock split. The net asset value and market price report at the original dates prior to the reverse stock split were as follows:

Table of Contents

	For the Years Ended November 30,								
	One Month Ended Dec 31, 2011 ⁽²⁾	2011	2010	2009	2008	2007	2006	2005	
Net asset value	\$ 3.87	\$ 4.22	\$ 4.34	\$ 4.19	\$ 3.67	\$ 8.16	\$ 9.55	\$ 8.65	
Market value	\$ 3.43	\$ 3.46	\$ 4.23	\$ 3.65	\$ 2.60	\$ 7.35	\$ 9.78	\$ 10.70	

- (5) Total return on a market value basis is calculated assuming a purchase of Shares on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Generally, total return on a net asset value basis will be higher than total return on a market value basis in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total return on a net asset value basis will be lower than total return on a market value basis in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total return calculated for a period of less than one year is not annualized. The calculation does not reflect brokerage commissions, if any.
- (6) Expenses and income ratios do not include expenses incurred by the acquired funds in which the Fund invests.
- (7) Total expenses are the expenses of the Fund as presented in the Statement of Operations before fee waivers and expense reductions.
- (8) The ratio of total expenses excluding interest expense and fees incurred from the use of leverage to average net assets was 1.43%** for the six months ended June 30, 2017 and 1.46%, 1.51%, 1.47%, 1.72% and 2.30% for the years ended December 31, 2016, 2015, 2014, 2013 and 2012, respectively.
- (9) Net expenses are the expenses of the Fund presented in the Statement of Operations after fee waivers and expense reductions.
- (10) Effective July 28, 2016, the Fund replaced its prior bank credit facility with the Liquidity Agreement.
- (11) Effective April 26, 2010, the Fund replaced its commercial paper program with a bank credit facility.
- (12) Represents the value of total assets less liabilities not represented by senior securities representing indebtedness divided by the total number of senior indebtedness units, where one unit equals \$1,000 of senior indebtedness. For purposes of this calculation, the bank credit facility/Liquidity Agreement is considered a senior security representing indebtedness.
- * Less than \$0.01 per share.
- ** Annualized.

N/A means not applicable.

Table of Contents**USE OF PROCEEDS**

The net proceeds to the Fund from this Rights offering, assuming all Rights issued hereunder are exercised, are estimated to be \$[] or, if pursuant to the Over-Allotment Option, the Fund, at the discretion of the Board, elects to increase the number of Shares subject to subscription in an amount equal to 25% and all Over-Allotment Shares are sold, \$[], in each case after deducting offering expenses.

The Investment Manager expects that it will initially invest the proceeds of the offering by reducing borrowings, if any and as appropriate, and the balance in income generating equity securities, high quality short-term debt securities, money market fund shares, or other securities, as applicable. The Investment Manager anticipates that the investment of the proceeds will be made in accordance with the Fund's investment objectives and policies as appropriate investment opportunities are identified, which is expected to substantially be completed within three months; however, changes in market conditions could result in the Fund's anticipated investment period extending to as long as six months. Depending on market conditions and operations, a portion of the cash held by the Fund, including any proceeds raised from the offering, may be used to pay distributions in accordance with the Fund's distribution policy. The Fund does not currently anticipate an increase in leverage immediately following the completion of the offering; however, the Fund reserves the right to adjust leverage from time to time.

MARKET PRICE INFORMATION

The Fund's outstanding Shares are, and when issued, the Shares offered by the Rights offering will be, listed and traded on the NYSE under the symbol DNI. The following table sets forth for the calendar quarters indicated: (i) the high and low closing sales prices per Share as reported by the NYSE; (ii) the NAV per Share on the day of the high or low closing sales price; and (iii) the percentage by which the Shares traded at a premium over, or discount from, the Fund's high and low NAVs per Share. The table also sets forth the number of Shares traded on the NYSE during the respective quarters.

Quarter Ended	High Sales Price	High Net Asset Value	Premium (Discount) to High NAV	Low Sales Price	Low Net Asset Value	Premium (Discount) to Low NAV	Trading Volume
3/31/16	\$ 11.16	\$ 13.54	17.58%	\$ 9.48	\$ 11.93	20.54%	3,070,604
6/30/16	\$ 11.41	\$ 13.59	16.04%	\$ 10.51	\$ 12.38	15.11%	2,559,093
9/30/16	\$ 11.81	\$ 13.95	15.34%	\$ 10.85	\$ 12.99	16.51%	2,077,926
12/31/16	\$ 12.09	\$ 14.81	18.37%	\$ 10.60	\$ 13.07	18.90%	2,970,266
3/31/17	\$ 12.56	\$ 15.07	16.66%	\$ 11.88	\$ 14.51	18.13%	2,943,635
6/30/17	\$ 12.38	\$ 14.96	17.25%	\$ 11.86	\$ 14.44	17.87%	3,188,065
9/30/17	\$ 12.86	\$ 15.44	16.71%	\$ 12.09	\$ 14.76	18.09%	2,216,112

The Shares have traded in the market at a premium to, at, and at a discount from NAV since the commencement of the Fund's operations in June 1998. There is no guarantee that the Fund's current distribution policy to provide shareholders with a relatively stable cash flow per share will have the effect of reducing or eliminating the discount. The distribution policy may be changed or discontinued without notice.

Although the Shares may trade in the market for a substantial period of time at a substantial discount from the Fund's then current NAV per share, the Board has no fiduciary duty to take action, or to consider taking action, to narrow any

such discount, and no assurance can be given that the Board will consider or take action to authorize any activities related to the discount, or if such activities are undertaken, the Shares will thereafter trade at less of a discount. Under certain circumstances, a shareholder vote may be required to authorize such activities.

On [], the last reported sales price of the Shares on the NYSE was \$[] and the NAV per Share was \$[], representing a discount from NAV per Share of []%.

CAPITALIZATION

The following table sets forth the unaudited capitalization of the Fund as of [] and its adjusted capitalization assuming the sale of [] Shares (which assumes the Rights offering is fully subscribed and the Fund, at the discretion of the Board, increases the number of Shares subject to subscription by 25% pursuant to the exercise of the Over-Allotment Option) at an estimated Subscription Price of \$[] per Share pursuant to the Rights offering, less the estimated offering expenses of approximately \$220,000, and the application of the estimated net proceeds from the offering. All of the Rights may not be exercised, and the Fund may not exercise the Over-Allotment Option.

SPECIAL CHARACTERISTICS AND RISKS OF THE RIGHTS OFFERING

Risk is inherent in all investing. Therefore, before investing in the Shares you should consider the risks associated with such an investment carefully. See **Special Considerations and Risk Factors** in the Prospectus. The following summarizes some of the matters that you should consider before investing in the Fund through the Rights offering.

Dilution

If you do not exercise all of your Rights, you will own a smaller proportional interest in the Fund when the Rights offering is over, resulting in immediate ownership and voting dilution. In addition, you will experience an immediate dilution of the NAV per Share as a result of the expenses incurred by the Fund (and indirectly by all shareholders) in connection with the Rights offering. You will experience additional dilution in the NAV per Share if you do not participate in the Rights offering and will experience a reduction in the NAV per Share whether or not you exercise your Rights if the Subscription Price is below the Fund's NAV per Share on the Expiration Date, because:

the offered Shares are being sold at less than their current NAV; and

the number of Shares outstanding after the Rights offering will have increased proportionately more than the increase in the amount of the Fund's net assets.

The Fund cannot state precisely the amount of any dilution because it is not known at this time what the Subscription Price or NAV per Share will be on the Expiration Date, how many Shares will be subscribed for, the exact expenses of the Rights offering, or whether the Fund will exercise its Over-Allotment Option. Furthermore, if the Fund exercises its Over-Allotment Option, your percentage ownership may be further diluted if you do not purchase Over-Allotment Shares.

For example, assuming all the Shares are sold at the estimated Subscription Price of \$[] per Share (assuming the Fund does not exercise its Over-Allotment Option) and after deducting all expenses related to the Rights offering (estimated to be \$220,000), the Fund's NAV of \$[] per Share as of [] would be reduced by approximately \$[] or []%. Record Date Shareholders will experience a decrease in the NAV of Shares held by them, irrespective of whether they exercise all or any portion of their Rights. Set forth below are additional examples of the impact of the Rights offering on NAV per Share.

R-19

Table of Contents

Example of Dilution to NAV Resulting from the Rights Offering

(assuming (i) the Subscription Price is 95% of the market price, and

(ii) the Fund does not exercise its Over-Allotment Option)

(a) NAV per Share (as of [])	\$ []
(b) Total net assets (as of [])	\$ []
(c) Estimated reduction in current NAV per Share resulting from the Rights offering ⁽¹⁾⁽²⁾	\$ []
(d) Estimated % reduction in current NAV per Share resulting from the Rights offering ⁽¹⁾⁽³⁾	[]%

Example of Dilution to NAV Resulting from the Rights Offering

(assuming (i) the Subscription Price is 79% of the Fund's NAV,

and (ii) the Fund does not exercise its Over-Allotment Option)

(a) NAV per Share (as of [])	\$ []
(b) Total net assets (as of [])	\$ []
(c) Estimated reduction in current NAV per Share resulting from the Rights offering ⁽¹⁾⁽²⁾	\$ []
(d) Estimated % reduction in current NAV per Share resulting from the Rights offering ⁽¹⁾⁽³⁾	[]%

Example of Dilution to NAV Resulting from the Rights Offering

(assuming (i) the Subscription Price is 95% of the market price, and (ii) the Fund exercises its Over-Allotment Option and the full number of Over-Allotment Shares are issued)

(a) NAV per Share (as of [])	\$ []
(b) Total net assets (as of [])	\$ []
(c) Estimated reduction in current NAV per Share resulting from the Rights offering ⁽¹⁾⁽²⁾	\$ []
(d) Estimated % reduction in current NAV per Share resulting from the Rights offering ⁽¹⁾⁽³⁾	[]%

Example of Dilution to NAV Resulting from the Rights Offering

(assuming (i) the Subscription Price is 79% of the Fund's NAV and (ii) the Fund exercises its Over-Allotment Option and the full number of Over-Allotment Shares are issued)

(a) NAV per Share (as of [])	\$ []
(b) Total net assets (as of [])	\$ []
(c) Estimated reduction in current NAV per Share resulting from the Rights offering ⁽¹⁾⁽²⁾	\$ []
(d) Estimated % reduction in current NAV per Share resulting from the Rights offering ⁽¹⁾⁽³⁾	[]%

- (1) Assumes full exercise of the Rights being offered, that the Expiration Date was [] and all of the Shares are sold on that date at the estimated Subscription Price of \$[] per Share, and the deduction of estimated expenses equal to \$220,000.
- (2) Item (c) was calculated by subtracting (A) the Fund's estimated NAV per Share immediately following the completion of the Rights offering from (B) the Fund's NAV per Share as of []. The Fund's estimated NAV per Share immediately following the completion of the Rights offering was estimated (using the assumptions described in note (1) above) by dividing (X) the estimated NAV of the Fund immediately following the Rights offering by (Y) the estimated total number of Shares outstanding immediately following the completion of the Rights offering.
- (3) Item (d) was calculated by dividing Item (c) by Item (a).

There can be no assurance that the dilution will be limited to the amounts shown in the table above. The final amounts of such dilution may be greater than those estimated due to many factors, including the Fund's market price and NAV per Share at the time of completion of the Rights offering and the level of participation in the Rights offering.

Bexil Securities LLC, the Fund's largest shareholder and an affiliate of the Investment Manager, could increase its percentage ownership in and control of the Fund through the exercise of its Rights and the purchase of additional Shares pursuant to the Over-Subscription Privilege.

Leverage

Leverage, or borrowing for investment (rather than hedging) purposes, creates a greater risk of loss, as well as a potential for more gain, for the Shares than if leverage were not used. The leverage of the Fund as of [] was []% of its total assets (including the proceeds of such leverage). The Investment Manager expects that it will initially invest the proceeds of the offering by reducing leverage, if any and as appropriate. The Fund does not currently anticipate an increase in leverage immediately following the completion of the offering; however, the Fund reserves the right to adjust leverage from time to time.

Table of Contents

Leverage creates an opportunity for increased return but, at the same time, involves special risk considerations. Leverage increases the likelihood of greater volatility of NAV and market price of the Shares. If the total return that the Fund earns on the additional securities purchased fails to cover the costs the Fund incurs on the monies borrowed for leverage, the NAV of the Fund (and the return of the Fund) would be lower than if borrowing had not been incurred. In addition, when the Fund borrows at a variable interest rate, there is a risk that fluctuations in the interest rate may adversely affect the return to the Fund's shareholders. Interest payments and fees incurred in connection with such borrowings will reduce the amount of net income available for distribution to shareholders if the income that the Fund earns on the additional securities purchased is less than such payments and fees. The Fund may also enter into transactions other than those noted above that may give rise to other forms of leverage including, among others, derivative transactions, loans of portfolio securities, and when-issued, delayed delivery and forward commitment transactions. There is no assurance that a leverage strategy will be successful during any period in which it is employed.

Borrowing on a secured basis for leverage results in certain additional risks. Should securities that are pledged as collateral to secure the loan decline in value, the Fund may be required to pledge additional assets in the form of cash or securities to the lender to avoid liquidation of the pledged assets. In the event of a steep drop in the value of pledged securities, it might not be possible to liquidate assets quickly enough and this could result in mandatory liquidation of the pledged assets in a declining market at relatively low prices. Furthermore, the Investment Manager's ability to sell the pledged securities is limited by the terms of the Liquidity Agreement with State Street Bank and Trust Company, which may reduce the Fund's investment flexibility over the pledged securities. The rights of the lender to receive payments of interest on and repayments of principal will be senior to the rights of the Fund's shareholders.

Because the fee paid to the Investment Manager is calculated on the basis of the average weekly value of the Fund's total assets minus the sum of the Fund's liabilities, which liabilities exclude debt relating to leverage, short-term debt and the aggregate liquidation preference of any outstanding preferred stock, the dollar amount of the management fee paid by the Fund to the Investment Manager will be higher (and the Investment Manager will benefit to that extent) when leverage is utilized. The Investment Manager will utilize leverage only if it believes such action would likely result in a net benefit to the Fund's shareholders after taking into account the higher fees and expenses associated with leverage (including higher management fees).

Increase in Share Price Volatility; Decrease in Share Price

The Rights offering may result in an increase in trading of the Shares, which may increase volatility in the market price of the Shares. The Rights offering may result in an increase in the number of shareholders wishing to sell their Shares, which would exert downward price pressure on the price of Shares.

Undersubscription

It is possible that the Rights offering will not be fully subscribed. Two of the Fund's prior rights offerings, in 2011 and 2013, were oversubscribed and the Fund's most recent rights offering, in 2015, was undersubscribed. Undersubscription of the Rights offering could have an impact on the net proceeds of the Rights offering and whether the Fund achieves any benefits. It is also possible that the Fund may not exercise the Over-Allotment Option (and, therefore, may not issue any Over-Allotment Shares).

U.S. FEDERAL INCOME TAX CONSEQUENCES OF THE OFFERING

The discussion set forth herein does not constitute tax advice and potential investors are urged to consult their own tax advisers to determine the tax consequences to them of investing in the Fund.

Please refer to the Certain Federal Income Tax Consequences section in the Fund's Prospectus for a description of the consequences of investing in the Shares of the Fund. Special tax considerations relating to the Rights offering are summarized below.

R-21

Table of Contents

A holder's receipt of Rights generally should not constitute a taxable event to the holder for federal income tax purposes, and the remainder of this section assumes that result. A holder's tax basis in Rights issued to it will be zero, unless either (1) the fair market value of the rights on the date they are issued is 15% or more of the value of the Shares with respect to which the Rights were issued (Old Shares), which the Fund does not expect, or (2) the holder elects to allocate to the Rights a portion of its basis in the Old Shares (Election). If either (1) or (2) applies, basis will be allocated in proportion to the relative fair market values of the Old Shares and the Rights on the date the Rights are issued. Basis will be allocated only when Rights are exercised. A holder who wishes to make the Election described in (2) must attach a statement to that effect to its income tax return for the taxable year in which the Rights are received. The Election will apply to all Rights the holder receives pursuant to the offering and, once made, will be irrevocable. If, as the Fund expects, the value of the Rights a holder receives is less than 15% of the value of its Old Shares, the holder should consult its own tax advisor regarding the advisability of making the Election. The Fund will not, however, make any determination regarding the fair market value of the Rights. The holding period of Rights will be the same as the holding period of the stock on which such Right was received.

A holder will not recognize taxable income on the exercise of Rights. A holder's basis in any Shares acquired on the exercise of Rights (a New Share) will equal the sum of the basis, if any, in those Rights and the Subscription Price for the New Share. A holder's holding period for a New Share will begin with and include the date of exercise of the related Rights.

Holders who receive Rights in the offering with respect to their Shares with a tax basis of zero, as determined above, and who allow such Rights to expire unexercised will not recognize any gain or loss, and no adjustment will be made to the basis of the holder's Shares.

You should consult a tax advisor regarding the tax consequences of acquiring, holding, and exercising Rights, and of allowing Rights to expire, in your particular circumstances, as well as any tax consequences that may arise under the laws of any state, local, or foreign taxing jurisdiction.

LEGAL MATTERS

Certain legal matters will be passed upon by Godfrey & Kahn S.C., Madison, Wisconsin, counsel to the Fund in connection with the offering of the Fund's securities.

Table of Contents**FUND HISTORY**

The Fund is a diversified, closed end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). The Fund was incorporated under the laws of the State of Maryland on April 6, 1998 and commenced investment operations on June 29, 1998. Bexil Advisers LLC became the Fund's investment manager ("Investment Manager") effective February 1, 2011. Effective February 14, 2011, the Fund changed its name from Chartwell Dividend and Income Fund, Inc. to Dividend and Income Fund, Inc. and its ticker symbol from CWF to DNI. On May 14, 2012, the Fund was reorganized into Dividend and Income Fund, a Delaware statutory trust, pursuant to an Agreement and Plan of Reorganization and exists under an Amended and Restated Agreement and Declaration of Trust governed by the laws of the State of Delaware. The Fund's Shares are listed on the New York Stock Exchange ("NYSE") under the symbol DNI.

ADDITIONAL INFORMATION ABOUT THE FUND'S INVESTMENT PROGRAM

The Prospectus presents the investment objectives and the principal investment policies, strategies, and risks of the Fund. This section is intended to supplement the disclosure in the Prospectus. This section also provides information about the Fund's non-principal investment policies, strategies, and risks. Whether a particular strategy, including a strategy to invest in a particular type of security, is a principal investment strategy depends on the strategy's anticipated importance in achieving the Fund's investment objectives, and how the strategy affects the Fund's potential risks and returns. In determining what is a principal investment strategy, the Fund considers, among other things, the amount of the Fund's assets expected to be committed to the strategy, the amount of the Fund's assets expected to be placed at risk by the strategy, and the likelihood of the Fund's losing some or all of those assets from implementing the strategy.

Money Market Instruments. In addition to money market fund shares discussed in the Prospectus, the Fund may invest in the following types of money market instruments:

Repurchase Agreements. The Fund may enter into repurchase agreements. A repurchase agreement is an agreement under which either U.S. government obligations or other high quality liquid debt securities are acquired from a securities dealer or bank subject to resale at an agreed upon price and date. The securities are held for the Fund by a custodian bank as collateral until resold and may be supplemented by additional collateral if necessary to maintain a total value equal to or in excess of the value of the repurchase agreement. The Fund bears a risk of loss in the event that the other party to a repurchase agreement defaults on its obligations and the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities, which may decline in value in the interim. Repurchase agreements are usually for a term of one week or less, but may be for longer periods. Although repurchase agreements maturing in more than seven days may be considered illiquid, the Fund may invest in repurchase agreements without limit. To the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund might suffer a loss. If bankruptcy proceedings are commenced with respect to the seller of the security, realization upon the collateral by the Fund could be delayed or limited.

Bank Obligations. The Fund may purchase certificates of deposit, time deposits, bankers' acceptances, and other short term obligations issued by domestic banks, foreign subsidiaries or foreign branches of domestic banks, domestic and foreign branches of foreign banks, domestic savings and loan associations and other banking institutions. With respect to such securities issued by foreign subsidiaries or foreign branches of domestic banks, and domestic and foreign branches of foreign banks, the Fund may be subject to additional investment risks.

Certificates of deposit are negotiable certificates evidencing the obligation of a bank to repay funds deposited with it for a specified period of time.

Time deposits are non-negotiable deposits maintained in a banking institution for a specified period of time (usually not longer than seven days) at a stated interest rate.

Bankers' acceptances are credit instruments evidencing the obligation of a bank to pay a draft drawn on it by a customer. These instruments reflect the obligation both of the bank and the drawer to pay the face amount of the instrument upon maturity. The other short term obligations may include uninsured, direct obligations bearing fixed, floating, or variable interest rates.

Table of Contents

Commercial Paper. Commercial paper is a debt obligation usually issued by corporations (including foreign corporations) and may be unsecured or secured by letters of credit or a surety bond. Commercial paper is usually repaid at maturity by the issuer from the proceeds of the issuance of new commercial paper. As a result, investment in commercial paper is subject to the risk that the issuer cannot issue enough new commercial paper to satisfy its outstanding commercial paper, also known as rollover risk.

Other Short Term Corporate Obligations. These instruments include variable amount master demand notes, which are obligations that permit the Fund to invest fluctuating amounts at varying rates of interest pursuant to direct arrangements between the Fund, as lender, and the borrower. These notes permit daily changes in the amounts borrowed. Because these obligations are direct lending arrangements between the lender and borrower, it is not contemplated that such instruments generally will be traded, and there generally is no established secondary market for these obligations, although they are normally redeemable at face value, plus accrued interest, at any time. Accordingly, where these obligations are not secured by letters of credit or other credit support arrangements, the Fund's right to redeem is dependent on the ability of the borrower to pay principal and interest on demand. Such obligations frequently are not rated by credit rating agencies.

U.S. Government Securities. The obligations issued or guaranteed by the U.S. government in which the Fund may invest include direct obligations of the U.S. Treasury and obligations issued by U.S. government agencies and instrumentalities. Included among direct obligations of the United States are Treasury Bills, Treasury Notes, and Treasury Bonds, which differ in terms of their interest rates, maturities, and dates of issuance. Treasury Bills have maturities of less than one year, Treasury Notes have maturities of one to 10 years, and Treasury Bonds generally have maturities of greater than 10 years at the date of issuance. Included among the obligations issued by agencies and instrumentalities and government-sponsored enterprises of the United States are instruments that are supported by the full faith and credit of the United States (such as certificates issued by the Government National Mortgage Association (Ginnie Mae)), instruments that are supported by the right of the issuer to borrow from the U.S. Treasury (such as securities of the Federal Home Loan Banks), and instruments that are supported only by the credit of the instrumentality (such as Federal National Mortgage Association (Fannie Mae) or Federal Home Loan Mortgage Corporation (Freddie Mac) bonds).

Other U.S. government securities in which the Fund may invest include securities issued or guaranteed by the Federal Housing Administration, Farmers Home Loan Administration, Export-Import Bank of the United States, Small Business Administration, General Services Administration, Central Bank for Cooperatives, Federal Farm Credit Banks, Federal Intermediate Credit Banks, Federal Land Banks, Maritime Administration, Tennessee Valley Authority, District of Columbia Armory Board, and SLM Corporation (formerly, the Student Loan Marketing Association). The Fund may invest in instruments that are supported by the right of the issuer to borrow from the U.S. Treasury and instruments that are supported solely by the credit of the instrumentality or enterprise.

Historically, U.S. government securities have not been perceived to involve the general credit risks associated with investments in other types of debt securities and, as a result, the yields available from U.S. government securities are generally lower than the yields available from other debt securities. Like other debt securities, however, the values of U.S. government securities change as interest rates fluctuate. Fluctuations in the value of these portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund's net asset value (NAV).

Stripped Securities. The Fund may invest in zero coupon U.S. Treasury securities, which are Treasury Notes and Treasury Bonds that have been stripped of their unmatured interest coupons, the coupons themselves and receipts or certificates representing interests in such stripped debt obligations and coupons. Similar stripped securities also are issued by corporations and financial institutions, which constitute a proportionate ownership of the issuer's pool of underlying securities. A stripped security pays no interest to its holder during its life and is sold at a discount to its

face value at maturity. The market prices of such securities generally are more volatile than the market prices of securities that pay interest periodically and are likely to respond to a greater degree to changes in interest rates than coupon securities having similar maturities and credit qualities.

Table of Contents

Inflation-Indexed Bonds. The Fund may invest in inflation-indexed bonds, which are debt obligations whose value is periodically adjusted according to the rate of inflation (as measured by the Consumer Price Index for Urban Consumers (CPI-U)). Two structures are common. The U.S. Treasury and some other issuers utilize a structure that accrues inflation into the principal value of the bond. Other issuers pay out the CPI-U accruals as part of a semiannual coupon. Inflation-indexed securities issued by the U.S. Treasury (initially known as Treasury inflation-protection securities or TIPS) have maturities of approximately five, ten, or thirty years, although it is possible that securities with other maturities will be issued in the future. The U.S. Treasury securities pay interest on a semi-annual basis equal to a fixed percentage of the inflation-adjusted principal amount. For example, if the Fund purchased an inflation-indexed bond with a par value of \$1,000 and a 3% real rate of return coupon (payable 1.5% semi-annually), and the rate of inflation over the first six months was 1%, the mid-year par value of the bond would be \$1,010 and the first semi-annual interest payment would be \$15.15 (\$1,010 times 1.5%). If inflation during the second half of the year resulted in the whole year's inflation equaling 3%, the end-of-year par value of the bond would be \$1,030 and the second semi-annual interest payment would be \$15.45 (\$1,030 times 1.5%).

If the periodic adjustment rate measuring inflation falls, the principal value of inflation-indexed bonds will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds, even during a period of deflation. However, the current market value of the bonds is not guaranteed and will fluctuate. The Fund may also invest in other inflation-related bonds that may or may not provide a similar guarantee. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal amount.

The value of inflation-indexed bonds is expected to change in response to changes in real interest rates. Real interest rates in turn are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if the rate of inflation rises at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed bonds. In contrast, if nominal interest rates increase at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-indexed bonds.

While these securities are expected to be protected from long term inflationary trends, short term increases in inflation may lead to a decline in value. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond's inflation measure.

The periodic adjustment of U.S. inflation-indexed bonds is tied to the CPI-U, which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI-U is a measurement of changes in the cost of living, made up of components such as housing, food, transportation, and energy. Inflation-indexed bonds issued by a foreign government are generally adjusted to reflect a comparable inflation index calculated by that government. There can be no assurance that the CPI-U or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States.

Any increase in the principal amount of an inflation-indexed bond will be considered taxable ordinary income, even though investors do not receive their principal until maturity.

Foreign Government Obligations; Securities of Supranational Entities. The Fund may invest in obligations issued or guaranteed by one or more foreign governments or any of their political subdivisions, agencies or instrumentalities. Supranational entities include international organizations designated or supported by governmental entities to promote economic reconstruction or development and international banking institutions and related government agencies.

Variable and Floating Rate Securities. The Fund may invest in floating rate (floaters) and variable rate debt securities, which provide for a periodic adjustment in the interest rate paid on the obligations. The terms of such obligations typically provide that interest rates are adjusted periodically based upon an interest rate adjustment index as provided in the respective obligations. The adjustment intervals may be regular, and range from daily up to annually, or may be event based, such as based on a change in the prime rate.

Table of Contents

The interest rate on a floater is a variable rate which is tied to another interest rate, such as a money-market index or Treasury Bill rate. The interest rate on a floater resets periodically, typically every six months. Because of the interest rate reset feature, floaters provide the Fund with a certain degree of protection against rises in interest rates, although the Fund will participate in any declines in interest rates as well. The Fund also may invest in inverse floating rate debt instruments (inverse floaters). The interest rate on an inverse floater resets in the opposite direction from the market rate of interest to which the inverse floater is indexed or inversely to a multiple of the applicable index. An inverse floating rate security may exhibit greater price volatility than a fixed rate obligation of similar credit quality.

Zero Coupon Bonds, Step-Up Bonds, and Payment-In-Kind Securities. Zero coupon bonds are debt obligations that do not entitle the holder to any periodic payments of interest either for the entire life of the obligation or for an initial period after the issuance of the obligations. Like zero coupon bonds, step up bonds (step-ups) pay no interest initially but eventually begin to pay a coupon rate prior to maturity, which rate may increase at stated intervals during the life of the security. Payment-in-kind securities (PIKs) pay interest in the form of other securities, instead of in cash.

Each of these instruments is typically issued and traded at a deep discount from its face amount; the discount on a zero coupon bond or step-up, which is the difference between the price at which the bond was issued and its stated redemption price at maturity, is called original issue discount (OID). The amount of the discount varies depending on such factors as the time remaining until maturity of the securities, prevailing interest rates, the liquidity of the security, and the perceived credit quality of the issuer. The market prices of zero coupon bonds, step-ups, and PIKs generally are more volatile than the market prices of securities that pay interest currently and in cash are likely to respond to changes in interest rates to a greater degree than do other types of securities having similar maturities and credit quality. The Fund may purchase some debt securities at a discount that exceeds their OID, if any; this additional discount represents market discount.

To continue to qualify each taxable year for treatment as a regulated investment company under the Internal Revenue Code of 1986, as amended (Code), the Fund, among other things, must distribute at least 90% of its net investment income including the OID accrued on zero coupon bonds and step-ups (and other debt securities that were originally issued at a discount), which generally is treated for federal income tax purposes as interest, and the interest on PIKs and certain other amounts. See Tax Considerations. Because the Fund will not, on a current basis, receive cash payments from the issuers in respect of accrued OID and interest on PIKs, it may have to distribute cash obtained from other sources to satisfy the 90% distribution requirement. Such cash might be obtained from selling other portfolio holdings of the Fund. In some circumstances, such sales might be necessary to satisfy cash distribution requirements even though investment considerations might otherwise make it undesirable for the Fund to sell such securities at such time. Under many market conditions, investments in zero coupon bonds, step-ups and PIKs may be illiquid, making it difficult for the Fund to dispose of them or determine their current value.

Distressed Securities. Distressed securities include securities (1) issued by a company in a bankruptcy reorganization proceeding, (2) subject to some other form of public or private debt restructuring, (3) otherwise in default, or subject to significant risk of being in default, as to the payment of interest or repayment of principal or (4) trading at prices substantially below investment grade debt securities of companies in similar industries. Distressed securities are generally rated Ca1 or lower by Moody's Investors Service, Inc. or CC+ or lower by S&P Global Ratings, comparably rated by another rating agency or are unrated but considered by the Investment Manager to be of comparable quality.

Distressed securities frequently do not produce income while they are outstanding. The Fund may be required to incur certain extraordinary expenses in order to protect and recover its investments therein. Therefore, to the extent the Fund seeks capital appreciation through investments in distressed securities, its current income may be diminished. The Fund also will likely be subject to significant uncertainty as to when, in what manner, and for what value the

obligations evidenced by the distressed securities will eventually be satisfied (*e.g.*, through a liquidation of the obligor's assets, an exchange offer or plan of reorganization involving the distressed securities, or a payment of some amount in satisfaction of the obligation). In addition, even if an exchange offer is made or a plan of reorganization is adopted with respect to distressed securities held by the Fund, there can be no assurance that the securities or other assets the Fund receives in connection with such exchange offer or plan of reorganization will not

Table of Contents

have a lower value or income potential than may have been anticipated when the investment was made. Moreover, any securities the Fund receives upon completion of an exchange offer or plan of reorganization may be restricted as to resale. As a result of the Fund's participation in negotiations with respect to any exchange offer or plan of reorganization with respect to an issuer of distressed securities, the Fund may be restricted from disposing of such securities.

Indexed Securities. The Fund may invest in indexed securities, whose values are linked to currencies, interest rates, commodities, indices, or other financial indicators, domestic or foreign. Many indexed securities are short to intermediate term fixed income securities whose values at maturity or interest rates rise or fall according to the change in one or more specified underlying instruments. The value of indexed securities may increase or decrease if the underlying instrument appreciates, and they may have return characteristics similar to direct investment in the underlying instrument. Indexed securities may be more volatile than the underlying instrument itself.

Convertible Securities. Convertible securities include corporate bonds, debentures, notes, preferred stocks, and other securities that entitle the holder to acquire common stock or other equity securities of the same or a different issuer. Convertible securities have general characteristics similar to both debt and equity securities. A convertible security generally entitles the holder to receive interest or preferred dividends paid or accrued until the convertible security matures or is redeemed, converted, or exchanged. Convertible securities generally rank senior to common stock in a corporation's capital structure and, therefore, generally entail less risk than the corporation's common stock, although the extent to which such risk is reduced depends in large measure upon the degree to which the convertible security sells above its value as a debt obligation. Convertible securities are generally convertible either at a stated price or a stated rate (that is, for a specific number of shares of common stock or other security). Before conversion, convertible securities have characteristics similar to non-convertible obligations. The price of a convertible security to some extent varies inversely with interest rates. While providing a fixed income stream (generally higher in yield than the income derivable from a common stock but lower than that afforded by a non-convertible debt security), a convertible security also provides an opportunity, through its conversion feature, to participate in the capital appreciation of the common stock or other equity security into which it is convertible. As the market price of the underlying equity security declines, convertible securities tend to trade increasingly on a yield basis and so may not experience market value declines to the same extent as the underlying equity security. When the market price of the underlying equity security increases, the price of a convertible security tends to rise as a reflection of the value of the underlying equity security. To obtain the higher yield, to the extent the Fund invests in convertible securities, it may be required to pay a purchase amount in excess of the value of the underlying equity security.

Convertible securities generally have less potential for gain or loss than common stocks. Convertible securities generally provide yields higher than the underlying common stocks, but lower than comparable nonconvertible securities. Because of this higher yield, convertible securities generally sell at prices above their conversion value, which is the current market value of the stock to be received upon conversion. The difference between this conversion value and the price of convertible securities will vary over time depending on changes in the value of the underlying common stocks and interest rates. When the underlying common stocks decline in value, convertible securities will tend not to decline to the same extent because of the interest or dividend payments and the repayment of principal at maturity for certain types of convertible securities. However, securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities convertible at the option of the holder. When the underlying common stocks rise in value, the value of convertible securities may also be expected to increase. At the same time, however, the difference between the market value of convertible securities and their conversion value will narrow, which means that the value of convertible securities will generally not increase to the same extent as the value of the underlying common stocks. Because convertible securities may also be interest rate sensitive, their value may increase as interest rates fall and decrease as interest rates rise. Convertible securities are also subject to credit risk, and often are lower-rated securities or issued by smaller companies.

Real Estate Investment Trusts Securities. The Fund may invest in shares of real estate investment trusts (REITs), which are companies that invest primarily in real estate or real estate related securities or interests. REITs are generally classified as equity REITs, mortgage REITs, or hybrid REITs, which are a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that

Table of Contents

have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income primarily from interest payments. A REIT is not taxed on net income and gains it distributes to its shareholders, provided it complies with the applicable requirements of the Code. The Fund will indirectly bear its proportionate share of any management and other expenses paid by REITs in whose shares it invests in addition to the expenses the Fund pays directly.

Investing in REITs involves certain unique risks in addition to the risks associated with investing in the real estate industry in general. An equity REIT may be affected by changes in the value of the underlying properties it owns, by changes in economic conditions generally, and by changes in the stock market. A mortgage REIT may be affected by changes in interest rates and the ability of the obligors on its portfolio mortgages to repay their obligations. REITs depend on the skills of their managers and are not diversified by industry. REITs generally depend on maintaining cash flows to repay borrowings and to make distributions to stockholders and are subject to the risk of default by lessees or borrowers. REITs whose underlying assets are concentrated in properties used by a particular industry, such as health care, are also subject to risks associated with such industry.

REITs (especially mortgage REITs) are also subject to interest rate risk. When interest rates decline, the value of a REIT's investment in fixed rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT's investment in fixed rate obligations can be expected to decline. If a REIT invests in adjustable rate mortgages (so-called ARMs), the interest rates on which are reset periodically, yields on the REIT's investments in such loans will gradually align themselves to reflect changes in market interest rates. This will cause the value of such investments to fluctuate less dramatically in response to interest rate fluctuations than would investments in fixed rate obligations.

REITs may have limited financial resources and may trade less frequently and in a more limited volume than larger company securities.

Business Development Companies. The Fund may invest in the securities of BDCs, which are investment companies whose principal business is to invest in, lend capital to, or provide services to privately held companies. The 1940 Act imposes certain requirements upon the operations of a BDC, including that BDCs are required to invest at least 70% of their total assets primarily in securities of private companies or thinly traded U.S. public companies, cash, cash equivalents, U.S. government securities, and high quality debt investments that mature in one year or less. With investments in debt instruments, there is a risk that the issuer may default on its payments or declare bankruptcy. Additionally, a BDC may only incur indebtedness in amounts such that the BDC's asset coverage equals at least 200% after such incurrence. BDCs generally invest in less mature private companies, which involve greater risk than well-established publicly traded companies. Generally, little public information exists for private companies, and there is a risk that investors may not be able to make a fully informed investment decision. These limitations on the assets that a BDC may hold and a BDC's ability to leverage may prohibit the way that the BDC raises capital. The Fund will indirectly bear its proportionate share of any management and other operating expenses, including performance based or incentive fees charged by, the BDCs in which it invests, in addition to the expenses paid directly by the Fund. Investments made by BDCs are generally subject to legal and other restrictions on resale and are otherwise less liquid than publicly traded securities. Due to the absence of a readily ascertainable market value, and because of the inherent uncertainty of fair valuation, fair value of a BDC's investments may differ significantly from the values that would be reflected if the securities were traded in an established market, potentially resulting in material differences between a BDC's NAV per share and its market value. Many BDCs invest in mezzanine and other debt securities of privately held companies, which may be less liquid than other types of debt securities.

The Fund is subject to provisions of the 1940 Act that limit the amount that the Fund and its affiliates, in the aggregate, can invest in any one BDC to 3% of the BDC's total outstanding stock. To comply with provisions of the

1940 Act, on any matter upon which the BDC shareholders are solicited to vote, the Fund's vote of its BDC shares will normally be voted in the same general proportion as shares held by other shareholders of the BDC.

Private Investment Companies and Offshore Investment Companies. The Fund may invest in the securities of private investment companies, including hedge funds and other pooled investment vehicles, and offshore investment companies. Private investment companies are investment funds, typically organized as limited partnerships or limited liability companies, that are generally not required to register under the 1940 Act because they do not

Table of Contents

publicly offer their securities and are restricted as to either the number of investors permitted to invest in the fund or as to the qualifications of persons eligible to invest in the fund. As with investments in other investment companies, if the Fund invests in a private investment company, it will be charged its proportionate share of the advisory fees, including incentive compensation and other operating expenses of such company. These fees, which can be substantial, would be in addition to the advisory fees and other operating expenses incurred by the Fund. In addition, the Fund's investments in private investment companies are subject to the 1940 Act limitations discussed above with regard to BDCs.

Private investment companies are not registered with the Securities and Exchange Commission (SEC) and may not be registered with any other regulatory authority. Accordingly, they are not subject to certain regulatory requirements and oversight to which registered investment companies are subject. There may be very little public information available about their investments and performance. Moreover, because sales of shares of private investment companies are generally restricted to certain qualified purchasers, such shares may be illiquid and it could be difficult for the Fund to sell its shares at an advantageous price and time. Finally, because shares of private investment companies are not publicly traded, a fair value for the Fund's investment in these companies typically may have to be determined under policies approved by the Fund's Board of Trustees (the Board or the Trustees).

Hedge Funds. A hedge fund is a private investment company that invests in a wide range of securities using a variety of investment strategies. The typical hedge fund has greater investment flexibility than traditional investment funds and may invest in stocks, bonds, currencies, commodities, and their derivatives and take long, short, spread, option, or other types of positions in any of these securities. As such, the Fund may be exposed to increased leverage risk. Unlike traditional asset managers, many hedge fund managers try to create value by taking positions without reference to trends in the capital markets. The Fund would typically not have the ability to direct or influence the management of the hedge funds in which it invests, so the returns on such investments will primarily depend on the performance of the hedge fund managers and could suffer substantial adverse effects by the unfavorable performance of such managers.

Offshore Investment Companies. Offshore investment companies are private funds or other pooled investment vehicles or accounts that are organized outside of the United States. Such investments may be subject to certain risks due to potentially unsettled points of applicable governing law, the risks associated with fluctuating currency exchange rates, capital repatriation regulations, the application of complex U.S. and foreign tax rules to cross-border investments, and imposition of foreign taxes on the Fund and/or investors. Further, the Fund typically would have no control over the trading policies or strategies of offshore companies and no ability to react quickly to changing investment circumstances due to their limited liquidity.

Specialty Finance Companies. The Fund may invest in the securities of specialty finance companies, which provide capital or financing to businesses and consumers within specified market segments. Specialty finance companies may be subject to greater governmental regulation than many other industries, and changes in governmental policies and the need for regulatory approval may have a material effect on the services offered by these companies. Governmental regulation may limit both the financial commitments these companies can make, including the amounts and types of loans, and the interest rates and fees they can charge. In addition, governmental regulation in certain foreign countries may impose interest rate controls, credit controls, and price controls. Specialty finance companies are subject to the risks of rapid business changes, significant competition, value fluctuations due to the concentration of loans in particular industries that are particularly sensitive to changing economic conditions (such as equipment leasing and consumer finance), and volatile performance based upon the availability and cost of capital and prevailing interest rates. Credit and other losses resulting from the financial difficulties of borrowers or other third parties may have an adverse effect on specialty finance companies.

Initial Public Offerings. The Fund may purchase securities in initial public offerings (IPOs). These securities are subject to many of the same risks of investing in companies with smaller market capitalizations. Securities issued in IPOs have no trading history, and information about the companies may be available for limited periods. In addition, the prices of securities sold in IPOs may be volatile. At any particular time or from time to time, the Fund may not be able to invest in securities issued in IPOs, or invest to the extent desired because, for example, only a small portion (if any) of the securities being offered in an IPO may be made available to the Fund. In addition, under certain market conditions a relatively small number of companies may issue securities in IPOs. The investment performance of the Fund during periods when it is unable to invest significantly or at all in IPOs may be lower or higher than during periods when the Fund is able to do so. In addition, if the Fund increases in size, the impact of IPOs on the Fund's performance will generally decrease.

Table of Contents

Illiquid and Restricted Securities. The Fund may invest in illiquid and restricted securities without limit. An illiquid investment is an investment that the Fund reasonably expects cannot be sold in current market conditions in seven calendar days without significantly changing the market value of the investment. Restricted securities have contractual or legal restrictions on resale to the general public or certain institutions.

Illiquid and restricted securities for which market quotations are not readily available or reliable and other assets may be valued as determined in good faith by the Investment Manager under the direction of or pursuant to procedures approved by the Fund's Board of Trustees, called fair value pricing. Due to the inherent uncertainty of valuation, fair value pricing values may differ from the values that would have been used had a readily available market for the securities existed. These differences in valuation could be material. A security's valuation may differ depending on the method used for determining value. The use of fair value pricing by the Fund may cause the NAV of its shares to differ from the NAV that would be calculated using market prices. A fair value price is an estimate and there is no assurance that such price will be at or close to the price at which a security is next quoted or next trades.

Illiquid securities may be difficult to dispose of at a fair price at the times when the Fund believes it is desirable to do so. The market price of illiquid securities generally is more volatile than that of more liquid securities, which may adversely affect the price that the Fund pays for or recovers upon the sale of illiquid securities. Illiquid securities are also more difficult to value and subject to fair valuation risk. Investment of the Fund's assets in illiquid securities may restrict the Fund's ability to take advantage of market opportunities. The risks associated with illiquid securities may be particularly acute in situations in which the Fund's operations require cash and could result in the Fund borrowing to meet its short term needs or incurring losses on the sale of illiquid securities. Substantial illiquid positions held by the Fund could also adversely impact its ability to convert to open end status.

Restricted securities generally can be sold in privately negotiated transactions, pursuant to an exemption from registration under the Securities Act of 1933, as amended (1933 Act), or in a registered public offering. Where registration is required, the Fund may be obligated to pay all or part of the registration expense and a considerable period may elapse between the time it decides to seek registration and the time it may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than prevailed when it decided to seek registration of the security.

A large institutional market exists for certain securities that are not registered under the 1933 Act, including private placements, repurchase agreements, commercial paper, foreign securities, and corporate bonds and notes. These instruments are often restricted securities because the securities are either themselves exempt from registration or sold in transactions not requiring registration. Institutional investors generally will not seek to sell these instruments to the general public but instead will often depend on an efficient institutional market in which such unregistered securities can be readily resold or on an issuer's ability to honor a demand for repayment. Therefore, the fact that there are contractual or legal restrictions on resale to the general public or certain institutions is not dispositive of the liquidity of such investments. Rule 144A under the 1933 Act establishes a "safe harbor" from the registration requirements of the 1933 Act for resales of certain securities to qualified institutional buyers. An insufficient number of qualified institutional buyers interested in purchasing Rule 144A-eligible securities held by the Fund, however, could affect adversely the marketability of such securities and the Fund might be unable to dispose of such securities promptly or at reasonable prices.

Foreign Securities. Because the Fund may invest in foreign securities, either directly or through other issuers who invest in foreign securities, investment in the Fund may involve investment risks of adverse political and economic developments that are different from an investment in a fund that invests only in the securities of U.S. issuers. Such risks may include adverse movements in the market value of foreign securities during days on which the Fund's NAV per Share is not determined, the imposition of taxes by foreign governments on dividend, interest, or capital gains

income payable on the securities held in or sold from the Fund's portfolio, the possible seizure or nationalization of foreign deposits, the possible establishment of exchange controls, and the adoption of other foreign governmental restrictions that might adversely affect the payment of dividends or principal and interest on or repatriation of proceeds from sale of securities in the Fund's portfolio.

Table of Contents

Securities of many foreign issuers may be less liquid and their prices more volatile than those of comparable domestic issuers, and some foreign securities markets may trade a smaller number of securities or may be held by a relatively small number of persons or institutions. In addition, with respect to certain foreign countries, there is the possibility of expropriation, confiscatory taxation, and limitations on the use or removal of funds or other assets. Because certain foreign entities are not subject to accounting, auditing, tax, and financial reporting standards, practices and requirements comparable with those applicable to U.S. companies, there may be different types of, and lower quality, information available about a non-U.S. company than a U.S. company.

The costs associated with investment in foreign issuers, including withholding taxes, brokerage commissions, and custodial fees, are higher than those associated with investment in domestic issuers. Further, certain foreign markets may require payment for securities before delivery. Foreign securities transactions also may be subject to difficulties associated with the settlement of such transactions, including extended clearance and settlement periods. Delays in settlement could result in temporary periods when assets of the Fund are uninvested and no return is earned thereon. The inability of the Fund to make intended security purchases due to settlement problems could cause the Fund to miss attractive investment opportunities. Inability to dispose of a portfolio security due to settlement problems could result in losses to the Fund due to subsequent declines in value of the portfolio security or, if the Fund has entered into a contract to sell the security, could result in liability to the purchaser.

The Fund may invest in foreign securities by purchasing American Depositary Receipts (ADRs), European Depositary Receipts (EDRs), Global Depositary Receipts (GDRs), and International Depositary Receipts (IDRs). ADRs (sponsored or unsponsored) are receipts typically issued by a U.S. bank or trust company evidencing its ownership of the underlying foreign securities. Most ADRs are denominated in U.S. dollars and are traded on a U.S. stock exchange. They are, however, subject to the risk of fluctuation in the currency exchange rate if, as is often the case, the underlying securities are denominated in foreign currency. Issuers of the securities underlying sponsored ADRs, but not unsponsored ADRs, are contractually obligated to disclose material information in the United States. Therefore, the market value of unsponsored ADRs are less likely to reflect the effect of such information. EDRs and IDRs are receipts typically issued by a European bank or trust company evidencing its ownership of the underlying foreign securities. GDRs are receipts issued by either a U.S. or non-U.S. banking institution evidencing its ownership of the underlying foreign securities and are often denominated in U.S. dollars.

Issuers of the securities underlying sponsored depositary receipts, but not unsponsored depositary receipts, are normally contractually obligated to disclose material information in the United States. Therefore, the market value of unsponsored depositary receipts without such an issuer obligation is less likely to reflect the effect of such information.

The risks of investment in foreign securities are greater for investments in emerging markets. Many emerging market countries can experience substantial, and in some periods extremely high, rates of inflation. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging markets. Economies in emerging markets generally are dependent upon international trade and, accordingly, have been and may continue to be affected adversely by economic conditions, trade barriers, exchange controls, managed adjustments in relative currency values, and other protectionist measures imposed or negotiated by the countries with which they trade.

Because of the high levels of foreign denominated debt owed by many emerging market countries, fluctuating exchange rates can significantly affect the debt service obligations of those countries. This could, in turn, affect local interest rates, profit margins, and exports that are a major source of foreign exchange earnings. Although it might be theoretically possible to hedge for anticipated income and gains, the ongoing and indeterminate nature of the foregoing risks (and the costs associated with hedging transactions) makes it difficult to hedge effectively against such

risks.

Table of Contents

To the extent an emerging market country faces a liquidity crisis with respect to its foreign exchange reserves, it may increase restrictions on the outflow of any foreign exchange. Repatriation is ultimately dependent on the ability of the Fund to liquidate its investments and convert the local currency proceeds obtained from such liquidation into U.S. dollars. Where this conversion must be done through official channels (usually the central bank or certain authorized commercial banks), the ability to obtain U.S. dollars is dependent on the availability of such U.S. dollars through those channels and, if available, upon the willingness of those channels to allocate those U.S. dollars to the Fund. In such a case, the Fund's ability to obtain U.S. dollars may be adversely affected by any increased restrictions imposed on the outflow of foreign exchange. If the Fund is unable to repatriate any amounts due to exchange controls, it may be required to accept an obligation payable at some future date by the central bank or other governmental entity of the jurisdiction involved. If such conversion can legally be done outside official channels, either directly or indirectly, the Fund's ability to obtain U.S. dollars may not be affected as much by any increased restrictions except to the extent of the price that may be required to be paid for the U.S. dollars.

In June 2016, the United Kingdom (UK) voted to leave the European Union (EU) following a referendum referred to as Brexit. It is expected that the UK will exit the EU within two years after invoking Article 50 of the Lisbon Treaty in March 2017; however, the exact time frame for the UK's exit is unknown. There is still considerable uncertainty relating to the potential consequences of the withdrawal, including how the financial markets will react. In light of the uncertainties surrounding the impact of the Brexit on the broader global economy, the negative impact could be significant, potentially resulting in increased volatility and illiquidity and lower economic growth for companies that rely significantly on Europe for their business activities and revenues, which could have an adverse effect on the value of the Fund's investments.

Emerging Markets Securities. The securities markets of emerging markets are typically smaller, less developed, less liquid, and more volatile than the securities markets of the United States and other more developed countries. Disclosure and regulatory standards in many respects are less stringent than in the United States and other major markets. There also may be a lower level of monitoring and regulation of emerging markets and the activities of investors in such markets; enforcement of existing regulations is often limited. Investing in the securities of companies in emerging markets may entail special risks relating to the potential political and economic instability and the risks of expropriation, nationalization, confiscation, or the imposition of restrictions on foreign investment, convertibility of currencies into U.S. dollars, and repatriation of capital invested. In the event of such expropriation, nationalization, or other confiscation by any country, the Fund could lose its entire investment in any such country.

Many emerging market countries have little experience with the corporate form of business organization and may not have well developed corporation and business laws, concepts of fiduciary duty in the business context, or anti-fraud and anti-insider trading legislation. As such, minority shareholders may have little protection if management takes action that has an adverse impact on the securities in which the Fund invests. Some emerging markets have different settlement and clearance procedures. In certain markets there have been times when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct such transactions. The risk also exists that an emergency situation may arise in one or more emerging markets as a result of which trading of securities may cease or may be curtailed and prices for the Fund's portfolio securities in such markets may not be readily available.

In addition to the risks discussed above, the Fund's investments in other issuers that invest in emerging markets securities, including ETFs, registered and unregistered investment companies, and hedge funds, may be subject to additional risks. Certain emerging market countries require government approval prior to investments by foreign persons in a particular issuer, limit the amount of investment by foreign persons in a particular issuer, and may have less advantageous rights than the classes available for purchase by residents of the countries. These investments are also subject to risks due to the inexperience of financial intermediaries, the lack of modern technology in the foreign

market, and the possibility of temporary or permanent termination of trading. Because the ETFs, registered and unregistered investment companies, and hedge funds in which the Fund may invest may not hedge against foreign currency risks, including the risk of changing currency exchange rates, the value of foreign currency denominated portfolio securities may be reduced irrespective of the underlying investment.

Canadian Income Trusts. Canadian income trusts commonly hold debt or equity securities in, or are entitled to receive royalties from, an underlying active business. The income trust structure is typically adopted by businesses that require a limited amount of capital in maintenance and that generate stable cash flows. The value of an income trust can rise or fall for the same reasons that affect equity securities or because of changes in interest rates.

Table of Contents

An investment in units of a Canadian income trust is not the equivalent of owning shares in a corporation, as unitholders do not have the statutory rights normally associated with owning shares in a corporation. Investments in income trusts will have varying degrees of risk depending on the sector and the underlying assets. They will also be subject to general risks associated with business cycles, commodity prices, interest rates, and other economic factors. Typically, income trusts are more volatile than fixed income securities and preferred shares. The value of income trust units may decline significantly if they are unable to meet distribution targets. To the extent that claims against an income trust are not satisfied by the trust, investors in the trust (including the Fund if it is an investor therein) could be held responsible for those claims. Certain, but not all, jurisdictions have enacted legislation to protect investors from some of this liability.

There is also a risk that the tax rules relating to income trusts may change in a way that is negative to their investors. Indeed, part of the attractiveness of Canadian income trusts to investors is that they have been treated as mutual fund trusts under Canadian law (and thus able to avoid Canadian income tax at the trust level). On October 31, 2006, the Canadian Minister of Finance announced a Tax Fairness Plan for Canadians. A principal component of the plan involved changing the taxation rules governing income trusts. As a result of this change in taxation rules, Canadian income trusts are now taxed as regular Canadian corporations and are now subject to double taxation at both the corporate level and on the income distributed to investors. In response to this change, most Canadian income trusts converted to corporations and have reduced their dividends.

Master Limited Partnerships. The Fund may invest in securities of master limited partnerships (MLPs), which are limited partnerships (or similar entities) in which the ownership units (*e.g.*, limited partnership interests) are publicly traded. MLP units registered with the SEC are freely traded on a securities exchange or in the over-the-counter (OTC) market. Many MLPs operate in the oil and gas related businesses, including energy processing and distribution. Many MLPs are pass-through entities that generally are taxed at the unitholder level and are not subject to federal or state income tax at the entity level; annual income, gains, losses, and deductions of such an MLP pass through directly to its unitholders. Distributions from an MLP may consist in part of a return of capital. Generally, an MLP is operated under the supervision of one or more general partners and limited partners are not involved in the day-to-day management of the MLP.

Investing in MLPs involves certain risks related to investing in the underlying assets of the MLPs and risks associated with pooled investment vehicles. MLPs holding credit related investments are subject to interest rate risk and the risk of default on payment obligations by debt issuers. MLPs that concentrate in a particular industry or a particular geographic region are subject to risks associated with that industry or region. Investments held by MLPs may be relatively illiquid, limiting their ability to vary their portfolios promptly in response to changes in economic or other conditions. MLPs may have limited financial resources, their securities may trade infrequently and in limited volume, and they may be subject to more abrupt or erratic price movements than securities of larger or more broadly based companies.

The risks of investing in an MLP are generally those inherent in investing in a partnership as opposed to a corporation. For example, state law governing partnerships is often less restrictive than state law governing corporations. Accordingly, there may be fewer protections afforded investors in an MLP than investors in a corporation. Although unitholders of an MLP are generally limited in their liability, similar to a corporation's shareholders, creditors typically have the right to seek the return of distributions made to unitholders if the liability in question arose before the distributions were paid. This liability may stay attached to the unitholder even after the units are sold.

Mortgage-Backed Securities. The Fund may invest in mortgage-backed securities, which represent direct or indirect participations in, or are secured by and payable from, pools of mortgage loans. Those securities may be: guaranteed by a U.S. government agency or instrumentality (such as Ginnie Mae); issued and guaranteed by a government sponsored

stockholder owned corporation, though not backed by the full faith and credit of the United States (such as by Fannie Mae or Freddie Mac, and described in greater detail below); or issued by a fully private issuer. Private issuers are generally originators of and investors in mortgage loans and include savings associations, mortgage bankers, commercial banks, investment bankers, and special purpose entities. Private mortgage-backed securities may be supported by U.S. government agency mortgage-backed securities or some form of non-governmental credit enhancement.

Table of Contents

Government related guarantors (*i.e.*, not backed by the full faith and credit of the U.S. government) include Fannie Mae and Freddie Mac. Fannie Mae is a government sponsored corporation subject to general regulation by the Federal Housing Finance Authority (FHFA). Fannie Mae purchases residential mortgages from a list of approved seller/servicers that include state and federally chartered savings and loan associations, mutual savings banks, commercial banks, and credit unions, and mortgage bankers. Fannie Mae guarantees the timely payment of principal and interest on pass-through securities that it issues, but those securities are not backed by the full faith and credit of the U.S. government.

Freddie Mac is a government sponsored corporation which issues Participation Certificates (PCs), which represent interests in mortgages from Freddie Mac 's national portfolio. Freddie Mac guarantees the timely payment of interest and ultimate collection of principal on the PCs it issues, but those PCs are not backed by the full faith and credit of the U.S. government.

The U.S. Treasury has historically had the authority to purchase obligations of Fannie Mae and Freddie Mac. In addition, in 2008, due to capitalization concerns, Congress provided the U.S. Treasury with additional authority to lend Fannie Mae and Freddie Mac emergency funds and to purchase the companies ' stock. In September 2008, the U.S. Treasury and the FHFA announced that Fannie Mae and Freddie Mac had been placed in conservatorship and no assurance can be given that the Federal Reserve, U.S. Treasury, or FHFA initiatives will ensure that Fannie Mae and Freddie Mac will remain successful in meeting their obligations with respect to the debt and mortgage-backed securities they issue. In addition, the problems faced by Fannie Mae and Freddie Mac resulting in their being placed into federal conservatorship and receiving significant U.S. government support have sparked serious debate among federal policy makers regarding the continued role of the U.S. government in providing liquidity for mortgage loans.

Mortgage-backed securities may have either fixed or adjustable interest rates. Tax or regulatory changes may adversely affect the mortgage securities market. In addition, changes in the market 's perception of the issuer may affect the value of mortgage-backed securities. The rate of return on mortgage-backed securities may be affected by prepayments of principal on the underlying loans, which generally increase as market interest rates decline; as a result, when interest rates decline, holders of these securities normally do not benefit from appreciation in market value to the same extent as holders of other non-callable debt securities.

Because many mortgages are repaid early, the actual maturity and duration of mortgage-backed securities are typically shorter than their stated final maturity and their duration calculated solely on the basis of the stated life and payment schedule.

Mortgage-backed securities may have less potential for capital appreciation than comparable debt securities, due to prepayment risk, which is the likelihood of increased prepayments of mortgages as interest rates decline. A mortgage-backed security 's stated maturity may be shortened by unscheduled prepayments on the underlying mortgages, and, therefore, it is not possible to predict accurately the security 's return to the Fund. If the Fund buys mortgage-backed securities at a premium, mortgage foreclosures and prepayments of principal by mortgagors (which usually may be made at any time without penalty) may result in some loss of the Fund 's principal investment to the extent of the premium paid. Alternatively, in a rising interest rate environment, the value of mortgage-backed securities may be adversely affected when payments on underlying mortgages do not occur as anticipated, resulting in the extension of the security 's effective maturity and the related increase in interest rate sensitivity of a longer-term instrument. The value of mortgage-backed securities may also change due to shifts in the market 's perception of issuers and regulatory or tax changes adversely affecting the mortgage securities markets as a whole. In addition, mortgage-backed securities are subject to the credit risk associated with the performance of the underlying mortgage properties. In certain instances, third-party guarantees or other forms of credit support can reduce the credit risk.

Asset-Backed Securities. Asset-backed securities represent direct or indirect participations in, or are secured by and payable from, pools of assets such as, among other things, motor vehicle retail installment sales contracts, installment loan contracts, leases of various types of real and personal property, and receivables from revolving consumer credit (credit card) agreements, or a combination of the foregoing. These assets are securitized through the use of trusts and special purpose corporations. Credit enhancements, such as various forms of cash collateral accounts or letters of credit, may support payments of principal and interest on asset-backed securities. Although these securities may be supported by letters of credit or other credit enhancements, payment of interest and principal ultimately depends upon individuals paying the underlying loans, which may be affected adversely by general

Table of Contents

downturns in the economy. Asset-backed security values may also be affected by the creditworthiness of the servicing agent for the pool, the originator of the loans or receivables, or the entities providing the credit enhancement. Asset-backed securities are subject to the same risk of prepayment described with respect to mortgage-backed securities. The risk that recovery on repossessed collateral might be unavailable or inadequate to support payments, however, is greater for asset-backed securities than for mortgage-backed securities.

Certificates for Automobile Receivables (CARS) represent undivided fractional interests in a trust whose assets consist of a pool of motor vehicle retail installment sales contracts and security interests in the vehicles securing those contracts. Payments of principal and interest on the underlying contracts are passed through monthly to certificate holders and are generally guaranteed for a specified time period and amount by a letter of credit issued by a financial institution unaffiliated with the trustee or originator of the trust. Underlying installment sales contracts are subject to prepayment, which may reduce the overall return to certificate holders. Certificate holders also may experience delays in payment or losses on CARS if the trust does not realize the full amounts due on underlying installment sales contracts because of unanticipated legal or administrative costs of enforcing the contract; depreciation, damage, or loss of the vehicles securing the contract; or other factors.

Credit card receivable securities are backed by receivables from revolving credit card agreements (Accounts). Credit balances on Accounts are generally paid down more rapidly than automobile contracts. Most of the credit card receivable securities issued publicly to date have been pass-through certificates. In order to lengthen their maturity or duration, most such securities provide for a fixed period during which only interest payments on the underlying Accounts are passed through to the security holder. Principal payments on the Accounts are used to fund the transfer of additional credit card charges made on the Accounts to the pool of assets supporting the securities.

Usually, the initial fixed period may be shortened if specified events occur which signal a potential deterioration in the quality of the assets backing the security, such as the imposition of a cap on interest rates. An issuer's ability to extend the life of an issue of credit card receivable securities thus depends on the continued generation and repayment of principal amounts in the underlying Accounts and the non-occurrence of the specified events. The non-deductibility of consumer interest, as well as competitive and general economic factors, could adversely affect the rate at which new receivables are created in an Account and conveyed to an issuer, thereby shortening the expected weighted average life of the related security and reducing its yield. An acceleration in cardholders' payment rates or any other event that shortens the period during which additional credit card charges on an Account may be transferred to the pool of assets supporting the related security could have a similar effect on its weighted average life and yield.

Credit cardholders are entitled to the protection of state and federal consumer credit laws. Many of those laws give a holder the right to set off certain amounts against balances owed on the credit card, thereby reducing amounts paid on Accounts. In addition, unlike the collateral for most other asset-backed securities, Accounts are unsecured obligations of the cardholder.

The Fund may invest in trust preferred securities, which are a type of asset-backed security. Trust preferred securities represent interests in a trust formed by a parent company to finance its operations. The trust sells preferred shares and invests the proceeds in debt securities of the parent. This debt may be subordinated and unsecured. Dividend payments on the trust preferred securities match the interest payments on the debt securities; if no interest is paid on the debt securities, the trust will not make current payments on its preferred securities. Unlike typical asset-backed securities, which have many underlying payors and are usually over-collateralized, trust preferred securities have only one underlying payor and are not over-collateralized. Issuers of trust preferred securities and their parents currently enjoy favorable tax treatment. If the tax characterization of trust preferred securities were to change, they could be redeemed by the issuers, which could result in a loss to the Fund.

Direct Debt Instruments. Direct debt instruments (which may be whole loans or loan participations) are interests in amounts owed by a corporate, governmental, or other borrower to lenders or lending syndicates or to other parties. Investors in loans and other forms of direct indebtedness depend primarily upon the creditworthiness of the borrower for payment of interest and repayment of principal. Direct debt instruments may not be rated by any nationally recognized statistical rating service. If scheduled interest or principal payments are not made, the value of the instrument may be adversely affected. Loans that are fully secured provide more protections than an unsecured loan in the event of failure to make scheduled interest or principal payments. However, there is no assurance that

Table of Contents

the liquidation of collateral from a secured loan would satisfy the borrower's obligation or that the collateral could be liquidated. Borrowers that are in bankruptcy or restructuring may never pay off their indebtedness or may pay only a small fraction of the amount owed. Direct indebtedness of developing countries also involves a risk that the governmental entities responsible for the repayment of the debt may be unable, or unwilling, to pay interest and repay principal when due.

Investments in loans through direct assignment of a financial institution's interests with respect to a loan may involve additional risks. For example, if a loan is foreclosed, the purchaser could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral. In addition, it is conceivable that under emerging legal theories of lender liability, a purchaser could be held liable as a co-lender. Direct debt instruments may also involve a risk of insolvency of the lending bank or other intermediary. Direct debt instruments that are not in the form of securities may offer less legal protection to the purchaser in the event of fraud or misrepresentation.

A loan is often administered by a bank or other financial institution that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. Unless, under the terms of the loan or other indebtedness, the purchaser has direct recourse against the borrower, the purchaser may have to rely on the agent to apply appropriate credit remedies against a borrower. If assets held by the agent for the benefit of a purchaser were determined to be subject to the claims of the agent's general creditors, the purchaser might incur certain costs and delays in realizing payment on the loan or loan participation and could suffer a loss of principal or interest.

Direct indebtedness may include letters of credit, delayed funding loans, revolving credit facilities, or other standby financing commitments that obligate purchasers to make additional cash payments on demand. These commitments may have the effect of requiring a purchaser to increase its investment in a borrower at a time when it would not otherwise have done so, even if the borrower's condition makes it unlikely that the amount will ever be repaid. If the Fund invests in these types of loans, it will set aside appropriate liquid assets in a segregated custodial account to cover its potential obligations under standby financing commitments.

Senior Loans. Senior Loans are loans and loan participations (collectively, Loans) that are senior secured floating rate Loans. Senior Loans are made to corporations and other non-governmental entities and issuers. Senior Loans typically hold the most senior position in the capital structure of the issuing entity, are typically secured with specific collateral and typically have a claim on the assets and/or stock of the borrower that is senior to that held by subordinated debt holders and stockholders of the borrower. The proceeds of Senior Loans primarily are used to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, dividends and, to a lesser extent, internal growth and for other corporate purposes. Senior Loans typically have rates of interest that are determined daily, monthly, quarterly or semi-annually by reference to a base lending rate plus a premium or credit spread. Base lending rates in common usage today are primarily the London-Interbank Offered Rate (LIBOR) and secondarily the prime rate offered by one or more major U.S. banks (Prime Rate) and the certificate of deposit (CD) rate or other base lending rates used by commercial lenders.

Second Lien and other Secured Loans. Second Lien Loans are second lien secured floating rate Loans made by public and private corporations and other non-governmental entities and issuers for a variety of purposes. Second Lien Loans are second in right of payment to one or more Senior Loans of the related borrower. Second Lien Loans typically are secured by a second priority security interest or lien on specified collateral securing the borrower's obligation under the Loan and typically otherwise have similar protections and rights as Senior Loans. Second Lien Loans are not (and by their terms cannot become) subordinated in right of payment to any obligation of the borrower other than its Senior Loans. Second Lien Loans, like Senior Loans, typically have adjustable floating rate interest payments. Because Second Lien Loans are second to Senior Loans, they present a greater degree of investment risk

but often pay interest at higher rates reflecting this additional risk.

The Fund may also invest in secured Loans other than Senior Loans and Second Lien Loans (Other Secured Loans). Other Secured Loans are made by and to public and private corporations and other entities and issuers for a variety of purposes and may rank lower in right of payment to one or more Senior Loans and Second Lien Loans of the borrower. Other Secured Loans typically are secured by a lower priority security interest or lien on specified collateral securing the borrower's obligation under the Loan and typically have more subordinated protections and rights than Senior Loans and Second Lien Loans. Other Secured Loans may become subordinated in right of

Table of Contents

payment to more senior obligations of the borrower issued in the future. Other Secured Loans may have fixed or adjustable floating rate interest payments. Because Other Secured Loans rank in payment order behind Senior Loans and Second Lien Loans, they present a greater degree of investment risk but often pay interest at higher rates reflecting that additional risk.

Second Lien Loans and Other Secured Loans generally are of below investment grade quality. Other than their subordinated status, Second Lien Loans and Other Secured Loans have many characteristics similar to Senior Loans discussed above. As in the case of Senior Loans, the Fund may purchase interests in Second Lien Loans and Other Secured Loans through assignments or participations.

Mezzanine Securities. Mezzanine securities are loans, debt securities, convertible securities, and preferred stocks issued by corporations and other business organizations for a variety of business purposes. Mezzanine securities other than preferred stocks generally are of below investment grade quality and frequently are unrated. Mezzanine securities may be unsecured and may be issued with equity participation features such as (1) convertibility or (2) being stapled to senior equity securities, common stock, or warrants. Mezzanine securities typically are subordinated to other obligations within a company's capital structure and often may be the most subordinate interest other than common stock. Mezzanine securities may pay floating or fixed rates of interest or dividends.

Because of the additional credit and other risks involved in mezzanine securities, they generally pay higher interest or dividend rates than more senior obligations but expose the holder to a substantially greater degree of risk that the cash flow of the borrower (issuer in the case of preferred stock) and the property securing the loan or stock, if any, may be insufficient to make scheduled payments after giving effect to any senior obligations of the borrower. Mezzanine securities, generally except preferred stocks, are also often expected to be a highly illiquid investment. Mezzanine debt securities will be subject to certain additional risks to the extent that such Loans may not be protected by financial covenants or limitations upon additional indebtedness.

Investment in mezzanine securities is a highly specialized investment practice that depends more heavily on independent credit analysis than investments in other types of obligations. The Fund may invest in mezzanine securities of both public and private companies. To the extent that the Fund invests in mezzanine securities of companies that do not publicly report financial and other material information, it will likely assume an even greater degree of investment risk and may be unable to obtain and evaluate applicable information concerning such companies' creditworthiness.

Structured Notes and Related Instruments. The Fund may invest in structured notes and other related instruments, which are privately negotiated debt obligations where the principal and/or interest is determined by reference to the performance of a benchmark asset, market, or interest rate (an embedded index), such as selected securities, an index of securities or specified interest rates, or the differential performance of two assets or markets, such as indexes reflecting bonds. Structured instruments may be issued by corporations, including banks, as well as by governmental agencies, frequently in the form of medium term notes, but a variety of forms are available and may be used in particular circumstances. The terms of such structured instruments normally provide that their principal and/or interest payments are to be adjusted upwards or downwards (but ordinarily not below zero) to reflect changes in the embedded index while the structured instruments are outstanding. As a result, the interest and/or principal payments that may be made on a structured product may vary widely, depending on a variety of factors, including the volatility of the embedded index and the effect of changes in the embedded index on principal and/or interest payments. The rate of return on structured notes may be determined by applying a multiplier to the performance or differential performance of the referenced index(es) or other asset(s). Application of a multiplier involves leverage that will serve to magnify the potential for gain and the risk of loss.

While structured instruments may offer the potential for a favorable rate of return from time to time, they also entail certain risks. Structured instruments may be less liquid than other debt securities, and the price of structured instruments may be more volatile. In some cases, depending on the terms of the embedded index, a structured instrument may provide that the principal and/or interest payments may be adjusted below zero. Structured instruments also may involve significant credit risk and risk of default by the counterparty. Although structured instruments are not necessarily illiquid, many structured instruments are illiquid. Like other sophisticated strategies, the Fund's use of structured instruments may not work as intended. If the value of the embedded index changes in a manner other than that expected, principal and/or interest payments received on the structured instrument may be substantially less than expected. Also, if structured instruments are used to reduce the duration of the Fund's portfolio, this may limit the Fund's return when having a longer duration would be beneficial (for instance, when interest rates decline).

Table of Contents

Borrowing. Effective July 28, 2016, the Fund entered into a liquidity agreement (the "Liquidity Agreement") with State Street Bank and Trust Company ("SSB"), the Fund's custodian and securities lending agent, replacing a prior credit facility the Fund had with a different bank. The Liquidity Agreement allows the Fund to draw up to \$35 million (maximum liquidity commitment) and includes a securities lending authorization by the Fund to SSB to engage in agency securities lending and reverse repurchase activity.

Interest is charged on the drawn amount at the rate of one-month LIBOR (London Interbank Offered Rate) plus 1.20% per annum, and is payable monthly. A non-usage fee is charged on the difference between the maximum liquidity commitment and the drawn amount at the rate of one-month LIBOR plus 0.07% per annum, and is payable monthly.

Generally, the Fund pledges its assets as collateral to secure its obligations under the Liquidity Agreement and makes these assets available for securities lending and repurchase transactions initiated by SSB, although the Fund retains the risks and rewards of the ownership of assets pledged. Under the terms of the Liquidity Agreement, the Fund may enter into securities lending transactions initiated by SSB, acting as the Fund's authorized securities lending agent. All securities lent through SSB are required to be secured with cash collateral received from the securities lending counterparty in amounts at least equal to 100% of the initial market value of the securities lent. Cash collateral received by SSB, in its role as securities lending agent for the Fund, is credited against the amounts drawn under the Liquidity Agreement. Any amounts credited against the Liquidity Agreement are considered leverage and would be subject to various limitations in the Liquidity Agreement and the 1940 Act, or both. Upon return of loaned securities, SSB will return collateral to the securities lending counterparty and may fund the amount of collateral returned through securities lending, repurchase, and/or other lending activities provided under the Liquidity Agreement. Amounts paid by securities lending counterparties for loaned securities are retained by SSB.

In the event of a securities lending counterparty default, SSB is obligated to indemnify the Fund for certain losses that may arise in connection with the default and SSB may use the collateral received from the securities lending counterparty to purchase replacement securities of the same issue, type, class, and series of the loaned securities. If the value of the collateral is less than the purchase cost of the replacement securities, SSB is responsible for satisfying the shortfall but only to the extent that the shortfall is not due to any decrease in the value of the collateral. Although the risk of the loss of the securities lent can be mitigated by receiving collateral from the securities lending counterparty and through SSB indemnification, the Fund could experience a delay in recovering securities or could experience a lower than expected return if the securities lending counterparty fails to return the securities on a timely basis. As of September 30, 2017, there were no loaned securities under this arrangement.

Portfolio Lending Transactions. In addition to the securities lending activities under the Liquidity Agreement with SSB, the Fund may lend its securities to broker-dealers or institutional investors for their use relating to short sales or other security transactions. The Fund will continue to be entitled to payments in amounts equal to the interest, dividends, or other distributions payable on loaned securities, which affords the Fund an opportunity to earn interest on the amount of the loan and on the loaned securities' collateral. Loans of portfolio securities may not exceed 3 $\frac{1}{3}$ % of the value of the Fund's total assets. Cash received through loan transactions may be invested in other eligible securities. Investing this cash subjects that investment, as well as the security loaned, to market forces (*i.e.*, capital appreciation or depreciation).

Generally, the SEC currently requires that the following conditions must be met whenever portfolio securities are loaned: (1) the Fund must receive at least 100% cash or equivalent collateral from the borrower; (2) the borrower must increase such collateral whenever the market value of the securities rises above the level of such collateral; (3) the Fund must be able to terminate the loan at any time; (4) the Fund must receive reasonable interest on the loan or a flat fee from the borrower, as well as any dividends, interest, or other distributions payable on the loaned securities, and

any increase in market value; (5) the Fund may pay only reasonable custodian fees in connection with the loan; and (6) the Fund must be able to vote proxies on loaned voting securities, either by terminating the loan or by entering into an alternative arrangement with the borrower. If the regulatory requirements pertaining to portfolio securities lending were to change, the Fund would comply with such changes as required.

Table of Contents

The major risk to the Fund of a portfolio lending transaction is the risk that the borrower would fail financially at a time when the value of the security increases. In addition, should the borrower become insolvent, the Fund could be faced with loss of rights in the collateral.

Reverse Repurchase Agreements. The Fund may enter into reverse repurchase agreements with respect to its portfolio investments subject to the investment restrictions set forth herein. Reverse repurchase agreements involve the sale of securities held by the Fund with an agreement by the Fund to repurchase the securities at an agreed upon price, date, and interest payment. The use by the Fund of reverse repurchase agreements involves many of the same risks of leverage described under **Special Considerations and Risk Factors Leverage and Borrowing Risk** in the Prospectus, since the proceeds derived from such reverse repurchase agreements may be invested in additional securities. At the time the Fund enters into a reverse repurchase agreement, it may establish and maintain a segregated account with its custodian containing liquid instruments having a value not less than the repurchase price (including accrued interest). If the Fund establishes and maintains such a segregated account, a reverse repurchase agreement will not be considered a borrowing by the Fund for the purpose of its limitation on borrowings; however, if the Fund does not establish and maintain such a segregated account, entry into a reverse repurchase agreement will be considered a borrowing for that purpose. Reverse repurchase agreements involve the risk that the market value of the securities the Fund is obligated to repurchase may decline below the price of the securities the Fund sold. Also, reverse repurchase agreements involve the risk that the market value of the securities retained in lieu of sale by the Fund in connection with the reverse repurchase agreement may decline in price.

If the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, such buyer or its trustee or receiver may receive an extension of time to determine whether to enforce the Fund's obligation to repurchase the securities, and the Fund's use of the proceeds of the reverse repurchase agreement may effectively be restricted pending such decision. Also, the Fund would bear the risk of loss to the extent that the proceeds of the reverse repurchase agreement are less than the value of the securities subject to such agreement.

Warrants and Rights. Warrants and rights may be acquired by the Fund in connection with other securities or separately. Warrants are securities permitting, but not obligating, their holder to subscribe for other securities or commodities at a later date. Rights are similar to warrants but typically are issued by a company to existing holders of its stock and provide those holders the right to purchase additional shares of stock at a later date. Rights also normally have a shorter duration than warrants. Warrants and rights do not carry with them the right to dividends or voting rights with respect to the securities that they entitle their holder to purchase, and they do not represent any rights in the assets of the issuer. As a result, warrants and rights may be considered more speculative than certain other types of investments. In addition, the value of a warrant or right does not necessarily change with the value of the underlying securities. The purchase of warrants or rights involves the risk that the Fund could lose the purchase value of a warrant or right if the right to subscribe to additional shares is not exercised prior to the warrants' and rights' expiration date since warrants and rights cease to have value if they are not exercised prior to their expiration date. Also, the purchase of warrants and rights involves the risk that the effective price paid for the warrants or rights added to the subscription price of the related security may exceed the value of the subscribed security's market price such as when there is no movement in the price of the underlying security. The market for warrants or rights may be very limited and it may be difficult to sell them promptly at an acceptable price.

Options, Futures, and Forward Currency Contract Strategies.

Subject to the Fund's fundamental investment restrictions, the Fund may purchase and sell options (including options on commodities, currencies, securities, and financial indices), futures contracts (including futures contracts on commodities, currencies, securities, and financial indices) (**futures**), options on futures, and forward currency contracts (collectively, **Financial Instruments**) in an attempt to enhance returns by speculation or for hedging purposes. Certain

special characteristics of and risks associated with the use of these instruments by the Fund are discussed below. See Investment Restrictions.

Regulation of the Use of Financial Instruments Strategies. In addition to the investment guidelines (described below) adopted by the Fund to govern investment in Financial Instruments, the use of options, futures, and forward currency contracts is subject to the applicable regulations of the SEC, the several options and futures exchanges upon which such instruments may be traded, the Commodities Futures Trading Commission (the CFTC) and various state regulatory authorities. The Fund's ability to use Financial Instruments may be limited by market

Table of Contents

conditions, regulatory limits, and tax considerations, and the Fund might not employ any of the strategies described above. There can be no assurance that any strategy used will be successful. The Fund's ability to successfully utilize these instruments may depend on the Investment Manager's ability to predict accurately movements in the prices of the assets underlying the Financial Instruments and movements in securities, interest rates, and currency exchange rates. There can be no assurance that a liquid secondary market for options and futures will always exist, and the historical correlations of the assets underlying the Financial Instruments and Fund objectives may be imperfect. There can be no assurance that the techniques described herein will provide adequate hedging or speculative returns or that such techniques are or will be actually or effectively available due to liquidity, costliness, or other factors. Hedging maneuvers may fail or actually increase risk, and investors should not assume the availability of any of the hedging opportunities described herein. In any event, the Fund might not use any hedging techniques, as described herein or otherwise. It also may be necessary to defer closing out a position to avoid adverse tax consequences.

The Fund does not currently intend to purchase or sell commodities but may do so in the future. The value of commodities and commodity related instruments may be extremely volatile and may be affected either directly or indirectly by a variety of factors. There also may be storage charges and risks of loss associated with physical commodities.

The Investment Manager currently intends to operate the Fund in compliance with the requirements of Rule 4.5 of the CFTC regulations under the Commodity Exchange Act (the "CEA"). As a result, the Fund is not deemed to be a commodity pool under the CEA and will be limited in its ability to use futures and options on futures or commodities or engage in swap transactions for other than bona fide hedging purposes, to the extent such transactions are permitted under the investment policies. Provided the Fund operates within the limits of Rule 4.5, the Investment Manager will be excluded from registration with the CFTC and regulation under the CEA and the Investment Manager will not be deemed to be a commodity pool operator with respect to the operations of the Fund. If the Fund were no longer able to claim the exclusion, the Fund and the Investment Manager, to the extent trading in commodity interests, would be subject to regulation under the CEA.

To the extent the Investment Manager can no longer rely on the Rule 4.5 exclusion, the impact to the Fund of CFTC requirements is uncertain. CFTC mandated disclosure, reporting and recordkeeping obligations would apply with respect to the Fund. Being required to register as a commodity pool operator could reduce investment returns or limit the Fund's ability to implement its investment strategy.

In addition to the products, strategies, and risks described below, the Investment Manager may discover additional opportunities in connection with Financial Instruments. These new opportunities may become available, as regulatory authorities broaden the range of permitted transactions and as new types of Financial Instruments are developed. The Investment Manager may seek to utilize these opportunities to the extent they are consistent with the Fund's investment objectives and are permitted by the Fund's investment limitations and applicable regulatory authorities.

Cover for Financial Instruments Strategies. The Fund will seek to comply with SEC guidelines regarding cover for these instruments and will seek, if the guidelines so require, to (1) set aside or segregate cash or liquid securities the value of which is marked to the market daily in the prescribed amount or (2) enter into offsetting (covered) positions in securities, currencies, or other options or futures contracts. Assets used for cover cannot be sold or closed while the position in the corresponding instrument is open, unless they are replaced with other appropriate assets. The commitment of some portion of the Fund's assets as cover could impede portfolio management or the Fund's ability to meet current obligations.

Currency Options and Related Risks. The Fund may take positions in options on currencies to enhance returns by speculation or to hedge against the risk of currency exchange rate fluctuations on foreign securities that the Fund

holds in its portfolio or that it intends to purchase. For example, if the Fund enters into a contract to purchase securities denominated in a foreign currency, it could effectively fix the maximum U.S. dollar cost of the securities by purchasing call options on that foreign currency. Similarly, if the Fund held securities denominated in a foreign currency and anticipated a decline in the value of that currency against the U.S. dollar, the Fund could hedge against such a decline by purchasing a put option on that foreign currency. The Fund's ability to establish and close out positions in such options is subject to the maintenance of a liquid secondary market. Although many options on currencies are exchange traded, the majority are traded on the OTC market. In addition, options on currencies are affected by all of those factors that influence currency exchange rates and investments generally.

Table of Contents

The value of a currency option depends upon the value of the underlying currency relative to other currencies. As a result, the price of the option position may vary with changes in the value of either or both currencies or baskets of currencies and may have no relationship to the investment merits of a foreign security. Because currency transactions occurring in the interbank market involve substantially larger amounts than those that may be involved in the use of currency options, investors may be disadvantaged by having to deal in an odd lot market (generally consisting of transactions of less than \$1 million) for the underlying currencies at prices that are less favorable than for round lots.

There is no systematic reporting of last sale information for currencies or any regulatory requirement that quotations available through dealers and other market resources be firm or revised on a timely basis. Available quotation information is generally representative of very large transactions in the interbank market and thus may not reflect relatively smaller transactions (that is, less than \$1 million) where rates may be less favorable. The interbank market in currencies is a global, around-the-clock market. To the extent that the U.S. options markets are closed while the markets for the underlying currencies remain open, significant price and rate movements may take place in the underlying markets that cannot be reflected in the options markets until they reopen.

Special Characteristics and Risks of Options Trading. In considering the Fund's use of options, particular note should be taken of the following:

- (1) The value of an option position reflects, among other things, the current market price of the underlying commodity, currency, security, financial index, or other underlying instrument (each, an underlying instrument), the time remaining until expiration, the relationship of the exercise price to the market price, supply and demand, the historical price volatility of the underlying instrument, and general market conditions. For this reason, the successful use of options depends upon the Investment Manager's ability to forecast the direction of price fluctuations in the underlying instrument.
- (2) Options normally have expiration dates extending up to three years. The exercise price of the options may be below, equal to, or above the current market value of the underlying instrument during the term of the option. Purchased options that expire unexercised have no value. Unless an option purchased by the Fund is exercised or unless a closing transaction is effected with respect to that position, the Fund will realize a loss in the amount of the premium paid and any transaction costs.
- (3) A position in an exchange listed option may be closed out only on an exchange that provides a secondary market for identical options and, there is no assurance that a liquid secondary market will exist for any particular option at any particular time. Closing transactions may be effected with respect to options traded in the OTC markets only by negotiating directly with the other party to the option contract or in a secondary market for the option if such market exists. Since there can be no assurance that dealers will be willing to enter into, or be capable of entering into, closing transactions with the Fund, there can be no assurance that the Fund would be able to liquidate an OTC option at a favorable price at any time prior to expiration. In the event of insolvency of the counterparty to an OTC option, the Fund may be unable to liquidate an OTC option. Accordingly, it may not be possible to effect closing transactions with respect to certain options, which may result in the Fund having to exercise those options that it has purchased in order to realize any profit. With respect to options written by the Fund, the inability to enter into a closing transaction may result in material losses to the Fund. For example, because the Fund may maintain a covered position with respect to call options it writes on an instrument, it may not sell the underlying instrument (or invest any cash or

securities used to cover the option) during the period it is obligated under such option. This requirement may impair the Fund's ability to sell a portfolio security or make an investment at a time when such a sale or investment might be advantageous.

Table of Contents

- (4) Securities index options are settled exclusively in cash. If the Fund writes a call option on an index, it cannot cover its obligation under the option by holding the underlying securities. In addition, a holder of a securities index option who exercises it before the closing index value for that day is available runs the risk that the level of the underlying index may subsequently change.
- (5) The Fund's activities in the options markets may result in a higher portfolio turnover rate (which in turn may result in recognition of capital gains, some of which may be short term, that will be taxable to shareholders, as ordinary income in the case of short term capital gains, when distributed to them) and additional brokerage costs; however, the Fund also may save on commissions by using options rather than buying or selling individual securities in anticipation or as a result of market movements.

Futures and Related Options Strategies. The Fund may engage in futures strategies for hedging purposes, to attempt to reduce the overall investment risk that would normally be expected to be associated with ownership of the securities in which it invests (or intends to acquire), or to enhance returns by speculation that may increase such risk. Such strategies may involve, among other things, using futures strategies to manage the effective duration of the Fund's portfolio of debt securities. If the Investment Manager wishes to shorten the Fund's effective duration, the Fund may sell an interest rate futures contract or a call option thereon or may purchase a put option on such futures contract. If the Investment Manager wishes to lengthen the Fund's effective duration, the Fund may buy an interest rate futures contract or a call option thereon or may sell a put option on such futures contract. Futures contracts and options thereon can also be purchased and sold to attempt to enhance income or returns by speculation. The Fund may purchase or sell futures contracts or options thereon to increase or reduce its exposure to an asset class without purchasing or selling the underlying securities, either as a hedge or to enhance returns by speculation.

The Fund may use interest rate futures contracts and options thereon to position its portfolio with respect to anticipated changes in the general level of interest rates. The Fund may purchase an interest rate futures contract when it intends to purchase debt securities but has not yet done so. This strategy may minimize the effect of all or part of an increase in the market price of the debt security that the Fund intends to purchase in the future. A rise in the price of the debt security prior to its purchase may either be offset by an increase in the value of the futures contract purchased by the Fund or avoided by taking delivery of the debt securities under the futures contract. Conversely, a fall in the market price of the underlying debt security may result in a corresponding decrease in the value of the futures position. The Fund may sell an interest rate futures contract in order to continue to receive the income from a debt security, while endeavoring to avoid part or all of the decline in market value of that security that may accompany an increase in interest rates.

The Fund may purchase a call option on an interest rate futures contract to benefit by a market advance in debt securities that the Fund plans to acquire at a future date. The purchase of a call option on an interest rate futures contract is analogous to the purchase of a call option on an individual debt security, which can be used as a temporary substitute for a position in the security itself. The Fund also may write put options on interest rate futures contracts to enhance returns and may write call options on interest rate futures contracts to offset an anticipated decline in the price of debt securities held in its portfolio. The Fund also may purchase put options on interest rate futures contracts in order to hedge against a decline in the value of debt securities held in its portfolio or to enhance returns by speculation.

The Fund may sell securities index futures contracts in anticipation of a general market or market sector decline. To the extent that a portion of the Fund's portfolio correlates with a given index, the sale of futures contracts on that index could reduce the risks associated with a market decline and thus provide an alternative to the liquidation of securities positions. For example, if the Fund correctly anticipates a general market decline and sells securities index futures to benefit by this anticipated movement, the gain in the futures position may potentially offset some or all of the decline

in the value of the portfolio. The Fund may purchase securities index futures contracts if a general market or market sector advance is anticipated. Such a purchase of a futures contract could serve as a temporary substitute for the purchase of individual securities, which securities then may be purchased in an orderly fashion or as part of an attempt to seek capital gain by speculation. This strategy may minimize the effect of all or part of an increase in the market price of securities that the Fund intends to purchase. A rise in the price of the securities would be intended to be offset wholly or in part by gains in the futures position.

Table of Contents

As in the case of a purchase of a securities index futures contract, the Fund may purchase a call option on a securities index futures contract on speculation for capital appreciation or as a hedge against a market advance in securities that the Fund plans to acquire at a future date. The purchase of put options on securities index futures contracts can be analogous to the purchase of protective put options on individual securities where a level of protection is sought below which no additional economic loss may be incurred by the Fund as part of an attempt to seek capital gain by speculation.

The Fund may sell currency futures contracts to benefit from variations in the exchange rate of currencies in relation to the U.S. dollar, another currency, or a basket of currencies. In addition, the Fund may sell currency futures contracts when the Investment Manager anticipates a weakening of a currency exchange rate that could adversely affect the market value of the Fund's securities holdings or interest or dividend payments to be received in a foreign currency or to enhance return by speculation. The sale of a futures contract on the foreign currency in which a security is denominated may reduce the risk to the Fund of a reduction in market value caused by foreign currency exchange rate variations and, by so doing, provide an alternative to the liquidation of the security and resulting transaction costs. When the Investment Manager anticipates a foreign currency exchange rate increase while intending to invest in a security denominated in that currency, the Fund may purchase a foreign currency futures contract to benefit from the increased rates pending completion of the anticipated transaction. Such a purchase may serve as a temporary measure to protect the Fund against any rise in the foreign currency exchange rate that may add additional costs to acquiring the foreign security position. The Fund may also purchase call or put options on foreign currency futures contracts to obtain a fixed foreign currency exchange rate at limited risk. The Fund may purchase a call option on a currency futures contract to benefit from a rise in the currency exchange rate while intending to invest in a security denominated in a related currency or to enhance returns by speculation. The Fund may purchase put options on currency futures contracts to benefit from a decline in a currency exchange rate or to enhance returns by speculation. The Fund may write a put option on a currency futures contract and may write a call option on a currency futures contract as an income or capital appreciation strategy.

The Fund may also use these instruments to enhance income or return by speculation, for example by writing options on futures contracts. In addition, the Fund can use these instruments to change its exposure to securities or interest or currency exchange rate changes, for example, by changing the Fund's exposure from one currency exchange rate to another.

The Fund also may write put options on a futures contract while, at the same time, purchasing call options on the same futures contract in order to synthetically create a futures contract. The options will typically have the same strike prices and expiration dates.

The Fund may purchase and write straddles on futures contracts. A long straddle is a purchase of a combination of a call and a put on the same futures contract. The Fund normally will profit from a long straddle if the underlying futures contract changes in price more than the cost of the options before the expiration or close of the straddle. A short straddle is a sale combination of a call and a put on the same futures contract. The Fund normally will profit from short straddles if the underlying futures contract changes in price less than the proceeds of the option sales before the expiration or close of the straddle. In the case of a short straddle, the Fund normally will set aside cash or segregate cash or liquid assets equivalent in value to the amount, if any, by which the put is in-the-money, that is, that amount by which the exercise price of the put exceeds the current market value of the underlying futures contract.

Closing Futures and Related Options Transactions. No price is paid upon entering into a futures contract. Instead, upon entering into a futures contract, the Fund normally segregates or sets aside in the name of the futures broker through whom the transaction is effected an amount of cash or liquid securities generally equal to 10% or less of the contract value, which is marked to the market daily. This amount is known as initial margin. When writing a call or a

put option on a futures contract and certain options on currencies, margin also must be deposited in accordance with applicable exchange rules. Unlike margin in securities transactions, initial margin does not involve borrowing to finance the futures or options transactions. Rather, initial margin is in the nature of a performance bond or good faith deposit on the contract that is returned to the Fund upon termination of the transaction, assuming all obligations have been satisfied. Under certain circumstances, such as periods of high volatility, the Fund may be required by an exchange to increase the level of its initial margin payment. Additionally, initial margin requirements may be increased generally in the future by regulatory action. Subsequent payments, called variation margin, to and from

Table of Contents

the broker, are made on a daily basis as the value of the futures or options position varies, a process known as marking to the market. For example, when the value of a contract purchased by the Fund rises, it receives from the broker a variation margin payment equal to that increase in value. Conversely, if the value of the futures position declines, the Fund is normally required to make a variation margin payment to the broker equal to the decline in value. Variation margin does not involve borrowing to finance the transaction but rather represents a daily settlement of the Fund's obligations to or from a clearing organization.

Buyers and sellers of futures positions and options thereon can enter into offsetting closing transactions, similar to closing transactions on options on securities, by selling or purchasing an offsetting contract or option. Futures contracts or options thereon may be closed only on an exchange or board of trade providing a secondary market for such futures contracts or options.

Under certain circumstances, futures exchanges may establish daily limits on the amount that the price of a futures contract or option on a futures contract may vary either up or down from the previous day's settlement price. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit. The daily limit governs only price movements during a particular trading day and therefore does not limit potential losses, because prices could move to the daily limit for several consecutive trading days with little or no trading and thereby prevent prompt liquidation of unfavorable positions. In such event, it may not be possible for the Fund to close a position, and, in the event of adverse price movements, it may have to make daily cash payments of variation margin (except in the case of purchased options).

Special Characteristics and Risks of Futures and Related Options Trading. In considering the Fund's use of futures contracts and options, particular note should be taken of the following:

- (1) Futures and options are highly speculative and aggressive instruments. Successful use by the Fund of futures contracts and options may depend upon the Investment Manager's ability to predict movements in the direction of the overall commodities, currencies, securities, and financial markets, which requires different skills and techniques than predicting changes in the prices of individual securities. Moreover, these contracts relate not only to the current price level of the underlying instrument but also to the anticipated price levels at some point in the future. There is, in addition, the risk that the movements in the price of the contract will not correlate with the movements in the prices of the underlying instrument or the Fund's portfolio securities. For example, if the price of a securities index futures contract moves less than the price of the securities, the correlation will be imperfect. Further, if the price of the securities has moved in an unfavorable direction, the Fund may be in a better position than if it had not used the contract at all. If the price of the securities has moved in a favorable direction, the advantage may be partially offset by losses in the contract position. In addition, if the Fund has insufficient cash, it may have to borrow or sell assets from its portfolio to meet daily variation margin requirements. Any such sale of assets may or may not be made at prices that reflect a rising market. Consequently, the Fund may need to sell assets at a time when such sales are disadvantageous to it. If the price of the contract moves more than the price of the underlying securities, the Fund can experience either a loss or a gain on the contract that may or may not be completely offset by movements in the price of the securities.
- (2) In addition to the possibility that there may be an imperfect correlation, or no correlation at all, between price movements in the futures or options position and the underlying instruments, movements in the prices of these contracts may not correlate perfectly with movements in the prices of the underlying instruments

due to price distortions in the futures and options market. There may be several reasons unrelated to the value of the underlying instruments that cause this situation to occur. First, as noted above, all participants in the futures and related options market are subject to initial and margin requirements. If, to avoid meeting additional margin deposit requirements or for other reasons, investors choose to close a significant number of futures contracts or options through offsetting transactions, distortions in the normal price relationship between the underlying instrument and the futures and options markets may occur. Second, because the margin deposit requirements in the futures and related options market may be more or less onerous than margin requirements in the underlying instrument, there may be increased

Table of Contents

participation by speculators in the market with less onerous than margin requirements; such speculative activity in one market also may cause temporary price distortions in the related market. As a result, a correct forecast of general market trends may not result in successful use of futures contracts or options over the short term. In addition, activities of large traders in both the futures and related options market and markets for the underlying instrument involving arbitrage and other investment strategies may result in temporary price distortions.

- (3) Positions in futures contracts and options on futures may be closed out only on an exchange or board of trade that provides a secondary market for such contracts, and there is no assurance that a liquid secondary market on an exchange or board of trade will exist for any particular contract at any particular time. In such event, it may not be possible to close a position, and in the event of adverse price movements, the Fund may continue to be required to make variation margin payments.
- (4) Future and options on futures contracts have limited life. The ability to establish and close out futures and options on futures may be subject to the maintenance of liquid secondary markets on the relevant exchanges or boards of trade.
- (5) Purchasers of options on futures contracts pay a premium at the time of purchase. This amount and the transaction costs are all that is at risk. Sellers of options on futures contracts, however, must post initial margin and are subject to additional margin calls that could be substantial in the event of adverse price movements. In addition, although the maximum amount at risk when the Fund purchases an option is the premium paid for the option and t
