### ITEM 1. BUSINESS

#### GENERAL

Clean Systems Technology Group, Ltd., a New York corporation (the "Company" or "CSTI"), through its operating subsidiary CSTI-Hi-Tec, Ltd. ("CSTI Hi-Tec"), designs, engineers, manufactures and installs Ultra High Purity systems for transportation of gases and liquids for companies in the processing industries. CSTI provides its products and services to customers in several countries around the world including Israel, Italy, Germany, India, Taiwan and South East Asia and the Scandinavian countries. CSTI believes that its expertise and hands-on experience in the field of ultra high purity gas and chemical systems for the process industries makes it a leader in this field (See "Business - Competition"). CSTI Hi-Tec, the Company's operating subsidiary, was formed under the laws of the state of Israel in 1995.

In addition, CSTI, through its wholly owned subsidiary, CSTI Italia Fiber SRL., established a new facility in Milan Italy for the engineering and design of its own process tools, including MCVD (Modified Chemical Vapor Deposition - a process used to manufacture optical fiber), for the fiber optics industry. These tools offer many advantages over current products on the market, such as patent pending in PMD routine, increased final quality in Softening of signal (0.17 dB/Km), special rotating chuck and patent pending burner high efficiency.

The Company's principal executive offices are located at 4 Ashlagan St., P.O. Box 8624, Kiryat Gat 82021, Israel, phone number 011 972 8 660 2108 and its website is [www.cstigroup.com](http://www.cstigroup.com).

The Company's consolidated sales for the fiscal years ended December 31, 2003 and 2002 were \$3,180,000 and \$6,245,000, respectively, and its consolidated net income (loss) was (\$ 3,787,000) and \$ (1,981,000), respectively, for such periods.

#### INDUSTRY OVERVIEW

Gas manufacturing and delivery systems, such as those produced by the Company,

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

find wide use and application in the optical fibers, metal fabrication, chemicals, pharmaceuticals, semiconductor materials and other industries. Utilizing the gas and chemical delivery and distribution systems that CSTI designs and constructs, its customers create value through improved product quality, increased productivity and the attainment of efficiency objectives. CSTI's management has extensive expertise in the microelectronics industry, in particular, and has built a strong reputation for providing quality products and installations relating to research and development, production processing, utilities maintenance, gas production and delivery, vacuum systems and cryogenic systems. CSTI believes that it continues to be a major technological innovator in the industrial gases industry and, working with its customers, has increased the use of its industrial gas systems to support the manufacture and processing of products.

All industries, which utilize ultra high pure gases and chemicals in their fabrication, require four major gas and chemical delivery systems to handle and deliver the gases and the chemicals from the source to the point of use. See "Business - Products."

According to Semico Research Corporation, a marketing and engineering research company, the processing markets are forecasted to grow significantly over the next several years. The micro-electronics processing market alone is predicted to grow from \$156.4 billion in 2001 to \$302.8 billion in 2004.

1

### THE COMPANY

CSTI designs, engineers, manufactures, installs and services ultra high purity systems for transportation of clean gases and liquids from the source, where the gases and liquids are stored, to the point of use for the following processing industries:

- o Micro-electronics (semi conductors);
- o Optical fibers;
- o Pharmaceuticals and Bio-technology; and
- o Metal Blades.

CSTI provides its clients with a total solution commencing from the design through engineering, manufacturing and installation, positioning of the process equipment and ending in tests and certification of the delivery systems. This unique total solution provides CSTI's clients with gas and chemical quality at the point of use identical to the source from which it has been delivered.

All of CSTI's products are manufactured and tested under strict regulations, and working and quality control procedures that comply with the U.S. government's ISO 9001 standards, with respect to which CSTI has been certified since 1996. All systems, products and installations manufactured by CSTI are produced under the strictest safety procedures.

The Company's principal executive offices are located at 4 Ashlagan St., P.O. Box 8624, Kiryat Gat 82021, Israel, phone number 011 972 8 660 2108 and its website is [www.cstigroup.com](http://www.cstigroup.com). Clean Systems Technology Italia S.r.l is located at 20 Via Felice Casati, Milano Italy 20124. See Item 2. Properties.

### PRODUCTS

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

CSTI customizes distribution systems for its customers, based on the source, specific gas or chemical being distributed and the required treatment of the gas from the source to the end user. Since the gases and the chemicals are pure and extremely dangerous, these systems must comply with the highest levels of safety and quality.

CSTI product lines provide a total solution for gas and chemical systems from source to the point of use. CSTI supplies its systems as shelf products and modifies them to be custom tailored to its clients specifications. Each of CSTI's products can be used as a stand-alone system for the purpose it was designed or as a total solution when packaged together at the customer's request.

CSTI products are divided into three main categories:

- o Systems for ultra high purity gases from source to point of use;
- o Pre-manufactured products sub-systems; and
- o Systems upgrades.

The following is a description of these categories.

### CSTI ULTRA HIGH PURITY SYSTEMS

In the micro-electronics, optical fibers, pharmaceuticals and bio-technology industries and other processing industries utilizing gases and chemicals in their processes, there is a need for gas systems that will handle and deliver gas from source to point of use where the actual manufacturing process takes place. CSTI product lines provide a total solution for the four major gas and chemical systems from source to the point of use. The gas systems, which "treat" the gas from source to point of use, are divided into the following four categories:

2

#### (I) GAS SYSTEMS AT THE SOURCE:

This system deals with gas pressure and adapting the pressure at the source to the pressure required for the process. This system is also designed to recognize the level of gas in the source and change over to a substitute source once the initial source is depleted, and simultaneously complying with all safety and quality control procedures.

#### (II) DISTRIBUTION SYSTEM:

A system fed from one gas line and supplying up to eight systems from it. This system is called the Valve Manifold Box (VMB) and is where the main distribution of the gases and chemicals occur and are distributed to different points of use.

#### (III) POINT OF USE PANEL:

This is a system located near the process equipment, which enables the operator to control the flow/non-flow of the gas into the system and control the pressure as well.

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

### (IV) PROCESS TOOL GAS-BOX:

The final gas system controls the flow of the gas into the production equipment and regulates the flow and pressure during the process.

CSTI designs and manufactures each of the above systems, which treat the gases. In certain instances CSTI supplies all four stages to the same client and in other cases, depending on the client's needs and requirements, CSTI supplies only part of the system. In most instances, CSTI supplies custom made systems adapted to the requirements of the client/process, but in all cases the system is custom tailored to fit the client's design, method, process philosophy and safety accessories specifications.

When CSTI designs a system for a client it does so within the following parameters and guidelines: providing the highest safety of the system; keeping the system at the highest level of quality and purity; making the system conform to the process without compromising safety and quality; insuring the efficacy of the system during normal operation and maintenance, while simultaneously maintaining its safety and quality; and ensuring continuous gas or chemical supply to the process, in particular when more than one point of use is connected to the same source.

These design parameters are implemented in all of CSTI's products. In addition, CSTI's component selection, quality assurance and quality control systems, any highly trained and experienced personnel performing the production under strict working quality procedures allow CSTI to deliver products and systems that the Company believes are superior to those of its competitors. See "Competition."

### PRE-MANUFACTURED PRODUCTS SUB-SYSTEMS

The Company also provides a full line of its pre-manufactured products subsystems to its clients. These products are described as off the shelf products and include bulk systems for non-specialty gases, bulk systems for specialty gases and chemicals, gas distribution panels and cabinets, distribution systems and point of use systems. These products have standard specifications in contrast to the customized systems the Company builds. Although the systems are pre-manufactured with standard specifications, the system is custom tailored to fit the client's design, method, process philosophy and safety accessories specifications.

### SYSTEMS UPGRADES

In addition to designing and manufacturing new systems, CSTI upgrades and retrofits existing systems to adapt to new manufacturing processes. Many of CSTI's customers are engaged in industries where the life duration of a manufacturing process can be very short. For example, in the opinion of management, the life duration of the manufacturing process in the microelectronics industry tends to be between one and three years because of constant changes in the process as a result of market demands. The cost of process equipment is extremely high, ranging from one to ten million dollars, and therefore it is often uneconomical for a customer to invest in new equipment every 2-3 years. Instead of acquiring new systems, the Company is capable of upgrading and retrofitting existing systems to adapt to different types of gases fed into the process equipment in accordance with a new process, or the Company is able to make actual changes in the process equipment. Internal upgrading in the process equipment is critical from the client's perspective since this impacts the most basic and essential elements of the equipment. The ability to upgrade the performance of the equipment directly affects the profitability of the client's entire manufacturing process.

#### RESEARCH AND DEVELOPMENT

During 2003, CSTI, through its wholly owned subsidiary, CSTI Italia Fiber SRL., launched a Research and Development program and established a new facility in Italy for the engineering and design of its own process tools, including MCVD, for the fiber optics Industry. These tools offer many advantages over current products on the market. The total investment in 2003 in this program was \$500,000. The main Research and Development activity during 2003 was directed to the fiber optic industry, which CSTI believes is a potentially large market. During the fiscal years ended December 31, 2002 and 2001, CSTI did not expend any funds on research and development activities. Amounts dedicated to research and development have historically been included in the cost of revenue as part of the manufacturing process.

#### PATENTS AND TRADEMARKS

The Company does not own any patents or trademarks, and relies on its proprietary information, technological know-how and experience to conduct its business.

In January 2002, CSTI filed an application in Israel to register the logo of CSTI as a trademark. The application was accepted in May 2004 and the trade marks are registered in Israel.

#### COMPETITION

The Company competes on the basis of its ability to provide its customers a full turn-key high quality solution at a competitive price. The Company does not believe that it has any direct competitors who are able to provide such a solution. However, the Company does experience competition from large international and domestic gas and chemical companies that offer partial solutions to their clients and a total solution through the use of third-party sub-contractors. The Company's competitors also include installation companies. Substantially all of the Company's competitors have greater financial and/or personnel resources than the Company.

The ability of CSTI to supply comprehensive solutions to its clients gives CSTI the ability to be competitive in its pricing as compared to many of its competitors that use sub-contractors. CSTI's competitors that use sub-contractors find it difficult to afford their clients attractive prices due to the mark-ups that they must include in their cost. In addition, these competitors often have difficulties guaranteeing the quality of the systems designed by their subcontractors. The Company's total solution allows it to provide its clients with a "one stop" quality guarantee.

#### GAS COMPANIES

The main competitors of CSTI are the large gas supply companies such as British Oxygen Ltd. (BOC) whose business is primarily gas supply and to a lesser extent the installation of gas delivery systems. The portion of gas systems installation revenue, where they compete with CSTI, is estimated to be, in managements opinion, between \$200- \$500 million annually. These large gas companies occasionally compete with the Company and in other instances work together and cooperate in providing the services as described below.

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

The primary reason that these gas supply companies deal with the manufacture and installation of gas and chemical systems is because their clients demand that the gas companies be responsible for the systems and in some cases to operate them on a daily basis. In certain instances potential clients require their gas suppliers to be responsible for the quality of the gas at the point of use which requires the supply companies to be involved in the installation of gas systems. The gas supply company may have a contract for installation and in such instance, in effect, becomes a direct competitor of CSTI. The result is that the gas systems are not the core business nor the highest priority of the gas companies. As such, this provides CSTI with an opportunity to compete in this market because CSTI, unlike the gas supply companies, has significant experience, know how and expertise with respect to understanding the characteristics of the gases and chemicals; constructing the system to fit the gas and chemical character; familiarity with the process itself; and knowing the process demands and the daily routine of operation.

4

CSTI designs its products in-house and without relying on any outside source. In management's opinion, CSTI's unique design, and its ability to customize a client's delivery system and provide a total solution are among its main advantages over its competitors.

### INSTALLATION COMPANIES

There are numerous companies around the world that specialize in the installation of gas and chemical supply systems. CSTI's largest competitor in the field of installation is Kinetic Inc. Although Kinetic Inc. is one of the largest installation companies in the world, CSTI believes it has a competitive advantage over Kinetic Inc. based on its total solution, inventive products, technology, expertise and know-how.

### CUSTOMERS

In general, CSTI is not dependent upon any single customer or several customers. However, in 2003, 37% of CSTI's revenues came from Galil Engineering Ltd. for Tower Semiconductor Ltd., 7% of CSTI's revenue came from Meissner-Baran Ltd. for Tower Semiconductor Ltd., and 29% of CSTI's revenue came from Baran Industries (91) Ltd. for governmental facilities. The nature of the Company's business is that it works on several large contracts at any given time and therefore several customers may comprise a significant portion of the Company's revenues and net income during any fiscal year. Furthermore, once the Company installs a system for its customer, the customer is generally dependent on the Company for future upgrades of the system.

CSTI is a global enterprise with 95% of its fiscal year 2001, 5% of its fiscal year 2002 and 10% of its fiscal year 2003 sales outside of Israel. CSTI anticipates that a larger percentage of its revenues will be derived from outside of Israel during 2004. CSTI's customers have included Intel, Tower Semiconductor Ltd., Pirelli, Sterlite, Teva Pharmaceutical Industries Ltd., Biopharmix (Taro), Applied Materials, Galil Engineering, Iscar, BOC, Baran Industries (91) Ltd. and Meissner-Baran Ltd. CSTI's international business is subject to risks customarily encountered in foreign operations, including fluctuations in foreign currency exchange rates and controls, import and export controls, and other economic, political and regulatory policies of local governments.

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

CSTI conducts its business through its Israeli and Italian subsidiaries, and through joint ventures in Scandinavia, Germany and India. CSTI continues to provide its products and services to customers located in several countries around the world. In 1997, CSTI established a wholly-owned subsidiary, Clean Systems Technology Italia S.r.l, located in Milan, Italy, and later, a wholly-owned subsidiary, CST Fibers S.r.l, located in Milan, Italy to provide CSTI's products and services to the Italian market similar to those provided in the Israeli market. CSTI is also considering establishing a subsidiary in Far East Asia for concentration on the Asian and Indian markets. See "Company."

### SEASONALITY

As a design, manufacturing and installation company serving a diverse customer base in different countries around the world, CSTI's business is not subject to seasonal fluctuations to any significant extent.

### SUPPLIERS

CSTI is not dependent upon any one supplier for the raw materials it purchases to manufacture its products.

### EMPLOYEES AND LABOR RELATIONS

Due to the slowdown in the world economy and in the local economy CSTI underwent an efficiency increase program and consequently CSTI has significantly reduced its costs and has also reduced its labor force. CSTI has reduced its manpower to more efficiently conduct its operations and activities.

As of May 10, 2004, CSTI had approximately 72 employees worldwide, all of whom are full-time employees, approximately 78% of whom are engaged in manufacturing and installation. A detailed breakdown is as follows:

5

Management and administrative	5
Finance	2
Engineering	2
Research and Development	1
Purchase and Logistic	2
Quality Safety Control	4
Contract and Installation	56
Total	72

In accordance with Section 25 of the Collective Agreements Law 1997, under Israeli law the Minister of Labor issued in 1983 an Extension Order, which extends provisions of the collective agreement between the Industrialist Union and the Histadrut (the major workers union in Israel). Although there is no direct agreement between CSTI and any workers union, in accordance with that order, CSTI is required to comply with the extended provisions, which relate to

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

certain working and payment conditions to its workers, such as overtime payments and annual holidays. The Extension Order does not apply to employees in executive and managerial positions.

### GOVERNMENTAL REGULATIONS

The Company's business operations, in general, are not subject to any specific governmental regulations. However, for information concerning tax benefits granted by the Israeli government to the Company, see "Tax Status."

### ENVIRONMENT

The Company is not significantly affected by the costs of complying with government imposed environmental laws in Israel in connection with the manufacturing of its products. Compliance with environmental legislation in Israel and other parts of the world is the responsibility of the Company's clients. When designing and installing gas and liquid delivery systems, CSTI takes these issues into consideration, but the costs are borne by the clients.

### TAX STATUS

On August 1, 2001, CSTI was granted under Israeli law a status of "Approved Enterprise" in accordance with the Law for the Encouragement of Capital Investments 1959. Under that law, by virtue of an "Approved Enterprise" status, CSTI will be granted various tax benefits as follows:

(1) Tax exemption on part of the income from its approved enterprise for a period of 10 years since CSTI has elected the "alternative benefits" (involving waiver of investment grants). In the event of distribution of cash dividends out of income, which was tax exempt as above, CSTI would have to pay corporate tax at the rate 25% of the amount distributed. In general, Israeli companies are currently subject to Company Tax at the rate of 36.0% of taxable income.

(2) CSTI is entitled to claim accelerated depreciation for five tax years commencing in the first year of operation of each asset, in respect of property and equipment used by the approved enterprise.

The entitlement to the above benefits are conditional upon CSTI fulfilling the conditions stipulated by the law, regulations published thereunder and the instruments of approval for the specific investments in the approved enterprise. In the event of failure to comply with these conditions, the benefits may be canceled and CSTI may be required to refund the amount of the benefits, in whole or in part, with the addition of interest.

On March 17, 2004, CSTI received an approval as regarding the performance of an approved enterprise.

### CONDITIONS IN ISRAEL

The Company's main operating subsidiary is incorporated under the laws of the State of Israel, and its principal executive offices and manufacturing and research and development facilities are located in the State of Israel. Accordingly, the Company is directly affected by political, economic and military conditions in Israel.

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

### POLITICAL CONDITIONS

Since the establishment of the State of Israel in 1948, a state of hostility has existed, varying in degree and intensity, between Israel and the Arab countries. While Israel has entered into peace agreements with both Egypt and Jordan and several other countries have announced their intentions to establish trade and other relations with Israel, Israel has not entered into any peace arrangement with Syria or Lebanon. Moreover, while Israel was in the process of conducting peace negotiations with the Palestinian Authority, since the commencement of the intifada in September 2000, there has been a significant deterioration in the relationship between Israel and the Palestinian Authority and as a result of fighting in Gaza and the West Bank, and terrorist activities being conducted against Israel, the peace process between the parties is no longer being negotiated at the present time. Efforts to resolve the problem have failed to result in an agreeable solution. Continued hostilities between the Palestinian community and Israel and any failure to settle the conflict may have a significant adverse effect on the Company's business. Further deterioration of hostilities into a full-scale conflict might require more widespread military reserve service by some of the Company's employees that may have a material adverse effect on the Company's business.

All male adult citizens and permanent residents of Israel under the age of 45 are, unless exempt, obligated to perform up to 30 days of military reserve duty annually. Additionally, all such residents are subject to being called to active duty at any time under emergency circumstances. Many of the Company's officers and employees are currently obligated to perform annual reserve duty. While the Company has operated effectively under these requirements since it began operations the Company cannot assess the full impact of such requirements on its workforce or business if conditions should change and the Company cannot predict the effect on it of any expansion or reduction of such obligations.

### ECONOMIC CONDITIONS

Israeli's economy has been subject to numerous destabilizing factors, including a period of rampant inflation in the early to mid-1980s, low foreign exchange reserves, fluctuations in world commodity prices, military conflicts and civil unrest. The Israeli government has, for these and other reasons, intervened in various sectors of the economy, by utilizing, among other means, fiscal and monetary policies, import duties, foreign currency restrictions and control of wages, prices and foreign currency exchange rates. In 1998, the Israeli currency control regulations were liberalized significantly, as a result of which Israeli residents may deal in foreign currency and non-residents of Israel may purchase and sell Israeli currency and assets. The Israeli government has periodically changed its policies in all these areas. There are currently no Israeli currency control restrictions or remittances of dividends on the ordinary shares or the proceeds from the sale of the shares, however, legislation remains in effect pursuant to which currency controls can be imposed by administrative action at any time. In addition, Israeli residents are required to file reports pertaining to specific types of actions or transactions.

The Israeli government's monetary policy contributed to relative price and exchange rate stability in recent years, despite fluctuating rates of economic growth and a high rate of unemployment. There can be no assurance that the Israeli government will be successful in its attempts to keep prices and exchange rates stable. Price and exchange rate instability may have a material adverse effect on the Company.

### TRADE RELATIONS

Israel is a member of the United Nations, the International Monetary Fund, the International Bank for Reconstruction and Development and the International Finance Corporation. Israel is a member of the World Trade Organization and is a signatory to the General Agreement on Tariffs and Trade. In addition, Israel has

been granted preferences under the Generalized System of Preferences from the United States, Australis, Canada and Japan. These preferences allow Israel to export the products covered by such programs either duty-free or at reduced tariffs.

Israel and the European Union concluded a Free Trade Agreement in July 1975 which confers some advantages with respect to Israeli exports to many European countries and obligates Israel to lower its tariffs with respect to imports from these countries over a number of years. In 1985, Israel and the United States entered into an agreement to establish a Free Trade Area. The Free Trade Area has eliminated all tariff and some non-tariff barriers on most trade between the two countries. On January 1, 1993, an agreement between Israel and the European Free Trade Association, known as the "EFTA," established a free-trade agreement with the European Union, which includes redefinition of rules of origin and other improvements, such as allowing Israel to become a member of the Research and Technology programs of the European Union. In recent years, Israeli has established commercial and trade relations with a number of other nations, including Russia, China, India, Turkey and other nations in Eastern Europe and Asia.

#### COMPANY HISTORY

On October 17, 2001 Entertainment International Ltd. ("ENTII"), a New York corporation whose shares were publicly traded on the NASD's OTC Bulletin Board, through its wholly owned subsidiary ENTI I Acquisition Corp., acquired all of the issued and outstanding shares of CSTI Hi-Tec in exchange for shares of ENTI's unregistered common stock (the "Transaction"). Simultaneously with the closing of the Transaction, ENTI effectuated a one for twenty reverse stock split effective on October 18, 2001 of all of its issued and outstanding stock. Following the closing of the Transaction, the former shareholders of CSTI Hi-Tec acquired control of ENTI. Mr. Jacob Lustgarten, the President of CSTI Hi-Tec became the Chairman and President of ENTI.

On December 27, 2001, ENTI amended its certificate of incorporation to change its name from Entertainment International Ltd. to Clean Systems Technology Group, Ltd. (the "Company" or "CSTI").

CSTI's shares of common stock are currently listed on the pink sheets under the symbol "CSTM".

#### ITEM 2. PROPERTIES

CSTI currently leases 1,569 square meters of executive and manufacturing office space in the industrial zone of Kiryat Gat, Israel. The lease expired on December 31, 2003, and was extended for an additional period of three years. The monthly lease payments did not change and continue to be \$7,500 per month, with five months grace, upon owner's discretion over the first two years. In addition, CSTI owns 3,466 square meters of land in Kiryat Gat, for which it currently has no specific plans for. On March 14, 2002, CSTI entered into a lease agreement for building in Migdal-Haemek consisting of 1,512 square meters in 2001 located next to the Tower Semi Conductor FAB. Due to efficiency measures taken by the Company, the lease was terminated. (See "The Company").

CSTI believes that its current facilities are adequate for its current and expected future business.

# Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

ITEM 3. LEGAL PROCEEDINGS

There are no material legal proceedings pending or threatened against the Company.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

PART II

ITEM 5. MARKET FOR OUR COMMON STOCK AND RELATED STOCKHOLDER MATTERS

The Company's Common Stock currently trades under the symbol "CSTM." Prior to the Company changing its name to Clean Systems Technology Group, Ltd., the Company's Common Stock traded under the symbol "ENTM" and prior to October 17, 2001 under the symbol "ENTI." (See "Business - Company History"). Since July 5, 1995 the Company's Common Stock has traded on the NASD's OTC Bulletin Board. The price ranges presented below represent the highest and lowest quoted bid prices during each quarter for 2002, 2003 and the second quarter of 2004 (through June 3, 2004) reported by the National Quotation Bureau Service, Inc. The quotes represent prices between dealers and do not reflect mark-ups, markdowns or commissions and therefore may not necessarily represent actual transactions. All prices below reflect the 1-for-20 reverse stock split effected on October 17, 2001.

COMMON STOCK		
	HIGH	LOW
FISCAL 2002		
First quarter	\$1.75	\$1.01
Second quarter	\$1.18	\$0.63
Third quarter	\$0.75	\$0.63
Fourth quarter	\$0.25	\$0.12
FISCAL 2003		
First quarter	\$0.22	\$0.08
Second quarter	\$0.30	\$0.11
Third quarter	\$0.15	\$0.10
Fourth quarter	\$0.40	\$0.12
FISCAL 2004		

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

First quarter	\$0.45	\$0.28
-----	-----	-----
Second quarter to date	\$0.45	\$0.29
-----	-----	-----

On June 3, 2004, there were approximately 1,682 registered shareholders of CSTI's 82,663,123 outstanding shares of Common Stock.

On June 3, 2004, the last sale price of the Common Stock as reported on the pink sheets was \$0.29.

### DIVIDEND POLICY

CSTI has never paid or declared dividends on its common stock. The payment of cash dividends, if any, in the future is within the discretion of the Board of Directors and will depend upon CSTI's earnings, its capital requirements, financial condition and other relevant factors. CSTI intends, for the foreseeable future, to retain future earnings for use in CSTI's business.

9

### RECENT SALES OF UNREGISTERED SECURITIES

During 2003, the Company converted loans, received in 2001 and 2002 various investors into 7,627,176 shares. In addition, in 2003 the Company sold 16,838,880 shares resulting in proceeds of \$1,683,888 from various investors.

In 2003, the Company issued 2,349,939 shares of its Common Stock for services to the Company. In 2004, the Company sold an aggregate of 11,780,453 shares its Common Stock in exchange for consideration of \$ 1,178,045.

### ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### FORWARD-LOOKING STATEMENTS

The following discussion should be read in conjunction with the consolidated financial statements. Certain statements contained herein may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Because such statements include risks and uncertainties, actual results may differ materially from those expressed or implied by such forward-looking statements. Factors that could cause actual results to differ materially include, but are not limited to, risks associated with the integration of businesses following an acquisition, competitors with broader product lines and greater resources, emergence into new markets, the termination of any of the Company's significant contracts, the Company's inability to maintain working capital requirements to fund future operations or the Company's inability to attract and retain highly qualified management and technical personnel.

#### OVERVIEW

CSTI designs, engineers, manufactures, installs and services ultra high purity systems for transportation of clean gases and liquids from the source, where the gases and liquids are stored, to the point of use for the following processing industries:

- o Micro-electronics (semi conductors);
- o Optical fibers;

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

- o Pharmaceuticals and Bio-technology; and
- o Metal Blades.

CSTI product lines provide a total solution for the four major gas and chemical systems from source to the point of use referenced above. Since the gases and the chemicals are pure and extremely dangerous, the systems that CSTI manufactures must have the highest levels of safety and quality.

CSTI products are divided into three main categories:

- o Systems for ultra high purity gases from source to point of use;
- o Pre-manufactured product sub-systems; and
- o System upgrades.

### CRITICAL ACCOUNTING POLICIES AND ESTIMATES

This discussion and analysis of the Company's financial condition and results of operations are based on its consolidated financial statements that have been prepared under accounting principles generally accepted in the United States of America. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. All significant accounting policies are disclosed in note 2 to the consolidated financial statements included in this Form 10-KSB. The consolidated financial statements and the related notes thereto should be read in conjunction with the following discussion of the Company's critical accounting policies. Critical accounting policies and estimates are:

10

- o Revenue Recognition
- o Use of Estimates

### REVENUE RECOGNITION

The Company follows the percentage-of-completion method of accounting for contracts that extend for periods in excess of one year. Accordingly, income is recognized in the ratio that costs incurred bears to estimated total costs. Adjustments to cost estimates are made periodically, and losses expected to be incurred on contracts in progress are charged to operations in the period such losses are determined. The aggregate of cost incurred and income recognized on uncompleted contracts in excess of related billings is shown as a current asset, and the aggregate of billings on uncompleted contracts in excess of related costs incurred and income recognized is shown as a current liability.

### USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

### RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In August 2001, the FASB issued SFAS No. 143, "Accounting for Asset Retirement Obligations" ("SFAS No. 143"), which is effective October 1, 2003. SFAS No. 143

Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

requires, among other things, the accounting and reporting of legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development, or normal operation of a long-lived asset. The Company is currently assessing, but has not yet determined, the effect of SFAS No. 143 on its financial position or results of operations.

On April 30, 2002, the Financial Accounting Standards Board (FASB) issued Statement No. 145, Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13, and Technical Corrections. Statement 145 rescinds Statement 4, which required all gains and losses from extinguishments of debt to be aggregated and, if material, classified as an extraordinary item, net of any income tax effect. As a result, the criteria in Opinion No. 30 will now be used to classify those gains and losses. Statement 64 amended Statement 4 and is no longer necessary because Statement 4 has been rescinded.

Statement 145 amended Statement 13 to require that certain lease modifications that have economic effects similar to sale-leaseback transactions be accounted for in the same manner as sale-leaseback transactions. This amendment is consistent with the FASB's goal of requiring similar accounting treatment for transactions that have similar economic effects.

This Statement also makes technical corrections to existing pronouncements. While those corrections are not substantive in nature, in some instances, they may change accounting practice.

In June 2002 the FASB issued Statement No. 146, "Accounting for Costs Associated with Exit or Disposal Activities." The Company expects that the adoption of the new statements will not have a significant impact on its consolidated financial statements.

RESULTS OF OPERATIONS

YEAR ENDED DECEMBER 31, 2003 COMPARED WITH YEAR ENDED DECEMBER 31, 2002  
(AMOUNTS IN THOUSANDS UNLESS OTHERWISE INDICATED)

REVENUES

In year 2003, the Company's total revenues amounted to \$3.180 million or a decline of \$3.065 million (or 49%) from \$6.245 million in 2002. Management believes that this decline was a result of general economic conditions. Management's strategic goal is to continue to be the premier industry leader in Israel and gain market share in the European and central Asian markets, especially Italy and India. During the year ended December 31, 2003 and 2002, revenues to customers in Israel amounted to \$2,852 and \$5,925, respectively. Revenues to Italy and other non Israeli customers amounted to \$328 and \$320, respectively for the years ended December 31, 2003 and 2002. Generally, the Company is not dependent upon any single customer or group of customers. The nature of the Company's business is such that the Company performs several large contracts at any one time. Therefore, several customers may comprise a significant portion of CSTI's revenues during any fiscal period. Once the Company installs a system for its customer, the customer is generally dependent on the Company for future upgrades of the system.

COST OF REVENUES

The following table sets forth a comparison of the costs of revenues for the

Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

periods indicated:

12

	December 31,	
	2003	2002
	\$	\$
Cost of materials and inventory	1,050	2,000
Salaries, subcontractors and related expenses	1,081	2,200
Cost of service abroad	96	800
Rent and taxes	181	1300
Vehicles and transportation	210	2900
Equipment maintenance and insurance	191	1500
Depreciation	193	1900
Miscellaneous	42	300
	--	--
Cost of revenues	3,044	5,200
	=====	=====

Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

Cost of revenues has decreased by \$2.174 million (or 42%) to \$3.044 million in year 2003, from \$5.218 million in year 2002. Costs of revenues as a percentage of sales was negatively impacted due to management's strategy to absorb high job costs associated with increasing Israeli market share.

Materials and inventory costs decreased by \$0.992 million from 2002 levels to \$1.050 million in year 2003. Material and inventory costs as a percentage of revenues was 33% in year 2003 as compared to 32.6% in year 2002.

Salaries and subcontractors costs decreased by \$1.195 million in year 2003 to \$1.081 million as a part of the saving plan due to the overall decrease in year 2003 revenues.

Costs of service abroad slightly increased in year 2003 to \$0.096 million from \$0.087 million in year 2002 due to the attempt to look for new projects outside of Israel. A majority of our revenues were earned in Israel in year 2003 as well as in the year 2002.

The average number of employees during year 2003 was 56 as compared to 114 for 2002. The Company increased hirings in early 2002 due to favorable business conditions. Subsequent to the first quarter, there was a decline in demand for the Company's systems, and the Company adjusted staffing to match.

Other variable costs have changed relative to the change in revenues.

GROSS PROFIT

Gross Profit has decreased by \$0.891 million to \$0.136 million in 2003 from \$1.027 million in 2002 due to the lower volume of revenues. Gross margins approximated 4.2% in 2003 versus 16.5% in 2002. The lower margins relate to the competitive pricing environment and the Company's inability to absorb its fixed production costs at a lower revenue volume. During the year 2003, a substantial portion of revenues were earned in Israel as well as revenues in year 2002.

SELLING, GENERAL AND ADMINISTRATIVE

The following table sets forth details regarding selling, general and administrative expenses for the periods indicated:

	Year ended December 31,	
	2003	2002
	\$	\$
Salaries and related expenses	403	78

Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

Professional fees	780	70
-----	-----	-----
Telephone and office maintenance	231	29
-----	-----	-----
Travel, vehicles and transportation	123	8
-----	-----	-----
Depreciation	133	11
-----	-----	-----
Sales and marketing	180	22
-----	-----	-----
Doubtful accounts	123	0
-----	-----	-----
Total	1,973	2,2
	=====	====

Selling, General and Administrative Expenses ("SG&A") decreased \$0.229 million (or 10%) to \$1.973 million in 2003 from \$2.202 million in 2002. The decrease is primarily attributable to the termination of three executive management positions at the end of 2002.

INTEREST EXPENSE

Interest expense increased by \$67 to \$509 in 2003 from \$442 in 2002. The increase is primarily attributable to a higher level of outstanding debt in 2003 as compared to 2002. Part of the increase was set-off due to a cessation of accumulation on interest on convertible notes which converted to common stock.

FINANCIAL COSTS

Expense is attributed to issuance of shares to investors in prices which were lower from their market values.

OTHER INCOME (EXPENSE)

The increase in other expense of \$352 to \$ 692 in 2003 from \$ 340 in 2002 is primarily the result of the write off of northern facilities \$167 and unfavorable foreign currency translation adjustments.

LIQUIDITY AND CAPITAL RESOURCES

At December 31, 2003, the Company had cash and cash equivalents of \$588 as compared to \$23 at December 31, 2002.

Net cash used in operating activities was \$1,681 for the year ended December 31, 2003 as compared to \$1,168 for the year ended December 31, 2002. The increase in net cash used in operating activities is primarily attributable to the significant decline in net operating results in 2003 versus 2002. These cash outflows were substantially varied by the increases in inventory and accounts payable and other liabilities and decrease in costs in excess of billings.

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

Net cash used in investing activities was \$33 and \$(653) for the years ended December 31, 2003 and 2002, respectively. The overall increase was primarily due to the lower level of net purchases of property and equipment in 2003.

Net cash provided by financing activities was \$2,213 and \$1,737 for the years ended December 31, 2003 and 2002, respectively. The increase was primarily due to the issuance of common stock to fund working capital purposes.

The following summarizes certain financing arrangements outstanding as of December 31, 2003:

The Company from time to time borrows funds using short-term loans for working capital needs. The loans are generally for a term of approximately six months and bear interest at annual rates ranging from prime plus 3% to prime plus 10%. At December 31, 2003, the Company had \$70 of short-term loans outstanding.

The Company from time to time in 2001 and 2002 had issued convertible notes to investors. These notes bore interest at 8% and had a term of 18 months. They were convertible into common stock at \$.1775 per share. In 2003, the Company issued 7,627,176 Shares of its common stock upon conversion of such notes. The Company has no convertible notes outstanding at this time.

14

In 2003, the Company issued an aggregate of 16,838,880 Shares of its common stock in exchange for consideration of \$1,683,888. In 2004, the Company issued an aggregate of 11,780,453 Shares of its common stock in exchange for consideration of \$1,178,045.

The Company currently has no material commitments for the next 12 months other than those under an operating lease arrangement. This arrangement consists primarily of a lease arrangement for the Company's existing operations. The aggregate required payments for the next 12 months under these arrangements are approximately \$69 after special discount. Notwithstanding the above, the most significant non-contractual operating costs for the next 12 months are compensation and benefit costs, material costs, insurance costs and general overhead costs such as telephone and utilities. The Company believes that its current resources, coupled with cash flow from ongoing operations and its current backlog, will allow the Company to sustain its operations for at least the next 24 months.

REPORT OF INDEPENDENT AUDITOR

To the Board of Directors and Shareholders  
Clean Systems Technology Group, Ltd.

We have audited the accompanying consolidated balance sheet of Clean Systems Technology Group, Ltd. and subsidiaries as of December 31, 2003, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the two years in the period ended December 31, 2003. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States).. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Clean Systems Technology Group, Ltd. and subsidiaries as of December 31, 2003, and the consolidated results of their operations and their cash flows for each of the two years in the period ended December 31, 2003, in conformity with accounting principles generally accepted in the United States of America.

CLEAN SYSTEMS TECHNOLOGY GROUP, LTD.  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 (ALL AMOUNTS IN THOUSANDS, EXCEPT SHARE AND  
 PER SHARE DATA OR AS OTHERWISE NOTED)

(1) BASIS OF PRESENTATION

On October 17, 2001, Entertainment International Ltd. ("ENTII"), through its wholly-owned subsidiary ENTII Acquisition I Corp., closed a transaction (the "Transaction") providing for the acquisition of CSTI Hi-Tec, Ltd. an Israeli corporation. All of the issued and outstanding shares of CSTI Hi-Tec, Ltd. were exchanged for shares of ENTII's unregistered restricted common stock. Simultaneously with the closing the Board of Directors authorized a one for twenty reverse stock split of all ENTII's issued and outstanding common stock. All references in the accompanying consolidated financial statements to the number of shares have been restated to reflect the reverse stock split.

For accounting purposes, the Transaction has been treated as a recapitalization of CSTI Hi-Tec, Ltd., with CSTI Hi-Tec, Ltd. as the acquirer. The shares issued in the Transaction are treated as being issued for cash and are shown as outstanding for all periods presented in the same manner as for a stock split. The consolidated financial statements reflect the results of operations of CSTI Hi-Tec, Ltd. and its subsidiaries for all periods presented. On December 27, 2001, ENTII amended its certificate of incorporation to change its name from Entertainment International, Ltd. to Clean Systems Technology Group, Ltd. (the "Company" or "CSTI").

The Company designs, engineers, manufactures and installs Ultra High Purity systems for gases and liquids for companies in the processing industries. CSTI provides its products and services to customers in several countries around the world including Israel, Italy, India and the Scandinavian countries. CSTI Hi-Tec Ltd., the Company's main operating subsidiary, was formed under the laws of the state of Israel in 1995.

The Company also designs and manufactures machines to manufacture fiber-optic wires through its CSTI Italia Fiber, SRL, subsidiary. The fiber-optic business was not material to overall operations during the years ended December 31, 2003 and 2002.

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and include the operations of the Company and its subsidiaries. All material intercompany accounts and transactions have been eliminated in consolidation.

The consolidated financial statements are presented in United States ("U.S.") dollars. Substantially all of the Company's sales are made in U.S. dollars. In addition, a substantial portion of the Company's costs are incurred in U.S. dollars. Since the U.S. dollar is the primary currency in the economic environment in which the Company operates, the U.S. dollar is its functional currency.

(2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

USE OF ACCOUNTING ESTIMATES - The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company bases its estimates and judgments on historical experience and on various other assumptions that it believes are reasonable under the circumstances. However, future events are subject to change and the best estimates and judgments routinely require adjustment. Actual amounts may differ from those estimates.

Significant estimates include the Company's estimate of allowance for doubtful

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

accounts and the estimate of the economic lives of property and equipment.

### (2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

**CERTAIN SIGNIFICANT RISKS AND UNCERTAINTIES** - The Company operates in a dynamic industry and, accordingly, can be affected by a variety of factors. For example, any of the following areas could have a negative effect on the Company in terms of its future financial position, results of operations or cash flows: the highly cyclical nature of the semiconductor industry; reliance on a small number of customers; ability to obtain additional financing; regulatory changes; fundamental changes in the technology underlying semiconductor manufacturing processes or semiconductor manufacturing equipment; the hiring, training and retention of key employees; successful and timely completion of product design efforts; and new product design introductions by competitors.

**CASH AND CASH EQUIVALENTS** - The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents.

**INVENTORY** - Inventory consists of raw materials and finished goods. Raw materials totaled 1,725 at December 31, 2003, is valued at the lower of cost or market with the cost determined by the weighted average method. Finished goods totaled 490 at December 31, 2003 and was valued at the lower of cost (determined by the specific identification) or market.

**PROPERTY AND EQUIPMENT** - Property and equipment is stated at cost. Depreciation and amortization is provided using the straight-line method over the estimated economic lives of assets, which are three to fifteen years for office furniture and equipment, five to fifteen years for machinery and equipment, ten years for leasehold improvements, or the term of the lease, whichever is shorter, and six years for vehicles.

Maintenance and repairs is charged to expense as incurred, whereas the costs of property and equipment additions and improvements are capitalized.

**IMPAIRMENT** - Certain long-term assets of the Company are reviewed when changes in circumstances require as to whether their carrying value has become impaired, pursuant to guidance established in Statement of Financial Accounting Standards (SFAS) No. 144, "Accounting for the Impairment of Disposal of Long-Lived Assets." Management considers assets to be impaired if the carrying value exceeds the future projected cash flows from related operations (undiscounted and without interest charges). If impairment is deemed to exist, the asset will be written down to fair value. Management also reevaluates the period of amortization to determine whether subsequent events and circumstances warrant revised estimates of useful lives. As of December 31, 2003, management expects those assets related to its operations to be fully recoverable.

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

FAIR VALUE OF FINANCIAL INSTRUMENTS - SFAS No.107, "Disclosure About Fair Value of Financial Instruments," requires certain disclosures regarding the fair value of financial instruments. In assessing the fair value of these financial instruments, the Company has used a variety of methods and assumptions, which were based on estimates of market conditions and risks existing at that time. For all instruments, including cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, it was estimated that the carrying amount approximated fair value due to the short-term maturities of these instruments. The fair value of debt was determined based on current rates at which the Company could borrow funds with similar remaining maturities, which amounts approximate its carrying value.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(ALL AMOUNTS IN THOUSANDS, EXCEPT SHARE AND  
PER SHARE DATA OR AS OTHERWISE NOTED)

---

### (2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

STOCK-BASED COMPENSATION - The Company accounts for stock-based compensation using the intrinsic value method presented in Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"), and related interpretations. Accordingly, no compensation is recognized for employee stock options granted with exercise prices greater than or equal to the fair value of the underlying common stock at the date of grant. The Company complies with the disclosure provisions of SFAS No. 123, "Accounting for Stock-Based Compensation," as amended by SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure." The Company's policy is to grant options with an exercise price equal to the quoted market price of its stock on the grant date.

CONCENTRATION OF CREDIT RISKS - Financial instruments, which potentially subject the Company to concentrations of credit risk, consist principally of cash and cash equivalents and accounts receivable. The Company places its investments with high quality governmentally-owned financial institutions. Accounts receivables are derived from sales to customers located primarily in Italy, India and Israel. The Company routinely assess the financial strength of its customers and, based upon factors concerning credit risk, establishes an allowance for uncollectible accounts. Management believes that accounts receivable credit risk exposure beyond such allowance is limited. Certain customers accounted for more than 10% of accounts receivable and revenue in 2003 and 2002 (See Note 13).

The Company does not generally require collateral for its financial statements.

FOREIGN OPERATIONS RISK - The Company's main operating subsidiary is incorporated under the laws of the State of Israel, and its principal executive offices and manufacturing and research and development facilities are located in the State of Israel. Accordingly, the Company is directly affected by political, economic and military conditions in Israel.

Continued hostilities in Israel may have a significant adverse effect on the

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

Company's business. All male adult citizens and permanent residents of Israel under the age of 45 are, unless exempt, obligated to perform up to 30 days of military reserve duty annually. Additionally, all such residents are subject to being called to active duty at any time under emergency circumstances. Increased military reserve service by Company employees may have a material adverse effect on the Company's business.

The Israeli government's monetary policy contributed to relative price and exchange rate stability in recent years, despite fluctuating rates of economic growth and a high rate of unemployment. There can be no assurance that the Israeli government will be successful in its attempts to keep prices and exchange rates stable. Price and exchange rate instability may have a material adverse effect on the Company.

ADVERTISING EXPENSES - Advertising expenses are charged to the statement of operations as incurred. Advertising expenses were immaterial for all periods presented.

COMPREHENSIVE INCOME - The Company has adopted provisions of SFAS No. 130, "Reporting Comprehensive Income." The Company has no items of other comprehensive income or loss in any of the periods presented and, therefore, net income (loss) equals comprehensive income (loss) for all periods.

F-9

CLEAN SYSTEMS TECHNOLOGY GROUP, LTD.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(ALL AMOUNTS IN THOUSANDS, EXCEPT SHARE AND  
PER SHARE DATA OR AS OTHERWISE NOTED)

---

### (2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

SEGMENT INFORMATION - The Company follows SFAS No. 131, "Disclosures About Segments of an Enterprise and Related Information." SFAS 131 establishes standards for the way that public business enterprises report financial and descriptive information about reportable operating segments in annual financial statements and interim financial reports issued to shareholders. SFAS 131 also establishes standards for related disclosures about products and services, geographic areas and major customers. During each of the two years ended December 31, 2003 and 2002, the Company's management considered its business activities to be focused on its products and related services to end user customers. Since management's primary form of internal reporting is aligned with the offering of products and services, the Company believes it operates in one segment. Information related to geographic segments is included in Note 13.

NET INCOME PER SHARE - Earnings per share are calculated in accordance with the provisions of SFAS No. 128, "Earnings per Share." SFAS 128 requires the reporting of both basic earnings per share, which is the weighted-average number of common shares outstanding, and diluted earnings per share, which includes the weighted-average number of common shares outstanding and all dilutive potential common shares outstanding, utilizing the treasury stock method, except when antidilutive. For the years ended December 31, 2003 and 2002, the shares issued in the Transaction are treated as outstanding for all periods presented.

INCOME TAXES - The Company follows the provisions of SFAS No. 109, "Accounting

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

for Income Taxes." Deferred taxes arise primarily from the recognition of revenues and expenses in different periods for income tax and financial reporting purposes.

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Taxes which would apply in the event of disposal of investments in subsidiary companies have not been taken into account in computing deferred taxes, as it is the Company's policy to hold these investments, not to realize them and not to cause distributions of taxable dividends.

REVENUE RECOGNITION - Revenue from the sale of gas delivery systems is generally recorded upon installation. The Company recognizes revenue when persuasive evidence of an arrangement exists, shipment has occurred, price is fixed or determinable and collectability is reasonably assured. If the Company has not substantially completed a product or fulfilled the terms of a sales agreement at the time of shipment, revenue recognition is deferred until completion. The Company assesses collectability based on the credit worthiness of the customer and past transaction history. The Company performs on-going credit evaluations of customers and does not require collateral from customers. The Company follows the percentage-of-completion method of accounting for contracts that extend for periods in excess of one year. Accordingly, income is recognized in the ratio that costs incurred bear to estimated total costs. Where contracts in progress are subject to negotiation and it is probable that the additional costs will be recovered, none of the costs are recognized in the income statement until pricing has been approved. Similarly, the revenue is not recognized until realization is assured beyond a reasonable doubt. Adjustments to cost estimates are made periodically, and losses expected to be incurred on contracts in progress are charged to operations in the period such losses are determined. The aggregate of cost incurred on contracts in progress in excess of related billings is shown as a current asset, and the aggregate of billings on contracts in progress in excess of related costs incurred is shown as a current liability.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(ALL AMOUNTS IN THOUSANDS, EXCEPT SHARE AND  
PER SHARE DATA OR AS OTHERWISE NOTED)

---

### (2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

RESEARCH AND DEVELOPMENT - Expenses are charged to operations as incurred.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS - In January 2003, the Financial Accounting Standards Board ["FASB"] issued FASB Interpretation No- 46 ["FIN 46"], "Consolidation of Variable Interest Entities - an interpretation of ARB No. 51." FIN 46 was revised in December 2003. FIN 46 requires existing

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

unconsolidated variable interest entities to be consolidated by their primary beneficiaries if the entities do not effectively disperse risks among parties involved. In general it is effective for periods ending on or after March 31, 2004. We believe that we have no unconsolidated variable interest entities that would be considered under the requirements of FIN 46.

In April 2003, the FASB issued Statement of Financial Accounting Standards No. 149, "Amendment of Statement 133 on Derivative Instruments and Hedging Activities" ("SFAS 149"), which clarifies financial accounting and reporting for derivative instruments, including certain derivative instruments embedded in other contracts and for hedging activities under FASB Statement No. 133, "Accounting for Derivative Instruments and Hedging Activities." SFAS No. 149 is effective for contracts entered into or modified after September 30, 2003 and for hedging relationships designated after September 30, 2003.

In May 2003, the FASB issued Statement of Financial Accounting Standards No. 150, "Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity" ("SFAS 150"), which established standards for how an issuer classifies and measures certain financial instruments. SFAS 150 requires that an issuer classify certain financial instruments as liabilities (or assets in some circumstance) that were previously classified as equity. Financial instruments which embody an unconditional obligation requiring the issuer to redeem or repurchase it by the transfer of assets or by issuing a variable number of its equity shares must be classified as a liability. SFAS 150 is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003.

In December 2003 the SEC issued Staff Accounting Bulletin No. 104, Revenue Recognition. SAB 104 updates portions of existing interpretative guidance in order to make this guidance consistent with current authoritative accounting and auditing guidance and SEC rules and regulations.

We expect that the adoption of the new statements will not have a significant impact on our financial statements.

### (3) FINANCIAL COSTS

Financial costs expense is attributed to issuance of shares at prices which were lower than market value at the date of issuance.

F-11

CLEAN SYSTEMS TECHNOLOGY GROUP, LTD.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(ALL AMOUNTS IN THOUSANDS, EXCEPT SHARE AND  
PER SHARE DATA OR AS OTHERWISE NOTED)

---

### (4) ACCOUNTS RECEIVABLE

The following table shows the component elements of accounts receivable:

Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

	DECEMBER 31, 2 0 0 3
Amounts Billed	\$ 861
Recoverable Costs and Accrued Profits on Units Delivered - Not Billed	554
	-----
Total	1,415
Less: Allowance for Doubtful Accounts	134
	-----
 TOTAL	 \$ 1,281
	=====

Recoverable costs and accrued profits on units delivered not billed principally comprise amounts of revenue recognized on contracts for which invoices had not been billed at the balance sheet date.

(5) CUSTOMER DEPOSITS

The balance sheet reflects, as of December 31, 2003, advances from customers for ongoing work of \$149.

(6) PROPERTY AND EQUIPMENT

Property and equipment consists of the following:

	LAND	LEASEHOLD IMPROVEMENTS	MACHINERY AND EQUIPMENT	OFFICE FURNITURE AND EQUIPMENT	VEHICLES
December 31, 2003 -					
At Cost	\$ 137	\$ 322	\$ 1,831	\$ 250	\$ 159
Accumulated Depreciation	--	148	1,046	151	119
	-----	-----	-----	-----	-----
 BALANCE AS OF DECEMBER 31, 2003	 \$ 137	 \$ 174	 \$ 785	 \$ 99	 \$ 40
	-----	-----	-----	-----	-----

Depreciation and amortization expense amounted to \$ 493 and \$ 301 for the years ended December 31, 2003 and 2002, respectively.

In 2002, the Company leased an additional facility in the north of Israel under a five year operating lease starting in April. During 2003 the lease was cancelled and the Company wrote off its investment in the facility in the amount of \$167.

(7) SHORT-TERM LOANS

The Company from time to time borrows funds using short-term loans for working capital needs. The loans are usually for a period of approximately six months and bear interest that varies from one bank to another - prime plus 10% in one bank and prime plus 3% in another bank. These loans are secured in the same

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

manner as the authorized credit line in these banks. (See note 9). The Company's short-term loans outstanding amounted to \$70 at December 31, 2003.

F-12

CLEAN SYSTEMS TECHNOLOGY GROUP, LTD.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(ALL AMOUNTS IN THOUSANDS, EXCEPT SHARE AND  
PER SHARE DATA OR AS OTHERWISE NOTED)

---

### (8) CONVERTIBLE NOTES

During the year ended December 31, 2003, the Company did not issue new convertible notes. As of May 2003, 7,627,176 common shares were issued to retire certain convertible notes issued during October 2001 to February 2002 by several investors in the Company. According to the terms and conditions of the notes, each note holder has received a number of shares, which reflected original investment, plus interest of 8% annually for a period of 18 months.

According to section 4 of the notes the conversion rate was fixed at \$ 0.1775 as of May 15, 2003.

There is no outstanding balance of convertible notes as at December 31, 2003.

### (9) BANK LINE OF CREDIT

The Company had a \$2,000 line of credit with the Industrial Development Bank of Israel (the "Bank"). Borrowings under the line of credit are collateralized by liens on company owned property and equipment and substantially all other assets. Sale or transfer of collateralized assets, outside the ordinary course of business, must be approved by the Bank. Interest on borrowings accrued at the Bank's prime rate plus 2%-3% for advances made in U.S. dollars and prime plus 1.85% for advances in New Israeli Shekel ("NIS"). Substantially all advances are denominated in NIS.

At the beginning of 2002 the bank stopped its activities as an independent bank and the outstanding balance of the credit line turned to a long term loan repayable over 3 years at the rate of 10.6% annually.

THE BALANCE OF THE BANK CREDIT IS PAYABLE IN EQUAL QUARTERLY INSTALLMENT THROUGH DECEMBER OF 2005. THE PRINCIPLE PORTION PAYABLE IS \$882 AND \$979 FOR THE YEARS ENDING DECEMBER 31, 2005 AND 2006, RESPECTIVELY. THIS BANK CREDIT IS PERSONALLY GUARANTEED BY AN OFFICER OF THE COMPANY.

AS OF THE YEAR 2002 THE COMPANY WAS GRANTED A SECOND CREDIT LINE BY ANOTHER BANK WHICH VARIES FROM \$338 AT THE BEGINNING OF THE YEAR TO \$87 AT THE END OF 2003. THE CREDIT LINE ACCRUES INTEREST ON BORROWINGS AT PRIME PLUS 1.5% PER ANNUM, WHICH WAS 8.2% AT DECEMBER 31, 2003.

### (10) RETIREMENT AND SEVERANCE FUNDS

The Company makes regular payments into recognized severance and retirement funds as follows:

Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

(A) RETIREMENT - Employees contribute 5% and employers 5-6% of employee compensation to recognized funds for retirement benefits. These amounts may be paid to the employee upon retirement as a lump sum or annuity. The amounts so funded are not reflected on the balance sheet since they are controlled by the fund trustees and are not under the control and management of the Company.

(B) SEVERANCE - The liability for severance pay benefits, as determined by Israeli law, is based upon length of service and the employee's most recent monthly salary. The Company contributes to recognized funds based upon this liability amount at any one time. At December 31, 2003, the excess of the liability as determined at that date, and the amount of company contributions is recognized as a liability of the Company. The Company has chosen to deposit monies into the central savings account for severance pay to cover a portion of the liability. Such amount has been netted against the liability recognized. The amounts which have been contributed to the fund are not recognized on the balance sheet, similar to the retirement amounts.

	DECEMBER 31, 2 0 0 3
Accrued Severance Pay	\$ 114 =====

Once the contributions have been made to the severance and retirement funds, the liability to make retirement and severance payments rests with the funds, not the Company.

F-13

CLEAN SYSTEMS TECHNOLOGY GROUP, LTD.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(ALL AMOUNTS IN THOUSANDS, EXCEPT SHARE AND  
PER SHARE DATA OR AS OTHERWISE NOTED)

---

(11) COMMITMENTS AND CONTINGENCIES

The Company leases its Israel-based facilities under an operating lease that expired in December 2003. As of January 1, 2004, the lease was renewed for an additional three years, leaving a future commitment of \$91.5 annually with a reduction of 25% for 2004 and 17% for the year 2005. The lease does not include an option to renew, but the Company anticipates extending the lease if favorable terms can be obtained.

The Company from time to time is a party to claims and lawsuits, in the ordinary course of business. The Company has accrued amounts to cover such claims if management believes, with the advice of counsel, that losses are probable. Claims asserted but not accrued amounted to \$15 as of December 31, 2003.

Certain customers require the Company to obtain bank guarantees of a portion of the contract undertaken. The Company has an agreement with the Bank under which such guarantees are available. In the event the Company is unable to perform all aspects of the contracts, the Bank will make contractual payments to customers

Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

and then seek reimbursement from the Company. As of December 31, 2003, the Bank had extended approximately \$124 in guarantees to 3 customers.

The Company's subsidiary, CSTI Hi-Tec, has entered into an employment agreement with Jacob Lustgarten. The employment agreement is for a period of ten years beginning January 1, 2000. Mr. Lustgarten shall be entitled to an annual salary of \$196, increased yearly based on the consumer price index published by the Central Statistics Bureau. Mr. Lustgarten is also entitled to a bonus of 5% of the pre-tax profits of CSTI Hi-Tec. There was no bonus accrual in either year 2003 or 2002 due to the Company's operating losses and for the same reason the annual salary was reduced to \$108,000.

The Company has initiated legal proceedings in India to recover a customer accounts receivable balance due of approximately \$400. Legal counsel to the Company has indicated that it is probable that a substantial portion of the amount due will be recovered. The Company has included an amount of \$100 in its allowance for doubtful accounts related to this customer balance.

(12) CAPITAL STOCK

The Company is authorized to issue 110,000,000 shares of common stock, \$0.01 par value per share.

During 2003 the following issuance of shares took place:

A.	7,627,176	Shares to convert certain convertible notes issued (see note 8).
B.	18,139,468	Shares issued to investors against cash proceeds.
C.	2,349,939	Shares issued for services rendered to the Company. The charges are included in "Financial Costs" in the Statement of Operations.
	-----	
	28,116,583	Total shares issued within 2003
	42,766,087	Balance of common stock shares as of January 1, 2003
	-----	
	70,882,670	Outstanding shares at December 31, 2003
	=====	

F-14

CLEAN SYSTEMS TECHNOLOGY GROUP, LTD.  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 (ALL AMOUNTS IN THOUSANDS, EXCEPT SHARE AND  
 PER SHARE DATA OR AS OTHERWISE NOTED)

(13) GEOGRAPHIC REPORTING

Revenues by geographic classifications are as follows:

			(IN U.S. \$THOUSANDS)
			-----
	ISRAEL	ITALY	INDIA

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

For the year ended December 31, 2003	\$	2,852	\$	101	\$	--	\$
For the year ended December 31, 2002	\$	5,925	\$	295	\$	18	\$

Major customers (as percentage of total revenues):

	YEARS ENDED	
	DECEMBER 31,	
	2 0 0 3	2 0 0 2
	-----	-----
Customer A	3%	7%
Customer B	7%	26%
Customer C	7%	--
Customer D	37%	26%
Customer E	29%	18%
Customer F	---	14%
Customer G	7%	---
Other	10%	9%

In general, the Company is not dependent upon any single customer or several customers. However, in 2003, approximately 66% of revenues came from two customers. The nature of the Company's business is that it works on several large contracts at any one time and therefore several customers may comprise a significant portion of the Company's revenues and net income during any fiscal year. Once the Company installs a system for its customer, the customer is generally dependent on the Company for future upgrades of the system.

At December 31, 2002, CSTI Hi-Tec, Ltd. had unused net operating losses related to operations in Israel of approximately \$3,000 for which there is no expiration date.

F-16

CLEAN SYSTEMS TECHNOLOGY GROUP, LTD.  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 (ALL AMOUNTS IN THOUSANDS, EXCEPT SHARE AND  
 PER SHARE DATA OR AS OTHERWISE NOTED)

-----  
 (16) TAXES (CONTINUED)

At December 31, 2002, the Company had available U.S. net operating loss carry-forwards of approximately \$416 for federal income tax purposes. The net operating loss carry-forwards expire at various dates through 2022.

Section 382 of the Internal Revenue Code provides that when a corporation undergoes an "ownership change," the corporation's use of its net operating losses is limited in each subsequent year. An "ownership change" occurs when, as of any testing date, the sum of the increases in ownership of each shareholder that owns five percent or more of the value of a company's stock as compared to that shareholder's lowest percentage ownership during the preceding three-year period exceeds fifty percentage points. For purposes of this rule, certain shareholders who own less than five percent of a company's stock are aggregated and treated as a single five-percent stockholder.

The Transaction may have involved an "ownership change" and thus the Company may be unable to use a material portion of its available federal net operating loss carry-forwards. Furthermore, in the ordinary course of the Company's future business operations, it could become necessary to issue shares in conjunction with acquisitions or additional financing, in order to meet the Company's growth

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

objectives and liquidity constraints. The issuance of a significant number of shares of common stock could result in an "ownership change." If the Company were to experience such an "ownership change," it might not be able to use a substantial amount of its available federal net operating loss carry-forwards to reduce future taxable income.

On August 1, 2001, CSTI Hi-Tec was granted a status of "Approved Enterprise" in accordance with the Law for the Encouragement of Capital Investments 1959. Under that law, by virtue of an "Approved Enterprise" status, CSTI Hi-Tec will be granted various tax benefits as follows:

(1) Tax exemption on part of the income from its approved enterprise for a period of 10 years. CSTI Hi-Tec has elected the "alternative benefits" (involving waiver of investment grants). In the event of distribution of cash dividends out of income, that was tax exempt as above, CSTI Hi-Tec would have to pay corporate tax at the rate 25% of the amount distributed. In general, Israeli companies are currently subject to a corporate tax at the rate of 36.0% of taxable income.

(2) CSTI Hi-Tec is entitled to claim accelerated depreciation for five tax years commencing in the first year of operation of each asset, in respect of property and equipment used by the approved enterprise.

The entitlement to the above benefits are conditional upon CSTI Hi-Tec fulfilling the conditions stipulated by the law, regulations published thereunder, and the instruments of approval for the specific investments in the approved enterprise. In the event of failure to comply with these conditions, the benefits may be cancelled and CSTI Hi-Tec may be required to refund the amount of the benefits, in whole or in part, plus interest.

### (17) OTHER EXPENSE

Aggregate amounts in other expense are primarily the results of foreign currency transactions adjustments and capital losses on the sale of property and equipment. Substantially all of the Company's sales are made in U.S. dollars. In addition, a substantial portion of the Company's costs are incurred in U.S. dollars. Since the U.S. dollar is the primary currency in the economic environment in which the Company operates, the U.S. dollar is its functional currency.

In year 2003, certain assets and liabilities were denominated in NIS while the payment to suppliers were linked to the U.S. dollar which caused a substantial unfavorable currency translation adjustment due to the relative weakness of the U.S. dollar to the New Israeli Shekel.

F-17

CLEAN SYSTEMS TECHNOLOGY GROUP, LTD.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(ALL AMOUNTS IN THOUSANDS, EXCEPT SHARE AND  
PER SHARE DATA OR AS OTHERWISE NOTED)

---

### (18) TRANSACTIONS WITH RELATED PARTIES

Related party transactions are as follows:

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

(I) Employee Advances - Employee advances are made on a short-term basis and are repaid through salary.

(II) Bank - The Industrial Development Bank of Israel is a Company shareholder (See Note 9).

(III) U.S. Offices - Certain office space in Florida and New York has been made available by an affiliate of a Company director at no cost.

(IV) In 2003, an officer of the Company granted it a loan in the amount of \$100,000 with a repayment date of December 2003, bearing interest equal to Bank Leumi's rate for US dollars. The officer left the Company and the loan was partially repaid.

### (19) INVESTMENT IN UNCONSOLIDATED SUBSIDIARY - AT COST

In January 2002, the Company paid \$94 for a nineteen percent [19%] interest in Altan Systems, Ltd., a private Israeli Company whose processes and technology may enhance the Company's product line. This investment is carried at cost as a component of Other Assets.

### (20) SUBSEQUENT EVENTS

Subsequent to December 31, 2003, the Company sold an aggregate of 11,780,453 shares for \$1,178.

### ITEM 8. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not Applicable

### ITEM 8A. CONTROLS AND PROCEDURES

Based on an evaluation as of the date of the end of the period covered by this Form 10-KSB, our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as required by Exchange Act Rule 13a-15(e). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms.

### CHANGES IN INTERNAL CONTROLS

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

There have been no changes in our internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

### LIMITATIONS ON THE EFFECTIVENESS OF CONTROLS

We believe that a control system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the control system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

EMPLOYMENT AGREEMENTS

The Company's subsidiary, CSTI Hi-Tec has entered into an employment agreement with Jacob Lustgarten. The employment agreement is for a period of ten years beginning January 1, 2000 and provides for an annual salary of \$196,000 (as adjusted annually, based on the consumer price index published by the Central Statistics Bureau). Mr. Lustgarten is also entitled to a bonus of 5% on the pre-tax profits of CSTI Hi-Tec, which he waived for the fiscal year ended December 31, 2001.

STOCK OPTION PLAN

1994 Employee Share Purchase Plan

The Company has an employee share purchase plan (the "Plan") for employees of the Company and any present or future "subsidiary corporations", which was established by ENTI. The Company intends for the Plan to be an "employee stock purchase plan" as defined in Section 423 of the Internal Revenue Code of 1986, as amended (the "Code"). The Plan, approved by the Company's shareholders on April 11, 1995, was effective November 1, 1994. All employees are eligible to participate in the Plan, except that the Company's appointed committee may exclude any or all of the following groups of employees from any offering: (i) employees who have been employed for less than 2 years; (ii) employees whose customary employment is 20 hours or less per week; (iii) employees whose customary employment is not more than 5 months in any calendar year; and (iv) highly compensated employees (within the meaning of Code Section 414(q)). THE shares issuable under the Plan shall be common shares of the Company subject to certain restrictions up to a maximum of 1,000,000 shares. The committee shall determine the length of each offering but no offering may exceed 27 months.

The Company has no remaining shares available for sale to its employees under the Plan.

ITEM 11. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

The following table sets forth certain information as of May 27, 2004 with respect to each beneficial owner of five percent (5%) or more of the outstanding shares of common stock of CSTI, each officer and director of CSTI, officers of CSTI Hi-Tec and all officers and directors as a group. The table does not include securities exercisable into common stock that have not yet vested or are not exercisable within 60 days of the date hereof.

As of the filing date of this report of Form 10-KSB, our authorized capitalization consisted of 110,000,000 shares of common stock, par value \$.01 per share. As of filing date of this report of Form 10-KSB, there were 82,663,123 shares of our common stock outstanding, all of which were fully paid, non-assessable and entitled to vote. Each share of our common stock entitles its holder to one vote on each matter submitted to the shareholder.

The following table sets forth, as of the filing date of this report of Form 10-KSB, the number of shares of our common stock owned by (i) each person who is known by us to own of record or beneficially five percent (5%) or more of our outstanding shares, (ii) each of our directors, (iii) each of our executive officers and (iv) all of our directors and executive officers as a group. Unless otherwise indicated, each of the persons listed below has sole voting and investment power with respect to the shares of our common stock beneficially owned.

NAME AND ADDRESS OF BENEFICIAL OWNER (1)	NUMBER OF SHARES BENEFICIALLY OWNED (2)	PERCENTAGE OF SHARES BENEFICIALLY OWNED (3)
-----	-----	-----
Link Business Solutions	12,917,007	15.63%
Liel Hi-Tech Systems Ltd.	12,917,007	15.63%
Jacob Lustgarten (4)	25,834,014	31.25%
Outlets Ltd. (5)	3,255,055	3.93%
Yitchak Ben-Avi	- - -	
Yona Liebowitz	- - -	
Meir Elazar	1,200,000	1.45%
All officers and directors as a group (3 persons)	27,034,014	32.70%

-20-

### ITEM 12. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Mr. Lustgarten has personally guaranteed a \$2,000,000 line of credit from the Industrial Development Bank of Israel ("IDB"). During 2002 the IDB encountered financial difficulties and as a result will shut down all of its activities as a commercial bank during the next few years. CSTI reached a settlement agreement with IDB as follows:

1. By December 31st 2002, the credit will be decreased (paid down) by NIS 1,000,000 to NIS 8,500,000 (eight million and five hundred thousand NIS).
2. In the year 2003, the Company will pay an aggregate of NIS 2,150,000 in

## Edgar Filing: CLEAN SYSTEMS TECHNOLOGY GROUP LTD - Form 10KSB

four equal quarterly installments, in addition to the interest due, at the end of each quarter.

3. The balance of the credit will be paid within two years, starting at January 1st 2004, in quarterly installments, in addition to the interest due, at the end of each quarter.

4. The Company has the right to prepay any or all installments.

5. The Bank will credit payments made in the form of receivables from the Galil Engineering contract and for any new contracts that will be assigned by the Company.

Mr Lustgarten has personally guaranteed the terms of the settlement agreement.

In 2003, Mr. Yoav Shachar, the CEO of CSTI granted CSTI a loan in the amount of \$100,000 with a repayment date of December 2003 bearing interest equal to Bank Leumi's rates for US dollars. Mr Shachar left the Company and the above loan was partly paid.

Between 2001 and the end of 2003, Meir Elazar received an aggregate of 1.2 million shares of common stock in consideration for his services as an officer and director of the Company.

Other than the above, during the year ended December 31, 2003 there were no substantial transactions between the Company and any of its directors, officers or 5% shareholders, such as loans, guarantees or payments for services.

All future transactions, including any loans between CSTI and any of its officers, directors, principal stockholders and their affiliates will be approved by a majority of CSTI's board of directors and will be on terms no less favorable to CSTI than could be obtained from unaffiliated third parties.
