RADA Will Supply Major Avionics Systems Having a Value of up to \$7 million to the Lahav Division of Israel Aircraft Industries for an Avionics Upgrade Program

Monday May 24, 8:21 am ET

NATANYA, Israel, May 24 /PRNewswire-FirstCall/ --

RADA Electronic Industries Ltd. (NASDAQ: RADIF - News) announced today it has signed a contract with the Lahav Division of Israel Aircraft Industries (IAI) to develop produce and supply major avionic systems for an IAI avionics upgrade program for a foreign customer. The initial \$600,000 contract is for the development and prototype phase of the project. The total value of the contract, depending on exercisable production options, will range between \$4 and \$7million over a period of several years. First deliveries under the initial phase of the contract will be in the fourth quarter of 2004.

RADA will develop and produce the Airborne Interface Computer and the Weapons Delivery System of the modernized avionics package developed by IAI. The program production phase is expected to begin on 2005 and will consist of hundreds of units.

"This program validates the recognition and confidence IAI has in RADA engineering and production capabilities and is based on our wide experience in data acquisition and weapon management systems. IAI is one of our most important customers and we are proud to have been selected for such an important program" said Zvika Alon, Vice President for Business Development.

"We, at Lahav Division of IAI, consider RADA to be one of our strategic sources for quality avionics systems in support of our worldwide upgrade programs. We were pleased with RADA's performance in past programs and are looking forward to working together on this important program" said David Dagan, general manager of the Lahav Division.

Commenting on the signing of the agreement, Chief Executive Officer Adar Azancot said: "This program validates RADA's strategic decision to work closely with leading Israeli defense industries, to pursue long term production programs and to establish our position as major supplier of avionics systems. Following the completion of our turnaround process during 2003, this year is becoming the 'development year' of RADA, a year that will position our company for significant future growth in production activities"

About RADA

RADA Electronic Industries Ltd. is an Israel based company involved in the
