FOR IMMEDIATE RELEASE

**AIRCEL USING ALVARION'S BREEZEMAX™ TO
DEPLOY WIMAX NETWORKS ACROSS NORTHERN AND
EASTERN INDIA**

*Offering Broadband Data and Voice Services, Aircel is Overlaying and
Expanding its Current Network, Planning to Serve SMEs in 50 Cities*

TEL AVIV, Israel, December 27, 2006 — Alvarion Ltd. (NASDAQ:ALVR), the world's leading provider of wireless broadband solutions today announced that Aircel Business Solutions (ABS), a subsidiary of leading Indian cellular service provider Aircel, is expanding its current network and planning to use BreezeMAX 3300 to deploy WiMAX networks across 50 cities in northern and eastern India.

Aircel currently has deployments in eight cities and is using BreezeMAX to overlay and expand its current broadband and cellular network infrastructure to quickly offer affordable broadband data services to small and medium enterprise (SME) customers. Alvarion's BreezeMAX 3300 is an extension of its market leading WiMAX platform operating in 3.3GHz, the frequency band specifically licensed for WiMAX services in India.

"We conducted extensive technological, commercial and operational research before selecting Alvarion's BreezeMAX as the best WiMAX system for providing broadband services," said Mr. Jagdish Kini, Group Chief Executive Officer, Aircel. "We have pioneered India's wireless revolution by offering WiMAX along with a host of innovative enterprise services using BreezeMAX's built-in support for service level agreements (SLAs). We look forward to continuing to work with Alvarion as we expand our WiMAX offerings across India."

BreezeMAX is Alvarion's award-winning WiMAX Certified™ platform designed from the ground up according to the IEEE 802.16 standards and uses OFDM technology for advanced non-line-of-sight (NLOS) functionality. Its carrier-class design supports broadband speeds and quality of service (QoS) enabling carriers to offer triple play broadband services to thousands of subscribers in a single base station.

"Aircel is one of several WiMAX customers we have in APAC, a region identified long ago as having great potential for WiMAX due to its insatiable demand for broadband and general lack of infrastructure," said Tzvika Friedman, president and CEO of Alvarion. "Leveraging our widely deployed BreezeMAX system and deep technical capabilities, we were able to quickly and cost-effectively offer a WiMAX product in the specific spectrum available in India. We are very excited to help close the digital divide in such a large and important emerging market."

Since its launch in mid-2004, BreezeMAX has been successfully deployed in over 200 installations in more than 80 countries around the world.

About Aircel

Aircel Business Solutions (ABS), a part of Aircel, is headquartered in Chennai, India and is an ISO 9000 certified company. ABS is a registered member of WiMAX forum - both in the Indian and International Chapters. ABS' product range includes a host of cutting-edge enterprise solutions such as Multi Protocol Label Switching Virtual Private Networks (MPLS VPNs), Voice over Internet Protocol (VoIP) and Managed Video Services on wireless platform including WiMAX.

About Alvarion

With more than 2 million units deployed in 150 countries, Alvarion is the world's leading provider of innovative wireless network solutions enabling personal broadband services to improve lifestyles and productivity with portable and mobile data, VoIP, video and other applications. Providing systems to carriers, ISPs and private network operators, the company supplies solutions in both developed and developing countries.

Leading the WiMAX revolution, Alvarion has the most extensive deployments and proven product portfolio in the industry covering the full range of frequency bands with both fixed and mobile solutions. Alvarion's products enable the delivery of business and residential broadband access, corporate VPNs, toll quality telephony, mobile base station feeding, hotspot coverage extension, community interconnection, public safety communications, and mobile voice and data. Alvarion works with several global OEM providers and more than 200 local partners to support its diverse global customer base in solving their last-mile challenges.

As a wireless broadband pioneer, Alvarion has been driving and delivering innovations for more than 10 years from core technology developments to creating and promoting industry standards. Leveraging its key roles in the IEEE and HiperMAN standards committees and experience in deploying OFDM-based systems, the Company's prominent work in the WiMAX Forum™ is focused on increasing the widespread adoption of standards-based products in the wireless broadband market and leading the entire industry to mobile WiMAX solutions.
