Consider these risks before investing: International investing involves certain risks, such as currency fluctuations, economic instability, and political developments. Additional risks may be associated with emerging-market securities, including illiquidity and volatility. Lower-rated bonds may offer higher yields in return for more risk. Funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk. The use of derivatives involves additional risks, such as the potential inability to terminate or sell derivatives positions and the potential failure of the other party to the instrument to meet its obligations. Bond investments are subject to interest-rate risk, which means the prices of the fund's bond investments are likely to fall if interest rates rise. Bond investments also are subject to credit risk, which is the risk that the issuer of the bond may default on payment of interest or principal. Interest-rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds, which may be considered speculative. Unlike bonds, funds that invest in bonds have ongoing fees and expenses. The fund's shares trade on a stock exchange at market prices, which may be lower than the fund's net asset value. You can lose money by investing in the fund.

Message from the Trustees

Dear Fellow Shareholder:

Many macroeconomic risks to global growth have diminished in recent months. A widespread financial collapse in Europe, an economic hard landing in China, and significant fallout from budget sequestration and the fiscal cliff in the United States have not come to pass. While these risks have not entirely dissipated, U.S. equity markets have managed to achieve record highs in the first quarter, recouping all of their losses from the 2008 financial crisis.

In the United States, corporate profits and balance sheets are strong. The Federal Reserve has pledged to keep interest rates at historic lows until the nation's employment situation meaningfully improves. The U.S. housing market, a significant driver of GDP, has been steadily rebounding. And while the federal budget battle is not yet resolved, the markets appear to believe that Washington lawmakers will eventually reach a resolution.

At Putnam, our investment team employs a measured, balanced approach to managing risk while pursuing returns. It is also important to rely on the guidance of your financial advisor, who can help ensure that your portfolio matches your individual goals and tolerance for risk.

We would like to extend a welcome to new shareholders of the fund and to thank all of our investors for your continued confidence in Putnam.

Data are historical. Past performance does not guarantee future results. More recent returns may be less or more than those shown. Investment return and net asset value will fluctuate, and you may have a gain or a loss when you sell your shares. Performance assumes reinvestment of distributions and does not account for taxes. Fund returns in the bar chart are at NAV. See pages 5 and 11–12 for additional performance information, including fund returns at market price. Index and Lipper results should be compared with fund performance at NAV. Lipper calculates performance differently than the closed-end funds it ranks, due to varying methods for determining a fund's monthly reinvestment NAV.

**** Returns for the six-month period are not annualized, but cumulative.***

4 Master Intermediate Income Trust

Interview with your fund's portfolio manager

Bill, what was the bond market environment like during the six months ended March 31, 2013?

It was a strong period for the most credit-sensitive categories, particularly high-yield bonds and floating-rate bank-loan securities, which saw their yield spreads — their yield advantage over U.S. Treasuries — tighten further amid persistent investor demand and solid corporate fundamentals. These sectors were among the biggest beneficiaries of the improved risk sentiment that was spurred by global monetary easing during and prior to the period. With interest rates rising across most global developed markets, Treasuries, global government securities, and other defensive categories lagged, posting either negative or nominally positive returns.

Both at home and abroad, political leaders continued to grapple with fiscal challenges. While there were several events that produced negative headlines, including the government-spending sequester in the United States and the banking crisis in Cyprus, the fact that riskier assets performed well in an environment of policy and macroeconomic uncertainty suggests that investors are becoming more attuned to the opportunity cost of

remaining on the sidelines.

Against this backdrop, the fund outperformed its benchmark and the average return for its Lipper peer group.

This comparison shows your fund's performance in the context of broad market indexes for the six months ended 3/31/13. See pages 4 and 11–12 for additional fund performance information. Index descriptions can be found on pages 13–14.

Master Intermediate Income Trust 5

Turning to performance, the fund outpaced its benchmark by a sizable margin. What factors fueled this solid showing?

An out-of-benchmark stake in non-agency residential mortgage-backed securities [RMBS], along with our prepayment strategy, which was expressed through holdings of government-agency interest-only securities [agency IOs] hedged with agency mortgage pass-throughs, drove the fund's outperformance. Our holdings of non-agency RMBS performed very well during the period's first half, driven by investors' appetite for higher-yielding securities and by a strengthening U.S. housing market. Our prepayment strategy worked well as we focused our security selection in pools that we believed would experience fewer prepayments. At the same time, 10-year Treasury yields rose during the period's second half, further reducing borrowers' incentive to refinance and helping to keep mortgage prepayments at a relatively low level.

Elsewhere, strong security selection among commercial mortgage-backed securities [CMBS] also bolstered relative performance. Within CMBS, we held both AAA-rated and "seasoned mezzanine" securities. CMBS are created when an underwriter assembles a package of commercial mortgages and issues bonds of varying creditworthiness. AAA-rated CMBS occupy the top of the underwriter's capital structure, and thus offer the greatest principal protection. Mezzanine CMBS are slightly lower in the capital structure, but still provide a meaningful amount of principal protection along with

Credit qualities are shown as a percentage of the fund's net assets. A bond rated Baa or higher (Prime-3 or higher, for short-term debt) is considered investment grade. The chart reflects Moody's ratings; percentages may include bonds or derivatives not rated by Moody's but rated by Standard & Poor's (S&P) or, if unrated by S&P, by Fitch ratings, and then included in the closest equivalent Moody's rating. Ratings will vary over time.

Credit quality includes bonds and represents only the fixed-income portion of the portfolio. Derivative instruments, including forward currency contracts, are only included to the extent of any unrealized gain or loss on such instruments and are shown in the not-rated category. Cash is also shown in the not-rated category. The fund itself has not been rated by an independent rating agency.

6 Master Intermediate Income Trust

higher yields. The mezzanine bonds we selected were issued prior to 2006, when CMBS underwriting standards were stronger than they were later in the decade.

A meaningful allocation to high-yield bonds was another contributor, as the asset class rallied strongly in step with global equity markets and was one of the best-performing fixed-income sectors during the period. Security selection among emerging-market bonds provided a further boost versus the benchmark, led by our holdings in

Venezuela.

The fund's term structure positioning, by which I mean its duration — or interest-rate sensitivity — and yield-curve strategy, also aided relative results. We sought to limit the fund's interest-rate risk by maintaining a relatively short duration in the United States, while also positioning the fund to benefit should the yield curve steepen. While our duration stance slightly hampered performance, our steeper-yield-curve strategy proved beneficial and more than offset the negative impact of the fund's short duration.

How did your currency strategy affect performance?

Our active currency strategy, which is implemented with long and short positions using currency forward contracts, was another significant contributor during the period. The

This table shows the fund's top holdings across three key sectors and the percentage of the fund's net assets that each represented as of 3/31/13. Short-term holdings and derivatives, if any, are excluded. Holdings will vary over time.

Master Intermediate Income Trust 7

fund benefited from short positions in the Japanese yen, the British pound sterling, and the Swiss franc, combined with long positions in the Australian dollar and Mexican peso.

Which strategies detracted from results?

The only notable detractor was a large underweight in investment-grade corporate bonds, which was partially offset by favorable security selection within the sector, particularly among financial institutions.

How did you use derivatives during the period?

We used bond futures and interest-rate swaps — which allow two parties to exchange one stream of future interest payments for another, based on a specified principal amount — to take tactical positions at various points along the yield curve.

In addition, we employed interest-rate swaps and “swaptions” — which give us the option to enter into a swap contract — to hedge the interest-rate risk associated with our collateralized-mortgage-obligation [CMO] holdings. We also used total return swaps as a hedging tool and to help manage the fund's sector exposure, as well as credit default swaps to hedge the fund's credit risk.

Lastly, we used forward currency contracts to hedge the foreign exchange risk associated with non-U.S. bonds, and to efficiently gain exposure to foreign currencies as part of our active strategy involving global currency pairings.

What is your outlook for the coming months, and how are you positioning the fund?

We believe the U.S. economy remains solidly in a mid-cycle expansion, buoyed by stronger consumer spending, despite rising gasoline prices and higher payroll taxes. By boosting economic activity and underpinning firmer labor market conditions, the U.S. housing recovery is helping to offset the drag on consumers from fiscal austerity measures. During the six months through February, more than 10% of new jobs were in construction. Bank lending standards began

This chart shows how the fund's top weightings have changed over the past six months. Allocations are represented as a percentage of the fund's net assets. Current period summary information may differ from the portfolio

schedule included in the financial statements due to the inclusion of derivative securities, any interest accruals, the exclusion of as-of trades, if any, and the use of different classifications of securities for presentation purposes. Holdings and allocations may vary over time.

Cash positions may represent collateral used to cover certain derivative contracts.

8 Master Intermediate Income Trust

to loosen, helping to reinforce economic growth. That said, in our view, we do not see the economy growing strongly enough in the near term to cause the Federal Reserve to shift from its current accommodative monetary policy stance.

Outside the United States, Japan joined China in early-cycle recoveries, providing a lift to the rest of Asia. It appears that Germany's economy has begun to pick up, but much of the rest of Europe remains in recession. Business confidence measures fell in March, perhaps because of the poor handling of the banking crisis in Cyprus. The European Central Bank has revised its 2013 growth forecast downward and is anticipating a modest contraction while remaining concerned about downside risks to the eurozone economy.

Within this environment, we plan to continue de-emphasizing interest-rate risk in the portfolio and expect to maintain the fund's bias toward a steepening yield curve in the United States. As long as the Fed continues to inject liquidity into the financial system through targeted bond purchases, we don't believe that interest rates are likely to move significantly higher than where they are today. We recognize, however, that any strategy that relies on rates declining further to drive performance is risky amid what may be a range-bound and volatile interest-rate environment. For that reason, we intend to keep the portfolio's overall duration near zero and will rely on other factors to influence the fund's performance.

At period-end, our allocations to securitized sectors represented the fund's greatest overweight. In prepayment-sensitive areas, we are more cautious toward lower-coupon pass-throughs — those with coupons below 4% — but favor pools in the middle of the coupon range of 4%–5% that we believe exhibit favorable prepayment profiles. In credit-sensitive areas, we plan to maintain

A word about derivatives

Derivatives are an increasingly common type of investment instrument, the performance of which is *derived* from an underlying security, index, currency, or other area of the capital markets. Derivatives employed by the fund's managers generally serve one of two main purposes: to implement a strategy that may be difficult or more expensive to invest in through traditional securities, or to hedge unwanted risk associated with a particular position.

For example, the fund's managers might use currency forward contracts to capitalize on an anticipated change in exchange rates between two currencies. This approach would require a significantly smaller outlay of capital than purchasing traditional bonds denominated in the underlying currencies. In another example, the managers may identify a bond that they believe is undervalued relative to its risk of default, but may seek to reduce the interest-rate risk of that bond by using interest-rate swaps, a derivative through which two parties "swap" payments based on the movement of certain rates.

Like any other investment, derivatives may not appreciate in value and may lose money. Derivatives may amplify traditional investment risks through the creation of leverage and may be less liquid than traditional securities. And because derivatives typically represent contractual agreements between two financial institutions, derivatives entail "counterparty risk," which is the risk that the other party is unable or unwilling to pay. Putnam monitors the counterparty risks we assume. For example, Putnam may enter into collateral agreements that require the counterparties to post collateral on a regular basis to cover their obligations to the fund.

our diversified exposure to CMBS, as well as our allocations to high-yield bonds and investment-grade corporate bonds.

Thanks for your time and for bringing us up to date, Bill.

The views expressed in this report are exclusively those of Putnam Management and are subject to change. They are not meant as investment advice.

Please note that the holdings discussed in this report may not have been held by the fund for the entire period. Portfolio composition is subject to review in accordance with the fund's investment strategy and may vary in the future. Current and future portfolio holdings are subject to risk.

Portfolio Manager **D. William Kohli** is Co-Head of Fixed Income at Putnam. He has an M.B.A. from the Haas School of Business at the University of California, Berkeley, and a B.A. from the University of California, San Diego. Bill joined Putnam in 1994 and has been in the investment industry since 1986.

In addition to Bill, your fund's portfolio managers are Michael J. Atkin, Kevin F. Murphy, Michael V. Salm, and Paul D. Scanlon, CFA.

IN THE NEWS

The economic outlook for major industrialized nations is slowly improving, with the United States and Japan leading the way, according to a recent report by the Organisation for Economic Co-operation and Development (OECD). Economic expansion is also taking place in most major countries around the world, including the 17-nation eurozone, where Germany's economy is growing and stabilization is occurring in Italy and France. Growth also is solidifying in Japan, whose new government has launched efforts to bring the country's long-stagnant economy back to life through various stimulus efforts, and growth is picking up in China, where an economic hard landing has been avoided. The OECD sees growth weakening in India and normal, "around trend" growth taking place in Russia, Brazil, and the United Kingdom. Meanwhile, the World Trade Organization (WTO) has cut its overall 2013 forecast for global trade volume growth to 3.3% from 4.5%. Global trade grew by 2% in 2012, the second-worst figure since this economic statistic began to be tracked in 1981, according to the WTO. The worst trade figure came in 2009 during the global economic crisis.

10 Master Intermediate Income Trust

Your fund's performance

This section shows your fund's performance, price, and distribution information for periods ended March 31, 2013, the end of the first half of its current fiscal year. Performance should always be considered in light of a fund's investment strategy. Data represent past performance. Past performance does not guarantee future results. More recent returns may be less or more than those shown. Investment return, net asset value, and market price will fluctuate, and you may have a gain or a loss when you sell your shares.

Fund performance Total return for periods ended 3/31/13

	NAV	Market price
Annual average		
Life of fund (since 4/29/88)	7.31%	6.65%
10 years	97.06	90.13
Annual average	7.02	6.64
5 years	41.27	40.86

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-CSRS

Annual average	7.15	7.09
3 years	21.91	5.03
Annual average	6.83	1.65
1 year	9.89	7.63
6 months	7.23	3.64

Performance assumes reinvestment of distributions and does not account for taxes.

Comparative index returns For periods ended 3/31/13

	Barclays Government/Credit Bond Index	Citigroup Non-U.S. World Government Bond Index	JPMorgan Global High Yield Index†	Lipper Flexible Income Funds (closed-end) category average*
Annual average				
Life of fund (since 4/29/88)	7.16%	6.30%	—	6.98%
10 years	63.78	72.15	166.95%	94.35
Annual average	5.06	5.58	10.32	6.85
5 years	30.69	11.92	74.38	46.12
Annual average	5.50	2.28	11.76	7.84
3 years	19.44	10.34	39.03	27.25
Annual average	6.10	3.33	11.61	8.34
1 year	4.56	-2.16	13.06	10.24
6 months	0.21	-6.09	6.43	5.47

Index and Lipper results should be compared with fund performance at net asset value. Lipper calculates performance differently than the closed-end funds it ranks, due to varying methods for determining a fund's monthly reinvestment net asset value.

* Over the 6-month, 1-year, 3-year, 5-year, 10-year, and life-of-fund periods ended 3/31/13, there were 5, 5, 5, 4, 3, and 2 funds, respectively, in this Lipper category.

† The JPMorgan Global High Yield Index was introduced on 12/31/93, which postdates the fund's inception.

Fund price and distribution information For the six-month period ended 3/31/13**Distributions**

Number	6
Income	\$0.156000
Capital gains	—
Total	\$0.156000

3/31/13	5.64	5.21

Current rate (end of period)	NAV	Market Price
Current dividend rate*	5.53%	5.99%

The classification of distributions, if any, is an estimate. Final distribution information will appear on your year-end tax forms.

* Most recent distribution, excluding capital gains, annualized and divided by NAV or market price at end of period.

12 Master Intermediate Income Trust

Terms and definitions**Important terms**

Total return shows how the value of the fund's shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund's assets, minus any liabilities, divided by the number of outstanding shares.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on exchanges such as the New York Stock Exchange.

Fixed-income terms

Current yield is the annual rate of return earned from dividends or interest of an investment. Current yield is expressed as a percentage of the price of a security, fund share, or principal investment.

Mortgage-backed security (MBS), also known as a mortgage “pass-through,” is a type of asset-backed security that is secured by a mortgage or collection of mortgages. The following are types of MBSs:

- **Agency “pass-throughs”** its principal and interest backed by a U.S. government agency, such as the Federal National Mortgage Association (Fannie Mae), Government National Mortgage Association (Ginnie Mae), and Federal Home Loan Mortgage Corporation (Freddie Mac).
- **Collateralized mortgage obligation (CMO)** represents claims to specific cash flows from pools of home mortgages. The streams of principal and interest payments on the mortgages are distributed to the different classes of CMO interests in “tranches.” Each tranche may have different principal balances, coupon rates, prepayment risks, and maturity dates. A CMO is highly sensitive to changes in interest rates and any resulting change in the rate at which homeowners sell their properties, refinance, or otherwise prepay loans. CMOs are subject to prepayment, market, and liquidity risks.
- **Interest-only (IO) security** is a type of CMO in which the underlying asset is the interest portion of mortgage, Treasury, or bond payments.
- **Non-agency residential mortgage-backed security (RMBS)** is an MBS not backed by Fannie Mae, Ginnie Mae, or Freddie Mac. One type of RMBS is an Alt-A mortgage-backed security.
- **Commercial mortgage-backed security (CMBS)** is secured by the loan on a commercial property.

Yield curve is a graph that plots the yields of bonds with equal credit quality against their differing maturity dates, ranging from shortest to longest. It is used as a benchmark for other debt, such as mortgage or bank lending rates.

Comparative indexes

Barclays Government/Credit Bond Index is an unmanaged index of U.S. Treasuries, agency securities, and investment-grade corporate bonds.

Barclays U.S. Aggregate Bond Index is an unmanaged index of U.S. investment-grade fixed-income securities.

BofA (Bank of America) Merrill Lynch U.S. 3-Month Treasury Bill Index is an unmanaged index that seeks to measure the performance of U.S. Treasury bills available in the marketplace.

Citigroup Non-U.S. World Government Bond Index is an unmanaged index generally considered to be representative of the world bond market excluding the United States.

JPMorgan Global High Yield Index is an unmanaged index that is designed to mirror the investable universe of the U.S. dollar global high-yield corporate debt market, including domestic (U.S.) and international (non-U.S.) issues. International issues are composed of both developed and emerging markets.

Master Intermediate Income Trust 13

S&P 500 Index is an unmanaged index of common stock performance.

Indexes assume reinvestment of all distributions and do not account for fees. Securities and performance of a fund and an index will differ. You cannot invest directly in an index.

Lipper is a third-party industry-ranking entity that ranks mutual funds. Its rankings do not reflect sales charges. Lipper rankings are based on total return at net asset value relative to other funds that have similar current investment styles or objectives as determined by Lipper. Lipper may change a fund's category assignment at its discretion. Lipper category averages reflect performance trends for funds within a category.

Other information for shareholders

Important notice regarding share repurchase program

In September 2012, the Trustees of your fund approved the renewal of a share repurchase program that had been in effect since 2005. This renewal will allow your fund to repurchase, in the 12 months beginning October 8, 2012, up to 10% of the fund's common shares outstanding as of October 7, 2012.

Important notice regarding delivery of shareholder documents

In accordance with Securities and Exchange Commission (SEC) regulations, Putnam sends a single copy of annual and semiannual shareholder reports, prospectuses, and proxy statements to Putnam shareholders who share the same address, unless a shareholder requests otherwise. If you prefer to receive your own copy of these documents, please call Putnam at 1-800-225-1581, and Putnam will begin sending individual copies within 30 days.

Proxy voting

Putnam is committed to managing our mutual funds in the best interests of our shareholders. The Putnam funds' proxy voting guidelines and procedures, as well as information regarding how your fund voted proxies relating to portfolio securities during the 12-month period ended June 30, 2012, are available in the Individual Investors section of putnam.com, and on the SEC's website, www.sec.gov. If you have questions about finding forms on the SEC's website, you may call the SEC at 1-800-SEC-0330. You may also obtain the Putnam funds' proxy voting guidelines and procedures at no charge by calling Putnam's Shareholder Services at 1-800-225-1581.

Fund portfolio holdings

The fund will file a complete schedule of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. Shareholders may obtain the fund's Forms N-Q on the SEC's website at www.sec.gov. In addition, the fund's Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. You may call the SEC at 1-800-SEC-0330 for information about the SEC's website or the operation of the Public Reference Room.

Trustee and employee fund ownership

Putnam employees and members of the Board of Trustees place their faith, confidence, and, most importantly, investment dollars in Putnam mutual funds. As of March 31, 2013, Putnam employees had approximately \$377,000,000 and the Trustees had approximately \$90,000,000 invested in Putnam mutual funds. These amounts include investments by the Trustees' and employees' immediate family members as well as investments through retirement and deferred compensation plans.

Financial statements

A guide to financial statements

These sections of the report, as well as the accompanying Notes, constitute the fund's financial statements.

The fund's portfolio lists all the fund's investments and their values as of the last day of the reporting period. Holdings are organized by asset type and industry sector, country, or state to show areas of concentration and diversification.

Statement of assets and liabilities shows how the fund's net assets and share price are determined. All investment and non-investment assets are added together. Any unpaid expenses and other liabilities are subtracted from this total. The result is divided by the number of shares to determine the net asset value per share. (For funds with preferred shares, the amount subtracted from total assets includes the liquidation preference of preferred shares.)

Statement of operations shows the fund's net investment gain or loss. This is done by first adding up all the fund's earnings — from dividends and interest income — and subtracting its operating expenses to determine net investment income (or loss). Then, any net gain or loss the fund realized on the sales of its holdings — as well as any unrealized gains or losses over the period — is added to or subtracted from the net investment result to determine the fund's net gain or loss for the fiscal period.

Statement of changes in net assets shows how the fund's net assets were affected by the fund's net investment gain or loss, by distributions to shareholders, and by changes in the number of the fund's shares. It lists distributions and their sources (net investment income or realized capital gains) over the current reporting period and the most recent fiscal year-end. The distributions listed here may not match the sources listed in the Statement of operations because the distributions are determined on a tax basis and may be paid in a different period from the one in which they were earned. Dividend sources are estimated at the time of declaration. Actual results may vary. Any non-taxable return of capital cannot be determined until final tax calculations are completed after the end of the fund's fiscal year.

Financial highlights provide an overview of the fund's investment results, per-share distributions, expense ratios, net investment income ratios, and portfolio turnover in one summary table, reflecting the five most recent reporting periods. In a semiannual report, the highlights table also includes the current reporting period.

Notes to the fund's portfolio

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-CSRS

Unless noted otherwise, the notes to the fund's portfolio are for the close of the fund's reporting period, which ran from October 1, 2012 through March 31, 2013 (the reporting period). Within the following notes to the portfolio, references to "ASC 820" represent Accounting Standards Codification ASC 820 *Fair Value Measurements and Disclosures* and references to "OTC", if any, represent over-the-counter.

* Percentages indicated are based on net assets of \$370,651,315.

† Non-income-producing security.

‡ Income may be received in cash or additional securities at the discretion of the issuer.

This security, in part or in entirety, was pledged and segregated with the broker to cover margin requirements for futures contracts at the close of the reporting period.

Δ This security, in part or in entirety, was pledged and segregated with the custodian for collateral on certain derivative contracts at the close of the reporting period.

Master Intermediate Income Trust 45

Forward commitment, in part or in entirety (Note 1).

⊠ Senior loans are exempt from registration under the Securities Act of 1933, as amended, but contain certain restrictions on resale and cannot be sold publicly. These loans pay interest at rates which adjust periodically. The interest rates shown for senior loans are the current interest rates at the close of the reporting period. Senior loans are also subject to mandatory and/or optional prepayment which cannot be predicted. As a result, the remaining maturity may be substantially less than the stated maturity shown (Notes 1 and 7).

⊡ Is valued at fair value following procedures approved by the Trustees. Securities may be classified as Level 2 or Level 3 for ASC 820 based on the securities' valuation inputs.

⊢ Affiliated company (Note 6). The rate quoted in the security description is the annualized 7-day yield of the fund at the close of the reporting period.

⊣ Security was pledged, or purchased with cash that was pledged, to the fund for collateral on certain derivatives contracts. The rate quoted in the security description is the annualized 7-day yield of the fund at the close of the reporting period (Note 1).

⊤ Real Estate Investment Trust.

At the close of the reporting period, the fund maintained liquid assets totaling \$111,590,956 to cover certain derivatives contracts.

Debt obligations are considered secured unless otherwise indicated.

144A after the name of an issuer represents securities exempt from registration under Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

See Note 1 to the financial statements regarding TBA's.

The dates shown on debt obligations are the original maturity dates.

*Payments related to the referenced debt are made upon a credit default event.

**Upfront premium is based on the difference between the original spread on issue and the market spread on day of execution.

***Ratings are presented for credit default contracts in which the fund has sold protection on the underlying referenced debt. Ratings for an underlying index represent the average of the ratings of all the securities included in that index. The Moody's, Standard & Poor's or Fitch ratings are believed to be the most recent ratings available at March 31, 2013. Securities rated by Putnam are indicated by "/P." Securities rated by Fitch are indicated by "/F."

72 Master Intermediate Income Trust

ASC 820 establishes a three-level hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of the fund's investments. The three levels are defined as follows:

Level 1: Valuations based on quoted prices for identical securities in active markets.

Level 2: Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3: Valuations based on inputs that are unobservable and significant to the fair value measurement.

The following is a summary of the inputs used to value the fund's net assets as of the close of the reporting period:

	Valuation inputs		
Investments in securities:	Level 1	Level 2	Level 3
Common stocks:			
Consumer cyclicals	\$189,708	\$376	\$2,622
Total common stocks	189,708	376	2,622
Convertible bonds and notes	\$—	\$404,840	\$—

The accompanying notes are an integral part of these financial statements.

Master Intermediate Income Trust 77

Notes to financial statements 3/31/13 (Unaudited)

Within the following Notes to financial statements, references to “State Street” represent State Street Bank and Trust Company, references to “the SEC” represent the Securities and Exchange Commission, references to “Putnam Management” represent Putnam Investment Management, LLC, the fund’s manager, an indirect wholly-owned subsidiary of Putnam Investments, LLC and references to “OTC”, if any, represent over-the-counter. Unless otherwise noted, the “reporting period” represents the period from October 1, 2012 through March 31, 2013.

Putnam Master Intermediate Income Trust (the fund) is a Massachusetts business trust, which is registered under the Investment Company Act of 1940, as amended, as a closed-end management investment company and is authorized to issue an unlimited number of shares. The investment objective of the fund is to seek, with equal emphasis, high current income and relative stability of net asset value, by allocating its investments among the U.S. investment grade sector, high-yield sector and international sector.

In the normal course of business, the fund enters into contracts that may include agreements to indemnify another party under given circumstances. The fund’s maximum exposure under these arrangements is unknown as this would involve future claims that may be, but have not yet been, made against the fund. However, the fund’s management team expects the risk of material loss to be remote.

Note 1: Significant accounting policies

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The preparation of financial statements is in conformity with accounting principles generally accepted in the United States of America and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations. Actual results could differ from those estimates. Subsequent events after the Statement of assets and liabilities date through the date that the financial statements were issued have been evaluated in the preparation of the financial statements.

Security valuation Investments for which market quotations are readily available are valued at the last reported sales price on their principal exchange, or official closing price for certain markets, and are classified as Level 1 securities under Accounting Standards Codification ASC 820 Fair Value Measurements and Disclosures (ASC 820). If no sales are reported, as in the case of some securities that are traded OTC, a security is valued at its last reported bid price and is generally categorized as a Level 2 security.

Investments in open-end investment companies (excluding exchange traded funds), if any, which can be classified as Level 1 or Level 2 securities, are based on their net asset value. The net asset value of such investment companies equals the total value of their assets less their liabilities and divided by the number of their outstanding shares.

Market quotations are not considered to be readily available for certain debt obligations and other investments; such investments are valued on the basis of valuations furnished by an independent pricing service approved by the Trustees or dealers selected by Putnam Management. Such services or dealers determine valuations for normal institutional-size trading units of such securities using methods based on market transactions for comparable securities and various relationships, generally recognized by institutional traders, between securities (which considers such factors as security prices, yields, maturities and ratings). These securities will generally be categorized as Level 2.

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-CSRS

Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore the closing prices for securities in such markets or on such exchanges may not fully reflect events that occur after such close but before the close of the New York Stock Exchange. Accordingly, on certain days, the fund will fair value foreign equity securities taking into account multiple factors including movements in the U.S. securities markets, currency valuations and comparisons to the valuation of American Depository Receipts, exchange-traded funds and futures contracts. These securities, which would generally be classified as Level 1 securities, will be transferred to Level 2 of the fair value hierarchy when they are valued at fair value. The number of days on which fair value prices will be used will depend on market activity and it is possible that fair value prices will be used by the fund to a significant extent. Securities quoted in foreign currencies, if any, are translated into U.S. dollars at the current exchange rate.

To the extent a pricing service or dealer is unable to value a security or provides a valuation that Putnam Management does not believe accurately reflects the security's fair value, the security will be valued at fair value by Putnam Management. Certain investments, including certain restricted and illiquid securities and derivatives, are

78 Master Intermediate Income Trust

also valued at fair value following procedures approved by the Trustees. These valuations consider such factors as significant market or specific security events such as interest rate or credit quality changes, various relationships with other securities, discount rates, U.S. Treasury, U.S. swap and credit yields, index levels, convexity exposures and recovery rates. These securities are classified as Level 2 or as Level 3 depending on the priority of the significant inputs.

Such valuations and procedures are reviewed periodically by the Trustees. Certain securities may be valued on the basis of a price provided by a single source. The fair value of securities is generally determined as the amount that the fund could reasonably expect to realize from an orderly disposition of such securities over a reasonable period of time. By its nature, a fair value price is a good faith estimate of the value of a security in a current sale and does not reflect an actual market price, which may be different by a material amount.

Security transactions and related investment income Security transactions are recorded on the trade date (the date the order to buy or sell is executed). Gains or losses on securities sold are determined on the identified cost basis. Interest income, net of any applicable withholding taxes, is recorded on the accrual basis. Dividend income, net of any applicable withholding taxes, is recognized on the ex-dividend date except that certain dividends from foreign securities, if any, are recognized as soon as the fund is informed of the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Dividends representing a return of capital or capital gains, if any, are reflected as a reduction of cost and/or as a realized gain. All premiums/discounts are amortized/accreted on a yield-to-maturity basis.

Securities purchased or sold on a delayed delivery basis may be settled a month or more after the trade date; interest income is accrued based on the terms of the securities. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract. The fund earned certain fees in connection with its senior loan purchasing activities. These fees are treated as market discount and are amortized into income in the Statement of operations.

Stripped securities The fund may invest in stripped securities which represent a participation in securities that may be structured in classes with rights to receive different portions of the interest and principal. Interest-only securities receive all of the interest and principal-only securities receive all of the principal. If the interest-only securities experience greater than anticipated prepayments of principal, the fund may fail to recoup fully its initial investment in these securities. Conversely, principal-only securities increase in value if prepayments are greater than anticipated and decline if prepayments are slower than anticipated. The market value of these securities is highly sensitive to changes in interest rates.

Foreign currency translation The accounting records of the fund are maintained in U.S. dollars. The market value of foreign securities, currency holdings, and other assets and liabilities is recorded in the books and records of the fund after translation to U.S. dollars based on the exchange rates on that day. The cost of each security is determined using historical exchange rates. Income and withholding taxes are translated at prevailing exchange rates when earned or incurred. The fund does not isolate that portion of realized or unrealized gains or losses resulting from changes in the foreign exchange rate on investments from fluctuations arising from changes in the market prices of the securities. Such gains and losses are included with the net realized and unrealized gain or loss on investments. Net realized gains and losses on foreign currency transactions represent net realized exchange gains or losses on closed forward currency contracts, disposition of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions and the difference between the amount of investment income and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized appreciation and depreciation of assets and liabilities in foreign currencies arise from changes in the value of open forward currency contracts and assets and liabilities other than investments at the period end, resulting from changes in the exchange rate.

Options contracts The fund uses options contracts to isolate prepayment risk.

The potential risk to the fund is that the change in value of options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, if there is an illiquid secondary market for the contracts, if interest or exchange rates move unexpectedly or if the counterparty to the contract is unable to perform. Realized gains and losses on purchased options are included in realized gains and losses on investment securities. If a written call option is exercised, the premium originally received is recorded as an addition to sales proceeds. If a written put option is exercised, the premium originally received is recorded as a reduction to the cost of investments.

Master Intermediate Income Trust 79

Exchange traded options are valued at the last sale price or, if no sales are reported, the last bid price for purchased options and the last ask price for written options. OTC traded options are valued using prices supplied by dealers. Forward premium swap option contracts include premiums that do not settle until the expiration date of the contract. The delayed settlement of the premiums are factored into the daily valuation of the option contracts.

Written option contracts outstanding at period end, if any, are listed after the fund's portfolio. For the fund's average contract amount, see Note 5.

Futures contracts The fund uses futures contracts to gain exposure to interest rates and to manage exposure to market risk.

The potential risk to the fund is that the change in value of futures contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, if there is an illiquid secondary market for the contracts, if interest or exchange rates move unexpectedly or if the counterparty to the contract is unable to perform. With futures, there is minimal counterparty credit risk to the fund since futures are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default. Risks may exceed amounts recognized on the Statement of assets and liabilities. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. The fund and the broker agree to exchange an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin."

Futures contracts outstanding at period end, if any, are listed after the fund's portfolio. For the fund's average number of contracts, see Note 5.

Forward currency contracts The fund buys and sells forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to hedge foreign exchange risk and to gain exposure on currency.

The U.S. dollar value of forward currency contracts is determined using current forward currency exchange rates supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is marked to market daily and the change in market value is recorded as an unrealized gain or loss. The fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed when the contract matures or by delivery of the currency. The fund could be exposed to risk if the value of the currency changes unfavorably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the fund is unable to enter into a closing position. Risks may exceed amounts recognized on the Statement of assets and liabilities.

Forward currency contracts outstanding at period end, if any, are listed after the fund's portfolio. For the fund's average contract amount, see Note 5.

Interest rate swap contracts The fund entered into OTC and/or centrally cleared interest rate swap contracts, which are arrangements between two parties to exchange cash flows based on a notional principal amount, to hedge interest rate risk and to gain exposure on interest rates.

An OTC interest rate swap can be purchased or sold with an upfront premium. An upfront payment received by the fund is recorded as a liability on the fund's books. An upfront payment made by the fund is recorded as an asset on the fund's books. OTC and centrally cleared interest rate swap contracts are marked to market daily based upon quotations from an independent pricing service or market makers. Any change is recorded as an unrealized gain or loss on OTC interest rate swaps. Daily fluctuations in the value of centrally cleared interest rate swaps are recorded as a receivable or payable for variation margin on the Statement of assets and liabilities. Payments, including upfront premiums, received or made are recorded as realized gains or losses at the closing of the contract. Certain OTC and centrally cleared interest rate swap contracts may include extended

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-CSRS

effective dates. Payments related to these swap contracts are accrued based on the terms of the contract.

The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or if the counterparty defaults, in the case of OTC interest rate contracts, or the central clearing agency or a clearing member defaults, in the case of centrally cleared interest rate swap contracts, on its respective obligation to perform under the contract. The fund's maximum risk of loss from counterparty risk or central clearing risk, is the fair value of the contract. This risk may be mitigated for OTC interest rate swap contracts by having a master netting arrangement between the fund and the counterparty and for centrally cleared interest rate swap contracts

80 Master Intermediate Income Trust

through the daily exchange of mark to market margin. There is minimal counterparty risk with respect to centrally cleared interest rate swap contracts due to the clearinghouse guarantee fund and other resources that are available in the event of a clearing member default. Risk of loss may exceed amounts recognized on the Statement of assets and liabilities.

Interest rate swap contracts outstanding at period end, if any, are listed after the fund's portfolio. For the fund's average notional amount see Note 5.

Total return swap contracts The fund entered into OTC total return swap contracts, which are arrangements to exchange a market linked return for a periodic payment, both based on a notional principal amount, to hedge sector exposure, to manage exposure to specific sectors or industries, to gain exposure to specific sectors or industries, and to hedge inflation in specific regions or countries.

To the extent that the total return of the security, index or other financial measure underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the fund will receive a payment from or make a payment to the counterparty. OTC total return swap contracts are marked to market daily based upon quotations from an independent pricing service or market makers and the change, if any, is recorded as an unrealized gain or loss. Payments received or made are recorded as realized gains or losses. Certain OTC total return swap contracts may include extended effective dates. Payments related to these swap contracts are accrued based on the terms of the contract. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or in the price of the underlying security or index, the possibility that there is no liquid market for these agreements or that the counterparty may default on its obligation to perform. The fund's maximum risk of loss from counterparty risk is the fair value of the contract. This risk may be mitigated by having a master netting arrangement between the fund and the counterparty. Risk of loss may exceed amounts recognized on the Statement of assets and liabilities.

OTC total return swap contracts outstanding at period end, if any, are listed after the fund's portfolio. For the fund's average notional amount, see Note 5.

Credit default contracts The fund entered into OTC credit default contracts to hedge credit risk, to gain exposure on individual names and/or baskets of securities, and to hedge market risk.

In an OTC credit default contract, the protection buyer typically makes an up front payment and a periodic stream of payments to a counterparty, the protection seller, in exchange for the right to receive a contingent payment upon the occurrence of a credit event on the reference obligation or all other equally ranked obligations of the reference entity. Credit events are contract specific but may include bankruptcy, failure to pay, restructuring and obligation acceleration. An upfront payment received by the fund is recorded as a liability on the fund's books. An upfront payment made by the fund is recorded as an asset on the fund's books. Periodic payments received or paid by the fund are recorded as realized gains or losses. The OTC credit default contracts are marked to market daily based upon quotations from an independent pricing service or market makers and the change, if any, is recorded as an unrealized gain or loss. Upon the occurrence of a credit event, the difference between the par value and market value of the reference obligation, net of any proportional amount of the upfront payment, is recorded as a realized gain or loss.

In addition to bearing the risk that the credit event will occur, the fund could be exposed to market risk due to unfavorable changes in interest rates or in the price of the underlying security or index or the possibility that the fund may be unable to close out its position at the same time or at the same price as if it had purchased the underlying reference obligations. In certain circumstances, the fund may enter into offsetting OTC credit default contracts which would mitigate its risk of loss. Risks of loss may exceed amounts recognized on the Statement of assets and liabilities. The fund's maximum risk of loss from counterparty risk, either as the protection seller or as the protection buyer, is the fair value of the contract. This risk may be mitigated by having a master netting arrangement between the fund and the counterparty. Where the fund is a seller of protection, the maximum potential amount of future payments the fund may be required to make is equal to the notional amount of the relevant OTC credit default contract.

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-CSRS

OTC credit default contracts outstanding, including their respective notional amounts at period end, if any, are listed after the fund's portfolio. For the fund's average notional amount, see Note 5.

Master agreements The fund is a party to ISDA (International Swaps and Derivatives Association, Inc.) Master Agreements (Master Agreements) with certain counterparties that govern OTC derivative and foreign exchange contracts entered into from time to time. The Master Agreements may contain provisions regarding, among other things, the parties' general obligations, representations, agreements, collateral requirements, events of default and

Master Intermediate Income Trust 81

early termination. With respect to certain counterparties, in accordance with the terms of the Master Agreements, collateral posted to the fund is held in a segregated account by the fund's custodian and with respect to those amounts which can be sold or repledged, are presented in the fund's portfolio. Collateral posted to the fund which cannot be sold or repledged totaled \$166,605 at the close of the reporting period.

Collateral pledged by the fund is segregated by the fund's custodian and identified in the fund's portfolio. Collateral can be in the form of cash or debt securities issued by the U.S. Government or related agencies or other securities as agreed to by the fund and the applicable counterparty. Collateral requirements are determined based on the fund's net position with each counterparty.

Termination events applicable to the fund may occur upon a decline in the fund's net assets below a specified threshold over a certain period of time. Termination events applicable to counterparties may occur upon a decline in the counterparty's long-term and short-term credit ratings below a specified level. In each case, upon occurrence, the other party may elect to terminate early and cause settlement of all derivative and foreign exchange contracts outstanding, including the payment of any losses and costs resulting from such early termination, as reasonably determined by the terminating party. Any decision by one or more of the fund's counterparties to elect early termination could impact the fund's future derivative activity.

At the close of the reporting period, the fund had a net liability position of \$2,066,548 on open derivative contracts subject to the Master Agreements. Collateral posted by the fund for these agreements totaled \$2,167,505.

TBA purchase commitments The fund may enter into TBA (to be announced) commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalized. However, it is anticipated that the amount of the commitments will not significantly differ from the principal amount. The fund holds, and maintains until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the fund may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities themselves, and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date, which risk is in addition to the risk of decline in the value of the fund's other assets. Unsettled TBA purchase commitments are valued at fair value of the underlying securities, according to the procedures described under "Security valuation" above. The contract is marked to market daily and the change in market value is recorded by the fund as an unrealized gain or loss.

Although the fund will generally enter into TBA purchase commitments with the intention of acquiring securities for its portfolio or for delivery pursuant to options contracts it has entered into, the fund may dispose of a commitment prior to settlement if Putnam Management deems it appropriate to do so.

TBA sale commitments The fund may enter into TBA sale commitments to hedge its portfolio positions or to sell mortgage-backed securities it owns under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities, or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction.

Unsettled TBA sale commitments are valued at the fair value of the underlying securities, generally according to the procedures described under "Security valuation" above. The contract is marked to market daily and the change in market value is recorded by the fund as an unrealized gain or loss. If the TBA sale commitment is closed through the acquisition of an offsetting TBA purchase commitment, the fund realizes a gain or loss. If the fund delivers securities under the commitment, the fund realizes a gain or a loss from the sale of the securities based upon the unit price established at the date the commitment was entered into. TBA sale commitments outstanding at period end, if any, are listed after the fund's portfolio.

Interfund lending The fund, along with other Putnam funds, may participate in an interfund lending program pursuant to an exemptive order issued by the SEC. This program allows the fund to lend to other Putnam funds that permit such transactions. Interfund lending transactions are subject to each fund's investment policies and borrowing and lending limits. Interest earned or paid on the interfund lending transaction will be based on the average of certain current market rates. During the reporting

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-CSRS

period, the fund did not utilize the program.

Federal taxes It is the policy of the fund to distribute all of its taxable income within the prescribed time period and otherwise comply with the provisions of the Internal Revenue Code of 1986, as amended (the Code), applicable to regulated investment companies. It is also the intention of the fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Code.

82 Master Intermediate Income Trust

The fund is subject to the provisions of Accounting Standards Codification ASC 740 *Income Taxes* (ASC 740). ASC 740 sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. The fund did not have a liability to record for any unrecognized tax benefits in the accompanying financial statements. No provision has been made for federal taxes on income, capital gains or unrealized appreciation on securities held nor for excise tax on income and capital gains. Each of the fund's federal tax returns for the prior three fiscal years remains subject to examination by the Internal Revenue Service.

The fund may also be subject to taxes imposed by governments of countries in which it invests. Such taxes are generally based on either income or gains earned or repatriated. The fund accrues and applies such taxes to net investment income, net realized gains and net unrealized gains as income and/or capital gains are earned. In some cases, the fund may be entitled to reclaim all or a portion of such taxes, and such reclaim amounts, if any, are reflected as an asset on the fund's books. In many cases, however, the fund may not receive such amounts for an extended period of time, depending on the country of investment.

At September 30, 2012, the fund had a capital loss carryover of \$95,760,219 available to the extent allowed by the Code to offset future net capital gain, if any. The amounts of the carryovers and the expiration dates are:

Loss carryover

Short-term	Long-term	Total	Expiration
\$1,369,084	\$1,272,753	\$2,641,837	*
7,342,291	N/A	7,342,291	September 30, 2015
11,586,218	N/A	11,586,218	September 30, 2016
28,970,279	N/A	28,970,279	September 30, 2017
45,219,594	N/A	45,219,594	September 30, 2018

* Under the Regulated Investment Company Modernization Act of 2010, the fund will be permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 for an unlimited period. However, any losses incurred will be required to be utilized prior to the losses incurred in pre-enactment tax years. As a result of this ordering rule, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under previous law.

Pursuant to federal income tax regulations applicable to regulated investment companies, the fund has elected to defer certain capital losses of \$46,268,746 recognized during the period between November 1, 2011 and September 30, 2012 to its fiscal year ending September 30, 2013.

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-CSRS

The aggregate identified cost on a tax basis is \$476,817,358, resulting in gross unrealized appreciation and depreciation of \$13,110,991 and \$5,346,853, respectively, or net unrealized appreciation of \$7,764,138.

Distributions to shareholders Distributions to shareholders from net investment income are recorded by the fund on the ex-dividend date. Distributions from capital gains, if any, are recorded on the ex-dividend date and paid at least annually. The amount and character of income and gains to be distributed are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. Dividend sources are estimated at the time of declaration. Actual results may vary. Any non-taxable return of capital cannot be determined until final tax calculations are completed after the end of the fund's fiscal year. Reclassifications are made to the fund's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations.

Master Intermediate Income Trust 83

Note 2: Management fee, administrative services and other transactions

The fund pays Putnam Management for management and investment advisory services quarterly based on the average net assets (including assets, but excluding liabilities, attributable to leverage for investment purposes) of the fund. The fee is based on the following annual rates:

0.75%	of the first \$500 million,	0.48%	of the next \$5 billion,
0.65%	of the next \$500 million,	0.47%	of the next \$5 billion,
0.60%	of the next \$500 million,	0.46%	of the next \$5 billion,
0.55%	of the next \$5 billion,	0.45%	of the next \$5 billion,
0.525%	of the next \$5 billion,	0.44%	of the next \$5 billion,
0.505%	of the next \$5 billion,	0.43%	of the next \$8.5 billion and
0.49%	of the next \$5 billion,	0.42%	of any excess thereafter.

Putnam Investments Limited (PIL), an affiliate of Putnam Management, is authorized by the Trustees to manage a separate portion of the assets of the fund as determined by Putnam Management from time to time. Putnam Management pays a quarterly sub-management fee to PIL for its services at an annual rate of 0.40% of the average net assets (including assets, but excluding liabilities, attributable to leverage for investment purposes) of the portion of the fund managed by PIL.

The fund reimburses Putnam Management an allocated amount for the compensation and related expenses of certain officers of the fund and their staff who provide administrative services to the fund. The aggregate amount of all such reimbursements is determined annually by the Trustees.

Custodial functions for the fund's assets are provided by State Street. Custody fees are based on the fund's asset level, the number of its security holdings and transaction volumes.

Putnam Investor Services, Inc., an affiliate of Putnam Management, provided investor servicing agent functions to the fund. Putnam Investor Services, Inc. was paid a monthly fee for investor servicing at an annual rate of 0.05% of the fund's average net assets. The amounts incurred for investor servicing agent functions during the reporting period are included in Investor servicing fees in the Statement of operations.

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-CSRS

The fund has entered into expense offset arrangements with Putnam Investor Services, Inc. and State Street whereby Putnam Investor Services, Inc. and State Street's fees are reduced by credits allowed on cash balances. For the reporting period, the fund's expenses were reduced by \$200 under the expense offset arrangements.

Each independent Trustee of the fund receives an annual Trustee fee, of which \$277, as a quarterly retainer, has been allocated to the fund, and an additional fee for each Trustees meeting attended. Trustees also are reimbursed for expenses they incur relating to their services as Trustees.

The fund has adopted a Trustee Fee Deferral Plan (the Deferral Plan) which allows the Trustees to defer the receipt of all or a portion of Trustees fees payable on or after July 1, 1995. The deferred fees remain invested in certain Putnam funds until distribution in accordance with the Deferral Plan.

The fund has adopted an unfunded noncontributory defined benefit pension plan (the Pension Plan) covering all Trustees of the fund who have served as a Trustee for at least five years and were first elected prior to 2004. Benefits under the Pension Plan are equal to 50% of the Trustee's average annual attendance and retainer fees for the three years ended December 31, 2005. The retirement benefit is payable during a Trustee's lifetime, beginning the year following retirement, for the number of years of service through December 31, 2006. Pension expense for the fund is included in Trustee compensation and expenses in the Statement of operations. Accrued pension liability is included in Payable for Trustee compensation and expenses in the Statement of assets and liabilities. The Trustees have terminated the Pension Plan with respect to any Trustee first elected after 2003.

Note 3: Purchases and sales of securities

During the reporting period, cost of purchases and proceeds from sales of investment securities other than short-term investments and TBA transactions aggregated \$306,917,715 and \$314,623,638, respectively. There were no purchases or proceeds from sales of long-term U.S. government securities.

84 Master Intermediate Income Trust

Written option transactions during the reporting period are summarized as follows:

		Written swap option contract amounts	Written swap option premiums
Written options outstanding at the beginning of the reporting period	USD	235,097,225	\$18,902,333

Note 5: Shares repurchased

In September 2012, the Trustees approved the renewal of the repurchase program to allow the fund to repurchase up to 10% of its outstanding common shares over the 12-month period ending October 7, 2013 (based on shares outstanding as of October 7, 2012). Prior to this renewal, the Trustees had approved a repurchase program to allow the fund to repurchase up to 10% of its outstanding common shares over the 12-month period ending October 7, 2012 (based on shares outstanding as of October 7, 2011). Repurchases are made when the fund's shares are trading at less than net asset value and in accordance with procedures approved by the fund's Trustees. For the reporting period, the fund did not repurchase any of its outstanding common shares.

At the close of the reporting period, Putnam Investments, LLC owned approximately 765 shares of the fund (0.001% of the fund's shares outstanding), valued at \$4,007 based on net asset value.

86 Master Intermediate Income Trust

Note 6: Transactions with affiliated issuers

Transactions during the reporting period with Putnam Money Market Liquidity Fund and Putnam Short Term Investment Fund, which are under common ownership or control, were as follows:

Name of affiliates	Market value at the beginning of the reporting period	Purchase cost	Sale proceeds	Investment income	Market value at the end of the reporting period
Putnam Money Market Liquidity Fund*	\$6,987,387	\$93,701,638	\$100,689,025	\$18,125	\$—
Putnam Short Term Investment Fund*	—	63,185,031	17,374,812	3,473	45,810,219

Totals	\$6,987,387	\$156,886,669	\$118,063,837	\$21,598	\$45,810,219
---------------	--------------------	----------------------	----------------------	-----------------	---------------------

* Management fees charged to Putnam Money Market Liquidity Fund and Putnam Short Term Investment Fund have been waived by Putnam Management.

Note 7: Senior loan commitments

Senior loans are purchased or sold on a when-issued or delayed delivery basis and may be settled a month or more after the trade date, which from time to time can delay the actual investment of available cash balances; interest income is accrued based on the terms of the securities. Senior loans can be acquired through an agent, by assignment from another holder of the loan, or as a participation interest in another holder's portion of the loan. When the fund invests in a loan or participation, the fund is subject to the risk that an intermediate participant between the fund and the borrower will fail to meet its obligations to the fund, in addition to the risk that the borrower under the loan may default on its obligations.

Note 8: Market, credit and other risks

In the normal course of business, the fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the contracting party to the transaction to perform (credit risk). The fund may be exposed to additional credit risk that an institution or other entity with which the fund has unsettled or open transactions will default. Investments in foreign securities involve certain risks, including those related to economic instability, unfavorable political developments, and currency fluctuations. The fund may invest in higher yielding, lower rated bonds that may have a higher rate of default. The fund may invest a significant portion of its assets in securitized debt instruments, including mortgage-backed and asset-backed investments. The yields and values of these investments are sensitive to changes in interest rates, the rate of principal payments on the underlying assets and the market's perception of the issuers. The market for these investments may be volatile and limited, which may make them difficult to buy or sell.

Note 9: New accounting pronouncement

In January 2013, ASU 2013-01 "Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities" replaced ASU No. 2011-11 "Disclosures about Offsetting Assets and Liabilities". The updates create new disclosure requirements requiring entities to disclose both gross and net information for derivatives and other financial instruments that are either offset in the Statement of assets and liabilities or subject to an enforceable master netting arrangement or similar agreement. The disclosure requirements are effective for annual reporting periods beginning on or after January 1, 2013 and interim periods within those annual periods. Putnam Management is currently evaluating the application of ASU 2013-01 and its impact, if any, on the fund's financial statements.

March 1 – March 31, 2013	—	—	—	6,569,062

* In October 2005, the Board of Trustees of the Putnam Funds initiated the closed-end fund share repurchase program, which, as subsequently amended, authorized the fund to repurchase of up to 10% of its fund's outstanding common shares over the two-years ending October 5, 2007. The Trustees have subsequently renewed the program on an annual basis. The program renewed by the Board in September 2011, which remained in effect between October 8, 2011 and October 7, 2012, allowed the fund to repurchases up to a total of 6,569,062 of its shares. The program renewed by the Board in September 2012, which will remain in effect between October 8, 2012 and October 7, 2013, allows the fund to repurchases up to a total of 6,569,062 of its shares.

** Information prior to October 7, 2012 is based on the total number of shares eligible for repurchase under the program, as amended through September 2011. Information from October 8, 2012 forward is based on the total number of shares eligible for repurchase under the program, as amended through September 2012.

Item 10. Submission of Matters to a Vote of Security Holders:

Not applicable

Item 11. Controls and Procedures:

(a) The registrant's principal executive officer and principal financial officer have concluded, based on their evaluation of the effectiveness of the design and operation of the registrant's disclosure controls and procedures as of a date within 90 days of the filing date of this report, that the design and operation of such procedures are generally effective to provide reasonable assurance that information required to be disclosed by the registrant in this report is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms.

(b) Changes in internal control over financial reporting: Not applicable

Item 12. Exhibits:

(a)(1) Not applicable

(a)(2) Separate certifications for the principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the Investment Company Act of 1940, as amended, are filed herewith.

(b) The certifications required by Rule 30a-2(b) under the Investment Company Act of 1940, as amended, are filed herewith.
