FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1 - Description of Business

First Financial Northwest, Inc. ("First Financial Northwest"), a Washington corporation, was formed on June 1, 2007 for the purpose of becoming the holding company for First Savings Bank Northwest ("First Savings Bank" or "the Bank") in connection with the conversion from a mutual holding company structure to a stock holding company structure. First Financial Northwest's business activities generally are limited to passive investment activities and oversight of its investment in First Savings Bank. Accordingly, the information presented in the consolidated financial statements and related data, relates primarily to First Savings Bank. First Financial Northwest is a savings and loan holding company and is subject to regulation by the Federal Reserve Board ("FRB"). First Savings Bank is regulated by the Federal Deposit Insurance Corporation ("FDIC") and the Washington State Department of Financial Institutions ("DFI").

First Savings Bank is a community-based savings bank primarily serving King, and to a lesser extent, Pierce, Snohomish and Kitsap counties through our full-service banking office located in Renton, Washington. First Savings Bank's business consists of attracting deposits from the public and utilizing these deposits to originate one-to-four family residential, multifamily, commercial real estate, business, consumer and construction/land development loans. Our current business strategy emphasizes one-to-four family residential, multifamily and commercial real estate lending.

As used throughout this report, the terms "we," "our," "us," or the "Company" refer to First Financial Northwest, Inc. and its consolidated subsidiary First Savings Bank Northwest, unless the context otherwise requires.

Note 2 - Regulatory Items

During April 2013, the Memorandum of Understanding ("MOU") by and between the Bank and the FDIC and the DFI (originally effective March 27, 2012) was terminated. Also in April 2013, the MOU by and between First Financial Northwest and the FRB (originally effective April 14, 2010) was terminated. As a result, the Company is no longer required to obtain the approval of the FRB prior to the repurchase of its common stock and for the payment of any cash dividends. The FDIC, DFI and FRB have also terminated the Bank's and First Financial Northwest's "troubled condition" status.

Note 3 - Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). Accordingly, they do not include all of the information and footnotes required by U.S. Generally Accepted Accounting Principles ("GAAP") for complete financial statements. These unaudited consolidated financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2012, as filed with the SEC. In our opinion, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation of the consolidated financial statements in accordance with GAAP have been included. All significant intercompany balances and transactions between the Company and its subsidiaries have been eliminated in consolidation. Operating results for the six months ended June 30, 2013 are not necessarily indicative of the results that may be expected for the year ending December 31, 2013. In preparing the unaudited consolidated financial statements, we are required to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change relate to the ALLL, the valuation of OREO and the underlying collateral of loans in the process of foreclosure, deferred tax assets and the fair value of financial instruments.

Certain amounts in the unaudited consolidated financial statements for prior periods have been reclassified to conform to the current unaudited financial statement presentation with no effect on income or stockholders' equity.

Note 4 - Recently Issued Accounting Pronouncements

In December 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2011-11, Disclosures about Offsetting Assets and Liabilities. The ASU requires an entity to offset, and present as a single net amount, a recognized eligible asset and a recognized eligible liability when it has an unconditional and legally enforceable right of setoff and intends either to settle the asset and liability on a net basis or to realize the asset and settle the liability simultaneously.

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

The ASU requires an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. This ASU is effective for annual and interim reporting periods beginning on or after January 1, 2013. The adoption of this ASU did not have a material impact on the Company's consolidated financial statements.

In July 2012, the FASB issued ASU No. 2012-2, Intangibles-Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment. This ASU states that an entity has the option to first assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount, in accordance with Codification Subtopic 350-30, Intangibles-Goodwill and Other, General Intangibles Other than Goodwill. Under guidance in this ASU an entity also has the option to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to performing the quantitative impairment test. An entity will be able to resume performing the qualitative assessment in any subsequent period. This ASU is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. The adoption of this ASU did not have a material impact on the Company's consolidated financial statements. In February 2013, the FASB issued ASU 2013-02, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. This ASU requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component and to present either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income, but only if the amount reclassified is required to be reclassified to net income in its entirety in the same reporting period. The amendments were effective prospectively for annual and interim reporting periods beginning on or after December 15, 2012. The adoption of this ASU did not have a material impact on the Company's consolidated financial statements.

In April 2013, the FASB issued ASU 2013-11, Income Taxes (Topic 740). This ASU requires an entity to present in the financial statements an unrecognized tax benefit as a liability and the unrecognized tax benefit should not be combined with deferred tax assets to the extent that a net operating loss carryforward, tax loss or tax credit carryforward is also not available at the reporting date. The amendment is to be applied prospectively to all unrecognized tax benefits and is effective for annual and interim reporting periods beginning after December 15, 2013. The Company does not expect this ASU to have a material impact on the Company's consolidated financial statements.

Note 5 - Investments

U.S. Government agencies	10,508	(4)	—	—	10,508	(4)
Total	\$36,301	\$(145)	\$1,239	\$(166)	\$37,540	\$(311)

At June 30, 2013, the Company had three securities with a gross unrealized loss of \$311,000 with a fair value of \$12.6 million that had an unrealized loss for greater than one year. At December 31, 2012, there was one security that had a gross unrealized loss of \$166,000 with a fair value of \$1.2 million that had an unrealized loss for greater than one

year. Management reviewed the financial condition of the entities issuing these securities at June 30, 2013 and December 31, 2012, and determined that an other-than-temporary impairment ("OTTI") was not warranted.

On a quarterly basis, management makes an assessment to determine whether there have been any events or economic circumstances to indicate that a security on which there is an unrealized loss is impaired on an other-than-temporary basis. The Company considers many factors including the severity and duration of the impairment, recent events specific to the issuer or

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

industry, and for debt securities, external credit ratings and recent downgrades. Securities on which there is an unrealized loss that is deemed to be an OTTI are written down to fair value. For equity securities, the write-down is recorded as a realized loss in noninterest income on the Company's Consolidated Income Statements. For debt securities, if the Company intends to sell the security or it is likely that the Company will be required to sell the security before recovering its cost basis, the entire impairment loss would be recognized in earnings as an OTTI. If the Company does not intend to sell the security and it is not likely that it will be required to sell the security but does not expect to recover the entire amortized cost basis of the security, only the portion of the impairment loss representing credit losses would be recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. Projected cash flows are discounted by the original or current effective interest rate depending on the nature of the security being measured for potential OTTI. The remaining impairment related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to other comprehensive income ("OCI"). Impairment losses related to all other factors are presented as separate categories within OCI. For the three and six months ended June 30, 2013 and 2012, the Company did not have any OTTI losses on investments.

The amortized cost and estimated fair value of investments available-for-sale at June 30, 2013, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Investments not due at a single maturity date, primarily mortgage-backed investments are shown separately.

Under Washington state law, in order to participate in the public funds program the Company is required to pledge as collateral an amount equal to 100% of the public deposits held in the form of eligible securities. Investments with a market value of \$25.1 million and \$1.9 million were pledged as collateral for public deposits at June 30, 2013 and December 31, 2012, respectively, both of which exceeded the collateral requirements established by the Washington Public Deposit Protection Commission.

We sold \$30.0 million of investments generating a gross gain of \$10,000 and a gross loss of \$9,000 during the three months ended June 30, 2013. For the three months ended June 30, 2012, we sold \$12.1 million of investments resulting in a gross gain of \$100,000 and a gross loss of \$6,000. For the six months ended June 20, 2013 we sold \$30.0 million of investments generating a gross gain of \$10,000 and a gross loss of \$9,000 compared to sales of \$22.9 million, gross gains of \$294,000 and gross losses of \$6,000 for the comparable period in 2012.

Commercial real estate	5,770	—
Land development	9,094	10,435
	29,400	19,418
Business	1,720	2,968
Consumer	9,927	11,110
Total loans	684,372	673,923
Less:		
Loans in process ("LIP")	15,873	8,856
Deferred loan fees, net	2,429	2,057
ALLL	12,313	12,542
Loans receivable, net	\$653,757	\$650,468

⁽¹⁾ Includes \$129.3 million and \$139.8 million of non-owner occupied loans at June 30, 2013 and December 31, 2012, respectively.

⁽²⁾ Excludes construction loans that will convert to permanent loans. The Company considers these loans to be "rollovers" in that one loan is originated for both the construction loan and permanent financing. These loans are classified according to the underlying collateral. At June 30, 2013, the Company had \$13.8 million, or 5.8% of the total commercial real estate portfolio and \$8.2 million, or 7.3% of its total multifamily portfolio in these "rollover" type of loans. At December 31, 2012, the Company had \$12.5 million, or 5.6% of the total commercial real estate portfolio, \$5.6 million, or 5.0% of the total multifamily portfolio, and \$177,000, or 0.1% of its total one-to-four family loan portfolio in these rollover type of loans. At June 30, 2013 and December 31, 2012, \$2.0 million and \$1.9 million, respectively, of commercial real estate loans were not included in the construction/land development category because the Company classifies raw land or buildable lots when it does not intend to finance the

construction as commercial real estate land loans.

At June 30, 2013 and December 31, 2012 there were no loans classified as held for sale.

(Unaudited)

Nonperforming loans, net of LIP, were \$14.6 million and \$22.8 million at June 30, 2013 and December 31, 2012, respectively. Foregone interest on nonperforming loans for the quarter ended June 30, 2013 was \$259,000, compared to \$365,000 for the same quarter in 2012. Foregone interest for the six months ended June 30, 2013 was \$553,000 compared to \$776,000 for the six months ended June 30, 2012.

There were no funds committed to be advanced in connection with impaired loans at either June 30, 2013 or December 31, 2012.

We continually monitor our loan portfolio for delinquent loans and changes in the financial condition of each borrower. When an issue is identified with one of our borrowers and it is determined that the loan needs to be classified as nonperforming and/or impaired, an evaluation of the collateral is performed and, if necessary, an appraisal is ordered in accordance with our appraisal policy guidelines. Based on this evaluation, any additional provision for loan loss or charge-offs that may be needed is recorded prior to the end of the financial reporting period.

A loan is considered impaired when we have determined that we may be unable to collect payments of principal or interest when due under the terms of the loan. When identifying loans as impaired, management takes into consideration factors which include payment history and status, collateral value, financial condition of the borrower and the probability of collecting scheduled payments in the future. Minor payment delays and insignificant payment shortfalls typically do not result in a loan being classified as impaired. The significance of payment delays and shortfalls is considered by management on a case-by-case basis, after taking into consideration the circumstances surrounding the loan and the borrower, including payment history and the amounts of any payment shortfall, length and reason for delay and the likelihood of a return to stable performance. Impairment is measured on a loan-by-loan basis for all loans in the portfolio. We obtain annual updated appraisals for impaired collateral dependent loans that exceed \$1.0 million and loans that have been transferred to OREO. In addition, we may order appraisals on properties not included within these guidelines when there are extenuating circumstances where we are not otherwise able to determine the fair value of the property.

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

Certain loan modifications or restructurings are accounted for as troubled debt restructured loans ("TDRs"). In general, the modification or restructuring of a debt is considered a TDR if, for economic or legal reasons related to the borrower's financial difficulties, a concession is granted to the borrower that the Company would not otherwise consider. Once the loan is restructured, a current, well-documented credit evaluation of the borrower's financial condition and prospects for repayment are performed to assess the likelihood that all principal and interest payments required under the terms of the modified agreement will be collected in full. A loan that is determined to be classified as a TDR is generally reported as a TDR until the loan is paid in full or otherwise settled, sold or charged-off. The following is a summary of information pertaining to nonperforming assets and TDRs:

	June 30, 2013 (In thousands)	December 31, 2012
Nonperforming assets: ⁽¹⁾		
Nonaccrual loans	\$ 11,655	\$ 18,231
Nonaccrual TDRs	2,904	4,528
Total nonperforming loans	14,559	22,759
OREO	14,226	17,347
Total nonperforming assets	\$ 28,785	\$ 40,106
Performing TDRs	\$ 61,189	\$ 65,848
Nonaccrual TDRs	2,904	4,528
Total TDRs	\$ 64,093	\$ 70,376

⁽¹⁾ There were no loans 90 days or more past due and still accruing interest at June 30, 2013 or December 31, 2012. All loans are reported net of LIP.

The accrual status of a loan may change after it has been classified as a TDR. Management considers the following in determining the accrual status of restructured loans: (1) if the loan was on accrual status prior to the restructuring, the borrower has demonstrated performance under the previous terms, and a credit evaluation shows the borrower's capacity to continue to perform under the restructured terms (both principal and interest payments), the loan will remain on accrual at the time of the restructuring; (2) if the loan was on nonaccrual status before the restructuring, and the Company's credit evaluation shows the borrower's capacity to meet the restructured terms, the loan would remain as nonaccrual for a minimum of six months after restructuring until the borrower has demonstrated a reasonable period of sustained repayment performance (thereby providing reasonable assurance as to the ultimate collection of principal and interest in full under the modified terms).

Nonaccrual and Past Due Loans. Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on nonaccrual when they are 90 days delinquent or when, in management's opinion, the borrower is unable to meet scheduled payment obligations.

In order to return a nonaccrual loan to accrual status, each loan is evaluated on a case-by-case basis. The Company evaluates the borrower's financial condition to ensure that future loan payments are reasonably assured. The Company also takes into consideration the borrower's willingness and ability to make the loan payments and historical repayment performance. The Company requires the borrower to make loan payments consistently for a period of at least six months as agreed to under the terms of the loan agreement before the Company will consider reclassifying the loan to accrual status.

Credit Quality Indicators. The Company utilizes a nine-point risk rating system and assigns a risk rating for all credit exposures. The risk rating system is designed to define the basic characteristics and identify risk elements of each credit extension. Credits risk rated 1 through 5 are considered to be “pass” credits. Pass credits can be assets where there is virtually no credit risk, such as cash secured loans with funds on deposit with the Bank. Pass credits also include credits that are on the Company's watch list, where the borrower exhibits potential weaknesses, which may, if not checked or corrected, negatively affect the borrower's financial capacity and threaten their ability to fulfill debt obligations in the future. Credits classified as special mention are risk rated 6 and possess weaknesses that deserve management's close attention. Special mention assets do not expose the Company to sufficient risk to warrant adverse classification in the substandard, doubtful or loss categories. Substandard credits are risk rated 7. An asset is considered substandard if it is inadequately protected by the current net worth and payment capacity of the borrower or of any collateral pledged. Substandard assets include those characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful are risk rated 8 and have all the weaknesses inherent in those credits classified as substandard with the added characteristic that the weaknesses present make collection or liquidation in full highly questionable and improbable, on the basis of currently existing facts, conditions and values. Assets classified as loss are risk rated 9 and are considered uncollectible and cannot be justified as a viable asset for the Company. There were no loans classified as doubtful or loss at June 30, 2013 and December 31, 2012.

Principal and interest with interest rate concession	—	\$ —	\$ —	1	\$ 214	\$ 213
Commercial real estate:						
Principal and interest reamortized with no interest rate concession	1	1,415	1,409	1	1,415	1,409
Interest-only payments with interest rate concession	1	2,012	2,012	2	2,508	2,508
Total	2	\$ 3,427	\$ 3,421	4	\$ 4,137	\$ 4,130

At June 30, 2013, December 31, 2012 and June 30, 2012, the Company had no commitments to extend additional credit to borrowers whose loan terms have been modified in TDRs. All TDRs are also classified as impaired loans and are included in the loans individually evaluated for impairment in the calculation of the ALLL.

The TDRs that occurred during the three and six months ended June 30, 2013 and 2012 were primarily a result of granting the borrower interest rate concessions and/or interest-only payments for a period of time ranging from one to three years. The impaired portion of the loan with an interest rate concession and/or interest-only payments for a specific period of time are calculated based on the present value of expected future cash flows discounted at the loan's effective interest rate. The effective interest rate

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

is the rate of return implicit on the original loan. This impaired amount reduces the ALLL and a valuation allowance is established to reduce the loan balance. As loan payments are received in future periods, the ALLL entry is reversed and the valuation allowance is reduced utilizing the level yield method over the modification period. TDRs resulted in charge-offs to the ALLL of \$85,000 and \$390,000 for the three months ended June 30, 2013 and 2012, respectively, and \$89,000 and \$644,000 for the six months ended June 30, 2013 and 2012, respectively.

The following is a summary of loans that were modified as TDRs within the previous 12 months and for which there was a payment default during the three and six months ended June 30, 2013 and 2012:

	Types of Modification					
	Three Months Ended June 30, 2013			Six Months Ended June 30, 2013		
	Number of Loans	Interest Only Payments	Interest Rate Concession	Number of Loans	Interest Only Payments	Interest Rate Concession
(Dollars in thousands)						
TDRs that Subsequently Defaulted:						
One-to-four family residential	—	\$—	\$—	1	\$—	\$70
Commercial real estate	1	—	333	2	940	333
Total	1	\$—	\$333	3	\$940	\$403

	Types of Modification					
	Three Months Ended June 30, 2012			Six Months Ended June 30, 2012		
	Number of Loans	Interest Only Payments	Interest Rate Concession	Number of Loans	Interest Only Payments	Interest Rate Concession
(Dollars in thousands)						
TDRs that Subsequently Defaulted:						
One-to-four family residential	1	\$274	\$—	1	\$274	\$—
Commercial real estate	1	1,409	—	1	1,409	—
Total	2	\$1,683	\$—	2	\$1,683	\$—

TDRs that default after they have been modified are typically evaluated individually on a collateral basis. Any additional impairment further reduces the ALLL.

OREO includes properties acquired by the Company through foreclosure and deed in lieu of foreclosure. OREO at June 30, 2013 consisted of \$2.7 million in one-to-four family residential homes, \$1.1 million in construction/land development projects and \$10.4 million in commercial real estate properties.

Note 8 - Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Company determines the fair values of its financial instruments based on the fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair values. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect its estimate for market assumptions.

Valuation inputs refer to the assumptions market participants would use in pricing a given asset or liability using one of the three valuation techniques. Inputs can be observable or unobservable. Observable inputs are those assumptions that market participants would use in pricing the particular asset or liability. These inputs are based on market data and are obtained from an independent source. Unobservable inputs are assumptions based on the Company's own information or estimate of assumptions used by market participants in pricing the asset or liability. Unobservable inputs are based on the best and most current information available on the measurement date.

All inputs, whether observable or unobservable, are ranked in accordance with a prescribed fair value hierarchy:

Level 1 - Quoted prices for identical instruments in active markets.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable.

Level 3 - Instruments whose significant value drivers are unobservable.

The tables below present the balances of assets and liabilities measured at fair value on a recurring basis (there were no transfers between Level 1, Level 2 and Level 3 recurring measurements):

Total	\$88,277	\$—	\$—	\$88,277	\$1,773

⁽¹⁾ The loss represents the specific reserve against loans that were considered impaired at June 30, 2013.

⁽²⁾ The loss represents OREO market value adjustments for the quarter ended June 30, 2013.

Fair Value Measurements at December 31, 2012

	Fair Value Measurements (In thousands)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Losses
Impaired loans (included in loans receivable, net) ⁽¹⁾	\$87,004	\$—	\$—	\$87,004	\$1,603

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

OREO ⁽²⁾	17,347	—	—	17,347	2,046
Total	\$104,351	\$—	\$—	\$104,351	\$3,649

(1) The loss represents the specific reserve against loans that were considered impaired at December 31, 2012.

(2) The loss represents OREO market value adjustments for the year ended December 31, 2012.

The fair value of impaired loans is calculated using the collateral value method or on a discounted cash flow basis. Inputs used in the collateral value method include appraised values, estimates of certain completion costs and closing and selling costs.

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

Some of these inputs may not be observable in the marketplace. Appraised values may be discounted based on management's historical knowledge, changes in market conditions from the time of valuation and/or management's expertise and knowledge of the borrower.

OREO properties are measured at the lower of their carrying amount or fair value, less costs to sell. Fair values are generally based on third party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a nonrecurring basis.

June 30, 2013			
Fair Value	Valuation Technique(s)	Unobservable Input(s)	Range (Weighted Average)
(Dollars in thousands)			
Impaired Loans \$ 74,051	Market approach	Adjusted for differences between comparable sales	0% - 41% (1.1%)
OREO \$ 14,226	Market approach	Adjusted for differences between comparable sales	19% - 26% (0.6%)

The carrying amounts and estimated fair values of financial instruments were as follows:

Accrued interest payable	179	179	—	179	—

Fair value estimates, methods, and assumptions are set forth below for the Company's financial instruments:

Financial instruments with book value equal to fair value: The fair value of financial instruments that are short-term or reprice frequently and that have little or no risk are considered to have a fair value equal to book value. These instruments include cash on hand and in banks, interest-bearing deposits, FHLB stock, accrued interest receivable, accrued interest payable and investment transactions payable. FHLB stock is not publicly-traded, however it may be redeemed on a dollar-for-dollar basis, for any amount the Bank is not required to hold, subject to the FHLB's discretion. The fair value is therefore equal to the book value.

Investments available-for-sale: The fair value of all investments excluding FHLB stock was based upon quoted market prices for similar investments in active markets, identical or similar investments in markets that are not active and model-derived valuations whose inputs are observable.

Loans receivable: For variable rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The fair value of fixed-rate loans is estimated using discounted cash flow analysis, utilizing interest rates that would be offered for loans with similar terms to borrowers of similar credit quality. As a result of current market conditions, cash flow estimates have been further discounted to include a credit factor. The fair value of nonperforming loans is estimated using the fair value of the underlying collateral.

Liabilities: The fair value of deposits with no stated maturity, such as statement savings, NOW and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows using current interest rates for certificates of deposit with similar remaining maturities. The fair value of FHLB advances is estimated based on discounting the future cash flows using current interest rates for debt with similar remaining maturities.

Off balance sheet commitments: No fair value adjustment is necessary for commitments made to extend credit, which represents commitments for loan originations or for outstanding commitments to purchase loans. These commitments are at variable rates, are for loans with terms of less than one year and have interest rates which approximate

prevailing market rates, or are set at the time of loan closing.

Fair value estimates are based on existing balance sheet financial instruments without attempting to estimate the value of anticipated future business. The fair value has not been estimated for assets and liabilities that are not considered financial instruments.

Note 9 - Federal Home Loan Bank Stock

30

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

At June 30, 2013, the Bank held \$7.1 million of FHLB stock. FHLB stock is carried at par value (\$100 per share) and does not have a readily determinable fair value. Ownership of FHLB stock is restricted to the FHLB and member institutions and can only be purchased and redeemed at par.

Management evaluates FHLB stock for impairment. The determination of whether this investment is impaired is based on the Bank's assessment of the ultimate recoverability of cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of cost is influenced by criteria such as: (1) the significance of any decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the length of time this situation has persisted, (2) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB, (3) the impact of legislative and regulatory changes on institutions and, accordingly, the customer base of the FHLB and (4) the liquidity position of the FHLB.

On October 25, 2010, the FHLB agreed to the stipulation and issuance of a Consent Order by its primary regulator, the Federal Housing Finance Agency ("FHFA"). The Consent Order sets forth requirements for capital management, asset composition, and other operational and risk management improvements. In addition, the FHLB may not repurchase member stock or pay dividends, until they achieve and maintain financial thresholds established by the FHFA as part of the agency's supervisory process, subject to FHFA approval. The FHLB announced on September 7, 2012 that the FHFA now considers the FHLB to be adequately capitalized. Dividends on, or repurchases of, the FHLB stock continue to require the consent of the FHFA. These restrictions are not expected to have a material effect on our financial position, liquidity or results of operations. The Bank has determined there is not an OTTI on the FHLB stock investment as of June 30, 2013.

During the third quarter of 2012, the FHLB announced that the FHFA had granted them the authority to repurchase up to \$25 million in excess capital stock per quarter, provided that their financial condition - measured primarily by the ratio of market value of equity-to-par value of capital stock - does not deteriorate. As a result, the FHLB repurchased shares on a pro-rata basis from its shareholders, including 1,318 shares from the Bank, at par value during the second quarter of 2013. The FHLB announced on July 22, 2013, that, based on second quarter 2013 financial results, their Board of Directors had declared a \$0.025 per share cash dividend. It is the first dividend in a number of years.

Note 10- Stock-Based Compensation

In June 2008, First Financial Northwest's shareholders approved the First Financial Northwest, Inc. 2008 Equity Incentive Plan ("Plan"). The Plan provides for the grant of stock options, restricted stock and stock appreciation rights.

Total compensation expense for the Plan was \$489,000 and \$454,000 for the three months ended June 30, 2013 and 2012, respectively, and the related income tax benefit was \$171,000 and \$159,000 for the three months ended June 30, 2013 and 2012, respectively.

Total compensation expense for the Plan was \$970,000 and \$932,000 for the six months ended June 30, 2013 and 2012, respectively, and the related income tax benefit was \$340,000 and \$326,000 for the six months ended June 30, 2013 and 2012, respectively.

Stock Options

The Plan authorizes the grant of stock options totaling 2,285,280 shares to Company directors, advisory directors, officers and employees. Option awards are granted with an exercise price equal to the market price of First Financial Northwest's common stock at the grant date. These option awards have a vesting period of five years, with 20% vesting on the anniversary date of each grant date, and a contractual life of 10 years. Any unexercised stock options will expire ten years after the grant date or sooner in the event of the award recipient's death, disability or termination of service with the Company or the Bank. First Financial Northwest has a policy of issuing new shares from authorized but unissued common stock upon the exercise of stock options. At June 30, 2013, remaining options for 876,756 shares of common stock were available for grant under the Plan.

The fair value of each option award is estimated on the grant date using a Black-Scholes model that uses the following assumptions. The dividend yield is based on the current quarterly dividend in effect at the time of the grant. Historical employment data is used to estimate the forfeiture rate. The historical volatility of the Company's stock price over a specified period of time is used for the expected volatility assumption. First Financial Northwest bases the risk-free interest rate on the U.S. Treasury Constant Maturity Indices in effect on the date of the grant. First Financial Northwest elected to use the "Share-Based Payments"

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

method permitted by the Securities and Exchange Commission to calculate the expected term. This method uses the vesting term of an option along with the contractual term, setting the expected life at the midpoint.

A summary of the Company's stock option plan awards for the quarter ended June 30, 2013, follows:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term in Years	Aggregate Intrinsic Value	Weighted-Average Grant Date Fair Value
Outstanding at January 1, 2013	1,448,524	\$ 9.41	5.88	\$176,000	\$ 1.95
Exercised	(40,000)	8.35	—	64,400	2.15
Forfeited or expired	(40,000)	9.42	—	35,500	1.98
Outstanding at June 30, 2013	1,368,524	9.45	5.39	1,183,318	1.95
Expected to vest assuming a 3% forfeiture rate over the vesting term	352,791	9.00	6.29	463,914	
Exercisable at June 30, 2013	1,004,819	9.61	5.07	705,054	

As of June 30, 2013, there was \$244,000 of total unrecognized compensation cost related to nonvested stock options granted under the Plan. The cost is expected to be recognized over the remaining weighted-average vesting period of 1.3 years.

Restricted Stock Awards

The Plan authorizes the grant of restricted stock awards amounting to 914,112 shares to directors, advisory directors, officers and employees. Compensation expense is recognized over the vesting period of the awards based on the fair value of the stock at the grant date. The restricted stock awards' fair value is equal to the value on the grant date. Shares awarded as restricted stock vest ratably over a five-year period beginning at the grant date with 20% vesting on the anniversary date of each grant date. At June 30, 2013, remaining restricted stock awards for 97,478 shares were available to be awarded. Shares that have been repurchased totaled 223,647 and are held in trust until they are issued in connection with the agreement.

A summary of changes in nonvested restricted stock awards for the quarter ended June 30, 2013, follows:

Nonvested Shares	Shares	Weighted-Average Grant Date Fair Value
Nonvested at January 1, 2013	244,847	\$8.95
Vested	(12,800)	6.19
Forfeited	(8,400)	8.83
Nonvested at June 30, 2013	223,647	9.12
Expected to vest assuming a 3% forfeiture rate over the vesting term	216,937	

As of June 30, 2013, there was \$811,000 of total unrecognized compensation costs related to nonvested shares granted as restricted stock awards. The cost is expected to be recognized over the remaining weighted-average vesting period of 1.8 years. The total fair value of shares vested for both quarters ended June 30, 2013 and 2012 was \$26,000.

Note 11 - Federal Income Taxes

The following table reflects the effect of temporary differences that give rise to the components of the net deferred tax assets as of June 30, 2013 and December 31, 2012.

Deferred tax assets, net	\$14,870	\$1,000

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. These calculations are based on many complex factors including estimates of the timing of reversals of temporary differences, the interpretation of federal income tax laws, and a determination of the differences between the tax and the financial reporting basis of assets and liabilities. Actual results could differ significantly from the estimates and interpretations used in determining the current and deferred income tax assets and liabilities.

As of June 30, 2013, the consolidated balance sheet included gross deferred tax assets of \$20.0 million and a deferred tax asset valuation allowance of \$2.6 million. Our primary deferred tax assets relate to our net operating loss carryforward, our ALLL and our employee benefit plans.

Under GAAP, a valuation allowance is required to be recognized if it is “more likely than not” that a portion of the deferred tax asset will not be realized. Our policy is to evaluate our deferred tax assets on a quarterly basis and record a valuation allowance for our deferred tax asset if we do not have sufficient positive evidence indicating that it is more likely than not that some or all of the deferred tax asset will be realized. Each quarter, we considered positive and

negative evidence, which includes cumulative losses in the most recent three year period and uncertainty regarding short-term future earnings. We further considered that GAAP places heavy emphasis on prior earnings in determining the realizable deferred tax asset. After reviewing and weighing these various factors, in 2010 we recorded a valuation allowance for the balance of the deferred tax asset in excess of the tax carryback refund potential. During the second quarter of 2012, management determined that a partial release of \$1.0 million was appropriate based on our return to profitability and our projections for the future taxable income.

During the quarter ended June 30, 2013, management determined that a full valuation allowance was no longer appropriate and reversed essentially all of the valuation allowance. Management currently anticipates utilizing \$2.1 million of the remaining

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

valuation allowance to offset its projected tax expense in the third and fourth quarters of 2013. The remaining \$545,000 deferred tax asset valuation which related to a capital loss carryforward will most likely not be recognized. The ultimate utilization of the remaining valuation allowance and realization of deferred tax assets is dependent upon the existence, or generation, of taxable income in the periods when those temporary differences and net operating loss and credit carryforwards are deductible. Management considered the scheduled reversal of deferred tax assets and liabilities, taxes paid in carryback years, projected future taxable income, available tax planning strategies and other factors in making its assessment to reverse the deferred tax valuation allowance. As a result the valuation decreased to \$2.6 million at June 30, 2013 from \$16.9 million at December 31, 2012.

At June 30, 2013, the Company's federal net operating loss carryforward was \$9.4 million which will begin to expire in 2030. At June 30, 2013, the Company had an alternative minimum tax credit carryforward totaling \$1.6 million, with no expiration date.

Note 12 - Earnings Per Share

Per the provisions of FASB ASC 260, Earnings Per Share, nonvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities and are included in the computation of EPS pursuant to the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. Certain of the Company's nonvested restricted stock awards qualify as participating securities. ESOP shares are considered outstanding for basic and diluted earnings per share when the shares are committed to be released.

The following table presents a reconciliation of the components used to compute basic and diluted earnings per share for the periods indicated.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
	(Dollars in thousands, except share data)			
Net income	\$16,363	\$1,371	\$17,920	\$1,993
Basic weighted-average common shares outstanding	17,133,137	17,629,899	17,423,838	17,615,793
Plus common stock options considered outstanding for dilutive purposes (excludes antidilutive options)	26,528	19,292	23,869	17,129
Diluted weighted-average common shares outstanding	17,159,665	17,649,191	17,447,707	17,632,922
Basic earnings per share	\$0.96	\$0.08	\$1.03	\$0.11
Diluted earnings per share	\$0.95	\$0.08	\$1.03	\$0.11

Options to purchase an additional 1,318,524 and 1,313,524 shares of common stock at June 30, 2013 and 2012, respectively, were not included in the computation of diluted earnings per share because their exercise price resulted in them being antidilutive.

Note 13 - Segment Information

The Company's activities are considered to be a single industry segment for financial reporting purposes. The Company is engaged in the business of attracting deposits from the general public and originating loans for our portfolio in our primary market area. Substantially all income is derived from a diverse base of commercial and residential real estate loans, consumer lending activities and investments.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

34

Certain matters discussed in this Quarterly Report on Form 10-Q constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements relate to our financial condition, results of operations, plans, objectives, future performance or business. Forward-looking statements are not statements of historical fact, are based on certain assumptions and are generally identified by use of the words “believes,” “expects,” “anticipates,” “estimates,” “forecasts,” “intends,” “plans,” “targets,” “potentially,” “probably,” “projects,” “outlook” or similar or future or conditional verbs such as “may,” “will,” “should,” “would” and “could.” Forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, assumptions and statements about, among other things, expectations of the business environment in which we operate, projections of future performance or financial items, perceived opportunities in the market, potential future credit experience, and statements regarding our mission and vision. These forward-looking statements are based upon current management expectations and may, therefore, involve risks and uncertainties. Our actual results, performance, or achievements may differ materially from those suggested, expressed, or implied by forward-looking statements as a result of a wide variety or range of factors including, but not limited to: the credit risks of lending activities, including changes in the level and trend of loan delinquencies and write-offs, that may be affected by deterioration in the housing and commercial real estate markets, and may lead to increased losses and nonperforming assets in our loan portfolio, and may result in our allowance for loan losses not being adequate to cover actual losses, and require us to materially increase our reserves; changes in general economic conditions, either nationally or in our market areas; changes in the levels of general interest rates, and the relative differences between short and long term interest rates, deposit interest rates, our net interest margin and funding sources; fluctuations in the demand for loans, the number of unsold homes and other properties and fluctuations in real estate values in our market areas; results of examinations of us by the Federal Reserve Bank of San Francisco (“Federal Reserve”) and our bank subsidiary by the Federal Deposit Insurance Corporation (“FDIC”), the Washington State Department of Financial Institutions, Division of Banks (“DFI”) or other regulatory authorities, including the possibility that any such regulatory authority may initiate enforcement actions against the Company or the Bank to take corrective action and refrain from unsafe and unsound practices which also may, among other things, require us to increase our reserve for loan losses, write-down assets, change our regulatory capital position, affect our ability to borrow funds or maintain or increase deposits, which could adversely affect our liquidity and earnings; our ability to pay dividends on our common stock; our ability to attract and retain deposits; increases in premiums for deposit insurance; our ability to control operating costs and expenses; the use of estimates in determining the fair value of certain of our assets, which estimates may prove to be incorrect and result in significant declines in valuation; difficulties in reducing risk associated with the loans on our balance sheet; staffing fluctuations in response to product demand or the implementation of corporate strategies that affect our work force and potential associated charges; computer systems on which we depend could fail or experience a security breach; our ability to retain key members of our senior management team; costs and effects of litigation, including settlements and judgments; our ability to implement our branch expansion strategy; our ability to successfully integrate any assets, liabilities, customers, systems, and management personnel we have acquired or may in the future acquire into our operations and our ability to realize related revenue synergies and cost savings within expected time frames and any goodwill charges related thereto; our ability to manage loan delinquency rates; costs and effects of litigation, including settlements and judgments; increased competitive pressures among financial services companies; our ability to reduce our noninterest expenses; changes in consumer spending, borrowing and savings habits; legislative or regulatory changes that adversely affect our business including changes in regulatory policies and principles, including the interpretation of regulatory capital or other rules, including as a result of Basel III; the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd Frank Act”) and the implementing regulations; the availability of resources to address changes in laws, rules, or regulations or to respond to regulatory actions; adverse changes in the securities markets; inability of key third-party providers to perform their obligations to us; changes in accounting policies and practices, as may be adopted by the financial institution regulatory agencies or the Financial Accounting Standards Board, including additional guidance and interpretation on accounting issues and details of the implementation of new accounting methods; the economic impact of war or any terrorist activities; other economic, competitive, governmental, regulatory, and technological factors affecting our operations; pricing, products and services; and other risks detailed from time to time in our filings with the U.S. Securities and Exchange Commission (“SEC”), including our Annual Report on Form 10-K for the year ended December 31, 2012 (“2012 Form 10-K”). Any of the forward-looking

statements that we make in this Form 10-Q and in the other public reports and statements we make may turn out to be wrong because of the inaccurate assumptions we might make, because of the factors illustrated above or because of other factors that we cannot foresee. Because of these and other uncertainties, our actual future results may be materially different from those expressed in any forward-looking statements made by or on our behalf. Therefore, these factors should be considered in evaluating the forward-looking statements, and undue reliance should not be placed on such statements. We undertake no responsibility to update or revise any forward-looking statements.

Regulatory Items

During April 2013, the Memorandum of Understanding ("MOU") by and between the Bank and the FDIC and the DFI (originally effective March 27, 2012) was terminated. Also in April 2013, the MOU by and between First Financial Northwest and the FRB (originally effective April 14, 2010) was terminated. As a result, the Company is no longer required to obtain the approval

of the FRB prior to the repurchase of its common stock and for the payment of any cash dividends. The FDIC, DFI and FRB have also terminated the Bank's and First Financial Northwest's "troubled condition" status.

Overview

First Savings Bank is a wholly-owned subsidiary of First Financial Northwest and, as such, comprises substantially all of the activity for First Financial Northwest. First Savings Bank is a community-based savings bank primarily serving King and to a lesser extent, Pierce, Snohomish and Kitsap counties, Washington through our full-service banking office located in Renton, Washington. First Savings Bank's business consists of attracting deposits from the public and utilizing these funds to originate one-to-four family residential, multifamily, commercial real estate, construction/land development, business and consumer loans. Our current business strategy emphasizes one-to-four family residential, multifamily and commercial real estate lending.

Our primary source of revenue is net interest income. Net interest income is the difference between interest income, which is the income that we earn on our loans and investments, and interest expense, which is the interest that we pay on our deposits and borrowings. Changes in levels of interest rates affect our net interest income.

An offset to net interest income is the provision for loan losses, which represents the periodic charge to operations which is required to adequately provide for probable losses inherent in our loan portfolio.

Our noninterest expenses consist primarily of salaries and employee benefits, occupancy and equipment, data processing, OREO-related expenses, professional fees, regulatory assessments and other general and administrative expenses. Salaries and employee benefits consist primarily of the salaries and wages paid to our employees, payroll taxes and expenses for retirement and other employee benefits. Occupancy and equipment expenses, which are the fixed and variable costs of buildings and equipment, consist primarily of real estate taxes, depreciation expenses, maintenance and costs of utilities. OREO-related expenses consist primarily of maintenance and costs of utilities for the OREO inventory, market valuation adjustments, build-out expenses, gains and losses from OREO sales, legal fees, real estate taxes and insurance related to the properties included in the OREO inventory.

Net income for the three months ended June 30, 2013 was \$16.4 million or \$0.95 per diluted share, as compared to net income of \$1.4 million or \$0.08 per diluted share for the three months ended June 30, 2012. The improvement in operating results in the second quarter of 2013, as compared to the second quarter of 2012 was the result of a partial reversal of the deferred tax asset valuation allowance of \$13.8 million, a \$1.3 million decrease in total noninterest expense, a \$544,000 increase in net interest income and a \$550,000 reduction in the provision for loan losses partially offset by a \$175,000 decrease in noninterest income. The decrease in total noninterest expense includes reductions of \$709,000 in net OREO-related expenses, \$588,000 in proxy contest and related litigation expense and \$220,000 in FDIC deposit insurance premiums, partially offset by an increase of \$304,000 in salaries and employee benefits

For the six months ended June 30, 2013, the Company had net income of \$17.9 million, or \$1.03 per diluted share, as compared to net income of \$2.0 million, or \$0.11 per diluted share for the comparable period in 2012. The improvement in operating results for the six months ended June 30, 2013, as compared to the same period last year was the result of a partial reversal of the deferred tax asset valuation allowance of \$13.8 million, a \$223,000 increase in net interest income, a \$2.3 million decrease in the provision for loan losses and a \$1.0 million decrease in noninterest expense, partially offset by a \$352,000 decrease in noninterest income. The \$1.0 million decrease in noninterest expense was comprised of reductions of \$1.4 million in net OREO-related expenses, \$499,000 in proxy contest and related litigation expenses, \$198,000 in professional fees and \$101,000 in occupancy and equipment partially offset by a \$679,000 increase in prepayment penalties on FHLB advances and a \$491,000 increase in salaries and employee benefits.

During the six months ended June 30, 2013, our total loan portfolio increased \$10.4 million, or 1.6% from December 31, 2012, primarily due to a \$15.2 million, or 6.9% increase in commercial real estate loans and a \$10.0 million, or 51.4% increase in construction/land development loans partially offset by a \$12.1 million, or 4.0% decrease in one-to-four family residential loans. Our multifamily loan portfolio balance was basically unchanged since December 31, 2012.

The following table details our five largest lending relationships at June 30, 2013:

36

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

Borrower ⁽¹⁾	One-to-Four Family Residential (Rental Properties) (In thousands)	Multifamily	Commercial Real Estate (Rental Properties)	Construction/Land Development	Aggregate Balance of Loans ⁽²⁾
Real estate builder	\$18,484	\$—	\$95	\$ 3,875	\$22,454
Real estate investor	—	—	18,020	—	18,020
Real estate builder ⁽³⁾	14,418	—	220	—	14,638
Real estate investor	8,845	4,004	1,714	—	14,563
Real estate builder ⁽⁴⁾	12,747	—	803	—	13,550
Total	\$54,494	\$4,004	\$20,852	\$ 3,875	\$83,225

(1) The composition of borrowers represented in the table may change between periods.

(2) Net of LIP.

(3) Of this amount, \$13.3 million were considered impaired loans, all of which were performing one-to-four family residential loans.

(4) Of this amount, \$12.7 million were considered impaired loans, of which \$11.9 million were performing one-to-four family residential loans and \$803,000 is a restructured performing commercial real estate loan.

These relationships, which represent 12.4% of our loans, net of undisbursed funds, decreased \$2.4 million from December 31, 2012. Of the three builders listed above, two are operating under restructured loan plans established by the Bank. As of June 30, 2013, the loans to both builders continue to perform in accordance with the terms of their respective plans. None of the restructured loans to these two borrowers have ever been delinquent, except for one commercial real estate loan which was restructured and brought current at the end of 2010. The remaining three borrowers were current on their loan payments at June 30, 2013. We monitor the performance of these borrowing relationships very closely due to the concentration risk they possess in relation to the entire loan portfolio.

Critical Accounting Policies

Our significant accounting policies are fundamental to understanding our results of operations and financial condition because they require that we use estimates and assumptions that may affect the value of our assets or liabilities and our financial results. These policies are critical because they require management to make difficult, subjective and complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or using different assumptions. These policies govern the allowance for loan and lease losses ("ALLL"), the valuation of OREO and foreclosed assets, and the calculation of deferred taxes, fair values and other-than-temporary impairments on the market value of investments. These policies and estimates are described in further detail in Part II, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 1, Summary of Significant Accounting Policies within the 2012 Form 10-K. There have not been any material changes in the Company's critical accounting policies and estimates as compared to the disclosure contained in the Company's 2012 Form 10-K.

Comparison of Financial Condition at June 30, 2013 and December 31, 2012

General. At June 30, 2013, total assets decreased \$40.4 million to \$902.2 million from \$942.7 million at December 31, 2012. This decrease in total assets was primarily the result of reductions in interest-bearing deposits of \$55.6 million and OREO of \$3.1 million, partially offset by increases of \$13.9 million in net deferred tax assets, \$3.3 million in net loans receivable and \$1.4 million in cash on hand. Total liabilities decreased \$40.4 million to \$715.1 million at June 30, 2013 from \$755.5 million at December 31, 2012, primarily due to decreases of \$35.0 million in deposits and \$9.1 million in advances from the FHLB, partially offset by a \$2.7 million increase in investment transactions payable.

Stockholders' equity decreased \$42,000 to \$187.1 million from December 31, 2012, primarily the result of net income of \$17.9 million generated during the six months ended June 30, 2013 and share-based compensation of \$1.5 million offset by \$16.5 million related to the repurchase and retirement of common stock, a \$2.6 million decline in accumulated other comprehensive income and the payment of \$658,000 in dividends to shareholders.

Assets. Total assets were \$902.2 million at June 30, 2013, a decrease of \$40.4 million, or 4.3% from \$942.7 million at December 31, 2012. The following table details the changes in the composition of our assets at June 30, 2013 from December 31, 2012.

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

	Balance at June 30, 2013	Increase/(Decrease) from December 31, 2012	Percent Increase/(Decrease)	
	(Dollars in thousands)			
Cash on hand and in banks	\$5,682	\$1,393	32.5	%
Interest-bearing deposits	27,837	(55,615)	(66.6))
Investments available-for-sale, at fair value	152,664	402	0.3	
Loans receivable, net	653,757	3,289	0.5	
Premises and equipment, net	17,679	(394)	(2.2))
FHLB stock, at cost	7,149	(132)	(1.8))
Accrued interest receivable	3,633	149	4.3	
Deferred tax assets, net	14,870	13,870	1,387.0	
OREO	14,226	(3,121)	(18.0))
Prepaid expenses and other assets	4,718	(281)	(5.6))
Total assets	\$902,215	\$(40,440)	(4.3))%

Interest-bearing deposits decreased \$55.6 million to \$27.8 million at June 30, 2013, from \$83.5 million at December 31, 2012. During the six months ended June 30, 2013, excess liquidity was used primarily to fund maturing certificates of deposit and restructure our FHLB advances by prepaying \$33.1 million with a weighted-average interest rate of 2.93% and contemporaneously borrowing a three year \$34.0 million fixed-rate FHLB advance at a rate of 0.81%. In addition, during the six months ended June 30, 2013, we repaid a \$50.0 million maturing FHLB advance with an interest rate of 2.17% and borrowed \$40.0 million in FHLB fixed-rate advances at an average rate of 79 basis points to fund our loan growth. Investments available-for-sale increased \$402,000, or 0.3% to \$152.7 million at June 30, 2013, from \$152.3 million at December 31, 2012. Net loans receivable increased \$3.3 million to \$653.8 million at June 30, 2013 from December 31, 2012. Loan originations for the six months ended June 30, 2013 were \$82.8 million, of which \$26.3 million and \$30.8 million were in one-to-four family residential and commercial real estate loans, respectively. Principal repayments for the loan portfolio during the six months ended June 30, 2013 were \$62.8 million and loans transferred to OREO were \$5.4 million. OREO decreased \$3.1 million, or 18.0% to \$14.2 million at June 30, 2013, from \$17.3 million at December 31, 2012 as we continue to sell our inventory of foreclosed real estate.

During the second quarter of 2013, we sold \$30.0 million of low yielding, adjustable-rate, agency securities and purchased \$23.9 million of fixed-rate investments and \$7.1 million of adjustable-rate investments. These purchases included mortgage-backed securities, collateralized mortgage obligations ("CMOs") securities and investment grade corporate bonds offering significantly higher yields than the securities sold during the quarter. The yields on the securities purchased during the quarter range from 0.98% to 2.36% as compared to the yields on the securities sold which ranged from 0.24% to 0.45%.

As of June 30, 2013, the consolidated balance sheet included gross deferred tax assets of \$20.0 million and a deferred tax asset valuation allowance of \$2.6 million. Management anticipates utilizing \$2.1 million of the remaining valuation allowance to offset our projected tax expense in the third and fourth quarters of 2013. The remaining \$545,000 deferred tax asset valuation allowance which related to a capital loss carryforward will most likely not be recognized. The ultimate utilization of the remaining valuation allowance and realization of deferred tax assets is dependent upon the Company remaining profitable. Deferred tax liabilities totaled \$2.5 million, resulting in a net deferred tax asset of \$14.9 million at June 30, 2013.

Deposits. During the first six months of 2013, deposits decreased \$35.0 million to \$630.8 million at June 30, 2013, compared to \$665.8 million at December 31, 2012. Deposit accounts consisted of the following:

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

	Balance at June 30, 2013	Increase/ (Decrease) from December 31, 2012	Percent Increase/(Decrease)	
	(Dollars in thousands)			
Noninterest-bearing	\$7,948	\$1,794	29.2	%
NOW	17,432	1,488	9.3	
Statement savings	18,526	253	1.4	
Money market	147,217	(14,502)	(9.0))
Certificates of deposit	439,714	(23,993)	(5.2))
	\$630,837	\$(34,960)	(5.3))%

Money market and certificates of deposit accounts decreased \$14.5 million and \$24.0 million, respectively, during the first six months of 2013 partially offset by increases of \$1.8 million and \$1.5 million in noninterest-bearing and NOW accounts for the same period. The decrease in certificates of deposit was primarily the result of our strategy to utilize our excess liquidity, mainly cash, to reduce higher-cost deposits by competing less aggressively on deposit interest rates. We believe customers who were more interest rate sensitive elected to withdraw their funds to invest in higher yielding investment products, which contributed to the decline in our deposit balances. Included in the certificates of deposit balance at June 30, 2013 was \$10.7 million in public funds compared to \$1.8 million in public funds at December 31, 2012. We did not have any brokered deposits at June 30, 2013 or December 31, 2012.

FHLB Advances. We use advances from the FHLB as an alternative funding source to manage funding costs, reduce interest rate risk and to leverage our balance sheet. Total FHLB advances at June 30, 2013 were \$74.0 million, a decrease of \$9.1 million from December 31, 2012. During the six months ended June 30, 2013, we restructured our balance sheet by prepaying \$33.1 million in FHLB advances with a weighted-average interest rate of 2.93% incurring a prepayment penalty of \$679,000 which were replaced with a \$34.0 million three year advance from the FHLB at 0.81%. In January 2013, a \$50.0 million advance from the FHLB, with an interest rate of 2.17%, matured and was not renewed. In addition, during the second quarter of 2013, we borrowed \$40.0 million in FHLB fixed-rate advances at an average interest rate of 0.79%, of which \$20.0 million will mature in May 2016 and the remaining \$20.0 million will mature in April 2017. These funds were borrowed to fund our loan growth.

Stockholders' Equity. Total stockholders' equity decreased \$42,000 to \$187.1 million at June 30, 2013 from approximately the same amount at December 31, 2012. The decrease was primarily the result of net income of \$17.9 million generated during the six months ended June 30, 2013 and share-based compensation of \$1.5 million offset by \$16.5 million related to the repurchase and retirement of common stock and a \$2.6 million decline in accumulated other comprehensive income which includes the unrealized loss, net of taxes, on investments available-for-sale. During the period, we also paid \$658,000 in dividends to shareholders. The decline in accumulated other comprehensive income reflects the recent rise in long-term market interest rates that reduced the fair value of our investment portfolio.

Comparison of Operating Results for the Three and Six Months Ended June 30, 2013 and 2012

General. Net income for the quarter ending June 30, 2013 was \$16.4 million, an increase of \$15.0 million from \$1.4 million for the comparable quarter in the prior year. The increase in net income was due to a \$13.8 million federal income tax benefit related to the partial reversal of the valuation allowance on deferred tax assets, a \$544,000 increase in net interest income, a \$550,000 reduction in the provision for loan losses and a \$1.3 million decrease in noninterest expense, partially offset by a \$175,000 decrease in noninterest income.

Net Interest Income. Net interest income for the quarter ended June 30, 2013 increased \$544,000 to \$7.8 million, as compared to \$7.3 million for the same quarter in 2012. The increase was attributable to a \$1.3 million decrease in interest expense partially offset by a \$715,000 decrease in interest income. Average interest-earning assets decreased

\$117.7 million to \$841.6 million for the three months ended June 30, 2013, from the same quarter in 2012 primarily due to a decrease in the average balance of our interest-bearing deposits of \$127.4 million partially offset by an increase of \$12.4 million in the average balance of investments available-for-sale. Average interest-bearing liabilities decreased \$128.5 million to \$686.9 million for the second quarter of 2013 compared to the second quarter of 2012, primarily due to declines in the average balance of our money market accounts, certificates of deposit and FHLB advances of \$17.2 million, \$90.3 million and \$24.5 million, respectively. During the same period, our yield on interest-earning assets increased 26 basis points while our cost of funds decreased 45 basis points. Our interest rate spread for the quarter ended June 30, 2013 increased 71 basis points to 3.51% compared to 2.80% for the second quarter of 2012. Our net interest margin for the second quarter of 2013 increased 68 basis points to 3.71% from 3.03% for the same quarter last year. The

ratio of average interest-earning assets to average interest-bearing liabilities increased to 122.52% at June 30, 2013, from 117.64% at June 30, 2012, reflecting our efforts to convert nonearning assets to earning assets, resulting in a more efficient balance sheet.

Net interest income for the six months ended June 30, 2013 increased \$223,000 to \$15.2 million, as compared to \$15.0 million for the same period in 2012. The increase was attributable to a \$2.6 million decrease in interest expense partially offset by a \$2.3 million decrease in interest income. Average interest-earning assets decreased \$133.5 million to \$842.4 million for the six months ended June 30, 2013 from the six months ended June 30, 2012 primarily due to decreases in the average balance of our interest-bearing deposits and loan portfolio of \$124.5 million and \$22.5 million, respectively. Average interest-bearing liabilities decreased \$146.8 million to \$687.7 million for the first six months of 2013 compared to the first six months of 2012, primarily due to declines in the average balance of our money market accounts, certificates of deposit and FHLB advances which decreased \$18.7 million, \$96.1 million and \$35.2 million, respectively. During the same period, our yield on interest-earning assets increased 14 basis points while our cost of funds decreased 41 basis points. Our interest rate spread for the six months ended June 30, 2013 increased 55 basis points to 3.39% compared to 2.84% for the first six months of 2012. Our net interest margin for the first six months of 2013 increased 54 basis points to 3.61% from 3.07% for the same period in 2012. The following table sets forth the effects of changes in rates and volumes on our net interest income:

	Three Months Ended June 30, 2013 Compared to June 30, 2012			Six Months Ended June 30, 2013 Compared to June 30, 2012		
	Increase/(Decrease) Due to Rate	Volume	Total	Increase/(Decrease) Due to Rate	Volume	Total

Interest Income. Total interest income for the second quarter of 2013 decreased \$715,000, or 6.9% to \$9.7 million from \$10.4 million, as compared to the second quarter of 2012.

The following table compares detailed average interest-earning asset balances, associated yields and resulting changes in interest and dividend income for the three months ended June 30, 2013 and 2012:

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

	Three Months Ended June 30,				Increase/(Decrease) in Interest and Dividend Income
	2013		2012		
	Average Balance	Yield	Average Balance	Yield	
	(Dollars in thousands)				
Loans receivable, net	\$ 656,368	5.52	% \$ 658,861	5.95	% \$ (739)
Investments available-for-sale	150,811	1.60	138,409	1.44	103
Interest-bearing deposits	27,213	0.26	154,643	0.25	(79)
FHLB stock	7,210	—	7,413	—	—
Total interest-earning assets	\$ 841,602	4.60	% \$ 959,326	4.34	% \$ (715)

Interest income from net loans receivable decreased \$739,000 to \$9.1 million during the second quarter of 2013, as compared to the same period in 2012. The reason for the decline was due to a 43 basis point decrease in the average loan yield from the comparable quarter in 2012, resulting in a \$702,000 decrease in interest income and a \$2.5 million decrease in the average loan balance to \$656.4 million, resulting in a \$37,000 decrease in interest income.

Interest income from investments available-for-sale increased \$103,000 to \$603,000 for the three months ended June 30, 2013, as compared to \$500,000 for the comparable period in 2012. The primary reason for the increase in interest income from investments available-for-sale was due to an increase of 16 basis points in the average investment yield, resulting in a \$59,000 increase in interest income and a \$12.4 million increase in the average balance of investments contributing \$44,000 to the increase in interest income during the quarter compared to the same quarter in 2012. The increase in the average investment yield reflects the recent sales of low yielding, adjustable-rate agency securities and the purchase of higher yielding, predominately fixed-rate securities.

The following table compares detailed average interest-earning asset balances, associated yields and resulting changes in interest and dividend income for the six months ended June 30, 2013 and 2012:

	Six Months Ended June 30,				Increase/(Decrease) in Interest and Dividend Income
	2013		2012		
	Average Balance	Yield	Average Balance	Yield	
	(Dollars in thousands)				
Loans receivable, net	\$ 653,676	5.54	% \$ 676,149	6.00	% \$ (2,167)
Investments available-for-sale	150,912	1.43	137,321	1.59	(17)
Interest-bearing deposits	30,528	0.26	155,011	0.25	(155)
FHLB stock	7,240	—	7,413	—	—
Total interest-earning assets	\$ 842,356	4.56	% \$ 975,894	4.42	% \$ (2,339)

Interest income from net loans receivable decreased \$2.2 million to \$18.1 million during the first six months of 2013, as compared to the same period in 2012. The reason for the decline was due to a 46 basis point decrease in the average loan yield from the first six months of 2012, resulting in a \$1.5 million decrease in interest income and a \$22.5 million decrease in the average loan balance to \$653.7 million, resulting in a \$671,000 decrease in interest income.

Interest income from investments available-for-sale declined \$17,000 to \$1.1 million for the six months ended June 30, 2013, as compared to the comparable period in 2012. The primary reason for the decrease in interest income from investments available-for-sale was due to a decrease of 16 basis points in the average investment yield, resulting in a \$162,000 decrease in interest income due to current rate environment, partially offset by a \$145,000 increase in interest income due to a \$13.6 million increase in the average balance of investments during the first six months of 2013 compared to the first six months of 2012. Interest income on interest-bearing deposits decreased \$155,000 during the six months ended June 30, 2013 primarily due to a decrease of \$124.5 million in the average balance of interest-bearing deposits compared to the same period in 2012. The increase in the average investment yield reflects the recent sales of low yielding, adjustable-rate agency securities and the purchase of higher yielding, predominately fixed-rate securities.

Interest Expense. Total interest expense for the three months ended June 30, 2013 was \$1.9 million, a decrease of \$1.3 million compared to \$3.1 million for the three months ended June 30, 2012.

The following table details average balances, cost of funds and the resulting decrease in interest expense for the three months ended June 30, 2013 and 2012:

	Three Months Ended June 30,				Increase/ (Decrease) in Interest Expense
	2013		2012		
	Average Balance	Cost	Average Balance	Cost	
	(Dollars in thousands)				
NOW	\$ 17,325	0.21	% \$ 14,577	0.14	% \$ 4
Statement savings	18,666	0.15	17,962	0.20	(2)
Money market	147,369	0.18	164,575	0.28	(48)
Certificates of deposit	444,933	1.51	535,268	1.87	(819)
Advances from the FHLB	58,615	0.80	83,068	2.46	(394)
Total interest-bearing liabilities	\$ 686,908	1.09	% \$ 815,450	1.54	% \$(1,259)

Interest expense on our money market accounts decreased \$48,000, primarily as a result of a decrease in the average cost of these funds of 10 basis points, or \$36,000, to 0.18% for the second quarter of 2013, compared to 0.28% for the same quarter in 2012. The average cost of our certificates of deposit decreased 36 basis points, or \$399,000, as compared to the second quarter of 2012, due to maturing certificates repricing to lower rates. The decline in interest expense was also the result of a \$90.3 million decrease in the average balance of certificates of deposit, as a number of certificates of deposit were not renewed at maturity, resulting in an \$420,000 reduction of interest expense. Interest expense related to our FHLB advances decreased \$394,000, primarily due to a 166 basis point decline in the rate paid for these advances to 0.80% for the second quarter of 2013, from 2.46% for same quarter in 2012 resulting from the refinance and prepayment of certain advances during the first quarter of 2013, as discussed above. As a result of this restructuring, the cost of FHLB advances declined by \$243,000. In addition, the average balance of FHLB advances decreased to \$58.6 million at June 30, 2013, as compared to \$83.1 million at June 30, 2012, resulting in a \$151,000 reduction in interest expense.

	Six Months Ended June 30,				Increase/ (Decrease) in Interest Expense
	2013		2012		
	Average Balance	Cost	Average Balance	Cost	
	(Dollars in thousands)				
NOW	\$ 16,893	0.18	% \$ 14,301	0.15	% \$ 4
Statement savings	18,486	0.17	17,893	0.20	(2)
Money market	152,888	0.20	171,550	0.29	(91)
Certificates of deposit	451,603	1.54	547,681	1.93	(1,823)
Advances from the FHLB	47,871	1.55	83,067	2.46	(650)

Total interest-bearing liabilities	\$687,741	1.17	%	\$834,492	1.58	%	\$(2,562))
------------------------------------	-----------	------	---	-----------	------	---	-----------	---

Our interest expense for the six months ended June 30, 2013 decreased \$2.6 million to \$4.0 million, from \$6.6 million for the same period in 2012. The average balance of our money market accounts decreased \$18.7 million, which resulted in a decrease of \$26,000 in interest expense, as compared to the same period last year. The average cost for the money market accounts decreased by nine basis points, further reducing interest expense \$65,000 for the first six months of 2013, as compared to the same period last year. The average cost of our certificates of deposit for the first half of 2013 decreased 39 basis points, compared to the first six months of 2012, resulting in a decline in interest expense of \$888,000. The decline in interest expense was also affected by a decrease in the average balance of certificates of deposit of \$96.1 million, which resulted in a \$935,000 decline in interest expense. Interest expense related to advances from the FHLB decreased \$650,000 for the six months ended June 30, 2013 from

the same period in 2012. The average balance of advances decreased \$35.2 million from the same period in 2012 primarily due to the repayment of maturing advances resulting in a \$432,000 decline in interest expense. The average cost of FHLB advances decreased 91 basis points which resulted in a \$218,000 decreases in interest expense.

Provision for Loan Losses. Management recognizes that loan losses may occur over the life of a loan and that the ALLL must be maintained at a level necessary to absorb specific losses on impaired loans and probable losses inherent in the loan portfolio. Our methodology for analyzing the ALLL consists of two components: general and specific allowances. The general allowance is determined by applying factors to our various groups of loans. Management considers factors such as charge-off history, the prevailing economy, borrower's ability to repay, the regulatory environment, competition, geographic and loan type concentrations, policy and underwriting standards, nature and volume of the loan portfolio, managements' experience level, our loan review and grading systems, the value of underlying collateral and the level of problem loans in assessing the ALLL. The specific allowance component is created when management believes that the collectability of a specific loan, has been impaired and a loss is probable. The specific reserves are computed using current appraisals, listed sales prices and other available information less costs to complete, if any, and costs to sell the property. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events differ from predictions.

During the quarter ended June 30, 2013, management evaluated the adequacy of the ALLL and concluded that a provision of \$100,000 was required for the second quarter of 2013, compared to a \$650,000 provision for the same quarter in 2012. The following items were considered in evaluating the loan loss provision for the quarter ended June 30, 2013:

• Delinquent loans, loans over 30 days past due, were \$8.1 million at June 30, 2013, decreasing \$12.8 million and \$9.7 million from December 31, 2012 and June 30, 2012, respectively;

• Nonperforming loans were \$14.6 million at June 30, 2013 decreasing \$8.2 million and \$8.0 million from December 31, 2012 and June 30, 2012, respectively;

• Nonperforming loans as a percent of total loans was 2.2% at June 30, 2013, compared to 3.4% at both December 31, 2012 and June 30, 2012, continuing the trend of improvement within the loan portfolio; and

• The weighted-average historical loss factor, which is an element within the loss provision calculation, decreased over the prior three year period as charge-offs decreased.

The ALLL decreased \$229,000 to \$12.3 million at June 30, 2013 compared to \$12.5 million at December 31, 2012, as a result of net charge-offs during the first six months of \$329,000. The ALLL represented 84.6% of nonperforming loans and 1.8% of total loans at June 30, 2013 compared to 55.1% and 1.9%, respectively, at December 31, 2012.

We believe that the ALLL as of June 30, 2013 was adequate to absorb the probable and inherent risks of loss in the loan portfolio at that date. While we believe the estimates and assumptions used in our determination of the adequacy of the allowance are reasonable, there can be no assurance that such estimates and assumptions will be proven incorrect in the future, that the actual amount of future provisions will not exceed the amount of past provisions or that any increased provisions that may be required will not adversely impact our financial condition and results of operations. Future additions to the allowance may become necessary based upon changing economic conditions, the level of problem loans, business conditions, credit concentrations, increased loan balances, or changes in the underlying collateral of the loan portfolio. In addition, the determination of the amount of our ALLL is subject to review by bank regulators as part of the routine examination process, which may result in the establishment of additional loss reserves or the charge-off of specific loans against established loss reserves based upon their judgment of information available to them at the time of their examination.

The following table presents a breakdown of our nonperforming assets and as a percent of total assets at the dates indicated:

43

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

	June 30, 2013	December 31, 2012	June 30, 2012	Six Month Increase/(Decrease)	One Year Increase/ (Decrease)
(In thousands)					
Nonperforming loans:					
One-to-four family residential	\$ 5,709	\$ 6,248	\$ 9,110	\$ (539)	\$ (3,401)
Multifamily	244	4,711	2,039	(4,467)	(1,795)

Construction/land development	4,369	4,767	8,731	(398)	(4,362)
Consumer	717	759	212	(42)	505
Total nonperforming loans	14,559	22,759	22,626	(8,200)	(8,067)
OREO	14,226	17,347	22,206	(3,121)	(7,980)
Total nonperforming assets	\$ 28,785	\$ 40,106	\$ 44,832	\$ (11,321)	\$ (16,047)
Nonperforming assets as a percent of total assets	3.19	% 4.25	% 4.49	%	

Nonperforming loans include loans to borrowers who are experiencing deteriorating financial conditions and there is doubt as to the ultimate recoverability of the full principal and interest due the Bank in accordance with the terms of the loan agreement. Nonperforming loans decreased \$8.2 million to \$14.6 million at June 30, 2013, from \$22.8 million at December 31, 2012. This decrease was primarily the result of \$1.8 million of loans classified as nonperforming during the six months ended June 30, 2013, offset by \$1.2 million in net charge-offs, \$3.1 million in short sales and \$5.4 million of loans transferred to OREO.

The three largest nonperforming loans in the loan portfolio at June 30, 2013 included a \$3.9 million construction/land development loan secured by 34 acres for a 251-unit residential development located in Whatcom County. The project consists of 77 detached condominium lots (single-family residences) and vacant land for 174 attached units (multifamily). All of the ground work has been completed and the property is ready for construction, although no vertical construction has taken place. The second largest nonperforming loan consisted of a \$2.6 million commercial real estate loan secured by a retail/office building in Pierce Country. The third largest nonperforming loan was a \$1.0 million one-to-four family residential loan secured by a single family vacation rental located in King County.

Nonperforming assets continued to decrease during the quarter ended June 30, 2013. Nonperforming assets decreased \$11.3 million to \$28.8 million at June 30, 2013 from \$40.1 million at December 31, 2012.

The following table presents a breakdown of our TDRs:

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

	June 30, 2013	December 31, 2012	June 30, 2012	Six Month Increase/ (Decrease)	One Year Increase/ (Decrease)
(In thousands)					
Nonperforming TDRs:					
One-to-four family residential	\$2,858	\$3,422	\$3,697	\$(564)	\$(839)
Multifamily	—	1,058	1,076	(1,058)	(1,076)
Consumer	46	48	—	(2)	46
Total nonperforming TDRs	2,904	4,528	4,773	(1,624)	(1,869)
Performing TDRs:					
One-to-four family residential	47,756	52,644	49,695	(4,888)	(1,939)
Multifamily	1,229	1,239	1,247	(10)	(18)
Commercial real estate	12,204	11,965	11,750	239	454
Consumer	—	—	70	—	(70)
Total performing TDRs	61,189	65,848	62,762	(4,659)	(1,573)
Total TDRs	\$64,093	\$70,376	\$67,535	\$(6,283)	\$(3,442)

Our TDRs decreased \$6.3 million, or 8.9% to \$64.1 million at June 30, 2013, compared to \$70.4 million at December 31, 2012 and decreased \$3.4 million, or 5.1% as compared to \$67.5 million at June 30, 2012. During the first six months of 2013, we added \$1.4 million of new TDRs and transferred \$1.9 million of nonperforming TDRs to OREO, while \$3.4 million of TDRs were sold, \$1.7 million of TDRs were paid off and \$610,000 in principal payments were received.

As we work with our borrowers to help them through this difficult economic cycle, we explore all options available to minimize our risk of loss. At times, the best option for our customers and the Bank is to modify the loan for a period of time, usually one year or less. These modifications have included lowering the interest rate on the loan for a period of time and/or extending the maturity date of the loan or allowing interest only payments for a specific time frame. These modifications are granted only when there is a reasonable and attainable restructured loan plan that has been agreed to by the borrower and is in the Bank's best interest. Of the \$64.1 million in TDRs at June 30, 2013, \$61.2 million were performing and \$2.9 million were not performing according to their restructured payment terms.

The largest TDR relationship at June 30, 2013 totaled \$13.3 million and was comprised of one-to-four family residential rental properties located in King, Kitsap, Pierce and Thurston counties. At June 30, 2013, there was no LIP in connection with these restructured and impaired loans.

OREO includes properties acquired by the Bank through foreclosure or deed in lieu of foreclosure. The following table presents a breakdown of our OREO by county and number of properties at June 30, 2013.

	County				Total	Number of Properties	Percent of Total OREO
	King	Pierce	Kitsap	All Other			
(Dollars in thousands)							
OREO:							
One-to-four family residential	\$1,245	\$996	\$410	\$—	\$2,651	12	18.6 %
Commercial real estate ⁽¹⁾	563	7,615	920	1,349	10,447	14	73.5
Construction/land development	—	527	209	392	1,128	5	7.9
Total OREO	\$1,808	\$9,138	\$1,539	\$1,741	\$14,226	31	100.0 %

⁽¹⁾ Of the 14 properties classified as commercial real estate, eight are office/retail buildings, three are mixed-use buildings and three are undeveloped lots.

The following table presents a breakdown of our OREO activity:

45

	Three Months Ended June		Six Months Ended June	
	30, 2013	2012	30, 2013	2012
	(In thousands)			
Balance at beginning of period	\$ 16,310	\$ 22,448	\$ 17,347	\$ 26,044
Loans transferred to OREO	1,993	6,176	5,369	8,022
Capitalized improvements	5	—	38	—
Dispositions of OREO, net	(4,006)	(6,183)	(8,307)	(11,315)
Market value adjustments	(76)	(235)	(221)	(545)
Balance at end of period	\$ 14,226	\$ 22,206	\$ 14,226	\$ 22,206

OREO decreased \$2.1 million, or 12.8% during the second quarter ended June 30, 2013 to \$14.2 million, as sales and write-downs of OREO exceeded transfers of loans into OREO. We sold \$4.0 million of OREO during the second quarter of 2013, which was comprised of nine properties and generated a net gain on sale of \$383,000. OREO at June 30, 2013 consisted of \$10.4 million in commercial real estate properties, \$2.7 million in one-to-four family residential homes and \$1.1 million in construction/land development projects.

The three largest OREO properties at June 30, 2013 were office/retail buildings valued at \$3.4 million and \$1.8 million, both located in Pierce County, and a land development project approved for 105 one-to-four family residential lots valued at \$920,000 located in Kitsap County.

We continue to focus our efforts on converting nonperforming loans to OREO through foreclosure or deeds in lieu of foreclosure and selling the properties. By taking ownership of these properties, we can convert nonearning assets into earning assets on a more timely basis. Our success in this area is reflected by the improved ratio of our average interest-earning assets to average interest-bearing liabilities of 122.5% at June 30, 2013 compared to 119.8% and 117.6% at December 31, 2012 and June 30, 2012, respectively.

The following table summarizes selected financial data related to our ALLL and loan portfolio. All loan balances and ratios are calculated using loan balances that are net of LIP.

	At or For the Six Months Ended June 30,	
	2013	2012
	(Dollars in thousands)	
Provision for loan losses	\$ 100	\$ 2,350
Charge-offs	1,156	5,048
Recoveries	827	589
ALLL	12,313	14,450
ALLL as a percent of total loans	1.84	% 2.17
ALLL as a percent of nonperforming loans	84.57	63.86
Total nonperforming loans	\$ 14,559	\$ 22,626
Nonperforming loans as a percent of total loans	2.18	% 3.40
Total loans receivable	\$ 668,499	\$ 666,131
Total loans originated	82,794	34,015

Noninterest Income. Noninterest income decreased \$175,000 to \$155,000 for the quarter ended June 30, 2013 from \$330,000 for the same quarter in 2012. The following table provides a detailed analysis of the changes in the components of noninterest income:

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

	Three Months Ended June 30, 2013 (Dollars in thousands)	Increase/(Decrease) from June 30, 2012	Percent Increase/(Decrease)	
Service fees on deposit accounts	\$32	\$1	3.2	%
Loan service fees	69	(94)	(57.7))
Gain on sale of investments	1	(93)	(98.9))
Servicing rights, net	(4)) 8	(66.7))
Other	57	3	5.6	
Total noninterest income	\$155	\$(175)	(53.0))%

We recorded minimal gains on sales of investments during the quarter ended June 30, 2013 as compared to \$94,000 during the second quarter of 2012. During the second quarter of 2013, we sold \$30.0 million of low yielding, adjustable-rate agency securities and purchased \$23.9 million in higher yielding, fixed-rate securities and \$7.1 million of higher yielding, adjustable-rate investments. During the second quarter of 2012, we sold \$12.1 million of long-term, fixed-rate, mortgage-backed securities and purchased \$8.3 million of primarily adjustable-rate investments. Also, during the second quarter of 2013, loan prepayment fees were \$18,000 as compared to \$130,000 during the second quarter of 2012, which included prepayment penalties on two commercial real estate loans.

	Six Months Ended June 30, 2013 (Dollars in thousands)	Increase/(Decrease) from June 30, 2012	Percent Increase/(Decrease)	
Service fees on deposit accounts	\$49	\$2	4.3	%
Loan service fees	104	(90)	(46.4))
Gain on sale of investments	1	(287)	(99.7))
Servicing rights, net	(8)) 14	(63.6))
Other	113	9	8.7	
Total noninterest income	\$259	\$(352)	(57.6))%

The decrease in noninterest income for the six months ended June 30, 2013 from the comparable period in 2012 was principally the result of net gains on sales of investments during the first half of 2013 of \$1,000 as compared to net gains of \$288,000 on the sales of investments of \$22.9 million during the same period in 2012. During the first half of 2013, the sales of securities included low yielding, adjustable-rate agency securities resulting in lower gains as compared to the higher-yielding securities sold during the first half of 2012. Also, contributing to the decrease was \$18,000 in loan prepayment fees during the first half of 2013 as compared to \$132,000 during the first half of 2012.

Noninterest Expense. Noninterest expense increased \$1.3 million to \$5.3 million for the second quarter of 2013 from \$6.6 million for the comparable quarter in 2012. For the six months ended June 30, 2013, noninterest expense decreased \$1.0 million to \$11.2 million from \$12.2 million for the same period in 2012.

The following table provides a detailed analysis of the changes in the components of noninterest expense:

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

	Three Months Ended June 30, 2013 (Dollars in thousands)	Increase/(Decrease) from June 30, 2012	Percent Increase/(Decrease)	
Salaries and employee benefits	\$3,755	\$304	8.8	%
Occupancy and equipment	345	(50)	(12.7))
Professional fees	387	(81)	(17.3))

OREO market value adjustments	76	(159)	(67.7))
OREO-related expenses, net	151	(295)	(66.1))
Regulatory assessments	94	(220)	(70.1))
Insurance and bond premiums	121	21	21.0	
Proxy contest and related litigation	16	(588)	(97.4))
Marketing	42	(19)	(31.1))
Other general and administrative	526	88	20.1	
Total noninterest expense	\$5,306	\$(1,263)	(19.2))%

The decrease in noninterest expense for the second quarter of 2013, compared to the same period in 2012, was primarily a result of a \$588,000 decrease in proxy contest and related litigation expenses, a decrease of \$709,000 in net OREO-related expenses largely due to decreases in taxes, gains on sales of OREO properties due to fewer properties sold and in the market value adjustment and a \$220,000 decrease in our regulatory assessments. These decreases were partially offset by an increase of \$304,000 in salaries and benefits due to an increase in the bonus accrual.

	Six Months Ended June 30, 2013 (Dollars in thousands)	Increase/(Decrease) from June 30, 2012	Percent Increase/(Decrease)	
Salaries and employee benefits	\$7,369	\$491	7.1	%
Occupancy and equipment	699	(101)	(12.6))
Professional fees	743	(198)	(21.0))
Data processing	338	(28)	(7.7))
Gain on sales of OREO property, net	(1,015)	(666)	190.8)
OREO market value adjustments	221	(324)	(59.4))
OREO-related expenses, net	485	(450)	(48.1))
Regulatory assessments	377	(34)	(8.3))
Insurance and bond premiums	235	35	17.5	
Proxy contest and related litigation	105	(499)	(82.6))
Marketing	60	(53)	(46.9))
Prepayment penalty on FHLB advances	679	679	100.0	
Other general and administrative	888	142	19.0	
Total noninterest expense	\$11,184	\$(1,006)	(8.3))%

The decrease in noninterest expense for the six months ended June 30, 2013 compared to the same period in 2012 was primarily due to a decrease in net OREO-related expenses of \$1.4 million and a \$499,000 decrease in proxy contest

and related litigation expenses, partially offset by a FHLB prepayment penalty of \$679,000 incurred during the six months ended June 30, 2013 related to the refinance of a \$33.1 million advance discussed above and an increase in salaries and employee benefits of \$491,000 due primarily to an increase in the bonus accrual.

Federal Income Tax Expense. Our normal expected statutory income tax rate is 35%. However, during the second quarter of 2010, we evaluated our net deferred tax asset and determined it was prudent to establish a valuation allowance against the entire asset. During the quarter ended June 30, 2013, we determined that maintaining the full valuation allowance was no longer appropriate and reversed most of the valuation allowance. Reversing the valuation allowance resulted in a tax benefit of

\$13.8 million for both the quarter and six months ended June 30, 2013. While the full valuation allowance remained in effect, we did not recognize any significant tax expense or benefit in our Consolidated Financial Statements. We expect to recover \$2.1 million of the remaining allowance as an offset to our projected provision for income tax in the third and fourth quarters of 2013. Beginning with the first quarter of 2014, we expect to recognize income tax expense based upon the statutory rate noted above, although certain tax-exempt income likely will result in a slightly lower effective rate in future periods. For more discussion on our deferred tax asset and related valuation allowance, please refer to Note 11 in the Selected Notes to the Consolidated Financial Statements in this report on Form 10-Q.

Liquidity

We are required to have enough cash flow in order to maintain sufficient liquidity to ensure a safe and sound operation. We maintain cash flows above the minimum level believed to be adequate to meet the requirements of normal operations, including potential deposit outflows. On a daily basis, we review and update cash flow projections to ensure that adequate liquidity is maintained.

Our primary sources of funds are customer deposits, loan and investment repayments, maturing investment securities and advances from the FHLB. These funds, together with equity, are used to make loans, acquire investment securities and other assets, and fund continuing operations. At June 30, 2013, certificates of deposit scheduled to mature in one year or less totaled \$225.7 million. Management's policy is to maintain deposit rates at levels that are competitive with other local financial institutions. Historically, we have been able to retain a significant amount of the deposits as they mature. While maturities and the scheduled amortization of loans are a predictable source of funds, deposit flows and mortgage prepayments are greatly influenced by the level of interest rates, economic conditions and competition. We measure our liquidity based on our ability to fund our assets and to meet liability obligations when they come due. Liquidity (and funding) risk occurs when funds cannot be raised at reasonable prices or in a reasonable time frame to meet our normal or unanticipated obligations. We regularly monitor the mix between our assets and our liabilities to manage effectively our liquidity and funding requirements.

When deposits are not readily available and/or cost effective to provide the funds for our assets, we use alternative funding sources. These sources include, but are not limited to: advances from the FHLB, wholesale funding, brokered deposits, federal funds purchased and dealer repurchase agreements, as well as other short-term alternatives. These funding sources are generally collateral dependent. We may also liquidate assets to meet our funding needs. At June 30, 2013, the Bank maintained credit facilities with the FHLB totaling \$219.7 million with an outstanding balance of \$74.0 million. At June 30, 2013, we also had available a \$10.0 million credit facility with another financial institution, with no balance outstanding. For additional information, see the Consolidated Statements of Cash Flow in Item 1 of this Form 10-Q.

On a monthly basis, we estimate our liquidity sources and needs for the next six months. Also, we determine funding concentrations and our need for sources of funds other than deposits. This information is used by our Asset/Liability Management Committee in forecasting funding needs and investing opportunities. We believe that our current liquidity position and our expected operating results are sufficient to fund all of our existing commitments

Commitments and Off-Balance Sheet Arrangements

We are a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of our customers. These financial instruments include commitments to extend credit and the unused portions of lines of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated financial statements. Commitments to extend credit and lines of credit are not recorded as an asset or liability by us until the instrument is exercised. At June 30, 2013 and December 31, 2012, we had no commitments to originate loans for sale.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the loan agreement. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. We evaluate each customer's creditworthiness on a case-by-case basis. The amount of the collateral obtained, if deemed necessary by us upon extension of credit, is based on our credit evaluation of the customer. The amount and type of collateral required varies, but may include real estate and income-producing commercial properties.

The following table summarizes our outstanding commitments to originate loans, to advance additional amounts pursuant to outstanding lines of credit and to disburse funds related to our construction loans at June 30, 2013.

	Total Amounts Committed	Amount of Commitment Expiration - Per Period			
		Through One Year	After One Through Three Years	After Three Through Five Years	After Five Years
	(In thousands)				
Commitments to originate loans	\$12,068	\$12,068	\$—	\$—	\$—
Unused portion of lines of credit	14,300	1,741	1,715	7,147	3,697
Undisbursed portion of construction loans	15,873	11,200	4,673	—	—
Total commitments	\$42,241	\$25,009	\$6,388	\$7,147	\$3,697

First Financial Northwest and its subsidiaries from time to time are involved in various claims and legal actions arising in the ordinary course of business. There are currently no matters that in the opinion of management, would have a material adverse effect on First Financial Northwest's consolidated financial position, results of operation or liquidity.

Among our contingent liabilities are exposures to limited recourse arrangements with respect to sales of whole loans and participation interests.

We anticipate that we will continue to have sufficient funds and alternative funding sources to meet our current commitments.

Capital

At June 30, 2013, stockholders' equity totaled \$187.1 million, or 20.7% of total assets. Our book value per share of common stock was \$10.88 at June 30, 2013 compared to \$9.95 at December 31, 2012. Consistent with our goal to operate a sound and profitable financial organization, we actively seek to maintain a "well-capitalized" institution in accordance with regulatory standards. As of June 30, 2013, the Bank exceeded all regulatory capital requirements. Regulatory capital ratios for the Bank only were as follows at June 30, 2013: Tier 1 leverage capital 19.24%; Tier 1 risk-based capital 27.99%; and Total risk-based capital 29.25%. The regulatory capital requirements to be considered well capitalized are 5%, 6% and 10%, respectively. The Bank met the financial ratios for "well-capitalized" status at June 30, 2013. In addition, at June 30, 2013, First Financial Northwest, the parent company of the Bank, had \$4.0 million of available cash to potentially increase its investment in the Bank.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

General. Our Board of Directors has approved an asset/liability management policy to guide management in maximizing interest rate spread by managing the differences in terms between interest-earning assets and interest-bearing liabilities while maintaining acceptable levels of liquidity, capital adequacy, interest rate sensitivity, credit risk and profitability. The policy established an Investment and Asset/Liability Management Committee comprised of certain members of senior management and the Board of Directors. The Committee's purpose is to communicate, coordinate and manage our asset/liability position consistent with our business plan and Board-approved policies. The Investment and Asset/Liability Management Committee meets quarterly to review various areas including:

- economic conditions;
- interest rate outlook;
- asset/liability mix;
- interest rate risk sensitivity;

- current market opportunities to promote specific products;
- historical financial results;
- projected financial results; and
- capital position.

The Committee also reviews current and projected liquidity needs. As part of its procedures, the Investment and Asset/Liability Management Committee regularly reviews interest rate risk by forecasting the impact that changes in interest rates may have on net interest income and the market value of portfolio equity, which is defined as the net present value of an institution's existing assets, liabilities and off-balance sheet instruments and evaluating such impacts against the maximum potential change in the market value of portfolio equity that is authorized by the Board of Directors.

Our Risk When Interest Rates Change. The rates of interest we earn on assets and pay on liabilities generally are established contractually for a period of time. Market interest rates change over time. Our loans generally have longer maturities than our deposits. Accordingly, our results of operations, like those of other financial institutions, are impacted by changes in interest rates and the interest rate sensitivity of our assets and liabilities. The risk associated with changes in interest rates and our ability to adapt to these changes is known as interest rate risk and is our most significant market risk.

We have utilized the following strategies in our efforts to manage interest rate risk:

- we have attempted, where possible, to extend the maturities of our deposits and FHLB advances, which typically fund our long-term assets;
- we have invested in securities with relatively short average lives, generally less than eight years; and
- we have added adjustable-rate securities to our investment portfolio.

During the second quarter of 2013, we sold \$30.0 million of low yielding, adjustable-rate, agency securities and purchased \$23.9 million of fixed-rate investments and \$7.1 million of adjustable-rate investments. These purchases included mortgage-backed securities, CMOs and investment grade corporate bonds offering significantly higher yields than the securities sold during the quarter.

How We Measure the Risk of Interest Rate Changes. We monitor our interest rate sensitivity on a quarterly basis to measure the change in net interest income as a percentage of net income in varying rate environments. Management uses various assumptions to evaluate the sensitivity of our operations to changes in interest rates. Although management believes these assumptions are reasonable, the interest rate sensitivity of our assets and liabilities on net interest income and the market value of portfolio equity could vary substantially if different assumptions were used or actual experience differs from these assumptions. Although certain assets and liabilities may have similar maturities or periods of repricing, they may react differently to changes in market interest rates. The interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types of assets and liabilities lag behind changes in market interest rates. Non-uniform changes and fluctuations in market interest rates across various maturities will also affect the results presented. In addition, certain assets, such as adjustable-rate mortgage loans, have features which restrict changes in interest rates on a short-term basis and over the life of the asset. Further, a portion of our adjustable-rate loans have interest rate floors below which the loan's contractual interest rate may not adjust. Approximately 22.0% of our total loans were comprised of adjustable-rate loans at June 30, 2013. At that date, \$68.7 million, or 45.6% of these loans with a weighted-average interest rate of 4.7% were at their floor interest rate. The inability of our loans to adjust downward can contribute to increased income in periods of declining interest rates. Also, when loans are at their floors, there is a further risk that our interest income may not increase as rapidly as our cost of funds during periods of increasing interest rates. Further, in the event of a significant change in interest rates, prepayment and early withdrawal levels would likely deviate from those assumed. Finally, the ability of many borrowers to service their debt may decrease in the event of an interest rate increase. We consider all these factors in monitoring our interest rate exposure.

The assumptions we use are based upon a combination of proprietary and market data that reflect historical results and current market conditions. These assumptions relate to interest rates, loan prepayments, deposit decay rates and the market value of certain assets under the various interest rate scenarios. We use market data to determine prepayments and maturities of loans, investments and borrowings and use our own assumptions on deposit decay rates except for time deposits. Time deposits are modeled to reprice to market rates upon their stated maturities. We also assume that non-maturity deposits can be maintained with rate adjustments not directly proportionate to the change in market interest rates, based upon our historical deposit decay rates.

Our income simulation model examines changes in net interest income in which interest rates were assumed to remain at their base level, gradually increase by 100, 200 and 300 basis points over a 12 month period, or decline assuming a gradual 100 basis point reduction in rates. Reductions of rates by 200 and 300 basis points were not reported due to

the very low rate environment. The current federal funds rate is 0.25% making a 200 and 300 basis point decrease impossible.

The following table illustrates the change in our net interest income at June 30, 2013 that would occur in the event of a gradual change in interest rates equally across all maturities, with no effect given to any steps that we might take to counter the effect of that interest rate movement.

51

Net Interest Income Change at June 30, 2013

Basis Point Change in Rates	% Change
+300	4.12%
+200	3.75%
+100	3.05%
Base	1.57%
(100)	0.86%

The following table illustrates the change in our net portfolio value (“NPV”) at June 30, 2013 that would occur in the event of an immediate change in interest rates equally across all maturities, with no effect given to any steps that we might take to counter the effect of that interest rate movement.

Basis Point Change in Rates ⁽¹⁾	Net Portfolio Value ⁽²⁾			Net Portfolio as % of Portfolio Value of Assets		Market Value of Assets ⁽⁶⁾
	Amount	\$ Change ⁽³⁾	% Change	NPV Ratio ⁽⁴⁾	% Change ⁽⁵⁾	
	(Dollars in thousands)					
+300	\$ 149,161	\$(52,829)	(26.15)	17.84	(5.74)	\$ 836,027
+200	169,864	(32,126)	(15.90)	19.61	(3.49)	866,330
+100	186,962	(15,028)	(7.44)	20.92	(1.63)	893,643
Base	201,990	—	—	21.96	—	919,764
(100)	226,060	24,070	11.92	23.81	2.62	949,616

(1) The current federal funds rate is 0.25%, making a 200 and 300 basis point drop impossible.

(2) The net portfolio value is the difference between the present value of the discounted cash flows of assets and liabilities and represents the market value of the Company's equity for any given interest rate scenario. Net portfolio value is useful for determining, on a market value basis, how equity changes in response to various interest rate scenarios. Large changes in net portfolio value reflect increased interest rate sensitivity and generally more volatile earnings streams.

(3) The increase or decrease in the estimated net portfolio value at the indicated interest rates compared to the net portfolio value assuming no change in interest rates.

(4) Net portfolio value divided by the market value of assets.

(5) The increase or decrease in the net portfolio value divided by the market value of assets.

(6) The market value of assets represents the value of assets under the various interest rate scenarios and reflects the sensitivity of those assets to interest rate changes.

When interest rates rise by 100, 200 or 300 basis points, our net interest income initially increases because a significant portion (over 29%) of our interest-earning assets are based on indices that adjust frequently to changes in market interest rates. Our interest-earning assets are primarily fixed-rate, intermediate-term and long-term loans, and to a lesser extent, investment securities and loans with yields based on market indexes. An increasing percentage of our interest-bearing liabilities are relatively short-term deposits and their repricing is dependent upon management's response to increasing interest rates or, in the case of certificates of deposit, the contractual maturity of the deposit instrument.

When interest rates rise by 100, 200 or 300 basis points, our net portfolio value of equity declines. The decrease is primarily due to the impact of increasing interest rates on our loan portfolio which loses value in rising rate environments because of its predominately long-term, fixed-rate nature. Typically during a rising interest rate environment, our interest-bearing deposits reprice more rapidly than our interest-earning assets.

When interest rates decline by 100 basis points, our net interest income increases slightly because our loan portfolio is primarily fixed-rate and does not reprice lower, while our maturing deposits will reprice lower. Both cash and nonmaturity deposits reprice immediately but offset each other. A significant portion of our interest-bearing liabilities

are certificates of deposit, which will reprice over the next twelve months.

When interest rates decline by 100 basis points, our net portfolio value of equity increases modestly. The increase is primarily due to the fixed-rate nature of our loan portfolio whose value appreciates in declining rate environments because the discounted present value increases as market rates decline.

The net interest income and net portfolio value tables presented above are predicated upon a stable balance sheet with no growth or change in asset or liability mix. In addition, the net portfolio value is based upon the present value of discounted cash flows using our estimates of current replacement rates to discount the cash flows. The effects of changes in interest rates in the net interest income table are based upon a cash flow simulation of our existing assets and liabilities and assuming that delinquency rates would not change as a result of changes in interest rates, although there can be no assurance that this will be the case. Delinquency rates may change when interest rates change as a result of changes in the loan portfolio mix, underwriting conditions, loan terms or changes in economic conditions that have a delayed effect on the portfolio. Even if interest rates change in the designated amounts, there can be no assurance that our assets and liabilities would perform as set forth above. Also, a change in U.S. Treasury rates in the designated amounts accompanied by a change in the shape of the Treasury yield curve would cause changes to the net portfolio value and net interest income other than those indicated above.

At June 30, 2013, we did not have any derivative financial instruments or trading accounts for any class of financial instruments, nor have we engaged in hedging activities or purchased off-balance sheet derivative instruments. Interest rate risk continues to be one of our primary risks as other types of risks, such as foreign currency exchange risk and commodity pricing risk do not arise in the normal course of our business activities and operations.

Item 4. Controls and Procedures

The management of First Financial Northwest, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Securities Exchange Act of 1934 ("Exchange Act"). A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that its objectives are met. Also, because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Additionally, in designing disclosure controls and procedures, our management was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. As a result of these inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Further, projections of any evaluation of effectiveness to future periods are subject to risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Evaluation of Disclosure Controls and Procedures: An evaluation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act) was carried out under the supervision and with the participation of our Chief Executive Officer, Chief Financial Officer (Principal Financial and Accounting Officer) and several other members of our senior management as of the end of the period covered by this report. Our Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2013, our disclosure controls and procedures were effective in ensuring that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is (i) accumulated and communicated to our management (including the Chief Executive Officer and Chief Financial Officer) in a timely manner and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Controls: In the quarter ended June 30, 2013, there was no change in our internal control over (b) financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II

Item 1. Legal Proceedings

From time to time, we are engaged in various legal proceedings in the ordinary course of business, none of which are currently considered to have a material impact on our financial position or results of operations.

Item 1A. Risk Factors

There have been no material changes to the risk factors previously disclosed in Part I, Item 1A of our 2012 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table summarizes First Financial Northwest's common stock repurchases during the second quarter of 2013:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Repurchased as Part of Publicly Announced Plan	Maximum Number of Shares that May Yet Be Repurchased Under the Plan
April 1, 2013 - April 30, 2013	—	\$—	—	—
May 1, 2013 - May 31, 2013	1,161,641	9.96	1,161,641	718,876
June 1, 2013 - June 30, 2013	492,906	9.99	492,906	225,970
	1,654,547	\$9.97	1,654,547	225,970

Under the stock repurchase plan approved by the Board of Directors in May 2013, we were authorized to purchase 1,880,517 shares of common stock. The shares may be purchased in the open market or in privately negotiated transactions from time to time over a six month period, depending upon market conditions and other factors.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information
