Form 8-K

Item 8.01 Other Events

According to published reports, Westinghouse Electric Company, LLC (“Westinghouse”) has been selected to build four new nuclear power plants in the People’s Republic of China. China’s State Nuclear Power Technology Company (SNPTC) selected Westinghouse’s AP1000 passive Generation III technology as the basis for the plants to be built for Sanmen in Zhejiang province and Yangjian in Guangdong province. Westinghouse is now in the process of negotiating the final contract details and expects to start implementing the project in 2007.

In April 2005, GSE Systems, Inc. (“the Company”) announced the details of its agreement with Westinghouse to cooperate in the development of simulators for the AP1000 design and assist Westinghouse in the verification and validation of the AP1000 Human Machine Interface. The Company’s simulation models have been used to help Westinghouse successfully complete several phases of Human Machine Interface testing with US regulators. The agreement further identifies the Company as Westinghouse’s preferred vendor for future AP1000 plant simulators both internationally and domestically.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
