RBS Exchange Traded Notes

RBS NASDAQ-100 (R) Trendpilot(TM) ETN (TNDQ)

[GRAPHIC OMITTED]

The RBS NASDAQ-100 (R) Trendpilot(TM) Exchange Traded Notes ("RBS ETNs") are unsecured and senior obligations of The Royal Bank of Scotland plc ("RBS plc"), and are fully and unconditionally guaranteed by The Royal Bank of Scotland Group plc ("RBS Group"). Any payments on the RBS ETNs when they become due at maturity or upon early repurchase or redemption are dependent on the ability of RBS plc and RBS Group to pay, and are also subject to market risk.

The RBS ETNs track the RBS NASDAQ-100 (R) Trendpilot(TM) Index (USD) (the "Index"). The Index utilizes a systematic trend-following strategy to provide exposure to either the NASDAQ-100 (R) Total Return - (the "Benchmark Index") or the yield on a hypothetical notional investment in 3-month U.S. Treasury bills as of the most recent weekly auction (the "Cash Rate"). The Index is designed to provide exposure to the Benchmark Index in positive trending markets and exposure to the Cash Rate in negative trending markets using an objective and transparent methodology.

RBS NASDAQ-100 (R) Trendpilot(TM) Index Methodology

| | | |
|---|-------------------|---|
| If the closing level of the Benchmark Index is at or above its historical 100-Index business day simple moving average for five consecutive Index business days | [GRAPHIC OMITTED] | A positive trend is established: The Index will track the Benchmark Index |
|---|-------------------|---|

| | | |
|---|-------------------|---|
| If the closing level of the Benchmark Index is below its historical 100-Index business day simple moving average for five consecutive Index business days | [GRAPHIC OMITTED] | A negative trend is established: The Index will track the Cash Rate |
|---|-------------------|---|

If neither of the above conditions is satisfied, the trend of the Index will be the same as the trend of the Index on the immediately preceding Index business day. The Index will implement any trend reversal at the open of trading on the second Index business day immediately following the Index business day on which the Index trend switches from positive to negative or from negative to positive, as the case may be.

 Illustration of the Trendpilot(TM) Index Methodology

- [] Hypothetical Benchmark Index
- [] Hypothetical 100-Index business day simple moving average

The RBS NASDAQ-100(R) Trendpilot(TM) Index will alternate between tracking the Benchmark Index and the Cash Rate, depending on the performance of the Benchmark Index relative to its 100-Index business day simple moving average (as described above).

[GRAPHIC OMITTED]

The above graph illustrates the operation of the Trendpilot(TM) Index Methodology. It does not reflect any actual performance of the Benchmark Index or the Index, and is not an indication of how either index may perform in the future. The hypothetical illustration above also does not include any fees, transaction costs or expenses.

(1) The table above does not reflect any Trendpilot(TM) Index performance. The Trendpilot(TM) Index is the same as the NASDAQ-100(R) Total Return Index(SM) performance. The Trendpilot(TM) Index may underperform the NASDAQ-100(R) Total Return Index(SM) over various time periods, and may track the Cash Rate for equity in a low interest rate environment. For information regarding the performance of the Trendpilot(TM) Index, see PS-40 to PS-44 of the pricing supplement of the RBS ETNs filed with the U.S. Securities and Exchange Commission.

CERTAIN RISK CONSIDERATIONS: The RBS ETNs involve risks not associated with an investment in conventional securities, including a possible loss of some or all of your investment. The level of the Index may be insufficient to offset the aggregate investor fee applicable to the RBS ETNs in order for you to receive the principal amount of your investment back at maturity or upon early repurchase or redemption. The RBS ETNs may underperform the Benchmark Index, and is expected to perform poorly in volatile markets. Liquidity of the RBS ETNs may vary over time. The RBS ETNs are not principal protected and do not pay interest. Any payment is subject to the ability of RBS plc, as the issuer, and RBS Group plc, as the guarantor, to pay their obligations when they become due. You should carefully

consider whether the RBS ETNs are suited to your particular circumstances before you decide to purchase them. You should consider whether you should consult with your investment, legal, accounting, tax and other advisors with respect to an investment in RBS ETNs.

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form FWP

The RBS ETNs are not suitable for all investors. You should carefully read the relevant pricing prospectus, including the more detailed explanation of the risks involved in any investment in them in the "Risk Factors" section of the pricing supplement, before investing.

IMPORTANT INFORMATION: The Royal Bank of Scotland plc (RBS plc) and The Royal Bank of Scotland Group have filed a registration statement (including a prospectus) with the U.S. Securities and Exchange Commission regarding the offering of RBS ETNs to which this communication relates. Before you invest in any RBS ETNs, please read the prospectus in that registration statement and other documents that have been filed by RBS plc and RBS Group for more complete information about RBS plc and RBS Group, and the offering. You may get these documents by visiting EDGAR on the SEC's web site at www.sec.gov. Alternatively, RBS plc, RBS Securities Inc. or RBS Group participating in the offering will arrange to send you the prospectus and the pricing supplement upon request by calling 1-855-RBS-ETPS (toll-free).
