ANNOUNCEMENT

The Board hereby announces certain selected unaudited key operational statistics of the Group for the third quarter of 2017 (ended 30 September 2017). The comparative statistics of the Group for the third quarter of 2016 (ended 30 September 2016) are also disclosed in this announcement.

The board of directors of CNOOC Limited (the “Company”) (the “Board”) hereby announces certain selected unaudited key operational statistics of the Company and its subsidiaries (together the “Group”) for the third quarter of 2017 (ended 30 September 2017). The comparative statistics of the Group for the third quarter of 2016 (ended 30 September 2016) are also disclosed in this announcement.

The Company achieved a total net production of 116.2 million barrels of oil equivalent (“BOE”) for the third quarter of 2017, representing a decrease of 1.3% year over year (“YoY”). Production from offshore China decreased 2.4% YoY to 73.8 million BOE, mainly due to production decline of producing fields. Overseas production increased 0.7% YoY to 42.4 million BOE.

For the third quarter of 2017, the Company made five new discoveries and drilled nine successful appraisal wells.

Successful appraisal of Wushi 16-1W is expected to promote the development of Wushi oilfield Phase II and build it into a mid-to-large size oilfield. In overseas, new progress of exploration in Stabroek block has been made, including the successful appraisal well Payara-2 and the new discovery well Turbot-1.

On development and production, four out of five new projects planned for this year have commenced production. Weizhou 12-2 oil field Phase II is under installation and commissioning and expected to commence production within the year.

The unaudited oil and gas sales revenue of the Company reached approximately RMB 35.94 billion for the third quarter of 2017, representing an increase of 16.9% YoY, mainly due to the increase of average realized oil and gas prices. During the period, the Company's average realized oil price increased 20.4% YoY to US\$50.87 per barrel, which mainly due to the increased international oil prices. The Company's average realized gas price was US\$6.05 per thousand cubic feet, representing an increase of 15.9% YoY, mainly due to the increasing percentage of sale volume of high-price in project offshore China and the rise of benchmark gas prices overseas.

For the third quarter of 2017, the Company's capital expenditure reached approximately RMB 11.78 billion, almost flat from the same period of last year.
