Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.
Yes No

If Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82

**CGGVeritas Provides its Vessel Utilization
Update for the Fourth Quarter 2009**

PARIS, France January 6 2010

CGGVeritas (ISIN: 0000120164 NYSE: CGV) provides its vessel utilization and its fleet allocation updates for the fourth quarter of 2009.

Vessel utilization for the fourth quarter 2009:

The following vessel utilization rates for the fourth quarter 2009 do not take into account the Search, one of our mid-capacity 3D vessels which was decommissioned during the quarter. In 2009, a total of four mid-capacity 3D vessels, the Harmattan, the Føhn, the Orion and the Search were decommissioned as part of our marine capacity adjustment program.

§ The **vessel availability rate**¹ was **86%**, including high steaming time at 7%. This compares to a 90% availability rate in the third quarter of 2009 and a 91% rate in the fourth quarter of 2008. The vessel availability rate for the full year 2009 was 89% including a 4% impact related to standby between contracts.

§ The **vessel production rate**² was **83%** as two vessels were withdrawn from operations for around one month each for repairs. Both vessels were back in production in December. This production rate compares to a 93% rate in the third quarter of 2009 and an 89% rate in the fourth quarter of 2008. The vessel production rate for the full year 2009 was 89%.

Fleet allocation update for the fourth quarter 2009:

During the fourth quarter of 2009, our 3D vessels were allocated 90% to contract and 10% to multi-client programs.

Multi-client sales for the fourth quarter 2009:

Strong multi-client sales were recorded during the quarter both offshore Brazil and in the Gulf of Mexico.

¹ - The *vessel availability rate*, a metric measuring the structural availability of our vessels to meet demand; this metric is related to the entire fleet, and corresponds to the total vessel time reduced by the sum of the standby time, of the shipyard time and the steaming time (the available time), all divided by total vessel time;

² - The *vessel production rate*, a metric

measuring the effective utilization of the vessels once available; this metric is related to the entire fleet, and corresponds to the available time reduced by the operational downtime, all then divided by available time.

About CGGVeritas

CGGVeritas (www.cggveritas.com) is a leading international pure-play geophysical company delivering a wide range of technologies, services and equipment through Sercel, to its broad base of customers mainly throughout the global oil and gas industry.

CGGVeritas is listed on the Euronext Paris (ISIN: 0000120164) and the New York Stock Exchange (in the form of American Depositary Shares, NYSE: CGV).
