-

Item 2.02 Results of Operations and Financial Condition.

On February 1, 2010, we held a conference call in connection with our announcement of our earnings for the fiscal year and fiscal quarter ended December 31, 2009. A copy of the transcript (the "Transcript") for such conference call and related question-and-answer session is furnished as Exhibit 99.1 and is incorporated by reference herein.

The information, including, without limitation, all forward-looking statements, provided in the conference call and related question-and-answer session speaks only as of February 1, 2010. We assume no obligation, and disclaim any obligation, to update information provided in the conference call and related question-and-answer session. Investors should be aware that we may not update such information until our next quarterly earnings conference call, if at all.

Our representatives made, during the conference call and the related question-and-answer session, statements that we believe to be "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995.

All statements other than statements of historical fact made during the conference call and related question-and-answer session, including, without limitation, statements regarding our future financial position, business strategy, targets, projected sales, costs, earnings, capital expenditures and cash flows, plans and objectives of management for future operations are forward-looking statements. In addition, forward-looking statements generally can be identified by the use of forward-looking terminology such as "may," "will," "expect," "intend," "estimate," "anticipate," "believe," "should," "project" or "plan," or the negative thereof or variations thereon or similar terminology. We cannot provide any assurance that such expectations will prove to have been correct. Important factors that could cause actual results to differ materially from our expectations include, without limitation, those contained from time to time in our filings with the SEC, including, without limitation, those appearing under the heading "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2009, filed today with the SEC.

The Transcript includes historical and forward-looking non-GAAP financial measures. A "non-GAAP financial measure" is a numerical measure of a company's historical or future financial performance that excludes amounts that are included in the most directly comparable measure calculated and presented in the GAAP statement of operations. We believe that these figures are helpful in allowing individuals to better assess the ongoing nature of our core operations.

Net income (non-GAAP) and net income per share (non-GAAP), as we present them in the financial data discussed in the Transcript, have been normalized to exclude the net effects of amortization of acquired intangible assets, equity-related compensation, and related tax adjustments. Management believes that these normalized non-GAAP financial measures excluding these items better reflect our operating performance as these non-GAAP figures exclude the effects of non-recurring or non-cash expenses. Management believes that these charges are not necessarily representative of underlying trends in our performance and their exclusion provides investors with additional information to compare our results over multiple periods.

We consider product license bookings, a non-GAAP financial measure which we define as product license revenue recognized plus net change in deferred license revenue during any given period, to be an important indicator of growth in our software license business, as our business increasingly evolves toward a recurring, ratable revenue model. We use these non-GAAP financial measures internally to focus management on period-to-period changes in our core business. We believe that this information is meaningful in addition to the information contained in the GAAP presentation of financial information. The presentation of this additional non-GAAP financial information is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP.

Our earnings press release issued on February 1, 2010 and furnished to the SEC on February 1, 2010 under cover of Form 8-K includes tables that present the most directly comparable GAAP financial measure and reconcile non-GAAP net income and product license bookings to the comparable GAAP measures.

The information contained in Item 2.02 of this report and Exhibit 99.1 attached hereto shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934 or otherwise subject to the liabilities of that section, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933 or the Securities Exchange Act of 1934, except as expressly set forth by specific reference in such a filing.

Item 9.01 Financial Statements and Exhibits.
