NEWS RELEASE

Enbridge Reports 2010 Results: Another Strong Year

HIGHLIGHTS

(all financial figures are unaudited and in Canadian dollars unless otherwise noted)

Fourth quarter earnings were \$326 million; earnings for the full year were \$963 million

Fourth quarter adjusted earnings were \$0.64 per common share, or \$238 million

Full year adjusted earnings were \$2.66 per common share, a 13% increase

\$6.5 billion of Liquids Pipelines and renewable energy projects brought into service during the year

In September 2010, Enbridge affiliate acquired US\$700 million in gas gathering and processing assets

Additional \$2.2 billion of regional oil sands projects secured during the year, bringing total to \$2.6 billion under development

\$400 million of additional investments in solar energy, Gulf of Mexico gas infrastructure and Quebec gas distribution recently announced

Guidance for 2011 adjusted earnings of \$2.75 to \$2.95 per common share

Quarterly dividend increased by 15% to \$0.49 per common share effective March 1, 2011

CALGARY, ALBERTA February 3, 2011 We are pleased to report strong financial results for the fourth quarter and for the full year 2010, said Patrick D. Daniel, President and Chief Executive Officer. For the fourth quarter, adjusted earnings totaled \$238 million or \$0.64 per common share. Our 2010 adjusted earnings per share increased 13% over 2009 to \$2.66 per share, achieving the upper half of our guidance range for the year.

Our strong performance in 2010 builds on an exceptional year in 2009, and extends the Company's performance record. Enbridge's 2010 results were driven by strong performance across all of our business units, and reflected the positive impact of cash generated from new projects coming into service. Enbridge brought \$6.5 billion of projects into service during 2010, including Alberta Clipper, the Southern Lights Pipeline, the North Dakota and Saskatchewan System expansions, and the Talbot Wind Energy and Sarnia Solar projects. Over the past three years, we've brought more than \$12 billion in projects into service.

Enbridge's continued strong growth enabled the Company to announce a 15% increase in its common share dividend in December 2010.

Few peers can match Enbridge's track record of consistently increasing its dividend. Over the past ten years, we have delivered an average annual dividend increase of 11%, said Mr. Daniel. With our adjusted earnings per share growth rate anticipated to grow at an average rate of 10% through the middle of this decade, and with cash flow growing even more rapidly, we expect to be able to continue delivering exceptional dividend growth to our investors.

Mr. Daniel noted that responding to incidents that occurred in 2010 on the Company's liquids pipelines system remains a top priority.

The incidents of the summer and early fall in Marshall, Michigan and Romeoville, Illinois were humbling for our Company and a test of our ability to respond not only to the clean-up of the oil spilled, but also to

Forward-Looking Information

This news release contains forward-looking information. Significant related assumptions and risk factors are described under the Forward-Looking Information section of this news release.

the individuals and communities affected by the spills, and to the transportation needs of our shippers who were affected by the prolonged shutdown of certain of our pipelines, said Mr. Daniel. Our efforts continue on all fronts.

Enbridge's comprehensive pipeline integrity program, and regulatory requirements to accelerate planned work on sections of Line 6B, continue to have impacts on the available capacity of our mainline system, said Mr. Daniel. We greatly appreciate the continued cooperation of our shippers as we complete this important work.

Looking ahead to 2011, Mr. Daniel said that Enbridge will continue to focus on growth across all of its business segments, with key focus areas including the expansion of oil sands infrastructure, further developments in the Bakken and Three Forks formations, new green energy projects and opportunities for growth in its natural gas businesses.

In 2010, Enbridge reinforced its strong presence in the oil sands by securing six new growth and expansion projects. We currently have secured a total of \$2.6 billion in oil sands infrastructure projects that are expected to go into service between 2011 and 2014. Those projects include expansion of the Company's Athabasca Pipeline to its maximum capacity of 570,000 barrels per day; expansion of the Waupisoo Pipeline; three new pipelines, the Woodland, Wood Buffalo and Norealis pipelines; and expansion of Enbridge's Edmonton terminal facilities. Enbridge's Regional Oil Sands System currently connects five producing oil sands projects and will have eight producing projects connected by 2014. As we continue to hear encouraging announcements of growth and investment in the oil sands, Enbridge is very well positioned to provide a wide range of flexible and cost effective transportation solutions to existing and new shippers.

The Bakken Formation also offers significant growth opportunities for Enbridge's sponsored investments, Enbridge Income Fund and Enbridge Energy Partners.

In the fourth quarter, the expansion of the Enbridge Saskatchewan System was substantially completed. This is the latest expansion project brought into service in a series of expansion projects Enbridge affiliates are undertaking in Saskatchewan and North Dakota. The next phase is the Bakken Expansion Program being constructed in North Dakota and Saskatchewan which is expected to come into service in early 2013 and will add approximately 145,000 barrels per day of incremental capacity and connection into the Enbridge Mainline, said Mr. Daniel. The Bakken and Three Forks formations represent an area of tremendous opportunity for both Enbridge Energy Partners and Enbridge Income Fund. We have extensive existing operations in the region, and strong producer support for the Bakken Expansion Program. We are well positioned to provide shippers with attractive transportation options for the continued production growth expected to come from this region.

Enbridge's Green Energy business also saw substantial expansion in 2010 and that momentum has continued in the new year.

The commissioning of the 80-megawatt Sarnia Solar facility was a highlight of a year that saw Enbridge announce the 99-megawatt Greenwich Wind Energy Project in Ontario and mark its entry into the U.S. green energy market through securing the 250-megawatt Cedar Point Wind Energy Project in Colorado. We concluded 2010 with the substantial completion of the Talbot Wind Energy project, and earlier this week announced the acquisition of the Amherstburg and Tilbury solar projects, further expanding our solar portfolio and green energy interests in Ontario, said Mr. Daniel.

Our Green Energy investments are an excellent fit with our reliable business model.

In Enbridge's Gas Pipelines, Processing and Energy Services segment, growth will continue to be driven by developments on the supply side and opportunities within the midstream sector.

In 2010, we grew our Texas natural gas gathering and processing assets through the acquisition by Enbridge Energy Partners of US\$700 million in assets located in the prolific Granite Wash area. We will continue to seek out similar opportunities to grow our transportation and midstream businesses, both

organically and through acquisitions that fit with our business model, said Mr. Daniel. Our interests in the Alliance Pipeline also promise to deliver longer term returns by virtue of its proximity to shale plays in northeast B.C. and the Bakken, and its ability to transport liquids rich gas.

In Offshore, the sanctioning by Chevron of the Jack-St. Malo project in October enables us to advance our Walker Ridge project, one of two secured projects, and we continue to pursue other opportunities in the ultradeep waters of the Gulf of Mexico, said Mr. Daniel. This week, we announced an expansion of the condensate processing capacity of our Venice, Louisiana facility. This expansion, which is expected to be in service in late 2013, carries similar favourable financial terms to those negotiated for our other recently announced investment in the Gulf Coast.

Enbridge has an exceptionally strong asset base, proven ability to secure new projects with attractive terms and a track record of on time, on budget execution. The safety and integrity of our operations remains our highest priority, said Mr. Daniel. Our positive financial results in 2010 reflect the collective efforts of our employees across the organization to achieve our vision of being the leading energy delivery company in North America and, in doing so, deliver superior results to our shareholders.

RECENT DEVELOPMENTS

Enbridge announced on February 3, 2011 that it will invest \$0.1 billion to acquire an additional 6.8% interest in Noverco from Laurentides Investissements (SAS), a subsidiary of GDF SUEZ, bringing its total interest in Noverco to 38.9%. Trencap, a partnership managed by the Caisse de Depot et Placement du Quebec, will acquire Laurentides Investissements remaining 10.8% interest in Noverco, following which Enbridge and Trencap will become the sole shareholders of Noverco. The transaction is expected to close later in the year once all regulatory approvals have been received. Noverco is a holding company that owns 71% of the Gaz Metro Limited Partnership (Gaz Metro) which owns gas distribution and gas pipelines assets in the province of Quebec and gas and electric power distribution and transmission assets in the State of Vermont.

On February 1, 2011, Enbridge announced agreements to acquire two new solar energy projects totaling 20 MW generating capacity from First Solar Inc. (First Solar) for \$0.1 billion. The 5-MW Tilbury Solar Project, completed in December 2010, is located in Tilbury, Ontario. The Amherstburg II Solar Project, located in Amherstburg, Ontario, consists of two separate facilities that, together, total 15 MW. First Solar constructed (and, in the case of the Amherstburg II Solar Project, will construct) the projects for Enbridge under fixed price engineering, procurement and construction contracts. Construction is expected to begin in March 2011 and is expected to be complete in the third quarter of 2011. Enbridge will sell the facilities power output to the Ontario Power Authority pursuant to 20-year Power Purchase Agreements under the terms of the Ontario Government's Renewable Energy Standard Offer Program.

On January 31, 2011, Enbridge announced plans for an estimated \$0.2 billion expansion of the condensate processing capacity of its Venice, Louisiana facility within its offshore gas business. The expanded condensate processing capacity will be required to accommodate additional natural gas production from the recently sanctioned Olympus offshore oil and gas development. Natural gas production from Olympus will move to Enbridge's onshore facility at Venice via Enbridge's Mississippi Canyon offshore pipeline where it will be processed to separate and stabilize the condensate. The expansion, which will more than double the capacity of the facility to approximately 12,000 barrels of condensate per day, is expected to be in service in late 2013.

On December 16, 2010, the Company announced it will undertake an expansion of its Athabasca Pipeline to its full capacity to accommodate additional contractual commitments, including recent incremental shipping commitments by the Christina Lake Oilsands Project operated by Cenovus. This expansion will increase the capacity of the Athabasca Pipeline to its maximum capacity of approximately 570,000 bpd, depending on crude slate. Subject to regulatory approval, the estimated cost of this full expansion is approximately \$0.4 billion. The expansion will be completed in stages, with full completion expected in early 2014. The Athabasca Pipeline transports crude oil from various oil sands projects to the mainline hub at Hardisty, Alberta.

CONSOLIDATED EARNINGS

<i>(unaudited; millions of Canadian dollars, except per share amounts)</i>	Three months ended December 31,		Year ended December 31,	
	2010	2009	2010	2009
Liquids Pipelines	117	141	512	445
Gas Distribution	60	74	155	186
Gas Pipelines, Processing and Energy Services	32	15	121	428
Sponsored Investments	56	38	137	141
Corporate	61	32	38	355
Earnings Applicable to Common Shareholders	326	300	963	1,555
Earnings per Common Share	0.87	0.81	2.60	4.27
Diluted Earnings per Common Share	0.86	0.80	2.57	4.25

Earnings applicable to common shareholders for the three months ended December 31, 2010 were \$326 million, or \$0.87 per common share, an increase of \$26 million compared with \$300 million, or \$0.81 per common share, for the three months ended December 31, 2009. The increase was primarily attributable to higher Sponsored Investments earnings, including Alberta Clipper contributions and a dilution gain on reduced ownership in Enbridge Energy Partners, L.P. (EEP), as well as increased unrealized foreign exchange and derivative gains in Corporate. Offsetting these increases were lower contributions from Liquids Pipelines due in part to the elimination of annual performance metrics under the 2010 interim toll agreement, lower contributions from Gas Distribution due to higher operating costs and additional remediation costs on the Line 6B and 6A crude oil releases as discussed below.

Earnings applicable to common shareholders were \$963 million, or \$2.60 per common share, for the year ended December 31, 2010, compared with \$1,555 million, or \$4.27 per common share, for the year ended December 31, 2009. The Company's earnings for 2010 included the positive impacts of projects coming into service in 2010, including the Alberta Clipper, Southern Lights Pipeline and the Sarnia Solar energy projects. Compared with 2009, earnings have increased further due to customer growth in Gas Distribution and improved contributions from green energy, partially offset by less favourable weather conditions in the Company's gas distribution franchise areas. These operational improvements were overwhelmed by the absence of one-time favourable items experienced in 2009, including a \$329 million gain on the disposal of Oleoducto Central S.A. (OCENSA) and unrealized derivative and intercompany foreign exchange gains.

Additionally, 2010 results were impacted by the Line 6B and Line 6A crude oil releases. In July and September of 2010, crude oil releases occurred on Line 6B and Line 6A, respectively, of EEP's Lakehead System. In responding to these incidents, EEP incurred costs related to emergency response, environmental remediation, clean-up activities and related inspection costs, as well as costs to compensate individuals and communities impacted by the spills. Earnings for the year ended December 31, 2010 reflected the Company's share of EEP's costs, before insurance recoveries and excluding fines and penalties, of \$103 million related to these incidents. Enbridge's share of lost revenue associated with downtime on both Line 6B and 6A of \$3 million further contributed to the year-over-year decrease in earnings. Apart from lost revenues, which is non recoverable as EEP does not maintain insurance coverage for interruption of operations except for water crossings, it is anticipated that substantially all of the costs, excluding fines and penalties, incurred from the leaks will ultimately be recoverable under the Company's existing insurance policies.

Non-GAAP Measures

This news release contains references to adjusted earnings/(loss), which represent earnings or loss applicable to common shareholders adjusted for non-recurring or non-operating factors on both a consolidated and segmented basis. These factors are reconciled and discussed in the financial results sections for the affected business segments. Management believes that the presentation of adjusted earnings/(loss) provides useful information to investors and shareholders as it provides increased transparency and predictive value. Management uses adjusted earnings/(loss) to set targets, assess performance of the Company and set the Company's dividend payout target. Adjusted earnings/(loss) and adjusted earnings/(loss) for each of the segments are not measures that have standardized meanings prescribed by Canadian GAAP and are not considered GAAP measures; therefore, these measures may not be comparable with similar measures presented by other issuers. See *Non-GAAP Reconciliations* section on page 11 for a reconciliation of the GAAP and non-GAAP measures.

ADJUSTED EARNINGS

<i>(unaudited; millions of Canadian dollars, except per share amounts)</i>	Three months ended		Year ended	
	December 31, 2010	2009	December 31, 2010	2009
Liquids Pipelines	117	141	512	454
Gas Distribution	54	60	167	154
Gas Pipelines, Processing and Energy Services	31	22	123	116
Sponsored Investments	48	39	209	151
Corporate	(12)	(23)	(27)	(20)
Adjusted Earnings ¹	238	239	984	855
Adjusted Earnings per Common Share ¹	0.64	0.64	2.66	2.35

¹ *Adjusted earnings and adjusted earnings per common share are non-GAAP measures that do not have any standardized meaning prescribed by generally accepted accounting principles. For more information on non-GAAP measures see page 11.*

Adjusted earnings were \$238 million, or \$0.64 per common share, for the three months ended December 31, 2010, compared with \$239 million, or \$0.64 per common share, for the three months ended December 31, 2009. Positive contributors in the quarter included Gas Pipelines, Processing and Energy Services whose Aux Sable and Energy Services businesses benefited from favourable margins in the period and who also incurred lower business development costs compared with the fourth quarter of 2009. Adjusted earnings from Sponsored Investments increased due to contributions from Alberta Clipper, both through EEP and Enbridge Energy, L.P. (EELP), and the acquisition of gas gathering assets in the fourth quarter of 2010. Partially offsetting these items are lower adjusted earnings from Liquids Pipelines due primarily to the 2010 interim toll agreement no longer including annual performance metrics, higher business development costs and higher taxes. Gas Distribution also incurred higher operating costs, depreciation and taxes in the fourth quarter of 2010 compared with the same period of 2009.

Adjusted earnings were \$984 million, or \$2.66 per common share, for the year ended December 31, 2010, compared with \$855 million, or \$2.35 per common share, for the year ended December 31, 2009. The increase in adjusted earnings primarily reflected contributions from projects coming into service, including the Alberta Clipper Project, the Southern Lights Pipeline and the Sarnia Solar Project, as well as strong performance from the Company's existing liquids and natural gas assets. The Company also realized improved adjusted earnings from Gas Distribution due to customer growth and favourable operating performance. Sponsored Investments further contributed to year-over-year increases in adjusted earnings, benefiting from EEP contributions and its expansions and acquisition completed in 2010.

LIQUIDS PIPELINES

<i>(unaudited; millions of Canadian dollars)</i>	Three months ended December 31,		Year ended December 31,	
	2010	2009	2010	2009
Enbridge System	84	92	327	295
Enbridge Regional Oil Sands System	15	20	73	72
Southern Lights Pipeline	20	14	82	58
Spearhead Pipeline	6	6	29	17
Feeder Pipelines and Other	(8)	9	1	12
Adjusted Earnings	117	141	512	454
Enbridge Regional Oil Sands System leak remediation costs				(9)
Earnings	117	141	512	445

While under construction, certain regulated pipelines are entitled to recognize allowance for equity funds used during construction (AEDC) in earnings, which will be collected in tolls once the pipelines are in service. The earnings impact of AEDC for the three months ended December 31, 2010 was \$1 million (2009 \$25 million) for Enbridge System. There was no earnings impact of AEDC for Southern Lights Pipeline for the three months ended December 31, 2010 compared with \$11 million for the fourth quarter of 2009. The earnings impact of AEDC for the year ended December 31, 2010 was \$29 million (2009 \$74 million) for Enbridge System and \$32 million (2009 \$44 million) for Southern Lights Pipeline.

The increase in full year Enbridge System earnings resulted from a higher Alberta Clipper capital base and related earnings contribution consistent with its April 1, 2010 in service date and favourable operating performance, partially offset by higher taxes in the Terrace component. The fourth quarter decline relates to a change in the quarterly pattern of earnings under the interim toll arrangement in place during 2010 relative to the Incentive Tolling Settlement, which applied to 2009 and under which the majority of the performance metrics incentives benefits were not recognized until the fourth quarter.

Enbridge Regional Oil Sands System full year adjusted earnings reflected higher volumes, increased tolls on certain laterals and the continued positive impact of terminal infrastructure additions, partially offset by higher operating costs and income taxes, particularly in the fourth quarter.

The higher Southern Lights Pipeline earnings contribution for the full year and the fourth quarter resulted from a higher capital base consistent with its July 1, 2010 in service date.

Spearhead Pipeline earnings for the full year increased due to increased volumes resulting from the expansion completed in May 2009, the recognition of make-up rights which expired in the year, as well as lower operating costs.

The decrease in adjusted earnings for Feeder Pipelines and Other is due to a number of small factors including a decrease in earnings from Toledo Pipeline due to the Line 6B shutdown, a decrease in earnings from Olympic Pipeline, as well as an increase in business development costs.

Liquids Pipelines earnings were impacted by the following non-recurring or non-operating adjusting items:

A \$9 million after-tax expense resulting from clean up and remediation costs related to a valve leak within the Enbridge Cheecham Terminal on the Enbridge Regional Oil Sands System in January 2009, which is not indicative of the expected future performance of this asset.

GAS DISTRIBUTION

<i>(unaudited; millions of Canadian dollars)</i>	Three months ended		Year ended	
	December 31, 2010	2009	December 31, 2010	2009
Enbridge Gas Distribution (EGD)	46	53	135	129
Other Gas Distribution and Storage	8	7	32	25
Adjusted Earnings	54	60	167	154
EGD colder/(warmer) than normal weather	6	3	(12)	17
EGD impact of tax rate changes		21		21
EGD interest income on GST refund				7
Other Gas Distribution and Storage asset impairment loss		(10)		(10)
Other Gas Distribution and Storage adoption of new accounting standard				(3)
Earnings	60	74	155	186

The full year increase in EGD adjusted earnings was primarily the result of continued favourable performance under Incentive Regulation (IR), reflecting customer growth, higher distribution charges and lower taxes, partially offset by higher depreciation expense. EGD's decreased adjusted earnings for the fourth quarter of 2010 was primarily due to higher income taxes, operating costs and depreciation, partially offset by lower interest expense.

The increase in Other Gas Distribution and Storage adjusted earnings reflected an increased contribution from Enbridge's Ontario unregulated gas storage business and from franchise growth at Enbridge Gas New Brunswick. Gas Distribution earnings were impacted by the following non-recurring or non-operating adjusting items:
EGD earnings are adjusted to reflect the impact of weather.

In 2009, earnings from EGD reflected the impact of favourable tax rate changes.

Earnings from EGD for 2009 included interest income of \$7 million related to the recovery of excess GST remitted to Canada Revenue Agency.

Other Gas Distribution and Storage earnings for 2009 reflected a \$10 million asset impairment loss, which included goodwill.

Other Gas Distribution and Storage earnings reflected the write-off of \$3 million in deferred development costs as a result of adopting a change in accounting standard, effective January 1, 2009.

GAS PIPELINES, PROCESSING AND ENERGY SERVICES

	Three months ended		Year ended	
	December 31, 2010	2009	December 31, 2010	2009
<i>(unaudited; millions of Canadian dollars)</i>				
Enbridge Offshore Pipelines (Offshore)	2	10	23	29
Alliance Pipeline US	6	7	25	27
Vector Pipeline	4	4	15	16
Aux Sable	10	4	37	26
Energy Services	6		20	29
Other	3	(3)	3	(11)
Adjusted Earnings	31	22	123	116
Offshore property insurance recoveries from hurricanes		3	2	4
Aux Sable unrealized derivative fair value gains/(losses)	2	(25)	7	(36)
Aux Sable loan forgiveness		7		7
Energy Services unrealized derivative fair value gains/(losses)	(1)	6	(12)	3
Energy Services Lehman and SemGroup credit recovery		1	1	1
Other gain on sale of investments				329
Other impact of tax rate changes		1		4
Earnings	32	15	121	428

Offshore adjusted earnings decreased for both the three months and year ended December 31, 2010 due to higher operating and administrative costs including insurance premiums and depreciation expense. Also, the Company experienced volume declines due to the slower regulatory permitting process and the temporary suspension of deep water drilling. Adjusted earnings for 2009 also included insurance proceeds collected during the second and fourth quarters related to business interruption lost revenues and operating expenses associated with a hurricane in 2008.

Aux Sable adjusted earnings increased in both the fourth quarter and full year due to enhanced plant performance and stronger fractionation margins.

Favourable fourth quarter 2010 adjusted earnings from Energy Services reflected stronger margins captured on storage and transportation contracts in both its liquids and gas marketing units. For the full year, the decrease in adjusted earnings resulted from reduced volume and margin opportunities in liquids marketing.

Other primarily reflected positive contributions from the Sarnia Solar Project as well as reduced business development costs.

Gas Pipelines, Processing and Energy Services earnings were impacted by the following non-recurring or non-operating adjusting items:

Offshore earnings included insurance proceeds related to the replacement of damaged infrastructure as a result of a 2008 hurricane.

Aux Sable earnings for each period reflected unrealized fair value changes on derivative financial instruments related to the Company's forward gas processing risk management position.

Edgar Filing: ENBRIDGE INC - Form 6-K

Aux Sable earnings for the three months and year ended December 31, 2009 reflected a \$7 million gain from a loan forgiveness related to a negotiated settlement with a counterparty in bankruptcy proceedings.

Energy Services earnings for each period reflected unrealized fair value gains and losses related to the revaluation of inventory and the revaluation of financial derivatives used to risk manage the profitability of forward transportation and storage transactions.

Energy Services earnings for the year ended December 31, 2008 included a write-off as a result of bankruptcies by SemGroup and Lehman Brothers. In 2009, \$1 million was recovered from SemGroup and in 2010 the Company received a partial recovery of \$1 million from the sale of its receivable from Lehman Brothers.

In March 2009, the Company sold its investment in OCENSA, a crude oil export pipeline in Colombia, for proceeds of \$512 million, resulting in a gain of \$329 million.

Other earnings for 2009 reflected the impact of \$4 million in favourable tax rate changes.

SPONSORED INVESTMENTS

<i>(unaudited; millions of Canadian dollars)</i>	Three months ended		Year ended	
	December 31,		December 31,	
	2010	2009	2010	2009
Enbridge Energy Partners (EEP)	27	22	122	99
Enbridge Energy, L.P. Alberta Clipper US (EELP)	10	6	42	7
Enbridge Income Fund (EIF)	11	11	45	45
Adjusted Earnings	48	39	209	151
EEP leak remediation costs and lost revenue	(21)		(106)	
EEP unrealized derivative fair value losses	(3)	(2)	(1)	(2)
EEP Lakehead System billing correction		1	1	4
EEP dilution gain on Class A unit issuance	32		36	
EEP asset impairment loss			(2)	(12)
Earnings	56	38	137	141

After adjusting EEP earnings for non-recurring or non-operating items, including the impact of the Line 6B and 6A crude oil releases, EEP adjusted earnings increased due to strong results from its liquids business as well as higher general partner incentive income. The liquids improvement was generated largely from new infrastructure, related higher delivered volumes and increased average transportation rates.

Earnings from EELP represent the Company's earnings from its investment in a series of equity within EELP which owns the United States segment of Alberta Clipper. Increased earnings contribution in both the quarter and full year reflect a higher capital base and associated return. Earnings were attributable to AEDC recognized while the project was under construction as well as tolls since Alberta Clipper went into service on April 1, 2010.

Earnings from EIF primarily reflected stable contributions from Alliance Canada and growth attributable to Phase II of the Saskatchewan System Capacity Expansion which was substantially completed in December 2010, offset by increased corporate costs related to its corporate restructuring completed in December 2010.

Sponsored Investments earnings were impacted by several non-recurring or non-operating adjusting items:

Year-to-date earnings from EEP included a charge of \$103 million (net to Enbridge) related to estimated costs, before insurance recoveries, associated with the Line 6B and 6A crude oil releases, as well as a charge of \$3 million (net to Enbridge) related to period lost revenue as a result of the leaks. These charges are not indicative of the future performance of this asset.

Earnings from EEP included a change in the unrealized fair value on derivative financial instruments in each period.

Earnings from EEP included a Lakehead System billing correction (net to Enbridge) related to services provided in prior periods.

EEP earnings were favourably impacted by a dilution gain because Enbridge did not participate in EEP's Class A unit offerings.

EEP earnings for 2010 and 2009 included asset impairment losses related to the write-down of certain assets.

CORPORATE

<i>(unaudited; millions of Canadian dollars)</i>	Three months ended		Year ended	
	December 31,		December 31,

Corporate gain on sale of investment in NetThruPut (NTP)				25
Corporate impact of tax rate changes		1		4
Earnings	61	32	38	355

Fourth quarter adjusted loss improved primarily due to favourable income tax recoveries and higher business unit financing recoveries.

The full year Corporate adjusted loss increased due to higher financing costs and lower foreign exchange gains, partially offset by favourable corporate income tax recoveries.

Corporate costs were impacted by the following non-recurring or non-operating adjusting items:

Noverco earnings for 2009 included a \$6 million benefit related to favourable tax rate changes.

Earnings for each period included the change in the unrealized fair value gains of derivative financial instruments related to forward foreign exchange risk management positions.

Earnings included net unrealized foreign exchange gains on the translation of foreign-denominated intercompany balances.

In May 2009, the Company sold its investment in NTP, an internet-based crude oil trading and clearing platform, for proceeds of \$32 million, resulting in a gain of \$25 million.

Earnings for the year ended December 31, 2009 included a \$4 million benefit related to favourable tax rate changes.
