The Trust's semi-annual report transmitted to shareholders pursuant to Rule 30e-1 under the Investment Company Act of 1940 is as follows:

Table of Contents

CBRE CLARION GLOBAL REAL ESTATE
INCOME FUND
Semi-Annual Report for the Six Months Ended June 30, 2011

Table of Contents

CBRE Clarion Global Real Estate Income Fund (the Trust), acting in accordance with an exemptive order received from the Securities and Exchange Commission (SEC) and with approval of its Board of Trustees (the Board), has adopted a managed distribution policy (the Policy) with the purpose of distributing over the course of each year, through periodic distributions as nearly equal as practicable and any required special distributions, an amount closely approximating the total taxable income of the Trust during such year and all of the returns of capital paid by portfolio companies to the Trust during such year. In accordance with its Policy, the Trust distributes a fixed amount per common share, currently \$0.045, each month to its common shareholders. This amount is subject to change from time to time in the discretion of the Board. Although the level of distributions is independent of fund performance, the Trust expects such distributions to correlate with its performance over time. Each monthly distribution to shareholders is expected to be at the fixed amount established by the Board, except for extraordinary distributions and potential increases or decreases in the final dividend periods for each year in light of the Trust s performance for the entire calendar year and to enable the Trust to comply with the distribution requirements imposed by the Internal Revenue Code. Over time, the Trust expects that the distribution rate in relation to the Trust s Net Asset Value (NAV) will approximately equal the Trust s total return on NAV.

The fixed amount of distributions will be reviewed and amended as necessary by the Board at regular intervals with consideration of the level of investment income and realized gains. The Board strives to establish a level regular distribution that will meet the Trust s requirement to pay out all taxable income (including amounts representing return of capital paid by portfolio companies) with a minimum of special distributions. The Trust s total return in relation to changes in NAV is presented in the financial highlights table. Shareholders should not draw any conclusions about the Trust s investment performance from the amount of the current distribution or from the terms of the Trust s managed distribution policy. The Board may amend or terminate the managed distribution policy without prior notice to Trust shareholders.

Shareholders should note that the Trust s Policy is subject to change or termination as a result of many factors. The Trust is subject to risks through ownership of its portfolio company holdings including, but not limited to, declines in the value of real estate held by the portfolio company, risks related to general and local economic conditions, and portfolio company losses. Moreover, an economic downturn could have a material adverse effect on the real estate markets and on real estate companies in which the Trust invests, which in turn could result in the Trust not achieving its investment or distribution objectives thereby jeopardizing the continuance of the Policy. Please refer to the prospectus for a fuller description of the Trust s risks.

2 i CBRE CLARION GLOBAL REAL ESTATE INCOME FUND

Letter to Shareholders

Dear Shareholder:

We are pleased to present the 2011 semi-annual report for the CBRE Clarion Global Real Estate Income Fund (the Trust⁽¹⁾).

Global real estate stocks, as measured by the S&P Developed Property Index (S&PDPI⁽²⁾), rose 6.0% during the first half of the year despite a pull back in June of approximately 2.4%. Returns were very similar for each of the first and second quarters (approximately +3.0% each quarter). The Trust has performed considerably better than the S&PDPI thus far in 2011 despite continuing to employ leverage of less than 7% (consisting of borrowings on a line of credit). The Trust's Net Asset Value (NAV) is up 10.0% for the first half of 2011. The Trust's market price return (i.e., stock price appreciation plus reinvested dividends) was slightly better (+11.5%) than the NAV appreciation through the first six months, driven by a slight narrowing of the discount of the Trust's share price to NAV from 9.7% at year-end to 8.6% as of June 30. The Trust's market price closed at \$8.37, and its NAV per share was \$9.16 on June 30.

During the first six months of 2011 the S&PDPI rose 6.0% and the MSCI REIT Preferred Index (MSRPI⁽³⁾) rose 6.7%. A blended benchmark of 80% S&PDPI and 20% MSRPI rose 6.2% year-to-date. The Trust's positive return relative to the blended benchmark so far this year is due primarily to regional asset allocation. Nineteen percent (19%) of the Trust's portfolio is invested in preferred stock, and the return on the Trust's preferred stock portfolio was approximately the same as the return for the MSRPI (6.2%) for the period. However, the Trust's common stock holdings returned 10.9% in the first six months, outperforming the return of the S&PDPI by a wide margin. Performance was enhanced by overweightings to holdings in Canada (+15.3%) and the U.S. (+10.2%) which were among the best performing countries in the first half of 2011. In Europe, overweight positions in outperforming France (+22.2%) and the Netherlands (+10.3%) were significant contributors to performance. Also, the Trust's underweighting of Asia provided a benefit as Asian property stocks have declined an average of 2.1% this year including Hong Kong (-5.0%) and Japan (-6.0%).

The Trust paid total dividends of \$0.27 per share for the first six months of 2011, consisting of six regular monthly dividends of \$0.045 per share. The annualized dividend of \$0.54 per share represents a 6.5% yield on share price and a 5.9% yield on NAV, as of June 30. The Trust's Board of Trustees (the Board) has continued to review the sustainability of the Trust's regular monthly dividend in light of the current market environment and the dividends that have been paid out over the life of the Trust (which amount to \$11.38 per share since inception in 2004). Based on income and realized gains to date this year, the Board has thus far seen fit to maintain the monthly dividend at the current level rate.

- (1) The Trust changed its name effective July 5, 2011. The Trust was formerly known as the ING Clarion Global Real Estate Income Fund. The name change corresponds with the change in the name of the Trust's investment adviser (from ING Clarion Real Estate Securities, LLC to CBRE Clarion Securities LLC). The investment adviser was acquired by CB Richard Ellis Group, Inc. from ING Groep, N.V. effective July 1, 2011.
- (2) The S&P Developed Property Index is an unmanaged market-weighted total return index which consists of over 350 real estate companies from 22 developed markets with a free float total market capitalization of at least U.S.

\$100 million that derive more than 60% of their revenue from real estate development, management, rental and/or direct investment in physical property.

- (3) As measured by the MSCI REIT Preferred Index which is a preferred stock market capitalization weighted index of all exchange traded preferred securities of equity REITs.

SEMI-ANNUAL REPORT 2011 i 3

Portfolio Review

The Trust's investments remain well-diversified by property type and geography as shown in the pie charts below. The geographic mix of the portfolio has been fairly stable during the past 6 months. At June 30, the Fund's portfolio was 45% invested in the Americas, 13% in Europe, 23% in Asia-Pacific, with 19% invested in preferred stock of U.S. real estate companies (down from 25% this time last year). Retail is the largest property type represented in the portfolio at 40%. Retail properties have historically shown more stable cash flows during economic slow-downs than other commercial property types. Selectively, the Trust has been building positions in companies whose portfolios should benefit from improving economic growth and improving real estate fundamental demand. For example, 9% of the portfolio is invested in securities issued by apartment companies, 8% in office companies, and 5% in hotel companies.

**Geographic Diversification ⁽⁴⁾
(unaudited)****Sector Diversification ⁽⁴⁾
(unaudited)****Market Commentary**

Real estate stocks in the Americas and Europe generated positive total returns while Asia-Pacific property companies (other than in Australia) languished. Asian markets were challenged by the headwinds of governmental and central bank tightening measures. The global economic backdrop continues to be somewhat bifurcated, with Western economies attempting to nurse a fragile recovery and Asian economies (ex-Japan) attempting to cool robust growth. In this environment, property fundamentals continue to exhibit evidence of sustained improvement as recovering demand and limited supply of property generally combine to support the case for improved earnings prospects. The primary risks to our positive outlook for real estate stock returns continue to be that economic growth fades in Western countries and, conversely, that governmental and central bank policy unwittingly creates inflationary pressures which prove difficult to contain in emerging economies.

The economic outlook has recently become more muted. Economic releases during the second quarter brought into question the trajectory of economic recovery, particularly in the U.S. where the housing and jobs numbers have been tepid. On the U.S. jobs front, the May increase in non-farm payroll was reported to be an anemic 54,000 jobs, versus consensus expectations of 150,000 jobs, and fewer than the 220,000 jobs averaged in the prior three months. The 54,000 payroll increase was the weakest since September 2010. The unemployment rate nudged up by 10 basis points to 9.1% from the April level. Governments in Asia ex-Japan continue to attempt to engineer a gradual economic slowdown via increased tightening measures in the face of an otherwise heated environment with cost pressure from raw materials, food, commodities and housing. Europe continues to be beset by sovereign debt challenges, most recently highlighted by events in Greece. U.K. retail sales reported for May were poor (down -1.4% vs. -0.6% expected). German ZEW economic sentiment declined, and European PMI disappointed, particularly manufacturing (slowing from 54.6 to 52). GDP projections have generally been ratcheted down for the U.S. and the globe over the past month as a result of the economic outlook. In the U.S., the Federal Reserve Bank in June decreased 2011 GDP projections to the 2.7-2.9% range from the 3.1-3.3% range put forth in its April meeting. Globally, 2011 GDP projections are 3.1% versus 3.3% three months ago, according to ING Economics.

The Western world is still deleveraging, contributing to economic challenges as deleveraging creates a long-term drag on the pace of economic rebound. In the U.S., private market debt has largely shifted to the government, which has not effectively articulated a credible path to reduce it. Concern regarding the magnitude of the U.S. Government debt

continues to grow, with the Treasury, in its annual report to Congress, estimating that the U.S. total public debt will exceed GDP by the end of 2011, around three years earlier than forecast in its previous report in 2010. Separately, lenders at U.S. banks continue to underwrite conservatively despite accommodative monetary policy and a profitable spread to cost of capital. Politics has contributed to uncertainty via bickering over raising the national debt ceiling in the U.S., which has contributed to uncertainty among investors. Similarly, in Europe, politics play out over the fiscal fate of nations in trouble, as Northern European countries, including Germany, struggle with reconciling their role in the European Union, including the eventuality of having to subsidize weaker nations within the Union, particularly at the moment

(4) Percentages presented are based on managed fund assets and are subject to change.

4 i CBRE CLARION GLOBAL REAL ESTATE INCOME FUND

Greece. There was an increasing demonstration of brinkmanship between the EU and the Greek government, but by the end of June it looked likely that the next 12 billion tranche of the emergency loan would be forthcoming following another austerity package passed in the Greek parliament.

Is inflation the way out? Inflation is increasingly an economic reality, not only in the Asia-Pacific region, which has been battling heated commodity, food and residential housing prices over the past several years, but in Western markets, too, where 2011 consumer price index (CPI) expectations have trended more to the 2.5-3.5% range versus half that a year ago. The nature of the source of inflationary pressures among Western economies includes higher commodity costs, including oil, and low interest rate policies among central banks, particularly the Federal Reserve Bank in the U.S. In Asia, CPI expectations reside in the 4.0-5.0% range ex-Japan, which remains near zero. Recent data points include May CPI numbers in China of 5.5% year-on-year, the highest in three years, and in Singapore of 4.5% (versus 4.1% consensus). Australia has projected 2011 CPI expectation in the 3.0% range. While Western banks have generally maintained accommodative monetary policy, central banks in Asia ex-Japan are well into a tightening phase in response to heated commodity and housing prices. The People's Bank of China has raised the reserve requirement ratio among large banks six times this year, mostly recently by 50 basis points effective June 20, to 21.5%. Separately, the Hong Kong Monetary Authority has warned that a rise in local bank interest rates may be imminent even though the U.S. Federal Reserve kept its benchmark rate unchanged. This is significant, since Hong Kong monetary policy typically follows that of the U.S. The Reserve Bank of Australia kept rates on hold in its June 7 meeting, at 4.75%.

While inflation and its effect on real estate remains a complicated subject, there is little doubt that landlords have the ability to benefit from inflationary pressures via higher rents in the face of a cost structure which includes a high component of fixed costs. Listed property management teams will increasingly need to manage their real estate portfolios in anticipation of inflation.

Real estate securities continue to offer attractive current yield via the dividend. In an investment landscape where current yield via the dividend is arguably scarce, a global listed property portfolio distinguishes itself by offering a dividend yield in the 3-4% range. Furthermore, dividend levels are growing as fundamentals improve, with an expected growth in global property company dividends to the 5% range during 2011. In the U.S., we expect the growth in REIT dividends to be 10% or more this year. Many REITs are bolstering distributions simply in order to maintain REIT tax status, which dictates, among other things, that a company pays out a minimum level of taxable net income as a dividend to shareholders. In the U.S., the minimum payout is 90%. Real estate company dividend yields continue to compare favorably to the yields on respective 10-year government bonds, as shown in the following chart. The dividends are well supported as payout levels are averaging only 60% on a global weighted average basis. The 40% of operating earnings not being distributed provides a buffer. The dividend payout is the percentage of available cash flow per share which is distributed as a dividend to shareholders.

Commercial real estate property values continue to rise as cap rates continue to decline, albeit at a slower rate. Although we have seen further yield compression in the quarterly earnings releases of listed property companies, we believe yield compression has likely largely run its course. On a global weighted average basis, yields have gone from 5.0% at the peak of the market in 2007

(5) Source: CBRE Clarion and Bloomberg. Not all countries included. Yields fluctuate and are not guaranteed.

Table of Contents

SEMI-ANNUAL REPORT 2011 i 5

to over 7% at the trough of the credit crisis, and are now back to the 6.0% range. Property yields have fallen over the past two years, aided by accommodative central bank policy that has pushed bond yields to historically low levels. U.S. 10-year Treasury yields have now dipped to the 3.0% range on concerns that the economic rebound is losing steam.

Listed real estate is trading at a discount as rising property values have outstripped the stock price gains. We estimate global property companies are trading at an average 7% discount to NAV on a global weighted average basis which we find to be reasonable at this stage of the economic recovery and property cycle. In the U.S., we estimate property companies are trading at a modest premium to NAV.

Real estate companies' access to capital remains favorable. Fundamental to the recovery of property companies is continued access to capital, both equity and debt, at attractive pricing. We estimate that property companies globally have raised nearly \$110 billion of equity since the fourth quarter of 2008 and in excess of \$42 billion in unsecured debt. Debt has been raised competitively at spreads which are equal to or less than pre-credit crisis levels. Emblematic of the ability of property companies to raise equity was U.S. industrial giant ProLogis' June equity raise of approximately US\$1.5 billion, which was raised in an overnight deal at a modest discount to the prior day's close, although the stock had significantly underperformed during the month preceding the offering, partly as a result of the perceived equity overhang. The proceeds of the offering were to help fund the \$2.7 billion acquisition of its European minority-owned listed subsidiary ProLogis European Properties as well as to deliver progress on its strategic goal of deleveraging the balance sheet. Wide-open capital markets additionally make it more likely that the listed property companies will see increased M&A announcements as companies have the ability to raise the necessary capital to consummate a transaction.

We believe that real estate securities are entering a "sweet spot" for growth. Improved property fundamentals are ultimately reflected in the earnings numbers of property companies. Company earnings appear to confirm that a real estate recovery is underway. This is particularly apparent in more cyclical property types with shorter lease lengths that can mark rents to market more quickly than property types with longer lease lengths. As an example, U.S. apartment REITs have reported same-property NOI growth in the mid- to high-single digits, which is about double the NOI growth rates posted by property types in most other sectors, which tend to have longer lease lengths. Globally, we are projecting growth in cash flow per share to be positive in all major markets with the exception of Japan, which continues to recover from disaster-related weakness. For each of the next two years, we project increases in cash flow per share on a global weighted average basis to be in the 8% range.

The first six months of the year have been rewarding for a global real estate securities strategy. We continue to expect total return this year to be driven by a dividend yield in the 3-4% range plus growth in cash flow per share in the 8% range as economic recovery increasingly takes hold. While there have been some speed bumps in the road to economic recovery of late, we believe that they are not sufficient to derail the positive case for real estate fundamentals looking forward.

We appreciate your continued faith and confidence.

Sincerely,

T. Ritson Ferguson

SEMI-ANNUAL REPORT 2011 i 13

Notes to Financial Statements (unaudited)

1. Fund Organization

CBRE Clarion Global Real Estate Income Fund (the Trust) is a non-diversified, closed-end management investment company that was organized as a Delaware statutory trust on November 6, 2003 under the Investment Company Act of 1940, as amended. Effective July 5, 2011, the Trust has been renamed CBRE Clarion Global Real Estate Income Fund. ING Clarion Real Estate Securities (the Advisor) is the Trust's investment advisor. Effective July 1, 2011 the Advisor has been renamed CBRE Clarion Securities and will be part of CB Richard Ellis Investors. The Trust commenced operations on February 18, 2004.

2. Significant Accounting Policies

The following accounting policies are in accordance with U.S. generally accepted accounting principles (GAAP) and are consistently followed by the Trust.

Securities Valuation The net asset value of the common shares of the Trust will be computed based upon the value of the Trust's portfolio securities and other assets. The Trust calculates net asset value per common share by subtracting the Trust's liabilities (including accrued expenses, dividends payable and any borrowings of the Trust) and the liquidation value of any outstanding preferred shares from the Trust's total assets (the value of the securities the Trust holds, plus cash and/or other assets, including interest accrued but not yet received) and dividing the result by the total number of common shares of the Trust outstanding. Net asset value per common share will be determined as of the close of the regular trading session (usually 4:00 p.m., EST) on the New York Stock Exchange (NYSE) on each business day on which the NYSE is open for trading.

For purposes of determining the net asset value of the Trust, readily marketable portfolio assets traded principally on an exchange, or on a similar regulated market reporting contemporaneous transaction prices, are valued, except as indicated below, at the last sale price for such assets on such principal markets on the business day on which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. Foreign securities are valued based upon quotations from the primary market in which they are traded and are translated from the local currency into U.S. dollars using current exchange rates. Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value as determined in accordance with procedures approved by the Trust's Board of Trustees (the Board).

Short-term securities which mature in more than 60 days are valued at current market quotations. Short-term securities, which mature in 60 days or less are valued at, amortized cost, which approximates market value.

GAAP provides guidance on fair value measurements. In accordance with the standard, fair value is defined as the price that the Trust would receive to sell an investment or pay to transfer a liability in a timely transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. It establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Trust's investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below:

Level 1 unadjusted quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Trust's own assumptions in determining the fair value of investments)

For Level 1 inputs, the Trust uses unadjusted quoted prices in active markets for assets or liabilities with sufficient frequency and volume to provide pricing information as the most reliable evidence of fair value.

The Trust's Level 2 valuation techniques include inputs other than quoted prices within Level 1 that are observable for an asset or liability, either directly or indirectly. Level 2 observable inputs may include quoted prices for similar assets and liabilities in active markets or quoted prices for identical or similar assets or liabilities in markets that are not active in which there are few transactions, the prices are not current, or price quotations vary substantially over time or among market participants. Inputs that are observable for the asset or liability in Level 2 include such factors as interest rates, yield curves, prepayment speeds, credit risk, and default rates for similar liabilities.

For Level 3 valuation techniques, the Trust uses unobservable inputs that reflect assumptions market participants would be expected to use in pricing the asset or liability. Unobservable inputs are used to measure fair value to the extent that observable inputs are not available and are developed based on the best information available under the circumstances. In developing unobservable inputs, market participant

Table of Contents**14 ĩ CBRE CLARION GLOBAL REAL ESTATE INCOME FUND**

Notes to Financial Statements continued

assumptions are used if they are reasonably available without undue cost and effort.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used as of June 30, 2011 in valuing the Trust's investments carried at fair value:

	Level 1	Level 2	Level 3
Investments in Real Estate Securities			
Common Stocks*	\$ 907,162,611	\$ 31,404,798	\$ 11,749,980
Preferred Stocks*	185,806,256	31,404,798	
Total	\$ 1,092,968,867	\$ 31,404,798	\$ 11,749,980

* Please refer to Portfolio of Investments for the regional classifications of these holdings.

The primary third party pricing vendor for the Trust's listed preferred stock investments is FT Interactive Data (IDC). When available, the Trust will obtain a closing exchange price to value the preferred stock investments and, in such instances, the investment will be classified as Level 1 since an unadjusted quoted price was utilized. When a closing price is not available for the listed preferred stock investments, IDC will produce an evaluated mean price (midpoint between the bid and the ask evaluation) and such investments will be classified as Level 2 since other observable inputs were used in the valuation. Factors used in the IDC evaluation include trading activity, the presence of a two-sided market, and other relevant market data.

It is the Trust's policy to recognize transfers in and transfers out at the fair value as of the beginning of the period. The fair value of Level 2 and Level 1 investments at December 31, 2010 was \$41,153,699 and \$1,021,044,336, respectively. \$20,929,410 was transferred out of Level 2 to Level 1 and \$14,940,000 of preferred stock investments was transferred out of Level 1 and into Level 2 during the period ended June 30, 2011 as a result of obtaining quoted exchange closing prices from the Trust's third party pricing vendor.

The Trust has one investment in a private equity security which is classified as Level 3 because no market quotations are readily available. In determining the fair value of this investment, the following factors may be evaluated: balance sheet, income statement, the portfolio of real estate investments held, economic factors and conditions in which the company operates, and comparable public company valuations and trading prices.

The following is a reconciliation of assets in which significant unobservable inputs (Level 3) were used in determining fair value:

	Common Stocks
Balance as of December 31, 2010	\$ 11,749,980

Realized gain (loss)		
Change in unrealized appreciation (depreciation)		
Net purchases (sales)		
Transfers in and/or out of Level 3		
Balance as of June 30, 2011	\$	11,749,980

For six months ended June 30, 2011, there have been no significant changes to the Trust's fair valuation methodology.

Foreign Currency Translation The books and records of the Trust are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars on the following basis:

- (i) market value of investment securities, other assets and liabilities at the current rates of exchange;
- (ii) purchases and sales of investment securities, income and expenses at the rate of exchange prevailing on the respective dates of such transactions.

Although the net assets of the Trust are presented at the foreign exchange rates and market values at the close of each fiscal period, the Trust does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of long-term securities held at the end of the fiscal period. Similarly, the Trust does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of portfolio securities sold during the fiscal period. Accordingly, realized foreign currency gains or losses will be included in the reported net realized gains or losses on investment transactions.

Net realized gains or losses on foreign currency transactions represent net foreign exchange gains or losses from the holding of foreign currencies, currency gains or losses realized between the trade date and settlement date on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Trust's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains or losses from valuing foreign currency denominated assets or liabilities (other than investments) at period end exchange rates are reflected as a component of net unrealized appreciation or depreciation on investments and foreign currencies.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of

Table of Contents

SEMI-ANNUAL REPORT 2011 i 15

Notes to Financial Statements continued

domestic origin as a result of, among other factors, the possibility of political or economic instability, or the level of governmental supervision and regulation of foreign securities markets.

Forward Exchange Currency Contracts The Trust may enter into forward exchange currency contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain Trust purchase and sales commitments denominated in foreign currencies and for investment purposes. A forward exchange currency contract is a commitment to purchase or sell a foreign currency on a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts would be included in net realized gain or loss on foreign currency transactions.

Fluctuations in the value of open forward exchange currency contracts are recorded for financial reporting purposes as unrealized appreciation and depreciation by the Trust.

The Trust's custodian will place and maintain cash not available for investment or other liquid assets in a separate account of the Trust having a value at least equal to the aggregate amount of the Trust's commitments under forward exchange currency contracts entered into with respect to position hedges.

Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars, reflects the total exposure the Trust has in that particular currency contract. As of June 30, 2011, the Trust did not hold any forward exchange currency contracts.

Securities Transactions and Investment Income Securities transactions are recorded on a trade date basis. Realized gains and losses from securities transactions are recorded on the basis of identified cost. Dividend income is recorded on the ex-dividend date. Distributions received from investments in REITs are recorded as dividend income on ex-dividend date, subject to reclassification upon notice of the character of such distributions by the issuer. The portion of dividend attributable to the return of capital is recorded against the cost basis of the security. Withholding taxes on foreign dividends are recorded net of reclaimable amounts, at the time the related income is earned. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of original issue discount, where applicable, and accretion of discount on short-term investments, is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on the basis of identified cost.

Swaps The Trust may enter into swap agreements. A swap is an agreement to exchange the return generated by one instrument for the return generated by another instrument. The Trust enters into interest rate swap agreements to manage its exposure to interest rate and credit risk. Interest rate swap agreements involve the exchange by the Trust with another party of their respective commitments to pay or receive interest. Dividends and interest on the securities in the swap are included in the value of the exchange. The swaps are valued daily at current market value and any unrealized gain or loss is included in the Statement of Assets and Liabilities. Gain or loss is realized on the periodic reset date or termination date of the swap and is equal to the difference between the Trust's basis in the swap and the proceeds of the closing transaction, including any fees. During the period that the swap agreement is open, the Trust may be subject to risk from the potential inability of the counterparty to meet the terms of the agreement. The swaps involve elements of both market and credit risk in excess of the amounts reflected on the Statement of Assets and Liabilities. As of June 30, 2011, the Trust did not have any swap agreements outstanding.

Dividends and Distributions to Shareholders Dividends from net investment income, if any, are declared and paid on a monthly basis. Income dividends and capital gain distributions to common shareholders are recorded on the ex-dividend date. To the extent the Trust's net realized capital gains, if any, can be offset by capital loss carryforwards, it is the policy of the Trust not to distribute such gains.

On August 5, 2008, the Trust acting in accordance with an exemptive order received from the Securities and Exchange Commission and with approval of the Board, adopted a managed distribution policy under which the Trust intends to make regular monthly cash distributions to common shareholders, stated in terms of a fixed amount per common share. With this policy the Trust can now include long-term capital gains in its distribution as frequently as twelve times a year. In practice, the Board views their approval of this policy as a potential means of further supporting the market price of the Trust through the payment of a steady and predictable level of cash distributions to shareholders.

The current monthly rate is \$0.045 per share. The Trust continues to evaluate its monthly distribution policy in light of ongoing economic and market conditions and may change the amount of the monthly distributions in the future.

Use of Estimates The preparation of financial statements, in conformity with GAAP, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of expenses during the reporting period. Actual results could differ from those estimates.

Table of Contents

16 ĩ CBRE CLARION GLOBAL REAL ESTATE INCOME FUND

Notes to Financial Statements continued

3. Concentration of Risk

Under normal market conditions, the Trust's investments will be concentrated in income-producing common equity securities, preferred securities, convertible securities and non-convertible debt securities issued by companies deriving the majority of their revenue from the ownership, construction, financing, management and/or sale of commercial, industrial, and/or residential real estate. Values of the securities of such companies may fluctuate due to economic, legal, cultural, geopolitical or technological developments affecting various global real estate industries.

4. Investment Management Agreement and Other Agreements

Pursuant to an investment management agreement between the Advisor and the Trust, the Advisor is responsible for the daily management of the Trust's portfolio of investments, which includes buying and selling securities for the Trust, as well as investment research. The Trust pays for investment advisory services and facilities through a fee payable monthly in arrears at an annual rate equal to 0.85% of the average weekly value of the Trust's managed assets plus certain direct and allocated expenses of the Advisor incurred on the Trust's behalf. The Advisor has agreed to waive a portion of its management fee in the amount of 0.25% of the average weekly values of the Trust's managed assets for the first five years of the Trust's operations (through February, 2009), and for a declining amount for an additional four years (through February, 2013). During the six months ended June 30, 2011, the Trust incurred management fees of \$4,060,989 which are net of \$641,611 in management fees waived by the Advisor.

The Trust has multiple service agreements with The Bank of New York Mellon (BNYM). Under the servicing agreements, BNYM will perform custodial, fund accounting, certain administrative services, and transfer agency services for the Trust. As custodian, BNYM is responsible for the custody of the Trust's assets. As administrator, BNYM is responsible for maintaining the books and records of the Trust's securities and cash. As transfer agent, BNYM is responsible for performing transfer agency services for the Trust.

5. Portfolio Securities

For the six months ended June 30, 2011, there were purchases and sales transactions (excluding short-term securities) of \$14,264,190 and \$27,311,873, respectively.

6. Federal Income Taxes

The Trust intends to elect to be, and qualify for treatment as, a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code). A regulated investment company generally pays no federal income tax on the income and gains that it distributes. The Trust intends to meet the calendar year distribution requirements imposed by the Code to avoid the imposition of a 4% excise tax.

The Trust is required to evaluate tax positions taken or expected to be taken in the course of preparing the Trust's tax returns to determine whether the tax positions are more-likely-than-not of being sustained by the applicable tax authority. Income tax and related interest and penalties would be recognized by the Trust as tax expense in the Statement of Operations if the tax positions were deemed to not meet the more-likely-than-not threshold. For the six months ended June 30, 2011, the Trust did not incur any income tax, interest, or penalties. As of June 30, 2011, the Advisor has reviewed all open tax years and concluded that there was no impact to the Trust's net assets or results of operations. Tax years ended December 31, 2008 through December 31, 2010, remain subject to examination by the Internal Revenue Service and state taxing authorities. On an ongoing basis, the Advisor will monitor its tax positions to determine if adjustments to this conclusion are necessary.

The Trust distinguishes between dividends on a tax basis and on a financial reporting basis and only distributions in excess of tax basis earnings and profits are reported in the financial statements as a tax return of capital. Differences in the recognition or classification of income between the financial statements and tax earnings and profits which result in temporary over-distributions for financial statement purposes are classified as distributions in excess of net investment income or accumulated net realized losses in the components of net assets on the Statement of Assets and Liabilities.

In order to present paid-in capital in excess of par and accumulated net realized gains or losses on the Statement of Assets and Liabilities that more closely represent their tax character, certain adjustments have been made to additional paid-in capital, undistributed net investment income and accumulated net realized gains or losses on investments. For the year ended December 31, 2010, the adjustments were to decrease additional paid-in capital by \$2,705,982 increase accumulated net realized loss on investments by \$4,794,561 and decrease undistributed net investment income by \$2,088,579 due to the difference in the treatment for book and tax purposes of certain investments. Results of operations and net assets were not affected by these reclassifications.

Capital losses incurred after October 31 (post-October capital losses) within the taxable year are deemed to arise on the first business day of the Trust s next taxable year. The Trust did not incur any post-October capital losses during 2011.

The final determination of the source of the 2011 distributions for tax purposes will be made after the end of the Trust s fiscal

Table of Contents

SEMI-ANNUAL REPORT 2011 i 17

Notes to Financial Statements concluded

year and will be reported to shareholders in February 2012 on Form 1099-DIV.

For the year ended December 31, 2010, the tax character of distributions paid, as reflected in the Statements of Changes in Net Assets, was \$62,958,867 of ordinary income, respectively.

Information on the components of net assets as of June 30, 2011 is as follows:

Cost of Investments	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Net Unrealized Appreciation on Investments
\$976,872,486	\$224,760,875	\$(65,509,716)	\$159,251,159

7. Borrowings

The Trust has access to a secured line of credit up to \$300,000,000 from BNYM for borrowing purposes. Borrowings under this arrangement bear interest at the Federal funds rate plus 75 basis points. At June 30, 2011, there were borrowings in the amount of \$76,686,600 on the Trust's line of credit.

The average daily amount of borrowings during the six months ended June 30, 2011 was \$76,486,331 with a related weighted average interest rate of 0.89%. The maximum amount outstanding for the six months ended June 30, 2011, was \$85,204,700.

8. Capital

During 2004, the Trust issued 101,000,000 shares of common stock at \$15.00. In connection with the Trust's DRIP plan, the Trust issued no common shares during the six month period ended June 30, 2011 and the year ended 2010, respectively. At June 30, 2011, the Trust had outstanding common shares of 116,590,494 with a par value of \$0.001 per share. The Advisor owned 12,741 shares of the common shares outstanding.

At June 30, 2011, the Trust had no shares of auction rate preferred securities outstanding.

9. Indemnifications

The Trust enters into contracts that contain a variety of indemnifications. The Trust's exposure under these arrangements is unknown. However, the Trust has not had prior claims or losses or current claims or losses pursuant to these contracts.

10. New Accounting Pronouncements

In April 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-03 Reconsideration of Effective control for Repurchase Agreements . The objective of ASU 2011-03 is to improve the accounting for repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. Under previous guidance, whether or not to account for a transaction as a sale was based on, in part, if the entity maintained effective control over the transferred financial

assets. ASU 2011-03 removes the transferor's ability criterion from the effective control assessment. This guidance is effective prospectively for interim and annual reporting periods beginning on or after December 15, 2011. At this time, management is evaluating the implications of ASU No. 2011-03 and its impact on the financial statements has not been determined.

In May 2011, the FASB issued ASU No. 2011-04 Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. ASU 2011-04 includes common requirements for measurement of and disclosure about fair value between U.S. GAAP and IFRS. ASU 2011-04 will require reporting entities to disclose the following information for fair value measurements categorized within Level 3 of the fair value hierarchy: quantitative information about the unobservable inputs used in the fair value measurement, the valuation processes used by the reporting entity and a narrative description of the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs. In addition, ASU 2011-04 will require reporting entities to make disclosures about amounts and reasons for all transfers in and out of Level 1 and Level 2 fair value measurements. The new and revised disclosures are effective for interim and annual reporting periods beginning after December 15, 2011. At this time, management is evaluating the implications of ASU No. 2011-04 and its impact on the financial statements.

11. Subsequent Events

Events or transactions that occur after the balance sheet date but before the financial statements are issued are categorized as recognized or non-recognized for financial statement purposes. Effective July 5, 2011, the name of ING Clarion Global Real Estate Income Fund was changed to CBRE Clarion Global Real Estate Income Fund. The Advisor has evaluated subsequent events and has determined there were no additional events that require recognition or disclosure in the Trust's financial statements.

Supplemental Information continued

Board Considerations in Approving the Advisory Agreement

On March 8, 2011, the Board approved the investment management agreement (the *Advisory Agreement*) between the Advisor and the Trust. Overall, the Board concluded that continuation of the *Advisory Agreement* was in the best interests of the Trust and consistent with shareholder expectations. During the course of its deliberations, the Board received publicly available information relating to other closed-end investment companies whose investment objectives and policies are similar to the Trust, as well as information relating to other accounts managed by the Advisor whose investment objectives and policies are similar to the Trust. In determining to approve the *Advisory Agreement*, the Board took into account a number of factors, without assigning relative weight to any factor or identifying any factor as determinative. Rather, the Board based its finding on the specific facts and circumstances of the Trust.

In approving the continuation of the *Advisory Agreement*, the Board reviewed the nature, extent and quality of advisory services provided by the Advisor, including the performance achieved by the Advisor for the Trust in volatile market conditions, the consistency of the Advisor's investment decision process, the experience of the Advisor's personnel and the administrative resources devoted by the Advisor to oversight of the Trust's operations. The Board also considered the Trust's strategic focus on providing income to its shareholders and current economic trends and conditions, as well as the performance and expenses of comparable peer group funds. The Board concluded that the nature and quality of the services provided to the Trust by the Advisor, including both the Trust's relative performance and administrative and related compliance oversight procedures were satisfactory and supported the continued retention of the Advisor by the Trust.

During its deliberations, the Board considered information provided to it by the Advisor with respect to the acquisition of the Advisor by CB Richard Ellis (the *Acquisition*), the nature and extent of the business of CB Richard Ellis and its affiliated companies and, in particular, the expected continuation, following the *Acquisition*, of the management team that has served the Trust since the inception of the Trust. Of particular importance in this regard, were management's assurances that, following the closing of the *Acquisition*, the Advisor's senior management would not undertake substantial new responsibilities within the CB Richard Ellis organization such that continuation of the Advisor's core business, and the Advisor's ability to meet its fiduciary and contractual obligations to the Trust, would be adversely affected. The Board also considered the Advisor's representations with respect to its access to the research capability of CB Richard Ellis.

The Board also considered the level of compensation to which the Advisor is entitled under the *New Advisory Agreement*. Among other things, the Board considered the Advisor's fee waiver and the rate at which the Advisor's fee would be calculated. The Board also considered information provided by the Advisor with respect to the profits realized by the Advisor as a result of its services to the Trust and as compared to the Advisor's profitability as a result of its management of other advisory accounts, as well as the extent to which the *Acquisition* represented, in effect, a fall out benefit to the Advisor as a result of its relationship with the Trust. The Board concluded that the Advisor's fees were very competitive with those of its peer group, that the Advisor had successfully maintained the Trust's expense ratio at levels below those of the peer group funds and that the Advisor (unlike some peer group funds) does not charge a separate administration fee to the Trust. The Board also concluded that the continuation of an advisory fee rate at the same level as set forth in the *Advisory Agreement* should not result in profits to the Advisor that may be deemed excessive and that the advisory fee rate is reasonable under the circumstances of the Trust. The Board also reviewed the Trust's indemnification obligation under the *Advisory Agreement*. Although reviewed by the Board, the potential for realization of economies of scale was not a factor in the Board's conclusions, because the Trust is a

closed-end vehicle with limited potential for asset growth.

Additional Information

Statement of Additional Information includes additional information regarding the Trustees. This information is available upon request, without charge, by calling the following toll-free telephone number: 1-888-711-4272.

The Trust has delegated the voting of the Trust's voting securities to the Trust's advisor pursuant to the proxy voting policies and procedures of the advisor. You may obtain a copy of these policies and procedures by calling 1-888-711-4272. The policies may also be found on the website of the Securities and Exchange Commission (<http://www.sec.gov>).

Information regarding how the Trust voted proxies for portfolio securities, if applicable, during the most recent 12-month period ended June 30, is also available, without charge and upon request by calling the Trust at 1-888-711-4272 or by accessing the Trust's Form N-PX on the Commission's website at <http://www.sec.gov>.

Supplemental Information concluded

The Trust files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Trust's Form N-Qs are available on the SEC website at <http://www.sec.gov>. The Trust's Form N-Qs may also be viewed and copied at the Commission's Public Reference Room in Washington, DC; information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330.

Dividend Reinvestment Plan (unaudited)

Pursuant to the Trust's Dividend Reinvestment Plan (the Plan), shareholders of the Trust are automatically enrolled, to have all distributions of dividends and capital gains reinvested by The Bank of New York Mellon (the Plan Agent) in the Trust's shares pursuant to the Plan. You may elect not to participate in the Plan and to receive all dividends in cash by sending written instructions or by contacting The Bank of New York Mellon, as dividend disbursing agent, at the address set forth below. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by contacting the Plan Agent before the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Shareholders who do not participate in the Plan will receive all distributions in cash paid by check and mailed directly to the shareholders of record (or if the shares are held in street or other nominee name, then to the nominee) by the Plan Agent, which serves as agent for the shareholders in administering the Plan.

After the Trust declares a dividend or determines to make a capital gain distribution, the Plan Agent will acquire shares for the participants' account, depending upon the circumstances described below, either (i) through receipt of unissued but authorized shares from the Trust (newly issued shares) or (ii) by open market purchases. If, on the dividend payment date, the NAV is equal to or less than the market price per share plus estimated brokerage commissions (such condition being referred to herein as market premium), the Plan Agent will invest the dividend amount in newly issued shares on behalf of the participants. The number of newly issued shares to be credited to each participant's account will be determined by dividing the dollar amount of the dividend by the NAV on the date the shares are issued. However, if the NAV is less than 95% of the market price on the payment date, the dollar amount of the dividend will be divided by 95% of the market price on the payment date. If, on the dividend payment date, the NAV is greater than the market value per share plus estimated brokerage commissions (such condition being referred to herein as market discount), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participants in open-market purchases.

The Plan Agent's fees for the handling of the reinvestment of dividends and distributions will be paid by the Trust. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open market purchases in connection with the reinvestment of dividends and distributions. The automatic reinvestment of dividends and distributions will not relieve participants of any Federal income tax that may be payable on such dividends or distributions.

The Trust reserves the right to amend or terminate the Plan. There is no direct service charge to participants in the Plan; however, the Trust reserves the right to amend the Plan to include a service charge payable by the participants. Participants that request a sale of shares through the Plan Agent are subject to a \$2.50 sales fee and a \$0.15 per share sold brokerage commission. All correspondence concerning the Plan should be directed to the Plan Agent at BNY Mellon Shareowner Services, P.O. Box 358015, Pittsburgh, PA 15252-8015, Phone Number: (866) 221-1580.
