STURGIS BANCORP, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note A: FINANCIAL STATEMENTS.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of Management, all adjustments (consisting only of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the nine-month period ended September 30, 2004 are not necessarily indicative of the results that may be expected for the year ending December 31, 2004. For further information, refer to the consolidated financial statements and footnotes thereto included in the Bancorp's Annual Report on Form 10-K for the year ended December 31, 2003.

Note B: ORGANIZATION AND ACCOUNTING POLICIES.

Basis of Presentation and Consolidation The consolidated financial statements include the accounts of Bancorp and Bank, which includes the Bank's wholly owned subsidiaries, Oakleaf Financial Services, Inc., Ludington Service Corporation, First Michiana Development Corporation of Sturgis and Oak Mortgage, LLC. All significant inter-company transactions and balances have been eliminated in consolidation.

Use of Estimates In preparing consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates and assumptions. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, and the valuation of real estate owned, deferred tax assets, mortgage servicing rights, and the impairment of goodwill.

Nature of Operations The Bank operates predominately in the south-western portion of Michigan's lower peninsula. Its primary services include accepting deposits, making commercial and mortgage loans, engaging in mortgage banking activities, and providing trust and investment brokerage advisory services.

Segment Reporting While management monitors the revenue streams of various products and services offered, operations are managed and financial performance is evaluated on a Bancorp-wide basis. Accordingly, all of Bancorp's operations are considered by management to be aggregated in one reportable operating segment.

Significant Group Concentrations of Credit Risk Most of the Bank's activities are with customers located within Michigan. The Bank's loan portfolio is concentrated in

Table of Contents

residential first-mortgage and commercial mortgage loans. The Bank does not have any significant concentrations to any one industry or customer.

Cash and Cash Equivalents For the purpose of the consolidated statements of cash flows, cash and cash equivalents include cash and balances due from banks, federal funds sold and other short-term investments, all of which mature within ninety days.

Interest-bearing Deposits in Banks Interest-bearing deposits in banks mature within ten years and are carried at cost.

Securities Debt securities that management has the positive intent and ability to hold to maturity are classified as held to maturity and recorded at amortized cost. Securities not classified as held to maturity are classified as available for sale and recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income.

Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Declines in the fair value of held to maturity and available for sale securities below their cost, that are deemed to be other than temporary, are reflected in earnings as realized losses. Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method.

Federal Home Loan Bank Stock The Bank's minimum investment in the stock of the Federal Home Loan Bank of Indianapolis (FHLB) is an amount equal to at least one percent of the unpaid principal balances of the Bank's residential mortgage loans or 0.3 percent of its total assets, whichever is greater. Purchases and sales of stock are made directly with the FHLB at par value and are recorded at cost.

Loans Held for Sale Loans originated and intended for sale in the secondary market are carried at the lower of cost or estimated fair value in the aggregate. Net unrealized losses, if any, are recognized in a valuation allowance by charges to income.

Loans The Bank grants mortgage, commercial, and consumer loans to customers. Loans are reported at their outstanding unpaid principal balances adjusted for charge-offs, the allowance for loan losses, and any deferred fees or costs on originated loans. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the related loan yield using the interest method.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off are reported at their outstanding unpaid principal balances adjusted for charge-offs, the allowance for loan losses, and any deferred fees or costs on originated loans. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the related loan yield using the interest method.

The accrual of interest on loans is discontinued at the time the loan is 90 days delinquent unless the credit is well-secured and in process of collection. In all cases, loans are placed

Table of Contents

on nonaccrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not collected for loans that are placed on nonaccrual status or charged off is reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Allowance for Loan Losses The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of specific, general and unallocated components. The specific components relate to loans that are classified as doubtful, substandard or special mention. For such loans that are also classified as impaired, an allowance is established when the discounted cash flows, collateral value or observable market price of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

A loan is considered impaired, based on current information and events, when it is probable that the Bank will be unable to collect the scheduled payments of principal or interest in accordance with the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the known circumstances surrounding the loan and the borrower, including length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the collateral value and total amount owed. Impairment is measured on a loan by loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Table of Contents

Large groups of homogeneous loans are collectively evaluated for impairment. Accordingly, the Bank does not separately identify individual consumer and residential loans for impairment disclosures.

Servicing Servicing assets are recognized as separate assets when rights are acquired through purchase or through sale of financial assets. Capitalized servicing rights are amortized into noninterest income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets. Servicing assets are evaluated for impairment based upon the fair value of the rights as compared to amortized cost. Impairment is determined by stratifying rights by predominant characteristics, such as interest rates and terms. Fair value is determined using prices for similar assets with similar characteristics, when available, or based upon discounted cash flows using market-based assumptions. Impairment is recognized through a valuation allowance for an individual stratum, to the extent that fair value is less than the capitalized amount for the stratum. The Bank carried a valuation allowance associated with capitalized servicing rights of approximately \$2,334 at September 30, 2004 and \$22,274 at December 31, 2003.

Off-Balance Sheet Instruments In the ordinary course of business, the Bank has entered commitments to extend credit, including commitments under commercial letters of credit and standby letters of credit. Such financial instruments are recorded when they are funded.

Real Estate Owned Assets acquired through, or in lieu of, loan foreclosure are held for sale and are initially recorded at fair value at the date of the foreclosure, establishing a new cost basis. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less costs to liquidate the assets. Revenue and expenses from operations and changes in the valuation allowance are included in net expenses from foreclosed assets.

Investment in Limited Partnerships Bancorp owns investments in limited partnerships that are structured to generate low income housing tax credits and an investment in a Michigan partnership structured to generate commissions from the sale of title insurance. Bancorp accounts for these investments under the equity method, whereby the Bancorp annually records its proportionate share of partnership profits and losses as an adjustment to the carrying value of the investment.

Goodwill and Intangible Assets Effective January 1, 2002, Bancorp adopted Statement of Financial Accounting Standards (SFAS) No. 142. Goodwill and Other Intangible Assets, which changes Bancorp's accounting for goodwill and other intangible assets acquired in a business combination. Generally, intangible assets that meet certain criteria are recognized and subsequently amortized over their estimated useful lives. Goodwill and intangible assets with indefinite lives are not amortized. However, such assets are tested for impairment at adoption of SFAS 142 and at least annually thereafter. No impairment loss was recognized upon the adoption of SFAS 142, at September 30, 2004 or December 31, 2003.

Table of Contents

Premises and Equipment Land is carried at cost. Premises and equipment are carried at cost, less accumulated depreciation computed on the straight-line method over the estimated useful lives of the assets.

Income Taxes Deferred income tax assets and liabilities are determined using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the various temporary differences between the book and the tax bases of the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

Earnings Per Common Share Basic earnings per share represents income available to common stockholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflects additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may be issued by Bancorp relate solely to outstanding stock options, and are determined using the treasury stock method.

Earnings per common share have been computed based on the following:

	Three Months Sept. 30, 2004	2003
	<hr/>	<hr/>
Net income	\$ 552,437	\$ 716,801
Weighted average number of common shares outstanding	2,725,788	2,808,535
Effect of dilutive options	5,278	3,105
Weighted average number of common shares outstanding used to calculate diluted earnings per share	2,731,066	2,811,640

	Nine Months Sept. 30, 2004	2003
	<hr/>	<hr/>
Net income	\$ 1,344,016	\$ 2,039,836
Weighted average number of common shares outstanding	2,775,418	2,808,408
Effect of dilutive options	5,210	2,179
Weighted average number of common shares outstanding used to calculate diluted earnings per share	2,780,628	2,810,587

Comprehensive Income Accounting principles generally require that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, are reported as a separate component of the equity section of the balance sheet, such items, along with net income, are components of comprehensive income.

Reclassification Certain amounts appearing in the prior year's financial statements have been reclassified to conform to the current year's financial statements.

Table of Contents**Statement of Cash Flows**

For the purposes of the consolidated statements of cash flows, Bancorp considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

	Nine Months Ended September 30,	
	2004	2003
	<hr/>	<hr/>
Supplemental cash flow information:		
Cash paid during the periods for:		
Interest	\$4,749,364	\$5,705,651
Income taxes	565,000	1,015,000
Noncash investing and financing activities:		
Loans transferred to real estate owned	814,856	420,611

Stock Compensation Plans In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure an Amendment of FASB Statement No. 123. This Statement amends SFAS No. 123, Accounting for Stock-Based Compensation, to provide alternative methods of transition for a voluntary change to the fair value method of accounting for stock-based employee compensation. In addition, this Statement amends the disclosure requirements of SFAS No. 123 to require more prominent disclosures about the method of accounting for stock-based employee compensation and the effect of the method used on reported results in both annual and interim financial statements. This Statement was effective for financial statements for fiscal years ending after December 15, 2002. As permitted by SFAS No. 148, Bancorp will continue to apply the provisions of APB Opinion No. 25, Accounting for Stock-Based Compensation, for all employee stock option grants and has elected to disclose pro forma net income and earnings per share amounts as if the fair-value based method had been applied in measuring compensation costs.

Table of Contents

Bancorp's net income and earnings per share would have been adjusted to the pro forma amounts indicated below:

Note E: BORROWED FUNDS.

Bancorp had \$51.9 million and \$55.8 million in borrowed funds from Federal Home Loan Bank of Indianapolis (FHLB) at September 30, 2004 and December 31, 2003, respectively. Interest rates range from 1.61% to 7.34% with maturities ranging from October 2004 to February 2012. Borrowed funds from FHLB are collateralized by FHLB stock and all non-employee residential and commercial mortgage loans.

Bancorp had \$15.0 million in borrowed funds from Citigroup Global Markets Inc. (Citigroup) at September 30, 2004 and none at December 31, 2003. Interest rates are 1.80% and 3.48% with maturities in November 2004 and May 2007. Borrowed funds from Citigroup are collateralized by certain mortgage-backed securities.

Annual principal payments of borrowed funds are as follows:

Twelve Months Ending September 30,	Amount	Weighted Rate
2005	\$15,057,211	2.57%
2006	3,346,072	5.70%
2007	7,500,000	3.48%

Note F: CASH DIVIDENDS

Bancorp paid a cash dividend of \$.09 per share on its issued and outstanding common stock on March 15, 2004 to shareholders of record February 13, 2004. Total dividends paid on March 15, 2004 were \$252,836.

Bancorp paid a cash dividend of \$.09 per share on its issued and outstanding common stock on June 15, 2004 to shareholders of record May 14, 2004. Total dividends paid on June 15, 2004 were \$252,836.

Bancorp paid a cash dividend of \$.09 per share on its issued and outstanding common stock on September 15, 2004 to shareholders of record August 13, 2004. Total dividends paid on September 15, 2004 were \$245,060.

Note G: EMPLOYEE BENEFIT PLANS

The Bank has a Defined Contribution Plan/401(k). The plan permits eligible employees to contribute a percentage of their compensation with the Bank contributing 25% of the employee's pre-tax contribution, not to exceed 10% of the employee's total compensation, as defined in the agreement. The plan also permits the Bank to make additional discretionary contributions, although the Bank has not historically exceeded the 25% match described herein.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF
OPERATIONS**

Forward Looking Statements

This report contains statements that constitute forward-looking statements. These statements appear in several places in this report and include statements regarding intent, belief, outlook, objectives, efforts, estimates or expectations of Bancorp, primarily with respect to future events and the future financial performance of Bancorp. Any such forward-looking statements are not guarantees of future events or performance and involve risks and uncertainties, and actual results may differ materially from those in the forward-looking statement. Factors that could cause a difference between an ultimate actual outcome and a preceding forward-looking statement include, but are not limited to, changes in interest rates and interest rate relationships; demand for products and services; the degree of competition by traditional and non-traditional competitors; changes in banking laws and regulations; changes in tax laws; changes in prices, levies, and assessments; the impact of technological advances; government and regulatory policy changes; the outcome of any pending and future litigation and contingencies; trends in consumer behavior and ability to repay loans; and changes of the world, national and local economies. Bancorp undertakes no obligation to update, amend or clarify forward-looking statements as a result of new information, future events, or otherwise.

Critical Accounting Policies

The banking industry is highly regulated. Furthermore, the nature of the banking industry is such that, other than described below, the use of estimates and management judgment are not likely to present a material risk to the financial statements. In cases where estimates or management judgment are required, internal controls and processes are established to provide assurance that such estimates and management judgments are materially correct to the best of management's knowledge.

Allowance for loan losses - Accounting for loan classifications, accrual status, and determination of the allowance for loan losses is based on regulatory guidance. This guidance includes, but is not limited to, generally accepted accounting principles, the uniform retail credit classification and account management policy issued by the Federal Financial Institutions Examination Council (FFIEC), and the joint policy statement on the allowance for loan losses methodologies issued by the FFIEC. Accordingly, the allowance for loan losses includes a reserve calculation based on an evaluation of loans determined to be impaired, risk ratings, historical losses, loans past due, and other factors. However, there is still a degree of subjectivity when formulating the level of the allowance for loan losses and historical trends may not be indicative of future levels provided to the reserve account.

Table of Contents

Commercial loan rating system and identification of impaired loans Bancorp has a defined risk rating system that is designed to assess the risk of individual loans and overall risk of the commercial loan portfolio. The system assigns a risk weighting to factors such as cash flow, collateral, financial condition, operating performance, repayment history, management, and strength of the customer's industry. An assessment of risk is performed as a part of the loan approval process as well as periodic updates based on the circumstances of the individual loan. Bancorp employs both internal and external loan review services to assess risk ratings.

Originated mortgage servicing rights (OMSR) Bancorp records the original OMSR based on market data. The OMSR is amortized into non-interest income in proportion to the period of the estimated future net servicing income of the underlying financial asset. Additionally, an independent third party valuation is performed to determine potential impairment of the OMSR as a result of changes in interest rates and expected future loan repayment speeds. Significant changes in interest rates or repayment speeds could have a significant impact on the carrying value of mortgage servicing assets.

Deferred income tax assets Deferred income tax assets and liabilities are determined using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the various temporary differences between the book and tax bases of the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

Goodwill and Intangible Assets Bancorp had \$5.1 million of goodwill at September 30, 2004 and December 31, 2003. Effective January 1, 2002, Bancorp adopted Financial Accounting Standards No. 142 (SFAS 142), Goodwill and Other Intangible Assets, which changes Bancorp's accounting for goodwill and other intangible assets. Generally, intangible assets that meet certain criteria are recognized and subsequently amortized over their estimated useful lives. Goodwill and intangible assets with indefinite lives, such as Bancorp's goodwill, are not amortized. However, such assets are tested for impairment annually after adoption of SFAS 142.

Results of Operations

Bancorp reported net income of \$552,437 and \$716,801 for the three months ended September 30, 2004 and 2003, respectively. Basic earnings per share was \$0.20 and \$0.26 for the three months ended September 30, 2004 and 2003, respectively. The decrease in net income from 2003 to 2004 was primarily due to reductions in mortgage banking activities.

Bancorp reported net income of \$1,344,016 and \$2,039,836 for the nine months ended September 30, 2004 and 2003, respectively. Basic earnings per share was \$0.48 and \$0.73 for the nine months ended September 30, 2004 and 2003, respectively. The decrease in net income from 2003 to 2004 was primarily due to reductions in mortgage banking activities, which were partially offset by the reduction in provisions for loan

Table of Contents

losses.

Interest Income

Three months ended September 30, 2004 compared to three months ended September 30, 2003. Interest income increased \$146,623 to \$3.8 million in 2004 from \$3.6 million in 2003. This increase is primarily due to the increase in average interest-bearing assets, which were \$276.3 million and \$252.0 million for the three months ended September 30, 2004 and 2003, respectively. The average interest rate earned on loans decreased to 5.79% in 2004 from 6.34% in 2003. This decrease in the average interest rate earned is primarily due to adjustable rate loans repricing lower through 2003 and 2004. Management believes the expansion of commercial lending will lead to an improved interest margin when rates increase. Most commercial loans are contractually subject to interest rate changes monthly or annually, based on prime. The average yield on interest-earning assets decreased to 5.47% in 2004 from 5.75% in 2003. This is primarily due to changes in the composition of interest-earning assets and lower yields as interest-earning assets repriced through 2003 and 2004.

Nine months ended September 30, 2004 compared to nine months ended September 30, 2003. Interest income decreased \$670,301 to \$11.0 million in 2004 from \$11.7 million in 2003. This decrease is primarily due to the decreases in interest rates. The average interest rate earned on loans decreased to 5.81% in 2004 from 6.62% in 2003. This decrease in the average interest rate earned is primarily due to adjustable rate loans repricing lower through 2003 and 2004. Average interest-bearing assets increased to \$266.3 million from \$256.6 million for the nine months ended September 30, 2004 and 2003, respectively. Management believes the expansion of commercial lending will lead to an improved interest margin when rates increase. The average yield on interest-earning assets decreased to 5.51% in 2004 from 6.08% in 2003. This is primarily due to changes in the composition of interest-earning assets and lower yields as interest-earning assets repriced through 2003 and 2004.

Interest Expense

Three months ended September 30, 2004 compared to three months ended September 30, 2003. Interest expense decreased \$43,631 to \$1.6 million in 2004 from \$1.7 million in 2003. This was primarily due to the decrease in the average interest rate paid on interest-bearing liabilities to 2.48% from 2.77% for 2004 and 2003 respectively. The average rate paid on interest-bearing deposits was 1.85% in 2004, compared to 2.09% in 2003. The average rate paid on borrowed funds was 4.17%, compared to 5.09%. Average deposits and average borrowed funds both increased to fund the increase in average interest-bearing assets.

Nine months ended September 30, 2004 compared to nine months ended September 30, 2003. Interest expense decreased \$698,979 to \$4.7 million in 2004 from \$5.4 million in 2003. This was primarily due to the decrease in the average interest paid on interest-bearing liabilities to 2.46% in 2004 from 2.89% in 2003. The average rate paid

Table of Contents

on interest-bearing deposits was 1.85% in 2004, compared to 2.25% in 2003. The average rate paid on borrowed funds was 4.35% in 2004, compared to 5.03% in 2003.

Net Interest Income

Three months ended September 30, 2004 compared to three months ended September 30, 2003. Net interest income for the three months ended September 30, 2004 increased \$190,254 to \$2.2 million compared to \$2.0 million for the three months ended September 30, 2003. The Bank's net interest margin increased to 3.10% in 2004 from 3.09% in 2003. The Bank is positioned to increase net interest income when interest rates increase. The decrease in interest expense was smaller than the decrease in interest income, due to the Bank's positive interest rate gap. The positive gap position will continue to be accretive to net interest income as market interest rates increase. Management believes the positive interest rate gap is appropriate for the current interest rate environment. Management expects interest rates to gradually increase through the remainder of 2004 and 2005.

Nine months ended September 30, 2004 compared to nine months ended September 30, 2003. Net interest income for the nine months ended September 30, 2004 and 2003 was \$6.3 million, increasing \$28,678. This small increase was caused primarily by an increase in net interest-earning assets to \$11.6 million in 2004 from \$7.4 million in 2003. The Bank's net interest margin decreased to 3.16% in 2004 from 3.27% in 2003. The Bank is positioned to increase interest income when interest rates increase. The decrease in interest expense was smaller than the decrease in interest income, due to the Bank's positive interest rate gap. The positive gap position will continue to be accretive to net interest income as market interest rates increase. Management believes the positive interest rate gap is appropriate for the current interest rate environment. Management expects interest rates to gradually increase through the remainder of 2004 and 2005.

Average Balances, Interest Rates and Yields. Net interest income is affected by the difference (interest rate spread) between rates of interest earned on interest-earning assets and rates of interest paid on interest-bearing liabilities and the relative amounts of interest-bearing liabilities and interest-earning assets. When the total of interest-earning assets approximates or exceeds the total of interest-bearing liabilities, any positive interest rate spread will generate net interest income. Financial institutions have traditionally used interest rate spreads as a measure of net interest income. Another indication of an institution's net interest income is its net yield on interest-earning assets or net interest margin, which is net interest income divided by average interest-earning assets. For the three months ended September 30, there was a small increase in the net interest margin to 3.10% in 2004 from 3.09% in 2003. This increase demonstrates the effect of the Bank's positive gap position. For the nine months ended September 30, there was a decrease in the net interest margin to 3.16% in 2004 from 3.27% in 2003, demonstrating the effect of the Bank's positive gap position during the periods. A positive gap means that interest-bearing assets are repricing at a faster pace than interest-bearing liabilities. Management has anticipated an increase in rates and resisted the temptation of placing long-term, fixed rate, assets on the balance sheet. This mitigation of interest rate risk has sacrificed short-term earnings under the current interest rate environment, but has placed the institution in a more favorable position when rates rise. The most significant risk to this business

-22-

(2) Yield on investment securities is reported on an actual and not a tax equivalent basis

Provision for Loan Losses

Three months ended September 30, 2004 compared to three months ended September 30, 2003. The provision for loan losses was \$121,782 for the three months ended September 30, 2004 and \$53,600 for the three months ended September 30, 2003, an increase of \$68,182. The provision for loan losses was based upon management's assessment of relevant factors, including types and amounts of non-performing loans, historical and anticipated loss experience on such types of loans, and economic conditions. Loans charged off during the third quarter of 2004, net of recoveries, were \$45,220, compared to \$21,509 during the third quarter of 2003.

Nine months ended September 30, 2004 compared to nine months ended September 30, 2003. The provision for loan losses was \$571,223 for the nine months ended September 30, 2004 and \$1.1 million for the nine months ended September 30, 2003, a decrease of \$511,852. The decrease is primarily due to a single commercial relationship for which the Bank provided reserves of \$630,000 in the second quarter of 2003. The provision for loan losses was based upon management's assessment of relevant factors, including types and amounts of non-performing loans, historical and anticipated loss experience on such types of loans, and economic conditions. Loans charged off during the first nine months of 2004, net of recoveries, were \$304,417, compared to \$290,004 during the first nine months of 2003.

The provision for loan losses has been a subject of debate over the last year among business, the accounting industry and regulatory agencies. It is influenced by the national, regional and local economic conditions and management's assessment of risk in the loan

Table of Contents

portfolio. Management believes the current level of the allowance for loan losses is adequate to cover all expected and unexpected credit risks in the portfolio. However, the mix of the Bank's loan portfolio has been changing over the last several years. The loan portfolio is becoming more heavily weighted with commercial credits. Commercial credits are inherently more risky than one-to-four-family mortgage loans. The collateral is generally more difficult to liquidate and the average size of the credit is larger. A single commercial credit defaulting has a larger impact on the provision for loan losses. The Bank allocates reserves on commercial loans at a higher percentage of the loan balance. The level of provision impacts current and future earnings of the Bank. This is why the subject is of interest to our shareholders, accountants and regulators. It is management's intention to provide an adequate amount of reserves to reflect the risk profile of the loan portfolio. If this requires high provisions in one year and less in another year, these adjustments will be effectuated. Historical levels of provisions should not be used to make assumptions regarding future required allocations.

The allowance for loan losses as a percentage of total loans has increased to 1.10% at September 30, 2004, compared to 1.04% at December 31, 2003. This increase is due to the increase in commercial mortgage loans. Management monitors the Bank's increasing exposure to commercial lending and economic developments in the Bank's market area, among other factors, in determining appropriate provisions to the allowance for loan losses. Because of the Bank's continuing growth in commercial loans, the Bank expects to continue funding the allowance for loan losses due to higher risks related to commercial lending.

The Bank has implemented processes to accelerate its collections and foreclosure actions in an effort to reduce the level of nonperforming assets and net charge-offs. Loans past due greater than 90 days and still accruing increased by \$1.6 million from December 31, 2003 to September 30, 2004, primarily due to two large residential mortgages. Management expects the enhanced processes will suppress the level of nonperforming assets and net charge-offs.

Noninterest Income

Three months ended September 30, 2004 compared to three months ended September 30, 2003. Noninterest income was \$1.1 million for the three months ended September 30, 2004 compared to \$1.5 million for the three months ended September 30, 2003, a decrease of \$336,311. The primary component of this decrease was noninterest income from mortgage banking activities. The decrease in mortgage banking activities was due to the decrease in loan sales during 2004 compared to 2003. For the three months ended September 30, 2003, loan sales were very strong, due to residential loans refinanced and sold. This refinance activity was driven by the historically low levels of interest rates available on long-term fixed rate mortgages. Most consumers qualifying to refinance took advantage of the low rates during 2003 and are not likely to refinance again in 2004. Management expects mortgage banking activity will be dominated primarily by purchases and sales, rather than refinances, during 2004. Proceeds from sale of loans decreased to \$9.5 million in the third quarter of 2004 from \$29.3 million in the third quarter of 2003. Service charges and other fees increased to \$429,740 in the third quarter of 2004 from \$359,298 in the third quarter of 2003, primarily due to an increase in the

Table of Contents

insufficient funds fee to \$25 per item from \$20 per item, which became effective on February 1, 2004. Brokerage commissions and trust fee income are influenced by the U.S. economy and stock market values. Brokerage commission income decreased to \$248,872 in the third quarter of 2004 from \$371,318 in the third quarter of 2003. Brokerage commission income was 22.2% of non-interest income for the third quarter of 2004 and will continue to be a large component of noninterest income.

Nine months ended September 30, 2004 compared to nine months ended September 30, 2003. Noninterest income was \$3.3 million for the nine months ended September 30, 2004 compared to \$4.9 million for the nine months ended September 30, 2003, a decrease of \$1.6 million. The primary component of this decrease was noninterest income from mortgage banking activities, which decreased to \$718,877 in 2004 from \$2.3 million in 2003. The decrease in mortgage banking activities was due to the decrease in loan sales during 2004 compared to 2003. For the nine months ended September 30, 2003, loan sales were very strong, due to residential loans refinanced and sold. This refinance activity was driven by the historically low levels of interest rates available on long-term fixed rate mortgages. Most consumers qualifying to refinance took advantage of the low rates during 2003 and are not likely to refinance again in 2004. Management expects mortgage banking activity will be dominated primarily by purchases and sales, rather than refinances, during 2004. Proceeds from sale of loans decreased to \$31.2 million in the first nine months of 2004 from \$110.9 million in the first nine months of 2003. Service charges and other fees increased to \$1.2 million in the first nine months of 2004 from \$1.1 million in the first nine months of 2003, primarily due to an increase in the insufficient funds fee to \$25 per item from \$20 per item, which became effective on February 1, 2004. Brokerage commission income decreased to \$802,573 in the first nine months of 2004 from \$913,459 in the first nine months of 2003. Brokerage commission income was 24.4% of non-interest income for the first nine months of 2004 and will continue to be a large component of noninterest income.

Noninterest Expense

Three months ended September 30, 2004 compared to three months ended September 30, 2003. Noninterest expense was \$2.4 million in the third quarter of 2004 and 2003, increasing only \$3,018. The largest component of noninterest expense is salaries and employee benefits. Salaries and employee benefits increased \$33,892 to \$1.3 million from \$1.3 million for the quarters ended September 30, 2004 and 2003, respectively. This increase in salaries and employee benefits is primarily due to lower deferral of loan origination costs. Loan origination costs deferred in the third quarter of 2004 were \$129,388, compared to \$235,713 in the third quarter of 2003. The decrease in loan origination costs deferred was due to the reduction in the number of loans originated in the third quarter of 2004 compared to the third quarter of 2003. Salary adjustments for 2004 became effective in January 2004. Other noninterest expenses for the three months ended September 30, 2004 include \$94,473 of expenses incurred through September 30, 2004 for the Company's going private transaction. At September 30, 2004, goodwill was not impaired and Management does not anticipate impairment in the year ending December 31, 2004. Management actively minimizes noninterest expense, although certain noninterest expenses are outside of Management's direct control.

Management

Table of Contents

expects salaries and employee benefits to increase by 3-5% annually.

Nine months ended September 30, 2004 compared to nine months ended September 30, 2003. Noninterest expense was \$7.2 million in the first nine months of 2004 and 2003, decreasing \$22,366. The largest component of noninterest expense was salaries and employee benefits, which increased \$259,030 to \$4.0 million from \$3.8 million in the nine months ended September 30, 2004 and 2003, respectively. This increase in salaries and employee benefits is primarily due to lower deferral of loan origination costs. Loan origination costs deferred in the first nine months of 2004 were \$424,889, compared to \$806,439 in the first nine months of 2003. The decrease in loan origination costs deferred was due to the reduction in the number of loans originated in the first nine months of 2004 compared to the first nine months of 2003. Other changes in salaries and employee benefits are primarily due to salary adjustments and increases in the cost of employer-provided medical insurance. Salary adjustments were the result of staffing changes and cost of living increases which took effect January 2004. Additional staffing was added in 2003 to meet the increasing sophistication of the Bank's operations. The increase in sophistication relates primarily to commercial lending operations and the Bank's wholly owned subsidiary, Oakleaf Financial. The expansion into these areas was undertaken to diversify operations and reduce the Bank's reliance on mortgage banking activities for non-interest income. Management believes that fee income produced by Oakleaf Financial will help to stabilize non-interest income from operations. To offset the increase in health insurance premiums for employees, the Bank instituted a premium sharing program in August 2003. Premium increases that were effective August 2004 for employer-provided health insurance were substantially paid by employees. Data processing expense decreased \$121,640, due to expenses incurred converting to a different servicer in the first quarter of 2003. At September 30, 2004, goodwill was not impaired and Management does not anticipate impairment in the year ending December 31, 2004. Management actively minimizes noninterest expense, although certain noninterest expenses are outside of Management's direct control. Management expects salaries and employee benefits to increase by 3-5% annually.

Cash Flows

Operating. Cash flows from operating activities are most significantly affected by net income and mortgage banking activities. Net income was \$1,344,016 and \$2,039,836 for the nine months ended September 30, 2004 and 2003, respectively. Gain on sale of loans was \$381,466 and \$1.4 million for the nine months ended September 30, 2004 and 2003, respectively. Loans originated for sale and proceeds from the sale of loans also decreased due to the historically low mortgage loan rates in 2003. Loans originated for sale were \$30.6 million and \$107.1 million for the nine months ended September 30, 2004 and 2003, respectively. Proceeds from sales of loans were \$31.3 million and \$110.9 million for the nine months ended September 30, 2004 and 2003, respectively. Because the Bank generally has a policy of selling long-term fixed rate mortgage loans, the volume of loan sales varies with customer demand for these loans. Affecting cash flows from operating activities are the add-backs of non-cash expenses, which include the provision for loan losses, depreciation, amortization of mortgage servicing rights and changes in other assets and liabilities.

Table of Contents

Investing. Cash flows from investing activities are most significantly affected by loans made to customers net of principal payments, changes in the Bank's investment portfolio, and increases in interest-bearing deposits in banks. For the nine months ended September 30, 2004 there was a net increase in loans of \$13.5 million, primarily commercial mortgages. Investment purchases and maturities also affect cash flows from investing activities. The Bank's management maintains investments at levels that balance returns with various risks. The Bank decreased its holdings of interest-bearing deposits in banks by \$4.0 million and \$12.4 million in the nine months ended September 30, 2004 and 2003, respectively. The Bank increased investment in securities available-for-sale by \$15.0 million and \$9.1 million in the nine months ended September 30, 2004 and 2003, respectively. Management seeks to use loans as its primary investment option. But in the absence of attractive loan opportunities or to further leverage the Bank's capital, the Bank may pursue additional investment alternatives. Considerations for investment decisions include interest rate risk, liquidity needs, liquidity risk, prepayment risk and credit risk.

Financing. Cash flows from financing activities are mostly affected by changes in deposits and borrowed funds. Deposits increased \$14.6 million and decreased \$3.8 million in the nine months ended September 30, 2004 and 2003, respectively. Certificates of deposit with balances greater than or equal to \$100,000 (commonly referred to as jumbo certificates), which normally carry greater interest rate sensitivity, increased to \$40.0 million at September 30, 2004 from \$29.4 million at December 31, 2003. The Bank views jumbo certificates of deposit as a source of liquidity. Transaction savings accounts and checking accounts increased \$1.4 million to \$102.5 million at September 30, 2004 from \$101.1 million at December 31, 2003. Transaction savings accounts and checking accounts represent 47.79% of deposits at September 30, 2004, compared to 50.59% of deposits at December 31, 2003. Bank management is actively attempting to retain and increase these core deposit account relationships. The transaction savings accounts and checking accounts provide relatively inexpensive funding for future growth, compared to alternative certificates of deposit and other borrowings at higher interest rates. In addition to deposit accounts, the Bank uses FHLB advances and repurchase agreements for financing its operating and investing activities. FHLB advances decreased \$3.9 million and \$6.0 million in the nine months ended September 30, 2004 and 2003, respectively. FHLB advances are secured by Bank assets. The primary assets used by the FHLB are loans secured by real estate. The Bank may pledge as collateral specific loans or categories of loans. This poses risk to the Bank and stockholders, in the fact these assets may become less liquid or subject to set-off. The borrowing base of the Bank is calculated by the FHLB, based substantially on mortgage loans outstanding. If the Bank's mortgage loan portfolio diminishes, it can impact the Bank's ability to utilize the FHLB as a source of funding and liquidity. The Bank also entered repurchase agreements for \$15.0 million in the first nine months of 2004. The repurchase agreements are collateralized by mortgage-backed securities with a market value at September 30, 2004 of \$17.8 million. Bancorp redeemed \$1.3 million of its common stock in open market transactions. The Bank will continue to use jumbo certificates of deposit, FHLB advances and repurchase agreements to supplement core deposits as its preferred source of funds.

Table of Contents

Financial Condition

General. The Bank's total assets at September 30, 2004 were \$312.4 million, compared to \$287.3 million at December 31, 2003, an increase of \$25.1 million or 8.73%. Most of the growth in total assets is in securities available for sale and commercial real estate loans. The Bank continued to sell long-term, fixed rate, residential mortgage loans. Management did not believe retaining these loans in portfolio was prudent asset management, during a time of historically low interest rates. The Bank maintained its disciplined approach to managing interest rate risk.

Loans. The Bank's net loans increased to \$227.7 million at September 30, 2004 from \$215.5 million at December 31, 2003. This increase was primarily due to residential mortgage loans and commercial real estate loans. Most of the increase in residential mortgages can be attributed to advances on revolving home equity loans, which were \$34.1 million at September 30, 2004, compared to \$27.7 million at December 31, 2003. The Bank sells long-term, fixed rate, residential mortgages in the secondary market. Historically, the major buyer of these loans has been the Federal Home Loan Mortgage Corporation (FHLMC). In 2003 the Bank entered into an arrangement to sell loans to Federal Home Loan Bank of Indianapolis (FHLBI). This relationship provides an alternative buyer for Bank loans and management believes this relationship may provide a higher profit margin on loans sold. Commercial mortgage loans increased to \$76.1 million, or 32.5% of gross loans, at September 30, 2004 from \$66.4 million, or 29.6% of gross loans, at December 31, 2003. The proceeds from sales of loans (primarily fixed-rate, residential mortgages) were \$31.3 million and \$110.9 million for the first nine months of 2004 and 2003, respectively. The mortgage loans originated for sale (\$30.6 million during the first nine months of 2004 and \$107.1 million during the first nine months of 2003) were primarily funded by the secondary mortgage market sales. The decision to sell fixed-rate mortgages with original maturities of 10-years or greater protects the Bank from the interest rate risk inherent in holding these longer term, fixed-rate loans and provides a source of liquidity to fund loan demand. An increase in market interest rates will continue to decelerate the pace of refinance activity in the residential loan portfolio, as the Bank intends to continue focusing its efforts on growing commercial loans.

At September 30, 2004, outstanding loan commitments were \$4.1 million and \$31.4 million on fixed and variable-rate loans, respectively. Of these loan commitments, Management expects \$3.3 million to be disbursed for new loans during the next six months. The additional loan commitments are unused lines of credit, which may be drawn at any time by the borrower. These loan commitments will be funded by interest-bearing deposits, maturing assets, and additional borrowings, if needed.

Loans serviced for others increased by \$612,571 to \$217.6 million at September 30, 2004 from \$217.0 million at December 31, 2003. This servicing portfolio consists of loans originated by the Bank and sold in the secondary mortgage market with servicing retained by the Bank. Management believes this provides the Bank with a competitive advantage in its market. The retention of servicing requires the Bank to keep a higher

Table of Contents

staffing level than if the servicing is sold. But many consumers have discovered the difficulties encountered when loan servicing is sold. The retention of servicing also allows the Bank to cross-sell other banking products and services to these customers. The value of the right to service is appraised quarterly and any temporary impairment of the value of servicing rights is recognized quarterly. The originated mortgage servicing rights asset had a valuation allowance at September 30, 2004 of \$2,334. This allowance was established to recognize the measured impairment of the asset. The Bank will continue to monitor the valuation of the servicing rights asset. If subsequent analysis shows changes in the appraised impairment, the valuation allowance will be adjusted to match the impairment. Management expects the value of servicing will increase as interest rates rise. Generally, consumers are less inclined to refinance a lower-than-market fixed rate mortgage when rates increase. If this logic prevails, the value of servicing should increase due to the expected increase in duration of the underlying cash flows.

Bancorp has no purchased mortgage servicing portfolio.

Table of Contents

The following table provides an analysis of the allowance for loan losses:

	Nine Months Ended September 30,		Year Ended December 31,		
	2004	2003	2003	2002	2001
Balance at the beginning of the period	\$2,294,157	\$1,920,037	\$1,920,037	\$1,300,000	\$ 803,744
Charge-offs:

Table of Contents

Loans past due 90 days or greater and still accruing at September 30, 2004 increased to \$2.1 million from \$473,102 at December 31, 2003, primarily due to two large residential mortgages. Loans in nonaccrual status at September 30, 2004 of \$4.2 million consisted primarily of residential and commercial real estate loans, for which foreclosure has begun or full collection of the loan is questionable. The following table presents the aggregate amount of troubled asset categories as of the dates indicated:

	Sept. 30, 2004	2003	December 31, 2002	2001
Past due - 90 days or greater	\$2,102,529	\$ 473,102	\$ 899,975	\$1,073,625
Nonaccrual loans	4,210,422	4,245,716	2,955,666	2,821,965
Real estate owned	713,898	749,899	1,358,759	451,173
Total nonperforming assets	7,026,849	5,468,717	5,214,400	4,346,763
Restructured assets	942,570	426,414	626,882	1,381,920
Total troubled assets	\$7,969,419	\$5,895,131	\$5,841,282	\$5,728,683
Ratio of troubled assets to total loans	3.46%	2.71%	2.73%	2.60%
Ratio of troubled assets to total assets	2.53%	2.04%	1.96%	2.04%

Interest-bearing Deposits in Banks. Interest-bearing deposits in banks were \$11.4 million at September 30, 2004, compared to \$15.3 million at December 31, 2003, a decrease of \$3.9 million. This decrease was reinvested in commercial loans.

Securities Available for sale. Investment securities available for sale of \$17.8 million at September 30, 2004 and \$4.0 million at December 31, 2003 consisted of mortgage-backed securities issued by the Federal National Mortgage Association. The Bank's investment strategy has historically been to carry its mortgage-backed securities in the held-to-maturity portfolio. Management has changed this strategic decision, so that a balanced investment portfolio can more directly contribute to future liquidity needs, by being carried as available-for-sale.

Securities Held-to-maturity. Investment securities held-to-maturity consisted of U.S. agency mortgage-backed securities, municipal obligations, and a trust preferred security. The investment securities held-to-maturity were \$9.2 million at September 30, 2004, compared to \$10.9 million at December 31, 2003, a decrease of \$1.7 million. The decrease was due to matured municipal obligations and principal payments on mortgage-backed securities.

Deposits and Borrowed Funds. Deposits were \$214.5 million at September 30, 2004, compared to \$199.9 million at December 31, 2003, an increase of \$14.6 million. The increase in interest-bearing deposits to \$196.4 million at September 30, 2004 from \$187.6 million at December 31, 2003 is primarily due to increases in certificates of deposit. Certificates of deposit with balances greater than or equal to \$100,000 (commonly referred to as jumbo certificates), which carry greater interest rate sensitivity, increased to \$40.0 million at September 30, 2004 from \$29.4 million at December 31,

Table of Contents

2003. The Bank views jumbo certificates of deposit as a source of liquidity and used jumbo certificates of deposit to reduce FHLB advances by \$3.9 million. Other certificates of deposit decreased to \$53.9 million at September 30, 2004 from \$57.1 million at December 31, 2003. Transaction savings accounts and checking accounts increased \$762,134 to \$102.5 million at September 30, 2004 from \$101.1 million at December 31, 2003. Transaction savings accounts and checking accounts represent 47.79% of deposits at September 30, 2004, compared to 50.59% of deposits at December 31, 2003. Bank management is actively attempting to retain and increase these core deposit account relationships. Transaction savings accounts and checking accounts provide relatively inexpensive funding for future growth, compared to alternative certificates of deposit and borrowed funds at higher interest rates. The Bank offers competitive rates on its time deposits and uses borrowed funds, when that strategy enhances net interest income.

The Bank has an available line of credit with the Federal Home Loan Bank of Indianapolis (FHLB) which provides for advances up to \$10.0 million and matures annually in March. The Bank expects to renew the line of credit at maturity in March 2005. All borrowings from FHLB are collateralized by substantially all mortgage loans.

Long-term advances were \$45.3 million at September 30, 2004, compared to \$49.9 million at December 31, 2003, a decrease of \$4.6 million. Short-term advances were \$6.6 million at September 30, 2004, compared to \$5.9 million at December 31, 2003, an increase of \$0.7 million. Management anticipates increasing FHLB advances, as demand for portfolio loans increases.

Capital Resources

The stockholders' equity of the Bancorp was \$28.6 million at September 30, 2004, compared to \$29.2 million at December 31, 2003, a decrease of \$571,562 or 1.96%. The primary components of this change in stockholders' equity were retained earnings and common stock redemption. Cash dividends of \$0.27 per share during the first nine months of 2004 reduced retained earnings by \$750,732.

On May 19, 2004, Bancorp announced a program to repurchase up to 10% of its issued and outstanding common stock, or 280,928 shares, in the open market. Through September 30, 2004, Bancorp redeemed 86,400 shares of its common stock at a total redemption price of \$1.3 million.

The stockholders' equity was 9.15% of total assets at September 30, 2004. Management continues to monitor and evaluate the best capital structure of Bancorp. A structure that provides sufficient capital to fund future growth, yet maximizes earnings per share, is deemed optimal. Management does not project a need for capital beyond what can be provided by retained earnings. If additional capital is needed, Bancorp will consider, among other options, issuing trust preferred securities or a secondary offering of common stock.

The Federal Reserve Board (FRB) has adopted risk-based capital guidelines applicable to Bancorp. These guidelines require that financial holding companies, such as

Table of Contents

Bancorp, maintain capital commensurate with both on and off balance sheet credit risks of their operations. Under the guidelines, a financial holding company must have a minimum ratio of total capital to risk-weighted assets of 8.0%.

In addition, a financial holding company must maintain a minimum ratio of Tier 1 capital equal to 4.0% of risk-weighted assets. Tier 1 capital includes common stockholders equity, qualifying perpetual preferred stock and minority interest in equity accounts of consolidated subsidiaries less goodwill.

As a supplement to the risk-based capital requirements, the FRB has also adopted leverage capital ratio requirements. The leverage ratio requirements establish a minimum ratio of Tier 1 capital to total assets, less goodwill, of 3% for the most highly rated financial holding companies. All other financial holding companies are required to maintain additional Tier 1 capital yielding a leverage ratio of 4%-5%, depending on the particular circumstances and risk profile of the institution. Management deems the current capitalization level adequate for current and anticipated strategies.

The following table summarizes the capital ratios of Bancorp at the dates indicated:

		September 30, 2004	December 31, 2003
Equity to assets		9.2%	10.1%
Tier I leverage		7.6%	8.4%
Risk-based:	Tier I capital	10.1%	11.4%
	Total capital	11.2%	12.5%

The decrease in capital ratios of Bancorp from December 31, 2003 to September 30, 2004 is primarily the result of the stock redemption program and growth in assets.

Asset/Liability Management

The primary component of Bancorp's earnings is net interest income of the Bank. The Bank's asset/liability management strategy is to maximize net interest income over time by reducing the impact of fluctuating interest rates. This is accomplished by matching the mix and maturities of its assets and liabilities. At the same time the Bank's asset/liability strategies for managing interest rate risk must also accommodate customer demands for particular types of deposit and loan products. The Bank uses asset/liability management techniques in an attempt to maintain a profitable mix of financial assets and liabilities, provide deposit and loan products that meet the needs of its market area, and maintain control over interest rate risk resulting from changes in interest rates.

Net interest income, the primary component of the Bank's net income, is derived from the difference or spread between the yield on interest-earning assets and the cost of interest-bearing liabilities. The Bank has sought to reduce its exposure to changes in interest rates by matching more closely the effective maturities and repricings of its interest-sensitive assets and liabilities. At the same time, the Bank's asset/liability management strategies must also accommodate customer demands for particular types of deposit and loan products.

Table of Contents

While much of the Bank's asset/liability management efforts involve strategies that increase the rate sensitivity of its loans and investments, such as the sale of long-term fixed rate loans, originations of adjustable rate loans and purchases of adjustable rate mortgage-backed securities or relatively short average life fixed-rate investments, it also uses techniques to reduce the rate sensitivity of its deposits and borrowed money. Those techniques include attracting longer-term certificates of deposit when the market will permit, emphasizing core deposits, which are less sensitive to changes in interest rates, and borrowing through long-term FHLB advances and repurchase agreements. The Bank's asset/liability management strategy will change when market rates change.

The Bank measures its exposure to interest rate fluctuations primarily by using a computer modeling system designed for savings institutions such as the Bank. The model uses assumptions which management believes are reasonable for the analysis. These assumptions include (but are not limited to) prepayment and decay rates based on nine interest rate scenarios. These assumptions are based on national statistics and may not reflect the Bank's own experience. It allows the Bank to adjust its asset-liability mix based on the interest rate risk identified. The analysis estimates the changes in the market value of the Bank's equity using interest rate change scenarios ranging from +4% to -4%, in 1% increments from current market rates. At September 30, 2004, the following table illustrates the interest rate sensitivity of the Bancorp's consolidated equity to changes in market interest rates.

(in Thousands of Dollars)

Book value of stockholders' equity	\$28,587
4% increase in market rates	44,302
3% increase in market rates	44,500
2% increase in market rates	45,991
1% increase in market rates	45,026
No change (current market value of equity)	44,338
1% decrease in market rates	43,216
2% decrease in market rates	40,131
3% decrease in market rates	38,925
4% decrease in market rates	35,739

As the table shows, Bancorp's book value of equity is less than estimated market value in all of the scenarios. That indicates that Bancorp is able to withstand fluctuations in market interest rates without posting a significant threat to either Bancorp's stockholders' equity or the federal deposit insurance system. Therefore Bancorp can be deliberate in its actions to adjust the asset-liability mix. Bancorp would meet the regulatory minimum capital requirements in all of the interest-rate scenarios.

The Bank has an Asset-Liability Management Committee (ALCO) that meets as needed. The purpose of this Committee is to communicate, coordinate, and monitor asset-liability management procedures. The Committee establishes and monitors the volume

Table of Contents

and mix of both assets and funding sources. The objective is to manage assets and funding sources to produce results consistent with Bancorp's liquidity requirements, capital adequacy, growth, and profitability goals. To accomplish this objective, the ALCO uses internal budget variance reports, forecasts for changes in interest rates and consumer deposit activity, as well as forecasts of loan demand in each of the Bank's loan types, investment maturities and new investment alternatives, and various other internal and external reports.

Bancorp's Board of Directors compares net interest income sensitivity to established tolerance limits for fluctuation. Throughout 2003 and at September 30, 2004, the forecasted exposure was within the Bancorp's established policy limits, except in falling rate change scenarios. Management recognizes the out of policy condition in the falling rate environment and has reported this condition to the Board quarterly. The Bancorp's Board of Directors and Management consider further significant rate decreases from September 30, 2004 unlikely and have not changed the Bank policy's tolerance limits to conform to the existing rate environment.

Net Interest Income Sensitivity: Change in Projected Results vs. Constant Rates

Year-End 2003 12 Month Projection

	Rate Shock Amount				
	(2.00%)	(1.00%)	0.00%	1.00%	2.00%
Percent Change in net interest income vs. constant rates	(21.24%)	(7.83%)	0.00%	5.81%	11.90%
ALCO Policy Limit	(6.00%)	(3.00%)	0.00%	(4.00%)	(8.00%)

Effect of Interest Rate Fluctuations

Bancorp's consolidated results of operations depend to a large extent on the Bank's level of net interest income, which is the difference between interest income earned on its loan and investment portfolios versus the interest paid on deposits and borrowed funds. If the cost of funds increases faster than the yield on its interest-earning assets, net interest income will be reduced.

Bancorp measures its interest rate risk primarily using simulation analysis. This analysis is prepared by the Chief Financial Officer and reviewed by the ALCO. ALCO is comprised of the Chief Executive Officer, Chief Financial Officer, Executive Vice President and Senior Officers of the Bank. Bancorp's Board of Directors reviews quarterly reports that estimate Bancorp's sensitivity to changes in interest rates. Sensitivity is estimated for net interest income and market value of portfolio equity.

While Bancorp uses various tools to monitor interest rate risk, it is unable to predict future fluctuations in interest rates or the specific impact thereof. The market

Table of Contents

value of most of Bancorp's financial assets is sensitive to fluctuations in market interest rates. Fixed-rate investments and mortgage loans decline in value as interest rates rise. Adjustable-rate investments and loans generally have less market value volatility than fixed-rate assets.

Liquidity

Bancorp maintains certain levels of liquid assets (the most liquid of which are cash and cash equivalents and investment securities) in order to meet demands from loan commitments, savings withdrawals and other obligations. Bancorp manages liquidity by maintaining a portion of its liquid assets in overnight accounts and by keeping various maturities in its portfolio of investment securities. The primary sources of liquidity are loan repayments, loan sales, maturing investments, deposit accounts, and other borrowed funds, such as FHLB borrowings.

The primary market factor that impacted liquidity throughout 2003 and 2004 was low interest rates for residential mortgages. The residential mortgages that have refinanced into low fixed-rate terms have been sold to the secondary mortgage market, providing funds for Bancorp to redeploy. Bancorp originated commercial mortgage and commercial nonmortgage loans to hold in its portfolio, so the percentage of commercial loans to total loans increased. An increase in loan rates would probably reduce Bancorp's liquidity position, because borrowers would be more likely to prefer adjustable-rate mortgages, which Bancorp holds in its portfolio. Management expects market interest rates to gradually increase over the remainder of 2004 and 2005.

Contractual Obligations

The long-term debt obligations consist of certificates of deposit and advances from the Federal Home Loan Bank. The following schedule represents principal payments only and does not include interest.

Payments Due by Period

	Total	Less than 1 year	1 - 3 years	4 - 5 years	After 5 Years
Certificates of deposit	\$ 93,894,214	\$47,781,658	\$24,507,869	\$19,803,278	\$ 1,801,409
FHLB advances	51,903,283	7,557,211	3,346,072	10,000,000	31,000,000
Repurchase agreements	15,000,000	7,500,000	7,500,000		
Total contractual obligations	\$160,797,497	\$62,838,869	\$35,353,941	\$29,803,278	\$32,801,409

Table of Contents**Off-balance Sheet Activities**

Other Commercial Credits The Bank is a party to credit related financial instruments with off-balance sheet risks in the normal course of business to meet the financing needs of its customers. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized on the balance sheet of the Bank.

Commitments to extend credit are agreements to lend to a customer as long as there are no violations of any condition established in the contract. Commitments for equity lines of credit or overdraft protection may expire without being drawn. Therefore, total commitments do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Bank, is based on Management's credit evaluation of the customer. Unfunded commitments under commercial lines of credit, revolving credit lines and overdraft protection agreements are commitments for possible future extensions of credit to existing customers. These lines of credit are collateralized, may not contain a specified maturity date and may be drawn to the total extent of the Bank's commitment.

Commercial and standby letters of credit are a conditional commitment issued by the Bank to guarantee the performance of a customer to a third party. The letters of credit are primarily used to support public and private borrowing arrangements. All letters of credit have expiration dates within one year.

At September 30, 2004, the Bank had total commitments of \$4.1 million and \$31.4 million on fixed rate and variable rate loans, respectively.

The following table discloses contractual expiration dates for commitments of the Bank at September 30, 2004.

	Amount of Commitment Expiration Per Period				
	Total	Less than 1 year	1 3 Years	4 5 Years	After 5 Years
Home equity lines of credit	\$22,363,751	\$ 28,539	\$	\$791,251	\$21,543,961
Lines of credit	5,194,562	4,662,946	499,258	32,358	
Undisbursed construction loans	3,433,142	3,234,108	199,034		
Standby letters of credit	240,000	240,000			
New Loans	3,300,000	3,300,000			
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
Total commitments with expiration	\$34,531,455	\$11,465,593	\$698,292	\$823,609	\$21,543,961
Overdraft protection no expiration	895,272				
	<hr/>				
Total commitments	\$35,426,727				
	<hr/>				

All of the commercial credits are underwritten using the commercial loan underwriting guidelines.

Collateral Requirements To reduce credit risks related to the use of credit-related financial instruments, the Bank might deem it necessary to obtain collateral. The amount

Table of Contents

and nature of the collateral obtained are based on the Bank's credit evaluation of the borrower. Collateral held varies, but may include cash, securities, accounts receivable, inventory, property, plant and equipment and real estate. Although these items are used to secure loans, they are not included on the balance sheet of Bancorp.

Legal Contingencies Various legal claims also arise from time to time in the normal course of business which, in the opinion of Management, will have no material effect on Bancorp's consolidated financial statements.

Other Off-balance Sheet Activities During the year ended December 31, 2003, Bancorp purchased an investment for \$25,000 in a venture capital company. During the nine months ended September 30, 2004, Bancorp contributed an additional \$12,500 to the company. Bancorp has a minority interest of approximately 1% in the company. The venture capital company seeks viable projects in various stages of development for investment. Bancorp has committed to contribute an additional \$212,500 as capital is required to fund projects.

Impact of Inflation

The majority of assets and liabilities of financial institutions are monetary in nature. Generally, changes in interest rates have a more significant impact on earnings of the Bank than inflation. Although influenced by inflation, changes in rates do not necessarily move in either the same magnitude or direction as changes in the price of goods and services. Inflation does impact the growth of total assets, creating a need to increase equity capital at a higher rate to maintain an adequate equity to assets ratio, which in turn reduces the amount of earnings available for cash dividends. Through 2003 and 2004, inflation did not have a material impact on Bancorp.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information concerning quantitative and qualitative disclosures about market risk contained under the captions Asset/Liability Management and Effect of Interest Rate Fluctuations on pages 17 through 21 (inclusive) of the Bancorp's Annual Report to Stockholders for the year ended December 31, 2003 is incorporated herein by reference and attached as Exhibit 13.1 to this Form 10-Q. Such Annual Report was previously filed as Exhibit 13.1 to Bancorp's Annual Report on Form 10-K for the year ended December 31, 2003.

The Company's Common Stock is registered pursuant to Section 12(g) of the Securities Exchange Act of 1934 and Bancorp files reports with the SEC. These reports include, among others, the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and securities transaction reports of directors, executive officers and certain other reporting persons on Forms 3, 4, and 5.

The public may read and copy any materials filed by the Company with the SEC at the SEC's Public Reference Room at 450 Fifth Street, NW., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Filings of the Company can also be obtained from the Company by contacting President Eric L. Eishen at Sturgis Bancorp, Inc., 113-125 E. Chicago Road, Sturgis, Michigan 49091, telephone number (269)651-9345 or through the Securities and Exchange Commission Edgar System at www.sec.gov. Copies of the Bank's historical filings with the FDIC under the Securities Exchange Act of 1934 can be obtained from Sturgis Bank & Trust Company by contacting President Eric L. Eishen at Sturgis Bank & Trust Company, 113-125 E. Chicago Road, Sturgis, Michigan 49091, telephone number (269)651-9345 or, for a nominal fee from the FDIC at telephone number (202)898-8913 or fax number (202)898-3909.

The Bank maintains a website at www.sturgisbank.com. On this site, a link is provided to SEC's website, providing access to all filings of Bancorp. In this way, Bancorp makes available reports, including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, securities transaction reports on Form 3, Form 4, and Form 5, and certain other reports filed or furnished pursuant to the Exchange Act as soon as reasonably practicable after it electronically files such material with, or furnishes it to, the Securities and Exchange Commission.

ITEM 4. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer along with the Company's Chief Financial Officer, of the effectiveness of the

Table of Contents

design and operation of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, the Company's Chief Executive Officer along with the Company's Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic Securities and Exchange Commission (SEC) filings.

CHANGES IN INTERNAL CONTROLS

There have been no significant changes in the Company's internal controls or in other factors which could significantly affect these controls subsequent to the date the Company performed its evaluation.

Table of Contents**PART II. OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

There are no material legal proceedings other than the ordinary routine proceedings of Bancorp.

ITEM 2. CHANGES IN SECURITIES

The information contained in the section captioned "Market Information" in the 2003 Annual Report to Stockholders is incorporated herein by reference and is attached as Exhibit 13.2 to this Form 10Q. Such Annual Report was previously filed as Exhibit 13.1 to Bancorp's Annual Report on Form 10-K for the year ended December 31, 2003. In addition to the information incorporated by reference, the following table shows sales of unregistered securities by Bancorp since December 31, 2003.

Date of Sale	Number of Shares	Exercise Price	Name
01/19/2004	375	\$10.50	Leonard L. Eishen
01/26/2004	375	\$10.50	Raymond H. Dresser, Jr.

All of the foregoing sales were made pursuant to the exercise of stock options by officers, directors, or employees of the Company, which options were granted under benefit plans approved by a majority of shareholders present, in person or proxy, at an annual meeting of the shareholders of the Company. The sales of these securities were exempt from registration under Title 12, Code of Federal Regulations Section 563g.3(g). The exercises of these stock options were both timely reported in a Form 4 filed with the Securities and Exchange Commission pursuant to Section 16 of the Securities Exchange Act.

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased under the Plans or Programs

Table of Contents

Note: The stock repurchase program of Bancorp, announced on May 19, 2004, authorized repurchase and redemption of up to 10% of outstanding stock on that date. The total authorization under the repurchase program is 280,928 shares. Although the program has not expired, management has suspended purchases during the going-private process.

ITEM 5. OTHER INFORMATION

On September 29, 2004, the Company filed a preliminary proxy statement currently under review by SEC. The purpose of the proposals in the proxy statement is to permit the Company to terminate the registration of its Common Stock under the Securities Exchange Act of 1934 and thus eliminate its reporting and other obligations under the Exchange Act. The proposals in the proxy statement would reduce the shareholders of record to fewer than 300, which is a requirement for terminating the Common Stock registration. The proxy statement filed on September 29, 2004 is preliminary, subject to change, and can be withdrawn.
