MACKINAC FINANCIAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The unaudited condensed consolidated financial statements of Mackinac Financial Corporation (the Corporation) have been prepared in accordance with generally accepted accounting principles for interim financial information and the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three-month period ended March 31, 2007 are not necessarily indicative of the results that may be expected for the year ending December 31, 2007. The unaudited consolidated financial statements and footnotes thereto should be read in conjunction with the audited consolidated financial statements and footnotes thereto included in the Corporation s Annual Report on Form 10-K for the year ended December 31, 2006.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

In order to properly reflect some categories of other income and other expenses, reclassifications of expense and income items have been made to prior period numbers. The net other income and other expenses was not changed due to these reclassifications.

Allowance for Loan Losses

The allowance for loan losses includes specific allowances related to commercial loans, which have been judged to be impaired. A loan is impaired when, based on current information, it is probable that the Corporation will not collect all amounts due in accordance with the contractual terms of the loan agreement. These specific allowances are based on discounted cash flows of expected future payments using the loan s initial effective interest rate or the fair value of the collateral if the loan is collateral dependent.

The Corporation continues to maintain a general allowance for loan losses for loans not considered impaired. The allowance for loan losses is maintained at a level which management believes is adequate to provide for possible loan losses. Management periodically evaluates the adequacy of the allowance using the Corporation s past loan loss experience, known and inherent risks in the portfolio, composition of the portfolio, current economic conditions, and other factors. The allowance does not include the effects of expected losses related to future events or future changes in economic conditions. This evaluation is inherently subjective since it requires material estimates that may be susceptible to significant change. Loans are charged against the allowance for loan losses when management believes the collectibility of the principal is unlikely. In addition, various regulatory agencies periodically review the allowance for loan losses. These agencies may require additions to the allowance for loan losses based on their judgments of collectibility.

In management s opinion, the allowance for loan losses is adequate to cover probable losses relating to specifically identified loans, as well as probable losses inherent in the balance of the loan portfolio as of the balance sheet date.

Stock Option Plans

The Corporation sponsors three stock option plans. One plan was approved during 2000 and applies to officers, employees, and nonemployee directors. This plan was amended as a part of the December 2004 stock offering and recapitalization. The amendment, approved by shareholders, increased the shares available under this plan by 428,587 shares from the original 25,000 (adjusted for the 1:20 reverse stock split), to a total authorized share balance of 453,587. The other two plans, one for officers and employees and the other for nonemployee directors, were approved in 1997. A total of 30,000 shares (adjusted for the 1:20 reverse stock split), were

5.

MACKINAC FINANCIAL CORPORATION

(Unaudited)

1. **SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES** (Continued)

made available for grant under these plans. Options under all of the plans are granted at the discretion of a committee of the Corporation s Board of Directors. Options to purchase shares of the Corporation s stock are granted at a price equal to the market price of the stock at the date of grant. The committee determines the vesting of the options when they are granted as established under the plan.

The Corporation adopted SFAS No. 123 (Revised) Share Based Payments in the first quarter of 2006. This Statement supersedes APB Opinion No. 25 Accounting for Stock Issued to Employees and its related implementation guidance. Under Opinion No. 25, issuing stock options to employees generally resulted in recognition of no compensation cost. This adoption resulted in the recognition of before tax compensation expense in the amount of $30,000 for the three months ended March 31, 2007 and $79,000 for the same period in 2006. The expense recorded recognizes the current period vesting of options outstanding. The per share impact of this accounting change was $.01 and $.02 in the first quarter of 2007 and 2006, respectively.

2. **RECENT ACCOUNTING PRONOUNCEMENTS**

FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes

In July 2006, the Financial Accounting Standards Board (FASB) issued this interpretation to clarify the accounting for uncertainty in tax positions. FIN 48 requires, among other matters, that the Corporation recognize in its financial statements the impact of a tax position, if that position is more likely than not of being sustained on an audit, based on the technical merits of the position. The provisions of FIN 48 were effective as of the beginning of the Corporation s 2007 fiscal year and required any cumulative effect of the change in accounting principle to be recorded as an adjustment to opening retained earnings. The Corporation did not record an adjustment to retained earnings upon adoption of FIN 48. In future periods, The Corporation will, in accordance with FIN 48, evaluate its tax positions to determine whether or not an adjustment to deferred tax balances and related valuation accounts is warranted.

SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS No. 159)

SFAS No. 159 permits an entity to measure certain financial assets and financial liabilities at fair value. The Statement s objective is to improve financial reporting by allowing entities to mitigate volatility in reported earnings caused by the measurement of related assets and liabilities using different attributes, without having to apply complex hedge accounting provisions. Under SFAS No. 159, entities that elect the fair value option will report unrealized gains and losses in earnings at each subsequent reporting date. The fair value option may be elected on an instrument-by-instrument basis, with a few exceptions, as long as it is applied to the instrument in its entirety. The fair value option election is irrevocable, unless a new election date occurs. The new Statement establishes presentation and disclosure requirements to help financial statement users understand the effect of the entity s election on its earnings but does not eliminate disclosure requirements of other accounting standards. Assets and liabilities that are measured at fair value must be displayed on the face of the balance sheet. SFAS No. 159 is effective as of the beginning of an entity s first fiscal year beginning after November 15, 2007. Early adoption is permitted as of the beginning of the previous fiscal year provided that the entity (a) makes that choice in the first 120 days of that fiscal year, (2) has not yet issued financial statements, and (3) elects to apply the provisions of SFAS No. 157. The Corporation did not adopt SFAS No. 159 during this early adoption period, and has not determined the impact, if any; the implementation of SFAS No. 159 will have on the consolidated financial statements.

3. <u>EARNINGS PER SHARE</u>

Earnings per share are based upon the weighted average number of shares outstanding.

Additional shares issued as a result of option exercises would not be dilutive in either three month period.

MACKINAC FINANCIAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

3. **EARNINGS PER SHARE** (Continued)

The following shows the computation of basic and diluted earnings per share for the three months ended March 31, 2007 and 2006 (dollars in thousands, except per share data):

Three Months Ended March 31,	Net Income	Weighted Average Number of Shares	Income Per Share
2007			
Income per share Basic and diluted	**$ 1,035**	**3,428,695**	**$ .30**
2006			
Income per share Basic and diluted	$ 498	3,428,695	$ .15

4. **INVESTMENT SECURITIES**

The amortized cost and estimated fair value of investment securities available for sale as of March 31, 2007, December 31, 2006, and March 31, 2006 are as follows (dollars in thousands):

	March 31, 2007		December 31, 2006		March 31, 2006	
	Amortized Cost	**Estimated Fair Value**	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
US Agencies	**$ 28,110**	**$ 27,920**	$ 32,445	$ 32,176	$ 30,971	$ 30,338
Obligations of states and political subdivisions	**511**	**591**	511	593	3,524	3,802
Total securities available for sale	**$ 28,621**	**$ 28,511**	$ 32,956	$ 32,769	$ 34,495	$ 34,140

The amortized cost and estimated fair value of investment securities pledged to secure FHLB borrowings and customer relationships were $24.413 million and $.900 million respectively at March 31, 2007.

5. **LOANS**

The composition of loans at March 31, 2007, December 31, 2006, and March 31, 2006 is as follows (dollars in thousands):

	March 31,	December 31,	March 31,

	2007	2006	2006
Commercial real estate	**$ 153,587**	$ 154,332	$ 134,089
Commercial, financial and agricultural	**67,683**	71,385	56,958
One to four family residential real estate	**54,204**	58,014	50,119
Construction	**39,976**	36,009	21,005
Consumer	**2,971**	2,841	2,300
Total loans	**$ 318,421**	$ 322,581	$ 264,471

7.

Table of Contents

MACKINAC FINANCIAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

5. LOANS (Continued)

LOANS Allowance for loan losses

An analysis of the allowance for loan losses for the three months ended March 31, 2007, the year ended December 31, 2006, and the three months ended March 31, 2006 is as follows (dollars in thousands):

	March 31, 2007	December 31, 2006	March 31, 2006
Balance at beginning of period	**$ 5,006**	$ 6,108	$ 6,108
Recoveries on loans	**6**	91	12
Loans charged off	**(37)**	(332)	(105)
Provision for loan losses		(861)	(600)
Balance at end of period	**$ 4,975**	$ 5,006	$ 5,415

In the first quarter of 2007, net charge-off activity was minimal at $31,000, or .01% of average loans outstanding compared to net charge-offs of $93,000, or .04% of average loans, in the first quarter of 2006. In the first quarter of 2006 the Corporation reduced the allowance for loan losses by recording a negative provision amounting to $600,000. This reduction in the reserve was made in recognition of the improved credit quality existent in the loan portfolio and is discussed in more detail under Management s Discussion and Analysis.

LOANS Impaired loans

Nonperforming loans are those which are contractually past due 90 days or more as to interest or principal payments, on nonaccrual status, or loans, the terms of which have been renegotiated to provide a reduction or deferral on interest or principal. The interest income recorded and that which would have been recorded had nonaccrual and renegotiated loans been current, or not troubled was not material to the consolidated financial statements for the three months ended March 31, 2007 and 2006.

Information regarding impaired loans as of March 31, 2007, December 31, 2006, and March 31, 2006 is as follows (dollars in thousands):

				Valuation Reserve		
	March 31, 2007	December 31, 2006	March 31, 2006	**March 31, 2007**	December 31, 2006	March 31, 2006
Balances, at period end						
Impaired loans with specific valuation reserve	**$ 1,804**	$ 1,804	$	**$ 493**	$ 493	$
Impaired loans with no specific valuation reserve	**3,058**	1,136				
Total impaired loans	**$ 4,862**	$ 2,940	$	**$ 493**	$ 493	$

Impaired loans on nonaccrual basis	**$**	**4,142**	$	2,900	$		**$**	**493**	$	493	$
Impaired loans on accrual basis		**720**		40							
Total impaired loans	**$**	**4,862**	$	2,940	$		**$**	**493**	$	493	$
Average investment in impaired loans	**$**	**3,416**	$	1,192	$	71					
Interest income recognized during impairment		**13**		7		1					
Interest income that would have been recognized on an accrual basis		**82**		114							
Cash-basis interest income recognized		**7**		5							

8.

MACKINAC FINANCIAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

5. LOANS (Continued)

The average investment in impaired loans was approximately $3.416 million for the three-months ended March 31, 2007, $1.2 million for the year ended December 31, 2006, and $.071 million for the three months ended March 31, 2006, respectively. The increase in impaired loans in the first quarter of 2007 relates to the deterioration of several large commercial credits which are well collateralized. Nonperforming assets are discussed in more detail under Management s Discussion and Analysis.

LOANS Related parties

The Bank, in the ordinary course of business, grants loans to the Corporation s executive officers and directors, including their families and firms in which they are principal owners.

Activity in such loans is summarized below (dollars in thousands):

	March 31, 2007	December 31, 2006	March 31, 2006
Loans outstanding, beginning of period	**$ 1,621**	$ 578	$ 578
New loans		1,647	
Net activity on revolving lines of credit		271	805
Repayment	**(8)**	(875)	
Change in related party interest			(491)
Loans outstanding, end of period	**$ 1,613**	$ 1,621	$ 892

There were no loans to related parties classified substandard at March 31, 2007, December 31, 2006, and March 31, 2006 respectively.

6. BORROWINGS

Borrowings consist of the following at March 31, 2007, December 31, 2006, and March 31, 2006 (dollars in thousands):

	March 31, 2007	December 31, 2006	March 31, 2006
Federal Home Loan Bank advances at rates ranging from 4.98% to 5.38% maturing in 2010 and 2011	**$ 35,000**	$ 35,000	$ 35,000
Farmers Home Administration, fixed-rate note payable, maturing August 24, 2024, interest payable at 1%	**1,348**	1,348	1,417
Advance outstanding on line of credit with a correspondent bank, interest payable at the prime rate, 8.25% as of March 31, 2007,	**1,959**	1,959	

maturing May 21, 2008

	$ 38,307	$ 38,307	$ 36,417

The Federal Home Loan Bank borrowings are collateralized at March 31, 2007, by the following: a collateral agreement on the Corporation s one to four family residential real estate loans with a book value of approximately $21.660 million; U.S. government agencies with an amortized cost and estimated fair value of $24.598 million and $24.413 million, respectively; and Federal Home Loan Bank stock owned by the Bank totaling $3.794 million. Prepayment of the remaining advances is subject to the provisions and conditions of the credit policy of the Federal Home Loan Bank of Indianapolis in effect as of March 31, 2007.

The U.S.D.A. Rural Development borrowing is collateralized by loans totaling $788,000 originated and held by the Corporation s wholly owned subsidiary, First Rural Relending, an assignment of a demand deposit account in the amount of $686,000, and guaranteed by the Corporation.

7. STOCK OPTION PLANS

A summary of stock option transactions for the three months ended March 31, 2007 and 2006 and the year ended December 31, 2006, is as follows:

	March 31, 2007	December 31, 2006	March 31, 2006
Outstanding shares, at beginning of period	**446,417**	375,417	375,417
Granted during the period		72,500	
Expired/forefited during the period		1,500	1,500
Outstanding shares at end of period	**446,417**	446,417	373,917
Weighted average exercise price per share at end of period	**$ 12.29**	$ 12.29	$ 12.60
Shares available for grant, at end of period	**18,488**	18,488	90,988

There were no options granted or exercised in the first quarter of 2007 or 2006.
Following is a summary of the options outstanding and exercisable at March 31, 2007:

Exercise Price Range	Number of Shares Outstanding	Number of Shares Exercisable	Weighted Average Remaining Contractual Life-Years	Weighted Average Exercise Price
$9.16	12,500	5,000	9.0	$ 9.16
$9.75	257,152	120,861	8.0	9.75
$10.65	72,500	14,500	10.0	10.65
$11.50	40,000	8,000	8.8	11.50
$12.00	60,000	12,000	8.5	12.00
$156.00 $240.00	3,545	3,545	4.3	186.75
$300.00 $400.00	720	720	2.5	345.00
	446,417	164,626	8.2	$ 12.29

8. INCOME TAXES

A valuation allowance is provided against deferred tax assets when it is more likely than not that some or all of the deferred tax asset will not be realized. As of March 31, the Corporation had a net operating loss and tax credit carryforwards for tax purposes of approximately $32.6 million, and $2.1 million, respectively. The deferred tax benefits related to the net operating loss and tax credit carryforwards will, at a minimum, be utilized to offset

future taxable expense. In the first quarter of 2007 and 2006, the Corporation reversed a portion of the valuation allowance pertaining to the NOL carryforward to offset current federal tax, $.305 million and $.102 million, respectively. The Corporation will record future benefits from these carryforwards at such time as it becomes more likely than not that they will be utilized prior to expiration. Please refer to further discussion on income taxes contained in Management s Discussion and Analysis. This net operating loss carryforward expires twenty years from the date that it originated. A portion of the NOL, approximately $22 million, and all of the credit carryforwards are subject to the limitations for utilization as set forth in Section 382 of the Internal Revenue Code. The annual limitation is $1.4 million for the NOL and the equivalent value of tax credits, which is approximately $.477 million. These limitations for use were established in conjunction with the recapitalization of the Corporation in December, 2004.

9. COMMITMENTS, CONTINGENCIES, AND CREDIT RISK

Financial Instruments With Off-Balance-Sheet Risk

The Corporation is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated balance sheets.

The Corporation s exposure to credit loss, in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit, is represented by the contractual amount of those instruments. The Corporation uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments. These commitments are as follows (dollars in thousands):

	March 31, 2007	December 31, 2006	March 31, 2006
Commitments to extend credit:			
Variable rate	**$ 55,517**	$ 44,141	$ 37,889
Fixed rate	**9,975**	9,288	1,815
Standby letters of credit Variable rate	**6,094**	6,233	9,290
Credit card commitments Fixed rate	**2,451**	2,391	3,068
	$ 74,037	$ 62,053	$ 52,062

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Corporation evaluates each customer s creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Corporation upon extension of credit, is based on management s credit evaluation of the party. Collateral held varies, but may include accounts receivable, inventory, property, plant and equipment, and income-producing commercial properties.

Standby letters of credit are conditional commitments issued by the Corporation to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The commitments are structured to allow for 100% collateralization on all standby letters of credit.

Credit card commitments are commitments on credit cards issued by the Corporation s subsidiary and serviced by other companies. These commitments are unsecured.

Contingencies

In the normal course of business, the Corporation is involved in various legal proceedings. For expanded discussion on the Corporation s legal proceedings, see Part II, Item 1, Legal Proceedings in this report.

9. COMMITMENTS, CONTINGENCIES, AND CREDIT RISK (Continued)

Concentration of Credit Risk

The Bank grants commercial, residential, agricultural, and consumer loans throughout Michigan. The Bank s most prominent concentration in the loan portfolio relates to commercial real estate loans. This concentration at March 31, 2007 represents $44.2 million, or 13.9%, compared to $32.4 million, or 12.3%, of the commercial loan portfolio on March 31, 2006. The remainder of the commercial loan portfolio is diversified in such categories as hospitality and tourism, real estate agents and managers, new car dealers, gaming, petroleum, forestry, agriculture and construction. Due to the diversity of the Bank s locations, the ability of debtors of residential and consumer loans to honor their obligations is not tied to any particular economic sector.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD LOOKING STATEMENTS

This report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The Corporation intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and is including this statement for purposes of these safe harbor provisions. Forward-looking statements which are based on certain assumptions and describe future plans, strategies, or expectations of the Corporation, are generally identifiable by use of the words believe , expect , intend , anticipate , estimate , project , or similar expressions. The Corporation s ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors that could cause actual results to differ from the results in forward-looking statements include, but are not limited to:

The highly regulated environment in which the Corporation operates could adversely affect its ability to carry out its strategic plan due to restrictions on new products, funding opportunities or new market entrances;

General economic conditions, either nationally or in the state(s) in which the Corporation does business;

Legislation or regulatory changes which affect the business in which the Corporation is engaged;

Changes in the interest rate environment which increase or decrease interest rate margins;

Changes in securities markets with respect to the market value of financial assets and the level of volatility in certain markets such as foreign exchange;

Significant increases in competition in the banking and financial services industry resulting from industry consolidation, regulatory changes and other factors, as well as action taken by particular competitors;

The ability of borrowers to repay loans;

The effects on liquidity of unusual decreases in deposits;

Changes in consumer spending, borrowing, and saving habits;

Technological changes;

Acquisitions and unanticipated occurrences which delay or reduce the expected benefits of acquisitions;

Difficulties in hiring and retaining qualified management and banking personnel;

The Corporation s ability to increase market share and control expenses;

The effect of compliance with legislation or regulatory changes;

The effect of changes in accounting policies and practices;

The costs and effects of existing and future litigation and of adverse outcomes in such litigation.

These risks and uncertainties should be considered in evaluating forward-looking statements. Further information concerning the Corporation and its business, including additional factors that could materially affect the Corporation s financial results, is included in the Corporation s filings with the Securities and Exchange Commission. All

forward-looking statements contained in this report are based upon information presently available and the Corporation assumes no obligation to update any forward-looking statements.

MACKINAC FINANCIAL CORPORATION

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

The following discussion will cover results of operations, asset quality, financial position, liquidity, interest rate sensitivity, and capital resources for the periods indicated. The information included in this discussion is intended to assist readers in their analysis of, and should be read in conjunction with, the consolidated financial statements and related notes and other supplemental information presented elsewhere in this report. This discussion should be read in conjunction with the consolidated financial statements and footnotes contained in the Corporation s Annual Report and Form 10-K for the year-ended December 31, 2006. Throughout this discussion, the term Bank refers to mBank, formerly known as North Country Bank and Trust, the principal banking subsidiary of the Corporation.

FINANCIAL OVERVIEW

Consolidated net income for the first quarter of 2007 was $1.035 million or $.30 per share compared to net income of $.498 million, or $.15 per share for the first quarter of 2006. Weighted average shares outstanding amounted to 3,428,695 in both periods. The results of operations for the first quarter of 2007 include the proceeds received, $470,000, in the settlement of a lawsuit against the Corporation s former accountants. The first quarter 2006 results include a $600,000 negative loan loss provision. Excluding the lawsuit settlement and the provision adjustment, the net income in the first quarter of 2007 amounted to $.568 million, compared to a loss of .102 million for the same period in 2006.

Total assets of the Corporation at March 31, 2007 were $375.644 million, up 12.27 percent from the $334.591 million in total assets reported at March 31, 2006. First quarter-end total assets were down 1.87 percent from the $382.791 million of total assets at year-end 2006.

FINANCIAL CONDITION

Cash and Cash Equivalents

Cash and cash equivalents increased $1.271 million in the first quarter of 2007. See further discussion of the change in cash and cash equivalents in the Liquidity section.

Investment Securities

Available-for-sale securities decreased $4.258 million, or 12.99%, from December 31, 2006, to March 31, 2007, with the balance on March 31, 2007, totaling $28.511 million. The decrease during the first quarter was due to a combination of maturities, calls, and paydowns of securities. Investment securities are utilized in an effort to manage interest rate risk and liquidity. During the first quarter of 2007, the Corporation utilized a higher proportion of federal funds to maintain liquidity since yields were comparable to those offered on short term investment securities. As of March 31, 2007, investment securities with an estimated fair value of $25.563 million were pledged.

Loans

Through the first quarter of 2007, loan balances decreased by $4.160 million, or 1.29% from December 31, 2006 balances of $322.581 million. During the first quarter, the Bank had new loan production of $30.1 million, however experienced paydowns and external loan refinancings which reduced existing portfolio loan balances by approximately $26.6 million. Enhancements to the loan approval process and exception reporting further provide for a more effective management of risk in the loan portfolio. Management continues to actively manage the loan portfolio, seeking to identify and resolve problem assets at an early stage. Management believes a properly positioned loan portfolio provides the most attractive earning asset yield available to the Corporation and, with changes to the loan approval process and exception reporting, management can effectively manage the risk in the loan portfolio. Management intends to continue loan growth within its markets for mortgage, consumer, and commercial loan products while concentrating on loan quality, industry concentration issues, and competitive pricing.

MACKINAC FINANCIAL CORPORATION

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Following is a summary of the loan portfolio at March 31, 2007, December 31, 2006, and March 31, 2006 (dollars in thousands):

	March 31, 2007	**Percent of Total**	December 31, 2006	Percent of Total	March 31, 2006	Percent of Total
Commercial real estate	**$ 153,587**	**48.24%**	$ 154,332	47.84%	$ 134,089	50.70%
Commercial, financial, and agricultural	**67,683**	**21.26**	71,385	22.13	56,958	21.54
1-4 family residential real estate	**54,204**	**17.02**	58,014	17.98	50,119	18.95
Construction	**39,976**	**12.55**	36,009	11.16	21,005	7.94
Consumer	**2,971**	**.93**	2,841	.88	2,300	.87
Total loans	**$ 318,421**	**100.00%**	$ 322,581	100.00%	$ 264,471	100.00%

Following is a table showing the significant industry types in the commercial loan portfolio as of March 31, 2007, December 31, 2006, and March 31, 2006 (dollars in thousands):

	March 31, 2007			December 31, 2006			March 31, 2006		
	Outstanding Balance	**Percent of Commercial Loans**	**Percent of Shareholders Equity**	Outstanding Balance	Percent of Commercial Loans	Percent of Shareholders Equity	Outstanding Balance	Percent of Commercial Loans	Percent of Shareholders Equity
Real estate operators of nonres bldgs	**$ 44,155**	**16.90%**	**147.52%**	$ 44,308	16.93%	153.90%	$ 32,440	15.30%	119.38%
Hospitality and tourism	**33,726**	**12.91**	**112.68**	30,826	11.78	107.07	38,045	17.94	140.01
Real estate agents and managers	**27,313**	**10.45**	**91.25**	25,071	9.58	87.08	12,350	5.82	45.45
New car dealers	**10,139**	**3.88**	**33.87**	10,086	3.85	35.03	9,988	4.71	36.76
Other	**145,913**	**55.86**	**487.48%**	151,435	57.86	526.00%	119,229	56.23	438.78%
Total Commercial Loans	**$ 261,246**	**100.00%**		$ 261,726	100.00%		$ 212,052	100.00%	

Management recognizes the additional risk presented by the concentration in certain segments of the portfolio. On a historical basis, the Corporation s highest concentration of credit risk was the hospitality and tourism industry. Management does not consider the current loan concentrations in hospitality and gaming to be problematic, and has no intention of further reducing loans to this industry segment. Management does not believe that its current portfolio

composition has increased exposure related to any specific industry concentration as of March 31, 2007. The current concentration of real estate related loans represents a broad customer base composed of a high percentage of owner occupied developments.

Credit Quality

Management analyzes the allowance for loan losses on a monthly basis to determine whether the losses inherent in the portfolio are properly reserved for. The Corporation utilizes a loan review consultant to perform a review of the loan portfolio. The opinion of this consultant, upon completion of the independent review in 2006, provided findings similar to management on the overall adequacy of the reserve. The Corporation will utilize this same consultant for loan review during 2007.

Management analyzes the allowance for loan losses in detail on a monthly basis to determine whether the losses inherent in the portfolio are properly reserved for. Net charge-offs amounted to $.031 million, ..01% of average loans outstanding, compared to $.093 million, .04% of average loans outstanding, for the three months ended March 31, 2007 and 2006, respectively. In the first quarter of 2006, the Corporation, in recognition of the continued improvement in credit quality, reduced the reserve for loan loss by $600,000. The current reserve balance is representative of the relevant risk inherent within the Corporation s loan portfolio. The current level of charge-offs is below historical levels and projected charge-off activity, based upon current levels of nonperforming loans, is not expected to attain historical levels. Additions or reductions to the reserve in future periods will be dependent upon a combination of future loan growth, nonperforming loan balances and charge-off activity. The increase in nonperforming loans in the first quarter of 2007 is not indicative of an overall deterioration of portfolio credit quality. Management believes these additions to problem loans are somewhat isolated and are due mainly to these individual credit situations and not to an industry, geographic or economic decline.

Table of Contents

MACKINAC FINANCIAL CORPORATION
ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

The table below shows period end balances of nonperforming assets (dollars in thousands):

	March 31, 2007	December 31, 2006	March 31, 2006
Nonperforming Assets:			
Nonaccrual loans	**$ 4,142**	$ 2,899	$
Loans past due 90 days or more	**720**	40	
Restructured loans			
Total nonperforming loans	**4,862**	2,939	
Other real estate owned	**127**	26	952
Total nonperforming assets	**$ 4,989**	$ 2,965	$ 952
Nonperforming loans as a % of loans	**1.53**%	.91%	%
Nonperforming assets as a % of assets	**1.33**%	.77%	.28%
Reserve for Loan Losses:			
At period end	**$ 4,975**	$ 5,006	$ 5,415
As a % of loans	**1.56**%	1.55%	2.05%
As a % of nonperforming loans	**102.32**%	170.30%	N/M%
As a % of nonaccrual loans	**120.11**%	172.68%	N/M%

Following is the allocation of the allowance for loan losses as of March 31, 2007, December 31, 2006, and March 31, 2006 (dollars in thousands):

	March 31, 2007	December 31, 2006	March 31, 2006
Commercial, financial, and agricultural loans	**$ 3,906**	$ 3,600	$ 1,279
One to four family residential real estate loans	**29**	23	43
Consumer loans			
Unallocated and general reserves	**1,040**	1,383	4,093
Totals	**$ 4,975**	$ 5,006	$ 5,415

The Corporation has experienced a significant decline in historical loan charge-offs in the past several years. During this same period, the commercial loan portfolio has grown by approximately $105 million. The increased allocation of the reserve from unallocated and general reserves to commercial, financial and agricultural is in recognition of this growth.

The following ratios assist management in the determination of the Corporation s credit quality:

	March 31, 2007	December 31, 2006	March 31, 2006
Total loans, at period end	**$ 318,421**	$ 322,581	$ 264,471
Average loans for the year	**$ 318,072**	$ 301,508	$ 250,735
Allowance for loan losses	**$ 4,975**	$ 5,006	$ 5,415
Allowance to total loans at period end	**1.56**%	1.55%	2.05%
Net charge-offs during the period	**$ 31**	$ 241	$ 93
Net charge-offs to average loans	**.01**%	.08%	.04%
Net charge-offs to beginning allowance balance	**.62**%	3.95%	1.52%
Nonaccrual loans at end of period	**$ 4,142**	$ 2,899	$
Loans past due 90 days or more	**720**	40	
Restructured loans			
Total nonperforming loans	**$ 4,862**	$ 2,939	$
Nonperforming loans to total loans at end of period	**1.53**%	.91%	%

16.

MACKINAC FINANCIAL CORPORATION
ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Total nonperforming loans increased $1.923 million since December 31, 2006. The increase was due to several specific commercial credits that were added in the quarter. Management believes that these loans are well secured and does not expect any material loss on these loans.

Management continues to address market issues impacting its loan customer base. In conjunction with the Corporation s senior lending staff and the bank regulatory examinations, management reviews the Corporation s loans, related collateral evaluations, and the overall lending process. The Corporation also utilizes a loan review consultant to perform a review of the loan portfolio. The opinion of this consultant upon completion of the independent review provided findings similar to management on the overall adequacy of the reserve. The Corporation has engaged this same consultant for loan review during 2007.

As part of the process of resolving problem credits, the Corporation may acquire ownership of collateral which secured such credits. The Corporation carries this collateral in other real estate which is grouped with other assets on the condensed consolidated balance sheet.

The following table represents the activity in other real estate for the periods indicated (dollars in thousands):

	Three Months Ended March 31, 2007	Year Ended December 31, 2006	Three Months Ended March 31, 2006
Balance at beginning of period	**$ 26**	$ 945	$ 945
Other real estate transferred from loans due to foreclosure	**109**	23	7
Other real estate transferred to premises and equipment			
Other real estate sold/written down	**(8)**	(942)	
Balance at end of period	**$ 127**	$ 26	$ 952

During the first three months of 2007, the Corporation received real estate in lieu of loan payments of $109,000. Other real estate is initially valued at the lower of cost or the fair value less selling costs. After the initial receipt, management periodically reevaluates the recorded balance. Any additional reduction in the fair value results in a write-down of other real estate. Write-downs on other real estate may be recorded based on subsequent evaluations of current realizable fair values.

Deposits

The Corporation had a decrease in deposits in the first quarter of 2007. Total deposits decreased by $8.009 million, or 2.56%, in the first quarter of 2007. This decrease in deposits included a reduction of $10.759 million in brokered deposits. The Corporation utilizes brokered deposits to fulfill loan funding needs. During the first quarter of 2007, actual loan balances decreased and the Corporation was able to reduce its reliance on brokered deposits. In the first quarter, core deposits, as shown in the table below, increased by $1.920 million over year end balances.

Management continues to monitor existing deposit products in order to stay competitive, as to both terms and pricing. It is the intent of management to be aggressive in its markets to grow core deposits with an emphasis placed on transactional accounts.

Total core deposits	**201,529**	**66.20**	199,609	63.89	183,438	68.46
Certificates of Deposit >$100,000	**24,475**	**8.04**	23,645	7.57	15,246	5.69
Brokered CDs	**78,408**	**25.76**	89,167	28.54	69,270	25.85
Total non-core deposits	**102,883**	**33.80**	112,812	36.11	84,516	31.54
Total deposits	**$ 304,412**	**100.00%**	$ 312,421	100.00%	$ 267,954	100.00%

Borrowings

The Corporation historically used alternative funding sources to provide long-term, stable sources of funds. These borrowings were initially carried with fixed interest rates and stated maturities through 2011. The advances gave the FHLB the option to convert the above listed convertible-fixed-rate advances to adjustable rate advances, repricing quarterly at three month LIBOR Flat, on the original call date and quarterly thereafter. During 2006, $20.0 million of the advances were converted from fixed to adjustable rate by the FHLB. This shift from fixed to variable rate did not have a material impact on the Corporation s net interest margin.

Shareholders Equity

Total shareholders equity increased $1.142 million from December 31, 2006 to March 31, 2007. The increase is comprised of net income, contributed capital of $30,000 in recognition of stock option expense and an increase in the market value of securities of $77,000. The Board of Directors does not anticipate declaring any dividends in the near future. The declaration of dividends is contingent on a variety of factors including regulatory and state statutes, and the Corporation s return to profitability.

RESULTS OF OPERATIONS

Net Interest Income

Net interest income before provision for loan losses for the quarter ended March 31, 2007, increased by $.499 million, or 18.63% compared to the same period one year ago. This increase in net interest income was a result of the combination of increased average balances and increased rates. The Corporation, throughout most of 2006, benefited from prime rate increases as more assets were repricing upwards than liabilities. This asset sensitive position has been declining in recent periods as the Corporation initiated steps as a part of its ALCO Committee to reduce interest rate risk. More discussion is included relative to repricing and asset sensitivity under the caption Interest Rate Risk elsewhere in this report.

MACKINAC FINANCIAL CORPORATION

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

The following table presents the amount of interest income from average interest-earning assets and the yields earned on those assets, as well as the interest expense on average interest-bearing obligations and the rates paid on those obligations. All average balances are daily average balances.

	Average Balances			**Average Rates**		**Interest**		**2007-2006**			
	March 31,		Increase/	March 31,		March 31,		Income/ Expense	Volume	Rate	Rate/ Volume

(1) For purposes of these computations, nonaccruing loans are included in the daily average loan amounts outstanding.

(2) Interest income on loans includes loan fees.

Provision for Loan Losses

The Corporation records a provision for loan losses at a level it believes is necessary to maintain the allowance at an adequate level after considering factors such as loan charge-offs and recoveries, changes in the mix of loans in the portfolio, loan growth, and other economic factors. There was no provision for loan losses in the first quarter of 2007. In recognition of the improved credit quality, the Corporation reduced its loan loss reserve by $600,000 in the first quarter of 2006. Management continues to monitor the loan portfolio for changes which may impact the required allowance for loan losses. A provision for loan losses may be required for future periods if credit quality should deteriorate or loan growth is such that the general reserve is no longer deemed adequate.

Other Income

Other income increased by $.697 million for the quarter ended March 31, 2007, compared to the quarter ended March 31, 2006. The Corporation recognized a benefit from the settlement of a lawsuit against its former accountants in the first quarter of 2007, which amounted to $.470 million. Service fees increased $.050 million, while other noninterest income increased $.579 million. Revenue due to mortgage loans produced and sold in the secondary market amounted to $.108 million compared to $.040 million a year ago. We expect to continue to benefit from secondary market activity in future periods. The Corporation is also expecting to increase other income from other sources such as fees from the sale of SBA guaranteed loans. Other noninterest income in the first quarter amounted to $.174 million, an increase of $.109 million from the first quarter of 2006. This increase was due primarily from several one-time items.

Table of Contents

MACKINAC FINANCIAL CORPORATION
ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

The following table details noninterest income for the three months ended March 31, 2007, and March 31, 2006 (dollars in thousands):

Noninterest Income

	Three Months Ended March 31,		% Increase (Decrease)
	2007	2006	2007-2006
Service fees	**$ 161**	$ 111	45.05%
Net gains on sale of secondary market loans	**108**	40	170.00
Proceeds from settlement of lawsuit	**470**		100.00
Other noninterest income	**174**	65	890.77
Total noninterest income	**$ 913**	**$ 216**	322.69%

Other Expenses

Other expenses increased $.059 million for the quarter ended March 31, 2007, compared to the same period in 2006. Salaries, commissions, and related benefits increased by $.144 million, during the first quarter of 2007, compared to the first quarter of 2006. This increase reflects the annual salary increases and staffing additions. The Corporation, in an attempt to increase core deposit balances, added three Treasury Management Specialists to focus on generating business related transactional deposit balances. The $17,000 increase in data processing costs is the result of increased deposit balances and activity, along with added data processing services. The $57,000 decrease in loan and deposit expense is due in large part to the reduction in FDIC insurance premiums which amounted to $23,000 in the first quarter of 2006 compared to $9,000 in 2007, a reduction of $14,000. This reduction in premium was due to lower premium assessments and is expected to continue for the near term. Management continually reviews all areas of noninterest expense for cost reduction opportunities that will not impact service quality and employee morale.

The following table details noninterest expense for the three months ended March 31, 2007 and March 31, 2006 (dollars in thousands):

Noninterest Expenses

	Three Months Ended March 31,		% Increase (Decrease)
	2007	2006	2007-2006

MACKINAC FINANCIAL CORPORATION
ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Federal Income Taxes

There was no tax provision for the first quarter of 2007 and 2006. The Corporation s results of operations for 2007 and 2006 do not reflect the impact of federal income taxes due to large NOL carryforwards, a portion of which was utilized in each period to offset current federal taxes. The differences in each year between the tax provision or benefit and the federal corporate income tax rate of 34% are primarily due to permanent and temporary differences between book and taxable income. A valuation allowance is provided against deferred tax assets when it is more likely than not that some or all of the deferred tax assets will not be realized. As of March 31, 2007, the Corporation had an NOL carryforward of approximately $32.6 million along with various credit carryforwards of $2.1 million. This NOL and credit carryforward benefit is dependent upon the future profitability of the Corporation. A portion of the NOL, approximately $22 million, and all of the tax credit carryforwards are also subject to the use limitations of Section 382 of the Internal Revenue Code since they originated prior to the December 2004 recapitalization of the Corporation. In 2006, a $500,000 benefit was recognized and a portion of the NOL carryforward was utilized to offset current year tax expense. The deferred tax benefit was recognized in accordance with generally accepted accounting principles which allow for recognition when it is more likely than not that such benefit will in fact be realized in future periods. The Corporation intends to further evaluate the utilization of the NOL and credit carryforwards in subsequent periods and recognize the related tax benefits when appropriate.

LIQUIDITY

Liquidity is defined as the ability to generate cash at a reasonable cost to fulfill lending commitments and support asset growth, while satisfying the withdrawal demands of customers and make payments on existing borrowing commitments. The Bank s principal sources of liquidity are core deposits and loan and investment payments and prepayments. Providing a secondary source of liquidity is the available for sale investment portfolio. As a final source of liquidity, the Bank can exercise existing credit arrangements.

During the first quarter of 2007, the Corporation increased cash and cash equivalents by $1.271 million. As shown on the Corporation s condensed consolidated statement of cash flows, liquidity was primarily impacted by cash provided by investing activities, a net decrease in loans of $4.028 million and a net reduction in securities available for sale of $4.376 million. These decreases in assets were offset by a similar decrease in deposit liabilities of $8.109 million. This reduction in deposits was composed of a decrease in brokered deposits of $10.759 million combined with an increase in bank deposits of $2.750 million. The management of bank liquidity for funding of loans and deposit maturities and withdrawals includes monitoring projected loan fundings and scheduled prepayments and deposit maturities within a 30 day period, a 30 to 90 day period and from 90 days until the end of the year. This funding forecast model is completed weekly.

It is anticipated that during the remainder of 2007, the Corporation will fund anticipated loan production with a combination of core deposit growth and noncore funding, primarily brokered CDs.

The Corporation s primary source of liquidity on a stand-alone basis is dividends from the Bank. The Bank is currently prohibited from paying dividends because of a deficit in retained earnings. The Bank, in order to pay dividends in future periods, will need to restate its capital accounts, which requires the approval of the Office of Financial and Insurance Services of the State of Michigan. The Corporation has a $6 million correspondent bank line of credit available for short-term liquidity. This line of credit has an outstanding balance of $1.959 million as of March 31, 2007. The Corporation is currently exploring alternative opportunities for longer term sources of liquidity and permanent equity to support projected asset growth.

Liquidity is managed by the Corporation through its Asset and Liability Committee (ALCO). The ALCO Committee meets monthly to discuss asset and liability management in order to address liquidity and funding needs to provide a process to seek the best alternatives for investments of assets, funding costs, and risk management. The liquidity position of the Bank is managed daily, thus enabling the Bank to adapt its position according to market fluctuations. Core deposits are important in maintaining a strong liquidity position as they represent a stable and relatively low cost source of funds. The Bank s liquidity position increased in 2006 to provide the level of liquidity needed to support the

balance sheet expansion. The Bank s liquidity is best illustrated by the mix in the Bank s core and non-core funding dependence ratio, which explain the degree of reliance on non-core liabilities to fund long-term assets. Core deposits are herein defined as demand deposits, NOW (negotiable order withdrawals), money markets, savings and certificates of deposit under $100,000. Non-core funding consists of certificates of deposit greater than $100,000, brokered deposits, and FHLB and Farmers Home Administration borrowings. At March 31, 2007, the Bank s core deposits in relation to total funding was 58.8% compared to 60.3% at March 31, 2006. These

MACKINAC FINANCIAL CORPORATION
ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

ratios indicated at March 31, 2007, that the Bank has decreased its reliance on non-core deposits and borrowings to fund the Bank s long-term assets, namely loans and investments. The Bank believes that by maintaining adequate volumes of short-term investments and implementing competitive pricing strategies on deposits, it can ensure adequate liquidity to support future growth. The Bank also has correspondent lines of credit available to meet unanticipated short-term liquidity needs. As of March 31, 2007, the Bank had $14.875 million of unsecured lines available and another $8.125 million available if secured. The Bank believes that its liquidity position remains strong to meet both present and future financial obligations and commitments, events or uncertainties that have resulted or are reasonably likely to result in material changes with respect to the Bank s liquidity.

From a long-term perspective, the Corporation s liquidity plan for 2007 includes strategies to increase core deposits in the Corporation s local markets. The new deposit products and strategic advertising is expected to aid in efforts of management in growing core deposits to reduce the dependency on non-core deposits, while also reducing interest costs. The Corporation s liquidity plan for 2007 calls for augmenting local deposit growth efforts with wholesale CD funding, to the extent necessary.

CAPITAL AND REGULATORY

As a bank holding company, the Corporation is required to maintain certain levels of capital under government regulation. There are several measurements of regulatory capital and the Corporation is required to meet minimum requirements under each measurement. The federal banking regulators have also established capital classifications beyond the minimum requirements in order to risk-rate deposit insurance premiums and to provide trigger points for prompt corrective action in the event an institution becomes financially troubled. As of March 31, 2007, the Corporation and Bank were well capitalized. The Corporation is currently exploring its alternatives for the possible issuance of equity or debt in order to provide a broader base to support future asset growth. During the first quarter of 2007, total capitalization increased by $1.142 million.

MACKINAC FINANCIAL CORPORATION

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

INTEREST RATE RISK

In general, the Corporation attempts to manage interest rate risk by investing in a variety of assets which afford it an opportunity to reprice assets and increase interest income at a rate equal to or greater than the interest expense associated with repricing liabilities.

Interest rate risk is the exposure of the Corporation to adverse movements in interest rates. The Corporation derives its income primarily from the excess of interest collected on its interest-earning assets over the interest paid on its interest-bearing obligations. The rates of interest the Corporation earns on its assets and owes on its obligations generally are established contractually for a period of time. Since market interest rates change over time, the Corporation is exposed to lower profitability if it cannot adapt to interest rate changes. Accepting interest rate risk can be an important source of profitability and shareholder value; however, excess levels of interest rate risk could pose a significant threat to the Corporation s earnings and capital base. Accordingly, effective risk management that maintains interest rate risk at prudent levels is essential to the Corporation s safety and soundness.

Loans are the most significant earning asset. Management offers commercial and real estate loans priced at interest rates which fluctuate with various indices such as the prime rate or rates paid on various government issued securities. In addition, the Corporation prices the majority of fixed rate loans so it has an opportunity to reprice the loan within 12 to 36 months.

The Corporation also has $28.511 million of securities providing for scheduled monthly principal and interest payments as well as unanticipated prepayments of principal. These cash flows are then reinvested into other earning assets at current market rates. The Corporation also has federal funds sold to correspondent banks as well as other interest-bearing deposits with correspondent banks. These funds are generally repriced on a daily basis.

The Corporation offers deposit products with a variety of terms ranging from deposits whose interest rates can change on a weekly basis to certificates of deposit with repricing terms of up to five years. Longer term deposits generally include penalty provisions for early withdrawal.

Beyond general efforts to shorten the loan pricing periods and extend deposit maturities, management can manage interest rate risk by the maturity periods of securities purchased, selling securities available for sale, and borrowing funds with targeted maturity periods, among other strategies. Also, the rate of interest rate changes can impact the actions taken since the speed of change affects borrowers and depositors differently.

Exposure to interest rate risk is reviewed on a regular basis. Interest rate risk is the potential of economic losses due to future interest rate changes. These economic losses can be reflected as a loss of future net interest income and/or a loss of current fair market values. The objective is to measure the effect of interest rate changes on net interest income and to structure the composition of the balance sheet to minimize interest rate risk and at the same time maximize income. Management realizes certain risks are inherent and that the goal is to identify and minimize the risks. Tools used by management include maturity and repricing analysis and interest rate sensitivity analysis. The Bank has monthly asset/liability meetings with an outside consultant to review its current position and strategize about future opportunities on risks relative to pricing and positioning of assets and liabilities.

The difference between repricing assets and liabilities for a specific period is referred to as the gap. An excess of repricable assets over liabilities is referred to as a positive gap. An excess of repricable liabilities over assets is referred to as a negative gap. The cumulative gap is the summation of the gap for all periods to the end of the period for which the cumulative gap is being measured.

Assets and liabilities scheduled to reprice are reported in the following time frames. Those instruments, with a variable interest rate tied to an index and considered immediately repricable, are reported in the 1- to 90-day time frame. The estimates of principal amortization and prepayments are assigned to the following time frames.

Table of Contents

MACKINAC FINANCIAL CORPORATION

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (Continued)

The following is the Corporation s repricing opportunities at March 31, 2007 (dollars in thousand):

	1-90 Days	91 - 365 Days	>1-5 Years	Over 5 Years	Total
Interest-earning assets:					
Loans	$ 218,003	$ 8,154	$ 28,785	$ 63,479	$ 318,421
Securities	4,498	16,612	7,000	401	28,511
Other (1)	7,186			3,794	10,980
Total interest-earning assets	229,687	24,766	35,785	67,674	357,912
Interest-bearing obligations:					
NOW, Money Market and Savings	84,046				84,046
Time deposits	46,211	60,969	10,573	789	118,542
Brokered deposits	44,676	33,732			78,408
Borrowings	21,348			16,959	38,307
Total interest-bearing obligations	196,281	94,701	10,573	17,748	319,303
Gap	$ 33,406	$ (69,935)	$ 25,212	$ 49,926	$ 38,609
Cumulative gap	$ 33,406	$ (36,529)	$ (11,317)	$ 38,609	

(1) Includes Federal Home Loan Bank Stock

The above analysis indicates that at March 31, 2007, the Corporation had a cumulative liability sensitivity gap position of $36.529 million within the one-year time frame. The Corporation s cumulative liability sensitive gap suggests that if market interest rates continue to increase in the next twelve months, the Corporation has the potential to earn less net interest income. Conversely, if market interest rates decrease in the next twelve months, the above GAP position suggests the Corporation s net interest income would increase. A limitation of the traditional gap analysis is that it does not consider the timing or magnitude of non-contractual repricing or expected prepayments. In addition, the gap analysis treats savings, NOW, and savings accounts as repricing within 90 days, while experience suggests that these categories of deposits are actually comparatively resistant to rate sensitivity.

At December 31, 2006, the Corporation had a cumulative liability sensitivity gap position of $36.811 million within the one-year time frame. The decrease in the gap position from December 31, 2006 to March 31, 2007 was insignificant.

The borrowings in the gap analysis include $15 million of the FHLB advances as fixed-rate advances. These advances give the FHLB the option to convert from a fixed-rate advance to an adjustable rate advance with quarterly repricing at three-month LIBOR Flat. The exercise of this conversion feature by the FHLB would impact the repricing dates currently assumed in the analysis. In 2006, the FHLB converted $20 million of the $35 million total FHLB borrowings from fixed to variable rate.

The Corporation s primary market risk exposure is interest rate risk and, to a lesser extent, liquidity risk and foreign exchange risk. The Corporation has no market risk sensitive instruments held for trading purposes. The Corporation has limited agricultural-related loan assets and therefore has minimal significant exposure to changes in commodity prices. Any impact that changes in foreign exchange rates and commodity prices would have on interest rates are assumed to be insignificant.

Evaluating the exposure to changes in interest rates includes assessing both the adequacy of the process used to control interest rate risk and the quantitative level of exposure. The Corporation s interest rate risk management process seeks to ensure that appropriate policies, procedures, management information systems, and internal controls are in place to maintain interest rate risk at prudent levels with consistency and continuity. In evaluating the quantitative level of interest rate risk, the Corporation assesses the existing and potential future effects of changes in interest rates on its financial condition, including capital adequacy, earnings, liquidity, and asset quality.

Table of Contents

MACKINAC FINANCIAL CORPORATION

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (Continued)

In addition to changes in interest rates, the level of future net interest income is also dependent on a number of variables, including: the growth, composition and levels of loans, deposits, and other earning assets and interest-bearing obligations, and economic and competitive conditions; potential changes in lending, investing, and deposit strategies; customer preferences; and other factors.

FOREIGN EXCHANGE RISK

In addition to managing interest rate risk, management also actively manages risk associated with foreign exchange. The Corporation provides foreign exchange services, makes loans to, and accepts deposits from, Canadian customers primarily at its banking offices in Sault Ste. Marie, Michigan. To protect against foreign exchange risk, the Corporation monitors the volume of Canadian deposits it takes in and then invests these Canadian funds in Canadian commercial loans and securities. As of March 31, 2007, the Corporation had excess Canadian assets of $.312 million (or $.270 million in U.S. dollars). Management believes the exposure to short-term foreign exchange risk is minimal and at an acceptable level for the Corporation.

OFF-BALANCE-SHEET RISK

Derivative financial instruments include futures, forwards, interest rate swaps, option contracts and other financial instruments with similar characteristics. The Corporation currently does not enter into futures, forwards, swaps, or options. However, the Corporation is party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit and involve to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the condensed consolidated balance sheets. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates and may require collateral from the borrower if deemed necessary by the Corporation. Standby letters of credit are conditional commitments issued by the Corporation to guarantee the performance of a customer to a third party up to a stipulated amount and with specified terms and conditions.

Commitments to extend credit and standby letters of credit are not recorded as an asset or liability by the Corporation until the instrument is exercised.

IMPACT OF INFLATION AND CHANGING PRICES

The accompanying condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles, which require the measurement of financial position and results of operations in historical dollars without considering the change in the relative purchasing power of money over time due to inflation. The impact of inflation is reflected in the increased cost of the Corporation s operations. Nearly all the assets and liabilities of the Corporation are financial, unlike industrial or commercial companies. As a result, the Corporation s performance is directly impacted by changes in interest rates, which are indirectly influenced by inflationary expectations. The Corporation s ability to match the interest sensitivity of its financial assets to the interest sensitivity of its financial liabilities tends to minimize the effect of changes in interest rates on the Corporation s performance. Changes in interest rates do not necessarily move to the same extent as changes in the price of goods and services.

MACKINAC FINANCIAL CORPORATION

ITEM 4. CONTROLS AND PROCEDURES

An evaluation was performed under the supervision of and with the participation of the Corporation s management, including the Chairman and Chief Executive Officer, and the Chief Financial Officer, of the effectiveness of the design and operation of the Corporation s disclosure controls and procedures (as such term is defined in Rules 13-a 15(e) and 15d-15(e) under the Securities and Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on that evaluation the Corporation s management, including the Chairman and Chief Executive Officer, have concluded that, as of the end of such period, the Corporation s disclosure controls and procedures were effective in timely alerting them to material information relating to the Corporation (including its consolidated subsidiaries) required to be disclosed but the Corporation in the reports that it files or submits under the Exchange Act.

There was no change in the Corporation s internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the Corporation s fiscal quarter ended March 31, 2007 that has materially affected, or is reasonably likely to materially affect, the Corporation s internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Corporation and its subsidiaries are subject to routine litigation incidental to the business of banking. The litigation that is not routine and incidental to the business of banking is described below.

Shareholder s Derivative Litigation

Damon Trust v. Bittner, et al.

In an action styled *Virginia M. Damon Trust v. North Country Financial Corporation, Nominal Defendant, and Dennis Bittner, Bernard A. Bouschor, Ronald G. Ford, Sherry L. Littlejohn, Stanley J. Gerou II, John D. Lindroth, Stephen Madigan, Spencer Shunk, Michael Hendrickson, Glen Tolksdorf, and Wesley Hoffman*, filed in the U.S. District Court for the Western District of Michigan on July 1, 2003, a shareholder of the Corporation has brought a shareholder s derivative action under Section 27 of the Exchange Act against the Corporation and certain of its current and former directors and senior executive officers.

On November 11, 2003, the Corporation filed a motion, as permitted by section 495 of the MBCA, M.C.L.§ 450.1495, requesting the Court to appoint a disinterested person to conduct a reasonable investigation of the claims made by the plaintiff and to make a good faith determination whether the maintenance of the derivative action is in the best interests of the Corporation. After additional written submissions to the Court by the defendants and the plaintiff concerning the issues presented by this motion, and after several conferences with the Court, on May 20, 2004, the Court entered an Order adopting the parties written stipulations concerning the appointment of a disinterested person and the manner of conducting the investigation of the claims made by the plaintiff and making recommendations as to whether the maintenance of the derivative action is in the best interests of the Corporation. The Corporation is a named nominal defendant which requires the Corporation to cooperate with the defendants defense of the plaintiff s action. The Corporation is assisting the defendants in the discovery phase of this litigation and is incurring legal fees as a consequence of that cooperation. However, in total, the Corporation s primary purpose will be to monitor the process of this legal action and the Corporation does not expect to incur substantial legal fees related to the case.

Damon Trust v. Wipfli

This matter has been resolved and concluded with the Corporation receiving $470,000 in settlement proceeds. Please refer to the Annual Report for a more detailed description and explanation of this litigation.
