Common stock, No Par Value

New York Stock Exchange

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT:
NONE

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

The aggregate market value of the voting stock held by non-affiliates of the registrant was \$816,053,202 as of October 31, 2001. On October 31, 2001 the registrant had 40,841,501 shares of common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Definitive Proxy Statement to be filed for the Annual Meeting of Shareholders on February 13, 2002 are incorporated by reference into Part III of this report.

PART I

The terms "we," "our," "us" and "Atmos" refer to Atmos Energy Corporation and its subsidiaries, unless the context suggests otherwise. The abbreviations "Mcf," "MMcf" and "Bcf" mean thousand cubic feet, million cubic feet and billion cubic feet.

ITEM 1. BUSINESS

OPERATIONS

We distribute and sell natural gas to approximately 1.4 million residential, commercial, industrial, agricultural and other customers. We operate through five divisions in service areas located in Colorado, Georgia, Illinois, Iowa, Kansas, Kentucky, Louisiana, Missouri, Tennessee, Texas and Virginia. In addition, we transport natural gas for others through our distribution system.

We provide natural gas storage services and own or hold an interest in natural gas storage fields in Kansas, Kentucky and Louisiana to supplement natural gas used by customers in Kansas, Kentucky, Tennessee, Louisiana and other states. We also provide energy management and gas marketing services to industrial customers, municipalities and other local distribution companies. We also provide electrical power generation to meet peak load demands for a municipality regulated by the Tennessee Valley Authority. In addition, we market natural gas to industrial and agricultural customers primarily in West Texas and to industrial customers in Louisiana.

FORMATION

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

We were organized under the laws of Texas in 1983 as Energas Company, a subsidiary of Pioneer Corporation, for the purposes of owning and operating Pioneer's natural gas distribution business in Texas. Immediately following the transfer by Pioneer to Atmos of its gas distribution business, which Pioneer and its predecessors had operated since 1906, Pioneer distributed our outstanding stock to its shareholders. In September 1988, we changed our name from Energas Company to Atmos Energy Corporation. As a result of the merger with United Cities Gas Company in July 1997, we also became incorporated in Virginia.

RECENT DEVELOPMENTS

Completion of acquisition of remaining equity interest in Woodward Marketing. We acquired a 45 percent interest in Woodward Marketing, L.L.C. in 1997 as a result of the merger of Atmos and United Cities Gas Company, which had acquired that interest in 1995. In April 2001, we acquired the 55 percent interest in Woodward Marketing, L.L.C. that we did not already own in exchange for 1,423,193 restricted shares of our common stock. The consideration is subject to an upward adjustment, based on our share price, of up to 232,547 shares plus an amount of shares to compensate for dividends paid after the completion of the acquisition. As a result of the completion of the acquisition, the guaranty by one of our subsidiaries of Woodward Marketing's \$140.0 million short-term working capital and letter of credit facility increased from 45 percent to 100 percent of any amounts outstanding. Under the facility, as of September 30, 2001, \$28.0 million was outstanding, and letters of credit totaling \$38.8 million had been issued. Since April 1, 2001, our subsidiary has been the sole guarantor of all payables, up to \$40.0 million, of Woodward Marketing for natural gas purchases and transportation services.

Completion of acquisition of natural gas operations in Louisiana. In July 2001, we acquired from Citizens Communications Company the natural gas operations of its Louisiana Gas Service Company division and its subsidiary LGS Natural Gas Company for \$363.4 million in cash. Upon completion of the acquisition, we became the largest natural gas distributor in Louisiana, and our national customer base increased to about 1.4 million customers, making us the fifth largest pure natural gas local distribution company in the United States.

The acquired operations provide natural gas distribution service to approximately 279,000 residential and commercial meters in communities in southeastern and northern Louisiana. The service territory includes the suburban areas of metropolitan New Orleans (excluding Orleans Parish), the north shore of Lake Pontchar-

1

train and the Monroe/West Monroe metropolitan area. The unregulated operations, which include an intrastate pipeline company, provides gas transportation service to industrial customers and to the acquired operations.

Pending acquisition of Mississippi Valley Gas Company. In September 2001, we entered into a definitive agreement to acquire Mississippi Valley Gas Company, a privately held natural gas utility, for \$75.0 million cash, \$75.0 million of Atmos common stock and the assumption of approximately \$45.0 million of long-term debt. Mississippi Valley Gas provides natural gas distribution service to more than 261,500 residential, commercial, industrial and other customers located primarily in the northern and central regions of Mississippi. Mississippi Valley Gas has a 5,500 mile distribution system and 335 miles of intrastate pipeline. It also has two underground storage facilities with 2.05 Bcf of working gas capacity. The acquisition is subject to state and federal regulatory approval. It is anticipated that the acquisition will be completed in fiscal 2002.

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

Atmos Power Systems, Inc. constructs power plant. In May 2001, our subsidiary, Atmos Power Systems, Inc., entered into a definitive agreement with the City of Bolivar, Tennessee Electric Department to construct a 20-megawatt electric generating plant and associated facilities. Atmos Power Systems leased the peaking plant to the Electric Department of the City of Bolivar for 10 years, with an option for Bolivar to purchase the plant beginning in the fifth year of the lease. Because of the success of this first project, Atmos is considering other opportunities to build and lease power plants. Although results to date have not been material, we anticipate growth in this type of business.

Acquisition of Southern Resources, IGS and Kentucky storage assets. Woodward Marketing completed the purchases of Southern Resources, Inc. and certain assets of Innovative Gas Services, Incorporated in the fourth quarter of fiscal year 2001 thereby expanding our gas marketing operations. We expect to complete the acquisition of certain storage assets in Kentucky in the first quarter of fiscal year 2002. The acquisition will enable us to provide additional gas storage capacity. Total cost of the acquisitions is approximately \$16.0 million in cash.

STRATEGY

Our overall strategy is to:

- deliver superior shareholder value,
- continue to manage our utility operations efficiently,
- profitably grow our non-utility operations to complement our utility operations, and
- profitably grow our business through acquisitions.

We are running our operations efficiently by:

- managing our operating and maintenance expenses,
- leveraging our technology, such as our 24 hour call center, to achieve more efficient operations,
- focusing on regulatory rate proceedings to increase revenue,
- mitigating weather-related risks through weather normalized rates in some jurisdictions and purchasing weather insurance in others, and
- disposing of non-growth assets.

We are growing our non-utility operations by:

- completing the purchase of the remaining interest in Woodward Marketing,
- increasing our non-regulated gas sales, and
- entering into new non-utility businesses, such as distributed electrical power generation.

We are growing our utility business by acquiring natural gas operations, such as Louisiana Gas Service Company and LGS Natural Gas Company in July 2001

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

and the pending acquisition of Mississippi Valley Gas Company.

Our operations are divided into two segments, a utility operations segment, which includes our natural gas distribution and sales operations, and our non-regulated segment, which includes all of our other operations.

UTILITY OPERATIONS SEGMENT OVERVIEW

Our utility operations segment is operated through our five regulated natural gas divisions:

- Atmos Energy Louisiana Gas Company,
- Energas Company,
- Greeley Gas Company,
- United Cities Gas Company, and
- Western Kentucky Gas Company

Atmos Energy Louisiana. Our Atmos Energy Louisiana Gas division includes the operations of the assets of Louisiana Gas Service Company acquired in July 2001 and our previously existing Trans Louisiana Gas division. Our Atmos Energy Louisiana Gas division operates in Louisiana and is regulated by the Louisiana Public Service Commission, which regulates utility services, rates and other matters. In most of the areas in which we operate in Louisiana, we do so pursuant to a non-exclusive franchise granted by the governing authority of each area. Direct sales of natural gas to industrial customers in Louisiana, who use gas for fuel or in manufacturing processes, and sales of natural gas for vehicle fuel are exempt from regulation.

In connection with its review of our acquisition of Louisiana Gas Service, the Louisiana Public Service Commission has approved a rate structure that requires us to share any cost savings that result from the acquisition with the customers of Louisiana Gas Service. The shared cost savings will be the difference between operation and maintenance expense in any future year and the 1998 normalized expense for Louisiana Gas Service, indexed for inflation, annual changes in labor costs and customer growth. The customers are not assured any savings in 2001. In 2002 and in future years, the customers are assured annual savings, which will be indexed for inflation, annual changes in labor costs and customer growth. The sharing mechanism will remain in place for 20 years subject to established modification procedures.

The rates of Louisiana Gas Service are subject to a purchased gas adjustment clause that allows it to pass changes in gas costs on to its customers. In addition, on January 29, 2001, the Louisiana Public Service Commission approved a rate stabilization clause for Louisiana Gas Service for a three-year period beginning January 1, 2001. Under the rate stabilization clause, Louisiana Gas Service will be allowed to earn a return on equity within certain ranges that will be monitored on an annual basis. After the completion of the acquisition of Louisiana Gas Service, our Atmos Energy Louisiana division also became subject to the adjustment and stabilization clause.

Louisiana Gas Service is currently involved in a proceeding with the Louisiana Public Service Commission relating to past costs associated with the purchase of gas that it charged to its customers. Although, after completion of the acquisition, we took over the defense of this proceeding and will have responsibility for any finding of liability on the part of Louisiana Gas Service, we believe the outcome of this proceeding will not have a material adverse impact on our operations as Citizens has agreed to fully indemnify us for any liability as a result of this proceeding.

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

The Louisiana Public Service Commission approved a Rate Stabilization Clause for three years for our former Trans La Division with an allowed return on common equity between 10.5 percent and 11.5 percent. This decision increased the service charge amounts from about 20 percent to about 70 percent of actual costs and increased the monthly customer charges from \$6 to \$9, both effective November 1, 1999.

3

At and for the year ended September 30, 2001, we had 368,436 utility meters in service in Louisiana and total throughput of 12,578 MMcf. At and for the year ended September 30, 2000, we had 81,419 meters in service and total throughput of 7,448 MMcf.

Energas. Our Energas division operates in Texas. The governing body of each municipality we serve has original jurisdiction over all utility rates, operations and services within its city limits, except with respect to sales of natural gas for vehicle fuel and agricultural use. We operate pursuant to non-exclusive franchises granted by the municipalities we serve, which are subject to renewal from time to time. The Railroad Commission of Texas has exclusive appellate jurisdiction over all rate and regulatory orders and ordinances of the municipalities and exclusive original jurisdiction over rates and services to customers not located within the limits of a municipality. The Railroad Commission is currently conducting a gas cost audit of all local distribution companies in Texas, including Energas, in response to the high gas costs this past winter. At and for the year ended September 30, 2001, we had 314,734 utility meters in service and total throughput of 53,586 MMcf. At and for the year ended September 30, 2000, we had 302,662 utility meters in service and total throughput of 53,922 MMcf.

Greeley Gas. Our Greeley Gas division operates in Colorado, Kansas and Missouri and is regulated by the respective states' public service commission with respect to accounting, rates and charges, operating matters and the issuance of securities. We operate under terms of non-exclusive franchises granted by the various cities. At and for the year ended September 30, 2001, Greeley had 212,484 utility meters in service and total throughput of 37,797 MMcf. At and for the year ended September 30, 2000, Greeley had 207,161 meters in service and total throughput of 34,455 MMcf.

United Cities. Our United Cities Gas division operates in Georgia, Illinois, Iowa, Missouri, Tennessee and Virginia. In each of these states, our rates, services and operations as a natural gas distribution company are subject to general regulation by each state's public service commission. We operate in each community, where necessary, under a franchise granted by the municipality for a fixed term of years. In Tennessee and Georgia, we have performance based rates, which provide incentives for us to find ways to lower costs. Any cost savings are then shared with our customers. We also have weather normalization adjustments to our rates in Tennessee and Georgia. At and for the year ended September 30, 2001, United Cities had 308,394 utility meters in service and total throughput of 64,924 MMcf. At and for the year ended September 30, 2000, United Cities had 312,018 meters in service and total throughput of 56,698 MMcf.

Western Kentucky Gas. Our Western Kentucky Gas division operates in Kentucky and is regulated by the Kentucky Public Service Commission, which regulates utility services, rates, issuance of securities and other matters. We operate in the various incorporated cities pursuant to non-exclusive franchises granted to us by these cities. Sales of natural gas for use as vehicle fuel in Kentucky are unregulated. We have been operating under a performance based rate

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

program since July 1998. We also have weather normalization adjustments to our rates in Kentucky. At and for the year ended September 30, 2001, Western Kentucky Gas had 182,275 utility meters in service and total throughput of 46,530 MMcf. At and for the year ended September 30, 2000, Western Kentucky Gas had 181,066 meters in service and total throughput of 47,129 MMcf.

NON-REGULATED SEGMENT OVERVIEW

Our non-regulated segment is primarily composed of the following three parts:

- Atmos Energy Marketing, LLC. Atmos Energy Marketing provides a variety of natural gas management services to natural gas utility systems and industrial natural gas consumers in several states and to our Atmos Energy Louisiana Gas, Greeley Gas, United Cities Gas and Western Kentucky Gas divisions. These services consist primarily of acquisition and provision of natural gas supplies at fixed and market-based prices, load forecasting and management, gas storage and transportation services, peaking sales and balancing services and gas price hedging through the use of derivative products. Woodward Marketing, L.L.C. is a wholly owned subsidiary of Atmos Energy Marketing.

4

- Atmos Pipeline and Storage, L.L.C. Atmos Pipeline and Storage owns or has an interest in underground storage fields in Kansas, Kentucky and Louisiana and provides storage services to our United Cities Gas, Greeley Gas and Atmos Energy Louisiana Gas divisions and other non-regulated customers.
- Atmos Power Systems, Inc. Atmos Power Systems constructs and operates electrical power generating plants and associated facilities. Atmos Power Systems may also enter into agreements to either lease or sell such plants.

WOODWARD MARKETING ACTIVITIES

We acquired a 45 percent interest in Woodward Marketing, L.L.C. in 1997 as a result of the merger of Atmos and United Cities Gas Company, which had acquired that interest in 1995. In April 2001, we acquired the 55 percent interest that we did not own from J.D. Woodward and others for 1,423,193 restricted shares of our common stock. Immediately following the acquisition, Mr. Woodward was elected as a Senior Vice President of Atmos in charge of all non-regulated business activities, a position he has held since April 2001. Prior to that time, Mr. Woodward had not been an officer or employee of Atmos.

The principal business of Woodward Marketing, including the activities of Trans Louisiana Industrial Gas Company, Inc., is the overall management of natural gas requirements for municipalities, local gas utility companies and industrial customers located primarily in the Southwestern and Midwestern United States. This business involves the sale of natural gas by Woodward Marketing to its customers and the management of storage and transportation contracts for its customers under contracts generally having one to two-year terms. At September 30, 2001, Woodward Marketing had a total of 78 municipal and local gas utility customers and 195 industrial customers. Woodward Marketing also sells natural gas to certain of its industrial customers on a delivered burner tip basis under contract terms from 30 days to two years. In addition, Woodward Marketing supplies us with a portion of our natural gas requirements on a competitive bid basis.

In the management of natural gas requirements for municipal and other local

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

utilities, Woodward Marketing sells physical natural gas for future delivery and hedges the associated price risk through the use of gas futures, including forwards, over-the-counter and exchange-traded options, and swap contracts with counterparties. These financial contracts are marked-to-market at the daily close of business. Woodward Marketing links gas futures to physical delivery of natural gas and balances its futures positions at the end of each trading day. Over-the-counter swap agreements require Woodward Marketing to receive or make payments based on the difference between a fixed price and the market price of natural gas on the settlement date. Woodward Marketing uses these futures and swaps to manage margins on offsetting fixed-price purchase or sale commitments for physical quantities of natural gas, which are also carried on a mark to market basis. Options held to hedge price risk provide the right, but not the requirement, to buy or sell energy commodities at a fixed price. Woodward Marketing uses options to manage margins and to limit overall price risk exposure.

Energy related services provided by Woodward Marketing include the sale of natural gas to its various customer classes and management of transportation and storage assets and inventories. More specifically, energy services include contract negotiation and administration, load forecasting, storage acquisition, natural gas purchase and delivery and capacity utilization strategies. In providing these services, Woodward Marketing generates income from its utility, municipal and industrial customers through negotiated prices based on the volume of gas supplied to the customer. Woodward Marketing also generates income by taking advantage of the difference between near-term gas prices and prices for future delivery as well as the daily movement of gas prices by utilizing storage and transportation capacity that it controls.

Woodward Marketing also engages in limited speculative natural gas trading for its own account, subject to a risk management policy established by us which limits the level of trading loss in any fiscal year to a maximum of 25 percent of the budgeted annual operating income of Woodward Marketing. Compliance with such risk management policy is monitored on a daily basis. In addition, Woodward Marketing's bank credit facility limits trading positions that are not closed at the end of the day (open positions) to 2.5 Bcf of natural gas. At September 30, 2001, Woodward Marketing's open positions in its trading operations totaled 2.3 Bcf. In its speculative trading, Woodward Marketing's open trading positions are monitored on a daily basis but are

5

not required to be closed if they remain within the limits set by the bank loan agreement. Woodward Marketing had an unrealized trading gain of \$4.5 million for the fiscal year ended September 30, 2001, but there can be no assurance that Woodward Marketing will have any speculative trading gain in the future. In some prior years, Woodward Marketing has experienced losses in its speculative trading business. The financial exposure that results from the daily fluctuations of gas prices and the potential for daily price movements constitutes a risk of loss since the price of natural gas purchased for future delivery at the beginning of the day may not be hedged until later in the day.

Financial instruments, which subject Woodward Marketing to counterparty risk, consist primarily of financial instruments arising from trading and risk management activities and overnight repurchase agreements that are not insured. Counterparty risk is the risk of loss from nonperformance by financial counterparties to a contract. Exchange-traded future and option contracts are generally guaranteed by the exchanges.

Woodward Marketing's operations are concentrated in the natural gas industry, and its customers and suppliers may be subject to economic risks affecting that industry.

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

OPERATING STATISTICS

The following table shows the operating statistics of Atmos for each of the five fiscal years from 1997 through 2001. It is followed by two additional tables that show utility only sales and operating statistics by business unit for 2001 and 2000. Certain prior year amounts have been reclassified to conform with the current year presentation.

See footnotes following these tables.

Notes to preceding tables:

- (1) Prior to August 2000, propane revenues and expenses were fully consolidated. Subsequent to August 2000, the results of propane are shown on the equity basis.

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

(2) A heating degree day is equivalent to each degree that the average of the high and the low temperatures for a day is below 65 degrees. The colder the climate, the greater the number of heating degree days. Heating degree days are used in the natural gas industry to measure the relative coldness of weather experienced and to compare relative temperatures between one geographic area and another. Normal degree days are based on 30-year average National Weather Service data for selected locations. Degree day information for 2001 and 2000 are presented excluding service areas with weather normalized operations. Degree day information for 1999, 1998 and 1997 does not exclude service areas with weather normalized operations as that information was not available.

9

- (3) These tables present data for our five utility business units. Their operations include the regulated local distribution companies located in their respective service areas. The operations of Louisiana Gas are included in Atmos Energy Louisiana since July 1, 2001, the date of acquisition.
- (4) Utility sales volumes and revenues reflect utility segment operations, including intercompany sales and transportation amounts.
- (5) The number of employees excludes 480 and 369 Atmos shared services and customer support center employees and 62 and 28 non-utility employees in 2001 and 2000.

SEGMENT OVERVIEW

We consider each business unit within our utility segment to be a reporting unit of the utility segment and not a reportable segment. Our chief executive officer makes decisions about allocating resources to the utility segment as a whole and not to individual reporting units.

The following table summarizes certain information regarding the operations of the utility and non-regulated segments of Atmos as of and for each of the three years ended September 30, 2001. The information is net of intersegment eliminations.

	UTILITY	NON- REGULATED	TOTAL
(IN THOUSANDS)			
2001			
Operating revenues.....	\$1,378,159	\$ 64,116	\$1,442,275

Identifiable assets.....	1,125,691	104,846	1,230,537

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

The utility segment is composed of our five regulated utility divisions: the Atmos Energy Louisiana Gas Division which operates in Louisiana, the Energas Division which operates in Texas, the Greeley Gas Division which operates in Colorado, Kansas and Missouri, the United Cities Gas Division which operates in Georgia, Illinois, Iowa, Missouri, Tennessee and Virginia and the Western Kentucky Gas Division which operates in Kentucky. For further discussion on the utility segment operations, see "Utility Operations Segment Overview".

For a further discussion of our non-regulated segment operations see "Non-Regulated Segment Overview".

GAS SALES

Our natural gas distribution business is seasonal and highly dependent on weather conditions in our service areas. Gas sales to residential and commercial customers are greater during the winter months than during the remainder of the year. The volumes of gas sales during the winter months will vary with the temperatures during these months. The seasonal nature of our sales to residential and commercial customers is

10

partially offset by our sales in the spring and summer months to our agricultural customers in Texas, Colorado and Kansas who use natural gas to operate irrigation equipment.

In addition to weather, our revenues are affected by the cost of natural gas and economic conditions in the areas that we serve. Higher gas costs, which we are generally able to pass through to our customers under purchased gas adjustment clauses, may cause customers to conserve, or, in the case of industrial customers, to use alternative energy sources.

To protect against volatility in gas prices, we are hedging gas costs for the 2001-2002 heating season by utilizing a combination of financial tools and fixed forward physical contracts to stabilize gas prices. For the 2001-2002 heating season, we plan to cover approximately 64 percent of our anticipated requirements through storage and hedging instruments. The gas hedges should help moderate the effects of higher customer accounts receivable caused by higher gas prices.

We also have weather normalization adjustments in our rate jurisdictions in Tennessee, Georgia and Kentucky. We purchased weather hedges for our Texas and Louisiana operations effective for the 2000-2001 heating season. We also purchased a three-year weather insurance policy for our Texas and Louisiana operations commencing with the 2001-2002 heating season, with an option to cancel in the third year. The policy covers the entire heating season of October to March. See "Weather and seasonality" in Management's Discussion and Analysis of Operations.

Our distribution systems have experienced aggregate peak day deliveries of approximately 2.0 Bcf per day. We have the ability to curtail deliveries to certain customers under the terms of interruptible contracts and applicable state statutes or regulations which enable us to maintain our deliveries to high priority customers. We have not imposed curtailment in our Energas Division since we began independent operations in 1983 or in our Atmos Energy Louisiana Gas Division since we acquired Trans Louisiana Gas Company in 1986 and Louisiana Gas Service in 2001. The Western Kentucky Gas Division curtailed deliveries to certain interruptible customers during exceptionally cold periods in December 1989, January 1994 and during the winter of 1996. Neither the Greeley Gas Division nor its predecessor, Greeley Gas Company, has curtailed deliveries to its sales customers since prior to 1980. The United Cities Gas Division curtails

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

interruptible service customers from time to time each year in accordance with the interruptible contracts and tariffs.

GAS SUPPLY

We receive gas deliveries through 35 pipeline transportation companies, both interstate and intrastate, to satisfy our sales market requirements. The pipeline transportation agreements are firm and many of them have pipeline no-notice storage service which provides for daily balancing between system requirements and nominated flowing supplies. These agreements have been negotiated with the shortest term necessary while still maintaining our right of first refusal.

The Western Kentucky Gas Division's gas supply is delivered primarily by the following pipelines: Williams Pipeline-Texas Gas, Tennessee Gas, Trunkline, Midwestern Pipeline and ANR. During 1998, the Western Kentucky Gas Division sought and was granted approval by the Kentucky Public Service Commission for a performance-based rate program which commenced in July 1998. Under the performance-based program, we and our customers jointly share in any actual gas cost savings achieved when compared to pre-determined benchmarks. We also have similar gas cost performance-based rate mechanisms in Georgia and Tennessee.

The United Cities Gas Division is served by 13 interstate pipelines. The majority of the volumes are transported through East Tennessee Pipeline, Southern Natural Gas, Tennessee Gas Pipeline and Columbia Gulf.

Colorado Interstate Gas Company, Williams Pipeline-Central, Public Service Company of Colorado and Northwest Pipeline are the principal transporters of the Greeley Gas Division's requirements. Additionally, the Greeley Gas Division purchases substantial volumes from producers that are connected directly to its distribution system.

11

The Energas Division receives sales and transportation service from various ONEOK pipeline affiliates. Also, the Energas Division purchases a significant portion of its supply from Pioneer Natural Resources which is connected directly to our Amarillo, Texas distribution system.

Louisiana Intrastate Gas Company, Acadian Pipeline, Gulf South and Williams Pipeline-Texas Gas pipelines deliver most of the Atmos Energy Louisiana Gas Division's requirements.

We also own or hold an interest in and operate numerous natural gas storage facilities in Kentucky, Kansas and Louisiana which are used to help meet customer requirements during peak demand periods and to reduce the need to contract for additional pipeline capacity to meet such peak demand periods. Additionally, we operate one propane plant and a liquified natural gas plant for peak shaving purposes. We also contract for storage service in underground storage facilities on many of the interstate pipelines serving us. See "Item 2. Properties" below for further information regarding the peak shaving facilities.

We normally inject gas into pipeline storage systems and company owned storage facilities during the summer months and withdraw it in the winter months. Our underground storage facilities in Kansas, Kentucky and Louisiana have a combined maximum daily output capability of approximately 226,000 Mcf.

We purchase our gas supply from various producers and marketers. Supply arrangements are contracted on a firm basis with various terms at market prices. The firm supply consists of both base load and swing supply quantities. Base load quantities are those that flow at a constant level throughout the month and

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

swing supply quantities provide the flexibility to change daily quantities to match increases or decreases in requirements related to weather conditions. Except for local production purchases, we select suppliers through a competitive bidding process by sending out a request for proposal to suppliers that have demonstrated that they can provide reliable service. We select these suppliers based on their ability to deliver gas supply to our designated firm pipeline receipt points and the best cost. Major suppliers during fiscal 2001 were Reliant Energy, Sonat Marketing, Cinergy, Pioneer Natural Resources, Texaco, Woodward Marketing, ONEOK Gas Marketing, Aquila, BP Energy, Enron, Enbridge, Anadarko and Tenaska Marketing. We do not anticipate problems with securing additional gas supply as needed for our customers.

REGULATION

Each of our utility divisions is regulated by various state or local public utility authorities. We are also subject to regulation by the United States Department of Transportation with respect to safety requirements in the operation and maintenance of our gas distribution facilities. Our distribution operations are also subject to various state and federal laws regulating environmental matters. From time to time we receive inquiries regarding various environmental matters. We believe that our properties and operations substantially comply with and are operated in substantial conformity with applicable safety and environmental statutes and regulations. There are no administrative or judicial proceedings arising under environmental quality statutes pending or known to be contemplated by governmental agencies which would have a material adverse effect on us or our operations.

RATES

The method of determining regulated rates varies among the states in which we operate. The regulators have the responsibility of ensuring that utilities under their jurisdiction operate in the best interests of customers while providing the utilities the opportunity to earn a reasonable return on investment. In a general rate case, the applicable regulatory authority, which is typically the state public utility commission, establishes a base margin, which is the amount of revenue authorized to be collected from customers to recover authorized operating expense (other than the cost of gas), depreciation, interest, taxes and return on rate base. The divisions in our utility operations segment perform annual deficiency studies for each rate jurisdiction to determine when to file rate cases, which are typically filed every two to five years.

Substantially all of the sales charged by us to our customers fluctuate with the cost of gas purchased by us. Rates established by regulatory authorities are adjusted for increases and decreases in our purchased gas cost through purchased gas adjustment mechanisms. Purchased gas adjustment mechanisms provide gas

utilities a method of recovering purchased gas costs on an ongoing basis without the necessity of a rate case addressing all of the utilities' non-gas costs. These mechanisms are commonly utilized when regulatory authorities recognize a particular type of expense, such as purchased gas costs, that (i) is subject to significant price fluctuations compared to the utility's other costs, (ii) represents a large component of the utility's cost of service and (iii) is generally outside the control of the gas utility. Such purchased gas adjustment mechanisms are not designed to allow the utility to earn a profit but are designed to allow a dollar-for-dollar recovery of fuel costs. Therefore, while our operating revenues may fluctuate, gross profit (which is defined as operating revenues less purchased gas cost) is generally not eroded or enhanced

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

because of gas cost increases or decreases.

Approximately 96 percent of our revenues in the fiscal year ended September 30, 2001, and approximately 87 percent of our revenues in fiscal 2000 were derived from sales at rates set by or subject to approval by local or state authorities. Generally, the regulatory authority reviews our rate request and establishes a rate structure intended to generate revenue sufficient to cover our costs of doing business and provide a reasonable return on invested capital.

The following table sets forth major rate requests made by us or other parties during the most recent five years and the action taken on such requests:

JURISDICTION -----	EFFECTIVE DATE -----	AMOUNT REQUESTED -----	AMOUNT RECEIVED (REDUCED) -----
(IN THOUSANDS)			
Texas			
West Texas System.....	11/01/96	\$ 7,676	\$ 5,800 (a)
	12/01/00	9,827	3,011
Amarillo System.....	01/01/00	4,354	2,200
Louisiana.....	11/01/99	(b)	-- (b)
Kentucky.....	12/21/99	14,127	9,900 (c)
Colorado.....	01/21/98	--	(1,600) (d)
	05/04/01	4,200	2,750
Iowa.....	03/05/01	(e)	(326) (e)
Georgia.....	12/02/96	5,003	3,160
Illinois.....	07/09/97	1,234	428
	10/23/00	2,100	1,367
Virginia.....	10/01/98	--	(248) (f)
	04/01/01	2,100	(534)

(a) This increase includes \$500,000 applicable to areas outside the city limits which became effective in April 1997.

(b) The Louisiana Public Service Commission approved a Rate Stabilization Clause for three years for our former Trans La Division with an allowed return on common equity between 10.5 percent and 11.5 percent. This decision increased the service charge amounts from about 20 percent to about 70 percent of actual costs and increased the monthly customer charges from \$6 to \$9, both effective November 1, 1999.

(c) The Kentucky rate order also included a provision for a five-year pilot program for weather normalization which began in November 2000.

(d) Rate reduction as a result of settlement in a case initiated by the Colorado Consumer Council.

(e) Rate reduction as a result of an agreement initiated by the Iowa Consumer Advocate Division of the Department of Justice.

(f) Rate reduction as a result of a settlement with the Virginia State Corporation Commission staff.

COMPETITION

We are not currently in significant direct competition with any other distributors of natural gas to residential and commercial customers within our service areas. However, we do compete with other natural gas suppliers and suppliers of alternate fuels for sales to industrial and agricultural customers. We compete in all aspects of our business with alternative energy sources, including, in particular, electricity. Competition for residential and commercial customers is increasing. Promotional incentives, improved equipment efficiencies and promotional rates all contribute to the acceptability of electrical equipment. Electric utilities offer electricity as a rival energy source and compete for the space heating, water heating and cooking markets. The principal means to compete against alternative fuels is lower prices, and natural gas historically has maintained its price advantage in the residential, commercial and industrial markets. In addition, through Atmos Energy Marketing, we compete with other natural gas brokers in obtaining natural gas supplies for customers.

EMPLOYEES

At September 30, 2001, we had 2,361 employees. See "Utility Sales and Statistical Data by Business Unit" for the number of employees by business unit.

ITEM 2. PROPERTIES

We own an aggregate of 38,938 miles of underground distribution and transmission mains throughout our gas distribution systems. These mains are located on easements or rights-of-way which generally provide for perpetual use. We maintain our mains through a program of continuous inspection and repair and believe that our system of mains is in good condition. We also own and operate one propane peak shaving plant with a total capacity of approximately 180,000 gallons that can produce an equivalent of approximately 3,300 Mcf daily. We also own a liquefied natural gas storage facility with a capacity of 500,000 Mcf which can inject a daily volume of 30,000 Mcf into the system, as well as underground storage fields, as discussed below, that are used to supplement the supply of natural gas in periods of peak demand.

We have six underground gas storage facilities in Kentucky and four in Kansas. We own a 25 percent interest in a gas storage facility in Napoleonville, Louisiana. This gas storage facility is operated by Acadian Gas Pipeline System who also owns the remaining 75 percent interest. Our 25 percent usable capacity is 364,782 Mcf. In addition to the usable capacity we maintain 332,917 Mcf of cushion gas to maintain reservoir pressure. The Napoleonville facility has a maximum daily delivery capability of approximately 56,000 Mcf. We also have a contract through March 2003 with Bridgeline Gas Distribution LLC for 250,000 Mcf of usable storage capacity in a storage facility in Sorrento, Louisiana. The Sorrento facility has a maximum daily delivery capability of approximately 25,000 Mcf.

Our total storage capacity is approximately 21.9 Bcf. However, approximately 10.3 Bcf of gas in the storage facilities must be retained as cushion gas to maintain reservoir pressure. The maximum daily delivery capability of these storage facilities is approximately 226,000 Mcf.

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

Substantially all of our properties in our Greeley Gas Division and United Cities Gas Division with net book values of approximately \$174.4 million and \$314.1 million are subject to liens under First Mortgage Bonds assumed in our mergers with Greeley Gas Company and United Cities Gas Company. At September 30, 2001, the liens collateralized \$17.0 million of outstanding 9.4 percent Series J First Mortgage Bonds due May 1, 2021, and \$92.2 million of outstanding Series P, Q, R, T, U and V First Mortgage Bonds due at various dates from 2004 through 2022.

Our administrative offices are consolidated in Dallas, Texas under one lease. We also maintain field offices throughout our distribution system, the majority of which are located in leased premises.

Net property, plant and equipment at September 30, 2001 included approximately \$1,280.6 million for utility and \$54.8 million for non-regulated.

14

We hold franchises granted by the incorporated cities and towns that we serve. At September 30, 2001, we held 544 such franchises having terms generally ranging from five to 25 years. We believe that each of our franchises will be renewed.

ITEM 3. LEGAL PROCEEDINGS

See Note 5 of notes to consolidated financial statements.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of security holders during the fourth quarter of fiscal 2001.

EXECUTIVE OFFICERS OF THE REGISTRANT

The following table sets forth certain information as of September 30, 2001, regarding the executive officers of the Company. It is followed by a brief description of the business experience of each executive officer.

NAME ----	AGE ---	YEARS OF SERVICE -----	OFFICE CURRENTLY HELD -----
Robert W. Best.....	54	4	Chairman, President and Chief Executive Officer
John P. Reddy.....	48	3	Senior Vice President and Chief Financial Officer
R. Earl Fischer.....	62	39	Senior Vice President, Utility Operations
J. D. Woodward III.....	51	--	Senior Vice President, Non-Utility Operations
Louis P. Gregory.....	46	1	Senior Vice President and General Counsel
Wynn D. McGregor.....	48	13	Vice President, Human Resources

Robert W. Best was named Chairman of the Board, President and Chief Executive Officer in March 1997. He previously served as Senior Vice President -- Regulated Businesses of Consolidated Natural Gas Company

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

(1996-March 1997) and was responsible for its transmission and distribution companies.

John P. Reddy was named Senior Vice President and Chief Financial Officer in September 2000. From April 2000 to September 2000, he was Senior Vice President, Chief Financial Officer and Treasurer. Mr. Reddy previously served the Company as Vice President, Corporate Development and Treasurer from December 1998 to March 2000. He joined the Company in August 1998 from Pacific Enterprises, a Los Angeles, California based utility holding company whose principal subsidiary was Southern California Gas Co. where he was Vice President of Planning and Advisory Services responsible for corporate development and merger and acquisition activities. Mr. Reddy was with Pacific Enterprises from 1980 to 1998 in various management and financial positions.

R. Earl Fischer was named Senior Vice President, Utility Operations in May 2000. He previously served the Company as President of the Energas Division from January 1999 to April 2000 and as President of the Western Kentucky Division from February 1989 to December 1998.

J. D. Woodward was named Senior Vice President, Non-Utility Operations in April 2001. Prior to joining the Company, Mr. Woodward was President of Woodward Marketing, LLC from January 1995 to March 2001.

Louis P. Gregory joined the Company as Senior Vice President and General Counsel in September 2000. Prior to joining the Company, he practiced law from April 1999 to August 2000 with the law firm of McManemin & Smith. Prior to that, he served as a consultant and independent contractor from August 1996 to December 1998 for Nomas Corp. (formerly known as Lomas Mortgage USA, Inc.) and Siena Holdings, Inc. (formerly known as Lomas Financial Corporation).

15

Wynn D. McGregor was named Vice President, Human Resources in January 1994. He previously served the Company as Director of Human Resources from February 1991 to December 1993 and as Manager, Compensation and Employment from December 1987 to January 1991.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Our stock trades on the New York Stock Exchange under the trading symbol "ATO." The high and low sale prices and dividends paid per share of our common stock for fiscal 2001 and 2000 are listed below. The high and low prices listed are the actual closing NYSE quotes for shares of our common stock.

	HIGH	LOW	DIVIDENDS PAID

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

INTRODUCTION

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

This section provides management's discussion of the financial condition, cash flows and results of operations of Atmos Energy Corporation with specific information on liquidity, capital resources and results of operations. It includes management's interpretation of such financial results, the factors affecting these results, the major factors expected to affect future operating results and future investment and financing plans. This discussion should be read in conjunction with the Company's consolidated financial statements and notes thereto.

CAUTIONARY STATEMENT FOR THE PURPOSES OF THE SAFE HARBOR UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

The statements contained in this Annual Report on Form 10-K may contain "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical fact included in this Report are forward-looking statements made in good faith by the Company and are intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. When used in this Report, or any other of the Company's documents or oral presentations, the words "anticipate," "expect," "estimate," "plans," "believes," "objective," "forecast," "goal" or similar words are intended to identify forward-looking statements. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in the statements relating to the Company's strategy, operations, markets, services, rates, recovery of costs, availability of gas supply and other factors. These risks and uncertainties include the following: adverse weather conditions such as warmer than normal weather in the Company's service territories; national, regional and local economic conditions, including competition from other energy suppliers as well as alternative forms of energy; recent national events; regulatory approvals, including the impact of rate proceedings before various state regulatory commissions; successful completion and integration of pending acquisition; inflation and increased gas costs, including their effect on commodity prices for natural gas; increased competition; further deregulation or "unbundling" of the natural gas distribution industry; hedging and market risk activities and other uncertainties, all of which are difficult to predict and many of which are beyond the control of the Company. Accordingly, while the Company believes these forward-looking statements to be reasonable, there can be no assurance that they will approximate actual experience or that the

17

expectations derived from them will be realized. Further, the Company undertakes no obligation to update or revise any of its forward-looking statements whether as a result of new information, future events or otherwise.

RATEMAKING ACTIVITY

The following is a discussion of our ratemaking activity for rate cases that are currently pending as of September 30, 2001 or rate proceedings completed during the three years ended September 30, 2001.

Results of our rate activity for the three years ended September 30, 2001 can be summarized as follows: net annual rate increases totaling \$6.4 million implemented in 2001, annual rate increases totaling \$12.1 million implemented in 2000 and no rate changes in 1999.

In August 1999, the Energas Division filed rate cases in its West Texas System cities and Amarillo, Texas, requesting rate increases of approximately \$9.8 million and \$4.4 million. The Energas Division received an increase in

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

annual revenues of approximately \$2.1 million in base rates plus an increase of \$.1 million in service charges in Amarillo, Texas, effective for bills rendered on or after January 1, 2000. The agreement with Amarillo also provided for changes in the rate structure to reduce the impact of warmer than normal weather and to improve the recovery of the actual cost of service calls. The Energas Division's request for an annual increase of approximately \$9.8 million from the 67 cities served by its West Texas System was denied. In March 2000, this decision was appealed to the Railroad Commission of Texas. Subsequently, 59 cities representing approximately 58 percent of Energas' customers ratified a non-binding Settlement Agreement. The Settlement Agreement capped the rate increase at \$3.0 million and entitled the ratifying cities to accept a rate increase below \$3.0 million in the event the Railroad Commission adopted a lesser increase for the non-ratifying cities. Eight cities declined to participate in the settlement and a hearing with the Railroad Commission was held in August 2000. In December 2000, the Railroad Commission approved an increase in annual revenues of approximately \$3.0 million effective December 1, 2000. In addition, the Railroad Commission approved a new rate design providing more protection from warmer than normal weather for our West Texas System.

In June 1999, the Trans La operations of the Atmos Energy Louisiana Gas Division appeared before the Louisiana Public Service Commission for a rate investigation and to redesign rates to mitigate the effects of warm winter weather. A decision was rendered by the Louisiana Commission in October 1999 that increased service charges associated with customer service calls and increased the monthly customer charges from \$6 to \$9, both effective November 1, 1999. While these changes are revenue neutral, they have mitigated the impact of warmer than normal winter weather on earnings. The decision also included a three-year rate stabilization clause which will allow the Trans La operations of Atmos Energy Louisiana Gas Division's rates to be adjusted annually to allow us to earn a minimum return on equity of 10.5 percent.

In connection with its review of our acquisition of Louisiana Gas Service, the Louisiana Public Service Commission approved a rate structure that requires us to share any cost savings that result from the acquisition with the customers of Louisiana Gas Service. The shared cost savings will be the difference between operation and maintenance expense in any future year and the 1998 normalized expense for Louisiana Gas Service, indexed for inflation, annual changes in labor costs and customer growth. The customers are not assured any savings in 2001. In 2002 and in future years, the customers are assured annual savings, which will be indexed for inflation, annual changes in labor costs and customer growth. The sharing mechanism will remain in place for 20 years subject to established modification procedures.

In May 1999, the Western Kentucky Gas Division requested from the Kentucky Public Service Commission an increase in revenues, a weather normalization adjustment and changes in rate design to shift a portion of revenues from commodity charges to fixed rates. In December 1999, the Kentucky Commission granted an increase in annual revenues of approximately \$9.9 million. The new rates were effective for services rendered on or after December 21, 1999. In addition, the Kentucky Commission approved a five-year pilot program for weather normalization beginning in November 2000.

On June 9, 1998, the Kentucky Commission issued an Order approving a three year experimental Performance-based Ratemaking mechanism related to gas procurement and gas transportation activities filed

by the Western Kentucky Gas Division. The Performance-based Ratemaking mechanism is incorporated into the Western Kentucky Gas Division's gas cost adjustment clause. As discussed above, it provides for sharing of purchased gas cost

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

savings between the consumers and us. We recognized other income of \$0.2 million and \$2.1 million under the Kentucky Performance-based Ratemaking mechanism in fiscal 2001 and fiscal 2000. The experimental Performance-based Ratemaking mechanism expired on June 30, 2001 and the Kentucky Commission has extended it while it considers the Western Kentucky Gas Division's request for another mechanism.

In November 2000, the Greeley Gas Division filed a rate case with the Colorado Public Utilities Commission for approximately \$4.2 million in additional annual revenues. In May 2001, we received an increase in annual revenues of approximately \$2.8 million from the Colorado Public Utilities Commission. The new rates went into effect on May 4, 2001.

Effective April 1, 1999, the Tennessee Regulatory Authority approved the United Cities Gas Division's request to continue its Performance-based Ratemaking mechanism related to gas procurement and gas transportation activities for a three-year period. The Tennessee Regulatory Authority revised the mechanism from the original two-year experimental period, by increasing the cap for incentive gains and/or losses to \$1.25 million per year. Similar to Tennessee, the Georgia Public Service Commission renewed our Performance-based Ratemaking program for an additional three years effective May 1, 1999. The gas purchase and capacity release mechanisms of the Performance-based Ratemaking mechanism are designed to provide us incentives to find innovative methods to lower gas costs to our customers. We recognized other income of \$1.0 million and \$0.2 million in fiscal years 2001 and 2000 for the Georgia and Tennessee Performance-based Ratemaking mechanisms.

In February 2000, the United Cities Gas Division filed a rate case in Illinois with the Illinois Commerce Commission requesting an increase in annual revenues of approximately \$3.1 million. After review by the Illinois Commerce Commission, the amount requested was revised to approximately \$2.1 million. The United Cities Gas Division received an increase in annual revenues of approximately \$1.4 million. The new rates went into effect on October 23, 2000 and are collected primarily through an increase in monthly customer charges.

In March 2000, the United Cities Gas Division filed a rate case in Virginia with the State Corporation Commission of the Commonwealth of Virginia requesting an increase in annual revenues of approximately \$2.3 million. The State Corporation Commission of Virginia reviewed the filing to determine if it met the appropriate rules and regulations. In July 2000, we refiled the case requesting an increase in revenues of approximately \$2.1 million. The Commission accepted the revised filing. In April 2001, the United Cities Gas Division agreed to an annual rate reduction of \$0.5 million effective beginning with the April 2001 billing cycle.

In March 2001, the United Cities Gas Division and the Iowa Consumer Advocate Division of the Department of Justice reached an agreement for an annual rate reduction of \$0.3 million relating to our Iowa operations. The rate reduction was effective in March 2001.

We continue to monitor rates in all of our service areas to ensure that they are adequate for the recovery of service costs and return on investment.

On September 10, 2001, the United Cities Gas Division filed a request for accounting order related to uncollectable delinquencies associated with Moratorium Order of Georgia Public Service Commission dated January 17, 2001. In our request, we asked the Georgia Commission to issue an accounting authority order authorizing us to defer as a regulatory asset all costs incurred in connection with the Moratorium on disconnects ordered by the Georgia Commission which lasted from January 17, 2001 through April 1, 2001. On September 28, 2001, the Georgia Commission issued an order authorizing us to create a mechanism for the recovery of uncollectable delinquencies with an effective date of November

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

1, 2001. The United Cities Gas Division is authorized to recover through the recovery mechanism up to \$500,000.

19

WEATHER AND SEASONALITY

Our natural gas distribution business and irrigation sales business is seasonal and dependent upon weather conditions in our service areas. Natural gas sales to residential, commercial and public authority customers are affected by winter heating season requirements. This generally results in higher operating revenues and net income during the period from October through March of each year and lower operating revenues and either net losses or lower net income during the period from April through September of each year. Sales to industrial customers are much less weather sensitive. Sales to agricultural customers, who typically use natural gas to power irrigation pumps during the period from March through September, are affected by rainfall amounts. The effects of colder than normal winter weather in 2001 and the effects of significantly warmer than normal winter weather in 2000 and 1999 on our consolidated volumes delivered are illustrated by the following degree day information. The degree day information for 2001 and 2000 presented below excludes service areas with weather normalized operations. Information concerning service areas with weather normalized operations for 1999 was not available; thus, degree day information presented for 1999 includes service areas having weather normalized operations.

	YEAR ENDED SEPTEMBER 30,		
	2001	2000	1999
	-----	-----	-----
Sales volumes -- Bcf.....	156.6	138.2	140.1
Transportation volumes -- Bcf.....	61.2	59.4	55.5
	-----	-----	-----
Total.....	217.8	197.6	195.6
	=====	=====	=====
Degree days:			
Actual.....	2,753	2,096	3,374
Percent of normal.....	107%	81%	85%

The effects of weather that is above or below normal are partially offset in the Tennessee and Georgia jurisdictions served by the United Cities Gas Division and in the Kentucky jurisdiction served by the Western Kentucky Gas Division through weather normalization adjustments. The Georgia Public Service Commission, the Tennessee Regulatory Authority and the Kentucky Public Service Commission have approved weather normalization adjustments. The weather normalization adjustments, effective October through May each year in Georgia, and November through April each year in Tennessee and Kentucky, allow the United Cities Gas Division and the Western Kentucky Gas Division to increase the base rate portion of customers' bills when weather is warmer than normal and decrease the base rate when weather is colder than normal. The net effect of the weather normalization adjustments was a decrease in revenues of approximately \$3.3 million for 2001 compared to an increase in revenues of \$4.1 million and \$4.4 million in 2000 and 1999. Approximately 375,000 or 26 percent of our meters in service are located in Georgia, Tennessee and Kentucky. We did not have weather normalization adjustments in our other service areas during the year ended September 30, 2001. We also received approval to change our rate structure in our West Texas System of the Energas Division beginning in December 2000 to help offset some of the negative effects of weather.

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

In July 2000, we entered into an agreement to purchase weather hedges for our Texas and Louisiana operations effective for the 2000 - 2001 heating season. The hedges were designed to help mitigate the effects of weather that was at least seven percent warmer than normal in both Texas and Louisiana while preserving any upside. The cost of the weather hedges was approximately \$4.9 million which was amortized over the 2000 - 2001 heating season. The cost of the weather hedges was more than offset by the positive effects of colder weather on our gross profit.

In June 2001, we purchased a three year weather insurance policy with an option to cancel in the third year if we obtain weather protection in our rate structures. The policy is for our Texas and Louisiana operations and covers the entire heating season of October to March beginning with the 2001 - 2002 heating season. The cost of the three year policy was approximately \$13.2 million which was prepaid and will be amortized over the appropriate heating seasons based on degree days. The insurance is designed to protect against weather that is at least seven percent warmer than normal.

20

We have historically hedged 20 percent of our gas supply through the use of our underground storage assets. This hedging process will continue. For the 2001 - 2002 heating season, we plan to cover approximately 64 percent of our anticipated flowing gas requirements through storage and futures and fixed forward contracts at a weighted average cost of slightly less than \$4.00 per Mcf. This should provide protection to us and our customers against sharp increases in the price of natural gas during the 2001 - 2002 heating season.

For further information regarding the impact of weather and seasonality on operating results, see Note 16, "Selected Quarterly Financial Data (unaudited)" in notes to consolidated financial statements herein.

CAPITAL RESOURCES AND LIQUIDITY (SEE "CONSOLIDATED STATEMENTS OF CASH FLOWS")

Fiscal 2001 was a year in which total cash inflows exceeded total cash outflows. This was generally the result of increased cash flows from operating activities as a result of colder than normal weather partially offset by increased capital expenditures. Net proceeds from the issuance of long-term debt were used to finance the Louisiana Gas Service Company and LGS Natural Gas Company acquisition in 2001. Net proceeds from our equity offering were used to reduce commercial paper debt. Common stock issued primarily through our Employee Stock Ownership Plan and our Direct Stock Purchase Plan was also used to finance operations.

CASH FLOWS FROM OPERATING ACTIVITIES

Items on the Consolidated Statement of Cash Flows for the year ended September 30, 2001 reflect changes in balances for the year, net of assets acquired and liabilities assumed in the acquisition of the additional interest in Woodward Marketing, L.L.C. and the assets of Louisiana Gas Service Company and LGS Natural Gas Company. See Note 10 of the accompanying notes to consolidated financial statements.

Cash flows from operating activities as reported in the consolidated statement of cash flows totaled \$83.0 million for 2001 compared to \$54.2 million for 2000 and \$84.7 million for 1999. The increase in net cash provided by operating activities from 2000 to 2001 was primarily the result of increases in net income and other current liabilities and a decrease in accounts receivable and deferred gas costs partially offset by an increase in cash held on deposit

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

in margin accounts and a decrease in accounts payable. Also, the net change in our assets/liabilities from risk management activities added to the increase in net cash provided by operating activities in 2001. The increase in net income was primarily due to higher gross profits due to increased volumes and rate increases. The increase in gross profits was partially offset by an increase in operating expenses and an increase in interest expense. Also reducing gross profit was a decrease in miscellaneous income (expense) as a result of charges incurred related to our performance based-ratemaking mechanisms and the cost of weather hedges purchased for our Louisiana and Texas operations. In addition, miscellaneous income (expense) was reduced in 2001 as the result of a gain recognized on the sale of certain non-regulated assets in 2000 which did not occur in 2001.

CASH FLOWS FROM INVESTING ACTIVITIES

During the last three years, a substantial portion of our cash resources was used to fund technology improvements, acquisitions and our ongoing construction program to provide natural gas services to a growing customer base. Net cash used in investing activities totaled \$468.1 million in 2001 compared with \$100.1 million in 2000 and \$109.6 million in 1999. Capital expenditures in fiscal 2001 amounted to \$113.1 million, compared with \$75.6 million in 2000 and \$110.4 million in 1999. The increase in capital expenditures from 2000 to 2001 was primarily the result of additional capital requirements needed due to our growing customer base. Included in investing activities for 2001 is \$363.4 million used to acquire the assets of Louisiana Gas Service Company and LGS Natural Gas Company as discussed in Note 2 of the notes to consolidated financial statements. Included in investing activities in 2000 was \$32.0 million used to acquire the Missouri natural gas distribution assets of Associated Natural Gas. Currently budgeted capital expenditures for fiscal 2002 total approximately \$122.0 million and include funds for additional mains, services, meters and equipment. In fiscal 2002, we also plan to complete the Mississippi Valley Gas Company acquisition for \$150.0 million plus the assumption of approximately \$45.0 million of long-term debt as discussed in Note 2 of

21

the notes to consolidated financial statements. Capital expenditures and acquisitions for fiscal 2002 are planned to be financed from internally generated funds and financing activities as discussed below. In 2001, we had \$5.4 million in expenditures for assets to be used in leasing activities. In connection with our acquisition of Woodward Marketing, we received \$8.6 million in cash. In 2001, we received net proceeds of \$6.6 million in connection with the sale of certain utility assets. In 2000, we received net proceeds of \$6.5 million in connection with the sale of certain propane assets to Heritage Propane Partners, L.P.

CASH FLOWS FROM FINANCING ACTIVITIES

Net cash provided by financing activities totaled \$393.0 million for 2001 compared with \$44.7 million for 2000 and \$28.7 million for 1999. Financing activities during these periods included issuance of common stock, dividend payments, short-term borrowings from banks under our credit facilities and issuance and repayment of long-term debt. The increase in cash provided by financing activities in 2001 as compared to 2000 was due primarily to the issuance of long-term debt and the issuance of common stock during 2001. In 2001 we received \$347.1 million in net proceeds from our \$350.0 million debt offering in May 2001. The net proceeds were used to help finance the completion of the Louisiana Gas Service Company and LGS Natural Gas Company acquisition in July 2001. Long-term debt repayments totaled \$17.7 million, \$14.6 million and \$61.0 million for 2001, 2000 and 1999. Repayments of long-term debt in 2001, 2000 and 1999 consisted of annual installments under the various loan documents. During 2001, short-term debt decreased \$48.8 million due primarily to the use of the

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

net proceeds from our equity offering in December 2000 to reduce commercial paper debt. During 2000, short-term debt increased \$81.7 million due to the effect of warmer weather on net income for 2000, the acquisition of the Missouri natural gas distribution assets of Associated Natural Gas for \$32.0 million and increases in accounts receivable, cost of gas stored underground and deferred charges. During 1999, short-term debt increased \$101.9 million due largely to lower net income and cash requirements of \$61.0 million for repayments of long-term debt and capital expenditures of \$110.4 million primarily for technology improvements.

Issuance of common stock. We issued 674,468, 704,540 and 849,481 shares of common stock in 2001, 2000 and 1999 under our various plans. See the Consolidated Statements of Shareholders' Equity and Note 6 of the accompanying notes to consolidated financial statements for the number of shares previously issued and available for future issuance under each of our plans. In addition to the shares issued under our various plans, we also issued 6,741,500 shares through our equity offering in December 2000 and 1,423,193 shares of restricted common stock for the acquisition of the remaining 55 percent of Woodward Marketing in April 2001. The net proceeds from the equity offering were used to reduce commercial paper debt as discussed above.

Cash dividends paid. We paid \$44.1 million in cash dividends during 2001 compared with \$36.0 million in 2000 and \$33.9 million in 1999. We raised the dividend \$.02 per share during 2001 and \$.04 per share during each of 2000 and 1999. The increase in cash dividends in 2001 over 2000 was also due to the increase in the number of shares outstanding as discussed above.

LIQUIDITY

The excess of cash inflows over outflows has resulted in a slight decrease in debt as a percentage of total capitalization, including short-term debt, as shown in the table below.

	SEPTEMBER 30			
	----- 2001		2000 -----	
	(IN THOUSANDS, EXCEPT PERCENTAGES)			
Short-term debt.....	\$ 201,247	13.4%	\$ 250,047	24.4%
Long-term debt.....	713,094	47.6%	380,764	37.2%
Shareholders' equity.....	583,864	39.0%	392,466	38.4%
	-----	-----	-----	-----
Total capitalization, including short-term debt.....	\$1,498,205	100.0%	\$1,023,277	100.0%
	=====	=====	=====	=====

The debt as a percentage of total capitalization, including short-term debt, was 61.0 percent and 61.6 percent at September 30, 2001 and 2000. Our long-term plans are to decrease the debt to capitalization ratio to nearer its target range of 50-52 percent through cash flow generated from operations, continued issuance of new common stock under our Direct Stock Purchase Plan and Employee Stock Ownership Plan, access to the debt and equity capital markets and limiting annual maintenance capital expenditures. It is likely that the debt to capitalization ratio will remain in its current range in the near term.

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

At September 30, 2001, we had short-term committed credit facilities totaling \$318.0 million. One short-term unsecured credit facility is for \$300.0 million and serves as a backup liquidity facility for our commercial paper program. At September 30, 2001, \$171.0 million of commercial paper was outstanding. On August 2, 2001, this facility was renewed for \$300.0 million with an option to increase the amount by \$100.0 million. We have a second facility in place for \$18.0 million. At September 30, 2001, \$2.2 million was outstanding under this credit facility. These credit facilities are negotiated at least annually and are used for working capital purposes.

At September 30, 2001, our Woodward Marketing subsidiary has an uncommitted credit facility for \$140.0 million which is used for its non-regulated business. Atmos Energy Marketing, LLC, our wholly owned subsidiary, is the sole guarantor of all amounts outstanding under this facility. At September 30, 2001, \$28.0 million was outstanding under this credit facility. Related letters of credit totaling \$38.8 million further reduced the amount available under this facility. Woodward Marketing also has up to \$100.0 million available from Atmos for its non-regulated business. At September 30, 2001, \$100.0 million was outstanding.

At September 30, 2001, we also had uncommitted short-term credit lines of \$40.0 million, all of which were unused. The uncommitted lines are renewed or renegotiated at least annually with varying terms and we pay no fee for the availability of the lines. Borrowings under these lines are made on a when-and-as-available basis at the discretion of the banks.

The loan agreements pursuant to which our Senior Notes and First Mortgage Bonds have been issued contain covenants by us with respect to the maintenance of certain debt-to-equity ratios and cash flows and restrictions on the payment of dividends. See Note 3 of the accompanying notes to consolidated financial statements for more information on these covenants.

FUTURE CAPITAL REQUIREMENTS

We believe that internally generated funds, our credit facilities, commercial paper program and access to the public debt and equity capital markets will provide necessary working capital and liquidity for capital expenditures and other cash needs for fiscal 2002.

RESULTS OF OPERATIONS

YEAR ENDED SEPTEMBER 30, 2001 COMPARED WITH YEAR ENDED SEPTEMBER 30, 2000

Operating revenues increased by 70 percent to \$1.4 billion for 2001 from \$850.2 million for 2000. The most significant factors contributing to the increase in operating revenues were a 58 percent increase in average sales price due to the increased cost of gas and a 10 percent increase in sales and transportation volumes due to colder weather. During 2001, excluding service areas with weather normalized operations, temperatures were 31 percent colder than in the corresponding period of the prior year and were seven percent colder than the 30-year normal. The total volume of gas sold and transported for 2001 was 217.8 Bcf compared with 197.6 Bcf for 2000. The average sales price per Mcf sold increased \$3.28 to \$8.93 primarily due to an increase in the average cost of gas. During the early part of our 2001 fiscal year, natural gas prices throughout the country began to increase significantly. The average cost of gas per Mcf sold increased to \$6.83 for 2001 from \$3.79 for 2000. Although we expect to recover our purchased gas costs from customers through purchased gas adjustment mechanisms, generally there is a lag between the time we pay for gas purchases and the time when regulators allow us to place higher rates in service and recover those gas costs. As a result, we have from time to time used short-term borrowings to temporarily finance unrecovered purchased gas costs. Where permitted, we have increased our purchased gas adjustments to help mitigate the increased cost of gas.

Subsequent to September 30, 2001, gas prices had declined to approximately \$2 to \$3 per Mcf. In addition, as a result of the increased gas costs, our accounts receivable balances during fiscal 2001 increased significantly and, consequently, we also increased our allowance for doubtful accounts, which we consider to be adequate. We do not, however, expect this rise in natural gas prices to have a material adverse effect on our financial condition, results of operations or net cash flows.

In addition, operating revenues increased due to the impact of rate increases in Kentucky, Illinois, Colorado, Amarillo, Texas, and West Texas. Also contributing to the increase in operating revenues was the addition of approximately 48,000 customers in Missouri due to the Associated Natural Gas acquisition completed in fiscal 2000 and the addition of approximately 279,000 residential and commercial meters in Louisiana due to the completion of the Louisiana Gas Service Company acquisition in July 2001. However, operating revenues were partially offset by a reduction related to our former propane assets which were placed into a joint venture partnership in August 2000.

Gross profit increased by 15 percent to \$374.7 million for 2001 from \$325.7 million for 2000. The increase in gross profit was due primarily to the increase in volumes sold to weather sensitive customers, an increase of \$5.1 million in transportation revenues due to higher average transportation revenue per Mcf and increased volumes and a \$6.7 million non-recurring adjustment to purchased gas cost to reflect state filings. In addition, gross profit increased due to the impact of rate increases and additional customers, partially offset by a reduction related to our former propane operations, as discussed previously. Changes in the cost of gas do not directly affect gross profit because the fluctuations in gas prices are passed through to our customers.

On April 1, 2001, we completed our acquisition of the remaining 55 percent interest in Woodward Marketing, L.L.C. As a result of this acquisition, the revenues and expenses of Woodward Marketing are now shown on a consolidated basis.

Operating expenses increased to \$244.9 million for 2001 from \$240.4 million for 2000. Operation and maintenance expense decreased due to savings resulting from the continued cost control initiatives started during fiscal 2000 and reduced operation and maintenance expenses associated with our former propane operations which were placed into a joint venture partnership in fiscal 2000. An increase in the provision for doubtful accounts of \$8.5 million and pension costs of \$4.5 million partially offset this decrease. Pension costs will increase by \$4.4 million in fiscal 2002 over fiscal 2001. Depreciation and amortization expense increased due to the completion of the Louisiana Gas Service Company and LGS Natural Gas Company acquisition in July 2001. Taxes other than income increased as a result of increased city franchise taxes and state gross receipts taxes, which are revenue based. However, these taxes are paid by our customers; thus, these amounts are offset in revenues through customer billings and have no effect on net income.

Operating income increased 53 percent for 2001 to \$130.3 million from \$85.3 million for 2000. The increase in operating income resulted primarily from increased gross profit described above.

Equity in earnings of Woodward Marketing, L.L.C. was \$8.1 million for the six months ended March 31, 2001 compared with \$7.3 million for the year 2000.

Miscellaneous income (expense) decreased \$9.3 million to \$(1.9) million for 2001 compared to \$7.4 million for 2000. This decrease was due primarily to charges incurred related to our Performance-based Ratemaking mechanisms and the

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

amortization of \$4.9 million related to weather hedges purchased for our Louisiana and Texas operations. In addition, we recognized a gain of \$5.8 million in 2000 resulting from the sale of certain non-utility assets. No such gain occurred in 2001. Partially offsetting the decrease in miscellaneous income (expense) during 2001 was an increase of \$3.0 million in interest income due primarily to interest income earned on the proceeds from our \$350.0 million debt offering in May 2001. We invested these proceeds in short-term investments until the completion of the Louisiana Gas Service Company and LGS Natural Gas Company acquisition in July 2001.

Interest expense increased \$3.2 million to \$47.0 million for 2001 compared to \$43.8 million for 2000. This increase was due primarily to interest expense on the \$350.0 million debt offering in May 2001.

24

Net income increased for 2001 by \$20.2 million to \$56.1 million from \$35.9 million for 2000. This increase in net income resulted primarily from the increase in sales volumes due to the colder than normal weather and the impact of rate increases discussed above.

YEAR ENDED SEPTEMBER 30, 2000 COMPARED WITH YEAR ENDED SEPTEMBER 30, 1999

Operating revenues increased by 23 percent to \$850.2 million in 2000 from \$690.2 million in 1999. The most significant factors contributing to the increase in operating revenues were a 25 percent increase in average sales price due to the increased cost of gas and the impact of rate increases in Amarillo, Texas and Kentucky. The average sales price per Mcf sold increased \$1.12 or 25 percent to \$5.65 in 2000 primarily due to an increase in the average cost of gas. The average cost of gas per Mcf sold increased 36 percent to \$3.79 for 2000 from \$2.79 for 1999. Also contributing to the increase in operating revenues was an increase in our non-regulated West Texas irrigation sales volumes related to irrigation demand and, secondly, to higher average sales prices reflecting higher gas costs. The increase in irrigation revenues was due to decreased rainfall during the growing season in West Texas in 2000. Partially offsetting the increase in operating revenues was a one percent decrease in sales volumes due to warmer weather. For 2000, excluding service areas with weather normalized operations, temperatures were five percent warmer than in 1999 and were 18 percent warmer than the 30-year normal. The total volume of gas sold for 2000 was 138.2 Bcf compared with 140.1 Bcf for 1999.

Gross profit increased by nine percent to \$325.7 million for 2000 from \$299.8 million for 1999. The increase in gross profit was due primarily to the impact of rate increases discussed previously. The increase in gross profit was also due to the addition of approximately 48,000 Missouri customers due to the acquisition of the Missouri natural gas distribution assets of Associated Natural Gas and increased volumes associated with the irrigation business. The increase in gross profit was slightly offset by a decrease in volumes sold to weather sensitive customers. Changes in the cost of gas do not directly affect gross profit because the fluctuations in gas prices are passed through to our customers.

Operating expenses decreased to \$240.4 million for 2000 from \$245.6 million for 1999. Operation and maintenance expense decreased due to savings resulting from the cost control initiatives implemented during 2000 due to the warm winter weather. However, this decrease was partially offset by an increase in the provision for doubtful accounts of \$8.8 million. The increase in the provision for doubtful accounts occurred during the transition from local offices to a centralized customer service center and the implementation of a new company-wide customer billing system. During this transition, we temporarily suspended service cutoffs and our normal efforts to collect past due receivables. Actions

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

to address those issues were initiated in 2000. Depreciation and amortization expense also increased during 2000 as a result of the first full year of depreciation being recognized on our process improvement initiatives related to the new customer information and billing system and the accounting and human resource systems placed into service during 1999, as well as the acquisition of the Missouri natural gas distribution assets of Associated Natural Gas in May of 2000.

Operating income increased 57 percent for 2000 to \$85.3 million from \$54.2 million in 1999. The increase in operating income resulted primarily from increased gross profit and decreased operating expenses described above.

Miscellaneous income (expense), net increased \$4.4 million to \$7.4 million in 2000 compared to \$3.0 million in 1999. The increase was primarily due the \$5.8 million (\$3.7 million after tax) gain resulting from the sale of certain non-utility assets.

Interest charges increased \$6.7 million to \$43.8 million in 2000 from \$37.1 million in 1999. The increase in 2000 was primarily due to \$3.7 million of interest being capitalized in 1999 in connection with the significant technology projects being completed in 1999 and higher average debt outstanding and higher interest rates for 2000. The increase in average debt outstanding was related to funding infrastructure, technology, process changes and customer support investments, as well as additional working capital needed for the increasing gas costs.

25

Net income increased for 2000 by \$18.2 million to \$35.9 million from \$17.7 million for 1999. The increase in net income for 2000 resulted primarily from the impact of rate increases in 2000 and the increase in miscellaneous income. Net income was also improved as a result of lower operating expenses.

FACTORS THAT MAY AFFECT FUTURE PERFORMANCE OF THE COMPANY

Our performance in the future will primarily depend on the results of our utility operations. Several factors exist that could influence Atmos' future financial performance, some of which are described below. They should be considered in connection with evaluating forward-looking statements contained in this report or otherwise made by or on behalf of us since these factors could cause actual results and conditions to differ materially from those projected in these forward-looking statements.

ADVERSE WEATHER CONDITIONS

Our natural gas sales volumes and related revenues are directly correlated with heating requirements that result from cold winter weather. Our agricultural sales volumes are associated with the rainfall levels during the growing season in our West Texas irrigation market. Weather is one of the most significant factors influencing our performance. However, as was more fully discussed above, we have purchased weather insurance to mitigate the effect of warmer than historically normal weather in our Texas and Louisiana service areas. In addition, weather normalized rates are in effect in several of our jurisdictions, which should mitigate the adverse effects of warmer or drier than normal weather on our operating results.

NATIONAL, REGIONAL AND LOCAL ECONOMIC CONDITIONS

Our operations will always be affected by the conditions and overall strength of the national, regional and local economies, including interest rates, changes in the capital markets and increases in the costs of our primary

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

commodity, natural gas. These factors impact the amount of residential, industrial and commercial growth in our service territories. Higher costs of natural gas in recent years have already lead many of our customers to conserve in the use of our gas services and could lead to even more customers utilizing such conservation methods.

RECENT NATIONAL EVENTS

Our company and our operations have already been indirectly impacted by the tragic events of September 11, 2001. The terrorist activities on that day have heightened our awareness of safety and security concerns and have prompted a company-wide review and assessment of the adequacy of our safety and security procedures relating to the protection of our customers, employees and our physical assets. We will continue to monitor and assess our safety and security procedures and will take all precautions necessary to minimize any adverse effects on us or our operations. Accordingly, through taking these added precautions, we believe that we have minimized any potential adverse effects that any future terrorist activities could have on us or our operations.

REGULATORY APPROVALS

Our utility business is subject to various regulated returns on its rate base in each of the 11 states in which we operate. We monitor the allowed rates of return, our effectiveness in earning such rates and initiate rate proceedings or operating changes as needed. In addition, in the normal course of the regulatory environment, assets are placed in service and historical test periods are established before rate cases can be filed. Once rate cases are filed, regulatory bodies have the authority to suspend implementation of the new rates while studying the cases. Because of this process, we must temporarily suffer the negative financial effects of having placed assets in service without the benefit of rate relief, which is commonly referred to as "regulatory lag". In addition, our debt and equity financing programs are also subject to approval by regulatory bodies in five states, which could limit our ability to take advantage of favorable market conditions.

26

SUCCESSFUL COMPLETION AND INTEGRATION OF PENDING ACQUISITION

Our acquisition strategy depends on our ability to successfully acquire and integrate the operations of companies such as Mississippi Valley Gas Company, which acquisition is currently pending. Acquisitions such as Mississippi Valley should help us achieve greater economies of scale by spreading the fixed costs of the utility business over a larger customer base. Completion of this acquisition is subject to state and federal regulatory approval. In addition, the integration of this acquisition into our operations during the next fiscal year will require a substantial commitment of financial resources and management time.

INFLATION AND INCREASED GAS COSTS

We believe that inflation has caused, and will continue to cause, increases in certain operating expenses, and has required, and will continue to require, assets to be replaced at higher costs. We have a process in place to continually review the adequacy of our gas rates in relation to the increasing cost of providing service and the inherent regulatory lag in adjusting those gas rates. Historically, we have been able to budget and control operating expenses and investment within the amounts authorized to be collected in rates and intend to continue to do so. The ability to control expenses is an important factor that will influence future results.

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

In addition, the rapid increases in the price of purchased gas during the past year caused us to experience a significant increase in short-term debt because we must pay suppliers for such gas when it is purchased long before such costs may be recovered through the collection of monthly customer bills for gas delivered. Also, the increases in purchased gas costs caused more customers to be slow to pay their gas bills, leading to accounts receivable that were higher than normal which in turn lead to higher short-term debt levels and increased bad debts in fiscal 2001. Should the price of purchased gas increase significantly in the upcoming heating season, we would expect similar increases in our short-term debt and accounts receivable during fiscal 2002.

INCREASED COMPETITION

We are facing increased competition from other energy suppliers as well as electric companies and from energy marketing and trading companies. In the case of industrial customers, such as manufacturing plants, and agricultural customers, adverse economic conditions, including higher gas costs, could cause such customers to use alternative sources of energy such as electricity or to bypass our systems in favor of special competitive contracts with lower per-unit costs.

DEREGULATION OR UNBUNDLING

We are closely monitoring the development of unbundling initiatives in the natural gas industry. Unbundling is the separation of the provision and pricing of local distribution gas services into discrete components. It typically focuses on the separation of the distribution and gas supply components and the resulting opening of the regulated components of sales services to alternative unregulated suppliers of those services. Because of brand loyalty in our service areas, and our enhanced technology and distribution system infrastructures, we believe that we are now positively positioned as unbundling evolves. Consequently, we do not expect there would be a significant adverse effect on our business should unbundling or further deregulation of the natural gas distribution service business occur.

HEDGING AND MARKET RISK ACTIVITIES

Utility Hedging Activities

To protect against volatility in gas prices, we are hedging gas costs for the 2001-2002 heating season by utilizing a combination of financial tools and fixed forward physical contracts to stabilize gas prices. For the 2001-2002 heating season, we plan to cover approximately 64 percent of our anticipated requirements through storage and hedging instruments. The gas hedges should help moderate the effects of higher customer accounts receivable caused by higher gas prices.

27

WOODWARD MARKETING ACTIVITIES

We acquired a 45 percent interest in Woodward Marketing, L.L.C. in 1997 as a result of the merger of Atmos and United Cities Gas Company, which had acquired that interest in 1995. In April 2001, we acquired the 55 percent interest that we did not own from J.D. Woodward and others for 1,423,193 restricted shares of our common stock. Immediately following the acquisition, Mr. Woodward was elected as a Senior Vice President of Atmos in charge of all non-regulated business activities, a position he has held since April 2001. Prior to that time, Mr. Woodward had not been an officer or employee of Atmos.

The principal business of Woodward Marketing, including the activities of

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

Trans Louisiana Industrial Gas Company, Inc., is the overall management of natural gas requirements for municipalities, local gas utility companies and industrial customers located primarily in the Southwestern and Midwestern United States. This business involves the sale of natural gas by Woodward Marketing to its customers and the management of storage and transportation contracts for its customers under contracts generally having one to two-year terms. At September 30, 2001, Woodward Marketing had a total of 78 municipal and local gas utility customers and 195 industrial customers. Woodward Marketing also sells natural gas to certain of its industrial customers on a delivered burner tip basis under contract terms from 30 days to two years. In addition, Woodward Marketing supplies us with a portion of our natural gas requirements on a competitive bid basis.

In the management of natural gas requirements for municipal and other local utilities, Woodward Marketing sells physical natural gas for future delivery and hedges the associated price risk through the use of gas futures, including forwards, over-the-counter and exchange-traded options, and swap contracts with counterparties. These financial contracts are marked-to-market at the daily close of business. Woodward Marketing links gas futures to physical delivery of natural gas and balances its futures positions at the end of each trading day. Over-the-counter swap agreements require Woodward Marketing to receive or make payments based on the difference between a fixed price and the market price of natural gas on the settlement date. Woodward Marketing uses these futures and swaps to manage margins on offsetting fixed-price purchase or sale commitments for physical quantities of natural gas, which are also carried on a mark to market basis. Options held to hedge price risk provide the right, but not the requirement, to buy or sell energy commodities at a fixed price. Woodward Marketing uses options to manage margins and to limit overall price risk exposure.

Energy related services provided by Woodward Marketing include the sale of natural gas to its various customer classes and management of transportation and storage assets and inventories. More specifically, energy services include contract negotiation and administration, load forecasting, storage acquisition, natural gas purchase and delivery and capacity utilization strategies. In providing these services, Woodward Marketing generates income from its utility, municipal and industrial customers through negotiated prices based on the volume of gas supplied to the customer. Woodward Marketing also generates income by taking advantage of the difference between near-term gas prices and prices for future delivery as well as the daily movement of gas prices by utilizing storage and transportation capacity that it controls.

Woodward Marketing also engages in limited speculative natural gas trading for its own account, subject to a risk management policy established by us which limits the level of trading loss in any fiscal year to a maximum of 25 percent of the budgeted annual operating income of Woodward Marketing. Compliance with such risk management policy is monitored on a daily basis. In addition, Woodward Marketing's bank credit facility limits trading positions that are not closed at the end of the day (open positions) to 2.5 Bcf of natural gas. At September 30, 2001, Woodward Marketing's open positions in its trading operations totaled 2.3 Bcf. In its speculative trading, Woodward Marketing's open trading positions are monitored on a daily basis but are not required to be closed if they remain within the limits set by the bank loan agreement. Woodward Marketing had an unrealized trading gain of \$4.5 million for the fiscal year ended September 30, 2001, but there can be no assurance that Woodward Marketing will have any speculative trading gain in the future. In some prior years, Woodward Marketing has experienced losses in its speculative trading business. The financial exposure that results from the daily fluctuations of gas prices and the potential for daily price movements constitutes a risk of loss since the price of natural gas purchased for future delivery at the beginning of the day may not be hedged until later in the day.

Financial instruments, which subject Woodward Marketing to counterparty risk, consist primarily of financial instruments arising from trading and risk management activities and overnight repurchase agreements that are not insured. Counterparty risk is the risk of loss from nonperformance by financial counterparties to a contract. Exchange-traded future and option contracts are generally guaranteed by the exchanges.

Woodward Marketing's operations are concentrated in the natural gas industry, and its customers and suppliers may be subject to economic risks affecting that industry.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The risk inherent in our market risk sensitive instruments is the potential loss arising from adverse changes in natural gas commodity prices and interest rates as discussed below. The sensitivity analysis does not, however, consider the effects that such adverse changes may have on overall economic activity nor do they consider additional actions we may take to mitigate exposure to such changes. Actual results may differ.

GAS PRICES

We purchase natural gas for our regulated and non-regulated natural gas operations. Substantially all of the cost of gas purchased for regulated operations is recovered through purchased gas adjustment mechanisms. We have a limited market risk in gas prices related to gas purchases in the open market at spot prices for sale to non-regulated energy services customers at fixed prices. As a result, our earnings could be affected by changes in the price and availability of such gas. To protect against volatility in gas prices, we from time to time hedge our gas costs by purchasing futures contracts. Our utility segment does not use such financial instruments for trading purposes and we are not a party to any leveraged derivatives. Market risk is estimated as a hypothetical 10 percent increase in the portion of our gas cost related to fixed-price non-regulated sales. Based on projected fiscal 2002 non-regulated gas sales at fixed prices, such an increase would result in an increase to cost of gas of approximately \$2.7 million in fiscal 2002, before considering the effect of swap agreements outstanding as of September 30, 2001. As of September 30, 2001, we had entered into swap agreements to lock in gas costs for certain outstanding fixed-price sales agreements. We plan to mitigate the risk of increased gas purchase costs for fixed-price customers by entering into swap agreements to lock in purchased gas cost for estimated sales volumes in fiscal 2002.

In April 2001, we acquired the 55 percent interest in Woodward Marketing that we did not already own. Woodward Marketing's principal business is the management of natural gas requirements for municipalities, local gas utility companies and industrial customers located primarily in the Southwestern and Midwestern United States. This business involves the sale of natural gas and the management of storage and transportation contracts for customers under contracts generally having one to two-year terms. Woodward Marketing also sells natural gas to industrial customers on a delivered burner tip basis under contract terms from 30 days to two years. In the management of natural gas requirements for municipal and other local utilities, Woodward Marketing sells natural gas for future delivery and hedges price risk through the use of gas futures including forwards, over-the-counter and exchange-traded options, futures and swap contracts. Financial contracts are marked-to-market at the daily close of business.

Woodward Marketing also engages in limited speculative natural gas trading

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

for its own account, subject to a risk management policy established by us which limits the level of trading loss in any fiscal year to a maximum of 25 percent of the budgeted operating income of Woodward Marketing. Compliance with such risk management policy is monitored on a daily basis. In addition, Woodward Marketing's bank credit facility limits open trading positions to 2.5 Bcf of natural gas. At September 30, 2001, Woodward Marketing's open positions in its trading operations totaled 2.3 Bcf. In its trading, Woodward Marketing's open trading positions are monitored on a daily basis but are not required to be closed if within the limits set by the bank credit facility. The financial exposure that results from the daily fluctuations of gas prices and the potential for daily price movements have an impact on the net open position. Based on its open positions at September 30, 2001, a \$.50 increase in market strip would result in a \$1.2 million decrease in the speculative trading gain. A \$.50 decrease in market strip would result in a \$1.2 million increase in the speculative trading gain.

29

Woodward Marketing uses gas futures contracts, including but not limited to, over-the-counter and exchange-traded options and swap agreements, in the conduct of its business. Woodward Marketing links gas futures to physical delivery of natural gas and balances its futures positions at the end of each trading day. Over-the-counter swap agreements require Woodward Marketing to receive or make payments based on the difference between a fixed price and the market price of natural gas on the settlement date. Woodward Marketing uses futures and swaps to manage margins on offsetting fixed-price purchase or sale commitments for physical quantities of natural gas. Options held to hedge price risk provide the right, but not the requirement, to buy or sell energy commodities at a fixed price. Woodward Marketing uses options to manage margins and to limit overall price risk exposure.

Counterparty risk is the risk of loss from nonperformance by financial counterparties to a contract. Financial instruments, which subject Woodward Marketing to counterparty risk, consist primarily of financial instruments arising from trading and risk management activities and overnight repurchase agreements that are not insured. Exchange traded future and option contracts are generally guaranteed by the exchanges.

Woodward Marketing's operations are concentrated in the natural gas industry, and its customers and suppliers may be subject to economic risks affecting that industry. Therefore, an economic downturn in the industry could have an adverse affect on the creditworthiness of Woodward Marketing's customers. Woodward Marketing manages credit risk to attempt to minimize its exposure to uncollectible receivables. In compliance with Woodward Marketing's existing credit policy, prospective and existing customers are reviewed for creditworthiness and customers not meeting minimum standards, at the discretion of management, provide security deposits and are subject to various requisite secured payment terms.

INTEREST RATES

Our earnings are affected by changes in short-term interest rates as a result of our issuance of short-term commercial paper and our other short-term borrowings. If market interest rates for short-term borrowings average two percent more in fiscal 2002 than they did during fiscal 2001, our interest expense would increase by approximately \$4.0 million.

Market risk for fixed-rate long-term obligations is estimated as the potential increase in fair value resulting from a hypothetical one percent decrease in interest rates and amounts to approximately \$57.5 million based on discounted cash flow analyses.

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

As of September 30, 2001, we were not engaged in other activities which would cause exposure to the risk of material earnings or cash flow loss due to changes in interest rates, foreign currency exchange rates or market commodity prices.

30

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

Management is responsible for the preparation, presentation and integrity of the financial statements and other financial information in this report. The accompanying financial statements have been prepared in accordance with generally accepted accounting principles and include estimates and judgments made by management that were necessary to prepare the statements in accordance with such accounting principles.

The Company maintains a system of internal accounting controls designed to provide reasonable assurance that assets are safeguarded from loss and that transactions are executed and recorded in accordance with established procedures. The concept of reasonable assurance is based on the recognition that the cost of maintaining a system of internal accounting controls should not exceed related benefits. The system of internal accounting controls is supported by written policies and guidelines, internal auditing and the careful selection and training of qualified personnel.

The financial statements have been audited by the Company's independent auditors. Their audit was made in accordance with auditing standards generally accepted in the United States, as indicated in the Report of Independent Auditors and included a review of the system of internal accounting controls and tests of transactions to the extent they considered necessary to carry out their responsibilities for the audit.

Management has considered the internal auditors' and the independent auditors' recommendations concerning the Company's system of internal accounting controls and has taken actions that are believed to be cost-effective in the circumstances to respond appropriately to these recommendations. The Audit Committee of the Board of Directors meets periodically with the internal auditors and the independent auditors to discuss the Company's internal accounting controls, auditing and financial reporting matters.

31

REPORT OF INDEPENDENT AUDITORS

Board of Directors
Atmos Energy Corporation

We have audited the accompanying consolidated balance sheets of Atmos Energy Corporation as of September 30, 2001 and 2000, and the related consolidated statements of income, shareholders' equity and cash flows for each of the three years in the period ended September 30, 2001. Our audits also included the financial statement schedule listed in the Index at Item 14(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with auditing standards generally

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Atmos Energy Corporation at September 30, 2001 and 2000, and the consolidated results of its operations and its cash flows for each of the three years in the period ended September 30, 2001, in conformity with accounting principles generally accepted in the United States. Also in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of business -- Atmos Energy Corporation and its subsidiaries are engaged primarily in the natural gas utility business as well as certain non-regulated businesses. We distribute through sales and transportation arrangements natural gas to approximately 1.4 million residential, commercial, public authority and industrial customers through our five regulated utility divisions: Atmos Energy Louisiana Gas Division in Louisiana; Energas Division in Texas; Greeley Gas Division in Colorado, Kansas and Missouri; United Cities Gas Division in Illinois, Tennessee, Iowa, Virginia, Georgia and Missouri; and Western Kentucky Gas Division in Kentucky. Such business is subject to federal and state regulation and/or regulation by local authorities in each of the states in which the utility divisions operate. Our shared services unit is located in Dallas, Texas and our customer support centers are located in Amarillo, Texas and Metairie, Louisiana. Our non-regulated businesses include various energy service businesses as described below.

Through Atmos Energy Marketing, LLC, we are engaged in gas marketing and energy management services. Atmos Energy Marketing provides gas supply management services to industrial customers, municipalities and local distribution companies including our five regulated utility divisions. Woodward Marketing, L.L.C. is a wholly owned subsidiary of Atmos Energy Marketing.

Through Atmos Pipeline and Storage, L.L.C., we own and operate natural gas storage fields in Kansas, Kentucky and Louisiana to supplement natural gas used by customers of the regulated utility divisions in Kansas, Kentucky, Tennessee and Louisiana and to provide storage services to other customers including customers in other states.

Through Atmos Power Systems, Inc., we construct and operate electrical power generating plants and associated facilities. Atmos Power Systems may also enter into agreements to either lease or sell such plants.

In addition, our non-regulated businesses market gas to industrial customers in West Texas, provide various retail services and own an indirect interest in Heritage Propane Partners as described below.

We were formerly engaged in the retail and wholesale distribution of propane gas through United Cities Propane Gas, Inc. On February 15, 2000, we entered into an agreement to form a joint venture which combined our propane operations with the propane operations of three other unrelated companies. The combined joint venture was named U.S. Propane, L.P. On June 15, 2000, U.S. Propane, in which we are a 19 percent partner, entered into an agreement to combine its operations with Heritage Holdings, Inc. Upon closing of this transaction, which occurred in August 2000, U.S. Propane owns all of the general partnership interest and approximately 30 percent of the limited partnership interest in Heritage Propane Partners, a publicly traded master limited partnership. Through our ownership in U.S. Propane, we own an approximate 6 percent interest in Heritage Propane Partners.

Principles of consolidation -- The accompanying consolidated financial statements include the accounts of Atmos Energy Corporation and its subsidiaries. Each subsidiary is wholly-owned and all material intercompany transactions have been eliminated.

Prior to April 1, 2001, we owned a 45 percent interest in Woodward Marketing and accounted for that ownership using the equity method of accounting for investments. Subsequent to April 1, 2001, we own 100 percent of Woodward Marketing and account for that ownership on a consolidated basis. See Note 2, "Acquisitions".

Subsequent to August 10, 2000 we account for our interest in U.S. Propane

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

using the equity method of accounting.

Intangible assets -- Intangible assets consist of customer contracts. The weighted average amortization period is 10 years.

37

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

Goodwill -- Total goodwill was \$64.7 million and \$3.1 million at September 30, 2001 and 2000. Goodwill applicable to the utility segment was \$49.8 million and zero at September 30, 2001 and 2000. Goodwill applicable to the non-regulated segment was \$14.9 million and \$3.1 million at September 30, 2001 and 2000. Goodwill applicable to the utility segment resulted from the acquisition of the Louisiana Gas Service Company assets on July 1, 2001 and is not subject to amortization under the provisions of Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets." Goodwill applicable to the non-regulated segment was amortized over 20 years through September 30, 2001. Effective October 1, 2001, goodwill applicable to the non-regulated segment will not be amortized under the provisions of Statement of Financial Accounting Standards No. 142.

Impairment of Long-Lived Assets -- We periodically evaluate whether events or circumstances have occurred that indicate that excess of cost over net assets acquired and other long-lived assets may not be recoverable or that the remaining useful life may warrant revision. When such events or circumstances are present, we assess the recoverability of long-lived assets by determining whether the carrying value will be recovered through the expected future cash flows. In the event the sum of the expected future cash flows resulting from the use of the asset is less than the carrying value of the asset, an impairment loss equal to the excess of the asset's carrying value over its fair value is recorded. To date, no such impairment has been recognized.

Regulation -- Our utility operations are subject to regulation with respect to rates, service, maintenance of accounting records and various other matters by the respective regulatory authorities in the states in which we operate. Our accounting policies recognize the financial effects of the ratemaking and accounting practices and policies of the various regulatory commissions. Regulated utility operations are accounted for in accordance with Statement of Financial Accounting Standards No. 71, "Accounting for the Effects of Certain Types of Regulation." This statement requires cost-based rate regulated entities that meet certain criteria to reflect the authorized recovery of costs due to regulatory decisions in their financial statements.

We record regulatory assets which represent assets that are being recovered through customer rates or are probable of being recovered through customer rates. Significant regulatory assets as of September 30, 2001 included the following: merger and integration costs of \$24.2 million, net of related reserves and accumulated amortization and environmental costs of \$3.7 million. Regulatory liabilities represent probable future reductions in revenues associated with amounts that are to be credited to customers through the ratemaking process. As of September 30, 2001, we had recorded a regulatory liability of \$3.8 million for deferred income taxes.

Revenue recognition -- Sales of natural gas are billed on a monthly cycle basis; however, the billing cycle periods for certain classes of customers do not necessarily coincide with accounting periods used for financial reporting purposes. We follow the revenue accrual method of accounting for natural gas revenues whereby revenues applicable to gas delivered to customers, but not yet billed under the cycle billing method, are estimated and accrued and the related

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

costs are charged to expense. Estimated losses due to credit risk are reserved at the time revenue is recognized.

Accounts receivable and allowance for doubtful accounts -- Accounts receivable consists of natural gas sales to residential, commercial, industrial, agricultural and other customers. The allowance for doubtful accounts is computed based on the aging of outstanding accounts receivable and historical collections experience and represents in management's opinion, an adequate allowance to provide for probable uncollectable accounts.

Utility property, plant and equipment -- Utility property, plant and equipment is stated at original cost net of contributions in aid of construction. The cost of additions includes direct construction costs, payroll related costs (taxes, pensions and other fringe benefits), administrative and general costs and an allowance for funds used during construction. (See allowance for funds used during construction below). Major renewals

38

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

and betterments are capitalized while the costs of maintenance and repairs are charged to expense as incurred. The costs of large projects are accumulated in construction in progress until the project is completed. When the project is completed, tested and placed in service, the balance is transferred to the utility plant in service account included in the rate base and depreciation begins. Property, plant and equipment is depreciated at various rates on a straight-line basis over the estimated useful lives of the assets. The composite rates were 3.7 percent for 2001, 4.1 percent for 2000 and 4.0 percent for 1999. At the time property, plant and equipment is retired, the cost, plus removal expenses less salvage, is charged to accumulated depreciation.

Allowance for funds used during construction -- Allowance for funds used during construction represents the estimated cost of funds used to finance the construction of major projects. Under regulatory practices, the costs are capitalized and included in rate base for ratemaking purposes when the completed projects are placed in service. Interest expense of \$1.2 million and \$3.7 million were capitalized in 2001 and 1999. No interest expense was capitalized during 2000.

Non-utility property, plant and equipment -- Balances are stated at cost and depreciation is generally computed on the straight-line method for financial reporting purposes.

Inventories -- Inventories consist primarily of materials and supplies and merchandise held for resale. These inventories are stated at the lower of average cost or market.

Gas stored underground -- Net additions of inventory gas to storage and withdrawals of inventory gas from storage are priced using the average cost method for all our utility divisions, except for the United Cities Gas Division, where it is priced on the first-in first-out method. Gas stored underground and owned by Atmos Pipeline and Storage is priced on the last-in first-out method. Pursuant to the United Cities Gas Division's purchased gas adjustment clause, the liquidation of a LIFO layer would be reflected in subsequent gas adjustments in customer rates and does not affect the results of operations. Gas in storage that is retained as cushion gas to maintain reservoir pressure is classified as property, plant and equipment and is priced at cost.

Risk management assets, non-regulated segment -- We use storage,

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

transportation and requirements contracts, forwards, over-the-counter and exchange-traded options, futures and swap contracts to conduct our risk management activities. We use the mark-to-market method to account for these activities in accordance with Emerging Issues Task Force Issue No. 98-10, "Accounting for Energy Trading and Risk Management Activities." Under this method, the aforementioned contracts are reflected at fair value, inclusive of future servicing costs and valuation adjustments, with resulting unrealized gains and losses recorded as assets or liabilities from risk management activities on the consolidated balance sheet. Current period changes in the assets and liabilities from risk management activities are recognized as net gains or losses on the consolidated statement of income. Changes in the assets and liabilities from risk management activity result primarily from changes in the valuation of the portfolio of contracts, maturity and settlement of contracts and newly originated transactions. Market prices and models used to value these transactions reflect our best estimate considering various factors including closing exchange and over-the-counter quotations, time value and volatility factors underlying the contracts. Values are adjusted to reflect the potential impact of liquidating our positions in an orderly manner over a reasonable period of time under present market conditions. Changes in market prices directly affect our estimate of the fair value of these transactions.

At September 30, 2001, we had 3,800 open contracts, representing 2.3 Bcf notional volumes, that were marked to market with average contract maturities of less than two years. The \$4.5 million mark-to-market gain associated with these positions was recorded as unrealized trading margin on the consolidated statement of income.

Effective April 1, 2001, natural gas sales from our natural gas trading operations are netted against purchased gas costs and shown as gas trading margin on the consolidated statements of income. For the six months ended September 30, 2001, our gas trading margin consisted of a \$4.0 million realized trading loss and a \$4.5 million unrealized trading gain.

39

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

Risk management assets, utility segment -- Our business units have entered into financial instruments for the 2001-2002 heating season. The purpose of entering into these financial instruments is to protect us and our customers from unusually large winter period gas price increases. We use the mark-to-market method to account for these activities as described above. In accordance with Financial Accounting Standards No. 71 "Accounting for the Effects of Certain Types of Regulation", current period changes in the assets and liabilities from risk management activities are recorded as deferred gas costs on the consolidated balance sheet. Accordingly, there is no earnings impact as a result of the use of these financial instruments. See Note 14. Upon maturity, the contracts are recognized in purchased gas cost.

Income taxes -- Income taxes are provided based on the liability method, resulting in income tax assets and liabilities due to temporary differences. Temporary differences are differences between the tax bases of assets and liabilities and their reported amounts in the financial statements that will result in taxable or deductible amounts in future years. The liability method requires the effect of tax rate changes on current and accumulated deferred income taxes to be reflected in the period in which the rate change was enacted. The liability method also requires that deferred tax assets be reduced by a valuation allowance unless it is more likely than not that the assets will be realized.

Cash and cash equivalents -- We consider all highly liquid investments with

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

an initial or remaining maturity of three months or less to be cash equivalents.

Deferred charges and other assets -- Deferred charges and other assets at September 30, 2001 and 2000 include merger and integration costs of \$24.2 million and \$30.0 million, net of the related reserve for possible non-recovery and accumulated amortization; the investment in Woodward Marketing of \$17.4 million at September 30, 2000; and the indirect investment in Heritage Propane Partners of \$23.8 million and \$25.0 million in 2001 and 2000. Also included in deferred charges and other assets are assets of our qualified defined benefit retirement plans in excess of the plans' obligations of \$44.4 million and \$36.1 million, assets related to the nonqualified retirement plans of \$25.1 million and \$28.6 million, unamortized debt expense of \$9.7 million and \$5.4 million and deferred asset projects of \$12.6 million and \$10.9 million in 2001 and 2000.

Deferred credits and other liabilities -- Deferred credits and other liabilities at September 30, 2001 and 2000 include customer advances for construction of \$11.7 million and \$10.9 million; obligations under other postretirement benefits of \$38.1 million and \$25.2 million in 2001 and 2000; and obligations under our nonqualified retirement plans of \$34.2 million and \$31.0 million in 2001 and 2000.

Earnings per share -- The calculation of basic earnings per share is based on net income divided by the weighted average number of common shares outstanding. The calculation of diluted earnings per share is based on net income divided by the weighted average number of shares outstanding plus the dilutive shares related to the United Cities Gas Division's Long-term Stock Plan, the Long-Term Incentive Plan and Atmos' Restricted Stock Grant Plan.

Comprehensive income -- In 1999, we adopted Statement of Financial Accounting Standards No. 130, "Reporting Comprehensive Income." This statement requires reporting of comprehensive income and its components (revenues, expenses, gains and losses) in any complete presentation of general purpose financial statements. Comprehensive income describes all changes, except those resulting from investments by owners and distributions to owners, in the equity of a business enterprise from transactions and other events including, as applicable, foreign-currency items, minimum pension liability adjustments and unrealized gains and losses on certain investments in debt and equity securities. While the primary component of comprehensive income is our reported net income, the other components of comprehensive income relate to unrealized gains and losses associated with certain investments held as available for sale.

Use of estimates -- The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial

40

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

statements and revenues and expenses during the reporting period. Actual results could differ from those estimates.

Weather insurance and hedges -- In June 2001, we purchased a three year weather insurance policy with an option to cancel in the third year if we obtain weather protection in our rate structures. The policy is for our Texas and Louisiana operations and covers the entire heating season of October to March beginning with the 2001 - 2002 heating season. The cost of the three year policy was approximately \$13.2 million which was prepaid and will be amortized over the appropriate heating seasons. The insurance is designed to protect against

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

weather that is warmer than normal.

In July 2000, we entered into an agreement to purchase weather hedges for our Texas and Louisiana operations effective for the 2000 - 2001 heating season. The hedges were designed to help mitigate the effects of weather that was at least seven percent warmer than normal in both Texas and Louisiana while preserving any upside. The cost of the weather hedges was approximately \$4.9 million which was amortized over the 2000 - 2001 heating season. The cost of the weather hedges was more than offset by the positive effects of colder weather on our gross profit.

Recently issued accounting standards not yet adopted -- In June 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 141, "Business Combinations." This statement addresses financial accounting and reporting for business combinations and supersedes APB Opinion No. 16, "Business Combinations," and Statement of Financial Accounting Standards No. 38, "Accounting for Pre-acquisition Contingencies of Purchased Enterprises." All business combinations in the scope of this Statement are to be accounted for using the purchase method. The provisions of this Statement were applied to the acquisition of Louisiana Gas Service Company and LGS Natural Gas Company effective July 1, 2001.

In June 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets." This Statement addresses financial accounting and reporting for acquired goodwill and other intangible assets and supersedes APB Opinion No. 17, "Intangible Assets." This Statement addresses the accounting for goodwill and other intangible assets after they have been initially recognized in the financial statements. This Statement requires that goodwill and other intangible assets deemed to have indefinite lives will no longer be amortized but will be subject to impairment tests. This Statement was adopted effective July 1, 2001 with respect to goodwill or other intangible assets acquired in connection with the Louisiana Gas Service Company and LGS Natural Gas Company acquisition. See Note 2 "Acquisitions". With respect to our other intangible assets and goodwill, this Statement was adopted effective October 1, 2001. The proforma effect on goodwill amortization of adopting Statement of Financial Accounting Standards No. 142 is not material.

In August 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." This Statement addresses financial accounting and reporting for the impairment or disposal of long-lived assets. The provisions of this Statement are effective for financial statements issued for fiscal years beginning after December 15, 2001. We are currently in the process of evaluating the impact the adoption of this Statement will have on our financial condition, results of operations or net cash flows.

Reclassifications -- Certain prior year amounts have been reclassified to conform with the current year presentation.

41

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

2. ACQUISITIONS

COMPLETION OF ACQUISITION OF REMAINING EQUITY INTEREST IN WOODWARD MARKETING

In April 2001, we acquired from Woodward Marketing, Inc. the 55 percent interest in Woodward Marketing, L.L.C. that we did not already own in exchange

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

for 1,423,193 restricted shares of our common stock. The consideration is subject to an upward adjustment, based on our share price, of up to 232,547 shares plus an amount of shares to compensate for dividends paid after the completion of the acquisition. The pro forma effects for the fiscal year ended September 30, 2001 of combining 100 percent of Woodward Marketing's results of operations with Atmos' consolidated results of operations are a \$17.9 million increase in gas trading margin to \$18.4 million, elimination of the \$8.1 million equity in earnings of Woodward Marketing, a \$6.2 million increase in net income to \$62.3 million and a \$.13 increase in diluted earnings per share to \$1.60.

Such pro forma effects for the fiscal year ended September 30, 2000 are a \$16.2 million increase in gas trading margin to \$16.2 million, elimination of the \$7.3 million equity in earnings of Woodward Marketing, a \$5.7 million increase in net income to \$41.2 million and a \$.12 increase in diluted earnings per share to \$1.26.

The acquisition enabled us to control Woodward Marketing's future direction and strategies. Results of 100 percent of Woodward Marketing's operations are consolidated with our results of operations for the third and fourth quarter of fiscal year 2001.

The following table summarizes the fair market value of the 55 percent of Woodward Marketing's assets acquired and liabilities assumed as of April 1, 2001, in thousands:

Net property, plant and equipment.....	\$ 1,649
Total current assets.....	128,386
Other intangible assets.....	250
Goodwill.....	12,310
Deferred charges and other assets.....	(12,085)

Total assets acquired.....	130,510
Current liabilities.....	(102,997)
Noncurrent liabilities.....	(856)

Net assets acquired.....	\$ 26,657
	=====

Other intangible assets represent the fair market value of non-compete contracts. The cost assigned to these contracts is being amortized over 10 years. The value assigned to goodwill was based on our belief that ownership of 100 percent of Woodward Marketing would enable us to exercise greater control over Woodward Marketing's operation, thereby increasing its value. We expect that the goodwill amount will not be deductible for tax purposes.

COMPLETION OF ACQUISITION OF NATURAL GAS OPERATIONS IN LOUISIANA

Effective July 1, 2001, we acquired the assets of Louisiana Gas Service Company and LGS Natural Gas Company for \$363.4 million. The acquired assets provide natural gas distribution service through approximately 279,000 residential and commercial meters in southeastern and northern Louisiana. The service territory includes the suburban areas of metropolitan New Orleans (excluding Orleans Parish), the north shore of Lake Pontchartrain and the Monroe/West Monroe metropolitan area. The non-regulated operations, which includes an intrastate pipeline company, provide gas transportation service to industrial customers in Louisiana and to the acquired assets.

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

The acquisition increased the size of our operations in Louisiana and allowed us to achieve certain synergies and cost savings by combining the acquired operations with our existing Louisiana operations. Results of operations of the Louisiana Gas Service assets are consolidated with our results of operations for the fourth quarter of fiscal year 2001.

The following table summarizes the fair market values of the assets acquired and liabilities assumed as of July 1, 2001, in thousands:

Net property, plant and equipment.....	\$313,251
Total current assets.....	31,423
Other intangible assets.....	11,200
Goodwill.....	49,793
Noncurrent assets from risk management activities.....	5,355
Deferred charges and other assets.....	958

Total assets acquired.....	411,980
Current liabilities.....	(45,972)
Noncurrent liabilities.....	(2,609)

Net assets acquired.....	\$363,399
	=====

Other intangible assets represent the fair market value of industrial customer contracts and are being amortized over 10 years. The value assigned to goodwill was based on our belief that the acquisition of the Louisiana Gas assets will enable us to realize cost savings in the state of Louisiana when combined with our existing Louisiana operations. We expect that the entire goodwill amount will be deductible for tax purposes.

The pro forma effects for the fiscal year ended September 30, 2001 of combining the results of operations of the Louisiana Gas assets with our consolidated results of operations are a \$306.2 million increase in operating revenues to \$1.7 billion, a \$24.2 million decrease in net income to \$31.9 million and a \$.64 decrease in diluted earnings per share to \$.83.

Such pro forma effects for the fiscal year ended September 30, 2000 are a \$186.1 million increase in operating revenues to \$1.0 billion, a \$6.9 million decrease in net income to \$29.0 million and a \$.22 decrease in diluted earnings per share to \$.92.

PENDING ACQUISITION OF MISSISSIPPI VALLEY GAS COMPANY

In September 2001, we entered into a definitive agreement to acquire Mississippi Valley Gas Company, a privately held natural gas utility. This acquisition will be accounted for as a purchase and will be acquired using \$75.0 million in cash and the issuance of \$75.0 million in our common stock. We will also assume Mississippi Valley Gas' outstanding debt, net of working capital, of approximately \$45.0 million. Mississippi Valley Gas provides natural gas distribution service to more than 261,500 residential, commercial, industrial and other customers located primarily in the northern and central regions of Mississippi. Mississippi Valley Gas has two underground storage facilities with 2.05 Bcf of working gas capacity. The acquisition must be approved by the Mississippi Public Service Commission, the issuance of our stock must be approved by five of the states in which we operate and the transaction must

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

comply with the provisions of the Hart-Scott-Rodino Antitrust Improvements Act. It is anticipated that the acquisition will be completed in fiscal 2002.

43

Most of the Senior Notes and First Mortgage Bonds contain provisions that allow us to prepay the outstanding balance in whole at any time, subject to a prepayment premium. The Senior Note agreements and First Mortgage Bond indentures provide for certain cash flow requirements and restrictions on additional indebtedness, sale of assets and payment of dividends. Under the most restrictive of such covenants, cumulative cash dividends paid after December 31,

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

1988 may not exceed the sum of accumulated net income for periods after December 31, 1988 plus \$15.0 million. At September 30, 2001, approximately \$56.7 million of retained earnings was unrestricted.

44

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

As of September 30, 2001, all of the Greeley Gas Division utility plant assets with a net book value of approximately \$174.4 million are subject to a lien under the 9.4 percent Series J First Mortgage Bonds assumed by us in the acquisition of Greeley Gas Company. Also, substantially all of the United Cities Gas Division utility plant assets, totaling approximately \$314.1 million, are subject to a lien under the Indenture of Mortgage of the Series P through V First Mortgage Bonds.

Based on the borrowing rates currently available to us for debt with similar terms and remaining average maturities, the fair value of long-term debt at September 30, 2001 and 2000 is estimated, using discounted cash flow analysis, to be \$709.9 million and \$368.8 million.

Maturities of long-term debt at September 30, 2001 are as follows (in thousands):

2002.....	\$ 20,695
2003.....	20,380
2004.....	17,866
2005.....	16,196
2006.....	14,259
Thereafter.....	623,698

	\$713,094
	=====

SHORT-TERM DEBT

At September 30, 2001, short-term debt was composed of \$171.0 million of commercial paper and \$30.2 million outstanding under two bank credit facilities. At September 30, 2000, it was composed of \$250.0 million of commercial paper. The weighted average interest rate on short-term borrowings outstanding was 4.0 percent and 7.0 percent at September 30, 2001 and 2000.

Committed credit facilities

We have short-term committed credit facilities totaling \$318.0 million. One short-term unsecured credit facility is for \$300.0 million and serves as a backup liquidity facility for our commercial paper program. Our commercial paper is rated A-2 by Standard and Poor's and P-2 by Moody's. At September 30, 2001, \$171.0 million of commercial paper was outstanding. On August 2, 2001, this facility was renewed for \$300.0 million with an option to increase the amount by \$100.0 million. We have a second facility in place for \$18.0 million. At September 30, 2001, \$2.2 million was outstanding under this credit facility. No amounts were outstanding under this credit facility at September 30, 2000. These credit facilities are negotiated at least annually and are used for working capital purposes.

Uncommitted credit facilities

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

Our Woodward Marketing subsidiary has an uncommitted credit facility for \$140.0 million which is used for its non-regulated business. Atmos Energy Marketing, LLC, our wholly-owned subsidiary, is the sole guarantor of all amounts outstanding under this facility. At September 30, 2001, \$28.0 million was outstanding under this credit facility. Related letters of credit totaling \$38.8 million further reduced the amount available under this facility.

We also have unsecured short-term uncommitted credit lines from two banks totaling \$40.0 million. There were no borrowings under these uncommitted credit facilities at September 30, 2001 and 2000. The uncommitted lines are renewed or renegotiated at least annually with varying terms and we pay no fee for the availability of the lines. Borrowings under these lines are made on a when- and as-available basis at the discretion of the banks.

45

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

In addition, Woodward Marketing has up to \$100.0 million available from Atmos for its non-regulated business. At September 30, 2001, \$100.0 million was outstanding.

4. INCOME TAXES

We have tax credit carryforwards amounting to \$12.4 million, the majority of which represent alternative minimum tax credits which do not expire. We also have net operating loss carryforwards for state income tax purposes amounting to \$0.8 million which expire at varying times depending on the jurisdiction in which the net operating loss was generated.

5. CONTINGENCIES

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

LITIGATION

Greeley Gas Division

On September 23, 1999, a suit was filed in the District Court of Stevens County, Kansas, by Quinque Operating Company, Tom Boles and Robert Ditto, against more than 200 companies in the natural gas industry including us and our Greeley Gas Division. The plaintiffs, who purport to represent a class consisting of gas producers, royalty owners, overriding royalty owners, working interest owners and state taxing authorities, accuse the defendants of underpaying royalties on gas taken from wells situated on non-federal and non-Indian lands throughout the United States and offshore waters predicated upon allegations that the defendants' gas measurements are simply inaccurate and that the defendants failed to comply with applicable regulations and industry standards over the last 25 years. Although the plaintiffs do not specifically allege an amount of damages, they contend that this suit is brought to recover billions of dollars in revenues that the defendants have allegedly unlawfully diverted from the plaintiffs to themselves. On April 10, 2000, this case was consolidated for pre-trial proceedings with other similar pending litigation in federal court in Wyoming in which we are also a defendant along with over 200 other defendants in the case of In Re Natural Gas Royalties Quitam Litigation. In January 2001, the federal court elected to remand this case back to the Kansas state court. A reconsideration of remand was filed, but it was denied. The state court now has jurisdiction over this proceeding and has issued a preliminary case management order. We believe that the plaintiffs' claims are lacking in merit, and we intend to vigorously defend this action. While the results of this litigation cannot be predicted with certainty, we believe the final outcome of such litigation will not have a material adverse effect on our financial condition, results of operations or net cash flows because we believe that we have adequate insurance and/or reserves to cover any damages that may ultimately be awarded.

Energas Division

On May 18, 2001, a suit was filed in the 99th District Court of Lubbock County, Texas, by the City of Lubbock, Texas, and the West Texas Municipal Agency against Stewart & Stevenson Energy Products, Inc., a division of GE Packaged Power, Inc. ("GE") and our Energas Division. The action arises out of (i) the construction and installation of a gas-fired electric generating facility designed and installed by GE and (ii) the natural gas pipeline, which provides natural gas to the facility, that was designed and installed by our Energas Division. The plaintiffs allege that they incurred damages as a result of certain corrosive products that were introduced into the facility's turbine that damaged the turbine and necessitated repair costs of

47

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

approximately \$0.9 million and consequential damages of approximately \$4.7 million comprised of electric power purchases made by the plaintiffs from other sources while the facility was inoperative or operating below specifications. The causes of action asserted by the plaintiffs against the Energas Division include breach of contract, breach of warranty and negligence. We have denied any liability and intend to vigorously defend against the plaintiffs' claims. While the results of this litigation cannot be predicted with certainty, we believe the final outcome of such litigation will not have a material adverse effect on our financial condition, results of operations or net cash flows because we believe that we have adequate insurance and/or reserves to cover any

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

damages that may ultimately be awarded.

Atmos Energy Louisiana Gas Division

Prior to our acquisition of the assets of Louisiana Gas Service Company, a division of Citizens Communications Company on July 1, 2001, Louisiana Gas Service Company was involved in a proceeding with the Louisiana Public Service Commission relating to past costs associated with the purchase of gas that it charged to its customers. Subsequent to our acquisition of the Louisiana Gas assets on July 1, 2001, we have taken over the defense of this proceeding and will have responsibility for administering and assuring the payment of refunds and/or credits to ratepayers that may arise from Citizens Communications' past activities with respect to the purchased gas costs. However, we believe the outcome of this proceeding will not have a material adverse impact on our financial condition, results of operations or net cash flows as Citizens Communications has agreed to fully indemnify us for any liability that may arise out of this proceeding.

United Cities Propane Gas, Inc.

United Cities Propane Gas, Inc., one of our wholly-owned subsidiaries, is a party to an action filed in June 2000 which is pending in the Circuit Court of Sevier County, Tennessee. The plaintiffs' claims arise out of injuries alleged to have been caused by a low-level propane explosion. The plaintiffs seek to recover damages of \$13.0 million. Discovery activities have begun in this case. We have denied any liability, and we intend to vigorously defend against the plaintiffs' claims. While the results of this litigation cannot be predicted with certainty, we believe the final outcome of such litigation will not have a material adverse effect on our financial condition, results of operations or net cash flows because we believe that we have adequate insurance and/or reserves to cover any damages that may ultimately be awarded.

We are a party to other litigation and claims that arise out of our ordinary business. While the results of such litigation and claims cannot be predicted with certainty, we believe the final outcome of such litigation and claims will not have a material adverse effect on our financial condition, results of operations or net cash flows because we believe that we have adequate insurance and reserves to cover any damages that may ultimately be awarded.

ENVIRONMENTAL MATTERS

Manufactured Gas Plant Sites

The United Cities Gas Division is the owner or previous owner of manufactured gas plant sites in Johnson City and Bristol, Tennessee and Hannibal, Missouri which were used to supply gas prior to availability of natural gas. The gas manufacturing process resulted in certain by-products and residual materials including coal tar. The manufacturing process used by our predecessors was an acceptable and satisfactory process at the time such operations were being conducted. Under current environmental protection laws and regulations, we may be responsible for response actions with respect to such materials if response actions are necessary.

United Cities Gas Company and the Tennessee Department of Environment and Conservation entered into a consent order effective January 23, 1997, to facilitate the investigation, removal and remediation of the Johnson City site. United Cities Gas Company began the implementation of the consent order in the first

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

quarter of 1997 which continued through September 30, 2001. The investigative phase of the work at the site has been completed. An interim removal action was completed in June 2001. The Tennessee Regulatory Authority granted United Cities Gas Company permission to defer, until its next rate case, all costs incurred in Tennessee in connection with state and federally mandated environmental control requirements.

On July 22, 1998, we entered into an Abatement Order on Consent with the Missouri Department of Natural Resources addressing the former manufactured gas plant located in Hannibal, Missouri. Through our United Cities Gas Division, we agreed to perform a removal action, a subsequent site evaluation and to reimburse the response costs incurred by the state of Missouri in connection with the property. The removal action was conducted and completed in August 1998, and the site evaluation field work was conducted in August 1999. A risk assessment for the site is currently being performed. On March 9, 1999, the Missouri Public Service Commission issued an Order authorizing us to defer the costs associated with this site until March 9, 2001. A renewal of the Order has been requested. The matter is still pending before the Commission.

As of September 30, 2001, we had incurred costs of approximately \$0.9 million for the investigations of the Johnson City and Bristol, Tennessee and Hannibal, Missouri sites and had a remaining accrual relating to these sites of \$0.8 million.

Mercury Contamination Sites

We have completed investigation and remediation activities pursuant to Consent Orders between the Kansas Department of Health and Environment and United Cities Gas Company. The Orders provided for the investigation and remediation of mercury contamination at gas pipeline sites which utilize or formerly utilized mercury meter equipment in Kansas. The Final Interim Characterization and Remediation Report has been submitted to the Kansas Department of Health. We are currently in the process of amending the Orders with the Kansas Department of Health to include all mercury meters that belonged to our Greeley Gas Division before the merger with United Cities Gas Company on July 31, 1997. These sites will be investigated and any necessary remediation will be enforced. As of September 30, 2001, we had incurred costs of \$0.1 million for these sites and had a remaining accrual of \$0.3 million for recovery. The Kansas Corporation Commission has authorized us to defer these costs and seek recovery in a future rate case.

We are a party to other environmental matters and claims, including those discussed above, that arise out of our ordinary business. While the ultimate results of response actions to these environmental matters and claims cannot be predicted with certainty, we believe the final outcome of such response actions will not have a material adverse effect on our financial condition, results of operations or net cash flows because we believe that the expenditures related to such response actions will either be recovered through rates, shared with other parties or covered by adequate insurance or reserves.

6. COMMON STOCK AND STOCK OPTIONS

SHAREHOLDERS' RIGHTS PLAN

We have a Rights Agreement under which each right ("Right") will entitle the holder thereof, until May 10, 2008 or the date of redemption of the Rights, to buy one share of Common Stock of Atmos at the exercise price of \$80.00, subject to adjustment. At no time will the Rights have any voting rights. The exercise price payable and the number of shares of Common Stock or other

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

securities or property issuable upon exercise of the Rights are subject to adjustment from time to time to prevent dilution. At the date upon which the rights become separate from our Common Stock (the "Distribution Date"), we will issue one right with each share of Common Stock that becomes outstanding so that all shares of Common Stock will have attached Rights. After the Distribution Date, we may issue Rights when we issue Common Stock if the Board deems such issuance to be necessary or appropriate.

49

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

The Rights will separate from the Common Stock and a Distribution Date will occur upon the occurrence of certain events specified in the Agreement, including but not limited to, the acquisition by certain persons of at least 15 percent of the beneficial ownership of our Common Stock. The Rights have certain anti-takeover effects and may cause substantial dilution to a person or entity that attempts to acquire the Company on terms not approved by the Board of Directors except pursuant to an offer conditioned upon a substantial number of Rights being acquired. The Rights should not interfere with any merger or other business combination approved by the Board of Directors because, prior to the time that the Rights become exercisable or transferable, the Rights may be redeemed by us at \$.01 per Right.

SHARES ISSUED UNDER VARIOUS PLANS

The following table presents the number of shares issued under our various plans in 2001 and 2000, as well as the number of shares available for future issuance at September 30, 2001.

	SHARES ISSUED		SHARES AVAILABLE FOR ISSUANCE AT SEPTEMBER 30,
	2001	2000	2001
Restricted Stock Grant Plan.....	--	--	732,750

United Cities Long-Term Stock Plan.....	15,300	4,200	168,550
Long-Term Incentive Plan.....	17,172	--	1,482,828
Equity Incentive and Deferred Compensation Plan for Non-Employee Directors.....	2,740	--	147,260

RESTRICTED STOCK GRANT PLAN

Our Restricted Stock Grant Plan for management and key employees of the Company, which became effective October 1, 1987 and was amended and restated in February 1998, provides for awards of common stock that are subject to certain restrictions. The Restricted Stock Grant Plan is administered by the Board of Directors. The members of the Board who are not employees of Atmos make the final determinations regarding participation in the Plan, awards under the Plan and restrictions on the restricted stock awarded. The restricted stock may consist of previously issued shares purchased on the open market or shares issued directly from us. During 1998, we increased the number of shares of our common stock that may be issued under the Restricted Stock Grant Plan by 650,000

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

shares. Compensation expense of \$1.1 million, \$2.3 million and \$1.6 million was recognized in 2001, 2000 and 1999 in connection with the vesting of shares awarded under the Plan.

EMPLOYEE STOCK OWNERSHIP PLAN

Prior to January 1, 1999, we had an Employee Stock Ownership Plan and the United Cities Gas Division had a 401(k) savings plan. The Employee Stock Ownership Plan was amended effective January 1, 1999, as is more fully discussed in Note 7.

DIRECT STOCK PURCHASE PLAN

We also have a Direct Stock Purchase Plan. Participants in the Direct Stock Purchase Plan may have all or part of their dividends reinvested at a three percent discount from market prices. Direct Stock Purchase Plan participants may purchase additional shares of Atmos common stock as often as weekly with voluntary cash payments of at least \$25, up to an annual maximum of \$100,000.

50

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

OUTSIDE DIRECTORS STOCK-FOR-FEE PLAN

In November 1994, the Board adopted the Outside Directors Stock-for-Fee Plan which was approved by the shareholders of Atmos in February 1995 and was amended and restated in November 1997. The plan permits non-employee directors to receive all or part of their annual retainer and meeting fees in stock rather than in cash.

EQUITY INCENTIVE AND DEFERRED COMPENSATION PLAN FOR NON-EMPLOYEE DIRECTORS

In November 1998, the Board adopted the Equity Incentive and Deferred Compensation Plan for Non-Employee Directors which was approved by the shareholders of Atmos in February 1999. Such plan represents an amendment to the Atmos Energy Corporation Deferred Compensation Plan for Outside Directors adopted by the Company on May 10, 1990 and replaced the pension payable under the Company's Retirement Plan for Non-Employee Directors. Only non-employee directors of Atmos are eligible to participate in the Equity Incentive and Deferred Compensation Plan, the purpose of which is to provide non-employee directors with the opportunity to defer receipt of compensation for services rendered to the Company, invest deferred compensation into either a cash account or a stock account and to receive an annual grant of share units for each year of service on the Board.

STOCK-BASED COMPENSATION PLANS

We have two stock-based compensation plans that provide for the granting of stock options to officers, key employees and non-employee directors. The objectives of these plans include attracting and retaining the best personnel, providing for additional performance incentives and promoting the success of Atmos by providing employees the opportunity to acquire common stock.

UNITED CITIES LONG-TERM STOCK PLAN

Prior to the merger with Atmos, certain United Cities Gas Company officers and key employees participated in the United Cities Long-Term Stock Plan implemented in 1989. At the time of the merger on July 31, 1997, Atmos adopted this plan by registering a total of 250,000 shares of Atmos stock to be issued under the Long-Term Stock Plan for the United Cities Division. Under this plan,

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

incentive stock options, nonqualified stock options, stock appreciation rights, restricted stock or any combination thereof may be granted to officers and key employees of the United Cities Gas Division. Options granted under the plan become exercisable at a rate of 20 percent per year and expire 10 years after the date of grant. During 2001, 15,300 options were exercised under the plan. At September 30, 2001, there were 19,300 options outstanding, all of which were fully vested. No incentive stock options, nonqualified stock options, stock appreciation rights or restricted stock have been granted under the plan since 1996. Because of the limited nature of this plan, the pro forma effects of applying Statement of Financial Accounting Standards No. 123 would have less than a \$.01 per diluted share effect on earnings per share or approximately \$4,764, \$8,580 and \$30,852 for 2001, 2000 and 1999.

LONG-TERM INCENTIVE PLAN

On August 12, 1998, the Board of Directors approved and adopted the 1998 Long-Term Incentive Plan, which became effective October 1, 1998 after approval by the shareholders of Atmos. The Long Term Incentive Plan represents a part of our Total Rewards strategy which we developed as a result of a study we conducted of all employee, executive and non-employee director compensation and benefits. The Long Term Incentive Plan is a comprehensive, long-term incentive compensation plan providing for discretionary awards of incentive stock options, non-qualified stock options, stock appreciation rights, bonus stock, restricted stock and performance-based stock to help attract, retain and reward employees and non-employee directors of Atmos and its subsidiaries.

51

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

We are authorized to grant awards for up to a maximum of 1,500,000 shares of common stock under the Long Term Incentive Plan subject to certain adjustment provisions. The option price is equal to the market price of our stock at the date of grant. The stock options expire 10 years from the date of the grant and options vest annually over a service period ranging from one to three years. At September 30, 2001, we had 1,009,330 options outstanding under the Long Term Incentive Plan at an exercise price ranging from \$14.68 to \$25.66.

In October 1995, Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation," was issued. This statement establishes a fair value-based method of accounting for employee stock options or similar equity instruments and encourages, but does not require, all companies to adopt that method of accounting for all of their employee stock compensation plans. Statement of Financial Accounting Standards No. 123 allows companies to continue to measure compensation cost for employee stock options or similar equity instruments using the intrinsic value method of accounting described in Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees". We have elected to continue using the intrinsic value method as prescribed by Accounting Principles Board No. 25. Under this method no compensation cost for stock options are recognized for stock option awards granted at or above fair market value.

A summary of activity for grants of stock options follows:

Exercisable -- September 30, 2001.....	285,448	\$21.37

Pro Forma Fair Value Disclosures:

Had compensation expense for our stock options been recognized based on the fair value on the grant date under the methodology prescribed by Statement of Financial Accounting Standards No. 123, our net income and earnings per share for the three years ended September 30, would have been impacted as shown in the following table.

	2001	2000	1999
	-----	-----	-----
Net income -- as reported (millions).....	\$56.1	\$35.9	\$17.7
Net income -- pro forma (millions).....	\$55.7	\$35.7	\$17.6
Basic earnings per share -- as reported.....	\$1.47	\$1.14	\$0.58
Basic earnings per share -- pro forma.....	\$1.46	\$1.13	\$0.58
Diluted earnings per share -- as reported.....	\$1.47	\$1.14	\$0.58
Diluted earnings per share -- pro forma.....	\$1.46	\$1.13	\$0.57

In accordance with the fair value method of determining compensation expense, the weighted average grant date fair value per share of options granted was as follows:

- \$3.97 in fiscal 2001;
- \$2.88 in fiscal 2000; and
- \$4.10 in fiscal 1999.

53

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

We used the Black-Scholes pricing model to estimate the fair value of each option granted with the following weighted average assumptions for the years ended September 30:

	2001	2000	1999
	----	----	----
Expected Life (years).....	5	5	7
Interest rate.....	4.7%	5.8%	5.9%
Volatility.....	25.5%	25.1%	22.2%
Dividend yield.....	4.9%	5.0%	5.2%

7. EMPLOYEE RETIREMENT, STOCK OWNERSHIP AND OTHER PLANS

DEFINED BENEFIT PLANS

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

Effective January 1, 1999, we established the Atmos Pension Account Plan which covers substantially all employees of Atmos. Opening account balances were established for participants as of January 1, 1999 equal to the present value of their respective accrued benefits under the pension plans which were previously in effect as of December 31, 1998. The Pension Account Plan credits an allocation to each participant's account at the end of each year according to a formula based on the participant's age, service and total pay (excluding incentive pay).

The Pension Account Plan also provides for an additional annual allocation based upon a participant's age as of January 1, 1999 for those participants who were participants in the prior pension plans. The plan will credit this additional allocation each year through December 31, 2008. In addition, at the end of each year, a participant's account will be credited with interest on the employee's prior year account balance. A special grandfather benefit also applies through December 31, 2008, for participants who were at least age 50 as of January 1, 1999, and who were participants in one of the prior plans on December 31, 1998. Participants are fully vested in their account balances after five years of service and may choose to receive their account balances as a lump sum or an annuity.

Our funding policy is to contribute annually an amount in accordance with the requirements of the Employee Retirement Income Security Act of 1974. Contributions are intended to provide not only for benefits attributed to service to date but also for those expected to be earned in the future.

SUPPLEMENTAL EXECUTIVE BENEFITS PLANS

We have a nonqualified Supplemental Executive Benefits Plan which provides additional pension, disability and death benefits to the officers and certain other employees of Atmos. The Supplemental Executive Benefits Plan was amended and restated in August 1998. In addition, in August 1998, we adopted the Performance-Based Supplemental Executive Benefits Plan which covers all employees who become officers or business unit presidents after August 12, 1998 or any other employees selected by our Board of Directors in its discretion.

Assets for the Supplemental Plans are held in our rabbi trusts (see Note 12) and consist primarily of investments in equity mutual funds. The market value of the rabbi trusts amounted to \$25.1 million and \$28.6 million at September 30, 2001 and 2000. The assets in the rabbi trusts are included on our balance sheet under deferred charges and other assets and are not presented above as plan assets.

The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for the Supplemental Plans with accumulated benefit obligations in excess of plan assets were \$52.8 million, \$45.5 million and none, as of September 30, 2001, and \$47.4 million, \$41.1 million and none, as of September 30, 2000.

EMPLOYEE STOCK OWNERSHIP PLAN

Atmos sponsors an Employee Stock Ownership Plan for substantially all employees. Effective January 1, 1999 the Employee Stock Ownership Plan was amended to provide for deferral of a portion of a participant's salary of up to 21 percent. In addition, among other changes to the Employee Stock Ownership Plan, participants are provided with automatic matching contributions of 100 percent of each participant's salary reduction up to 4 percent of the participant's salary and are provided the option of taking out loans against their accounts subject to certain restrictions. Each participant enters into a salary reduction agreement with Atmos pursuant to which the participant's salary is reduced by an amount not more than 21 percent. Taxes on the amount by which the participant's salary is reduced are deferred pursuant to Section 401(k) of the Internal Revenue Code. The amount of the salary reduction is contributed by us to the Employee Stock Ownership Plan for the account of the participant. Matching contributions to the Plan were expensed as incurred and amounted to \$3.2 million, \$3.0 million, and \$2.4 million for 2001, 2000 and 1999. The directors may also approve discretionary contributions, subject to the provisions of the Internal Revenue Code of 1986 and applicable regulations of the Internal Revenue Service. No discretionary contributions were made for 2001, 2000, nor 1999.

VARIABLE PAY PLAN

The Variable Pay Plan was created to give each employee an opportunity to share in the success of Atmos based on certain criteria. Each fiscal year, we establish key performance measures for the Variable Pay Plan. These performance measures are considered critical to achieving business objectives for a given year and may include such things as growth in earnings, improved cash flows or crucial customer satisfaction and safety results. Each year a performance measure is established, and we make accruals during the year of the expected pay-out based on the best estimates available at that time.

8. OTHER POSTRETIREMENT BENEFITS

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

Prior to January 1, 1999, Atmos sponsored two postretirement plans other than pensions. Each provided health care benefits to retired employees. One provided benefits to the United Cities Gas Division retirees and the other provided medical benefits to all other retired Atmos employees.

Effective January 1, 1999, the United Cities plan was merged into the Atmos plan and began providing benefits to future retirees that are essentially the same as provided to other Atmos employees.

58

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

Substantially all of our employees become eligible for these benefits if they reach retirement age while working for us and attain certain specified years of service. In addition, participant contributions are required under the plan.

We record the accrued postretirement cost primarily in deferred credits and other liabilities. The following table sets forth the total liability currently recognized for the postretirement plan other than pensions for 2001 and 2000:

	2001	2000
	-----	-----
	(IN THOUSANDS)	
Change in benefit obligation:		
Benefit obligation at beginning of year.....	\$ 63,029	\$ 56,832

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

Net periodic postretirement cost, which is recorded as an operation expense, for the combined postretirement benefit plans for 2001, 2000 and 1999 included the following components:

	2001	2000	1999
	-----	-----	-----
(IN THOUSANDS)			
Components of net periodic postretirement cost:			
Service cost.....	\$2,274	\$2,543	\$2,150
Interest cost.....	5,434	4,119	4,360
Expected return on assets.....	(653)	(540)	(349)
Amortization of:			
Transition obligation.....	1,511	1,511	1,511
Prior service cost.....	520	520	520
Actuarial (gain) loss.....	--	(94)	648
	-----	-----	-----
Net periodic postretirement cost.....	\$9,086	\$8,059	\$8,840
	=====	=====	=====

Assumed health care cost trend rates have a significant effect on the amounts reported for the plans. A one-percentage point change in assumed health care cost trend rates would have the following effects on the latest actuarial calculations:

	1-PERCENTAGE POINT INCREASE	1-PERCENTAGE POINT DECREASE
	-----	-----
(IN THOUSANDS)		
Effect on total of service and interest cost components...	\$ 607	\$ (448)
Effect on postretirement benefit obligation.....	\$8,160	\$ (7,021)

We are currently recovering other postretirement benefits costs through our regulated rates under Statement of Financial Accounting Standards No. 106 accrual accounting in Colorado, Kansas, the majority of the Texas service area and Kentucky. We receive rate treatment as a cost of service item for other postretirement benefits costs on the pay-as-you-go basis in Louisiana. Other postretirement benefits costs have been specifically addressed in rate orders in

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

each jurisdiction served by the United Cities Gas Division or have been included in a rate case and not disallowed. Management believes that accrual accounting in accordance with Statement of Financial Accounting Standards No. 106 is appropriate and will continue to seek rate recovery of accrual-based expenses in its ratemaking jurisdictions that have not yet approved the recovery of these expenses.

9. EARNINGS PER SHARE

Basic earnings per share has been computed by dividing net income for the period by the weighted average number of common shares outstanding during the period. Diluted earnings per share has been computed by dividing net income for the period by the weighted average number of common shares outstanding during the period adjusted for restricted stock and other contingently issuable shares of common stock. Net income for the years ended September 30, 2001, 2000 and 1999 for basic and diluted earnings per share are the same, as there were no contingently issuable shares of stock whose issuance would have impacted

60

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

net income. A reconciliation between basic and diluted weighted average common shares outstanding at September 30 follows:

	2001	2000	1999
	-----	-----	-----
	(IN THOUSANDS)		
Weighted average common shares -- basic.....	38,156	31,461	30,566
Effect of dilutive securities:

Stock options.....	12	8	15
	-----	-----	-----
Weighted average common shares -- diluted.....	38,247	31,594	30,819
	=====	=====	=====

10. STATEMENT OF CASH FLOWS SUPPLEMENTAL DISCLOSURES

Supplemental disclosures of cash flow information for 2001, 2000 and 1999 are presented below.

	2001	2000	1999
	-----	-----	-----
	(IN THOUSANDS)		
Cash paid (received) for			
Interest.....	\$41,042	\$46,243	\$40,446
Income taxes.....	\$16,808	\$(7,989)	\$(7,184)

In connection with our transaction related to the sale of our propane business (see Note 1 of notes to consolidated financial statements), we contributed property, plant and equipment of \$38.9 million with a related accumulated depreciation of \$17.1 million and deferred charges and other assets

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

of \$3.9 million in exchange for an indirect investment in Heritage Propane Partners. In addition, we received net proceeds of \$6.5 million and recorded a gain on the transaction of \$5.8 million.

In May 2000, we completed the acquisition, which was accounted for as a purchase, of the Missouri natural gas distribution assets of Southwestern Energy Company and subsequent thereto, its operations were included in our consolidated results. We paid \$32.0 million in connection with this acquisition. Of the \$32.0 million paid in cash, we recorded property, plant and equipment of \$52.3 million with a related accumulated depreciation of \$21.7 million, accounts receivable of \$1.3 million, inventories of \$0.3 million and gas stored underground of \$2.0 million. In addition, we recorded accounts payable of \$0.2 million, taxes payable of \$0.4 million, customer deposits of \$1.2 million and deferred credits of \$0.4 million.

In April 2001, we completed the acquisition, which was accounted for as a purchase, of the remaining 55 percent of Woodward Marketing that we did not already own in exchange for 1,423,193 restricted shares of our common stock. Subsequent to the acquisition, Woodward Marketing's operations were included in our consolidated results. Consideration given for the stock purchase was \$26.7 million. In connection with the issuance of the stock for this acquisition, we recorded property, plant and equipment of \$2.1 million with a related accumulated depreciation of \$0.4 million, accounts receivable of \$94.8 million, gas stored underground of \$10.7 million, assets from risk management activities of \$9.8 million, intangible assets of \$0.2 million and goodwill of \$12.3 million. In addition, we received \$8.6 million in cash and \$4.5 million of cash held on deposit in margin accounts. We also reduced deferred charges and other assets by \$12.1 million which related to the net of the amounts received in the purchase and the removal of the 45 percent equity investment we had in Woodward Marketing which we had previously owned. Liabilities assumed in the acquisition included \$95.2 million in accounts payable, \$0.5 million in customer deposits, \$7.3 million in other current liabilities and \$0.8 million in deferred credits and other liabilities.

In July 2001, we completed the acquisition, which was accounted for as a purchase, of the natural gas operations of Louisiana Gas Service Company and LGS Natural Gas Company. Subsequent to the

61

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

acquisition, the operations of Louisiana Gas Service and LGS Natural Gas were included in our consolidated results. We paid \$363.4 million in cash in connection with this acquisition. We recorded property, plant and equipment of \$466.5 million with a related accumulated depreciation of \$153.2 million, accounts receivable of \$18.1 million, gas stored underground of \$12.4 million, a deferred gas credit of \$10.8 million, assets from risk management activities of \$11.7 million, noncurrent assets from risk management activities of \$5.3 million and deferred charges and other assets of \$1.0 million. In addition, we recorded intangible assets of \$11.2 million, goodwill of \$49.8 million and \$9.0 million in deferred tax assets. Liabilities assumed in the acquisition included \$12.8 million in accounts payable, \$16.0 million in customer deposits, \$14.1 million in liabilities from risk management activities, \$3.1 million in other current liabilities and \$11.6 million in deferred credits and other liabilities.

11. SEGMENT INFORMATION

Our determination of reportable segments considers the strategic operating units under which we manage sales of various products and services to customers

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

in differing regulatory environments. The accounting policies of the segments are the same as those described in the summary of significant accounting policies. All intersegment sales prices are market based. We evaluate performance based on net income or loss of the respective operating units.

In accordance with Statement of Financial Accounting Standards No. 131, we have identified the Utility and Non-regulated segments, as described in Note 1. We consider each business unit within our utility segment to be a reporting unit of the utility segment and not a reportable segment. Our chief executive officer makes decisions about allocating resources to the utility segment as a whole and not to individual reporting units. The individual operations that comprise the non-regulated segment are not currently material to our consolidated financial position or results of operation and therefore do not require separate reporting.

Summarized financial information concerning our reportable segments is shown in the following table:

	UTILITY	NON- REGULATED	TOTAL
	(IN THOUSANDS)		
As of and for the year ended September 30, 2001:			
Operating revenues.....	\$1,380,148	\$ 67,382	\$1,447,530

	-----	-----	-----
Total operating revenues.....	\$1,442,275	\$850,152	\$690,196
	=====	=====	=====

12. MARKETABLE SECURITIES

In accordance with Statement of Financial Accounting Standards No. 115, "Accounting for Certain Investments in Debt and Equity Securities," all marketable securities are classified as available-for-sale and are reported at market value with unrealized gains and losses shown as a component of shareholders' equity labeled "unrealized holding gains (losses) on investments, net." All marketable securities are held in rabbi trusts for the Supplemental Executive Benefits Plans.

The cost, unrealized holding gain (loss) and the market value of the marketable securities are as follows:

	COST	UNREALIZED HOLDING GAIN (LOSS)	MARKET VALUE
	-----	-----	-----
	(IN THOUSANDS)		
As of September 30, 2001:			
Available-for-sale securities:

	-----	-----	-----
	\$25,019	\$ 3,546	\$28,565
	=====	=====	=====

13. LEASES

We have entered into non-cancelable operating leases for office and warehouse space used in our operations. The remaining lease terms range from one

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

to 17 years and generally provide for the payment of taxes, insurance and maintenance by the lessee. We have also entered into capital leases for division offices

64

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

and operating facilities. Property, plant and equipment included amounts for capital leases of \$5.2 million and \$4.6 million at September 30, 2001 and 2000. Accumulated depreciation for these capital leases totaled \$1.9 million and \$1.4 million at September 30, 2001 and 2000.

The related future minimum lease payments at September 30, 2001 were as follows:

	CAPITAL LEASES	OPERATING LEASES
	-----	-----
	(IN THOUSANDS)	
2002.....	\$ 876	\$ 9,127
2003.....	876	8,361
2004.....	876	8,169
2005.....	843	7,992
2006.....	433	7,494
Thereafter.....	2,726	24,880
	-----	-----
Total minimum lease payments.....	6,630	\$66,023
		=====
Less amount representing interest.....	(3,297)	

Present value of net minimum lease payments.....	\$ 3,333	
	=====	

Consolidated lease and rental expense amounted to \$5.9 million, \$9.0 million and \$10.6 million for fiscal 2001, 2000 and 1999. Rents for the regulated business are expensed, and we receive rate treatment as a cost of service on a pay-as-you-go basis.

14. RELATED PARTY TRANSACTIONS

Included in purchased gas cost were purchases from Woodward Marketing of \$525.6 million, \$228.6 million and \$117.4 million in 2001, 2000 and 1999. Volumes purchased were 96.3 Bcf, 74.4 Bcf and 50.9 Bcf in 2001, 2000 and 1999. These purchases were made in a competitive open bidding process and reflect market prices. Average prices per Mcf for gas purchased from Woodward Marketing were \$5.46, \$3.07 and \$2.31 in 2001, 2000 and 1999. In addition, we have entered into contracts with Woodward Marketing to manage a significant portion of our underground storage facilities. Woodward Marketing has acted as agent in placing financial instruments for the various business units that protect us and our customers from unusually large winter period gas price increases.

15. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

Effective October 1, 2000, we adopted Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

Activities," as amended. This Statement establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. It requires that all derivative financial instruments be recognized in the financial statements and measured at fair value regardless of the purpose or intent for holding them. Changes in the fair value of derivative financial instruments are either recognized periodically in income or as deferred gas costs, depending on the classification of the derivative. Derivative instruments may be classified as either fair value hedges or cash flow hedges. The cumulative effect of the change in accounting for the adoption of this Statement did not have a material impact on our financial position, results of operations or cash flows.

65

ATMOS ENERGY CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

WEATHER HEDGES AND INSURANCE

In July 2000, we entered into an agreement to purchase weather hedges for our Texas and Louisiana operations effective for the 2000-2001 heating season. The hedges were designed to help mitigate the effects of weather that was at least seven percent warmer than normal in both Texas and Louisiana while preserving any upside. The cost of the weather hedges was approximately \$4.9 million which was amortized over the 2000-2001 heating season.

In June 2001, we purchased a three year weather insurance policy with an option to cancel in the third year if we obtain weather protection in our rate structures. The policy is for our Texas and Louisiana operations and covers the entire heating season of October to March beginning with the 2001-2002 heating season. The cost of the three year policy was approximately \$13.2 million which was prepaid and will be amortized over the appropriate heating seasons based on degree days. The insurance is designed to protect against weather that is at least seven percent warmer than normal.

UTILITY HEDGING ACTIVITIES

We have historically hedged 20 percent of our gas supply through the use of our underground storage assets. This hedging process will continue. For the 2001-2002 heating season, we plan to cover approximately 64 percent of our anticipated flowing gas requirements through storage and futures and fixed forward contracts at a weighted average cost of slightly less than \$4.00 per Mcf. This should provide protection to us and our customers against sharp increases in the price of natural gas during the 2001-2002 heating season.

16. SELECTED QUARTERLY FINANCIAL DATA (UNAUDITED)

Summarized unaudited quarterly financial data is presented below. The sum of net income per share by quarter may not equal the net income per share for the year due to variations in the weighted average shares outstanding used in computing such amounts. Our businesses are seasonal due to weather conditions in our service areas. For further information on its effects on quarterly results, please see the "Weather and seasonality" discussion included in the "Management's Discussion and Analysis of Financial Condition and Results of Operations" section herein.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

Information regarding directors and compliance with Section 16(a) of the Securities Exchange Act of 1934 is incorporated herein by reference from the Company's Definitive Proxy Statement for the Annual Meeting of Shareholders on February 13, 2002. Information regarding executive officers is included in Part I of this Form 10-K.

ITEM 11. EXECUTIVE COMPENSATION

Incorporated herein by reference from the Company's Definitive Proxy Statement for the Annual Meeting of Shareholders on February 13, 2002.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

Incorporated herein by reference from the Company's Definitive Proxy Statement for the Annual Meeting of Shareholders on February 13, 2002.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Incorporated herein by reference from the Company's Definitive Proxy Statement for the Annual Meeting of Shareholders on February 13, 2002.

PART IV

Edgar Filing: ATMOS ENERGY CORP - Form 10-K405

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES, AND REPORTS ON FORM 8-K

(a) 1. and 2. Financial statements and financial statement schedules.

The financial statements and financial statement schedules listed in the accompanying Index to Financial Statements are filed as part of this Form 10-K.

3. Exhibits

The exhibits listed in the accompanying Exhibits Index are filed as part of this Form 10-K. The exhibits numbered 10.21(a) through 10.32(b) are management contracts or compensatory plans or arrangements.

(b) Reports on Form 8-K

The Company filed a Form 8-K Current Report, Item 2, Acquisition or Disposition of Assets, dated July 1, 2001, announcing that it had acquired the assets of the Louisiana Gas Service Company division of Citizens Communications Company as well as the assets of LGS Natural Gas Company, a wholly-owned subsidiary of Citizens, effective July 1, 2001.

Under Item 7, Financial Statements and Exhibits, a description that the financial statements of the business acquired and pro forma financial information would be filed within 60 days of the required filing date of this Form 8-K. Also, an exhibit was attached: a copy of a related press release dated July 2, 2001.

The Company filed a Form 8-K/A Current Report (Amendment No. 1), Item 7 Financial Statements and Exhibits, dated July 1, 2001, disclosing the required financial statements of the business acquired and pro forma financial information relating to the acquisition of the assets of the Louisiana Gas Service Company division of Citizens Communications Company as well as the assets of LGS Natural Gas Company, a wholly-owned subsidiary of Citizens.

67

The Company filed a Form 8-K Current Report, Item 5, Other Events, dated September 24, 2001, announcing that the Company had entered into a definitive agreement to acquire Mississippi Valley Gas Company, a privately-held natural gas utility company for \$150.0 million in stock and cash as well as the assumption of approximately \$45.0 million of outstanding debt, net of working capital.

Under Item 7, Financial Statements and Exhibits, an exhibit was attached: a copy of a related press release dated September 24, 2001.

68

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
