The Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements ( FAS 157 ), effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Trust would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. FAS 157 establishes a three-tier hierarchy to distinguish between (1) inputs that reflect the assumptions market participants would use in pricing an asset or liability developed based on market data obtained from sources independent of the reporting entity (observable inputs) and (2) inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing an asset or liability developed based on the best information available in the circumstances (unobservable inputs) and to establish classification of fair value measurements for disclosure purposes. Various inputs are used in determining the value of the Trust's investments. The inputs are summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Trust's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

**Table of Contents****Van Kampen High Income Trust II****Portfolio of Investments § September 30, 2008 (Unaudited) continued**

The following is a summary of the inputs used as of September 30, 2008 in valuing the Trust's investments carried at value:

<b>Valuation Inputs</b>	<b>Investments in Securities</b>	<b>Other Financial Instruments*</b>
Level 1 - Quoted Prices	\$ 9,098	\$ -0-
Level 2 - Other Significant Observable Inputs	112,605,204	(985,152)
Level 3 - Significant Unobservable Inputs	270,560	-0-
<b>Total</b>	<b>\$ 112,884,862</b>	<b>\$ (985,152)</b>

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining value:

	<b>Investments in Securities</b>	<b>Other Financial Instruments*</b>
Balance as of December 31, 2007	\$ -0-	\$ -0-
Accrued discounts/premiums	133,476	-0-
Realized gain/loss	89,498	-0-
Change in unrealized appreciation/depreciation	(2,403,830)	-0-
Net purchases/sales	(140,471)	-0-
Net transfers in and/or out of Level 3	2,591,887	-0-
Balance as of September 30, 2008	\$ 270,560	\$ -0-
Net change in unrealized appreciation/depreciation from investments still held as of September 30, 2008	\$ (2,403,830)	\$ -0-

\* Other financial instruments include futures, forwards and swap contracts.

**Security Valuation** Investments are stated at value using market quotations or indications of value obtained from an independent pricing service. For those securities where quotations or prices are not readily available, valuations are obtained from yield data relating to instruments or securities with similar characteristics in accordance with procedures established in good faith by the Board of Trustees. Futures contracts are valued at the settlement price established each day on the exchange on which they are traded. Swaps are valued using market quotations obtained from brokers. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value.
