October '04 Order Comments:

Solid orders continued across the company with favorable currency exchange rates contributing approximately 2.5 to 3 percentage points of the total +5% to +10% increase.

Process Management experienced continued increases despite tougher prior year comparisons, with solid orders in measurement and analytical instruments and valves, and with strength in emerging markets.

Orders in Industrial Automation were strong across nearly all businesses led by continued capital spending and industrial demand in North America and Asia.

Orders in Network Power improved despite tougher prior year comparisons, with strength in the systems business and strength in Asia along with solid demand in North America and Latin America.

Climate Technologies orders continue to be impacted by inventory reductions in the U.S. residential air conditioning market and tougher prior year comparisons.

Orders in the Appliance and Tools segment were helped by strong demand in the storage business. Results in the motors, appliance, and tools businesses were mixed.
