Forward Looking Statements

Safe Harbor statement under the Private Securities Litigation Reform Act of 1995: This Form 10-Q contains forward-looking statements that are subject to risks and uncertainties, including, but not limited to, changes in economic conditions in our market areas, changes in policies by regulatory agencies, the impact of competitive loan products, loan demand risks, the quality or composition of our loan or investment portfolios, fluctuations in interest rates and changes in the relative differences between short and long term interest rates, levels of nonperforming assets and operating results, the impact of terrorist actions and other risks detailed from time to time in our filings with the Securities and Exchange Commission. We caution readers not to place undue reliance on forward-looking statements. We do not undertake and specifically disclaim any obligation to revise any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements. These risks could cause our actual results for 2003 and beyond to differ materially from those expressed in any forward-looking statements by, or on behalf of, us.

As used throughout this report, the terms "we", "our", "ITLA Capital" or the "Company" refer to ITLA Capital Corporation and its consolidated subsidiaries.

Table of Contents

**ITLA CAPITAL CORPORATION AND SUBSIDIARIES
NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS**

NOTE 1 BASIS OF PRESENTATION

The unaudited consolidated financial statements of ITLA Capital Corporation (the Company) included herein reflect all normal recurring adjustments which are, in the opinion of management, necessary to present fairly the results of operations and financial position of the Company, as of and for the interim periods indicated. The unaudited consolidated financial statements include the accounts of ITLA Capital Corporation and its wholly-owned subsidiaries, Imperial Capital Bank (the Bank), Imperial Capital Real Estate Investment Trust (Imperial Capital REIT), ITLA Capital Statutory Trust I (Trust I), ITLA Capital Statutory Trust II (Trust II), ITLA Capital Statutory Trust III (Trust III), ITLA Capital Statutory Trust IV (Trust IV), and ITLA Capital Statutory Trust V (Trust V). All intercompany transactions and balances have been eliminated. Certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to the rules and regulations of the U.S. Securities and Exchange Commission. Certain amounts in prior periods have been reclassified to conform to the presentation in the current period. The results of operations for the three and nine months ended September 30, 2003 are not necessarily indicative of the results of operations for the remainder of the year.

These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our annual report on Form 10-K for the year ended December 31, 2002.

NOTE 2 ACCOUNTING FOR STOCK-BASED COMPENSATION

In December 2002, the Financial Accounting Standards Board (FASB) issued SFAS No. 148, Accounting for Stock-Based Compensation, to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, SFAS No. 148 amends the disclosure requirements of SFAS No. 123, Accounting for Stock-Based Compensation, to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The transition guidance and annual disclosure provisions are effective for fiscal years ending after December 15, 2002. The interim disclosure provisions are effective for financial reports containing financial statements for interim periods beginning after December 15, 2002. The Company adopted the provisions of SFAS No. 148 effective in the first quarter of 2003.

The Company has stock-based compensation plans. These plans are accounted for under APB Opinion No. 25, Accounting for Stock Issued to Employees, and accordingly, no compensation costs have been recognized in the accompanying unaudited consolidated statements of income. The Company applies SFAS No. 123 for disclosure purposes only. SFAS No. 123 disclosures include pro forma net income and earning per share as if the fair value-based method of accounting had been used. If compensation had been determined based on SFAS No. 123, the Company's pro forma net income and pro forma per share data would be as follows:

Table of Contents

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2003	2002	2003	2002
	(in thousands, except per share data)			
Net income, as reported	\$5,407	\$5,155	\$23,918	\$14,679
Less: Stock-based employee compensation expense determined under the fair value method, net of tax	356	348	996	628
Pro forma net income	\$5,051	\$4,807	\$22,922	\$14,051
Earnings per share:				
Basic as reported	\$ 0.90	\$ 0.86	\$ 3.97	\$ 2.45
Basic pro forma	\$ 0.84	\$ 0.81	\$ 3.81	\$ 2.35
Diluted as reported	\$ 0.83	\$ 0.80	\$ 3.69	\$ 2.29
Diluted pro forma	\$ 0.77	\$ 0.75	\$ 3.53	\$ 2.19

The fair value of each option grant was estimated on the date of grant using an option pricing model with the following weighted-average assumptions for option grants.

	Weighted-Average Assumptions for Option Grants	
	2003	2002
Dividend Yield	0.00%	0.00%
Expected Volatility	36.24%	31.36%
Risk-Free Interest Rates	4.17%-4.34%	4.62%-4.88%
Expected Lives	Seven Years	Seven Years

NOTE 3 EARNINGS PER SHARE

Basic Earnings Per Share (Basic EPS) is computed by dividing net income by the weighted-average number of common shares outstanding for the period. Diluted Earnings Per Share (Diluted EPS) reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock which shared in the Company's earnings.

Table of Contents

The following is a reconciliation of the calculation of Basic EPS and Diluted EPS:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	Net Income	Weighted- Average Shares Outstanding	Per Share Amount	Net Income	Weighted- Average Shares Outstanding	Per Share Amount
(in thousands, except per share data)						
2003						
Basic EPS	\$5,407	6,031	\$ 0.90	\$23,918	6,019	\$ 3.97
Effect of dilutive stock options		517	(0.07)		471	(0.28)
Diluted EPS	\$5,407	6,548	\$ 0.83	\$23,918	6,490	\$ 3.69
2002						
Basic EPS	\$5,155	5,966	\$ 0.86	\$14,679	5,984	\$ 2.45
Effect of dilutive stock options		469	(0.06)		429	(0.16)
Diluted EPS	\$5,155	6,435	\$ 0.80	\$14,679	6,413	\$ 2.29

Table of Contents**NOTE 4 COMPREHENSIVE INCOME**

Comprehensive income, which encompasses net income and the net change in unrealized gains (losses) on investment securities available for sale, is presented below:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2003	2002	2003	2002
	(in thousands)			
Net Income	\$5,407	\$5,155	\$23,918	\$14,679
Other comprehensive (loss) income:				
Unrealized (loss) gain on investment securities available for sale, net of tax (benefit) expense of (\$70) and \$141 for the three months ended September 30, 2003 and 2002, and net of tax (benefit) expense of (\$198) and \$297 for the nine months ended September 30, 2003 and 2002, respectively.	(110)	212	(309)	445
Comprehensive income	<u>\$5,297</u>	<u>\$5,367</u>	<u>\$23,609</u>	<u>\$15,124</u>

NOTE 5 IMPAIRED LOANS RECEIVABLE

As of September 30, 2003 and December 31, 2002, the recorded investment in impaired loans and impaired real estate loans held in trust was \$11.3 million and \$16.0 million, respectively. The average recorded investment in impaired loans was \$10.6 million for the three months ended September 30, 2003 and \$7.8 million for the same period last year. The average recorded investment in impaired loans was \$13.3 million for the nine months ended September 30, 2003 and \$10.8 million for the same period last year. Interest income recognized on impaired loans totaled \$120,000 and \$377,000 for the three and nine months ended September 30, 2003 as compared to \$89,000 and \$169,000 for the same periods last year.

Table of Contents**NOTE 6 RESIDUAL INTEREST IN SECURITIZATION**

During the first quarter of 2002, the Company formed a limited liability company to issue \$86.3 million of asset-backed notes in a securitization of substantially all of the Company's residential loan portfolio. The Company recognized a gain of \$3.7 million on the securitization of these loans, which was included in other non-interest income within the consolidated statement of income. Concurrent with recognizing such gain on sale, the Company recorded a residual interest of \$5.6 million, which represented the present value of future cash flows (spread and fees) that are estimated to be received over the life of the loans. The residual interest is recorded on the consolidated balance sheet in

Investment securities available for sale, at fair value. The value of the residual interest is subject to substantial credit, prepayment, and interest rate risk on the sold residential loans. In accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 115, Accounting for Certain Investments in Debt and Equity Securities, the residual interest is classified as available-for-sale and, as such, recorded at fair value with the resultant changes in fair value recorded as accumulated unrealized gain or loss in a separate component of shareholders' equity entitled accumulated other comprehensive income or loss, until realized. Fair value is estimated on a monthly basis based on a discounted cash flow analysis. These cash flows are estimated over the lives of the receivables using prepayment, default, and interest rate assumptions that management believes market participants would use for similar financial instruments.

During the nine months ended September 30, 2003, the Company recognized an other than temporary impairment of \$750,000 in connection with its residual interest. Impairments that are deemed to be other than temporary are charged to income as other expense. In evaluating impairments as other than temporary the Company considers credit risk, as well as the magnitude and trend of default rates and prepayment speeds of the underlying residential loans.

At September 30, 2003 and December 31, 2002, key economic assumptions and the sensitivity of the current fair value of the residual interest based on projected cash flows to immediate adverse changes in those assumptions are as follows:

	September 30, 2003	December 31, 2002
Dollars in thousands		
Fair value of retained interest	\$ 5,368	\$ 5,619
Weighted average life (in years) - securities	0.90	1.49
Weighted average life (in years) - residual interest	4.39	4.70
Weighted average annual prepayment speed	35.0%	35.0%
Impact of 10% adverse change	\$ (74)	\$ (23)
Impact of 25% adverse change	\$ (193)	\$ (59)
Weighted average annual discount rate	15.0%	15.0%
Impact of 10% adverse change	\$ (306)	\$ (167)
Impact of 25% adverse change	\$ (737)	\$ (404)
Weighted average lifetime credit losses	3.3%	3.3%
Impact of 10% adverse change	\$ (163)	\$ (285)
Impact of 25% adverse change	\$ (407)	\$ (678)

Table of Contents

These sensitivities are hypothetical and should be used with caution. As the figures indicate, changes in the fair value of the residual interest are based on a variation in assumptions and generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in the above table, the effect of a variation in a particular assumption on the fair value of the residual interest is calculated without changing any other assumption; in reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments but increased credit losses), which might magnify or counteract the sensitivities, and depending on the severity of such changes, the results of operations may be materially affected.

NOTE 7 NEW ACCOUNTING PRONOUNCEMENTS

In November 2002, FASB issued FASB Interpretation No. 45 (FIN 45), Guarantor s Accounting and Disclosure Requirement for Guarantees, Including Indirect Guarantees of Indebtedness of Others. FIN 45 elaborates on the disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under certain guarantees that it has issued. It also clarifies that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. The initial recognition and measurement provisions for FIN 45 are applicable on a prospective basis to guarantees issued or modified after December 31, 2002. The disclosure requirements of FIN 45 are effective for financial statements of interim or annual periods ending after December 15, 2002, and were included in the Company s financial statements for the year ended December 31, 2002. Implementation of the provisions of FIN 45 did not have an impact on the Company s financial statements.

In January 2003, FASB issued FIN 46, an interpretation of Accounting Research Bulletin No. 51, Consolidated Financial Statements. FIN 46 establishes the criteria used to identify variable interest entities and to determine whether or not to consolidate a variable interest entity. Under the criteria established by FIN 46, the Company believes it may be required to de-consolidate its trust subsidiaries. The result will be to recognize investments in its trust subsidiaries in other assets, to report the amount of subordinated debentures issued by the Company to its trust subsidiaries in the liability section of the Company s consolidated balance sheets, and to recognize the interest expense in the subordinated debentures in the consolidated statements of income. Prior to FIN 46, the Company consolidated its trust subsidiaries and reported trust preferred securities in the mezzanine section of the Company s consolidated balance sheets and recognized the proportionate share of income attributable to the preferred shareholders as minority interest in income of subsidiary in the consolidated statements of income. This interpretation was effective immediately for variable interest entities created after January 31, 2003 and was initially to be effective for variable interest entities acquired prior to February 1, 2003, in the quarter ended September 30, 2003. Effective October 9, 2003, the FASB agreed to defer the effective date of FIN 46 for variable interests held by public companies in all entities that were acquired prior to February 1, 2003. The deferral will require that public companies adopt the provisions of FIN 46 for periods ending after December 15, 2003.

Table of Contents

On May 15, 2003, FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity. SFAS No. 150 modifies the accounting for certain financial instruments that issuers could account for as equity. Under SFAS No. 150, those instruments with characteristics of both liabilities and equity must be classified as liabilities in the consolidated balance sheets, with the corresponding payments to holders of the instruments recognized as interest expense.

The reporting requirements of SFAS No. 150 are effective July 1, 2003. As a result of this new standard, should the adoption of FIN 46 not otherwise require de-consolidation of the trusts, the Company would be required to reclassify its trust preferred securities, presented on the consolidated balance sheets as Guaranteed preferred beneficial interest in the Company's junior subordinated deferrable interest debentures, net to liabilities and recognize the related expense within the consolidated statements of income as interest expense rather than minority interest in income of subsidiary. On October 29, 2003, the FASB agreed to defer provisions related to mandatorily redeemable financial instruments to periods beginning after December 15, 2004.

The adoption of FIN 46 and SFAS No. 150 will not have a material impact on the results of operations or the financial position of the Company but will require the restatement of certain financial ratios, such as net interest margin and efficiency ratios, for all periods presented.

NOTE 8 BUSINESS SEGMENT INFORMATION

SFAS No. 131, Disclosures About Segments of an Enterprise and Related Information, requires disclosure of segment information in a manner consistent with the management approach. The management approach is based on the way the chief operating decision-maker organizes segments within a company for making operating decisions and assessing performance.

The main factors used to identify operating segments were the specific product and business lines of the various operating segments of the Company. Operating segments are organized separately by product and service offered. We have identified one operating segment that meets the criteria of being a reportable segment in accordance with the provisions of SFAS No. 131. This reportable segment is the origination and purchase of loans, which by its legal form, is identified as operations of the Bank and Imperial Capital REIT. This segment derives the majority of its revenue by originating and purchasing loans. Other operating segments of the Company that did not meet the criteria of being a reportable segment in accordance with SFAS No. 131 have been aggregated and reported as All Other. Substantially all of the transactions from the Company's operating segments occur in the United States. The Company has no transactions with a single external customer that exceeds ten percent of the Company's consolidated revenues.

Transactions between the reportable segment of the Company and its other operating segments are made at terms which approximate arm's-length transactions and in accordance with GAAP. There is no significant difference between the measurement of the reportable segment's assets and profits and losses disclosed below and the measurement of assets and profits and losses in our consolidated balance sheets and statements of income. Accounting allocations are made in the same manner for all operating segments.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis is intended to identify the major factors that influenced the financial condition and results of operations for the three and nine months ended September 30, 2003.

RESULTS OF OPERATIONS

Three Months Ended September 30, 2003 Compared to Three Months Ended September 30, 2002

General

Consolidated net income was at \$5.4 million and \$5.2 million for the three months ended September 30, 2003 and 2002, respectively. Diluted EPS was \$0.83 for the three months ended September 30, 2003 compared to \$0.80 for the same period last year, an increase of \$0.03 per diluted share. The increase in net income was primarily due to increases in net interest income and non-interest income, partially offset by increases in non-interest expense and minority interest in income of subsidiary.

The increase in net interest income from prior year was a result of the increase in the average balance of loans outstanding and the decline in average cost of funds due to our interest bearing liabilities repricing to lower current market interest rates. A significant portion of the loan portfolio is not subject to downward pricing adjustment due to interest rate floors. The resulting increase in net interest income was partially offset by a decline in the yield of the loan portfolio as higher yielding loans were repaid and replaced by new loan production at lower current market interest rates.

The return on average assets was 1.42% for the three months ended September 30, 2003 compared to 1.49% for the same period last year. The return on average shareholders' equity was 12.02% for the three months ended September 30, 2003, compared to 13.64% for the same period last year.

Total loan production was \$279.6 million for the three months ended September 30, 2003, consisting of the origination and/or acquisition of \$230.4 million of commercial real estate loans, \$21.6 million of franchise loans, and \$27.6 million of film finance loans. The Bank's loan production for the same period last year was \$144.7 million, consisting of originated and/or acquired commercial real estate loans.

The increase in non-interest income was primarily due to income earned in connection with the Bank's refund anticipation loan (RAL) program and its strategic relationship with Household International, Inc. (Household). Because the origination of loans under the RAL program results from the filing of individual income tax returns, transaction activity is concentrated most heavily during the tax season. This results in the Company earning most of its RAL program income in the first quarter of the year. We expect that our financial results for the remaining quarter of 2003 will not be significantly impacted by the RAL program due to the seasonal nature of the business.

Table of Contents**Net Interest Income and Margin**

The following table presents, for the three months ended September 30, 2003 and 2002, our condensed average balance sheet information, together with interest income and yields earned on average interest-earning assets and interest expense and rates paid on average interest-bearing liabilities. Average balances are computed using daily average balances. Nonaccrual loans are included in loans receivable.

Table of Contents

The following table sets forth a summary of the changes in interest income and interest expense resulting from changes in average interest-earning asset and interest-bearing liability balances and changes in average interest rates. The change in interest due to both volume and rate has been allocated to change due to volume and rate in proportion to the relationship of absolute dollar amounts of each.

	For the Three Months Ended September 30, 2003 and 2002 Increase (Decrease) Due to:		
	Rate	Volume	Total
	(In thousands)		
Interest and fees earned from:			
Cash and investment securities	\$ (354)	\$ 318	\$ (36)
Loans	(1,615)	2,397	782
Real estate loans held in trust	(263)	(788)	(1,051)
Total increase (decrease) in interest income	(2,232)	1,927	(305)
Interest paid on:			
Deposit accounts	(1,464)	193	(1,271)
Collateralized mortgage obligations	(107)	(252)	(359)
FHLB advances	(200)	145	(55)
Total increase (decrease) in interest expense	(1,771)	86	(1,685)
Increase (decrease) in net interest income	\$ (461)	\$ 1,841	\$ 1,380

Total interest income decreased \$0.3 million to \$27.1 million in the third quarter of 2003 as compared to \$27.4 million for the same period last year. The net decrease in interest income was primarily attributable to the decrease of 74 basis points in the yields earned on interest earning assets partially offset by an increase of \$121.9 million in interest earning assets.

The average balance of loans held by the Bank was \$1.3 billion and \$1.1 billion for the three months ended September 30, 2003 and 2002, respectively. Loans secured by income producing properties and construction loans had an average balance of \$1.1 billion during the quarter ended September 30, 2003 and 2002. The average balance of franchise loans was \$64.1 million and \$62.3 million during the quarter ended September 30, 2003 and 2002, respectively. The average balance of film finance loans was \$87.6 million during the quarter ended September 30, 2003. We acquired the Lewis Horwitz Organization (LHO) during the fourth quarter of 2002 to originate film finance loans.

The average balance of real estate loans held in trust decreased to \$89.0 million for the three months ended September 30, 2003 as compared to \$138.9 million for the same period last year. This decrease was due to loan prepayments and principal amortization.

Table of Contents

The average balance of our cash and investments increased to \$110.3 million in the third quarter of 2003 compared to \$69.7 million during the same period last year. The increase in our average cash and investments was attributable to the increased liquidity that was maintained in connection with the Bank's RAL program. The decline in the average yield earned on cash and investments from 5.13% during the third quarter of 2002 to 3.11% during the third quarter of 2003 was primarily caused by lower yields earned on short-term and overnight investments.

The average yield earned on total loans decreased to 7.60% in the quarter ended September 30, 2003 as compared to 8.16% in the same period last year. The decline in our yield was primarily caused by higher yielding loans being repaid and replaced by new loan production at lower current market interest rates. Our commercial real estate loan portfolio is primarily comprised of adjustable rate mortgages indexed to six month LIBOR. Approximately 94.5% of our real estate loan portfolio (including real estate loans held in trust) are adjustable rate mortgages at September 30, 2003. These adjustable rate mortgages generally reprice on a quarterly basis and approximately \$1.2 billion or 89.0% of our real estate loan portfolio contain interest rate floors, below which the loans' contractual interest rate may not adjust. At September 30, 2003, the weighted average floor interest rate of these loans was 7.0%. At that date, approximately \$1.2 billion or 97.4% of those loans were at the floor interest rate, approximately \$20.8 million or 1.7% were within 50 basis points of their floor interest rate, and approximately \$1.8 million or 0.1% were greater than 50 but less than 100 basis points from their floor interest rate.

Total interest expense decreased by \$1.7 million to \$7.1 million in the third quarter of 2003, compared to \$8.8 million for the same period last year. This decrease was primarily attributable to lower interest rates paid on all interest bearing liabilities and lower average balances on our Collateralized Mortgage Obligations (CMOs) partially offset by higher average balances on deposit accounts and Federal Home Loan Bank (FHLB) advances.

Our average cost of funds decreased to 2.36% during the three month period ended September 30, 2003, compared to 2.94% for the same period last year. This decrease in funding costs was due primarily to lower rates being paid on our deposit accounts and CMOs as compared to the same period last year as a result of the general decline in market interest rates. The average rate paid on deposit accounts was 2.38% during the three months ended September 30, 2003 as compared to 3.03% for the same period last year. The average rate paid on the CMOs was 2.16% during the three months ended September 30, 2003 compared to 2.67% for the same period last year. The average balance of deposit accounts increased \$32.4 million to \$923.3 million for the three months ended September 30, 2003 as compared to \$890.9 million for the same period last year. The average balance of our CMOs was \$37.5 million during the third quarter of 2003, compared to \$83.5 million for the same period last year reflecting the decline in the related real estate loans held in trust. FHLB advances averaged \$236.5 million in the current quarter, compared to \$211.1 million for the same period last year.

Net interest margin decreased to 5.36% for the three months ended September 30, 2003 as compared to 5.43% for the same period last year primarily due to higher yielding loans within the Bank's loan portfolio being repaid and replaced by new loan production at lower current

Table of Contents

market rates. Additionally, the loans held by the REIT are repricing to lower interest rates slightly faster than the related CMOs.

Provision for Loan Losses

Management periodically assesses the adequacy of the allowance for loan losses by reference to many factors which may be weighted differently at various times depending on prevailing conditions. These factors include, among other elements:

general portfolio trends relative to asset and portfolio size;

asset categories;

credit and geographic concentrations;

delinquency trends and nonaccrual loan levels;

historical loss experience; and

risks associated with changes in economic, social and business conditions.

Accordingly, the calculation of the adequacy of the allowance for loan losses is not based solely on the level of nonperforming assets. Management believes that the allowance for loan losses as of September 30, 2003 was adequate to absorb the known and inherent risks of loss in the loan portfolio at that date. While management believes the estimates and assumptions used in its determination of the adequacy of the allowance are reasonable, there can be no assurance that such estimates and assumptions will not be proven incorrect in the future, or that the actual amount of future provisions will not exceed the amount of past provisions or that any increased provisions that may be required will not adversely impact our financial condition and results of operations. In addition, the determination of the amount of the Bank's allowance for loan losses is subject to review by the Bank's regulators, as part of the routine examination process, which may result in the establishment of additional reserves based upon their judgment of information available to them at the time of their examination.

The consolidated provision for loan losses totaled \$750,000 for the third quarter of 2003, compared to \$2.7 million for the same period last year. The current period provision for loan losses was recorded to provide for reserves adequate to absorb known and inherent risks of losses in the loan portfolio. Our assessment of the provision for loan losses includes a valuation of certain nonperforming loans and other loans of concern. The prior year provision included specific reserves related to certain nonperforming loans and other loans of concern. The allowance for loan losses was 2.29% of total loans and real estate loans held in trust at September 30, 2003 as compared to 2.24% at December 31, 2002. During the quarters ended September 30, 2003 and 2002, we had net loan charge-offs of \$1.1 million and \$1.0 million, respectively. See also Financial Condition Credit Risk .

Non-Interest Income

Non-interest income increased to \$777,000 for the three months ended September 30, 2003, compared to a net loss of \$54,000 for the same period last year. Substantially all of the increase was due to residual income earned in connection with the RAL program.

Table of Contents

Non-Interest Expense

Non-interest expense totaled \$9.6 million for the three months ended September 30, 2003, compared to \$6.5 million for the same period last year. The increase was attributable to the acquisition of LHO, additions relating to the Bank's franchise lending origination staff, the development of Imperial Capital Express (ICE) (the Bank's small balance commercial real estate lending platform), and certain continuing infrastructure and personnel costs incurred in connection with the Bank's charter conversion. Our efficiency ratio (defined as recurring general and administrative expenses as a percentage of net revenue) was 43.20 percent in the third quarter of 2003 as compared to 34.86 percent for the same period in 2002.

Minority Interest in Income of Subsidiary

Minority interest in income of subsidiary, consisting of trust income earned by holders of our trust preferred securities, was \$1.5 million during the three month period ended September 30, 2003 as compared to \$815,000 for the same period last year. On a period-to-period comparison, the increase was primarily due to the issuance of the \$55.0 million of additional trust preferred securities during the fourth quarter of 2002.

Table of Contents

Nine Months Ended September 30, 2003 Compared to Nine Months Ended September 30, 2002

General

Consolidated net income totaled \$23.9 million for the nine months ended September 30, 2003 compared to \$14.7 million for the same period last year. Diluted EPS was \$3.69 for the nine months ended September 30, 2003, compared to \$2.29 for the same period last year, an increase of \$1.40 per diluted share. The increase in net income was primarily due to increases in net interest income and non-interest income, partially offset by increases in the provision for loan losses, non-interest expense and minority interest in income of subsidiary. Net interest income improved from prior year primarily as a result of the increase in average balance of loans outstanding, increased interest income from cash and investment securities and a decline in the average cost of funds due to its interest bearing liabilities repricing to lower current market interest rates. These increases were partially offset by a decline in net interest income of the REIT, a decline in the yield on cash and investment securities, and a decline in the yield of the loan portfolio, as higher yielding loans were repaid and replaced by new loan production at lower current market interest rates. The increase in non-interest income was primarily due to the Bank's RAL program and its strategic relationship with Household.

The return on average assets was 1.80% for the nine months ended September 30, 2003, compared to 1.44% for the same period last year. The return on average shareholders' equity was 18.50% for the nine months ended September 30, 2003, compared to 13.54% for the same period last year.

Total loan production was \$525.4 million for the nine months ended September 30, 2003, compared to \$374.6 million for the same period last year. During the current nine month period, the Bank originated and/or purchased \$439.5 million of commercial real estate loans, \$52.0 million of film finance loans and \$33.9 million of franchise loans. Loan production for the same period last year consisted of \$331.8 million of originated and/or acquired commercial real estate loans, including \$36.8 million of loans acquired from Asahi Bank of California and \$6.0 million of acquired franchise loans.

Interest paid on:			
Deposit accounts	(5,093)	1,571	(3,522)
Collateralized mortgage obligations	(231)	(736)	(967)
FHLB advances	(547)	92	(455)
	<u>(5,871)</u>	<u>927</u>	<u>(4,944)</u>
Total increase (decrease) in interest expense			
Increase (decrease) in net interest income	\$ (319)	\$ 12,788	\$ 12,469

Total interest income increased \$7.5 million to \$88.5 million in the nine months ended September 30, 2003, as compared to \$81.0 million for the same period last year. The net increase in interest income was primarily attributable to the increase in the average volume of the Bank's loans during the period and the additional interest income earned on the increased liquidity maintained in connection with the RAL program partially offset by a decline in the interest income earned by the REIT.

The average balance of loans held by the Bank was \$1.3 billion and \$1.1 billion for the nine months ended September 30, 2003 and 2002, respectively. Loans secured by income producing properties and construction loans were essentially unchanged with an average balance of \$1.1 billion during the nine months ended September 30, 2003 and 2002. The average balance of franchise loans was \$58.7 million and \$60.2 million during the nine months ended September 30, 2003 and 2002, respectively. The average balance of film finance loans was \$102.9 million during the nine months ended September 30, 2003. We first began originating film finance loans during the fourth quarter of 2002 when we acquired LHO.

The average balance of real estate loans held in trust decreased to \$104.3 million for the nine months ended September 30, 2003 as compared to \$148.6 million for the same period last year. This decrease was due to loan prepayments and principal amortization.

Table of Contents

The average balance of our cash and investments increased to \$340.7 million for the nine months ended September 30, 2003 compared to \$69.6 million during the same period last year. The increase in our average cash and investments was attributable to the increased liquidity maintained in connection with the RAL program. The decline in the average yield earned on cash and investments from 4.66% during the nine months ended September 30, 2002 to 1.80% during the same period in 2003 was caused by lower yields earned on short-term and overnight investments as a significant portion of our excess liquidity related to the RAL program was maintained in overnight investments. The decrease in the average yield was further impacted by the declining interest rate environment experienced during the current year.

The average yield earned on loans decreased 22 basis points to 8.04% for the nine months ended September 30, 2003 compared to 8.26% in the same period last year. The decrease in the yield on loans was primarily due to higher yielding loans being repaid and replaced by new loan production at lower current market interest rates, offset in part by higher yields earned on our participation interests in RAL loans. Our commercial real estate loan portfolio is primarily comprised of adjustable rate mortgages indexed to the six month LIBOR.

Total interest expense decreased by \$5.0 million to \$23.4 million for the nine months ended September 30, 2003, compared to \$28.4 million for the same period last year. This decrease was primarily attributable to lower interest rates paid on all interest bearing liabilities and lower average balances on CMOs partially offset by higher average balances on deposit accounts and FHLB advances.

Our average cost of funds decreased to 2.55% during the nine months ended September 30, 2003, compared to 3.20% for the same period last year. This decrease in funding costs was primarily due to the general decline in market interest rates during the current year, which has resulted in a continued decline in our cost of funds. The average rate paid on deposit accounts was 2.53% during the nine months ended September 30, 2003 compared to 3.28% for the same period last year. The average rate paid on the CMOs was 2.32% during the nine months ended September 30, 2003 compared to 2.65% for the same period last year. The average balance of deposit accounts increased \$83.3 million to \$988.5 million for the nine months ended September 30, 2003, compared to \$905.2 million for the same period last year. The average balance of our CMOs was \$51.0 million during the nine months ended September 30, 2003, compared to \$93.5 million for the same period last year, reflecting the decline in the related real estate loans held in trust. FHLB advances averaged \$190.9 million for the nine months ended September 30, 2003, compared to \$186.3 million for the same period last year.

Net interest margin decreased to 5.01% for the nine months ended September 30, 2003 compared to 5.25% for the same period last year. This decrease was primarily due to the significant increase in average interest-earning assets during the period and the 60 basis point decrease in net interest spread. The decrease in the net interest spread was caused by a 125 basis point decrease in the average yield earned on interest-earning assets primarily as a result of lower yields earned on short-term and overnight investments, partially offset by a 65 basis point decrease in cost of funds. A significant portion of our excess liquidity resulting from the RAL program was maintained in overnight investments at rates significantly below rates earned on other interest-earning assets.

Table of Contents

Provision for Loan Losses

The consolidated provision for loan losses totaled \$7.1 million for the nine months ended September 30, 2003, compared to \$6.1 million for the same period last year. The current period provision for loan losses was recorded to provide for reserves based on an analysis of the factors referred to previously and the valuation of certain nonperforming loans and other loans of concern. During the nine months ended September 30, 2003 and 2002, we had net loan charge-offs of \$6.9 million and \$3.2 million, respectively. The increase in charge-offs primarily related to one commercial real estate loan.

Non-Interest Income

Non-interest income totaled \$14.6 million for the nine months ended September 30, 2003, compared to \$0.2 million for the same period last year. The increase was primarily attributable to fee income earned in connection with the RAL program consisting of \$9.0 million of net premiums on the sale of RAL loans and \$4.6 million of processing and administrative fees.

Non-Interest Expense

Non-interest expense totaled \$28.8 million for the nine months ended September 30, 2003, compared to \$20.1 million for the same period last year. The increase in non-interest expense was primarily due to the acquisition of LHO, additions relating to the Bank's franchise lending origination staff, the development of ICE (the Bank's small balance commercial real estate lending platform), and infrastructure and personnel costs incurred in connection with the Bank's charter conversion. Our efficiency ratio (defined as recurring general and administrative expenses as a percentage of net revenue) was 35.15 percent for the nine months ended September 30, 2003, compared to 36.16 percent for the same period in 2002.

Minority Interest in Income of Subsidiary

Minority interest in income of subsidiary was \$4.5 million during the nine month period ended September 30, 2003 compared to \$2.4 million for the same period last year. The increase was primarily due to the issuance of \$55.0 million of additional Trust Preferred securities during the fourth quarter of 2002.

FINANCIAL CONDITION

Total assets decreased to \$1.6 billion at September 30, 2003 as compared to \$1.7 billion at December 31, 2002. At September 30, 2003, loans, net totaled \$1.3 billion, including approximately \$1.2 billion of commercial real estate loans, \$80.1 million of franchise loans and \$82.5 million of film finance loans. During the nine months ended September 30, 2003, the Bank's loan portfolio increased \$15.8 million and the REIT's portfolio decreased \$36.7 million. The decrease in the REIT's loan portfolio reflects an increase in loan prepayments experienced during the nine months ended September 30, 2003 as compared to prior periods. Additionally, cash and cash equivalents decreased \$75.3 million primarily as a result of reducing excess liquidity that was maintained to fund anticipated loan production at December 31, 2002. Total deposit accounts, which are concentrated in time certificates, declined to \$1.0 billion at September 30, 2003 from \$1.1 billion at December 31, 2002. FHLB advances decreased \$21.0 million to \$317.7 million at September 30, 2003, compared to \$338.7 million at December 31,

Table of Contents

2002. Management believes that a significant portion of deposits will remain with us upon maturity based on our historical experience regarding retention of deposits. CMOs decreased \$36.5 million to \$32.6 million at September 30, 2003 compared to \$69.1 million at December 31, 2002 reflecting the decline in real estate loans held in trust. Accounts payable and other liabilities increased \$18.0 million primarily as a result of outstanding checks and other liabilities related to the RAL program.

Residual Interest

In the first quarter of 2002, we formed a limited liability company to issue \$86.3 million of asset-backed notes in a securitization of substantially all of our residential loan portfolio. These notes were rated AAA by Standard & Poor's, Aaa by Moody's, and are insured by Financial Security Assurance. In the securitization, residential loans were sold to the limited liability company for a cash purchase price and an interest in the loans securitized in the form of the excess spread. The cash purchase price was raised through an offering of asset-backed notes issued by the limited liability company. Note holders are entitled to receive the principal collected on the loans and the stated interest rate on the notes. We are entitled to receive the excess spread. The excess spread generally represents, over the estimated life of the loans, the excess of the weighted average coupon on the loans sold over the sum of the note interest rate less other expenses including a trustee fee and an insurance fee. Valuation of the excess spread includes an estimate of annual future credit losses related to the loans securitized. These estimated cash flows are discounted when computing the value of the residual interest.

We recognized a gain on the sale of these loans, although cash (representing the excess spread and servicing fees) is received by us over the lives of the loans. Concurrent with recognizing such gain on sale, we recorded the excess spread as a residual interest of \$5.6 million which is included in our consolidated balance sheets as Investment securities available for sale, at fair value. The value of the residual interest is subject to substantial credit, prepayment and interest rate risk on the sold residential loans.

In accordance with the provisions of SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities, we classified our residual interest as an available-for-sale asset and, as such, they are recorded at fair value with the resultant changes in fair value recorded as accumulated unrealized gain or loss in a separate component of shareholders equity entitled accumulated other comprehensive income or loss, until realized. We estimate fair value on a monthly basis based on a discounted cash flow analysis. These cash flows are estimated over the lives of the receivables using prepayment, default, and interest rate assumptions that we believe market participants would use for similar financial instruments.

During the nine months ended September 30, 2003, we recognized an other than temporary impairment of \$750,000 in connection with its residual interest. Impairments that are deemed to be other than temporary are charged to income, as other expense. In evaluating impairments as other than temporary we consider credit risk, as well as the magnitude and trend of default rates and prepayment speeds of the underlying residential loans.

Table of Contents

At September 30, 2003 and December 31, 2002, key economic assumptions and the sensitivity of the current fair value of the residual interest based on projected cash flows to immediate adverse changes in those assumptions is as follows:

	September 30, 2003	December 31, 2002
Dollars in thousands		
Fair value of retained interest	\$ 5,368	\$ 5,619
Weighted average life (in years) securities	0.90	1.49
Weighted average life (in years) residual interest	4.39	4.70
Weighted average annual prepayment speed	35.0%	35.0%
Impact of 10% adverse change	\$ (74)	\$ (23)
Impact of 25% adverse change	\$ (193)	\$ (59)
Weighted average annual discount rate	15.0%	15.0%
Impact of 10% adverse change	\$ (306)	\$ (167)
Impact of 25% adverse change	\$ (737)	\$ (404)
Weighted average lifetime credit losses	3.3%	3.3%
Impact of 10% adverse change	\$ (163)	\$ (285)
Impact of 25% adverse change	\$ (407)	\$ (678)

These sensitivities are hypothetical and should be used with caution. As the figures indicate, changes in the fair value of our residual are based on a variation in assumptions and generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in the above table, the effect of a variation in a particular assumption on the fair value of the residual interest is calculated without changing any other assumption; in reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments but increased credit losses), which might magnify or counteract the sensitivities, and depending on the severity of such changes, the results of operations may be materially affected.

Table of Contents**CREDIT RISK****Nonperforming Assets, Other Loans of Concern and Allowance for Loan Losses**

The following table sets forth our nonperforming assets by category and troubled debt restructurings as of the dates indicated.

	September 30, 2003	December 31, 2002
	(dollars in thousands)	
Nonaccrual loans:		
Real estate	\$ 3,756	\$ 3,913
Franchise	823	1,986
Film finance	2,357	
	<u>6,936</u>	<u>5,899</u>
Other real estate owned, net	14,767	12,593
	<u>21,703</u>	<u>18,492</u>
Performing troubled debt restructurings	4,732	7,858
	<u>\$26,435</u>	<u>\$26,350</u>
Nonaccrual loans to total loans and real estate loans held in trust	0.48%	0.36%
Allowance for loan losses to nonaccrual loans	478.26%	555.61%
Nonperforming assets to total assets	1.33%	1.08%

At September 30, 2003, other real estate owned consisted of four income producing properties totaling \$14.8 million. Management periodically evaluates the estimated fair value of its other real estate owned properties. In connection with this process, we will be reviewing the valuation of certain properties during the fourth quarter of 2003. Any changes in fair value will be adjusted upon completion of these assessments.

As of September 30, 2003 and December 31, 2002, other loans of concern totaled \$27.5 million and \$35.5 million, respectively. Other loans of concern consist of loans with respect to which known information concerning possible credit problems with the borrowers or the cash flows of the properties securing the respective loans has caused management to be concerned about the ability of the borrowers to comply with present loan repayment terms, which may result in the future inclusion of such loans in the nonaccrual category. The decrease in other loans of concern for the nine months ended September 30, 2003 was primarily due to \$5.6 million of loans being paid-off, and \$15.4 million of loans migrating to nonaccrual status, partially offset by \$13.1 million of new other loans of concern.

Table of Contents

The following table provides certain information with respect to our allowance for loan losses, including charge-offs, recoveries and selected ratios for the periods indicated.

	For the Nine Months Ended September 30, 2003	For the Year Ended December 31, 2002
	(dollars in thousands)	
Balance at beginning of period	\$33,009	\$26,650
Provision for loan losses	7,100	9,030
Additions related to acquisitions		2,048
Charge-offs	(6,948)	(4,730)
Recoveries	11	11
	<u> </u>	<u> </u>
Net charge-offs	(6,937)	(4,719)
	<u> </u>	<u> </u>
Balance at end of period	\$33,172	\$33,009
	<u> </u>	<u> </u>
Allowance for loan losses as a percentage of loans and loans held in trust, net	2.29%	2.24%

Liquidity

Liquidity refers to our ability to maintain cash flow adequate to fund operations and meet obligations and other commitments on a timely basis, including the payment of maturing deposits and the origination or purchase of new loans. We maintain a cash and investment securities portfolio designed to satisfy operating liquidity requirements while preserving capital and maximizing yield. As of September 30, 2003, we held \$85.6 million of cash and cash equivalents (consisting primarily of short-term investments with original maturities of 90 days or less) and \$46.0 million of investment securities classified as available for sale.

Short-term fixed income investments classified as cash equivalents consisted of interest-bearing deposits at financial institutions, government money market funds and short-term government agency securities, while investment securities available for sale consisted primarily of fixed income instruments, which were rated AAA, or equivalent by nationally recognized rating agencies. In addition, our liquidity position is supported by a credit facility with the Federal Home Loan Bank of San Francisco. As of September 30, 2003, we had remaining available borrowing capacity under this credit facility of \$152.6 million, net of the \$8.0 million of additional Federal Home Loan Bank Stock that we would be required to purchase to support those additional borrowings, and \$30.0 million of unused federal funds credit facilities under established lines of credit with two banks.

Table of Contents

Capital Resources

As of September 30, 2003, the Bank's Leverage (Core), Tier I and Total Risk-Based capital ratios were 15.17%, 15.03% and 16.30%, respectively. These ratios were 13.02%, 13.18% and 14.44%, respectively, as of December 31, 2002. The minimum regulatory requirement for Leverage (Core), Tier I and Total Risk-Based capital are 4.0%, 4.0% and 8.0%, respectively. As of September 30, 2003, the most recent notification from its primary regulator categorized the Bank's capital position as well capitalized under the regulatory framework for prompt corrective actions.

At September 30, 2003, shareholders' equity totaled \$179.5 million, or 11.03 percent of total assets. Our book value per share of common stock was \$31.10 as of September 30, 2003, as compared to \$27.11 as of December 31, 2002, and \$26.14 as of September 30, 2002.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our estimated sensitivity to interest rate risk, as measured by the estimated interest earnings sensitivity profile and the interest sensitivity gap analysis, has not materially changed from the information disclosed in our annual report on Form 10-K for the year ended December 31, 2002.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures: An evaluation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the Act)) was carried out as of September 30, 2003 under the supervision and with the participation of the Company's Chief Executive Officer, Chief Financial Officer and several other members of the Company's senior management. The Company's Chief Executive Officer and Chief Financial Officer concluded that, as of September 30, 2003, the Company's disclosure controls and procedures are effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is (i) accumulated and communicated to the Company's management (including the Chief Executive Officer and Chief Financial Officer) in a timely manner, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

(b) Changes in Internal Control over Financial Reporting: During the quarter ended September 30, 2003, no change occurred in the Company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**PART II - OTHER INFORMATION****Item 1. Legal Proceedings**

We are party to certain legal proceedings incidental to our business. Management believes that the outcome of such proceedings, in the aggregate, will not have a material effect on our financial condition or results of operations.

Item 2. Changes in Securities

Not applicable.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders

(a) On July 30, 2003, the Company held its Annual Meeting of Shareholders.

(b) Shareholders voted on the following matters:

(i) The election of Norval L. Bruce as director for a term to expire in 2006:

<u>Votes</u>	<u>For</u>	<u>Against</u>	<u>Withheld</u>
	5,088,232	0	204,546

(ii) The election of Jeffrey L. Lipscomb as director for a term to expire in 2006:

<u>Votes</u>	<u>For</u>	<u>Against</u>	<u>Withheld</u>
	5,088,232	0	204,546

(iii) The election of Preston Martin as director for a term to expire in 2006:

<u>Votes</u>	<u>For</u>	<u>Against</u>	<u>Withheld</u>
	5,118,307	0	174,471

(iv) The ratification of the appointment of Ernst & Young LLP as independent auditors of the Company for the fiscal year ending December 31, 2003:

<u>Votes</u>	<u>For</u>	<u>Against</u>	<u>Withheld</u>
	5,174,042	118,736	0

Item 5. Other Information

None.

Item 6. Exhibits and Reports on Form 8-K

(a) See exhibit index

(b) During the third quarter of 2003, we filed or furnished the following reports on Form 8-K
