WOODWARD REPORTS SECOND FISCAL QUARTER AND SIX MONTHS RESULTS

Rockford, Ill., April 21, 2003--Woodward Governor Company (Nasdaq: WGOV) today reported financial results for the second fiscal quarter and six months ended March 31, 2003.

Net sales for the quarter were \$146,159,000, down 16 percent from \$174,864,000 in the second quarter a year ago. Sales levels reflect continued weakness in two of our largest markets, large turbine power generation and aircraft engines. Net earnings were \$4,511,000, or \$0.40 per share (all per share amounts are diluted), down 67% percent from \$13,623,000, or \$1.18 per share in the same quarter last year. The decrease in earnings is due primarily to the reverse leverage effect of the significant drop in Industrial Controls sales volumes versus fixed costs and development costs necessary to satisfy current and future requirements of our core customers.

For the six months ended March 31, 2003, net sales were \$290,984,000, down 18 percent from \$355,517,000 for the corresponding six months a year ago. Earnings before the cumulative effect of an accounting change were down 61% to \$10,776,000, or \$.95 per share for the six-month period.

"It is essential that we maintain a balance between lowering costs and maintaining leadership in key markets that are critical to Woodward's long-term

Edgar Filing: WOODWARD GOVERNOR CO - Form 8-K

success," said Chairman and Chief Executive Officer John A. Halbrook. "While the large turbine power generation and aircraft engine markets are currently in a downturn, we and our customers believe that those markets will eventually recover and present strong growth opportunities for Woodward. Our product development strategy is driven by unprecedented demand from our customers to provide them with new energy control solutions. We are responding to those demands as an excellent means to preserve and capture additional market share and generate attractive returns in the future.

"Improved productivity, lower costs, and outstanding quality have been an integral part of our operations for many years, and have been recognized by our customers. In view of current industry conditions, however, we are implementing additional programs to further reduce operating costs and capitalize on the synergies between Aircraft Engine Systems and Industrial Controls. We have begun to consolidate our purchasing efforts and focus on worldwide sourcing. In addition, we are consolidating our manufacturing processes across the company to eliminate duplication and to align our capabilities and technologies. We are also making targeted operating reductions across the company to better align costs with our lower sales volumes. We believe these actions will result in a reduction of our operating costs in 2004 of at least \$20,000,000 on an annualized basis."

Industrial Controls' net sales for the second quarter were \$82,311,000, down 23 percent from \$106,418,000 in the second quarter a year ago. Industrial Controls incurred a loss of \$1,848,000 compared with earnings of \$12,384,000 in the second quarter of last year. Expenses totaling

approximately \$2,400,000 for workforce management activity and lease termination costs were recognized in this year's second quarter. In last year's second quarter, we expensed approximately \$1,200,000 for workforce management activity. Earnings fell significantly more than sales, reflecting the reverse leverage effect and continuation of product development and engineering projects associated with customer-driven programs.

Aircraft Engine Systems' second quarter net sales were \$63,848,000, down 7 percent from \$68,446,000 in the same period a year ago. Segment earnings were \$12,167,000, down 19 percent from \$15,053,000 in the second quarter last year. Expenses associated with workforce management activity totaled approximately \$500,000 in this year's second quarter and \$400,000 in last year's second quarter. Sales continue to reflect weakness in the production of new commercial aircraft, which industry observers expect to continue beyond 2004. Commercial aftermarket sales held up better than OEM sales, and military sales accounted for a slightly increased proportion of segment sales. Cost management and productivity initiatives begun in 2002 are helping maintain margins at levels near those of last year.

Mr. Halbrook concluded, "Many variables are impacting all of our markets and it has become increasingly difficult to anticipate future sales levels. Given the sustained decline in our primary markets, however, we now anticipate the decline in full year earnings from 2002 to 2003 will be at least 50 percent. Final results could be impacted if there are unanticipated further declines in sales and if additional cost savings measures become necessary. We believe the steps we are taking now to reduce costs will enable us both to serve our customers well and to deliver improved annual financial performance in 2004 and beyond."

Woodward will hold an investor conference call at 7:30 a.m. CT on Tuesday, April 22, 2003, to provide an overview of the second quarter's financial performance, business highlights, and outlook for the remainder of the year. You are invited to listen to the live Webcast of our conference call or a recording at our Web site, www.woodward.com.

ABOUT WOODWARD

Woodward is the world's largest independent designer and manufacturer of energy control solutions for aircraft and industrial engines, turbines and power equipment. The company's innovative controls and fuel delivery systems help manufacturers worldwide operate cleaner and more efficient power equipment. Woodward's products and services are used in the aerospace, power generation, oil and gas processing, and transportation markets, which include rail, marine and many light and heavy industrial applications. Woodward is headquartered in Rockford, Illinois, and serves global markets from locations worldwide. Visit our Web site at www.woodward.com.

The statements in this release concerning the company's future sales, earnings, business performance, prospects, and the economy in general reflect current expectations and are forward-looking statements that involve risks and uncertainties. Such risks include, but are not limited to, further decline in sales levels in one or more of our markets, our ability to reduce expenses, and the continued demand for and progress on our development programs. Actual results could differ materially from projections or any other forward-looking statement and we have no obligation to update our forward-looking statements. Factors that could affect performance and could cause actual results to differ materially from projections and forward-looking statements are described in Woodward's Annual Report and Form 10-K for the year ended September 30, 2002, and Form 10-Q for the quarterly period ended March 31, 2003, expected to be available by mid-May.
