PART I

Item 1. Business

Organization

Enterprise Bancorp, Inc. (the Company) is a Massachusetts corporation organized in 1996, which operates as the parent holding company of Enterprise Bank and Trust Company commonly referred to as Enterprise Bank (the Bank). Substantially all of the Company's operations are conducted through the Bank. The Bank, a Massachusetts trust company which commenced banking operations in 1989, has five wholly owned subsidiaries which are included in the Company's consolidated financial statements:

- Enterprise Insurance Services, LLC, organized in 2000 for the purposes of engaging in insurance sales activities;
- Enterprise Investment Services, LLC, organized in 2000 for the purpose of offering non-deposit investment products and services, and;
- Three Massachusetts security corporations, Enterprise Security Corporation (2005), Enterprise Security Corporation II (2007) and Enterprise Security Corporation III (2007), which hold various types of qualifying securities. The security corporations are limited to conducting securities investment activities that the Bank itself would be allowed to conduct under applicable laws.

The Company's headquarters are located at 222 Merrimack Street in Lowell, Massachusetts.

The services offered through the Bank and subsidiaries are managed as one strategic unit and represent the Company's only reportable operating segment.

All material intercompany balances and transactions have been eliminated in consolidation.

Market Area

The Company's primary market area is the Merrimack Valley and North Central regions of Massachusetts and South Central New Hampshire. The Company has sixteen full service branch banking offices located in the Massachusetts cities and towns of Acton, Andover, Billerica, Chelmsford, Dracut, Fitchburg, Leominster, Lowell, Methuen, Tewksbury, and Westford; and in Salem, New Hampshire which serve those cities and towns as well as the surrounding communities. The Company expects to open an additional branch facility, in the town of Derry, New Hampshire, in late 2009 or early 2008.

Products and Services

Through the Bank and its subsidiaries, the Company offers a range of commercial and consumer loan products, deposit and cash management products, investment advisory and management, trust and insurance services. These products and services are outlined below.

Lending

General

The Company specializes in lending to business entities, non-profit organizations, professionals and individuals. The Company's primary lending focus is on the development of high quality commercial relationships achieved through active business development efforts, strong community involvement and focused marketing strategies. Loans made by the Company to businesses include commercial mortgage loans, construction and land development loans, secured and unsecured commercial loans and lines of credit, and standby letters of credit. The Company also originates equipment lease financing for businesses. Loans made to individuals include conventional residential mortgage loans, home equity loans, residential construction loans on primary residences, secured and unsecured personal loans and lines of credit. The Company does not have a sub-prime mortgage program.

The Company employs a seasoned commercial lending staff, with commercial lenders supporting each branch location. The Company has an internal loan review function that assesses the compliance of loan originations with the Company's internal policies and underwriting guidelines and monitors the ongoing quality of the loan portfolio. The Company also contracts with an external loan review company to review loans in the loan portfolio on a pre-determined schedule, based on the type, size, rating, and overall risk of the loan.

Table of Contents

A management loan review committee, consisting of senior lending officers and loan review personnel, is responsible for setting loan policy and procedures, as well as reviewing loans on the Company's internal watched asset list and classified loan report. The Company has an internal credit review committee, consisting of senior lending officers and loan review personnel. The committee generally meets three times per month, or on an as needed basis, to review loan requests related to borrowing relationships of certain levels, as well as other borrower relationships recommended for discussion by committee members.

The Company's Executive Committee of the Board of Directors, consisting of four outside members of the Board and three executive officers who are also members of the Board, also approves loan relationships exceeding certain prescribed limits. A Loan Committee, consisting of five outside members of the Board, and two executive officers who are also members of the Board, reviews current portfolio statistics, new credits, construction loan reviews, watched assets, loan delinquencies, and the allowance for loan losses, as well as current market conditions and issues relating to the construction and real estate development industry. The Board's Loan Committee is also responsible for approval of charge-offs recommended by management. Approved charge-offs are forwarded to the full Board for ratification.

At December 31, 2008, the Bank's statutory lending limit, based on 20% of capital (capital stock plus surplus and undivided profits, but excluding other comprehensive income), to any individual borrower was approximately \$20.1 million, subject to certain exceptions provided under applicable law.

See also Risk Factors contained in Item 1A, for further discussion on a variety of risks and uncertainties that may affect the Company's loan portfolio.

Commercial Real Estate, Commercial and Industrial, and Construction Loans

Commercial real estate loans include loans secured by both owner-use and non-owner occupied real estate. These loans are typically secured by a variety of commercial and industrial property types including apartment buildings, office or mixed-use facilities, strip shopping malls, or other commercial property and are generally guaranteed by the principals of the borrower. Commercial real estate loans generally have repayment periods of approximately fifteen to twenty years. Variable interest rate loans have a variety of adjustment terms and indices, and are generally fixed for the first one to five years before periodic rate adjustments begins.

Commercial and industrial loans include seasonal revolving lines of credit, working capital loans, equipment financing (including equipment leases), and term loans. Also included in commercial and industrial loans are loans partially guaranteed by the Small Business Administration (SBA), loans under various programs issued in conjunction with the Massachusetts Development Finance Agency and other agencies. Commercial and industrial credits may be unsecured loans and lines to financially strong borrowers, secured in whole or in part by real estate unrelated to the principal purpose of the loan or secured by inventories, equipment, or receivables, and are generally guaranteed by the principals of the borrower. Variable rate loans in this portfolio have interest rates that are periodically adjusted, generally with fixed initial periods of one to three years. Commercial and industrial loans have average repayment periods of one to seven years.

Commercial construction loans include the development of residential housing and condominium projects, the development of commercial and industrial use property and loans for the purchase and improvement of raw land. These loans are secured in whole or in part by the underlying real estate collateral and are generally guaranteed by the principals of the borrower. The Company's construction lenders work to cultivate

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

long-term relationships with established developers. The Company limits the amount of financing provided to any single developer for the construction of properties built on a speculative basis. Funds for construction projects are disbursed as pre-specified stages of construction are completed. Regular site inspections are performed, either by experienced construction lenders on staff or by independent outside inspection companies, at each construction phase, prior to advancing additional funds. Commercial construction loans generally have terms of one to three years.

From time to time the Company participates in the financing of certain large commercial projects with other banks. In some cases the Company may act as the lead lender, originating and servicing the loans, but participating out a portion of the funding to other banks. In other cases the Company may participate in loans originated by other

Table of Contents

institutions. In each case the participating bank funds a percentage of the loan commitment and takes on the related risk. The balances participated out to other institutions are not carried as assets on the Company's financial statements. Loans originated by other banks in which the Company is the participating institution are carried in the loan portfolio at the Company's pro rata share of ownership. The Company performs an independent credit analysis of each commitment and a review of the participation institution prior to participation in the loan.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance by a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. If the letter of credit is drawn upon the Company creates a loan for the customer, generally a commercial loan, with the same criteria associated with similar commercial loans.

Residential Loans

The Company originates conventional mortgage loans on one-to-four family residential properties. These properties may serve as the borrower's primary residence, vacation homes or investment properties. Loan to value limits vary from 80% for adjustable rate and multi-family owner occupied properties, up to 97% for fixed rate loans on single family owner occupied properties, with mortgage insurance coverage required for loan-to-value ratios greater than 80% based on program parameters. In addition the Company provides financing for the construction of owner occupied primary residences. Residential mortgage loans made by the Company have terms of up to 30 years at either fixed or adjustable rates of interest. Fixed and adjustable rate residential mortgage loans are generally originated using secondary market underwriting and documentation standards.

Depending on the current interest rate environment, management projections of future interest rates and the overall asset-liability management program of the Company, management may elect to sell those fixed and adjustable rate residential mortgage loans which are eligible for sale in the secondary market, or hold some or all of this residential loan production for the Company's portfolio. The Company generally does not pool mortgage loans for sale, but instead sells the loans on an individual basis. The Company may retain or sell the servicing when selling the loans. All loans sold are currently sold without recourse, subject to an early payment default period covering the first four payments for certain loan sales.

Home Equity Loans and Lines of Credit

Home equity loans are originated for the Company's portfolio for one-to-four family residential properties with maximum original loan to value ratios generally up to 80% of the assessed or appraised value of the property securing the loan. Home equity loan payments consist of monthly principal and interest based on amortization ranging from three to fifteen years. The rates may initially be fixed for a one year period and reviewed annually thereafter, or fixed for a three year period and reviewed every three years thereafter, or the rate may be fixed for three to fifteen years.

Home equity lines are originated for the Company's portfolio for one-to-four family residential properties with maximum original loan to value ratios generally up to 80% of the assessed or appraised value of the property securing the loan. Home equity lines generally have interest rates that adjust monthly based on changes in the Prime rate as published in the Wall Street Journal. Some home equity lines may be fixed for a period of time and then adjusted monthly thereafter. The payment schedule for home equity lines for the first ten years of the loans are interest only

payments. Generally at the end of ten years, the line is frozen to future advances, and principal plus interest payments are collected over a fifteen-year amortization schedule.

Consumer Loans

Consumer loans primarily consist of secured or unsecured personal loans and overdraft protection lines on checking accounts extended to individual customers.

The Company's residential, home equity and consumer lending activities are supported by the branch relationship managers, a centralized walk-in mortgage center, and an internet based eMortgage center.

Table of Contents

Credit Risk and Allowance for Loan Losses

Information regarding the Company's credit risk and allowance for loan losses is contained in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the headings Credit Risk/Asset Quality and Allowance for Loan Losses, contained in the section Financial Condition, and under the heading Allowance for Loan Losses, which is contained in the Critical Accounting Estimates section of Item 7.

Investment Activities

The Company's investment activity is an integral part of the overall asset-liability management program of the Company. The investment function provides readily available funds to support loan growth as well as to meet withdrawals and maturities of deposits and attempts to provide maximum return consistent with liquidity constraints and general prudence, including diversification and safety of investments.

The securities in which the Company may invest are limited by regulation. In addition, the Company has an internal investment policy which restricts fixed income investments to high quality securities within the following categories: U.S. treasury securities, federal agency obligations (obligations issued by government sponsored enterprises that are not backed by the full faith and credit of the United States government), mortgage-backed securities (MBS's), including collateralized mortgage obligations (CMO's), and state, county and municipal securities (Municipals). The Company has not purchased sub-prime mortgage-backed securities or capital stock of FNMA or FHLMC. The Company is required to purchase Federal Home Loan Bank of Boston (FHLB) stock in association with the Bank's outstanding advances from the FHLB; this stock is classified as a restricted investment and carried at cost. The Company may also invest in certificates of deposit and, within prescribed regulatory limits, in both publicly traded and unlisted equity securities, registered mutual funds and unregistered funds, including private hedge funds, venture capital and private equity funds and funds of funds that may in turn invest in any of the foregoing. The investment policy also limits the categories within the investment portfolio to particular percentages of the total portfolio and to certain percentages of total assets and/or capital. The effect of changes in interest rates, principal payments and market values are considered when purchasing securities.

The short-term investments classified as cash equivalents may be comprised of short-term U.S. Agency Discount Notes, money market mutual funds and overnight or short-term federal funds sold. Short-term investments not carried as cash equivalents are classified as other short-term investments.

As of the balance sheet dates all of the Company's investment securities (with the exception of restricted FHLB stock) were classified as available for sale and carried at fair value. The Company regularly reviews the portfolio for securities with unrealized losses that are other than temporarily impaired. Management's assessment includes: evaluating the level and duration of the loss on individual securities; evaluating the credit quality of fixed income issuers; determining if any individual equity securities or mutual or other funds exhibit fundamental deterioration; and estimating whether it is unlikely that the individual security or fund will completely recover its unrealized loss within a reasonable period of time, or in the case of fixed income securities prior to maturity. If a decline in market value of a security is considered other than temporary, the cost basis of the individual security is written down to market value with a charge to earnings.

Investment transaction summaries, portfolio allocations and projected cash flows are prepared monthly and presented to the Company's Asset-Liability Committee of the board of directors (ALCO) on a periodic basis. ALCO is comprised of five outside directors and three

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

executive officers of the Company who are also directors, with various management liaisons. In addition, several directors who are not on the committee rotate in on a regular basis. ALCO regularly reviews the composition and key risk characteristics of the Company's investment portfolio, including effective duration, cash flow, market value at risk and asset class concentration. Credit risk inherent in the portfolio is closely monitored by management and presented at least annually to ALCO. ALCO also approves the Company's ongoing investment strategy and management updates the committee at each meeting.

See also Risk Factors contained in Item 1A, for further discussion on a variety of risks and uncertainties that may affect the Company's investment portfolio.

Table of Contents

Source of Funds

Deposits

Deposits have traditionally been the principal source of the Company's funds. The Company offers commercial checking, business and municipal savings accounts, money market and business sweep accounts, and escrow management accounts, as well as checking and Simplified Employee Pension (SEP) accounts to employees of our business customers. The Company also offers a broad selection of deposit products to the general public, including personal interest checking accounts (PIC), savings accounts, money market accounts, individual retirement accounts (IRA) and certificates of deposit (CDs).

In addition to on-balance sheet sweep products, the Company utilizes third party money market mutual funds for sweep accounts. Management believes that commercial customers benefit from enhanced interest rate options on these sweep accounts, while retaining a conservative investment option of the highest quality and safety. The balances transferred into mutual funds do not represent obligations of the Company.

Terms on CDs range from one week to thirty months. In addition to traditional in-house CDs, the Company also offers CDs through the Certificate of Deposit Account Registry Service (CDARS) nationwide network. This allows the Company to offer full FDIC insurance coverage on larger CD balances by placing the excess funds in FDIC insured CD s issued by other banks in the network. In exchange, the other CDARS institutions place dollar-for-dollar matching funds with the Company. Essentially, the equivalent of the original deposit comes back to the Company in increments that are covered by FDIC insurance and is available to fund local loan growth. The Company's first CDARS CD was placed with the network in January 2009.

The Company also utilizes brokered certificates of deposit (brokered CD s) as an alternative to borrowed funds to support asset growth in excess of internally generated deposits. Brokered CD terms generally range from one to twelve months.

Management determines the interest rates offered on deposit accounts based on current and expected economic conditions, competition, liquidity needs, the volatility of existing deposits, the asset-liability position of the Company and the overall objectives of the Company regarding the growth and retention of relationships.

Borrowed Funds

The Company's total borrowing capacity includes borrowing arrangements at the FHLB and the Federal Reserve Bank of Boston (FRB) discount window, entering into repurchase agreements with customers and through federal funds purchase arrangements with correspondent banks.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The Bank's membership in the FHLB enables the Bank to borrow funds based on the qualifying collateral balances pledged to the FHLB, including certain residential loans, commercial loans and U.S. Government and Agency securities. The Company utilizes borrowings from the FHLB to fund short-term liquidity needs. This facility is an integral component of the Company's asset-liability management program.

In order to provide additional contingent liquidity and a competitive funding source, the Company recently applied for and received approval from the FRB to establish short-term borrowing capacity based on the pledge of qualifying collateral balances to the FRB. At December 31, 2008, the collateral for FRB borrowing purposes was comprised primarily of certain municipal securities from the Company's investment portfolio. The Company has the ability to add additional types of collateral to increase its borrowing capacity with the FRB if necessary. The Company established this facility to enhance funding alternatives as part of its asset-liability management program.

The Company also borrows funds from customers (generally commercial and municipal customers) by entering into agreements to sell and repurchase investment securities from the Company's portfolio, with terms that may range from one week to six months. These repurchase agreements represent a cost competitive funding source for the Company. Interest rates paid by the Company on these repurchase agreements are based on market conditions and the Company's need for additional funds at the time of the transaction.

The Company has pre-established federal funds purchase arrangements with large regional correspondent banks in order to provide overnight and short-term borrowing capacity.

Table of Contents

See also **Risk Factors** contained in Item 1A, for further discussion on a variety of risks and uncertainties that may affect the Company's ability to obtain funding and sustain liquidity.

Junior Subordinated Debentures

In March 2000 the Company organized Enterprise (MA) Capital Trust I (the **Trust**), a statutory business trust created under the laws of Delaware, in order to issue \$10.5 million of 10.875% trust preferred securities that mature in 2030 and are callable beginning in 2010. The proceeds from the sale of the trust preferred securities were used by the Trust, along with the Company's \$325 thousand capital contribution, to acquire \$10.8 million in aggregate principal amount of the Company's 10.875% Junior Subordinated Debentures that mature in 2030 and are callable beginning in 2010.

Pursuant to Financial Interpretation No. 46R, issued by the Financial Accounting Standards Board in December 2003, the Company carries the \$10.8 million of Junior Subordinated Debentures on the Company's financial statements as a liability, with related interest expense, and the \$10.5 million of trust preferred securities issued by the Trust, and the related non-interest expense, are excluded from the Company's financial statements.

Investment Advisory Group

The Company provides a range of investment advisory and management services to individuals, family groups, businesses, trusts, foundations, non-profit organizations, endowments and retirement plans. These services include a combination of securities brokerage services through a third party service arrangement with Commonwealth Financial Network, a licensed securities brokerage firm, and fee only investment advisory and trust services for management of equity and fixed income portfolios. Portfolios are managed based on the individual investment objectives of each client.

The Company's Investment Advisory Group utilizes an open-architecture, manager of managers approach to client investment management. The philosophy is to identify and hire high performing independent investment management firms on behalf of our clients. During 2008, the Company entered into a consulting agreement with Fortigent, LLC, an investment research and diligence firm, with over \$20 billion in advisory assets under management, to strengthen the Company's strategic development, manager selection, manager access and performance monitoring capabilities. Fortigent will perform a detailed search and due diligence reviews and objective analysis of each independent management firm based on historic returns, management, longevity, investment style, risk profile, and other criteria, and will maintain ongoing oversight and monitoring of their performance. This due diligence is intended to enable the Company to customize investment portfolios to meet each customer's financial objectives and deliver superior long-term performance.

Enterprise Insurance Services

Enterprise Insurance Services LLC engages in insurance sales activities through a third party arrangement with HUB International New England, LLC (**HUB**), which is a full service insurance agency, with offices in Massachusetts and New Hampshire, and is part of HUB

International Limited, which operates throughout the United States and Canada. Enterprise Insurance Services provides, through HUB, a full array of insurance products including property and casualty, employee benefits and risk-management solutions tailored to serve the specific insurance needs of businesses in a range of industries operating in the Company's market area.

On-line Banking and Cash Management

The Company uses an in-house turn-key solution from its core banking system vendor for internet banking services for retail and commercial customers. Major on-line banking capabilities include the following: opening of personal deposit and CD accounts; balance inquiry; internal transfers; loan payments; bill payments; federal tax payments; placement of stop payments; access to images of checks paid; and access to prior period account statements. In addition, commercial customers may take advantage of remote deposit capture service and have the ability to initiate on-line electronic funds transfers, including ACH originations and wire transfers. On-line banking security features include the use of a two-factor authentication process involving unique individualized logon IDs and passwords, registered personalized security profile, and the use of security tokens

Table of Contents

which provide one-time passwords to initiate and execute higher-risk commercial transactions. The site also returns unique confirmations to validate that the user has accessed the Company's online banking site. In addition on-line banking security makes use of 128-bit encryption for all passwords and account information transferred over the internet; automatic session termination after 20 minutes of inactivity; and firewalls, which check to make sure that communications only occur between approved individuals, that ensure the communication is in the proper protocol, and refuse entry to anyone without proper authorization.

Company Website

The Company currently uses an outside vendor to design, support and host its internet website. The underlying structure of the site provides for dynamic maintenance of the information by Company personnel. The site provides information on the Company and its services, the ability to submit mortgage loan applications online, as well as providing the access point to various specified banking services and to various financial management tools. In addition, the site includes the following major capabilities: career opportunities; calculators; an ATM/Branch Locator/Map; and investor and corporate information, which includes a corporate governance page. The corporate governance page includes the Company's corporate governance guidelines, code of business conduct and ethics, and whistleblower protection policy, as well as the charters of the board of Directors' audit, compensation and personnel, and corporate governance/nominating committees.

The Company makes available free of charge, through a link on its web site to its SEC filings, copies of the Company's annual report on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, as well as all registration statements that the Company has been required to file in connection with the issuance of its shares. The Company similarly makes available all insider stock ownership and transaction reports filed with the SEC by the Company's executive officers, directors and any 10% stockholders under Section 16 of the Securities Exchange Act of 1934 (Forms 3, 4 and 5). Access to all of these reports is essentially simultaneous with the SEC's posting of these reports on its EDGAR system through the SEC website (www.SEC.gov). The Company's internet web address is: EnterpriseBanking.com.

Competition

The Company faces strong competition to generate loans and to attract deposits and investment advisory assets. National and larger regional banks have a local presence in the Company's market area. Numerous local savings banks, commercial banks, cooperative banks and credit unions have one or more offices in the Company's market area. Larger banks have certain competitive advantages over the Company, including the ability to make larger loans to a single borrower than is possible for the Company. The greater financial resources of larger banks also allow them to offer a broad range of automated banking services, to maintain numerous branch offices and to mount extensive advertising and promotional campaigns. While the recent tightening of credit markets and contraction of liquidity for larger regional and national banks has resulted in some banks restricting their lending activity, it has also increased competition and rates for deposit resources within the Company's market area. This competition has an impact on the Company's deposit strategy, as the Company may or may not choose to compete on rates depending on its funding needs and asset-liability position at any given time.

Competition for loans, investment advisory assets and deposits also comes from other businesses that provide financial services, including consumer finance companies, mortgage brokers, private lenders, insurance companies, securities brokerage firms, institutional mutual funds, registered investment advisors and internet based banks.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

Notwithstanding the substantial competition with which the Company is faced, management believes that the Company has established a solid reputation within its market area and has differentiated itself from competitors based upon service level, a targeted sales focus on small to medium sized business, professionals, non-profits and high net worth individuals, and active community involvement, which has lead to a strong network with business and community leaders. In addition, the Company continually examines new products and technologies in order to maintain a highly competitive mix of offerings and to target product lines to customer needs. Management actively seeks to strengthen its position, by capitalizing on the market opportunities, and the continued pursuit of strategic growth within existing and neighboring geographic markets and market segments.

Table of Contents

Advances in, and the increased use of, technology, such as internet banking, electronic transaction processing and information security, are expected to have a significant impact on the future competitive landscape confronting financial institutions.

See also *Supervision and Regulation* below, and Item 1A, *Risk Factors*, and *Opportunities and Risks* included in the section entitled *Overview*, which is contained in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* for further discussion on how new laws and regulations and other factors may effect the Company's competitive position, growth and/or profitability.

Supervision and Regulation

General

To the extent that the information in this report under the heading *Supervision and Regulation* describes statutory or regulatory provisions, it is qualified in its entirety by reference to the particular statutory or regulatory provision so described. Any changes in applicable laws or regulations may have a material effect on the business and prospects of the Company.

Bank holding companies and banks are subject to extensive government regulation through federal and state statutes and related regulations, which are subject to changes that can significantly affect the way in which financial service organizations conduct business.

Regulation of the banking and financial services industries has undergone significant developments over the past several years, some of which have eased legal and regulatory restrictions while others have increased regulatory requirements. Such developments on the federal level have included the following: increasing anti-money laundering and customer identification requirements; enhancing internal controls over financial reporting, corporate accountability and improving the quality of investor information; imposing requirements as to fraud prevention and data breach response programs; providing consumers with greater access to and control over personal credit data; and automating the nation's check-processing system, among other legal and regulatory developments.

Legislative initiatives at the state level in Massachusetts have also further addressed data security requirements for protecting consumer financial information and residential mortgage lending and foreclosure requirements.

The current financial crisis has also resulted in significant new federal legislation and administrative initiatives intended to stabilize the U.S. banking system and residential real estate market and stimulate the economy. Recent federal legislation has included the Emergency Economic Stabilization Act of 2008 (EESA), under which the U.S. Treasury has injected capital directly into U.S. banks through its Troubled Asset Recovery Program (TARP), and the American Recovery and Reinvestment Act of 2009 (ARRA), under which Congress has approved various spending and tax measures, while also imposing significant new executive compensation restrictions and corporate governance standards on institutions that have either received TARP funding or receive such funding in the future. Administrative initiatives have included President Obama's recently announced Financial Stability Plan, which is comprised of several components, including additional capital assistance to banks, a potential public-private vehicle for purchasing toxic assets from financial institutions, various consumer, business and community lending initiatives, and affordable housing support and foreclosure prevention plans. Possible future Congressional actions may also address a variety of

additional issues, including federal bankruptcy reform, regulatory consolidation and creation of a single federal systemic risk regulator. Some or all of these recently adopted or currently proposed measures may result in increased regulation of the U.S. banking and financial services industries and additional restrictions on banking and other financial activities.

Any future increase in the extent of regulation imposed upon the banking or financial services industries generally could result in the Company incurring additional operating and compliance costs, which in turn could impede profitability.

Regulation of the Holding Company

The Company is a registered bank holding company under the federal Bank Holding Company Act of 1956, as amended (the Bank Holding Company Act). The business and operations of the Company are subject to the supervision and examination of the Board of Governors of the Federal Reserve System (the Federal Reserve Board). Under applicable state laws, the Company, through the Bank, is also subject to the supervisory jurisdiction of the

Table of Contents

Massachusetts Commissioner of Banks (the Commissioner) and, with respect to its New Hampshire branch operations, the New Hampshire Banking Department.

The Bank Holding Company Act requires prior approval by the Federal Reserve Board of the acquisition by the Company of substantially all the assets or more than five percent of the voting stock of any bank. The Bank Holding Company Act also authorizes the Federal Reserve Board to determine (by order or by regulation) what activities are so closely related to banking as to be a proper incident of banking, and thus, whether the Company, either directly or indirectly through non-bank subsidiaries, can engage in such activities. The Bank Holding Company Act prohibits the Company and the Bank from engaging in certain tie-in arrangements in connection with any extension of credit, sale of property or furnishing of services. There are also restrictions on extensions of credit and other transactions between the Bank, on the one hand, and the Company, or other affiliates of the Bank, on the other hand.

Under the Gramm-Leach-Bliley Act (the GLB Act) a bank holding company may elect to become a financial holding company, by which a qualified parent company of a banking institution may engage, directly or through its non-bank subsidiaries, in any activity that is financial in nature or incidental to such financial activity or in any other activity that is complimentary to a financial activity and does not pose a substantial risk to the safety and soundness of depository institutions or the financial system generally. A bank holding company will be able to successfully elect to be regulated as a financial holding company if all of its depository institution subsidiaries meet certain prescribed standards pertaining to management, capital adequacy and compliance with the federal Community Reinvestment Act. Financial holding companies remain subject to regulation and oversight by the Federal Reserve Board. The Company believes that the Bank, which is the Company's sole depository institution subsidiary, presently satisfies all of the requirements that must be met to enable the Company to successfully elect to become a financial holding company. However, the Company has no current intention of seeking to become a financial holding company. Such a course of action may become necessary or appropriate at some time in the future depending upon the Company's strategic plan.

Regulation of the Bank

As a trust company organized under Chapter 172 of the Massachusetts General Laws, the deposits of the Bank are insured by the Deposit Insurance Fund of the Federal Deposit Insurance Corporation (the FDIC), up to the maximum amount provided by law. The Bank is subject to regulation, supervision and examination by the Commissioner and the FDIC. The Bank is also subject to certain regulatory requirements of the Federal Reserve Board and, with respect to its New Hampshire branch operations, the New Hampshire Banking Department.

The regulations of these agencies govern many aspects of the Bank's business, including permitted investments, the opening and closing of branches, the amount of loans which can be made to a single borrower, mergers, appointment and conduct of officers and directors, capital levels and terms of deposits. The Federal Reserve Board also requires the Bank to maintain minimum reserves on its deposits. Federal and state regulators can impose sanctions on the Bank and its management if the Bank engages in unsafe or unsound practices or otherwise fails to comply with regulatory standards. Various other federal and state laws and regulations, such as truth-in-lending and truth-in-savings statutes, the Equal Credit Opportunity Act, the Bank Secrecy Act, the Real Estate Settlement Procedures Act, the Community Reinvestment Act, Check 21 and the FACT Act, also govern the Bank's activities and operations.

Pursuant to the GLB Act, the Bank may also form, subject to the approvals of the Commissioner and the FDIC, financial subsidiaries to engage in any activity that is financial in nature or incidental to a financial activity. In order to qualify for the authority to form a financial subsidiary, the Bank would be required to satisfy certain conditions, some of which are substantially similar to those that the Company would be required to satisfy in order to elect to become a financial holding company. The Company believes that the Bank would be able to satisfy all of the conditions that would be required to form a financial subsidiary, although the Company has no current intention of doing so. Such a course of

action may become necessary or appropriate at some time in the future depending upon the Company's strategic plan.

Deposit Insurance Assessment

The Company's deposit accounts are insured by the Deposit Insurance Fund (the DIF) of the FDIC up to the maximum amount provided by law.

Table of Contents

Prior to 2007, under the former FDIC system for assessing deposit insurance premiums, the Bank was not assessed any deposit insurance premium based on its designation as well capitalized .

Effective January 1, 2007, the FDIC implemented a revised risk-based deposit insurance assessment system in accordance with the requirements of the Federal Deposit Insurance Reform Act of 2005 (the Deposit Insurance Reform Act). Under the revised system, the deposit insurance assessment rates are determined based upon a combination of an institution's financial ratios and supervisory factors. There are four established risk categories under the assessment rules. Under this deposit insurance assessment system, even the highest risk-rated (i.e., least risk) banks and thrifts are subject to some level of assessment payable to the DIF.

In 2007, the Bank qualified as a Risk Category I (least risk) and was assessed deposit insurance premiums, under the revised system, at an annualized rate of 5.2 basis points of the Bank's deposit assessment base, as defined by the FDIC. Under the Deposit Insurance Reform Act, eligible insured depository institutions, such as the Bank, shared in a one-time assessment credit pool of approximately \$4.7 billion. This one-time credit was applied against the institutions' 2007 deposit insurance assessment. In the case of the Company, the one-time credit of approximately \$333 thousand offset approximately 94% of the Bank's deposit insurance assessment for 2007.

In 2008, the Bank again qualified as Risk Category I and was assessed deposit insurance premiums at an annualized base rate of approximately 5.3 basis points.

As a result of recent bank failures, the DIF reserve ratio (DIF reserves as a percent of estimated insured deposits) has declined substantially, and the FDIC has taken steps, as required by law, to restore the DIF reserve ratio. Under the FDIC's DIF restoration plan, the assessment schedule was raised uniformly by seven basis points for all insured institutions for the first quarter of 2009. This increase to the annualized base assessment rates is expected to increase the Company's deposit insurance expense by approximately \$150 - \$200 thousand for the quarter ending March 31, 2009.

In addition to the increase in first quarter assessment rates, the FDIC has also adopted a final rule that, among other matters, modifies the risk-based assessment system to require riskier institutions to pay a larger share of premiums beginning with the second quarter of 2009 and sets initial base assessment rates beginning April 1, 2009 at 12 to 45 basis points. The modified assessment system imposes higher rates for institutions with a significant reliance on secured liabilities, and higher rates for institutions with a significant reliance on brokered deposits but, for well-managed and well-capitalized institutions, only when accompanied by rapid asset growth. The modified system also provides incentives in the form of a reduction in assessment rates for institutions to hold long-term unsecured debt and, for smaller institutions, high levels of Tier 1 capital. Management expects that the Bank's FDIC insurance premiums will increase beginning in April 2009. Management expects that the Bank will again qualify as Risk Category I in 2009, and is currently assessing the impact of the modified assessment system on the Company's results of operations.

As an additional measure to restore the DIF's reserve ratio, the FDIC has also adopted an interim rule (meaning that its final effectiveness remains subject to FDIC consideration of public comments) imposing an emergency 20 basis point special assessment on all insured depository institutions as of June 30, 2009, which would be collected on September 30, 2009. The interim rule would also allow the FDIC Board to impose possible additional special assessments of up to 10 basis points thereafter to maintain public confidence in the DIF. Following its adoption of this interim rule, the FDIC indicated that if Congress authorizes an increase in the FDIC's borrowing capacity through the U.S. Treasury, then the contemplated June 30 special assessment could be significantly reduced to approximately 10 basis points. Any special assessment in the second quarter of 2009 or thereafter, as well as any future increases in annual assessment rates, will further increase the Company's deposit insurance expense.

In addition to general increases in the FDIC's assessment rates and any future special assessments, the Company's insurance costs will increase in 2009 due to its participation in the FDIC's Transaction Account Guarantee Program (the TAGP) as described further below.

Table of Contents

Participation in Temporary Liquidity Guarantee Program and Transaction Account Guarantee Program

On October 14, 2008, the U.S. Treasury and the FDIC jointly announced two new temporary programs to strengthen confidence and encourage liquidity in the nation's banking system. Under the Temporary Liquidity Guarantee Program (the "TLGP"), the FDIC will guarantee certain newly issued senior unsecured debt of banks, thrifts and certain holding companies. Institutions opting to participate will be charged a 75-basis point fee to protect newly issued debt (issued on or before June 30, 2009). In addition, under the TAGP the FDIC will provide participating depository institutions with full insurance coverage for non-interest bearing deposit transaction accounts, regardless of the dollar amount. The FDIC has made exceptions for certain interest bearing transaction accounts and funds swept into non-interest bearing savings accounts to also be covered under the TAGP. Participating institutions will be charged a 10-basis point surcharge, on those non-interest bearing account balances over the existing insurance limit of \$250,000, which will be added to the institutions' deposit insurance assessment. On November 13, 2008, the Company began participating in these programs. As of December 31, 2008, the Company did not have any debt guaranteed under the TLGP. The Company expects that participation in the TAGP will increase its 2009 deposit insurance expense by an estimated \$300 - \$375 thousand.

Dividends

Under Massachusetts law, the Company's board of directors is generally empowered to pay dividends on the Company's capital stock out of its net profits and only to the extent that such payments will not impair the Bank's capital stock.

See also "Dividends" contained in Item 5 below, for further discussion on restrictions that may effect the Company's and/or the Bank's ability to pay dividends.

Capital Resources

Capital planning by the Company and the Bank considers current needs and anticipated future growth. The primary sources of capital have been the sale of common stock in 1988 and 1989, the issuance of \$10.5 million of trust preferred securities in 2000 by the Trust, retention of earnings less dividends paid since the Bank commenced operations, proceeds from the exercise of employee stock options and proceeds from purchases of shares pursuant to the Company's dividend reinvestment plan and employee stock purchase plan.

The Company

The Federal Reserve Board has adopted capital adequacy guidelines that generally require bank holding companies to maintain total capital equal to 8% of total risk-weighted assets, with at least one-half of that amount (or 4% of total risk-weighted assets) consisting of core or Tier 1 capital. Total capital for the Company consists of Tier 1 capital and supplementary or Tier 2 capital. Tier 1 capital for the Company begins with common stockholders' equity and is reduced by certain intangible assets. In addition, trust preferred securities may compose up to 25% of the Company's Tier 1 capital (subject to certain limitations and with any excess allocable to Tier 2 capital). Supplementary capital for the Company is comprised solely of a portion of the allowance for loan losses. Assets are adjusted under the risk-based capital guidelines to take into account different levels of credit risk; for example, cash and government securities are placed in a 0% risk category (requiring no additional capital),

most home mortgage loans are placed in a 50% risk category, and the bulk of assets that, by their nature in the ordinary course of business, pose a direct credit risk to a bank holding company, including commercial real estate loans, commercial business loans and consumer loans, are placed in a 100% risk category.

In addition to the risk-based capital requirements, the Federal Reserve Board requires bank holding companies to maintain a minimum leverage ratio of Tier 1 capital to quarterly average total assets of 4% (3% percent if given the highest regulatory rating and not experiencing significant growth).

The Bank

The Bank is subject to separate capital adequacy requirements of the FDIC, which are substantially similar to the requirements of the Federal Reserve Board applicable to the

Table of Contents

Company. However, trust preferred proceeds contributed to the Bank from the Company are included in Tier 1 capital of the Bank without limitation. The Company contributed \$10.3 million of proceeds from the sale of these securities to the Bank in 2000. Under the FDIC requirements, the minimum total capital requirement is 8% of total assets and certain off-balance sheet items, weighted by risk. At least 4% of the total 8% ratio must consist of Tier 1 capital (primarily common equity including retained earnings) and the remainder may consist of subordinated debt, cumulative preferred stock and a limited amount of loan loss reserves. At the Bank level, as at the Company level on a consolidated basis, certain intangible assets are deducted from Tier 1 capital in calculating regulatory capital ratios.

Under the applicable FDIC capital requirements, the Bank is also required to maintain a minimum leverage ratio. The ratio is determined by dividing Tier 1 capital by quarterly average total assets, less intangible assets and other adjustments. FDIC rules require a minimum of 3% for the highest rated banks. Banks experiencing high growth rates are expected to maintain capital positions well above minimum levels.

Depository institutions, such as the Bank, are also subject to the prompt corrective action framework for capital adequacy established by the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA). Under FDICIA, the federal banking regulators are required to take prompt supervisory and regulatory actions against undercapitalized depository institutions. FDICIA establishes five capital categories: well capitalized , adequately capitalized , undercapitalized , significantly undercapitalized , and critically undercapitalized . A well capitalized institution has a total capital to total risk-weighted assets ratio of at least 10%, a Tier 1 capital to total risk-weighted assets ratio of at least 6%, a leverage ratio of at least 5% and is not subject to any written order, agreement or directive; an adequately capitalized institution has a total capital to total risk-weighted assets ratio of at least 8%, a Tier 1 capital to total risk-weighted assets ratio of at least 4%, and a leverage ratio of at least 4% (3% percent if given the highest regulatory rating and not experiencing significant growth), but does not qualify as well capitalized . An undercapitalized institution fails to meet one of the three minimum capital requirements. A significantly undercapitalized institution has a total capital to total risk-weighted assets ratio of less than 6%, a Tier 1 capital to total risk-weighted assets ratio of less than 3%, and a leverage ratio of less than 3%. A critically undercapitalized institution has a ratio of tangible equity to assets of 2%, or less.

Under certain circumstances, a well capitalized , adequately capitalized or undercapitalized institution may be required to comply with supervisory actions as if the institution were in the next lowest category.

Failure to meet applicable minimum capital requirements, including a depository institution being classified as less than adequately capitalized within FDICIA s prompt corrective action framework, may subject a bank holding company or its subsidiary depository institution(s) to various enforcement actions, including substantial restrictions on operations and activities, dividend limitations, issuance of a directive to increase capital and, for a depository institution, termination of deposit insurance and the appointment of a conservator or receiver.

The Treasury s Capital Purchase Program

In October 2008, the U.S. Treasury implemented a capital purchase program (CPP) under the TARP provisions contained in EESA, which made capital available directly to qualifying publicly held banking institutions. Under the CPP, as initially implemented under EESA, qualifying banks could receive capital from the U.S. Treasury in exchange for issuing non-voting preferred stock with an annual dividend rate of 5% for the first five years and 9% thereafter. The dividends on the Treasury s preferred stock are not tax-deductible and thus are equivalent to pretax rates of approximately 8.5% for the first five years and 15.25% thereafter. The preferred shares that have been issued to the U.S. Treasury under the CPP are also accompanied by ten-year warrants to purchase common stock of the participating banks at current prices. These warrants are exercisable at any time and may be sold or transferred by the U.S. Treasury to any outside party. In addition, under the terms of the CPP, companies that participated in the program were subject to a number of operating guidelines and restrictions, including restrictions on executive compensation, dividend payments and stock repurchases, which could be changed unilaterally by the U.S. Treasury pursuant to a subsequent act

of Congress.

The Company's Board of Directors carefully considered the Company's potential involvement in the CPP. The Company was notified in early December that it had received preliminary

Table of Contents

approval to receive up to \$28.5 million in capital under the program, which was the maximum amount available to the Company based on its asset size. In December the Board of Directors concluded that declining this government funding was in the best interests of the Company and its shareholders. In making this decision, the Board gave careful consideration to many factors. First and foremost was the Company's strong capital position (under regulatory guidelines the Company is classified as "well capitalized" which is the highest classification) and strong asset quality. The Board of Directors also believed that this government capital would have come with a high cost in terms of its dividend rate, which most likely would dilute earnings in the short term, the dilution to its shareholders from the warrants attached to the capital (management estimated that these warrants could represent an ownership interest in the Company of up to 5% when fully exercised), the potential restriction on future increases to dividends on its common stock, and the potential unknown operating restrictions that could be unilaterally imposed in the future by an act of Congress. The Board was also concerned about the intended purpose of the TARP funding. While the U.S. Treasury initially indicated that the capital was intended to be used to further strengthen healthy banks and to add capital to the banking industry generally so as to promote lending, and that it could be used by healthy banks in the acquisition of weaker banks, various members of Congress advocated putting binding conditions on the participating banks' use of the TARP funds.

As described above, under ARRA, Congress has imposed significant new executive compensation restrictions and corporate governance standards that go well beyond the original terms of the CPP not only on institutions that may accept government funding in the future, but also on those institutions that participated in the initial TARP funding.

The Treasury's Capital Assistance Program

The Capital Assistance Program (CAP) component of President Obama's Financial Stability Plan will provide an additional capital opportunity to banks, whether or not they participated in the CPP, on terms that have been revised from those included in the original CPP, including changes to the dividend rate and conversion features of the preferred shares that would be issued to the U.S. Treasury, additional mandatory reporting requirements for participants and further restrictions on a participating institution's common stock dividends, stock repurchases and cash acquisitions. Management is in the process of reviewing the terms of the CAP as part of its ongoing review of recent legislative and administrative developments.

Patents, Trademarks, etc.

The Company holds a number of registered service marks related to product names and corporate branding. The Company holds no patents, registered trademarks, licenses (other than licenses required to be obtained from appropriate banking regulatory agencies), franchises or concessions which are material to its business.

Employees

At December 31, 2008, the Company employed 306.88 full-time equivalent employees, including 111 officers. None of the Company's employees are presently represented by a union or covered by a collective bargaining agreement. Management believes its employee relations to be excellent.

Item 1A. Risk Factors

An investment in the Company's common stock is subject to a variety of risks and uncertainties. The material risks and uncertainties that management believes affect the Company are described below. These risks and uncertainties are not listed in any particular order of priority and are not necessarily the only ones facing the Company. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair the Company's business and results of operations.

This report is qualified in its entirety by these risk factors. If any of the following risks actually occur, the Company's financial condition and results of operations could be materially and adversely affected. If this were to happen, the value of the Company's common stock could decline significantly, and shareholders could lose some or all of their investment.

Table of Contents

The Company's Profitability Depends Significantly on Economic Conditions in the Company's Primary Market Areas

The Company's success depends principally on the general economic conditions of the primary market areas in which the Company operates. The local economic conditions in these areas have a significant impact on the demand for the Company's products and services as well as the ability of the Company's customers to repay loans, the value of the collateral securing loans and the stability of the Company's deposit funding sources.

What began as the sub-prime mortgage crisis, referring to the dramatic increase in the level of home foreclosures both locally and nationally which began in 2007, has had far-reaching consequences in the financial services industry, the national economy in general, and a global economic impact. The current U.S. financial crisis has been marked by the collapse of the market for sub-prime mortgage-backed securities, the government takeover of the national mortgage agencies, and the failure or government-assisted acquisition of several large national mortgage brokers, banks and investment banks. Nationwide, the crisis has led to increased volatility in financial markets and significant market declines on certain investment securities, the tightening of credit for both consumers and businesses, federal legislation aimed at rescuing the financial industry and stimulating the national economy, further weakening of the real estate market, historically low interest rates, increasing unemployment, declines in consumer spending and deterioration of general nationwide economic conditions resulting in an economic recession. Although the current economic crisis has not impacted the New England region as severely as many regions of the country, any long-term continuation of these national and global trends, or possible subsequent effects, could further weaken the local economy and have long-term adverse consequences on local industries, which could negatively impact the Company's financial condition, capital position, liquidity, and performance in a variety of ways. Potential adverse effects on the Company that could result include: the Company could experience continued pressure on its net interest margin; deterioration in its asset quality and an increased level of delinquencies; an increase in the level of its allowance for loan losses; a decline in the value of its investment portfolio; unanticipated charges against capital; funding sources may become restricted thereby impacting the Company's ability to meet cash needs; and a decline in the market price of the Company's common stock.

In addition to the consequences of the current economic recession, any significant and sustained decline in general economic conditions caused by acts of terrorism, an outbreak of hostilities or other international or domestic occurrences, market interest rate changes, or other factors, could also impact local economic conditions and, in turn, have a material adverse effect on the Company's financial condition and results of operations.

The Company is Subject to Lending Risk

There are inherent risks associated with the Company's lending activities. These risks include, among other things, the impact of changes in the economic conditions in the market areas in which the Company operates and changes in interest rates. Weakening of economic conditions within the Company's market area or increases in interest rates could adversely impact the ability of borrowers to repay outstanding loans or the value of the collateral securing these loans.

The Company's loan portfolio consists primarily of commercial real estate, commercial and industrial and construction loans. These types of loans are generally viewed as having more risk of default than owner occupied residential real estate loans or consumer loans, and are also typically larger. The underlying commercial real estate values, the actual costs necessary to complete a construction project, or customer cash flow and payment expectations on such loans can be more easily influenced by adverse conditions in the related industries, the real estate market or in the economy in general. Any significant deterioration in the Company's commercial loan portfolio or underlying collateral values could have a material adverse effect on the Company's financial condition and results of operations.

See the discussions contained in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the headings Loans and Credit Risk/Asset Quality included in the section entitled Financial Condition, for further information regarding the Company's commercial loan portfolio and credit risk.

Table of Contents

The Company May Increase the Allowance for Loan Losses

The Company maintains an allowance for loan losses, which is established through a provision for loan losses charged to earnings that represents management's estimate of probable losses that have been incurred within the existing portfolio of loans. The determination of the appropriate level of the allowance for loan losses inherently involves a high degree of subjectivity and requires the Company to make significant estimates of current credit risks and future trends, all of which may undergo material changes. In addition, bank regulatory agencies periodically review the Company's allowance for loan losses and may require an increase in the provision for loan losses or the recognition of further loan charge-offs, based on judgments that differ from those of the Company's management. Any increases in the allowance for loan losses will result in a decrease in net income and, depending upon the magnitude of the changes, could have a material adverse effect on the Company's financial condition and results of operations.

See the discussions contained in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations", under the heading "Allowance for Loan Losses", which is contained in the "Critical Accounting Estimates" section and under the headings "Credit Risk/Asset Quality" and "Allowance for Loan Losses", included in the section entitled "Financial Condition", for further information regarding the process by which the Company determines the appropriate level of its allowance for loan losses.

The Company's Investment Portfolio Could Incur Losses

There are inherent risks associated with the Company's investment activities. These risks include the impact of changes in interest rates, weakness in the real estate or other industries, adverse changes in regional or national economic conditions, and general turbulence in domestic and foreign financial markets, among other things. These conditions could adversely impact the fair market value and the ultimate collectability of the Company's investments.

In addition to fair market value impairment, carrying values may be adversely impacted due to a fundamental deterioration of the individual municipality or government agency whose debt obligations the Company owns or of the individual company or fund in which the Company has invested. At December 31, 2008, approximately 90% of the Company's investment portfolio, or \$144 million, was invested in obligations issued by federal government agencies, including Fannie Mae and Freddie Mac, or municipal government entities, while 7%, or \$10.7 million, was invested in equity securities, including \$4.7 million in FHLB stock.

If an investment's value is deemed other than temporarily impaired, then the Company is required to write down the carrying value of the investment through a charge to earnings. The determination of the level of other-than-temporary impairment (OTTI) involves a high degree of subjectivity and requires the Company to make significant estimates of current market risks and future trends, all of which may undergo material changes. Any OTTI charge will result in a decrease in net income and, depending upon the magnitude of the charges, could have a material adverse effect on the Company's financial condition and results of operations.

At December 31, 2008, the Company's investment in FHLB capital stock amounted to \$4.7 million. The FHLB is currently operating with retained earnings below its target level. The FHLB has instituted a plan to increase retained earnings which includes suspending its quarterly dividend and a moratorium on the repurchase of excess capital stock from member banks, among other programs. If further deterioration in the FHLB financial condition or capital levels occurs, the FHLB capital stock may become other than temporarily impaired to some degree.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

Additionally, if as a result of deterioration in its financial condition the FHLB restricts its lending activities, the Company may need to seek alternative funding sources to meet its liquidity needs. See also the discussion contained in this Item 1A under the heading Sources of External Funding May Become Restricted and Impact the Company's Liquidity.

See the discussions contained in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the heading Impairment Review of Securities, which is contained in the Critical Accounting Estimates section, and under the heading Investment Securities, included in the section entitled Financial Condition, for further information regarding the process by which the Company determines the level of other-than-temporary impairment.

Table of Contents

The Company is Subject to Interest Rate Risk

The Company's earnings and cash flows are largely dependent upon its net interest income, meaning the difference between interest income earned on interest-earning assets and interest expense paid on interest-bearing liabilities. Interest rates are highly sensitive to many factors that are beyond the Company's control, including monetary policy of the federal government, inflation and deflation, volatility of financial and credit markets, and competition. If the interest rates paid on interest-bearing liabilities increase at a faster rate than the interest rates received on loans and other investments, the Company's net interest income, and therefore earnings, could be adversely affected. Earnings could also be adversely affected if the interest rates received on loans and other investments fall more quickly than the interest rates paid on interest-bearing liabilities.

See Item 7A, Quantitative and Qualitative Disclosures about Market Risk, for further discussions related to the Company's management of interest rate risk.

Sources of External Funding May Become Restricted and Impact the Company's Liquidity

The Company's external funding sources include borrowing capacity in the brokered CD market, at the FHLB and FRB, and through federal fund purchase arrangements with correspondent banks. The Company has in the past also issued junior subordinated debentures. If, as a result of general economic conditions or other events, these sources of external funding withdraw or limit the Company's borrowing capacity, the Company may not be able to raise adequate funds or may incur substantially higher cost or operating restrictions in order to raise necessary funds elsewhere. Any such increase in funding cost or restrictions could have a negative impact on the Company's net interest income and, consequently, on its results of operations and financial condition.

Increased Reliance on Borrowings and Brokered CD's as Sources of Funds Could Adversely Affect the Company's Profitability

The Company has traditionally funded asset growth principally through deposits and borrowings. As a general matter, deposits are a lower cost source of funds than external wholesale funding (brokered CD's or borrowings), because interest rates paid for deposits are typically less than interest rates charged for wholesale funding (notwithstanding the recent declines in overnight borrowing rates). If, as result of competitive pressures, market interest rates, general economic conditions or other events, the balance of the Company's deposits decreases relative to the Company's overall banking operations, the Company may have to rely more heavily on wholesale funding in the future. Any such increased reliance on wholesale funding could have a negative impact on the Company's net interest income and, consequently, on its results of operations and financial condition.

The Use of Independent Investment Management Firms Expose the Company to Additional Risk

The Company relies on outside mutual fund companies and independent investment management firms to provide key services necessary to conducting its investment advisory and management business. These firms are subject to a variety of risk and uncertainties, including significant exposures to changes in financial market conditions and poor investment decisions, turnover in key personnel, internal and external securities fraud, information security or data breach, and financial losses, among others, any of which could in turn expose the Company itself to various

risks. The risks to the Company include but are not limited to, the loss of customer business, damage to the Company's reputation, exposure of the Company to civil litigation and possible financial liability, and a reduction in fee income, any of which could have a material adverse effect on the Company's financial condition and results of operations.

The Company's Capital Levels Could Fall Below Regulatory Minimums

The Company and the Bank are both subject to the capital adequacy guidelines of the FRB and FDIC, respectively. Failure to meet applicable minimum capital ratio requirements may subject the Company and/or the Bank to various enforcement actions. If capital levels decline due to possible future net operating losses, impairment charges against tangible

Table of Contents

or intangible assets, adjustments to retained earnings due to changes in accounting rules, among other things, and if the Company is unable to raise additional capital to offset these charges, the Company's capital ratios may fall below regulatory capital adequacy levels.

See the section entitled "Capital Resources" contained in Item 1, "Business", for additional information regarding regulatory capital requirement for the Company and the Bank.

The Company is Subject to Extensive Government Regulation and Supervision

The Company is subject to extensive federal and state regulation and supervision. Banking regulations are primarily intended to protect depositors' funds, federal deposit insurance funds and the banking system as a whole, not the interests of shareholders. These regulations affect the Company's lending practices, capital structure, investment practices, dividend policy and growth, among other things. Federal and state statutes and related regulations, including tax policy and corporate governance rules, can significantly affect the way in which bank holding companies, and public companies in general, conduct business. Changes to federal or state statutes, regulations or regulatory and tax policies, including changes in interpretation or implementation of existing statutes, regulations or policies, or new regulation aimed at resolving the current financial crisis could affect the Company in substantial and unpredictable ways, including subjecting the Company to additional operating and compliance costs, increasing the Company's deposit insurance premiums, limiting the types of financial services and products the Company may offer and/or increasing competition from other non-bank providers of financial services.

See the section entitled "Supervision and Regulation" contained in Item 1, "Business", for additional information regarding the supervisory and regulatory issues facing the Company.

The Company Operates in a Highly Competitive Industry and Market Area

The Company faces substantial competition in all areas of its operations from a variety of different competitors, many of which are larger and have more financial resources than the Company. Competitors within the Company's market area include not only national, regional, and other community banks, but also various types of other non-bank financial institutions, including credit unions, consumer finance companies, mortgage brokers, private lenders, insurance companies, securities brokerage firms, institutional mutual funds, registered investment advisors, internet based banks and other financial intermediaries.

See the section entitled "Competition" contained in Item 1, "Business", for additional information regarding the competitive issues facing the Company.

The Company Continually Encounters Technological Change

The banking industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Many of the Company's competitors have substantially greater resources to invest in technological improvements. Failure to successfully keep pace with technological change affecting the banking industry could have a material adverse effect on the Company's business and, in turn, the Company's financial condition and results of operations.

Table of Contents

The Company's Information Systems May Experience an Interruption or Breach in Security

The Company relies heavily on communications and information systems to conduct its business. The occurrence of any failures, interruptions or security breaches of the Company's information systems could interrupt the Company's ability to conduct business, process transactions, damage the Company's reputation, result in a loss of customer business, expose customers' personal information to unauthorized parties, subject the Company to additional regulatory scrutiny, and expose the Company to civil litigation and possible financial liability, any of which could have a material adverse effect on the Company's financial condition and results of operations.

See the discussion under the heading "Opportunities and Risks" included in the section entitled "Overview", which is contained in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations", for further information regarding the Company's information security and technology practices.

The Company Relies on Independent Service Providers

The Company relies on independent firms to provide key services necessary to conducting its business. These services include, but are not limited to: electronic funds delivery networks; check clearing houses; electronic banking services; investment advisory, management and custodial services; correspondent banking services; information security assessments; and loan underwriting and review services. The occurrence of any failures, interruptions or security breaches of the independent firms' systems or in their delivery of services, could result in a loss of customer business, expose customers' personal information to unauthorized parties, damage the Company's reputation and expose the Company to civil litigation and possible financial liability, any of which could have a material adverse effect on the Company's financial condition and results of operations.

The Company's Controls and Procedures May Fail or Be Circumvented

Management regularly reviews and updates the Company's internal controls over financial reporting, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of the Company's controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on the Company's business, results of operations and financial condition.

The Company May Not be Able to Attract and Retain Key Personnel

The Company's success depends, in large part, on its ability to attract and retain key personnel. Competition for the best people in most activities engaged in by the Company can be intense and the Company may not be able to hire or retain the key personnel that it depends upon for success. The unexpected loss of services of one or more of the Company's key personnel could have a material adverse impact on the Company's business because of their skills, knowledge of the Company's market, years of industry experience and the difficulty of promptly finding qualified replacement personnel.

Slower than Expected Growth in New Branches and New Products and Services Could Adversely Affect the Company's Profitability

The Company has placed a strategic emphasis on expanding the Bank's branch network and products and service offerings. Executing this strategy carries risks of slower than anticipated growth both in new branches and new products and services. New branches and new products and services require a significant investment of both financial and personnel resources. Lower than expected loan and deposit growth in new branches and/or lower than expected fee or other income from new products and services could decrease anticipated revenues and net income generated by such investments. In addition, new branches require the approval of various regulatory agencies, which may or may not approve the Company's application for a branch. Opening new branches and introducing new products and services could also divert resources from current core operations and thereby further adversely affect the Company's growth and profitability.

Table of Contents

Growth Strategies Involving Acquisitions Could Adversely Affect the Company's Profitability

The Company may in the future explore growth opportunities through acquisition of other banks, financial services companies or lines of business. Any future acquisition could adversely affect the Company's profitability based on management's ability to successfully complete the acquisition and integration of the acquired business.

The Trading Volume in the Company's Common Stock is Less Than That of Larger Companies

Although the Company's common stock is listed for trading on the NASDAQ Global Market, the trading volume in the Company's common stock is substantially less than that of larger companies. Given the lower trading volume of the Company's common stock, significant purchases or sales of the Company's common stock, or the expectation of such purchases or sales, could cause significant swings up or down in the Company's stock price.

The Market Price of the Company's Common Stock May be Affected by General Industry Issues

The banking industry may be more affected than other industries by certain economic, credit, regulatory or information security issues. Although the Company itself may or may not be directly impacted by such issues, the Company's stock price may swing up or down due to the influence, both real and perceived, of these issues among others on the banking industry in general.

The Carrying Value of the Company's Goodwill May Become Impaired

In accordance with generally accepted accounting principles, the Company does not amortize goodwill and instead, at least annually, evaluates whether the carrying value of goodwill has become impaired. Impairment of the goodwill may occur when the estimated fair value of the Company is less than its recorded book value (i.e., the net book value of its recorded assets and liabilities). A determination that goodwill has become impaired results in immediate write-down of goodwill to its determined value with a resulting charge to operations. If the estimated fair value of the Company declines due to changes in the assumptions and input used in management's estimate of the fair value, the carrying value of the Company's goodwill may become impaired. Any write down of goodwill will result in a decrease in net income and, depending upon the magnitude of the charge, could have a material adverse effect on the Company's financial condition and results of operations.

See the discussions contained in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations", under the heading "Impairment Review of Goodwill and Other Intangible Assets", which is contained in the "Critical Accounting Estimates" section, for further information regarding the process by which the Company determines whether an impairment of goodwill has occurred.

Shareholder Dilution May Occur if Additional Stock is Issued in the Future

If the Company's Board of Directors should determine in the future that there is a need to obtain additional capital through the issuance of additional shares of the Company's common stock or securities convertible into shares of common stock, such issuances could result in dilution to existing shareholders' ownership interest. Similarly, if the Board of Directors decides to grant additional restricted stock shares or options for the purchase of shares of common stock, the issuance of such additional restricted stock shares and/or the issuance of additional shares upon the exercise of such options may expose shareholders to dilution.

The Company's Articles Of Organization, By-Laws and Shareholders Rights Plan as Well as Certain Banking and Corporate Laws May Have an Anti-Takeover Effect

Provisions of the Company's articles of organization and by-laws, its shareholders rights plan and certain federal and state banking laws and state corporate laws, including regulatory approval requirements for any acquisition of control of the Company, could make it more difficult for a third party to acquire the Company, even if doing so would be perceived to be beneficial to the Company's shareholders. The combination of these provisions effectively inhibits a non-negotiated merger or other business combination involving an acquisition of the Company, which, in turn, could adversely affect the market price of the Company's common stock.

Table of Contents

Directors and Executive Officers Own a Significant Portion of Common Stock

The Company's directors and executive officers as a group beneficially own approximately 29% of the Company's outstanding common stock as of December 31, 2008. As a result of this combined ownership interest, the directors and executive officers have the ability, if they vote their shares in a like manner, to significantly influence the outcome of all matters submitted to shareholders for approval, including the election of directors.

The Company Relies on Dividends from the Bank for Substantially All of its Revenue

The Company is a separate and distinct legal entity from the Bank. It receives substantially all of its revenue from dividends paid by the Bank. These dividends are the principal source of funds used to pay dividends on the Company's common stock and interest and principal on the Company's subordinated debt. Various federal and state laws and regulations limit the amount of dividends that the Bank may pay to the Company. If the Bank is unable to pay dividends to the Company, then the Company will be unable to service debt, pay obligations or pay dividends on the Company's common stock. The Bank's inability to pay dividends could have a material adverse effect on the Company's business, financial condition and results of operations.

Additional Factors Described Elsewhere in This Report

In addition to the factors listed above in this section, additional important factors that could adversely affect the results of the Company's future operations are described below under the heading "Special Note Regarding Forward-Looking Statements" contained in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The Company conducts its business from its main office and operational support and lending offices in Lowell, Massachusetts. The Company currently has sixteen full service branch banking offices serving the Merrimack Valley and North Central regions of Massachusetts and South Central New Hampshire, with an additional location in the permitting phase. The Company is obligated under various non-cancelable operating leases, most of which provide for periodic adjustments. Several leases provide the Company the right of first refusal should the property be

offered for sale. The Company believes that all its facilities are well maintained and suitable for the purpose for which they are used.

Table of Contents

The following table sets forth general information related to facilities owned or used by the Company as of December 31, 2008. All locations are in Massachusetts unless otherwise noted.

Derry, NH	
47 Crystal Avenue(5)	Leased

(1) This branch opened for business in January 2009

(2) The Company has the option to purchase this facility at any time during any extended term at the price of \$550 thousand as adjusted for increases in the producer's price index. The Company's last five-year extended-term option ends in September 2020.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

- (3) The Company purchased these facilities, which had formerly been leased, in September 2007.

- (4) The Company plans to relocate its current Salem, NH office to this new location by Summer of 2009.

- (5) This location is under lease and has been approved by the Town of Derry; the approval has been appealed by a competitor. Subject to a favorable resolution, the Company expects to open the branch in late 2009 or early 2010.

See note 4, Premises and Equipment and note 12, Related Party Transactions to the consolidated financial statements in Item 8 below, for further information regarding the Company's lease obligations listed above.

Table of Contents**Item 3.** Legal Proceedings

The Company is involved in various legal proceedings incidental to its business. Management does not believe resolution of any present litigation will have a material adverse effect on the financial condition of the Company.

Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of security holders during the quarter ended December 31, 2008.

PART II**Item 5.** Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**Market for Common Stock**

The Company's shares trade on the NASDAQ Global Market under the trading symbol EBTC.

The following table sets forth sales volume and price information, to the best of management's knowledge, for the common stock of the Company for the periods indicated.

Fiscal Year	Trading Volume	Share Price High	Share Price Low
2008:			
4th Quarter	215,940	\$ 12.88	\$ 9.50
3rd Quarter	138,779	13.25	10.50
2nd Quarter	47,629	14.00	11.42
1st Quarter	141,956	14.05	12.45
2007:			
4th Quarter	72,061	\$ 14.89	\$ 12.00
3rd Quarter	82,731	16.00	12.42
2nd Quarter	142,138	16.39	15.06
1st Quarter	115,074	16.84	15.17

As of March 4, 2009, there were 717 registered shareholders of the Company's common stock and 8,068,581 shares of the Company's common stock outstanding.

Dividends

As the principal asset of the Company, the Bank currently provides the only source of cash for the payment of dividends by the Company. Under Massachusetts law, trust companies such as the Bank may pay dividends only out of net profits and only to the extent that such payments will not impair the Bank's capital stock. Any dividend payment that would exceed the total of the Bank's net profits for the current year plus its retained net profits of the preceding two years would require the Commissioner's approval. FDICIA also prohibits a bank from paying any dividends on its capital stock if the Bank is in default on the payment of any assessment to the FDIC or if the payment of dividends would otherwise cause the Bank to become undercapitalized. These restrictions on the ability of the Bank to pay dividends to the Company may restrict the ability of the Company to pay dividends to the holders of its common stock.

The statutory term net profits essentially equates with the accounting term net income and is defined under the Massachusetts banking statutes to mean the remainder of all earnings from current operations plus actual recoveries on loans and investments and other assets after deducting from such total all current operating expenses, actual losses, accrued dividends on any preferred stock and all federal and state taxes.

In 2008, quarterly dividends of \$0.09 per share were paid in March, June, September and December. Total 2008 dividends of \$0.36 per share represented an increase of 12.5% compared to total dividends of \$0.32 also paid on a quarterly basis in 2007.

Table of Contents

The Company maintains a dividend reinvestment plan (the "DRP"). The DRP enables stockholders, at their discretion, to elect to reinvest dividends paid on their shares of the Company's common stock by purchasing additional shares of common stock from the Company at a purchase price equal to fair market value. Shareholders utilized the DRP to reinvest \$1.0 million, of the \$2.9 million dividends paid by the Company in 2008, into 85,586 shares of the Company's common stock.

On January 28, 2009, the Company announced a quarterly dividend of \$0.095 per share, paid on March 2, 2009 to shareholders of record as of February 9, 2009. On an annualized basis, this quarterly dividend represents a 5.6% increase over the 2008 dividend rate.

Securities Authorized for Issuance under Equity Compensation Plans

The following table provides information as of December 31, 2008 with respect to the Company's Amended and Restated 1998 Stock Incentive Plan and 2003 Stock Incentive Plan, as amended, which together constitute all of the Company's existing equity compensation plans that have been previously approved by the Company's stockholders. The Company does not have any existing equity compensation plans, including any existing individual equity compensation arrangements, which have not been previously approved by the Company's stockholders.

Plan Category	Number of Securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of Securities remaining available for future issuance under equity compensation plans (excluding securities reflected in second column from left)
Equity compensation plans approved by security holders	771,331 \$	13.83	196,631
Equity compensation plans not approved by security holders			
TOTAL	771,331 \$	13.83	196,631

Table of Contents**Performance Graph**

The following graph compares the cumulative total return (which assumes the reinvestment of all dividends) on the Company's common stock with the cumulative total return reflected by a broad based equity market index and an appropriate published industry index. This graph shows the changes over the five-year period ended on December 31, 2008 in the value of \$100 invested in (i) the Company's common stock, (ii) the Standard & Poors 500 Index and (iii) the NASDAQ Bank Index. Prior to February 14, 2005 (when the Company's shares began trading on the NASDAQ National Market, now NASDAQ Global Market), there was no active trading market for the Company's common stock, although shares were traded periodically on a privately negotiated basis. For each year prior to 2005 shown on the graph, the increase in the value of the Company's common stock is based on the actual prices known to the Company at which shares of the common stock were traded as of the most recent date prior to December 31 of each of these earlier periods. For purposes of the graph, the reinvestment of dividends paid prior to 2005 is based upon the annual valuation analysis of the Company's common stock that was formerly undertaken in the years prior to the Company's listing on the NASDAQ National Market pursuant to the Company's administration of its dividend reinvestment plan.

	2003	2004	2005	2006	2007	2008
Enterprise Bancorp	100	122.81	123.26	129.83	104.18	95.88
S&P 500	100	110.88	116.32	134.69	142.09	89.52
NASDAQ Bank	100	113.67	111.47	126.88	101.62	79.73

Sales of Unregistered Securities and Repurchases of Shares

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The Company has not sold any equity securities that were not registered under the Securities Exchange Act of 1934 during the year ended December 31, 2008. Neither the Company nor any affiliated purchaser (as defined in the SEC's Rule 10b-18(a)(3)) has repurchased any of the Company's outstanding shares, nor caused any such shares to be repurchased on its behalf, during the fiscal quarter ended December 31, 2008.

On June 30, 2006, the Company issued 3,842,015 shares in a two-for-one stock split paid in the form of a stock dividend. All share and per share amounts have been retroactively adjusted to reflect the stock dividend for all periods presented.

Table of Contents

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's discussion and analysis should be read in conjunction with the Company's consolidated financial statements and notes thereto, contained in Item 8, the information contained in the description of the Company's business in Item 1 and other financial and statistical information contained in this annual report.

Special Note Regarding Forward-Looking Statements

This report contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements concerning plans, objectives, future events or performance and assumptions and other statements that are other than statements of historical fact. Forward-looking statements may be identified by reference to a future period or periods or by use of forward-looking terminology such as anticipates, believes, expects, intends, may, plans, pursue, views and similar terms or expressions. Various statements contained in Item 1 Business, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 7A

Quantitative and Qualitative Disclosures About Market Risk, including, but not limited to, statements related to management's views on the banking environment and the economy, competition and market expansion opportunities, the interest rate environment, credit risk and the level of future non-performing assets and charge-offs, potential asset and deposit growth, future non-interest expenditures and non-interest income growth, and borrowing capacity are forward-looking statements. The Company wishes to caution readers that such forward-looking statements reflect numerous assumptions and involve a number of risks and uncertainties that may adversely affect the Company's future results. The following important factors, among others, could cause the Company's results for subsequent periods to differ materially from those expressed in any forward-looking statement made herein: (i) changes in interest rates could negatively impact net interest income; (ii) changes in the business cycle and downturns in the local, regional or national economies, including deterioration in the local real estate market, could negatively impact credit and/or asset quality and result in credit losses and increases in the Company's reserve for loan losses; (iii) changes in consumer spending could negatively impact the Company's credit quality and financial results; (iv) increasing competition from larger regional and out-of-state banking organizations as well as non-bank providers of various financial services could adversely affect the Company's competitive position within its market area and reduce demand for the Company's products and services; (v) deterioration of securities markets could adversely affect the value or credit quality of the Company's assets and the availability of funding sources necessary to meet the Company's liquidity needs; (vi) changes in technology could adversely impact the Company's operations and increase technology-related expenditures; (vii) increases in employee compensation and benefit expenses could adversely affect the Company's financial results; (viii) changes in laws and regulations that apply to the Company's business and operations could increase the Company's regulatory compliance costs and adversely affect the Company's business environment, operations and financial results; (ix) changes in accounting standards, policies and practices, as may be adopted or established by the regulatory agencies, the Financial Accounting Standards Board or the Public Company Accounting Oversight Board could negatively impact the Company's financial results; and (x) some or all of the risks and uncertainties described above in Item 1A could be realized, which could have a material adverse effect on the Company's business, financial condition and results of operation. Therefore, the Company cautions readers not to place undue reliance on any such forward-looking information and statements.

Critical Accounting Estimates

The Company's significant accounting policies are described in note 1, Summary of Significant Accounting Policies, to the consolidated financial statements contained in Item 8. In applying these accounting policies, management is required to exercise judgment in determining many of the methodologies, assumptions and estimates to be utilized. Certain of the critical accounting estimates are more dependent on such judgment and in some cases may contribute to volatility in the Company's reported financial performance should the assumptions and estimates used change over time due to changes in circumstances. The three most significant areas in which management applies critical assumptions and estimates include the areas described further below.

Table of Contents

Allowance for Loan Losses

The allowance for loan losses is an estimate of credit losses inherent in the loan portfolio. The Company's allowance is accounted for in accordance with SFAS No. 114, as amended by SFAS No. 118, "Accounting by Creditors for Impairment of a Loan-Income Recognition and Disclosures", and SFAS No. 5, "Accounting for Contingencies". The allowance for loan losses is established through a provision for loan losses, a direct charge to earnings. Loan losses are charged against the allowance when management believes that the collectability of the loan principal is unlikely. Recoveries on loans previously charged off are credited to the allowance. The Company maintains the allowance at a level that it deems adequate to absorb all reasonably probable losses from specifically known and other credit risks associated with the portfolio. Arriving at an appropriate level of allowance for loan losses involves a high degree of management judgment.

The Company uses a systematic process to measure the amount of estimated loan loss exposure inherent in the portfolio for purposes of establishing a sufficient allowance for loan losses. The methodology makes use of specific reserves for loans individually evaluated and deemed impaired and general reserves for larger groups of homogeneous loans which rely on a combination of qualitative and quantitative factors that could have an impact on the credit quality of the portfolio.

Management believes that the allowance for loan losses is adequate to absorb reasonably probable losses from specifically known and other credit risks associated with the loan portfolio as of the balance sheet dates. While management uses available information to recognize losses on loans, future additions to the allowance may be necessary. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to recognize additions to the allowance based on judgments different from those of management.

Management's assessment of the adequacy of the allowance for loan losses is contained under the headings "Credit Risk/Asset Quality" and "Allowance for Loan Losses", which are contained in the "Financial Condition" section of this Item 7.

Impairment Review of Investment Securities

There are inherent risks associated with the Company's investment activities which could adversely impact the fair market value and the ultimate collectability of the Company's investments. The determination of other-than-temporary impairment involves a high degree of subjectivity and requires management to make significant estimates of current market risks and future trends. Management's assessment includes: evaluating the level and duration of the loss on individual securities; evaluating the credit quality of fixed income issuers; determining if any individual equity security or mutual or other fund exhibits fundamental deterioration; and estimating whether it is unlikely that the individual security or fund will completely recover its unrealized loss within a reasonable period of time, or in the case of fixed income securities prior to maturity. While management uses available information to measure other-than-temporary impairment at the balance sheet date, future write-downs may be necessary based on extended duration of current unrealized losses, changing market conditions, or circumstances surrounding individual issuers and funds.

Should an investment be deemed other than temporarily impaired, the Company is required to write-down the carrying value of the investment through a charge to earnings. Once written-down a security may not be written-up to reflect future increases in market prices. Such write-down(s) may have a material adverse effect on the Company's financial condition and results of operations.

Based on these impairment reviews, at December 31, 2008, management booked a \$3.7 million OTTI charge on certain equity securities in the investment portfolio. Management determined that the remaining unrealized losses in the Company's investment portfolio were not other than temporary in nature at December 31, 2008.

Management's assessment of impairment of the unrealized losses in the investment portfolio is contained under the heading "Investment Securities", which is contained in the "Financial Condition" section of this Item 7.

Impairment Review of Goodwill and Other Intangible Assets

In accordance with generally accepted accounting principles, the Company does not amortize goodwill and instead, at least annually, evaluates whether the carrying value of goodwill

Table of Contents

has become impaired. Impairment of the goodwill may occur when the estimated fair value of the Company is less than its recorded book value. A determination that goodwill has become impaired results in immediate write-down of goodwill to its determined value with a resulting charge to operations.

The annual impairment test is a two-step process used to identify potential goodwill impairment and measure the amount of goodwill impairment loss to be recognized, if any. The assessment is performed at the operating unit level. In the case of the Company, the services offered through the Bank and subsidiaries are managed as one strategic unit and represent the Company's only reportable operating segment. The first step of the goodwill impairment test, used to identify potential impairment, compares the estimated fair value of the reporting unit with its carrying amount, or the book value of the reporting unit, including goodwill. If the estimated fair value of the reporting unit equals or exceeds its book value, goodwill is considered not impaired, and the second step of the impairment test is unnecessary. Management's assessment of the fair value of the Company takes into consideration the Company's market capitalization, stock trading volume, price-multiples valuations of comparable companies and control premiums in transactions involving comparable companies. The value of a control premium to use in the marketplace will depend on a number of factors including the target bank stock's liquidity, where the stock is currently trading, the perceived attractiveness of the entity and economic conditions. Management evaluates each of these factors as they relate to the Company and subjectively determines a comparable assumed control premium.

The second step, if necessary, measures the amount of goodwill impairment loss to be recognized. The reporting unit must determine fair values for all assets and liabilities, excluding goodwill. The net of the assigned fair value of assets and liabilities is then compared to the book value of the reporting unit, and any excess book value becomes the implied fair value of goodwill. If the carrying amount of the goodwill exceeds the newly calculated implied fair value of that goodwill, an impairment loss is recognized in the amount required to write down the goodwill to the implied fair value.

The Company's consolidated financial statements also include intangible assets (core deposit intangibles), which are amortized to expense over their estimated useful life of ten years and reviewed for impairment on an ongoing basis or whenever events or changes in business circumstances warrant a review of the carrying value. If impairment is determined to exist, the related write-down of the intangible asset's carrying value is charged to operations.

Based on these impairment reviews management determined that the Company's goodwill and core deposit intangible assets were not impaired at December 31, 2008.

Overview

Summary

The Company had net income of \$5.5 million, or \$0.69 on a diluted earnings per share basis, for the year ended December 31, 2008, compared to \$9.9 million, or \$1.25, respectively, for the year ended December 31, 2007. Net income for the three months ended December 31, 2008, was \$29 thousand, or \$0.00 on a diluted earnings per share basis, compared to \$2.7 million, or \$0.34, respectively for the same period in 2007.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The decline in 2008 earnings from the prior periods included the impact of an OTTI charge on certain equity securities in the investment portfolio, which reflected declines in the equity markets, margin compression caused by market interest rate reductions, which began in September 2007 and continued through 2008, significant increases in expenses associated with accelerated expansion and growth initiatives, and an increase in FDIC insurance premiums incurred by all banking institutions. Expenses related to expansion and growth initiatives included the expenses incurred in opening two new branches, the additional loan loss provisions required by the loan growth, and increased marketing and advertising expenses. While these factors adversely affect earnings in the short-term, management believes that this is an opportune time to incur such expenses in order to invest in the Company's long-term growth.

Loan growth was strong in 2008 and particularly so during the fourth quarter. Loans increased by 14% in 2008. During the three months ended December 31, 2008, loans increased by \$40 million, a quarterly increase which amounts to an annualized growth rate of 18%. Loan quality remained strong, particularly in light of the challenging economic environment, with loan quality ratios remaining favorable.

Table of Contents

Composition of Earnings

The Company's earnings are largely dependent on its net interest income, which is the difference between interest earned on loans and investments and the cost of funding (primarily deposits and borrowings). Tax equivalent net interest income expressed as a percentage of average interest earning assets is referred to as net interest margin (margin).

For the year ended December 31, 2008, net interest income amounted to \$42.2 million, an increase of 4% compared to 2007. Net interest income for the quarter ended December 31, 2008 amounted to \$11.2 million, an increase of 9% compared to the December 2007 quarter. The increases in net interest income over the comparable prior-year periods were due primarily to strong loan growth, which was partially offset by margin compression as described further below. Average loan growth for the year-over-year and quarter-over-quarter periods amounted to \$86.8 million and \$100.2 million, respectively.

The Company's year-to-date net interest margin decreased as a result of asset yields repricing downward, due to the market-rate reductions that have occurred since late 2007 as the Federal Reserve Board's target rates have declined 500 basis points, including 175 basis points during the December quarter. However, the Company's strong loan growth throughout the year, along with reductions in funding costs, partially offset the reduction in asset yields. Due to tight credit markets and a highly-competitive marketplace for funding during the year, deposit costs declined at a slower pace than asset yields. However, the decline in wholesale funding costs accelerated during the second half of the year, primarily as a result of reductions in FHLB short-term funding rates. Net interest margin was 4.23% for the year ended December 31, 2008, compared to 4.48% for the year ended December 31, 2007. Quarterly net interest margin was 4.24% for the three months ended December 31, 2008, compared to 4.27% and 4.36% for the quarters ended September 30, 2008 and December 31, 2007, respectively.

The provision for loan losses amounted to \$2.5 million for the year compared to \$1.0 million in 2007. The increase over the prior year was due primarily to loan growth and an increase in net charge-offs. Total loans increased \$114.8 million, or 14%, since December 31, 2007. For the year ended December 31, 2008, the Company recorded net charge-offs of \$781 thousand, compared to net charge-offs of \$395 thousand for the year ended December 31, 2007. In light of the current economic environment overall asset quality remains strong, with net charge-offs for the year amounting to 0.09% of average total loans, and non-performing assets to total assets of 0.73% at December 31, 2008, compared to 0.05% and 0.39%, respectively, in 2007. The allowance for loan losses to total loans ratio was 1.61% at December 31, 2008, compared to 1.62% at December 31, 2007.

Non-interest income for the year ended December 31, 2008, amounted to \$6.1 million compared to \$10.1 million in the prior year. The decrease was due primarily to the \$3.7 million OTTI charge on certain equity investments and a reduction in net security gains, which were \$305 thousand for the year-ended December 31, 2008, compared to \$1.7 million for the year-ended December 31, 2007. In the fourth quarter of 2008, the Company recorded the OTTI charge on certain equity securities contained in its investment portfolio to reflect the impact of fourth quarter declines in the equity markets. This net income charge (\$2.4 million after-taxes) had no impact on the Company's capital, as the unrealized fair market value losses were already reflected in capital. Excluding the OTTI charge and the securities gains in both 2007 and 2008, non-interest income in 2008 increased \$1.0 million, or 12%, over the prior year, due primarily to an increase in deposit service fee income.

Non-interest expense for the year ended December 31, 2008, amounted to \$37.9 million, an increase of 9%, compared to \$34.8 million for the year ended December 31, 2007. The increase in non-interest expense was related primarily to the Company's strategic growth initiatives resulting in increases in the areas of compensation-related costs, advertising, and training expenses. In addition, in 2008 the Company's deposit insurance premiums increased due to changes in the FDIC insurance assessment rates, related to 2005 legislation which applied to all insured banks.

In 2008, the Company benefited from a decrease in its effective income tax rate; however, in the third quarter income taxes were impacted by approximately \$130 thousand in tax expense related to legislative changes in future tax rates applicable to Massachusetts financial institutions.

Table of Contents

Sources and Uses of Funds

The Company's primary sources of funds are deposits, brokered CD's, FHLB borrowings, repurchase agreements, current earnings and proceeds from the sales, maturities and paydowns on loans and investment securities. The Company uses funds to originate loans, purchase investment securities, conduct operations, expand the branch network, and pay dividends to shareholders.

Total assets amounted to \$1.18 billion at December 31, 2008, an increase of 12% since December 31, 2007. The Company's core asset strategy is to grow loans, primarily commercial loans.

Total loans increased 14% since December 31, 2007 and amounted to \$948.6 million, or 80% of total assets. Commercial loans increased 13% over the prior year and amounted to \$802.5 million, or 85% of the total loan portfolio at December 31, 2008. Management closely monitors the credit quality of individual delinquent and non-performing credit relationships, portfolio mix and industry concentrations, the local and regional real estate markets and current economic conditions. Although non-performing statistics have increased from 2007, as would be expected during the current economic decline, management does not consider the increase to be indicative of significant deterioration in the overall credit quality of the general loan portfolio at December 31, 2008.

The investment portfolio is the other key component of the Company's earning assets and is primarily used to invest excess funds, provide liquidity and to manage the Company's asset-liability position. The fair value of total investments amounted to \$159.4 million at December 31, 2008, or 14% of total assets. The carrying value of the portfolio has increased 10% since December 31, 2007 due primarily to purchases of US agency backed CMO/MBS and municipal securities, offset by sales, principal paydowns and maturities during the period. As noted above, in December 2008 the Company booked a \$3.7 million OTTI charge on certain equity investments in the investment portfolio which reflected the fourth quarter downturn in the stock market in general. Recognizing the impairment has the benefit of enhancing management's discretion in managing the affected securities, which may include selling a portion of the investments in the first half of 2009. A sale of the securities would also ensure that, for tax purposes, a portion of the losses on sales could be applied against investment gains realized on the portfolio during the past two years, before the ability to carry back losses against these gains expires.

The Company does not purchase sub-prime mortgage backed securities and has never invested in the stock of Fannie Mae or Freddie Mac.

Management's preferred strategy for funding asset growth is to grow low cost deposits (comprised of demand deposit accounts, interest and business checking accounts and traditional savings accounts). Asset growth in excess of low cost deposits is typically funded through higher cost deposits (certificates of deposit, business money market accounts and investment savings products), brokered CD's, repurchase agreements, FHLB borrowings, and investment portfolio cash flow.

The current environment has continued to impact the Company's ability to generate growth in lower costing deposits, which remained relatively flat compared to December 31, 2007. However, year-end balances in higher cost deposits increased 19% compared to December 31, 2007. The increase is primarily attributed to customers seeking a safer, higher yielding alternative to the volatile equity markets and mutual funds. In addition the Company has continued to utilize brokered CD's and FHLB borrowings as alternative funding sources to support asset growth. As previously described, the Company has also recently added access to the FRB's discount window as an additional source of alternative funding.

At December 31, 2008, total deposits, excluding brokered CDs, amounted to \$872.5 million, representing \$74.4 million, or 9%, growth over December 31, 2007 balances. Total deposits, including brokered CDs, amounted to \$947.9 million at December 31, 2008, representing an increase of \$79.1 million, or 9% since December 31, 2007.

At December 31, 2008, the Company had \$75.4 million in brokered CDs and \$121.3 million in borrowed funds outstanding compared to \$70.7 million and \$81.4 million, respectively, at December 31, 2007.

Opportunities and Risks

Recent global economic events have had a severe impact on nationwide financial markets, the financial services industry and the national economy. The economic recession has lead

Table of Contents

to tightening of credit markets, contraction of lending for larger regional and national banks, asset write-downs and credit quality concerns across the financial industry. Although the current economic crisis has not impacted the New England region as severely as many regions of the country, any long-term continuation of these national trends, or possible subsequent effects, could further weaken the local economy and have a severe impact on the Company's financial condition, capital position, liquidity, and performance.

While the current economic environment presents significant challenges for all companies, management also believes that it creates opportunities for growth and expansion. The Company's disciplined and consistent lending and credit review practices, and the prudent investment strategies and strategic growth initiatives that have been in place since the Company was established twenty years ago, have served to provide quality asset growth over varying economic cycles. Management believes that the Company's strong capital position and high-quality balance sheet will enable it to expand its lending while larger regional and national banks tighten their underwriting standards. This has been demonstrated by the Company's strong loan growth, particularly by an 18% annualized loan growth in the fourth quarter of 2008. The Company has concentrated on community lending with traditional mortgages and commercial loans to local business, professionals, non-profit organizations and individuals. In addition, the Company continues to position itself to increase market share, with carefully planned expansion into neighboring markets through new branch development. The Company opened a Methuen, Massachusetts branch in May 2008, a new Acton, Massachusetts branch on January 12, 2009, and a second New Hampshire branch is scheduled to open in late 2009 or early 2010, in Derry. Management also undertook many significant initiatives in 2008, including investments in employee training, education and professional development, marketing and public relations, technology and facilities. While management recognizes that such investments will increase expenses in the short-term, before the long-term benefits are fully realized, the Company believes that the opportunities for long-term benefits, including growth and expansion and increased market share, have never been stronger than they are at the present time.

Notwithstanding the market opportunities that management believes the current economic environment has created, the Company's primary market area will continue to be marked by substantial competition from multiple sources, including the expanded commercial lending capabilities of credit unions, the shift to commercial lending by traditional savings banks, the continuing presence of large regional and national commercial banks, the products offered by non-bank financial services competitors and increased competition for investment advisory assets and deposit resources within the Company's market area. The Company will continue to face significant business risk in seeking to achieve its long-term growth objectives, which will continue to depend upon the Company's success in developing strong relationships with business and community leaders, and providing a superior customer experience through a full range of diversified financial products and services, delivered through consistent, responsive and personal service based on an understanding of the financial needs of customers.

Continued volatility in the financial markets, tightening of credit markets, and any possible subsequent effects of the current economic crisis, could have a negative impact on the value of the Company's investment portfolio as a whole, or on individual securities held, including restricted FHLB capital stock, which could possibly result in the recognition of additional OTTI charges in the future.

Any further changes in government regulation or oversight as a result of the financial crisis could affect the Company in substantial and unpredictable ways, including but, not limited to, subjecting the Company to additional operating and compliance costs and increasing the Company's deposit insurance premiums.

Management believes the Company's business model, strong service and technology cultures, experienced banking professionals, in-depth knowledge of our markets and trusted reputation within the community create opportunities for the Company to be the leading provider of banking and investment management services in its growing market area and that the Company is well positioned, both financially and strategically, to capitalize on opportunities created by the current challenging banking landscape.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

Additional significant challenges facing the Company continue to be the effective management of interest rate and credit risk, liquidity management and capital adequacy and operational risk.

The re-pricing frequency of interest earning assets and liabilities are not identical, and therefore subject the Company to the risk of adverse changes in interest rates. This is

Table of Contents

often referred to as interest rate risk and is reviewed in more detail under Item 7A, Quantitative and Qualitative Disclosures About Market Risk.

The risk of loss due to customers non-payment of loans or lines of credit is called credit risk. Credit risk management is reviewed below in this Item 7 under the headings Credit Risk/Asset Quality and Allowance for Loan Losses.

Liquidity management is the coordination of activities so that cash needs are anticipated and met, readily and efficiently. Liquidity management is reviewed under this Item 7 under the heading Liquidity.

Federal banking agencies require the Company and the Bank to meet minimum capital requirements. At December 31, 2008, the Company was categorized as well capitalized ; however future unanticipated charges against capital could impact that regulatory capital designation. For information regarding the capital requirements applicable to the Company and the Bank and their respective capital levels at December 31, 2008, see the section entitled Capital Resources contained in Item 1 Business and note 8, Stockholders Equity , to the consolidated financial statements contained in Item 8.

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people or systems, or from external events. Operational risk management is also a key component of the Company s risk management process, particularly as it relates to technology administration, information security, and business continuity.

Management utilizes a combination of third party security assessments, key technologies and ongoing internal evaluations in order to protect non-public customer information and continually monitor and safeguard information on its operating systems and those of third party service providers. The Company contracts with outside parties to perform a broad scope of both internal and external security assessments on the Company s systems on a regular basis. These third parties test the Company s network configuration and security controls, and assess internal practices aimed at protecting the Company s operating systems. In addition, the Company contracts with an outside service provider to monitor usage patterns and identify unusual activity on bank issued debit/ATM cards. The Company also utilizes firewall technology and a combination of software and third-party monitoring to detect intrusion, protect against unauthorized access and continuously scans for computer viruses on the Company s information systems.

The Company has a Business Continuity Plan that consists of the information and procedures required to enable rapid recovery from an occurrence that would disable the Company for an extended period. The plan establishes responsibility for assessing a disruption of business, contains alternative strategies for the continuance of critical business functions, assigns responsibility for restoring services, and sets priorities by which critical services will be restored.

In addition to the risks discussed above numerous other factors that could adversely affect the Company s future results of operations and financial condition are addressed in Item 1A, Risk Factors . This Opportunities and Risk discussion should be read in conjunction with Item 1A.

Financial Condition

Total assets increased \$122.8 million, or 12%, over the prior year, amounting to \$1.18 billion at December 31, 2008. The increase was primarily attributable to an increase in total loans.

Loans

Total loans increased \$114.8 million, or 14%, and amounted to 80% of total assets at December 31, 2008, compared with 79% of total assets, at December 31, 2007. The Company attributes the increase to its seasoned lending team, the Company's sales and service culture and geographic expansion. The mix of loans within the Company's portfolio remained relatively unchanged with commercial loans amounting to approximately 85% of gross loans, reflecting the Company's continued focus on commercial loan development.

The following table sets forth the loan balances by certain loan categories at the dates indicated and the percentage of each category to gross loans.

Table of Contents

The following table sets forth the scheduled maturities of commercial real estate, commercial & industrial and commercial construction loans in the Company's portfolio at December 31, 2008. The table also sets forth the dollar amount of loans which are scheduled to mature after one year which have fixed or adjustable rates.

(Dollars in thousands)	Commercial real estate	Commercial & industrial	Commercial construction
Amounts due:			
One year or less	\$ 35,064	\$ 112,436	\$ 75,030
After one year through five years	20,723	60,040	10,770
Beyond five years	416,492	59,339	12,565
	\$ 472,279	\$ 231,815	\$ 98,365
Interest rate terms on amounts due after one year:			
Fixed	\$ 24,300	\$ 51,795	\$ 6,317
Adjustable	\$ 412,915	\$ 67,584	\$ 17,018

Scheduled contractual maturities may not reflect the actual maturities of loans. The average maturity of loans may be shorter than their contractual terms principally due to prepayments.

During 2008, commercial real estate loans increased \$65.9 million, or 16%. Commercial real estate loans are typically secured by apartment buildings, office or mixed-use facilities, strip shopping malls or other commercial or industrial property.

Commercial and industrial loans increased by \$42.9 million, or 23%, since December 31, 2007. These loans include seasonal revolving lines of credit, working capital loans, equipment financing (including equipment leases), and term loans. Also included in commercial and industrial loans are loans under various U.S. Small Business Administration programs.

Commercial construction loans decreased year over year, by \$14.3 million, or 13%. The decline is attributed to limited new construction projects by qualified builders, as a result of the general economic environment. Commercial construction loans include the development of residential housing and condominium projects, the development of commercial and industrial use property and loans for the purchase and improvement of raw land. At December 31, 2008, 13 commercial construction loans with outstanding balances of \$11.9 million carried reserves of \$604 thousand for the payment of future interest. These reserves may be funded by the borrower through proceeds from unit sales or through loan proceeds at origination. The Company closely monitors the impact of the interest reserve, the financial condition of the project and the borrower on the credit classification of the loan.

Residential real estate loans, residential construction and home equity mortgages combined, increased by \$18.4 million, or 15%, and consumer loans increased \$364 thousand or 8% since December 31, 2007.

At December 31, 2008, the Company had commercial loan balances participated out to various banks amounting to \$19.2 million, compared to \$6.8 million at December 31, 2007. These balances participated out to other institutions are not carried as assets on the Company's financial statements. Loans originated by other banks in which the Company is the participating institution are carried at the Company's prorata share of ownership and amounted to \$24.9 million and \$13.9 million at December 31, 2008 and 2007, respectively.

Credit Risk/Asset Quality

Inherent in the lending process is the risk of loss. The Company's primary lending focus is on the development of high quality commercial real estate, commercial construction and commercial and industrial lending relationships with business entities, non-profit organizations, professionals and individuals. However, commercial lending may entail significant additional risks compared to long term financing on existing owner occupied residential real estate. Commercial loan size is typically larger and the underlying collateral values, the actual cost necessary to complete a project or customer cash flow and payment expectations on such loans can be more easily influenced by adverse conditions in the related industries, the real estate market or in the economy in general. While the Company endeavors to minimize this risk through the risk management function, management recognizes that loan losses will occur and that the amount of these losses will fluctuate depending on the risk characteristics of the loan portfolio and economic conditions.

Table of Contents

The Company's credit risk management function focuses on a wide variety of factors, including, among others, current and expected economic conditions, the real estate market, the financial condition of borrowers, the ability of borrowers to adapt to changing conditions or circumstances affecting their business and the continuity of borrowers' management teams. Early detection of credit issues is critical to minimize credit losses. Accordingly, management regularly monitors these factors, among others, through ongoing credit reviews by the credit department, an external loan review service, reviews by members of senior management and the Loan Committee of the Board of Directors.

On a quarterly basis, the Company prepares an estimate of the necessary loan loss allowance. Except for loans specifically identified as impaired, the estimate is a two-tiered approach that allocates loan loss allowance to adversely classified loans by credit rating and to non-classified loans by credit type. The general loss allocations take into account the quantitative and qualitative factors identified above. The adequacy of the allowance for loan losses is reviewed and evaluated on a regular basis by an internal management committee, a sub-committee of the Board of Directors and the full Board itself.

The Company's loan risk rating system classifies loans depending on risk of loss characteristics. The classifications range from substantially risk free for the highest quality loans and loans that are secured by cash collateral, to the most severe classifications of substandard, doubtful and loss based on criteria established under banking regulations. Loans classified as substandard include those characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Loans classified as doubtful have all the weaknesses inherent in a substandard rated loan with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Loans classified as loss are generally considered uncollectible at present, although long term recovery of part or all of loan proceeds may be possible. These loss loans would require a specific loss reserve or charge-off. Adversely classified loans may be accruing or in non-accrual status and may be additionally designated as impaired or restructured, or some combination thereof.

Impaired loans are individually significant loans for which management considers it probable that not all amounts due in accordance with original contractual terms will be collected. The majority of impaired loans are included within the non-accrual balances; however, not every loan in non-accrual status has been designated as impaired. Management does not set any minimum delay of payments as a factor in reviewing for impaired classification. Management considers the payment status, net worth and earnings potential of the borrower, and the value and cash flow of the collateral as factors to determine if a loan will be paid in accordance with its contractual terms. When a loan is deemed to be impaired, management estimates the credit loss by comparing the loan's carrying value against either 1) the present value of the expected future cash flows discounted at the loan's effective interest rate; 2) the loan's observable market price; or 3) the expected realizable fair value of the collateral, in the case of collateral dependent loans. A specific allowance is assigned to the impaired loan for the amount of estimated credit loss. Impaired loans are charged off, in whole or in part, when management believes that the recorded investment in the loan is uncollectible.

Impaired loans exclude large groups of smaller-balance homogeneous loans, such as residential mortgage loans and consumer loans, which are collectively evaluated for impairment, loans that are measured at fair value and leases as defined in SFAS No. 114.

Loans on which the accrual of interest has been discontinued are designated as non-accrual loans. Accrual of interest on loans is generally discontinued when a loan becomes contractually past due, with respect to interest or principal, by ninety days for real estate loans and generally sixty to ninety days for all other loans, or when reasonable doubt exists as to the full and timely collection of interest or principal. When a loan is placed on non-accrual status, all interest previously accrued but not collected is reversed against current period interest income. Interest accruals are resumed on such loans only when payments are brought current and have remained current for a period of ninety days or when, in the judgment of management, the collectability of both principal and interest is reasonably assured. Interest payments received on loans in a non-accrual status are generally applied to principal.

Loans are designated as restructured when a concession is made on a credit as a result of financial difficulties of the borrower. Typically, such concessions consist of a reduction in interest rate to a below market rate, taking into account the credit quality of the note, or a deferment of payments, principal or interest, which materially alters

Table of Contents

the Bank's position or significantly extends the note's maturity date, such that the present value of cash flows to be received is materially less than those contractually established at the loan's origination. Restructured loans are included in the impaired loan category.

Real estate acquired by the Company through foreclosure proceedings or the acceptance of a deed in lieu of foreclosure is classified as Other Real Estate Owned (OREO). When property is acquired, it is recorded at the lesser of the loan's remaining principal balance or the estimated fair value of the property acquired, less estimated costs to sell. Any loan balance in excess of the estimated realizable fair value on the date of transfer is charged to the allowance for loan losses on that date. All costs incurred thereafter in maintaining the property, as well as subsequent declines in fair value are charged to non-interest expense.

Non-performing assets are comprised of non-accrual loans, deposit account overdrafts that are more than 90 days past due and OREO. The designation of a loan or other asset as non-performing does not necessarily indicate that loan principal and interest will ultimately be uncollectible. However, management recognizes the greater risk characteristics of these assets and therefore considers the potential risk of loss on assets included in this category in evaluating the adequacy of the allowance for loan losses. Despite prudent loan underwriting, adverse changes within the Bank's market area, or deterioration in local, regional or national economic conditions, could negatively impact the Company's level of non-performing assets in the future.

The following table sets forth information regarding non-performing assets, restructured loans and delinquent loans 60-89 days past due as to interest or principal, held by the Company at the dates indicated:

(Dollars in thousands)	2008	2007	December 31, 2006	2005	2004
Non-accrual loans	\$ 8,011	\$ 3,956	\$ 1,785	\$ 1,475	\$ 2,140
Overdrafts > 90 days past due	256		7	1	
Total non-performing loans	8,267	3,956	1,792	1,476	2,140
Other real estate owned	318	200			
Total non-performing assets	\$ 8,585	\$ 4,156	\$ 1,792	\$ 1,476	\$ 2,140
Total Loans	\$ 948,641	\$ 833,819	\$ 761,113	\$ 699,726	\$ 570,459
Accruing restructured loans not included above	\$ 3,697	\$ 76	\$ 128	\$ 82	\$ 26
Delinquent loans 60-89 days past due	\$ 2,689	\$ 275	\$ 964	\$ 59	\$ 404
Non-performing loans to total loans	0.87%	0.47%	0.24%	0.21%	0.38%
Non-performing assets to total assets	0.73%	0.39%	0.18%	0.16%	0.25%
Loans 60-89 days past due to total loans	0.28%	0.03%	0.13%	0.01%	0.07%
Adversely Classified loans to total loans	1.46%	0.76%	0.88%	0.77%	1.55%

In general, non-performing statistics trended upward in 2007 and 2008, as would be expected during the current economic decline. However, the amount of non-performing assets from 2004 through 2006 represented historically low levels. As such, management does not consider the increase in 2007 and into 2008 to be indicative of significant deterioration in the overall credit quality of the general loan portfolio at December 31, 2008. Overall asset quality remained favorable during the period as indicated by the following factors: the reasonable ratio of non-performing loans given the size and mix of the Company's loan portfolio; the minimal level of OREO; the low levels of loans 60-89 days delinquent; and management's assessment that the majority of non-performing loans are adequately collateralized at December 31, 2008.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The \$4.3 million net increase in total non-performing loans, and the resulting increase in the ratio of non-performing loans as a percentage of total loans outstanding, was primarily due to net additions within the commercial real estate (\$1.5 million), commercial construction (\$1.0 million) and commercial and industrial portfolios (\$589 thousand). In addition, one overdraft deposit account of \$256 thousand outstanding at December 31, 2008, was subsequently funded in January 2009. In the opinion of management the majority of the non-performing loans were adequately supported by expected future cash

Table of Contents

flows or the value of the underlying collateral and management expects that these principal advances will ultimately be collected. Management closely monitors these relationships for collateral or credit deterioration.

At December 31, 2008, the Company had adversely classified loans (loans carrying substandard or doubtful classifications) amounting to \$13.9 million, compared to \$6.3 million at December 31, 2007. There were no loans classified as Loss at either December 31, 2008 or 2007. Included in the adversely classified balances were non-accrual loans amounting to \$7.4 million and \$3.6 million at December 31, 2008 and 2007, respectively. At December 31, 2008 and 2007, non-accrual loans which were not adversely classified amounted to \$584 thousand and \$400 thousand, respectively, and represented the guaranteed portions of non-performing Small Business Administration loans. The remaining balances of adversely classified loans were performing but possessed potential weaknesses and, as a result, could ultimately become non-performing loans.

Total impaired commercial loans amounted to \$10.4 million and \$4.1 million at December 31, 2008 and 2007, respectively. Included in these impaired balances were non-accrual loans amounting to \$6.7 million and \$3.9 million as of December 31, 2008 and 2007, respectively. Accruing impaired loans amounted to \$3.7 million and \$75 thousand at December 31, 2008 and 2007, respectively. In the opinion of management, at December 31, 2008, impaired loans totaling \$5.2 million required specific reserve allocations of \$478 thousand and impaired loans totaling \$5.2 million required no specific reserves. At December 31, 2007, \$200 thousand of impaired loans required \$195 thousand of specific reserve allocations.

Total restructured loans outstanding as of December 31, 2008 and 2007 were \$4.7 million and \$1.3 million, respectively. Restructured loans included in non-performing assets amounted to \$1.0 million and \$1.2 million at December 31, 2008 and 2007, respectively.

Four properties were transferred into OREO in 2008 as the result of foreclosure proceedings. One of the OREO properties was subsequently sold in November 2008. The carrying value of OREO at December 31, 2008 was \$318 thousand. There was one property carried in the Company's OREO portfolio at December 31, 2007; the carrying value of that property was recovered upon the sale of the property in February of 2008. Gains recognized on the sales of OREO amounted to \$27 thousand and \$0 for the years ended December 31, 2008 and 2007, respectively.

Allowance for Loan Losses

The allowance for loan losses is an estimate of credit risk inherent in the loan portfolio as of the balance sheet dates. In making its assessment on the adequacy of the allowance, management considers several quantitative and qualitative factors that could have an effect on the credit quality of the portfolio including individual assessment of larger and high risk credits, delinquency trends and the level of non-performing loans, net charge-offs, the growth and composition of the loan portfolio, expansion in geographic market area, the strength of the local and national economy, and comparison to industry peers, among other factors. There were no significant changes to the allowance assessment methodology, the Company's underwriting, or in credit quality during the past year.

The allowance for loan loss to total loans ratio was 1.61% at December 31, 2008 compared to 1.62% at December 31, 2007. The slight decrease in the allowance ratio reflects the continued overall strong asset quality, level of loan growth and the low level of charge-offs during the 2008 period.

Based on the foregoing, as well as management's judgment as to the existing credit risks inherent in the loan portfolio, the Company's allowance for loan losses is deemed adequate to absorb reasonably probable losses from specifically known and other credit risks associated with the portfolio as of December 31, 2008.

The allocation of the allowance for loan losses above reflects management's judgment of the relative risks of the various categories of the Company's loan portfolio. This allocation should not be considered an indication of the future amounts or types of possible loan charge-offs.

Short-Term Investments

As of December 31, 2008, short-term investments amounted to 0.3% of total assets, compared to 0.7% of total assets, at December 31, 2007. Short-term investments carried as cash equivalents at December 31, 2008 and 2007 consisted of overnight and term federal funds sold and money market mutual funds. The Company had no other short-term investments at December 31, 2008 or 2007.

Investment Securities

As of December 31, 2008, the carrying amount of the investment portfolio increased \$13.9 million, or 10%, compared to December 31, 2007. The increase was primarily due to purchases of agency CMO/MBS and municipal securities, offset by sales, calls, principal paydowns and maturities during the year. At December 31, 2008 and 2007, all investment securities (other than FHLB stock) were classified as available for sale and were carried at fair market value. During the fourth quarter of 2008, the Company recorded a \$3.7 million (pretax) impairment charge on certain equity investments in the investment portfolio. The other than temporary impairment (OTTI) charge reflected the fourth quarter

Table of Contents

downturn in the stock market in general. The cost basis of these investments has been adjusted to reflect the market value as of December 31, 2008. A prolonged downturn or any further declines in the stock market could result in an additional OTTI charge to earnings in the future.

The investment portfolio represented 14% of total assets at December 31, 2008 and 2007. Fixed income securities comprised the majority of the carrying value of the portfolio and represented 93% of total investments at both December 31, 2008 and 2007 respectively.

The following table summarizes the fair market value of investments at the dates indicated:

(Dollars in thousands)	2008	December 31, 2007	2006
Federal agency obligations(1)	\$	\$ 12,543	\$ 10,405
Federal agency collateralized mortgage obligations and Mortgage backed securities (CMO/MBS)(1)	82,936	57,156	55,450
Non-agency CMO/MBS	4,316	5,062	5,981
Municipal securities	61,386	60,049	48,762
Fixed income securities	148,638	134,810	120,598
Certificates of deposit			1,033
Federal Home Loan Bank stock	4,740	3,895	1,428
Equity securities	5,995	6,812	8,481
Total investments	\$ 159,373	\$ 145,517	\$ 131,540

(1) Investments guaranteed by government enterprises such as Fannie Mae, Freddie Mac, Ginnie Mae and the FHLB.

As a member of the FHLB, the Company is required to purchase FHLB capital stock in association with the Bank's outstanding advances from the FHLB; this stock is classified as a restricted investment and carried at cost. The FHLB is currently operating with retained earnings below its target level. The FHLB has instituted a plan to increase retained earnings which includes suspending its quarterly dividend and a moratorium on the repurchase of excess capital stock from member banks, among other programs. If further deterioration in the FHLB financial condition or capital levels occurs, the FHLB capital stock may become other than temporarily impaired to some degree and its carry value correspondingly reduced.

As of December 31, 2008, the net unrealized gains in the investment portfolio were \$1.7 million compared to the net unrealized gains of \$382 thousand at December 31, 2007. The unrealized gains at December 31, 2008 consisted of net unrealized gains on fixed income securities of \$1.9 million (comprised of \$2.7 million gains and \$796 thousand losses) and net unrealized losses on equity securities of \$180 thousand (comprised of \$21 thousand gains and \$201 thousand losses).

Unrealized gains or losses will only be recognized in the statements of income if the securities are sold. However, if an unrealized loss on a fixed income or equity security is deemed to be other than temporary, the Company marks the investment down to its carrying value through a charge

to earnings.

The net unrealized gain or loss in the Company's fixed income portfolio fluctuates as market interest rates rise and fall. Due to the fixed rate nature of this portfolio, as market rates fall the value of the portfolio rises, and as market rates rise, the value of the portfolio declines. The unrealized gains or loss on fixed income investments will also decline as the securities approach maturity. The decline in market value on the fixed income portfolio at December 31, 2008 was due to interest rate volatility and not credit quality, as all these securities were government agency guaranteed, AAA credit or investment grade rated. At December 31, 2008, management had the intent and ability to hold the fixed income securities in the portfolio with unrealized losses until the recovery of fair value, which may be upon maturity. Therefore, the remaining unrealized losses were not considered other than temporary in nature at December 31, 2008.

The net unrealized gain or loss on equity securities will fluctuate based on changes in the market value of the individual securities and mutual and other funds in the portfolio. Management regularly reviews the portfolio for securities with unrealized losses that are other than temporarily impaired. Management's assessment includes evaluating if any equity security or fund exhibits fundamental deterioration and whether it is unlikely that

Table of Contents

the security or fund will completely recover its unrealized loss within a reasonable time period. During the fourth quarter of 2008, the Company recorded a fair market value impairment charge, on certain mutual fund investments contained in its equity portfolio, to reflect the impact of recent declines in the equity markets. Management's decision to record this charge was based primarily on the severity of the declines in the stock market and the general economy and the uncertainty in determining the likelihood of recovery in the short-term for these equities. The pretax impairment charge of \$3.7 million represented a \$2.4 million after tax charge against earnings. There were no other securities at December 31, 2008 that were considered other than temporarily impaired.

During 2008 the Company recognized net gains on the sales of \$4.6 million of securities, amounting to \$305 thousand and a \$3.7 million impairment charge on certain equity investments. Principal paydowns, calls and maturities on fixed income securities totaled \$31.8 million during 2008. These proceeds along with additional funds were utilized to purchase \$52.5 million of securities during 2008.

The contractual maturity distribution at amortized cost, as of December 31, 2008, of the fixed income securities above with the weighted average yield for each category is set forth below:

(Dollars in thousands)	Under 1 Year		>1 - 3 Years		>3 - 5 Years		>5 - 10 Years		Over 10 Years	
	Balance	Yield	Balance	Yield	Balance	Yield	Balance	Yield	Balance	Yield
CMO/MBS	\$		\$		\$ 1,581	3.89%	\$ 33,355	4.16%	\$ 50,907	5.25%
Municipals(1)	7,023	4.63%	10,719	5.96%	6,927	6.42%	8,277	7.50%	27,978	6.81%
	\$ 7,023	4.63%	\$ 10,719	5.96%	\$ 8,508	5.95%	\$ 41,632	4.83%	\$ 78,885	5.80%

(1) Municipal security yields and total yields are shown on a tax equivalent basis.

Scheduled contractual maturities may not reflect the actual maturities of the investments. CMO/MBS are shown at their final maturity. However, due to prepayments and amortization the actual CMO/MBS cash flows may be faster than presented above. Similarly, included in the municipal categories were \$43.9 million in securities which can be called before maturity. Actual maturity of these callable securities could be shorter if market interest rates decline further. Management considers these factors when evaluating the net interest margin in the Company's asset-liability management program.

Table of Contents**Bank Owned Life Insurance (BOLI)**

The Company has purchased BOLI as an investment vehicle, utilizing the earnings on BOLI to offset the cost of the Company's benefit plans. There were no BOLI purchases in 2008 or 2007. The cash surrender value of BOLI was \$13.3 million and \$12.7 million at December 31, 2008 and 2007, respectively. The Company recorded income from the BOLI policies, net of related expenses, of \$554 thousand, \$548 thousand, and \$339 thousand for 2008, 2007 and 2006, respectively

Further information regarding the Company's retirement benefit plans is contained in note 10, "Employee Benefit Plans", to the consolidated financial statements contained in Item 8 below, under the heading "Supplemental Retirement Plan."

Deposits

Total deposits increased \$79.1 million, or 9%, as of December 31, 2008 compared to year end balances at December 31, 2007. Deposits, excluding brokered deposits, increased \$74.4 million, or 9%, compared to the prior year-end balance. The current interest rate environment has continued to impact the Company's ability to generate growth in lower costing deposits. However, non-brokered CD balances have increased and the Company has continued to utilize low-cost overnight FHLB borrowings as alternative funding sources to support asset growth. Total deposits as a percentage of total assets were 80% at December 31, 2008 compared to 82% at December 31, 2007.

The following table sets forth deposit balances by certain categories at the dates indicated and the percentage of each deposit category to total deposits.

(Dollars in thousands)	December 31, 2008		December 31, 2007		December 31, 2006	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
Non-interest demand deposits	\$ 166,430	17.5%	\$ 167,039	19.2%	\$ 169,910	19.6%
Interest bearing checking	158,005	16.7%	160,668	18.5%	179,533	20.7%
Total checking	324,435	34.2%	327,707	37.7%	349,443	40.3%
Retail savings/money markets	152,021	16.0%	145,959	16.8%	141,202	16.3%
Commercial savings/money markets	141,997	15.0%	120,768	13.9%	125,584	14.5%
Total savings/money markets	294,018	31.0%	266,727	30.7%	266,786	30.8%
Certificates of deposit	254,086	26.8%	203,657	23.5%	186,349	21.4%
Total non-brokered deposits	872,539	92.0%	798,091	91.9%	802,578	92.5%
Brokered certificates of deposit	75,364	8.0%	70,695	8.1%	64,944	7.5%
Total deposits	\$ 947,903	100%	\$ 868,786	100.0%	\$ 867,522	100.0%

Checking deposits, a strong source of low-cost funding for the Company, remained relatively stable, decreasing only \$3.3 million, or 1%, at December 31, 2008 compared to December 31, 2007.

Savings and money market accounts increased by \$27.3 million, or 10%, at December 31, 2008 compared to December 31, 2007. The increase reflects the shift in funds by rate sensitive depositors to higher yielding products as interest rates decreased over the period.

Year-end balances of higher costing certificates of deposit increased by \$50.4 million, or 25%. The increase reflects the trend of depositors shifting excess funds to higher yielding term products. In addition, brokered CD s increased \$4.7 million, or 7%, as of December 31, 2008 compared to December 31, 2007. These combined CD balances represented 35% and 32% of total deposits at December 31, 2008 and 2007, respectively. The majority of the December 31, 2008 combined CD balances were scheduled to mature within one year, with approximately 56% due to mature within three months and 36% due in over three through twelve months.

Table of Contents

The table below sets forth a comparison of the Company's average deposits and average rates paid for the periods indicated, as well as the percentage of each deposit category to total average deposits. The annualized average rate on total deposits reflects both interest bearing and non-interest bearing deposits.

(Dollars in thousands)	2008			Year ended December 31, 2007			2006		
	Average Balance	Avg Rate	% of Total	Average Balance	Avg Rate	% of Total	Average Balance	Avg Rate	% of Total
Non-interest demand	\$ 168,140		18.5%	\$ 165,653		18.9%	\$ 165,957		19.9%
Interest checking	151,971	0.52%	16.7%	151,835	1.13%	17.3%	159,009	0.80%	19.0%
Savings	148,595	1.81%	16.3%	151,480	2.15%	17.2%	167,353	2.05%	20.0%
Money market	139,852	2.36%	15.4%	123,652	2.94%	14.1%	109,783	2.25%	13.1%
Total interest bearing non-term deposits	440,418	1.54%	48.4%	426,967	2.02%	48.6%	436,145	1.65%	52.1%
Certificates of Deposit	241,124	3.77%	26.5%	195,565	4.45%	22.3%	173,433	3.78%	20.7%
Total non-brokered deposits	849,682	1.87%	93.4%	788,185	2.20%	89.8%	775,535	1.77%	92.7%
Brokered CDs	59,929	4.13%	6.6%	89,506	5.34%	10.2%	61,082	5.12%	7.3%
Total	\$ 909,611	2.02%	100%	\$ 877,691	2.52%	100.0%	\$ 836,617	2.02%	100.0%

The decrease in the average rate paid on total deposit accounts for 2008 is attributable to decreases in market interest rates.

Borrowed Funds

Total borrowed funds, consisting of securities sold to customers under agreements to repurchase (repurchase agreements) and FHLB borrowings, increased \$39.8 million from December 31, 2007. The increase resulted from the increased use of FHLB borrowings to fund asset growth during the year.

The following table sets forth borrowed funds by categories at the dates indicated and the percentage of each category to total borrowed funds.

(Dollars in thousands)	December 31, 2008		December 31, 2007		December 31, 2006	
	Amount	%	Amount	%	Amount	%

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The contractual maturity distribution as of December 31, 2008, of borrowed funds with the weighted average cost for each category is set forth below:

(Dollars in thousands)	Overnight		Under 1 month		>1 - 3 months		>3 - 12 months		Over 12 months		
	Balance	Rate	Balance	Rate	Balance	Rate	Balance	Rate	Balance	Rate	
Repurchase agreements	\$		\$ 375	2.27%	\$ 1,043	2.20%	\$		\$		
FHLB Borrowings		119,000		0.38%		362		2.93%		470	5.94%
Total borrowed funds	\$	119,000	\$	375	2.27%	\$	1,405	2.39%	\$	470	5.94%

Table of Contents

Maximum FHLB advances outstanding at any month end during 2008, 2007, and 2006 were \$119.8 million, \$73.2 million and \$31.9 million respectively. Maximum amounts outstanding under repurchase agreements at any month end during 2008, 2007, and 2006 were \$8.3 million, \$8.3 million, and \$6.7 million, respectively.

The table below shows the comparison of the Company's average borrowed funds and average rates paid for the periods indicated.

(Dollars in thousands)	2008		Year ended December 31, 2007		2006	
	Average Balance	Average Rate	Average Balance	Average Rate	Average Balance	Average Rate
Repurchase agreements	\$ 3,425	3.72%	\$ 3,464	4.54%	\$ 2,325	4.41%
Other borrowed funds	131	2.19%			22	5.64%
FHLB advances	75,516	2.33%	18,547	5.02%	17,078	4.71%
Total borrowed funds	\$ 79,072	2.39%	\$ 22,011	4.94%	\$ 19,425	4.67%

The decrease in the average rate on borrowed funds for the year ended December 31, 2008 compared to the prior year was due to the decrease in market interest rates over the period. The average balance of other borrowed funds above represents overnight advances from the FRB or federal funds purchased from correspondent banks made during those years to test new arrangements. The Company had no outstanding balances due to the FRB or correspondent banks at December 31, 2008.

At December 31, 2008, the Bank had the ability to borrow additional funds from the FHLB of up to \$75.1 million and capacity with the FRB of \$46.7 million.

Liquidity

Liquidity is the ability to meet cash needs arising from, among other things, fluctuations in loans, investments, deposits and borrowings. Liquidity management is the coordination of activities so that cash needs are anticipated and met, readily and efficiently. Liquidity policies are set and monitored by the Company's Asset-Liability Committee of the board of directors. The Company's liquidity is maintained by projecting cash needs, balancing maturing assets with maturing liabilities, monitoring various liquidity ratios, monitoring deposit flows, maintaining liquidity within the investment portfolio and maintaining borrowing capacity in the brokered CD market and at the FHLB, and through fed funds purchase arrangements with correspondent banks. In order to provide additional contingent liquidity and a competitive funding source, the Company recently applied for and received approval from the Federal Reserve Bank of Boston (FRB) to establish short-term borrowing capacity via the FRB discount window.

The Company's asset-liability management objectives are to maintain liquidity, provide and enhance access to a diverse and stable source of funds, provide competitively priced and attractive products to customers, conduct funding at a low cost relative to current market conditions and engage in sound balance sheet management strategies. Funds gathered are used to support current asset levels and to take advantage of selected leverage opportunities. The Company funds earning assets primarily with deposits, brokered CDs, repurchase agreements, FHLB borrowings and earnings. The Company has in the past also issued junior subordinated debentures. Management believes that the Company has adequate

liquidity to meet its commitments.

Table of Contents**Capital Adequacy**

The Company is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can result in certain mandatory and possible additional discretionary, supervisory actions by regulators, which, if undertaken, could have a material adverse effect on the Company's consolidated financial condition. At December 31, 2008 the capital levels of both the Company and the Bank complied with all applicable minimum capital requirements of the Federal Reserve Board and the FDIC, respectively, and both qualified as well-capitalized under applicable regulation of the Federal Reserve Board and FDIC.

For additional information regarding the capital requirements applicable to the Company and the Bank and their respective capital levels at December 31, 2008, see the section entitled "Capital Resources" contained in Item 1 "Business" and note 8, "Stockholders' Equity", to the consolidated financial statements contained in Item 8.

Contractual Obligations and Commitments

The Company is required to make future cash payments under various contractual obligations. These obligations include the repayment of short and long-term borrowings and long-term subordinated debentures, payment of fixed-cash supplemental retirement benefits, payments under non-cancelable operating leases for various premises, and payments due under agreements to purchase goods and future services from a variety of vendors.

The Company is also party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to originate loans, commitments to sell loans, standby letters of credit and unadvanced loans and lines of credit. The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheets. The contract amounts of these instruments reflect the extent of involvement the Company has in the particular classes of financial instruments.

The following table summarizes the contractual cash obligations and commitments at December 31, 2008.

(Dollars in thousands)	Total	With-in 1 Year	Payments Due By Period		
			>1 - 3 Years	>3 - 5 Years	After 5 Years
Contractual Cash Obligations:					
Repurchase agreements	\$ 1,418	\$ 1,418	\$	\$	\$

Commitments to originate loans	32,448	32,448			
Commitments to originate loans for sale	2,331	2,331			
Commitments to sell loans	3,927	3,927			
Total commitments	\$ 344,792	\$ 254,733	\$ 33,885	\$ 13,370	\$ 42,804

Table of Contents**Investment Assets Under Management**

The Company provides a wide range of investment management services. These services include management of equity, fixed income, balanced and strategic cash management portfolios through the Company's investment advisory group. The market value of each of these components is affected by fluctuations in the financial markets.

Also included in the investment assets under management total are commercial sweep accounts that are invested in third party money market mutual funds.

The following table sets forth the fair market value of investment assets under management by certain categories at the dates indicated.

(Dollars in thousands)	2008		December 31, 2007		2006	
Investment advisory assets	\$	345,400	\$	443,712	\$	401,269
Commercial sweep accounts		94,311		129,896		100,790
Investment assets under management	\$	439,711	\$	573,608	\$	502,059

Investment assets under management decreased by \$133.9 million, or 23%, from December 31, 2007 to December 31, 2008. The decrease was due to decreases in investment advisory assets of \$98.3 million and in commercial sweep accounts of \$35.6 million. The decrease in investment advisory assets under management was primarily due to the volatility in the financial markets. The commercial sweep account balance generally fluctuates in accordance with the cash needs of the Bank's customers and market interest rates.

Table of Contents**Results of Operations****Rate/Volume Analysis**

The following table sets forth the extent to which changes in interest rates and changes in the average balances of interest-earning assets and interest-bearing liabilities have affected interest income and expense during the years ended December 31, 2008 and 2007. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (1) volume (change in average portfolio balance multiplied by prior year average rate); (2) interest rate (change in average interest rate multiplied by prior year average balance); and (3) rate and volume (the remaining difference).

(1) Average yields are presented on a tax equivalent basis. The tax equivalent effect associated with loans and investments, which was not included in the interest amount above, was \$1.4 million, \$1.3 million, and \$1.1 million for the years ended Dec. 31, 2008, 2007 and 2006, respectively.

(2) Average loans include non-accrual loans and are net of average deferred loan fees.

- (3) Average investments are presented at amortized cost and include investment securities and short-term investments.

- (4) Certificates of deposit include brokered and non-brokered CDs.

Table of Contents

COMPARISON OF YEARS ENDED DECEMBER 31, 2008 AND 2007

Unless otherwise indicated, the reported results are for the year ended December 31, 2008 with the comparable year or prior year being the year ended December 31, 2007.

Net Income

The Company had net income in 2008 of \$5.5 million compared to \$9.9 million for 2007, a decrease of 44%. Earnings per share for 2008 were \$0.70 and \$0.69 on a basic and diluted basis, compared to \$1.27 and \$1.25 in the prior year, decreases of 45% and 45%, respectively.

Net Interest Margin

Tax equivalent net interest margin decreased by 25 basis points, to 4.23% for the year ended December 31, 2008, compared to 4.48% for the prior year. Net interest margin was affected primarily by a 78 basis point decrease in the yield on interest earning assets. This resulted from the market-rate reductions that have occurred since late 2007, as the Federal Reserve's target rates declined by 500 basis points, of which 175 basis points occurred during the last quarter of 2008.

Although the decline in market rates has caused asset yields to reprice downward,, the Company's strong loan growth throughout the year funded primarily through non-brokered deposits and lower cost FHLB borrowings, along with a 54 basis point reduction in funding costs during the year, partially offset the reduction in asset yields. The decline in funding costs, particularly in the cost of FHLB borrowings and brokered CDs, accelerated during the second half of the year.

Net Interest Income

The Company's net interest income was \$42.2 million for the year ended December 31, 2008, an increase of \$1.5 million, or 4%, over the prior year. The increase was primarily due to strong loan growth, as evidenced by an increase in average loan balances, partially offset by the margin compression discussed above. Total interest and dividend income for the 2008 period decreased by \$1.4 million, while total interest expense decreased by \$2.9 million over the prior year. These changes are discussed below.

Interest Income

Total interest income for the year ended December 31, 2008 was \$63.6 million, a decrease of \$1.4 million, or 2%, from the prior year, comprised of a decrease of \$1.7 million in loan income and an increase of \$246 thousand in investment income. The decrease resulted primarily from the impact of a 78 basis points decrease in the average tax equivalent yield on interest earning assets. The majority of the decrease was offset by growth in the average balance of interest earning assets of \$95.4 million, or 10.2% for the year ended December 31, 2008.

Average loan balances increased \$86.8 million, or 11%, compared to the prior year, and amounted to \$880.2 million, and the average balance of investments increased by \$8.5 million, or 6%, to \$151.9 million for the year ended December 31, 2008.

The average tax equivalent yield on interest earning assets amounted to 6.30%, with tax equivalent loan yields decreasing 92 basis points to 6.55% resulting primarily from prime rate decreases that began in September 2007. The tax equivalent yield realized on investments was relatively flat decreasing only 3 basis points to 4.86%.

Interest Expense

Total interest expense amounted to \$21.4 million, a decrease of \$2.9 million compared to the prior year. The decrease resulted primarily from the impact of a 54 basis point decrease in the average cost of deposits, borrowed funds and debentures, in particular brokered CDs and FHLB borrowings, partially offset by an \$89.0 million, or 10%, increase in the average balance of these funding sources, particularly FHLB borrowings.

Interest expense on interest checking, savings and money market accounts decreased \$1.8 million over the comparable year. This decrease resulted from a 48 basis point decrease in the average cost of these accounts to 1.54%, due to lower market interest rates, partially mitigated by an increase in the average balance of these accounts by 3% over the prior year.

Table of Contents

Interest expense on total CDs (brokered and non-brokered) decreased \$1.9 million over the prior year primarily due to a decrease in market interest rates. Interest expense on brokered CDs decreased \$2.3 million, or 48%, over the prior year. These average balances decreased by \$29.6 million due to growth in non-brokered balances, while the average cost of brokered CDs decreased 121 basis points compared to 2007. Interest expense on non-brokered CDs increased \$372 thousand, or 4%, over the comparable year. This increase was primarily due to an increase in the average balances of \$45.6 million, or 23%, partially offset by a decrease of 68 basis points in the average costs of non-brokered CDs as compared to the prior year.

Interest expense on borrowed funds, consisting primarily of FHLB borrowings and term repurchase agreements, increased by \$803 thousand, or 74% over the prior year. The increase was primarily attributed to the increases in average balances, partially offset by the reduction in the average cost of these borrowed funds. The average balance of borrowed funds increased by \$57.1 million, as the Company continued to utilize FHLB advances as a cost effective funding alternative over the period. The average cost of borrowed funds decreased 255 basis points, to 2.39%, for the year ended December 31, 2008, due to lower market interest rates over the prior year.

The interest expense and average rate on junior subordinated debentures was \$1.2 million and 10.88%, respectively, for both years ended December 31, 2008 and 2007.

The average balance of non-interest bearing demand deposits remained relatively consistent at \$168.1 million and \$165.7 million, and represented 17% and 18% of total average funding sources for the years ended December 31, 2008 and 2007, respectively. Non-interest bearing demand deposits are an important component of the Bank's core funding strategy.

Provision for Loan Losses

The provision for loan losses was \$2.5 million and \$1.0 million for the years ended December 31, 2008 and 2007, respectively. The increase in the provision is due primarily to loan growth and an increase in net charge-offs. The provision reflects management's estimate of the loan loss allowance necessary to support the level of credit risk inherent in the portfolio during the period.

See *Credit Risk/Asset Quality* and *Allowance for Loan Losses* under the heading, *Financial Condition*, in this Item 7 above, for further information regarding the provision for loan losses.

Non-Interest Income

Non-interest income for the year ended December 31, 2008 decreased \$4.0 million compared to 2007. The primary components of the decrease were the OTTI charge related to certain equity investments and lower levels of net gains on sales of investment securities in 2008 compared to 2007. Non-interest income, excluding the OTTI charge and net gains on investment securities, increased \$1.0 million, or 12%, over the prior year, primarily as a result of increased deposit service fees.

Table of Contents

The following table sets forth the components of non-interest income and the related changes for the periods indicated.

(Dollars in thousands)	Year Ended December 31,		Change	% Change
	2008	2007		
Investment advisory fees	\$ 3,181	\$ 3,177	\$ 4	0.13%
Deposit service fees	3,805	2,848	957	34%
Bank-owned life insurance income	620	602	18	3%
Other than temporary impairment on investment securities	(3,702)		(3,702)	(100%)
Net gains on sales of investment securities	305	1,655	(1,350)	(82%)
Gains on sales of loans	133	201	(68)	(34%)
Other income	1,749	1,625	124	8%
Total non-interest income	\$ 6,091	\$ 10,108	\$ (4,017)	(40%)

The increase in deposit-service fees resulted primarily from increased service charge income on commercial deposit accounts attributed to lower earnings credit rates paid during the year and increased overdraft fees earned. The earnings credit rate (based on market rates) allows customers to accrue credits on monthly deposit balances. The credits are then applied to offset service charges.

The OTTI charge on investment securities recorded in 2008 represented a charge to earnings on certain equity investments in the investment portfolio. This charge reflects the fourth quarter downturn in the equity markets resulting in the book value of these investments being written down to market value as of December 31, 2008.

The net gains on sales of investment securities in 2008 primarily resulted from the \$4.6 million sale of a small number of municipal securities. The net gains on sales of investment securities in 2007 resulted from sales of \$9.9 million, primarily in the equities portfolio.

Included in the increase in other income were modest increases in loan fee income, insurance commissions, and rental income. These increases were partially offset by a reduction in the earning credits received on balances related to official check sales and a reduction in tax credit income.

Non-Interest Expense

Non-interest expense for the year ended December 31, 2008, increased \$3.0 million, or 9%, compared to 2007. The primary components of the increase were salaries and benefits, deposit insurance premiums and advertising and public relations.

The following table sets forth the components of non-interest expense and the related changes for the periods indicated.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

(Dollars in thousands)	Year Ended December 31,		Change	% Change
	2008	2007		
Salaries and employee benefits	\$ 22,454	\$ 21,044	\$ 1,410	7%
Occupancy expenses	6,650	6,470	180	3%
Audit, legal and other professional fees	1,412	1,487	(75)	(5%)
Advertising and public relations	1,963	1,389	574	41%
Deposit Insurance Premiums	720	104	616	592%
Supplies and postage	899	896	3	0.3%
Investment advisory and custodial expenses	359	498	(139)	(28%)
Other operating expenses	3,427	2,956	471	16%
Total non-interest expense	\$ 37,884	\$ 34,844	\$ 3,040	9%

The increase in salaries and benefits expense primarily resulted from staffing increases necessary to support the Company's strategic growth initiatives, salary adjustments and corresponding increases in benefit costs and taxes, partially offset by a reduction in performance-based incentive compensation.

Table of Contents

Occupancy expenses increased primarily due to ongoing increases in maintenance and service costs, utilities and facility expansion necessary to support the Company's growth and strategic initiatives, partially offset by a reduction in rent due to the purchase of the Bank's operations/lending center in 2007.

The increase in advertising and public relations primarily resulting from expenses for the Company's First Annual Celebration of Excellence which recognized local entrepreneurs, businesses and community leaders, a special contribution to a local charity in preparation of the Bank's 20th anniversary, and increased advertising costs to support the Company's expansion and business development efforts.

Deposit insurance premiums increased due to changes in the FDIC insurance assessment rates, related to 2005 legislation which applied to all insured banks. See the discussion under the heading "Deposit Insurance Assessment" contained in Item 1 Business, under the heading "Supervision and Regulation" for further information regarding the Company's deposit insurance assessment.

Investment advisory and custodial expenses decreased due primarily to a reduction in third party manager fees and reductions in market values of assets under management.

Other operating expenses increased due primarily to modest increases in correspondent bank charges, loan workout expense and employee training and development costs.

Income Tax Expense

Income tax expense for the year ended December 31, 2008 and December 31, 2007 was \$2.3 million and \$5.0 million, respectively. The effective tax rate for the year ended December 31, 2008 and December 31, 2007 was 29.7%, and 33.8%, respectively. The decrease in the effective tax rate was primarily due to lower earnings, the increased impact of non-taxable income from certain tax-exempt assets and a reduction in state income taxes as a result of the Company's two security corporations that were formed in the fourth quarter of 2007. During the third quarter, a tax charge of approximately \$130 thousand was recorded related to legislative changes in future tax rates applicable to Massachusetts financial institutions.

COMPARISON OF YEARS ENDED DECEMBER 31, 2007 AND 2006

Unless otherwise indicated, the reported results are for the year ended December 31, 2007 with the comparable year or prior year being the year ended December 31, 2006.

Net Income

The Company had net income in 2007 of \$9.9 million compared to \$9.2 million for 2006, an increase of 7%. Earnings per share for 2007 were \$1.27 and \$1.25 on a basic and diluted basis, compared to \$1.21 and \$1.18 in the prior year, increases of 5% and 6%, respectively.

Net Interest Income

The Company's net interest income was \$40.7 million for the year ended December 31, 2007, a decrease of \$881 thousand, or 2%, from the prior year. The decrease was primarily due to a decline in net interest margin as discussed below, partially offset by an increase in interest income, due to an increase in average loan balances. Total interest and dividend income for the 2007 period increased by \$4.5 million, while total interest expense increased by \$5.4 million over the prior year.

Net Interest Margin

Tax equivalent net interest margin decreased by 31 basis points, to 4.48% for the year ended December 31, 2007, compared to 4.79% for the prior year. The decrease in margin was primarily due to a 49 basis point increase in the total cost of funds, partially offset by a 16 basis point increase in the yield on interest earning assets. The basis point increases were primarily due to increases in market interest rates. In addition, the increase in cost of funds was impacted by a shift in the funding mix from lower-costing deposits to higher-costing deposits and the utilization of higher cost funding sources to support loan growth.

Table of Contents

Interest Income

Total interest income for the year ended December 31, 2007 was \$65.0 million, an increase of \$4.5 million, or 7%, over the prior year. The increase resulted primarily from an increase in the average balance of interest earning assets of \$46.7 million, or 5%, to \$936.7 million for the year ended December 31, 2007, and, to a lesser extent, an increase in the average tax equivalent yield on interest earning assets of 16 basis points, to 7.08% due to the higher market interest rates during the period.

Average loan balances increased \$60.6 million, or 8%, compared to the prior year, and amounted to \$793.4 million, while the average balance of investments decreased by \$14.0 million, or 9%, to \$143.3 million for the year ended December 31, 2007.

This shift in average balances from lower yielding investments into higher yielding loans, coupled with the higher market interest rates over the period, resulted in the increase in the average tax equivalent yield on interest earning assets to 7.08%, with tax equivalent loan yields increasing 7 basis points to 7.47% and the tax equivalent yield realized on investments increasing 20 basis points to 4.89%. Loan yields, although higher than the prior year, were relatively flat during the first three quarters of 2007, but declined during the fourth quarter. This was primarily a result of prime rate decreases that began in September 2007. Interest income on loans increased \$5.0 million over the comparable year.

Investment yields increased in 2007 as a result of sales of lower yielding securities in the fourth quarter of 2006, as well as investments purchased in 2007 at higher market rates. Income on investment securities and total short-term investments (together, investments) decreased \$433 thousand compared to the prior year.

Interest Expense

Total interest expense amounted to \$24.4 million, an increase of \$5.4 million compared to the prior year. The increase resulted primarily from an increase in the average cost of total funds, and to a lesser extent an increase in the average balance of total funding sources. The average cost of total funds increased to 2.68% for the year ended December 31, 2007 compared to 2.19% in the prior year. This increase in total cost of funds was primarily due to increased market interest rates and the shift in funding mix from lower costing deposits to higher cost funding sources. Funding costs increased during the first three quarters of 2007, but declined slightly during the fourth quarter. This was primarily a result of market rate decreases that began in September 2007. Overall the average balance of total funding sources increased 5% over the prior year.

Interest expense on interest checking, savings and money market accounts increased \$1.4 million over the comparable year. This increase resulted from a 37 basis point increase in the average cost of these accounts to 2.02%, due to higher market interest rates, partially offset by a reduction in the average balance of these accounts by 2% over the prior year.

Interest expense on CDs increased \$3.8 million over the prior year primarily due to an increase in the average balance of CDs and to a lesser extent due to an increase in the average cost of CDs. The average balance of CDs increased by \$50.6 million, or 22% over the prior year. The increase in the average CD balances resulted from a \$28.4 million, or 47%, increase in the average balance of brokered CDs and a \$22.1 million, or 13%, increase in the average balance of CDs generated from bank customers. The average cost of certificates of deposit increased 60 basis

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

points for the year ended December 31, 2007 compared to the year ended December 31, 2006, primarily due to higher market rates, consumer price sensitivity and the higher costing brokered CD balances.

Interest expense on borrowed funds, consisting of FHLB borrowings and term repurchase agreements, increased by \$180 thousand, or 20% over the prior year. The average balance of borrowed funds, primarily FHLB borrowings, increased by \$2.6 million. The average cost of borrowed funds increased 27 basis points, to 4.94%, for the year ended December 31, 2007, due to increased market interest rates over the prior year. These market rates were relatively flat for most of 2007 and began declining in September 2007.

The interest expense and average rate on junior subordinated debentures was \$1.2 million and 10.88%, respectively, for both years ended December 31, 2007 and 2006.

The average balance of non-interest bearing demand deposits remained relatively consistent at \$165.7 million and \$166.0 million, and represented 18% and 19% of total average funding sources for the years ended December 31, 2007 and 2006, respectively. Non-interest bearing demand deposits are an important component of the Bank's core funding strategy.

Table of Contents***Provision for Loan Losses***

The provision for loan losses was \$1.0 million and \$1.3 million for the years ended December 31, 2007 and 2006, respectively. The reduced provision reflected the continued favorable asset quality during 2007, the level of loan growth, and the low level of charge-offs during 2007. The provision reflected management's estimate of the loan loss allowance necessary to support the level of credit risk inherent in the portfolio during the period.

See *Credit Risk/Asset Quality* and *Allowance for Loan Losses* under the heading, *Financial Condition*, in this Item 7 above, for further information regarding the provision for loan losses.

Non-Interest Income

Non-interest income for the year ended December 31, 2007 increased \$3.3 million, or 48%, compared to 2006. The primary components of the increase were increases in net gains on sales of investment securities, deposit-service fees, investment-advisory fees, and bank-owned life insurance income. Non-interest income, excluding net gains/losses on investment securities, increased \$1.4 million, or 20%, over the prior year.

The following table sets forth the components of non-interest income and the related changes for the periods indicated.

(Dollars in thousands)	Year Ended December 31,		Change	% Change
	2007	2006		
Investment advisory fees	\$ 3,177	\$ 2,735	\$ 442	16%
Deposit service fees	2,848	2,302	546	24%
Bank-owned life insurance income	602	391	211	54%
Net gains (losses) on sales of investment securities	1,655	(204)	1,859	911%
Gains on sales of loans	201	147	54	37%
Other income	1,625	1,445	180	12%
Total non-interest income	\$ 10,108	\$ 6,816	\$ 3,292	48%

Investment advisory fees increased due to new business generated and increases in the value of the portfolio due to increases in market values.

The increase in deposit-service fees resulted primarily from increased fee income on commercial deposit accounts attributed to lower earnings credit rates paid, as a result of decreases in market rates during the period and increased overdraft fees earned. The earnings credit rate allows customers to earn credit on deposit balances, which are used to offset service charges.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

Bank-owned life insurance income increased due primarily to income on additional policies purchased in the second quarter of 2006.

The net gain on the sales of investment securities in 2007 and the net loss in 2006 resulted from sales of \$9.9 million and \$19.9 million, respectively, in those periods. The realized gains in the 2007 resulted primarily from sales in the equities portfolio. The net losses realized in 2006 primarily resulted from management's decision to sell a portion of lower yielding fixed income securities in December of that year.

Included in the increase in other income was \$112 thousand in purchased tax credit income.

Non-Interest Expense

Non-interest expense for the year ended December 31, 2007, increased \$2.3 million, or 7%, compared to 2006. The primary components of the increase were salaries and benefits and occupancy costs.

The following table sets forth the components of non-interest expense and the related changes for the periods indicated.

Table of Contents

(Dollars in thousands)	Year Ended December 31,		Change	% Change
	2007	2006		
Salaries and employee benefits	\$ 21,044	\$ 19,169	\$ 1,875	10%
Occupancy expenses	6,470	6,095	375	6%
Audit, legal and other professional fees	1,487	1,447	40	3%
Advertising and public relations	1,389	1,372	17	1%
Deposit Insurance Premiums	104	104		
Supplies and postage	896	874	22	3%
Investment advisory and custodial expenses	498	500	(2)	(0.4%)
Other operating expenses	2,956	2,979	(23)	(0.8%)
Total non-interest expense	\$ 34,844	\$ 32,540	\$ 2,304	7%

The increase in salaries and benefits expense primarily resulted from staffing increases necessary to support the Company's strategic growth initiatives and salary adjustments. Increases in health insurance premiums, taxes, performance based incentive compensation and employee stock compensation expense also contributed to the increase in salaries and benefits.

Occupancy expenses primarily increased due to ongoing increases in maintenance and service costs, and facility expansion necessary to support the Company's growth and strategic initiatives.

Income Tax Expense

Income tax expense for the year ended December 31, 2007 and December 31, 2006 was \$5.0 million and \$5.3 million, respectively. The effective tax rate for the year ended December 31, 2007 and December 31, 2006 was 33.8%, and 36.7%, respectively. The decrease in the effective tax rate in 2007 as compared to 2006 is primarily due to increased levels of non-taxable income on certain tax-exempt investments and loans, non-taxable income on BOLI, and the impact on state taxes of the Company's two security corporations that were formed in the fourth quarter of 2007.

Recent Accounting Pronouncements

In September 2006 the FASB's Emerging Issues Task Force reached a consensus regarding Issue No. 06-4 (EITF No. 06-4) Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split Dollar Life Insurance Arrangements. The Task Force affirmed that an employer should recognize a liability for future benefits associated with an endorsement split-dollar life insurance arrangement that provides a benefit to an employee that extends to postretirement periods. The liability and related compensation cost are to be determined in accordance with the appropriate previously issued financial standards. The Task Force concluded that this Issue should be effective through either (a) a change in accounting principle through a cumulative-effect adjustment to retained earnings or to other components of equity or net assets in the statement of financial position as of the beginning of the year of adoption, or (b) a change in accounting principle through retrospective application to all prior periods. The Task Force reached a consensus that this Issue should be effective for fiscal years beginning after December 15, 2007. Upon adoption of EITF No. 06-4, on January 1, 2008, the Company recorded a cumulative-effect adjustment to retained earnings of approximately \$1 million. Management has determined the effect of adoption did not have a material impact on the Company's financial position or regulatory capital levels.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment for FASB Statement No. 115. This Statement permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This Statement allows the fair value option to be applied to eligible items, irrevocably, on an instrument by instrument basis with unrealized gains and losses on the instruments reported in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years that begin after November 15, 2007, and interim periods within those fiscal years. Early adoption was permitted as of the beginning of a fiscal year that begins on or before November 15, 2007, provided the entity also elects to apply the provisions of SFAS No. 157. This statement permits application to eligible

Table of Contents

items existing at the effective date (or early adoption date). Management adopted SFAS No. 159 as of January 1, 2008 and did not choose the fair value option under this statement for any assets or liabilities. The adoption did not have a material impact on the Company's financial position or results of operations.

In December 2007, the FASB issued SFAS No. 141R, *Business Combinations*. This revised statement replaces SFAS No. 141, *Business Combination*, but retains the fundamental requirements in SFAS No. 141 that the acquisition method of accounting (which Statement 141 called the purchase method) be used for all business combinations and for an acquirer to be identified for each business combination. It also retains the guidance in SFAS No. 141 for identifying and recognizing intangible assets separately from goodwill. However, SFAS No. 141R's scope is broader than that of SFAS No. 141. SFAS No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Earlier adoption is prohibited. For any business combinations entered into by the Company subsequent to January 1, 2009, the Company will be required to apply the guidance in SFAS No. 141R.

Impact of Inflation and Changing Prices

The Company's asset and liability structure is substantially different from that of an industrial company in that virtually all assets and liabilities of the Company are monetary in nature. Management believes the impact of inflation on financial results depends upon the Company's ability to react to changes in interest rates and by such reaction, reduce the inflationary impact on performance. Interest rates do not necessarily move in the same direction, or at the same magnitude, as the prices of other goods and services. As discussed previously, management seeks to manage the relationship between interest-sensitive assets and liabilities in order to protect against wide net interest income fluctuations, including those resulting from inflation.

Various information shown elsewhere in this annual report will assist in the understanding of how well the Company is positioned to react to changing interest rates and inflationary trends. In particular additional information related to the net interest margin sensitivity analysis is contained in Item 7A and other maturity and repricing information of the Company's investment securities, certificates of deposits and borrowed funds is contained in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* under the heading *Financial Condition* in this report.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Interest Margin Sensitivity Analysis

The Company's primary market risk is interest rate risk and interest rate risk management is centered on the Company's Asset-Liability Committee (the committee). The committee is comprised of six outside directors of the Company and three executive officers of the Company, who are also members of the board of directors. In addition, several directors who are not on the committee rotate in on a regular basis. Annually, the committee approves the Company's asset-liability management policy, which provides management with guidelines for controlling interest rate risk, as measured through net interest income sensitivity to changes in interest rates, within certain tolerance levels. The committee also establishes and monitors guidelines for the Company's liquidity and capital ratios.

The asset-liability management strategies are reviewed on a periodic basis by management and presented and discussed with the committee on at least a quarterly basis. The asset-liability management strategies and guidelines are revised based on changes in interest rate levels, general economic conditions, competition in the marketplace, the current interest rate risk position of the Company, anticipated growth and other factors.

One of the principal factors in maintaining planned levels of net interest income is the ability to design effective strategies to manage the impact of interest rate changes on future net interest income. Quarterly, management completes a net interest income sensitivity analysis, which is presented to the committee. This analysis includes a simulation of the Company's net interest income under various interest rate scenarios. Variations in the interest rate environment affect numerous factors, including prepayment speeds, reinvestment rates, maturities of investments (due to call provisions), and interest rates on various asset and liability accounts.

Under the Company's current balance sheet position, the Company's net interest margin generally performs slightly better over time in a rising rate environment, while it generally decreases when the yield curve is flat, inverted or declining.

Under a flat yield curve scenario, margin compression occurs as the spread between the cost of funding and the yield on interest earning assets narrows. Under this scenario the degree of margin compression is highly dependent on the Company's ability to fund asset growth through lower cost deposits. However, if the curve is flattening, while short-term rates are rising, the adverse impact on margin may be somewhat delayed, as increases in the prime rate will initially result in the Company's asset yields re-pricing more quickly than funding costs.

Under an inverted yield curve situation, shorter-term rates exceed longer-term rates, and the impact on margin is similar but more adverse than the flat curve scenario. Again, however, the extent of the impact on margin is highly dependent on the Company's balance sheet mix.

Under a declining yield curve scenario, margin compression will eventually occur as the yield on interest earning assets decreases more rapidly than decreases in funding costs. The primary causes would be the impact of interest rate decreases (including decreases in the prime rate) on adjustable rate loans and the fact that decreases in deposit rates may be limited or lag decreases in the prime rate.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

In 2008, the Company experienced the effects of a declining yield curve scenario as the Federal Reserve Board reduced its Fed Funds Target rate significantly due to the economic environment. This resulted in margin compression as rates on earning assets repriced downward, while rates on borrowings and deposits declined at a slower pace due to market conditions. The effect of the margin compression was partially offset by an increase in net interest income due to loan growth.

In December 2008, the Federal Open Market Committee of the Federal Reserve Board reduced the Fed Funds Target rate further to a range of 0.0% to 0.25%. As such, the Company may continue to experience aspects of a declining yield curve should short-term interest rates remain at current levels or decline further.

At December 31, 2008, management continues to consider the Company's primary interest rate risk exposure to be margin compression that may result from changes in interest rates and/or changes in the mix of the Company's balance sheet components. Specifically, these components include fixed versus variable rate loans and investments on the asset side, and higher cost deposits and borrowings versus lower cost deposits on the liability side.

Table of Contents

The following table summarizes the projected cumulative net interest income for a 24-month period as of December 31, 2008, assuming a parallel yield curve shift and gradual interest rate changes applied over the first twelve months.

(Dollars in thousands)	December 31, 2008	
	Rates Unchanged	Rates Rise 200 BP
Interest Earning Assets:		
Loans	\$ 106,593	\$ 116,325

Consolidated Statements of Cash Flows

Years Ended December 31, 2008, 2007 and 2006

(Dollars in thousands)	2008	2007	2006
Cash flows from operating activities:			
Net income	\$ 5,548	\$ 9,898	\$ 9,234
Adjustments to reconcile net income to net cash provided by operating activities:			
Provision for loan losses	2,505	1,000	1,259
Depreciation and amortization	2,504	2,490	2,571
Amortization of intangible assets	133	133	133
Stock-based compensation expense	519	573	459
Mortgage loans originated for sale	(15,985)	(20,496)	(16,094)
Proceeds from mortgage loans sold	14,790	20,978	15,959
Gains on sales of loans	(133)	(201)	(147)
Gains on sales of REO	(27)		
Net (gains) losses on sales of investments	(305)	(1,655)	204
Other-than-temporary-impairment of investment securities	3,702		
Income on bank-owned life insurance, net of costs	(554)	(548)	(339)
(Increase) decrease in:			
Accrued interest receivable	420	(313)	(576)
Prepaid expenses and other assets	802	(3,528)	1,256
Deferred income taxes	(2,122)	(1,084)	(1,009)
Increase (decrease) in:			
Accrued expenses and other liabilities	330	(362)	1,838
Accrued interest payable	(1,520)	1,264	933
Net cash provided by operating activities	10,607	8,149	15,681
Cash flows from investing activities:			
Proceeds from sales of investment securities	4,913	11,562	19,713
Proceeds from maturities, calls and pay-downs of investment securities	31,768	15,872	20,145
Purchase of investment securities	(52,509)	(39,235)	(14,340)
Purchase of tax credits		(1,735)	
Net increase in loans	(114,730)	(73,648)	(61,474)
Additions to premises and equipment, net	(5,060)	(5,920)	(6,945)
Proceeds from REO sales and payments	364		
Net withdrawals/(purchases) of bank-owned life insurance		24	(7,996)
Net cash used in investing activities	(135,254)	(93,080)	(50,897)
Cash flows from financing activities:			
Net increase in deposits	79,117	1,264	92,135
Net increase (decrease) in borrowed funds	39,821	66,324	(43,534)
Cash dividends paid	(2,865)	(2,498)	(2,141)
Proceeds from issuance of common stock	1,009	1,058	944
Proceeds from exercise of stock options	119	598	296
Tax benefit from exercise of stock options	4	16	22
Net cash provided by financing activities	117,205	66,762	47,722
Net increase (decrease) in cash and cash equivalents	(7,442)	(18,169)	12,506
Cash and cash equivalents at beginning of year	32,718	50,887	38,381
Cash and cash equivalents at end of year	\$ 25,276	\$ 32,718	\$ 50,887

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

Supplemental financial data:

Cash Paid For: Interest	\$	22,930	\$	23,094	\$	18,018
Income taxes		4,830		5,013		5,500
Supplemental schedule of non-cash investing activity:						
Transfer from loans to other real estate owned		455		266		

See accompanying notes to consolidated financial statements.

Table of Contents

(1) Summary of Significant Accounting Policies

(a) Basis of Presentation

The consolidated financial statements of Enterprise Bancorp, Inc. (the Company) include the accounts of the Company and its wholly owned subsidiary Enterprise Bank and Trust Company (the bank). The Bank is a Massachusetts trust Company organized in 1989. Substantially all of the Company's operations are conducted through the Bank.

The Bank has five wholly owned subsidiaries. The Bank's subsidiaries include Enterprise Insurance Services, LLC and Enterprise Investment Services, LLC, organized for the purposes of engaging in insurance sales activities and offering non-deposit investment products and services, respectively. In addition, the Bank has three subsidiary security corporations (Enterprise Security Corporation, Enterprise Security Corporation II, and Enterprise Security Corporation III), which hold various types of qualifying securities. The security corporations are limited to conducting securities investment activities that the Bank itself would be allowed to conduct under applicable laws.

Through the Bank and its subsidiaries, the Company offers a range of commercial and consumer loan products, deposit and cash management products, investment advisory services, trust and insurance services. The services offered through the Bank and subsidiaries are managed as one strategic unit and represent the Company's only reportable operating segment.

The Company's deposit accounts are insured by the Deposit Insurance Fund of the Federal Deposit Insurance Corporation (the FDIC) up to the maximum amount provided by law. The FDIC and the Massachusetts Commissioner of Banks (the Commissioner) have regulatory authority over the Bank.

The business and operations of the Company are subject to the regulatory oversight of the Board of Governors of the Federal Reserve System (the Federal Reserve Board). The Commissioner also retains supervisory jurisdiction over the Company.

In preparing the financial statements in conformity with U.S. generally accepted accounting principles, management is required to exercise judgment in determining many of the methodologies, estimates and assumptions to be utilized. These estimates and assumptions affect the reported values of assets and liabilities at the balance sheet date and income and expenses for the years then ended. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in those estimates resulting from continuing change in the economic environment and other factors will be reflected in the financial statements and results of operations in future periods. The three most significant areas in which management applies critical assumptions and estimates regard the estimate of the allowance for loan losses, impairment review of investment securities and the impairment review of goodwill and intangible assets.

All significant intercompany balances and transactions have been eliminated in the accompanying consolidated financial statements.

(b) Reclassification

Certain amounts in previous years' financial statements have been reclassified to conform to the current year's presentation.

On June 30, 2006, the Company issued 3,842,015 shares in a two-for-one stock split paid in the form of a stock dividend. All share and per share amounts have been retroactively adjusted to reflect the stock dividend for all periods presented.

Table of Contents

(c) Short-term Investment Securities

The Company utilizes short-term investments to earn returns on short-term excess liquidity. The Company's short-term investments may consist of investments carried as both cash equivalents and non-cash equivalents. Cash equivalents are defined as short-term highly liquid investments that are both readily convertible to known amounts of cash and are so near their maturity date that they present insignificant risk of changes in value due to changes in interest rates. The Company's cash equivalent short-term investments may be comprised of overnight and term federal funds sold, money market mutual funds and discount U.S. agency notes with original maturities of less than ninety days. Short-term investments not carried as cash equivalents would be classified as other short-term investments. The Company had no other short-term investments at December 31, 2008 or 2007.

(d) Investment Securities

Investment securities that are intended to be held for indefinite periods of time but which may not be held to maturity or on a long-term basis are considered to be available for sale and are carried at fair value. Net unrealized appreciation and depreciation on investments available for sale, net of applicable income taxes, are reflected as a component of accumulated other comprehensive income. Included as available for sale are securities that are purchased in connection with the Company's asset-liability risk management strategy and that may be sold in response to changes in interest rates, resultant prepayment risk and other related factors. In instances where the Company has the positive intent to hold to maturity, investment securities will be classified as held to maturity and carried at amortized cost. The Bank is required to purchase Federal Home Loan Bank of Boston (FHLB) stock in association with outstanding advances from the FHLB; this stock is classified as a restricted investment and carried at cost. As of the balance sheet dates all of the Company's investment securities (with the exception of restricted FHLB stock) were classified as available for sale and carried at fair value.

There are inherent risks associated with the Company's investment activities which could adversely impact the fair market value and the ultimate collectability of the Company's investments. The determination of other-than-temporary impairment involves a high degree of subjectivity and requires management to make significant estimates of current market risks and future trends. Management assessment includes: evaluating the level and duration of the loss on individual securities; evaluating the credit quality of fixed income issuers; determining if any individual equity security or mutual fund or other fund exhibits fundamental deterioration; and estimating whether it is unlikely that the individual security or fund will completely recover its unrealized loss within a reasonable period of time, or in the case of fixed income securities prior to maturity. While management uses available information to measure other-than-temporary impairment at the balance sheet date, future write-downs may be necessary based on extended duration of current unrealized losses, changing market conditions, or circumstances surrounding individual issuers and funds.

Should an investment be deemed other than temporarily impaired, the Company would be required to write-down the carrying value of the investment through earnings. Once written-down a security may not be written-up to reflect future increases in market prices. Such write-down(s) may have a material adverse effect on the Company's financial condition and results of operations.

Investment securities discounts are accreted and premiums are amortized over the period of estimated principal repayment using methods that approximate the interest method.

Gains or losses on the sale of investment securities are recognized on the trade date on a specific identification basis.

(e) Loans

Loans made by the Company to businesses include commercial mortgage loans, construction and land development loans, secured and unsecured commercial loans and

Table of Contents

lines of credit, and standby letters of credit. The Company also originates equipment lease financing for businesses. Loans made to individuals include conventional residential mortgage loans, home equity loans, residential construction loans on primary residences, secured and unsecured personal loans and lines of credit. Most loans granted by the Company are collateralized by real estate or equipment and/or are guaranteed by the principals of the borrower. The ability and willingness of the single family residential and consumer borrowers to honor their repayment commitments is generally dependent on the level of overall economic activity and real estate values within the borrowers' geographic areas. The ability and willingness of commercial real estate, commercial and construction loan borrowers to honor their repayment commitments is generally dependent on the health of the real estate sector in the borrowers' geographic areas and the general economy, among other factors.

Loans are reported at the principal amount outstanding, net of deferred origination fees and costs. Loan origination fees received, offset by direct loan origination costs, are deferred and amortized using the straight line method over three to five years for lines of credit and demand notes or over the life of the related loans using the level-yield method for all other types of loans. When loans are paid off, the unamortized fees and costs are recognized as an adjustment to interest income.

Loans held for sale are carried at the lower of aggregate amortized cost or market value. All loans sold are currently sold without recourse, subject to an early payment default period covering the first four payments for certain loan sales. When loans are sold, a gain or loss is recognized to the extent that the sales proceeds plus unamortized fees and costs exceed, or are less than, the carrying value of the loans. Gains and losses are determined using the specific identification method.

Loans on which the accrual of interest has been discontinued are designated as non-accrual loans. Accrual of interest on loans is discontinued when a loan becomes contractually past due, with respect to interest or principal, by ninety days for real estate loans and generally sixty to ninety days for all other loans, or when reasonable doubt exists as to the full and timely collection of interest or principal. When a loan is placed on non-accrual status, all interest previously accrued but not collected is reversed against current period interest income. Interest accruals are resumed on such loans only when payments are brought current and when, in the judgment of management, the collectability of both principal and interest is reasonably assured. Interest payments received on loans in a non-accrual status are generally applied to principal.

The Company accounts for impaired loans in accordance with the terms of SFAS 114. Impaired loans are individually significant loans for which management considers it probable that not all amounts due in accordance with original contractual terms will be collected. The majority of impaired loans are included within the non-accrual balances; however, not every loan in non-accrual status has been designated as impaired. Management does not set any minimum delay of payments as a factor in reviewing for impaired classification. Management considers the payment status, net worth and earnings potential of the borrower, and the value and cash flow of the collateral as factors to determine if a loan will be paid in accordance with its contractual terms. When a loan is deemed to be impaired, management estimates the credit loss by comparing the loan's carrying value against either 1) the present value of the expected future cash flows discounted at the loan's effective interest rate; 2) the loan's observable market price; or 3) the expected realizable fair value of the collateral, in the case of collateral dependent loans. A specific allowance is assigned to the impaired loan up to the amount of estimated credit loss. Impaired loans are charged off, in whole or in part, when management believes that the recorded investment in the loan is uncollectible.

Impaired loans exclude large groups of smaller-balance homogeneous loans, such as residential mortgage loans and consumer loans, that are collectively evaluated for impairment, loans that are measured at fair value and leases.

Table of Contents

Loans are designated as *restructured* when a concession is made on a credit as a result of financial difficulties of the borrower. Typically, such concessions consist of a reduction in interest rate to a below market rate, taking into account the credit quality of the note, or a deferment of payments, principal or interest, which materially alters the Bank's position or significantly extends the note's maturity date, such that the present value of cash flows to be received is materially less than those contractually established at the loan's origination. Restructured loans are included in the impaired loan category.

(f) Allowance for Loan Losses

The allowance for loan losses is an estimate of credit losses inherent in the loan portfolio. The Company's allowance is accounted for in accordance with SFAS No. 114, as amended by SFAS No. 118, *Accounting by Creditors for Impairment of a Loan-Income Recognition and Disclosures*, and SFAS No. 5, *Accounting for Contingencies*. The allowance for loan losses is established through a provision for loan losses, a direct charge to earnings. Loan losses are charged against the allowance when management believes that the collectability of the loan principal is unlikely. Recoveries on loans previously charged off are credited to the allowance. The Company maintains the allowance at a level that it deems adequate to absorb all reasonably probable losses from specifically known and other credit risks associated with the portfolio.

The Company's credit risk management function focuses on a wide variety of factors, including, among others, current and expected economic conditions, the real estate market, the financial condition of borrowers, the ability of borrowers to adapt to changing conditions or circumstances affecting their business and the continuity of borrowers' management teams. Early detection of credit issues is critical to minimize credit losses. Accordingly, management regularly monitors these factors, among others, through ongoing credit reviews by the credit department, an external loan review service, reviews by members of senior management and the Loan Committee of the board of directors. Loans which are evaluated to be of weaker credit quality are considered *classified* and are reviewed on a more regular basis by management.

The Company uses a systematic process to measure the amount of estimated loan loss exposure inherent in the portfolio for purposes of establishing a sufficient allowance for loan losses. The methodology uses a two-tiered approach that makes use of specific reserves for loans individually evaluated and deemed impaired and general reserves for larger groups of homogeneous loans. Individual commercial loans deemed to be impaired are analyzed for loss exposure using one of the acceptable methods prescribed in the SFAS 114, while portfolios of more homogenous populations of loans, are analyzed at a group level, by credit rating or by credit type. In determining general reserves on these groups of homogenous loans, management relies on a combination of qualitative and quantitative factors that could have an impact on the credit quality of these groups, including historical charge-off and recovery experience, the growth, composition and size of the loan portfolio, trends in delinquencies and non-performing loans, the strength of the local and national economy, interest rates and other changes in the portfolio.

On a quarterly basis, the Company prepares an estimate of the necessary reserves. The adequacy of the allowance for loan losses is reviewed and evaluated on a regular basis by an internal management committee, a sub-committee of the board of directors and the full board itself.

Management believes that the allowance for loan losses is adequate to absorb reasonably probable losses from specifically known and other credit risks associated with the loan portfolio as of the balance sheet dates. Arriving at an appropriate level of allowance for loan losses involves a high degree of management judgment. While management uses available information to recognize losses on loans, future additions to the allowance may be necessary. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to

Table of Contents

recognize additions to the allowance based on judgments different from those of management.

(g) Other Real Estate Owned

Real estate acquired by the Company through foreclosure proceedings or the acceptance of a deed in lieu of foreclosure is classified as Other Real Estate Owned (OREO). When property is acquired, it is recorded at the lesser of the loan's remaining principal balance or the estimated fair value of the property acquired, less estimated costs to sell. Any loan balance in excess of the estimated realizable fair value on the date of transfer is charged to the allowance for loan losses on that date. All costs incurred thereafter in maintaining the property, as well as subsequent declines in fair value are charged to non-interest expense.

(h) Premises and Equipment

Land is carried at cost. Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation or amortization is computed on a straight-line basis over the lesser of the estimated useful lives of the asset or the respective lease term (with reasonably assured renewal options) for leasehold improvements as follows:

Buildings, renovations and leasehold improvements	10 to 39 years
Computer software and equipment	3 to 5 years
Furniture, fixtures and equipment	3 to 7 years

(i) Impairment of Long-Lived Assets Other than Goodwill

The Company reviews long-lived assets, including premises and equipment, for impairment on an ongoing basis or whenever events or changes in business circumstances indicate that the remaining useful life may warrant revision or that the carrying amount of the long-lived asset may not be fully recoverable. If impairment is determined to exist, any related impairment loss is recognized through a charge to earnings. Impairment losses on assets disposed of, if any, are based on the estimated proceeds to be received, less cost of disposal.

(j) Goodwill and Core Deposit Intangible Assets

Goodwill and core deposit intangibles carried on the Company's consolidated financial statements were \$5.7 million and \$209 thousand, respectively, at December 31, 2008 and \$5.7 million and \$342 thousand, respectively, at December 31, 2007. Both of these assets are related to the Company's acquisition of two branch offices in July 2000.

In accordance with generally accepted accounting principles, the Company does not amortize goodwill and instead, at least annually, evaluates whether the carrying value of goodwill has become impaired. Impairment of the goodwill may occur when the estimated fair value of the Company is less than its recorded value. A determination that goodwill has become impaired results in an immediate write-down of goodwill to its determined value with a resulting charge to operations.

The annual impairment test is a two-step process used to identify potential goodwill impairment and measure the amount of goodwill impairment loss to be recognized, if any. The assessment is performed at the operating unit level. In the case of the Company, the services offered through the Bank and subsidiaries are managed as one strategic unit and represent the Company's only reportable operating segment. The first step of the goodwill impairment test, used to identify potential impairment, compares the estimated fair value of the reporting unit with its carrying amount, or the book value of the reporting unit, including goodwill. If the estimated fair value of the reporting unit equals or exceeds its book value, goodwill is considered not impaired, and the second step of the impairment test is unnecessary. Management's assessment of the fair value of the Company takes into consideration the Company's market capitalization, stock trading volume, price-multiples valuations of comparable

Table of Contents

companies and control premiums in transactions involving comparable companies. The value of a control premium to use in the marketplace will depend on a number of factors including the target bank stock's liquidity, where the stock is currently trading, the perceived attractiveness of the entity and economic conditions. Management evaluates each of these factors as they relate to the Company and subjectively determines a comparable assumed control premium.

The second step, if necessary, measures the amount of goodwill impairment loss to be recognized. The reporting unit must determine fair values for all assets and liabilities, excluding goodwill. The net of the assigned fair value of assets and liabilities is then compared to the book value of the reporting unit, and any excess book value becomes the implied fair value of goodwill. If the carrying amount of the goodwill exceeds the newly calculated implied fair value of that goodwill, an impairment loss is recognized in the amount required to write down the goodwill to the implied fair value.

The Company's consolidated financial statements also include intangible assets (core deposit intangibles), which are amortized to expense over their estimated useful life of ten years and reviewed for impairment on an ongoing basis or whenever events or changes in business circumstances warrant a review of the carrying value. If impairment is determined to exist, the related write-down of the intangible asset's carrying value is charged to operations. Accumulated amortization expense related to core deposit intangible asset was \$1.1 million at December 31, 2008. Amortization expense is expected to amount to \$133 thousand for year ended December 31, 2009 and \$76 thousand for the year ended December 31, 2010, the final year of amortization.

Based on these impairment reviews the Company determined that goodwill and core deposit intangible assets were not impaired at December 31, 2008.

(k) Income Taxes

The Company uses the asset and liability method of accounting for income taxes. Under this method deferred tax assets and liabilities are reflected at currently enacted income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities will be adjusted accordingly through the provision for income taxes.

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes - An interpretation of FASB Statement No. 109 (FIN 48). FIN 48 was adopted on January 1, 2007. The adoption of FIN 48 did not have a material impact on the Company's financial position or results of operation.

The Company's policy is to classify interest resulting from underpayment of income taxes as income tax expense in the first period the interest would begin accruing according to the provisions of the relevant tax law. The Company classifies penalties resulting from underpayment of income taxes as income tax expense in the period for which the Company claims or expects to claim an uncertain tax position or in the period in which the Company's judgment changes regarding an uncertain tax position.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The Company did not have any unrecognized tax benefits accrued as income tax liabilities or receivables or as deferred tax items at December 31, 2008 or December 31, 2007. The Company's tax years beginning after December 31, 2005 are open to federal and state income tax examinations.

(l) Investment Assets Under Management

Securities and other property held in a fiduciary or agency capacity are not included in the consolidated balance sheets because they are not assets of the Company. Investment assets under management, consisting of assets managed by the investment

Table of Contents

advisory group and the commercial sweep product, totaled \$439.7 million and \$573.6 million at December 31, 2008 and 2007, respectively. Fee income is reported on an accrual basis.

(m) Earnings Per Share

Basic earnings per share are calculated by dividing net income by the weighted average number of common shares outstanding during the year. Diluted earnings per share reflects the effect on weighted average shares outstanding of the number of additional shares outstanding if dilutive stock options were converted into common stock using the treasury stock method.

The table below presents the increase in average shares outstanding, using the treasury stock method, for the diluted earnings per share calculation for the years ended December 31st and the effect of those shares on earnings:

	2008	2007	2006
Basic weighted average common shares outstanding	7,973,527	7,819,160	7,661,178
Dilutive shares	32,008	93,846	160,119
Diluted weighted average common shares outstanding	8,005,535	7,913,006	7,821,297
Basic Earnings per share	\$ 0.70	\$ 1.27	\$ 1.21
Effect of dilutive shares	(0.01)	(0.02)	(0.03)
Diluted Earnings per share	\$ 0.69	\$ 1.25	\$ 1.18

At December 31, 2008 and 2007 there were 645,193 and 526,281 outstanding stock options, respectively, which were excluded from the calculations of diluted earnings per share above, due to the exercise price exceeding the average market price. These options, which were not dilutive as of the calculation date, may potentially dilute earnings per share in the future.

(n) Stock Based Compensation

On January 1, 2006, the Company adopted Financial Accounting Standards No. 123(R) Share-Based Payment (SFAS 123(R)), using the modified version of the prospective application method. Pursuant to this transition method, beginning in 2006 the Company's financial statements include stock-based compensation expense for the portion of stock option awards, net of estimated forfeitures, outstanding on January 1, 2006 and options issued subsequent to January 1, 2006, for which the requisite service has been rendered during the period. The compensation expense has been estimated based on the grant-date fair value estimate of the awards as calculated under the original provisions of SFAS 123 for previous pro forma disclosures prior to January 1, 2006, and under the provisions of 123(R) for options issued subsequent to January 1, 2006. The Company will recognize the remaining estimated compensation expense for the portion of outstanding awards and compensation expense for any future awards, net of estimated forfeitures, as the requisite service is rendered (i.e., on a straight-line basis over the remaining vesting period of each grant).

(o) Reporting Comprehensive Income

Comprehensive income is defined as all changes to equity except investments by and distributions to stockholders. Net income is one component of comprehensive income, with other components referred to in the aggregate as other comprehensive income. The Company's other comprehensive income component is the net unrealized holding gains or losses on investments available for sale, net of deferred income taxes.

Table of Contents

The following table summarized the components of other comprehensive income (loss) for the periods indicated:

	2008	2007	2006
Disclosure of other comprehensive income (loss):			
Gross unrealized holding gains (losses) arising during the period	\$ (2,089)	\$ 2,200	\$ 719
Income tax benefit (expense)	614	(800)	(268)
Net unrealized holding gains (losses), net of tax	(1,475)	1,400	451
Reclassification adjustment for impairment included in net income:			
Other than temporary impairment loss arising during the period	(3,702)		
Income tax benefit	1,259		
Reclassification adjustment for impairment realized, net of tax	(2,443)		
Reclassification adjustment for net gains (losses) included in net income:			
Net realized gains/(losses) on sales of securities during the period	305	1,655	(204)
Income tax benefit (expense)	(108)	(577)	89
Reclassification adjustment for gains/(losses) realized, net of tax	197	1,078	(115)
Other comprehensive income, net of reclassifications	\$ 771	\$ 322	\$ 566

(p) Derivatives

The Company recognizes all derivatives as either assets or liabilities in its balance sheet and measures those instruments at fair market value. Depending on the current interest rate environment, management projections of future interest rates and the overall asset-liability management program of the Company, management may elect to sell those fixed and adjustable rate residential mortgage loans which are eligible for sale in the secondary market, or hold this residential loan production for the Company's portfolio. The Company generally does not pool mortgage loans for sale but instead sells the loans on an individual basis. The Company may retain or sell the servicing when selling these loans. Interest rate lock commitments related to the origination of mortgage loans that will be sold are considered derivative instruments. The Company estimates the fair value of these derivatives using the difference between the guaranteed interest rate in the commitment and the current market interest rate. To reduce the net interest rate exposure arising from its loan sale activity, the Company enters into the commitment to sell these loans at essentially the same time that the interest rate lock commitment is quoted on the origination of the loan. The commitments to sell loans are also considered derivative instruments, with estimated fair values based on changes in current market rates. At December 31, 2008, the estimated fair value of the Company's derivative instruments were considered to be immaterial.

(q) Recent Accounting Pronouncements

In September 2006 the FASB's Emerging Issues Task Force reached a consensus regarding Issue No. 06-4 (EITF No. 06-4) Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split Dollar Life Insurance Arrangements. The Task Force affirmed that an employer should recognize a liability for future benefits associated with an endorsement split-dollar life insurance arrangement that provides a benefit to an employee that extends to postretirement periods. The liability and related compensation cost are to be determined in accordance with the appropriate previously issued financial standards. The Task Force concluded that this Issue should be effective through either (a) a change in accounting principle through a cumulative-effect adjustment to retained earnings or

Table of Contents

to other components of equity or net assets in the statement of financial position as of the beginning of the year of adoption, or (b) a change in accounting principle through retrospective application to all prior periods. The Task Force reached a consensus that this Issue should be effective for fiscal years beginning after December 15, 2007. Upon adoption of EITF No. 06-4, on January 1, 2008, the Company recorded a cumulative-effect adjustment to retained earnings of approximately \$1 million. Management has determined the effect of adoption did not have a material impact on the Company's financial position or regulatory capital levels.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment for FASB Statement No. 115*. This Statement permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This Statement allows the fair value option to be applied to eligible items, irrevocably, on an instrument by instrument basis with unrealized gains and losses on the instruments reported in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years that begin after November 15, 2007, and interim periods within those fiscal years. Early adoption was permitted as of the beginning of a fiscal year that begins on or before November 15, 2007, provided the entity also elects to apply the provisions of SFAS No. 157. This statement permits application to eligible items existing at the effective date (or early adoption date). Management adopted SFAS No. 159 as of January 1, 2008 and did not choose the fair value option under this statement for any assets or liabilities. The adoption did not have a material impact on the Company's financial position or results of operations.

In December 2007, the FASB issued SFAS No. 141R, *Business Combinations*. This revised statement replaces SFAS No. 141, *Business Combination*, but retains the fundamental requirements in SFAS No. 141 that the acquisition method of accounting (which Statement 141 called the purchase method) be used for all business combinations and for an acquirer to be identified for each business combination. It also retains the guidance in SFAS No. 141 for identifying and recognizing intangible assets separately from goodwill. However, SFAS No. 141R's scope is broader than that of SFAS No. 141. SFAS No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Earlier adoption is prohibited. For any business combinations entered into by the Company subsequent to January 1, 2009, the Company will be required to apply the guidance in SFAS No. 141R.

Table of Contents2) **Investment Securities**

The amortized cost and estimated fair values of investment securities at December 31 2008 and 2007 are summarized as follows:

(Dollars in thousands)	Amortized cost	2008		Fair Value
		Unrealized gains	Unrealized losses	
Federal Agency collateralized mortgage obligations and mortgage backed securities (CMO/MBS)(1)	\$ 81,282	\$ 1,701	\$ 47	\$ 82,936
Non-agency CMO/MBS	4,561		245	4,316
Municipal securities	60,924	966	504	61,386
Total fixed income securities	146,767	2,667	796	148,638
FHLB stock, at cost(2)	4,740			4,740
Equity investments	6,175	21	201	5,995
Total investment securities	\$ 157,682	\$ 2,688	\$ 997	\$ 159,373

(Dollars in thousands)	Amortized cost	2007		Fairvalue
		Unrealized gains	Unrealized losses	
Federal agency obligations(1)	\$ 12,519	\$ 39	\$ 15	\$ 12,543
Federal agency CMO/MBS(1)	57,163	255	262	57,156
Non-agency CMO/MBS	5,234		172	5,062
Municipal securities	59,372	865	188	60,049
Total fixed income securities	134,288	1,159	637	134,810
FHLB stock, at cost(2)	3,895			3,895
Equity investments	6,952	248	388	6,812
Total investment securities	\$ 145,135	\$ 1,407	\$ 1,025	\$ 145,517

(1) Investments guaranteed by government sponsored enterprises such as Fannie Mae (FNMA), Freddie Mac (FHLMC), Ginnie Mae (GNMA) or the Federal Home Loan Bank (FHLB).

(2) The Bank is required to purchase Federal Home Loan Bank (FHLB) stock in association with outstanding advances from the FHLB; this stock is classified as a restricted investment and carried at cost.

Table of Contents

The following tables summarize investments having temporary impairment, due to the fair market values having declined below the amortized costs of the individual securities, and the period that the investments have been impaired at December 31, 2008 and 2007.

(Dollars in thousands)	Less than 12 months		2008 12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair value	Unrealized Losses	Fair Value	Unrealized Losses
Federal agency CMO/MBS	\$ 4,976	\$ 47	\$	\$	\$ 4,976	\$ 47
Non-agency CMO/MBS			4,316	245	4,316	245
Municipal securities	11,934	415	903	89	12,837	504
Equity investments	632	201			632	201
Total temporarily impaired securities	\$ 17,542	\$ 663	\$ 5,219	\$ 334	\$ 22,761	\$ 997

(Dollars in thousands)	Less than 12 months		2007 12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair value	Unrealized Losses	Fair Value	Unrealized Losses
Federal agency obligations	\$ 6,439	\$ 15	\$	\$	\$ 6,439	\$ 15
Federal agency CMO/MBS	18,886	60	25,356	202	44,242	262
Non-agency CMO/MBS			5,062	172	5,062	172
Municipal securities	5,520	109	13,913	79	19,433	188
Equity investments	3,769	388			3,769	388
Total temporarily impaired securities	\$ 34,614	\$ 572	\$ 44,331	\$ 453	\$ 78,945	\$ 1,025

As of December 31, 2008, the unrealized losses on the federal agency CMO/MBS investments were limited to three individual securities and were attributed to market volatility. The contractual cash flows of those investments are guaranteed by an agency of the U.S. government, and the agencies that issued these securities are sponsored by the U.S. Government. Accordingly, it is expected that the securities would not be settled at a price less than the par value of the Company's investment. The Company does not consider those investments to be other-than-temporarily impaired at December 31, 2008, because the decline in market value is attributable to changes in interest rates and not credit quality, and because the Company has the ability and intent to hold those investments until a market price recovery or maturity.

As of December 31, 2008, the unrealized losses on the Company's non-agency CMO/MBS was attributed to one security and was due to current market conditions which resulted generally in lower prices for most non-agency MBSs in relation to government issued and agency securities. This trend is considered temporary in nature by the Company. The Company does not consider this investment to be other-than-temporarily impaired at December 31, 2008 due to the AAA rating of the security and the high credit quality of the underlying loans. In addition the Company has the ability and intent to hold this investment until a recovery or maturity.

As of December 31, 2008, the unrealized losses on the Company's municipal securities were related to twenty-seven obligations and attributed to market volatility and not a fundamental deterioration in the issuer. The Company does not consider these investments to be other-than-temporarily impaired at December 31, 2008 due to the portfolio being designated investment grade quality and conservative from a credit risk perspective. In addition, the Company has the ability and intent to hold these investments until a recovery or maturity.

At December 31, 2008, after the impairment charge discussed below, the Company had three mutual funds and four investments in common stock of entities in the financial services industry with unrealized losses totaling \$201 thousand. These unrealized losses were due to market volatility and the equity investments were not considered other-than-temporarily impaired. Management regularly reviews the portfolio for

Table of Contents

securities with unrealized losses that are other than temporarily impaired. Management's assessment includes evaluating if any equity securities exhibit fundamental deterioration and whether it is unlikely that the security will completely recover its unrealized loss within a reasonable time frame. The Company does not consider these investments to be other-than-temporarily impaired at December 31, 2008, as the unrealized losses were short-term in duration at December 31, 2008 and management has the ability and intent to hold these investments for a reasonable time in anticipation of a recovery of fair value.

During the fourth quarter of 2008, the Company recorded a fair value impairment charge, on certain mutual fund investments contained in its equity portfolio, to reflect the impact of recent declines in the equities markets. Management's decision to record this charge was based primarily on the severity of the declines in the stock market and the general economy and the uncertainty in determining the likelihood of recovery in the short-term for these equities. The pretax impairment charge of \$3.7 million represented a \$2.4 million after tax charge against earnings. There were no other securities at December 31, 2008 that were considered other than temporarily impaired.

As a member of the Federal Home Loan Bank of Boston (the FHLB) the Company is required to purchase FHLB capital stock in association with the Bank's outstanding advances from the FHLB; this stock is classified as a restricted investment and carried at cost. The FHLB is currently operating with retained earnings below its target level. The FHLB has instituted a plan to increase retained earnings which includes suspending its quarterly dividend and a moratorium on the repurchase of excess capital stock from member banks, among other programs. Any further deterioration in the FHLB capital levels may require the Company to deem its FHLB capital stock to be other than temporarily impaired.

The contractual maturity distribution of total fixed income securities at December 31, 2008 is as follows:

(Dollars in thousands)	Amortized cost	Percent	Fair Value	Percent
Within one year	\$ 7,023	4.8%	\$ 7,046	4.7%
After one but within three years	10,719	7.3%	10,844	7.3%
After three but within five years	8,508	5.8%	8,693	5.9%
After five but within ten years	41,632	28.4%	41,913	28.2%
After ten years	78,885	53.7%	80,142	53.9%
Total fixed income securities	\$ 146,767	100.0%	\$ 148,638	100.0%

Scheduled contractual maturities may not reflect the actual maturities of the investments. CMO/MBS are shown at their final maturity but are expected to have shorter average lives due to principal prepayments. Included in municipal securities are investments that can be called prior to final maturity with amortized cost and fair values of \$43.9 million and \$44.0 million, respectively, at December 31, 2008.

At December 31, 2008, securities with a fair value of \$42.2 million were pledged as collateral for various municipal deposit accounts and repurchase agreements (see note 7 below) and securities with a fair value of \$599 thousand were pledged as collateral for treasury, tax and loan deposits. At December 31, 2007, securities with a fair value of \$22.5 million and \$2.0 million were pledged as collateral for municipal deposit accounts and repurchase agreements, and treasury tax and loan deposits, respectively. At December 31, 2006, securities with a fair value of \$25.1 million and \$2.0 million were pledged as collateral for municipal deposit accounts and repurchase agreements, and treasury tax and loan deposits, respectively.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

Securities designated as qualified collateral for FHLB borrowing capacity amounted to \$49.2 million, \$54.2 million and \$46.2 million at December 31, 2008, 2007 and 2006, respectively.

Table of Contents

Securities designated as qualified collateral for borrowing from the Federal Reserve Bank of Boston (the FRB) through its discount window amounted to \$49.1 million at December 31, 2008. This borrowing facility was put in place during 2008.

Sales of investment securities for the years ended December 31, 2008, 2007, and 2006 are summarized as follows:

(Dollars in thousands)	2008	2007	2006
Amortized cost of securities sold	\$ 4,608	\$ 9,907	\$ 19,917
Gross realized gains on sales	305	1,674	149
Gross realized losses on sales		(19)	(353)
Total proceeds from sales of investment securities	\$ 4,913	\$ 11,562	\$ 19,713

Tax exempt interest earned on the municipal securities portfolio was \$2.3 million for the year ended December 31, 2008, \$2.1 million for the year ended December 31, 2007, and \$2.0 million for the year ended December 31, 2006.

(3) Loans and Loans Held for Sale

Major classifications of loans and loans held for sale at December 31, are as follows:

(Dollars in thousands)	2008	2007
Real estate:		
Commercial real estate	\$ 472,279	\$ 406,410
Commercial construction	98,365	112,671
Residential mortgages	84,609	73,933
Residential construction	6,375	4,120
Loans held for sale	1,596	268
Total real estate	663,224	597,402
Commercial and industrial	231,815	188,866
Home equity	49,773	44,292
Consumer	4,857	4,493
Gross loans	949,669	835,053
Deferred loan origination fees, net	(1,028)	(1,234)
Total loans	948,641	833,819
Allowance for loan losses	(15,269)	(13,545)
Net loans and loans held for sale	\$ 933,372	\$ 820,274

Tax exempt interest earned on qualified commercial loans was \$524 thousand for the year ended December 31, 2008 and \$445 thousand and \$227 thousand for the years ended December 31, 2007 and 2006 respectively.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

Directors, officers, principal stockholders and their associates are credit customers of the Company in the normal course of business. All loans and commitments included in such transactions are on such terms, including interest rates, repayment terms and collateral, as those prevailing at the time for comparable transactions with persons who are not affiliated with the Bank and do not involve more than a normal risk of collectability or present other features unfavorable to the Bank.

As of December 31, 2008 and 2007, the outstanding loan balances to directors, officers, principal stockholders and their associates were \$9.8 million and \$13.9 million, respectively. Unadvanced portions of lines of credit available to these individuals were \$2.5 million and \$3.1 million, as of December 31, 2008 and 2007, respectively. During 2008, new loans and net increases in loan balances or lines of

Table of Contents

credit under existing commitments of \$647 thousand were made and principal paydowns of \$4.7 million were received. All loans to these related parties are current.

At December 31, 2008 and 2007, the Company was servicing residential mortgage loans owned by investors amounting to \$9.2 million and \$14.1 million, respectively. Additionally, the Company was servicing commercial loans participated out to various other institutions amounting to \$19.2 million and \$6.8 million at December 31, 2008 and 2007, respectively.

First lien 1-4 family residential mortgage loans designated as qualified collateral for FHLB borrowing capacity amounted to \$66.6 million and \$58.2 million at December 31, 2008 and 2007, respectively. In 2007, the Company increased its FHLB borrowing capacity by pledging additional commercial real estate, home equity and multi-family loans as collateral to the FHLB. The additional commercial real estate, home equity and multi-family loan balances pledged amounted to \$208.7 million and \$161.1 million at December 31, 2008 and 2007, respectively.

Non-performing assets at December 31 are summarized as follows:

(Dollars in thousands)	2008	2007
Commercial real estate	\$ 3,691	\$ 2,161
Commercial and industrial	1,713	1,124
Commercial construction	1,400	372
Residential	1,168	293
Consumer	39	6
Total non-accrual loans	\$ 8,011	\$ 3,956
Overdrafts > 90 days past due	256	
Total non-performing loans	\$ 8,267	\$ 3,956
Other real estate owned	318	200
Total non-performing assets	\$ 8,585	\$ 4,156

There were no commitments to lend additional funds to those borrowers whose loans were classified as non-accrual at December 31, 2008 or 2007.

The reduction in interest income for the years ended December 31, associated with non-accruing loans is summarized as follows:

(Dollars in thousands)	2008	2007	2006
Income in accordance with original loan terms	\$ 666	\$ 423	\$ 259
Less income recognized	196	32	64
Reduction in interest income	\$ 470	\$ 391	\$ 195

Table of Contents

In general, non-performing statistics trended upward in 2007 and 2008, as would be expected during the current economic decline. However, the amount of non-performing assets from 2004 through 2006 represented historically low levels. As such, management does not consider the increase in 2007 and into 2008 to be indicative of significant deterioration in the overall credit quality of the general loan portfolio at December 31, 2008. Overall asset quality remained favorable during the period as indicated by the following factors: the reasonable ratio of non-performing loans given the size and mix of the Company's loan portfolio; the minimal level of OREO; the low levels of loans 60-89 days delinquent; and management's assessment that the majority of non-performing loans are adequately collateralized at December 31, 2008.

The \$4.3 million net increase in total non-performing loans, and the resulting increase in the ratio of non-performing loans as a percentage of total loans outstanding, was primarily due to net additions within the commercial portfolios. In addition, one overdraft deposit account of \$256 thousand outstanding at December 31, 2008, was subsequently funded in January 2009. In the opinion of management the majority of the non-performing loans were adequately supported by expected future cash flows or the value of the underlying collateral and management expects that these principal advances will ultimately be collected. Management closely monitors these relationships for collateral or credit deterioration.

At December 31, 2008 and 2007, total impaired commercial loans were \$10.4 million and \$4.1 million, respectively. Included in these impaired balances were non-accrual loans amounting to \$6.7 million and \$3.9 million as of December 31, 2008 and 2007, respectively. Accruing impaired loans amounted to \$3.7 million and \$75 thousand at December 31, 2008 and 2007, respectively. In the opinion of management, impaired loans totaling \$5.2 million required specific reserve allocations of \$478 thousand and impaired loans of \$5.2 million required no specific reserve allocations at December 31, 2008. In the opinion of management, at December 31, 2007, impaired loans totaling \$200 thousand required specific reserve allocations of \$195 thousand and impaired loans of \$3.8 million required no specific reserve allocations.

During the years ended December 31, 2008, 2007 and 2006, the average recorded value of impaired loans was \$7.1 million, \$3.1 million and \$1.8 million, respectively. Included in the reduction in interest income in the table above is \$477 thousand, \$384 thousand and \$178 thousand of interest income that was not recognized on loans that were deemed impaired as of December 31, 2008, 2007 and 2006, respectively. All payments received on impaired loans in non-accrual status are applied to principal. The Company is not committed to lend additional funds on any loans that are considered impaired.

Changes in the allowance for loan losses for the years ended December 31, are summarized as follows:

(Dollars in thousands)	2008	2007	2006
Balance at beginning of year	\$ 13,545	\$ 12,940	\$ 12,050
Provision charged to operations	2,505	1,000	1,259
Loan recoveries	597	256	210
Loans charged off	(1,378)	(651)	(579)
Balance at end of year	\$ 15,269	\$ 13,545	\$ 12,940

Table of Contents**(4) Premises and Equipment**

Premises and equipment at December 31 are summarized as follows:

(Dollars in thousands)	2008	2007
Land	\$ 2,830	\$ 2,833
Buildings, renovations and leasehold improvements	21,131	18,499
Computer software and equipment	9,547	9,470
Furniture, fixtures and equipment	8,382	7,366
Total premises and equipment, before accumulated depreciation	41,890	38,168
Less accumulated depreciation	(20,239)	(18,872)
Total premises and equipment, net of accumulated depreciation	\$ 21,651	\$ 19,296

Total depreciation expense related to premises and equipment amounted to \$2.7 million, \$2.6 million and \$2.5 million for the years ended December 31, 2008, 2007 and 2006, respectively.

Total rent expense for the years ended December 31, 2008, 2007 and 2006 amounted to \$740 thousand, \$991 thousand, and \$1.0 million, respectively.

The Company is obligated under various non-cancelable operating leases, some of which provide for periodic adjustments. At December 31, 2008 minimum lease payments for these operating leases were as follows:

(Dollars in thousands)	
Payable in:	
2009	\$ 967
2010	736
2011	527
2012	491
2013	443
Thereafter	3,568
Total minimum lease payments	\$ 6,732

With the purchase of the operations and lending office building in 2007, the Company now collects rents on two units within these facilities. Rental income was \$154 thousand and \$31 thousand for the years ended December 31, 2008 and 2007, respectively.

(5) Accrued Interest Receivable

Accrued interest receivable consists of the following at December 31:

(Dollars in thousands)	2008	2007
Investments	\$ 951	\$ 938
Loans and loans held for sale	4,406	4,839
Total accrued interest receivable	\$ 5,357	\$ 5,777

Table of Contents**(6) Deposits**

Deposits at December 31 are summarized as follows:

(Dollars in thousands)	2008	2007
Non-interest demand deposits	\$ 166,430	\$ 167,039
Interest bearing checking	158,005	160,668
Savings	139,530	139,945
Money market	154,488	126,782
Certificates of deposit less than \$100,000	121,280	102,358
Certificates of deposit of \$100,000 or more	132,806	101,299
Brokered certificates of deposit	75,364	70,695
Total deposits	\$ 947,903	\$ 868,786

The aggregate amount of overdrawn deposits that have been reclassified as loan balances were \$1.2 million and \$450 thousand at December 31, 2008 and 2007, respectively.

The following table shows the scheduled maturities of certificates of deposit with balances less than \$100,000 and greater than \$100,000 at December 31, 2008:

(Dollars in thousands)	Less than \$100,000	\$100,000 and Greater	Total
Due in less than three months(1)	\$ 120,518	\$ 64,240	\$ 184,758
Due in over three through twelve months	57,740	60,308	118,048
Due in over one year through two years	14,680	7,134	21,814
Due in over two years through three years	3,706	1,124	4,830
Due in over three years			
Total certificates of deposit	\$ 196,644	\$ 132,806	\$ 329,450

(1) The line item Due in less than three months includes individual brokered certificates of deposit totaling \$75.4 million in the less than \$100,000 category.

Interest expense on certificates of deposit with balances of \$100,000 or more amounted to \$4.9 million, \$4.4 million, and \$3.2 million, in 2008, 2007 and 2006, respectively.

Table of Contents**(7) Borrowed Funds and Debentures**

Borrowed funds and debentures at December 31 are summarized as follows:

(Dollars in thousands)	2008		2007		2006	
	Amount	Average Rate	Amount	Average Rate	Amount	Average Rate
Securities sold under agreements to repurchase	\$ 1,418	2.22%	\$ 8,267	4.60%	\$ 4,835	4.82%
Federal Home Loan Bank of Boston borrowings	119,832	0.40%	73,162	3.64%	10,270	5.20%
Total borrowed funds	121,250	0.43%	81,429	3.74%	15,105	5.08%
Junior subordinated debentures	10,825	10.88%	10,825	10.88%	10,825	10.88%
Total borrowed funds and debentures	\$ 132,075	1.28%	\$ 92,254	4.57%	\$ 25,930	7.50%

Repurchase agreements for securities sold as of December 31, 2008 had terms ranging generally from forty-five days to three months, with a weighted average term of 77 days. Maximum amounts outstanding at any month end during 2008, 2007, and 2006 were \$8.3 million, \$8.3 million, and \$6.7 million, respectively.

FHLB borrowings at December 31, 2008 consisted of overnight borrowings, short-term borrowings with a weighted average term of 6 months, and one term advance maturing in 4.5 years. Maximum amounts outstanding at any month end during 2008, 2007, and 2006 were \$119.8 million, \$73.2 million, and \$31.9 million, respectively.

The contractual maturity distribution as of December 31, 2008, of borrowed funds with the weighted average cost for each category is set forth below:

(Dollars in thousands)	Overnight		Under 1 month		>1 - 3 months		>3 - 12 months		Over 12 months	
	Balance	Rate	Balance	Rate	Balance	Rate	Balance	Rate	Balance	Rate
Repurchase	\$		\$ 375	2.27%	\$ 1,043	2.20%	\$		\$	
FHLB	119,000	0.38%			362	2.93%			470	5.94%
Total borrowed funds	\$ 119,000	0.38%	\$ 375	2.27%	\$ 1,405	2.39%	\$		\$ 470	5.94%

The following table summarizes the average balance and average rate paid for securities sold under agreements to repurchase and FHLB borrowings for the year ended December 31,

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

(Dollars in thousands)	2008		Year ended December 31, 2007		2006	
	Average Balance	Average Rate	Average Balance	Average Rate	Average Balance	Average Rate
Repurchase agreements	\$ 3,425	3.72%	\$ 3,464	4.54%	\$ 2,325	4.41%
Other borrowed funds	131	2.19%			22	5.64%
FHLB advances	75,516	2.33%	18,547	5.02%	17,078	4.71%
Total borrowed funds	\$ 79,072	2.39%	\$ 22,011	4.94%	\$ 19,425	4.67%

Table of Contents

The average balance of other borrowed funds above represents overnight advances from the FRB or federal funds purchased from correspondent banks during those years to test new arrangements. The Company had no outstanding balances due to the FRB or correspondent banks at December 31, 2008.

As a member of the FHLB, the Bank has the capacity to borrow an amount up to the value of its qualified collateral, as defined by the FHLB which includes access to a pre-approved overnight line of credit for up to 5% of its total assets. Borrowings from the FHLB are secured by certain securities from the Company's investment portfolio not otherwise pledged and certain residential and commercial real estate loans. At December 31, 2008, based on qualifying collateral less outstanding advances, the Bank had the capacity to borrow additional funds from the FHLB of up to approximately \$75.1 million, which includes a pre-approved overnight line of credit in the amount of \$11 million. In addition, based on qualifying collateral the Bank had the capacity to borrow funds from the FRB Discount Window of up to \$46.7 million. The Bank also has pre-approved federal funds purchase arrangements with large regional correspondent banks in order to provide overnight and short-term borrowing capacity.

See note 2 and note 3 above to these consolidated financial statements for further information regarding securities and loans pledged for borrowed funds.

On March 10, 2000 the Company organized Enterprise (MA) Capital Trust I (the Trust), a statutory business trust created under the laws of Delaware. The Trust issued \$10.5 million of 10.875% trust preferred securities. The proceeds from the sale of the trust preferred securities were used by the Trust, along with the Company's \$325 thousand capital contribution, to acquire \$10.8 million in aggregate principal amount of the Company's 10.875% Junior Subordinated Debt Securities that mature in 2030 and are callable beginning in 2010.

(8) Stockholders Equity

The Company's authorized capital is divided into common stock and preferred stock. The Company is authorized to issue 20,000,000 shares of common stock and 1,000,000 shares of preferred stock.

Holders of common stock are entitled to one vote per share, and are entitled to receive dividends if and when declared by the board of directors. Dividend and liquidation rights of the common stock may be subject to the rights of any outstanding preferred stock.

The Company has maintained a shareholders rights plan since 1998. The plan as originally adopted expired pursuant to its terms on January 13, 2008, and in conjunction with such expiration the Company adopted a renewed shareholders rights plan containing terms that are substantially similar to the terms of the original plan. Under the renewed plan, each share of common stock includes a right to purchase under certain circumstances one one-hundredth of a share of the Company's Series A Junior Participating Preferred Stock, par value \$0.01 per share, at a purchase price of \$52.00 per one one-hundredth of a preferred share, subject to adjustment, or, in certain circumstances, to receive cash, property, shares of common stock or other securities of the Company. The rights are not presently exercisable and remain attached to the shares of common stock until the occurrence of certain triggering events that would ordinarily be associated with an unsolicited acquisition or attempted acquisition of 10% or more of the Company's outstanding shares of common stock. The rights will expire, unless earlier redeemed, exchanged, or otherwise rescinded by the Company, on January 13, 2018. The rights have no voting or dividend privileges, and unless and until they become exercisable have no dilutive effect on the earnings of the Company.

Capital Adequacy Requirements

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain certain minimum capital amounts and ratios of

Table of Contents

total capital and Tier 1 capital (as defined in the regulations) to risk-weighted and average assets (as defined).

Applicable regulatory requirements require the Company to maintain minimum total capital equal to 8.00% of total risk-weighted assets (total capital ratio), minimum Tier 1 capital equal to 4.00% of total risk-weighted assets (Tier 1 capital ratio) and minimum Tier 1 capital equal to 4.00% of quarterly average total assets (leverage capital ratio). Tier 1 capital, in the case of the Company, is composed of common equity and, subject to regulatory limits, trust preferred securities, reduced by certain intangible assets. Total capital includes Tier 1 capital plus Tier 2 capital (which in the case of the Company) is composed of the allowance for loan losses up to 1.25% of risk-weighted assets. Applicable regulatory requirements for the Bank are not materially different from those of the Company.

Failure to meet minimum capital requirements can initiate or result in certain mandatory and possibly additional discretionary, actions by regulators that, if undertaken, could have a material adverse effect on the Company's financial statements. Under applicable capital adequacy requirements and the regulatory framework for prompt corrective action applicable to the Bank, the Company must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Management believes, as of December 31, 2008, that the Company meets all capital adequacy requirements to which it is subject. As of December 31, 2008 and 2007, both the Company and the Bank qualified as well capitalized under applicable Federal Reserve Board and FDIC regulations.

Table of Contents

The Company's and the Bank's actual capital amounts and ratios are presented in the following tables. To be categorized as well capitalized, the Company and the Bank must maintain minimum total, Tier 1 and, in the case of the Bank, leverage capital ratios as set forth below.

(Dollars in thousands)	Actual		Minimum Capital for Capital Adequacy Purposes		Minimum Capital To Be Well Capitalized*	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2008						
<u>The Company</u>						
Total Capital (to risk weighted assets)	\$ 106,511	10.70%	\$ 79,623	8.00%	\$ 99,529	10.00%
Tier 1 Capital (to risk weighted assets)	94,035	9.45%	39,812	4.00%	59,717	6.00%
Tier 1 Capital (to average assets)	94,035	8.28%	45,432	4.00%	N/A	N/A
<u>The Bank</u>						
Total Capital (to risk weighted assets)	\$ 106,528	10.70%	\$ 79,620	8.00%	\$ 99,524	10.00%
Tier 1 Capital (to risk weighted assets)	94,053	9.45%	39,810	4.00%	59,715	6.00%
Tier 1 Capital (to average assets)	94,053	8.29%	45,403	4.00%	56,753	5.00%

(Dollars in thousands)	Actual		Minimum Capital for Capital Adequacy Purposes		Minimum Capital To Be Well Capitalized*	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2007						
<u>The Company</u>						
Total Capital (to risk weighted assets)	\$ 101,661	11.44%	\$ 71,099	8.00%	\$ 88,874	10.00%
Tier 1 Capital (to risk weighted assets)	90,522	10.19%	35,549	4.00%	53,324	6.00%
Tier 1 Capital (to average assets)	90,522	8.84%	40,969	4.00%	N/A	N/A
<u>The Bank</u>						
Total Capital (to risk weighted assets)	\$ 101,332	11.41%	\$ 71,058	8.00%	\$ 88,823	10.00%
Tier 1 Capital (to risk weighted assets)	90,199	10.15%	35,529	4.00%	53,294	6.00%
Tier 1 Capital (to average assets)	90,199	8.81%	40,940	4.00%	51,175	5.00%

* For the Bank to qualify as well capitalized, it must maintain a leverage capital ratio (Tier 1 capital to average assets) of at least 5%. This requirement does not apply to the Company.

Dividends

Neither the Company nor the Bank may declare or pay dividends on its stock if the effect thereof would cause stockholders' equity to be reduced below applicable regulatory capital requirements or if such declaration and payment would otherwise violate regulatory requirements.

As the principal asset of the Company, the Bank currently provides the only source of cash for the payment of dividends by the Company. Under Massachusetts law, trust companies such as the Bank may pay dividends only out of net profits and only to

Table of Contents

the extent that such payments will not impair the Bank's capital stock. Any dividend payment that would exceed the total of the Bank's net profits for the current year plus its retained net profits of the preceding two years would require the Commissioner's approval. The FDIC Improvement Act of 1991 also prohibits a Bank from paying any dividends on its capital stock if the Bank is in default on the payment of any assessment to the FDIC or if the payment of dividends would otherwise cause the Bank to become undercapitalized. These restrictions on the ability of the Bank to pay dividends to the Company may restrict the ability of the Company to pay dividends to the holders of its common stock.

The statutory term "net profits" essentially equates with the accounting term "net income" and is defined under the Massachusetts banking statutes to mean the remainder of all earnings from current operations plus actual recoveries on loans and investments and other assets after deducting from such total all current operating expenses, actual losses, accrued dividends on any preferred stock and all federal and state taxes.

The Company maintains a dividend reinvestment plan (the "DRP"). The DRP enables stockholders, at their discretion, to elect to reinvest dividends paid on their shares of the Company's common stock by purchasing additional shares of common stock from the Company at a purchase price equal to fair market value. Shareholders utilized the DRP to reinvest \$1.0 million, of the \$2.9 million total dividends paid by the Company in 2008, into 85,586 shares of the Company's common stock, and \$1.1 million, of the \$2.5 million total dividends paid by the Company in 2007, into 70,675 shares of the Company's common stock.

(9) Stock-Based Compensation Plans

The Company currently has two individual stock incentive plans (the 1998 plan as amended in 2001, and the 2003 plan). The plans permit the board of directors under various terms to grant both incentive and non-qualified stock options, stock appreciation rights and other rights for the purchase of newly issued shares of common stock to officers and other employees, directors and consultants. These plans also allow for newly issued shares of common stock to be issued with or without restrictions, to officers and other employees, directors and consultants. As of December 31, 2008, 196,631 shares remain available for future grants under these plans.

To date the Company has utilized the plans to issue stock option awards and restricted stock awards to officers and other employees, and stock in lieu of cash fees to directors. No options or other awards of any kind have been granted to consultants.

Total stock-based compensation expense related to these plans was \$519 thousand, \$573 thousand and \$460 thousand for the years ended 2008, 2007 and 2006 respectively. The total tax benefit recognized related to the stock-based compensation expense was \$207 thousand, \$201 thousand and \$139 thousand, for the years ended 2008, 2007 and 2006 respectively.

In February 2005, the Company's shares began trading on the NASDAQ National Market (now the NASDAQ Global Market) under the trading symbol "EBTC", and all stock options and any other equity based compensation granted after this date utilize the Company's NASDAQ Global Market trading price for purposes of determining the fair market value of the common stock on the date of the grant. Prior to February 14, 2005, in the absence of an active trading market for the Company's common stock, the per share exercise price on all stock options granted had been determined on the basis of a fair market valuation provided to the Company by an outside financial advisor, which does not necessarily reflect the actual prices at which shares of the common stock had been purchased and sold in privately negotiated transactions.

Table of Contents*Stock Option Awards*

SFAS 123(R) requires that the stock-based compensation expense recognized in earnings be based on the amount of awards ultimately expected to vest; therefore, a forfeiture assumption must be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. The Company has estimated forfeitures based on historical experience for the portion of the grant which had vested and/or grants already vested based on similarities in the type of options and employee group. Prior to the adoption of SFAS 123(R) on January 1, 2006, the Company was not estimating forfeitures, but was rather adjusting pro forma compensation cost as actual forfeitures occurred, as permitted by SFAS 123. SFAS 123(R) did not require a cumulative adjustment at the time of adoption.

All options that have been granted under the plans generally become exercisable at the rate of 25% per year. In addition, options granted since June 2002 provide for full vesting upon attainment of age 62 while remaining employed with the Bank. All options granted prior to 1998 expire 10 years from the grant date. Options granted from 1998 through 2004 and in 2007 and 2008 expire 7 years from the grant date, and options granted in 2005 and 2006 expire 8 years from the grant date.

Under the terms of the plans, incentive stock options may not be granted at less than 100% of the fair market value of the shares on the date of grant and may not have a term of more than ten years. Any shares of common stock reserved for issuance pursuant to options granted under the 1998 and 2003 plans that are returned to the Company unexercised shall remain available for issuance under such plans. For participants owning 10% or more of the Company's outstanding common stock (of which there are currently none), incentive stock options may not be granted at less than 110% of the fair market value of the shares on the date of grant.

The Company utilizes the Black-Scholes option valuation model in order to determine the per share grant date fair value of option grants. The table below provides a summary of the options granted, fair value, the fair value as a percentage of the market value of the stock at the date of grant and the average assumptions used in the model for the years indicated.

	2008	2007	2006
Options granted	132,000	127,600	9,000
Per share weighted average fair value	\$ 2.47	\$ 3.69	\$ 3.79
Percentage of market value at grant date	19%	22%	22%
Average assumptions used in the model:			
Expected volatility	25%	21%	16%
Expected dividend yield	2.82%	2.03%	1.66%
Expected life in years	5.5	5.5	6.0
Risk-free interest rate	2.61%	4.43%	4.91%

The expected volatility is the anticipated variability in the Company's share price over the expected life of the option. The Company's shares began trading on a public exchange in February 2005 and limited trading has occurred. Management determined the Company's expected volatility by reviewing the historical volatility of peer financial institutions and a banking index, in addition to reviewing the Company's own limited trading history.

The expected dividend yield is the Company's annualized dividend rate divided by its share price at the date of grant.

The expected life represents the period of time that the option is expected to be outstanding. The Company utilized the simplified method and under this method, the expected term equals the vesting term plus the contractual term divided by 2.

The risk-free interest rate is based on the U.S. Treasury rate in effect at the time of grant for a period equivalent to the expected life of the option.

Table of Contents

Stock option transactions during the year ended December 31, 2008 are summarized as follows:

	Options	Wtd. Avg. Exercise Price	Wtd. Avg. Remaining Life	Aggregate Intrinsic Value
Outstanding at December 31, 2007	671,368	\$ 13.89	4.30	
Granted	132,000	12.75		
Exercised	16,199	7.38		
Forfeited	15,838	14.18		
Outstanding December 31, 2008	771,331	13.83	3.70	276,242
Vested and Exercisable at December 31, 2008	537,495	\$ 13.62	2.89	276,242

The aggregate intrinsic value in the table above represents the difference between the closing price of the Company's common stock on December 31, 2008 and the exercise price, multiplied by the number of options. If the closing price was less than the exercise price of the option, no intrinsic value was assigned to the grant. In-the-money vested options total 126,138 at December 31, 2008. The intrinsic value of options vested and exercisable represents the total pretax intrinsic value that would have been received by the option holders had all in-the-money vested option holders exercised their options on December 31, 2008. The intrinsic value will change based on the fair market value of the Company's stock.

Cash received from option exercises was \$119 thousand, \$598 thousand and \$296 thousand in 2008, 2007 and 2006, respectively. Total intrinsic value of options exercised was \$86 thousand, \$1.1 million and \$844 thousand in 2008, 2007 and 2006, respectively.

The actual tax benefit arising during the period for the tax deduction from the disqualifying disposition of shares acquired upon exercise was \$4 thousand, \$16 thousand and \$22 thousand in 2008, 2007, and 2006, respectively.

Compensation expense recognized in association with the stock option awards amounted to \$301 thousand, \$358 thousand and \$243 thousand for the years ended 2008, 2007 and 2006, respectively. The total tax benefit recognized related to the stock option expense was \$118 thousand, \$113 thousand, and \$51 thousand for the years ended 2008, 2007, and 2006, respectively.

As of December 31, 2008, there was \$437 thousand of unrecognized stock-based compensation expense, net of estimated forfeitures, related to non-vested stock options. That cost is expected to be recognized over the remaining weighted average vesting period of 2.3 years.

Restricted Stock Awards

The Company has granted one restricted stock award, comprised of 17,500 shares, issued in September 2005. The grant date fair value of the restricted stock awarded was \$14.25 per share, which reflects the market value of the common stock on the grant date, based on the average of the high and low trade prices on that date. There have been no other restricted stock awards granted and there have been no forfeitures. The

shares granted vest twenty percent per year starting on the first anniversary date of the award. The restricted stock award allows for the receipt of dividends, and the voting of all shares, whether or not vested, throughout the vesting period.

Compensation expense recognized in association with the restricted stock award amounted to \$50 thousand for the each of the years ended December 31, 2008, 2007 and 2006. The total tax benefit recognized related to the restricted stock compensation expense was \$20 thousand for each 2008, 2007 and 2006.

Table of Contents

As of December 31, 2008, 10,500 shares have vested and 7,000 remain unvested. As of December 31, 2008, there remained \$83 thousand of unrecognized compensation expense related to the restricted stock award. That cost is expected to be recognized over the remaining vesting period of 1.7 years.

Director Stock Compensation

The members of the Company's board of directors are offered the choice to receive newly issued shares of the Company's common stock in lieu of cash compensation for attendance at Board and Board Committee meetings. Directors must make an irrevocable election to receive shares of common stock in lieu of cash compensation prior to December 31st of the preceding year. Directors are granted shares of common stock in lieu of cash fees at a per share price which reflects the value of the common stock on the first business day of the year, based on the average of the high and low trade prices of the common stock on that date.

Total Director Compensation expense amounted to \$278 thousand, \$256 thousand and \$265 thousand for the years ended December 31, 2008, 2007 and 2006, respectively.

Included in the 2008 expense was stock compensation of \$168 thousand, which represented 13,013 shares issued to Directors in January 2009, at a fair market value price of \$12.875 per share, which reflected the fair value of the common stock on January 2, 2008.

Included in the 2007 expense was stock compensation of \$165 thousand, which represented 10,739 shares issued to Directors in January 2008, at a fair market value price of \$15.40 per share, which reflected the value of the common stock on January 3, 2007.

Included in the 2006 expense was stock compensation of \$167 thousand, which represented 10,575 shares issued to Directors in January 2007, at a fair market value price of \$15.79 per share, which reflected the value of the common stock on January 3, 2006.

The total tax benefit recognized related to the Director stock compensation expense was \$69 thousand, \$68 thousand and \$68 thousand, for the years ended 2008, 2007 and 2006 respectively.

Table of Contents

(10) Employee Benefit Plans

401(k) Defined Contribution Plan

The Company has a 401(k) defined contribution employee benefit plan. The 401(k) plan allows eligible employees to contribute a base percentage, plus a supplemental percentage, of their earnings to the plan. A portion of the base percentage, as determined by the Compensation Committee of the Board of Directors, is matched by the Company. The percentage matched was 50% in 2008, 2007 and 2006, respectively, up to the first 6% contributed by the employee. The Company's percentage match was increased beginning January 1, 2009 to 60% up to the first 6% contributed by the employee. The Company's total expense for the 401(k) plan match, including any discretionary match as discussed below, was \$424 thousand, \$382 thousand and \$374 thousand, respectively, for the years ended December 31, 2008, 2007, and 2006.

All eligible employees, at least 18 years of age and completing 1 hour of service, may participate. Vesting for the Company's 401(k) plan matching contribution is based on years of service with participants becoming 20% vested on January 1st of the year following their date of hire and each subsequent January 1st increasing pro-rata to 100% vesting on January 1st following five years of service. Amounts not distributable to an employee following termination of employment are used to offset other contributions.

Employee Bonus and Incentive Programs

The Company's bonus and incentive program includes all employees. Bonuses are paid to the employees based on the accomplishment of certain goals and objectives that are determined at the beginning of the fiscal year and approved by the Compensation Committee of the Board of Directors. Prior to 2007, the Company maintained an additional supplemental bonus plan for certain senior officers. The plan provided for payment of cash bonuses based on the achievement of certain earnings per share goals as set by the Compensation Committee.

From time to time the Company may also make an annual discretionary employer contribution to the 401(k) plan of an additional percentage of employee contributions.

In 2008, 2007 and 2006 amounts charged to salaries and benefits under these programs were \$475 thousand, \$1.0 million and \$496 thousand, respectively.

Supplemental Retirement Plan

In 2005 the Company entered into salary continuation and supplemental life insurance agreements (see Supplement Life Insurance below) with three of its senior executives.

The salary continuation agreements (SERPs) provide for a predetermined fixed-cash supplemental retirement benefit, the amount subject to vesting requirements, to be provided for a period of 20 years after the individual reaches a defined retirement age .

This non-qualified plan represents a direct liability of the Company, and as such has no specific assets set aside to settle the benefit obligation. The funded status is the aggregate amount accrued, or the Accumulated Postretirement Benefit Obligation , which is equal to the present value of the retirement benefits to be provided to the employee or any beneficiary in exchange for the employee s service rendered to that date. Because the Company s retirement benefit obligations provide for predetermined fixed-cash payments the Company does not have any unrecognized costs to be included as a component of accumulated other comprehensive income.

The amounts charged to expense for the SERPs was \$503 thousand, \$678 thousand and \$626 thousand, for the years ended December 31, 2008, 2007 and 2006, respectively. The Company anticipates accruing an additional \$341 thousand to the plan for the year ending December 31, 2009.

Table of Contents

The following table provides a reconciliation of the changes in the supplemental retirement benefit obligation and the net periodic benefit cost for the years ended December 31:

(Dollars in thousands)	2008		2007		2006	
<i>Reconciliation of benefit obligation:</i>						
Benefit obligation at beginning of year	\$	2,477	\$	1,799	\$	1,173
Service cost		339		552		539
Interest cost		164		126		87
Benefits paid		(110)				
Benefit obligation at end of year	\$	2,870	\$	2,477	\$	1,799
<i>Funded status:</i>						
Accrued liability as of December 31	\$	(2,870)	\$	(2,477)	\$	(1,799)
Discount rate used for benefit obligation		6.00%		6.00%		6.00%
<i>Net periodic benefit cost:</i>						
Service cost	\$	339	\$	552	\$	539
Interest cost		164		126		87
	\$	503	\$	678	\$	626

Management utilizes the Moody's 20 year A and AA corporate bond rates to evaluate the reasonableness of the discount rate used. The Company recognizes that the duration of the benchmark should reflect the timing of the cash flows of each benefit obligation. However, since the duration of most fixed income investments do not exceed 20 years and the cash flows on the benefit obligations may extend to 30-40 years, it was resolved that the Company shall assume a long term duration for all participants.

Benefits expected to be paid in each of the next five years and in the aggregate five years thereafter:

(Dollars in thousands)	
2009	\$ 181
2010	244
2011	276
2012	276
2013	276
2014-2018	1,379

Bank Owned Life Insurance

The Company has purchased bank owned life insurance (BOLI) on certain senior officers. The cash surrender value carried on the balance sheet at December 31, 2008 and December 31, 2007 amounted to \$13.3 million and \$12.7 million, respectively. There are no associated surrender charges under the outstanding policies.

Table of Contents*Supplemental Life Insurance*

For certain senior officers on whom the Bank owns BOLI, the Bank has provided supplemental life insurance which provides a death benefit to the officer's designated beneficiaries.

On January 1, 2008, the Company adopted the Financial Accounting Standards Board's Emerging Issues Task Force Issue No. 06-4 (EITF No. 06-4) Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split Dollar Life Insurance Arrangements. EITF No. 06-4 requires that an employer recognize a liability for future benefits associated with an endorsement split-dollar life insurance arrangement that provides a benefit to an employee that extends to postretirement periods. Upon adoption of EITF No. 06-4, the Company recorded a cumulative-effect adjustment to retained earnings of \$1.0 million.

This non-qualified plan represents a direct liability of the Company, and as such has no specific assets set aside to settle the benefit obligation. The funded status is the aggregate amount accrued, or the Accumulated Postretirement Benefit Obligation, which is the present value of the future benefits associated with this arrangement.

The following table provides a reconciliation of the changes in the supplemental life insurance plan and the net periodic benefit cost for the years ended December 31:

(Dollars in thousands)	2008
<i>Reconciliation of benefit obligation:</i>	
Benefit obligation at beginning of year	\$
Cumulative effect adjustment to retained earnings	1,010
Service cost	20
Interest cost	62
Benefit obligation at end of year	\$ 1,092
<i>Funded status:</i>	
Accrued liability as of December 31	\$ (1,092)
Discount rate used for benefit obligation	6.00%
<i>Net periodic benefit cost:</i>	
Service cost	\$ 20
Interest cost	62
	\$ 82

For management's method of evaluating the discount rate, refer to the Supplemental Retirement Plan.

The benefit expense of the postretirement cost of insurance for split dollar insurance coverage amounted to \$82 thousand for the year ended December 31, 2008 and \$0 for both of the years ended December 31, 2007 and December 31, 2006. The Company anticipates accruing an

additional \$87 thousand to the plan for the year ending December 31, 2009.

See note 9 Stock-Based Compensation Plans above, for additional information regarding employee benefits offered in the form of stock option awards.

Table of Contents**(11) Income Taxes**

The components of income tax expense for the years ended December 31 were calculated using the asset and liability method as follows:

(Dollars in thousands)	2008		2007		2006	
Current tax expense:						
Federal	\$	3,362	\$	4,464	\$	4,578
State		1,109		1,665		1,774
Total current tax expense		4,471		6,129		6,352
Deferred tax (benefit)/ expense:						
Federal		(2,155)		(853)		(813)
State		33		(231)		(196)
Total deferred tax benefit		(2,122)		(1,084)		(1,009)
Total income tax expense	\$	2,349	\$	5,045	\$	5,343

On July 3, 2008, the Commonwealth of Massachusetts enacted a law that included reducing future tax rates on net income applicable to financial institutions. For tax years beginning on or after January 1, 2010, the tax rate drops from the current rate of 10.5% to 10%, for tax years beginning on or after January 1, 2011 the rate drops to 9.5%, and to 9% for tax years beginning on or after January 1, 2012 and thereafter. Therefore, the Company recorded additional income tax expense of approximately \$130 thousand in the third quarter to adjust the Company's net deferred tax assets down to the future realizable tax rates.

In the fourth quarter of 2008, the Company recorded the OTTI charge on certain equity securities contained in its investment portfolio to reflect the impact of recent declines in the equity markets. The gross charge amounted to \$3.7 million and resulted in the Company booking a related deferred tax benefit of \$1.3 million.

The provision for income taxes differs from the amount computed by applying the statutory federal income tax rate as follows:

(Dollars in thousands)	2008		2007		2006	
	Amount	%	Amount	%	Amount	%
Computed income tax expense at statutory rate	\$ 2,685	34.0%	\$ 5,081	34.0%	\$ 4,956	34.0%
State income taxes, net of federal tax benefit	754	9.6%	946	6.3%	1,041	7.1%
Tax exempt income, net of disallowance	(1,122)	(14.2)%	(925)	(6.2)%	(770)	(5.3)%
Other	32	0.4%	(57)	(0.3)%	116	0.9%

Table of Contents

At December 31 the tax effects of each type of income and expense item that give rise to deferred taxes are:

(Dollars in thousands)	2008	2007
Deferred tax asset:		
Allowance for loan losses	\$ 6,160	\$ 5,570
Depreciation	1,959	1,950
Other-than-temporary impairment on equity securities	1,259	
Supplemental employee retirement plans	1,157	1,019
Non-accrual interest	487	359
Non-qualified stock option expense	279	166
Other	24	2
Total	11,325	9,066
Deferred tax liability:		
Goodwill	940	806
Net unrealized gains on investments securities	608	113
Deferred origination costs	394	370
Restricted Stock	34	55
Total	1,976	1,344
Net deferred tax asset	\$ 9,349	\$ 7,722

The Company paid federal income taxes for the 2008, 2007, and 2006 of \$3.7 million, \$4.7 million and \$4.3 million, respectively. In addition, management has the ability to sell any of the securities affected by the OTTI charge. A sale of the securities would ensure that, for tax purposes, a portion of the losses on sales could be applied against investment gains realized on the portfolio during the past two years, before the ability to carry back losses against these gains expires. Management believes that it is more likely than not that current recoverable income taxes and the expectation of future taxable income, based on the Company's history of reporting taxable income, will generate sufficient taxable income to realize the deferred tax asset existing at December 31, 2008.

The Company did not have any unrecognized tax benefits accrued as income tax liabilities or receivables or as deferred tax items at December 31, 2008 or December 31, 2007. The Company's tax years beginning after December 31, 2005 are open to federal and state income tax examinations.

(12) Related Party Transactions

The Bank leases its headquarters from a realty trust, the sole beneficiary of which is a limited partnership in which one of the Company's Directors, who became a member of the Board of Directors in 2008, holds a 13.7% limited partnership interest. Total amounts paid by the Bank to this realty trust for annual rent, which the Company believes approximates a market rate, for the years ended December 31, 2008, 2007, and 2006, were \$237 thousand, \$242 thousand, and \$193 thousand, respectively.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The Bank formerly leased another building used for operations from another realty trust, the sole beneficiary of which was a general partnership in which two of the Company's Directors (one of whom was the Director who joined the Board in 2008) held a combined 18.6% general partnership interest. The Bank purchased this building in 2007 for \$2.8 million. This purchase price was based on an independent market appraisal of the building and the transaction was reviewed and approved by the Company's Board of Directors, with the one Director who had a financial interest in the transaction and was then a current member of the Board abstaining from the approval process. Prior to the Bank's purchase of the building, the Bank paid total amounts to this realty trust for annual rent, which the Company believes approximated a market rate, for the years ended December 31, 2007 and 2006, of \$331 thousand and \$428 thousand, respectively.

Table of Contents

The Bank also formerly leased a parking lot that was used by the Bank's employees from a third realty trust in which the Director who joined the Board in 2008 held a 25% beneficial interest. The Bank purchased this parking lot in 2007 for \$187,500, which the Company believes approximated fair market value. Prior to the Bank's purchase of the parking lot, the Bank paid total amounts to this realty trust for annual rent, which the Company believes approximated a market rate, for the years ended December 31, 2007 and 2006, of \$3 thousand and \$3 thousand, respectively.

See note 3 Loans and Loans Held for Sale above, for information regarding loans to related parties.

(13) Commitments, Contingencies and Financial Instruments with Off-Balance Sheet Risk and Concentrations of Credit Risk

The Company is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to originate loans, standby letters of credit and unadvanced lines of credit.

The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheets. The contract amounts of these instruments reflect the extent of involvement the Company has in the particular classes of financial instruments.

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for loan commitments and standby letters of credit is represented by the contractual amounts of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

Financial instruments with off-balance sheet credit risk at December 31, 2008 and 2007 are as follows:

(Dollars in thousands)	2008	2007
Commitments to originate loans	\$ 32,448	\$ 15,323
Commitments to originate loans to be sold	2,331	2,104
Commitments to sell loans	3,927	2,371
Standby letters of credit	17,197	14,780
Unadvanced portions of consumer loans (including credit card loans and overdraft protection lines)	3,710	4,157
Unadvanced portions of construction loans (cmml & resid)	64,976	80,232
Unadvanced portions of home equity lines	55,494	52,755
Unadvanced portions of commercial loans and lines	164,709	146,041

Commitments to originate loans are agreements to lend to a customer provided there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

necessary by the Company upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies, but may include security interests in mortgages, accounts receivable, inventory, property, plant and equipment and income-producing properties.

The Company originates residential mortgage loans under agreements to sell such loans, generally with servicing released. All loans sold are currently sold without recourse, subject to an early payment default period covering the first four payments for certain loan sales. At December 31, 2008 and 2007, the Company had commitments to sell loans totaling \$3.9 million and \$2.4 million respectively.

Table of Contents

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance by a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. If the letter of credit is drawn upon the Company creates a loan for the customer with the same criteria associated with similar loans. The fair value of these commitments were estimated to be the fees charged to enter into similar agreements. The estimated fair value of these commitments carried on the balance sheet was \$12 thousand and \$18 thousand at December 31, 2008 and 2007, respectively. These amounts are amortized to income over the life of the letters of credit, typically one year.

The Company manages its loan portfolio to avoid concentration by industry or loan size to minimize its credit risk exposure. Commercial loans may be collateralized by the assets underlying the borrower's business such as accounts receivable, equipment, inventory and real property. Residential mortgage and home equity loans are secured by the real property financed. Consumer loans such as installment loans are generally secured by the personal property financed. Credit card loans are generally unsecured. Commercial real estate loans are generally secured by the underlying real property and rental agreements.

The Bank is required by the FRB to maintain in reserves certain amounts of vault cash and/or deposits with the FRB. The average daily reserve requirement included in Cash and Due from Banks was approximately \$858 thousand and \$481 thousand, based on the two week computation periods encompassing December 31, 2008, and 2007, respectively.

The Company is involved in various legal proceedings incidental to its business. After review with legal counsel, management does not believe resolution of any present litigation will have a material adverse effect on the financial condition or results of operations of the Company.

(14) Fair Values of Financial Instruments

On January 1, 2008, the Company adopted the Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS No. 157). This Statement provides a single definition of fair value and establishes a framework for measuring fair value in generally accepted accounting principles, with the intention of increasing consistency and comparability in fair value measurements. The application of this Statement expanded disclosure requirements about fair value measurements. However, the adoption of SFAS No. 157 did not require any new fair value measurements, as the Statement applies under other existing accounting pronouncements that require or permit fair value measurements. In accordance with FASB Staff Position No. 157-2, Effective Date of FASB Statement No. 157, the Company has deferred the application of SFAS No. 157 to non-financial assets such as goodwill and real property held for sale, and non-financial liabilities until January 1, 2009.

SFAS No. 157 defines the fair value to be the price which a seller would receive in an orderly transaction between market participants (an exit price). This Statement also establishes a fair value hierarchy segregating fair value measurements using three levels of inputs: (Level 1) quoted market prices in active markets for identical assets or liabilities; (Level 2) significant other observable inputs, including quoted prices for similar items in active markets, quoted prices for identical or similar items in market that are not active, inputs such as interest rates and yield curves, volatilities, prepayment speeds, credit risks and default rates which provide a reasonable basis for fair value determination or inputs derived principally from observed market data; (Level 3) significant unobservable inputs for situations in which there is little, if any, market activity for the asset or liability. Unobservable inputs must reflect reasonable assumptions that market participants would use in pricing the asset or liability, which are developed on the basis of the best information available under the circumstances.

Table of Contents

The following table summarizes significant assets and liabilities carried at fair value at December 31, 2008 (there were no items measured using level 3 inputs):

(Dollars in thousands)	Fair Value		Fair Value Measurements using:	
			(level 1)	(level 2)
Assets measured on a recurring basis:				
Available for sale securities	\$	154,633	\$	5,995
			\$	148,638
Assets measured on a non-recurring basis:				
Impaired loans	\$	1,272	\$	1,272

Investment securities that are considered available for sale are carried at fair value in accordance with SFAS No. 115 (as amended). The Company utilizes third-party pricing vendors to provide valuations on its fixed income securities. These vendors generally determine fair value prices based upon pricing matrices utilizing observable market data inputs for similar or benchmark securities. The Company's equity portfolio fair value is measured based on quoted market prices for the shares. Net unrealized appreciation and depreciation on investments available for sale, net of applicable income taxes, are reflected as a component of accumulated other comprehensive income. The Bank is required to purchase FHLB stock in association with outstanding advances from the FHLB; this stock is classified as a restricted investment and carried at cost.

Impaired loan balances in the table above represent those collateral dependent impaired commercial loans where management has estimated the credit loss by comparing the loan's carrying value against the expected realizable fair value of the collateral, in accordance with SFAS No. 114 (as amended). A specific allowance is assigned to the impaired loan for the amount of estimated credit loss. The increase in specific allowances assigned to collateral dependent impaired loans was \$277 thousand for the year ended December 31, 2008.

In addition to disclosures regarding the measurement of assets and liabilities carried at fair value on the balance sheet, the Company is also required to disclose fair value information about financial instruments for which it is practicable to estimate that value, whether or not recognized on the balance sheet. In cases where quoted fair values are not available, fair values are based upon estimates using various valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. The following methods and assumptions were used by the Company in estimating fair values of its financial instruments:

The respective carrying values of certain financial instruments approximated their fair value, as they were short-term in nature or payable on demand. These include cash and due from banks, total short-term investments, accrued interest receivable, repurchase agreements, accrued interest payable and non-certificate deposit accounts.

Investments: Fair values for investments were based on quoted market prices, where available, as provided by third-party accounting and pricing vendors. If quoted market prices were not available, fair values provided by the vendors were based on quoted market prices of comparable instruments in active markets and/or based on a matrix pricing methodology which employs The Bond Market Association's standard calculations for cash flow and price/yield analysis, live benchmark bond pricing and terms/condition data available from major pricing sources. Management regards the inputs and methods used by third party pricing vendors to be Level 2 inputs and methods as defined in the fair value hierarchy provided in SFAS No. 157.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The carrying amount of FHLB stock reported approximates fair value. If the FHLB stock is redeemed, the Company will receive an amount equal to the par value of the stock. The FHLB is currently operating with retained earnings below its target level. The FHLB has instituted a plan to increase retained earnings which includes suspending its quarterly dividend and a moratorium on the repurchase of excess capital stock from member banks, among other programs. If further deterioration in the FHLB financial condition or capital levels occurs, the FHLB capital stock may become other-than-temporarily impaired to some degree.

Table of Contents

Loans: The fair value of loans was determined using discounted cash flow analysis, using interest rates currently being offered by the Company. The incremental credit risk for non-accrual loans was considered in the determination of the fair value of the loans.

Commitments: The fair values of the unused portion of lines of credit and letters of credit were estimated to be the fees currently charged to enter into similar agreements. Commitments to originate non-mortgage loans were short-term and were at current market rates and estimated to have no significant change in fair value.

Financial liabilities: The fair values of certificates of deposit and FHLB borrowings were estimated using discounted cash flow analysis using rates offered by the Bank, or advance rates offered by the FHLB on December 31, 2008 for similar instruments. The fair value of junior subordinated debentures was estimated using discounted cash flow analysis using a market rate of interest at December 31, 2008.

Limitations: The estimates of fair value of financial instruments were based on information available at December 31, 2008 and 2007 and are not indicative of the fair market value of those instruments as of the date of this report. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no active market exists for a portion of the Company's financial instruments, fair value estimates were based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates were based on existing on- and off-balance sheet financial instruments without an attempt to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments, including premises and equipment and foreclosed real estate.

Table of Contents

In addition, the tax ramifications related to the realization of the unrealized appreciation and depreciation can have a significant effect on fair value estimates and have not been considered in any of the estimates. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

The carry value and estimating fair values of the Company's financial instruments as of December 31, are summarized as follows:

(Dollars in thousands)	2008		2007

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors

Enterprise Bancorp, Inc.:

We have audited the accompanying consolidated balance sheets of Enterprise Bancorp, Inc. and subsidiaries (the Company) as of December 31, 2008 and 2007, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2008. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Enterprise Bancorp, Inc. and subsidiaries as of December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2008, in conformity with U.S. generally accepted accounting principles.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 16, 2009 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

The Board of Directors

Enterprise Bancorp, Inc:

We have audited Enterprise Bancorp, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Enterprise Bancorp, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

In our opinion, Enterprise Bancorp, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Enterprise Bancorp, Inc and subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2008, and our report dated March 16, 2009 expressed an unqualified opinion on those consolidated financial statements.

Item 9. Changes In and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains a set of disclosure controls and procedures designed to ensure that the information required to be disclosed in reports that it files or submits to the SEC under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

The Company carried out an evaluation as of the end of the period covered by this report, under the supervision and with the participation of the Company's management, including its chief executive officer and chief financial officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(b). Based upon that evaluation, the Company's chief executive officer and chief financial officer concluded that the Company's disclosure controls and procedures are effective.

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements. All internal control systems, however, no matter how well designed, have inherent limitations and may not prevent or detect misstatement. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2008. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control-Integrated Framework. Based on management's assessment, the Company believes that, as of December 31, 2008, the Company's internal control over financial reporting is effective based on these criteria.

The Company's independent registered public accounting firm has issued a report on the effectiveness of Company's internal control over financial reporting, which appears on page 102 of this report.

Changes in Internal Control Over Financial Reporting

There has been no change in the Company's internal control over financial reporting that has occurred during the Company's most recent fiscal quarter (i.e., the three months ended December 31, 2008) that has materially affected, or is reasonably likely to materially affect, such internal controls.
