**UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION**

WASHINGTON, D.C. 20549

**FORM 10-Q**

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES  
EXCHANGE ACT OF 1934**

For the quarterly period ended March 31, 2017

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES  
EXCHANGE ACT OF 1934**

For the transition period from      to

Commission File Number 001-16625

**BUNGE LIMITED**

(Exact name of registrant as specified in its charter)

Edgar Filing: Bunge LTD - Form 10-Q

**Bermuda**  
(State or other jurisdiction of incorporation or organization)

**98-0231912**  
(I.R.S. Employer Identification No.)

**50 Main Street, White Plains, New York**  
(Address of principal executive offices)

**10606**  
(Zip Code)

**(914) 684-2800**  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of large accelerated filer, accelerated filer, smaller reporting company and emerging growth company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer   
Non-accelerated filer   
(Do not check if a smaller reporting company)

Accelerated filer   
Smaller reporting company   
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Securities Exchange Act of 1934). Yes  No

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes  No

As of April 28, 2017 the number of shares issued of the registrant was:

Common shares, par value \$.01 per share: 140,395,133

Table of Contents

**BUNGE LIMITED AND SUBSIDIARIES**

**NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**(Unaudited)**

**1. BASIS OF PRESENTATION AND PRINCIPLES OF CONSOLIDATION**

The accompanying unaudited condensed consolidated financial statements include the accounts of Bunge Limited ( Bunge ), its subsidiaries and variable interest entities ( VIEs ) in which Bunge is considered to be the primary beneficiary, and as a result, include the assets, liabilities, revenues and expenses of all entities over which Bunge exercises control. The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ( U.S. GAAP ) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X under the Securities Exchange Act of 1934, as amended ( Exchange Act ). Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to Securities and Exchange Commission ( SEC ) rules. In the opinion of management, all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation have been included. The condensed consolidated balance sheet at December 31, 2016 has been derived from Bunge's audited consolidated financial statements at that date. Operating results for the three months ended March 31, 2017 are not necessarily indicative of the results to be expected for the year ending December 31, 2017. The financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto for the year ended December 31, 2016, forming part of Bunge's 2016 Annual Report on Form 10-K filed with the SEC on February 28, 2017.

**2. ACCOUNTING PRONOUNCEMENTS**

*New Accounting Pronouncements* In March 2017, the Financial Accounting Standards Board ( FASB ) issued ASU 2017-08, *Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities*. The new guidance shortens the premium amortization period for certain callable debt securities to the earliest call date. The new guidance does not require an accounting change for securities held at a discount, which will continue to be amortized to maturity. The guidance is effective for annual periods beginning after December 15, 2018, including interim periods within those annual periods. Early adoption is permitted. The new requirements should be implemented using a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. The adoption of this standard is not expected to have a material impact on Bunge's consolidated financial statements.

In March 2017, the FASB issued ASU 2017-07, *Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost*, which changes the presentation of net periodic benefit cost related to employer sponsored defined benefit plans and other postretirement benefits. Service cost should be included in the same income statement line item as other compensation costs arising from services rendered during the period, while other components of net periodic benefit pension cost should be presented separately outside of operating income. Additionally, only service costs may be capitalized in assets. The standard is effective for annual periods beginning after December 15, 2017, including interim periods within those annual periods. Early adoption is permitted. Entities

## Edgar Filing: Bunge LTD - Form 10-Q

should apply the guidance on the presentation of the components of net periodic benefit cost in the income statement retrospectively. The guidance limiting the capitalization of net periodic benefit cost in assets to the service cost component should be applied prospectively. The adoption of this standard is not expected to have a material impact on Bunge's consolidated financial statements.

In February 2017, the FASB issued ASU 2017-05, *Other Income Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20): Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets*. The new guidance clarifies the scope of Subtopic 610-20 on the sale or transfer of nonfinancial assets to noncustomers, including partial sales. The standard is effective for annual periods beginning after December 15, 2017, including interim periods within those annual periods. Early adoption is permitted. The new requirements may be implemented either retrospectively to each period presented in the financial statements (i.e., the full retrospective approach), or retrospectively with a cumulative effect adjustment to retained earnings at the date of initial application (i.e., the modified retrospective approach). The adoption of this standard is not expected to have a material impact on Bunge's consolidated financial statements.

Table of Contents

In January 2017, the FASB issued ASU 2017-04, *Intangibles - Goodwill and Other (Topic 350) - Simplifying the Test for Goodwill Impairment*. The new guidance eliminates Step 2 from the goodwill impairment test. Instead an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The standard is effective for annual or interim impairment tests in fiscal years beginning after December 15, 2019. Early adoption is permitted. The new requirements should be implemented on a prospective basis. The adoption of this standard is not expected to have a material impact on Bunge's consolidated financial statements.

In January 2017, the FASB issued ASU 2017-01, *Business Combinations (Topic 805) - Clarifying the Definition of a Business*. The amendments provide that when substantially all of the fair value of the gross assets acquired (or disposed of) is concentrated in a single identifiable asset or a group of similar identifiable assets, the set is not a business. Otherwise, to be considered a business, a set must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create output. The standard is effective for annual periods beginning after December 15, 2017, including interim periods within those annual periods. Early adoption is permitted. The new requirements should be implemented on a prospective basis. The adoption of this standard is not expected to have a material impact on Bunge's consolidated financial statements.

**Recently Adopted Accounting Pronouncements** - In October 2016, the FASB issued ASU 2016-17, *Consolidation (Topic 810), Interests Held through Related Parties That Are under Common Control*, which provides that a single decision maker is not required to consider indirect interests held through related parties that are under common control with the decision maker to be equivalents of direct interests in their entity. The new guidance is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Early adoption is permitted. Bunge adopted this ASU upon its effective date of January 1, 2017 and the adoption did not have a material impact on Bunge's consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, *Compensation - Stock Compensation (Topic 718), Improvements to Employee Share-Based Payment Accounting*. This update identifies areas for simplification involving several aspects of accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, an option to recognize gross stock compensation expense with actual forfeitures recognized as they occur, as well as certain classifications on the statement of cash flows. The new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. Bunge adopted this ASU upon its effective date of January 1, 2017 and the adoption did not have a material impact on Bunge's consolidated financial statements.

In July 2015, the FASB issued ASU 2015-11, *Inventory (Topic 330), Simplifying the Measurement of Inventory*, which requires entities that measure inventory using the first-in, first-out or average cost methods to measure inventory at the lower of cost and net realizable value. Net realizable value is defined as estimated selling price in the ordinary course of business less reasonably predictable costs of completion, disposal and transportation. The update is effective for fiscal years beginning after December 15, 2016 on a prospective basis, with earlier application permitted. Bunge adopted this ASU upon its effective date of January 1, 2017 and the adoption did not have a material impact on Bunge's consolidated financial statements.

**3. BUSINESS ACQUISITIONS**

## Edgar Filing: Bunge LTD - Form 10-Q

On February 28, 2017, Bunge closed on the acquisition of two oilseed processing plants and related operations in the Netherlands and France pursuant to an agreement with Cargill Inc. Bunge paid a total purchase price of approximately \$344 million, subject to adjustments for working capital. The preliminary purchase price allocation resulted in \$109 million allocated to property, plant and equipment, \$125 million to other net assets and liabilities and \$7 million to finite-lived intangible assets. The transaction also resulted in \$103 million of goodwill allocated to Bunge's agribusiness operations.

#### **4. TRADE STRUCTURED FINANCE PROGRAM**

Bunge engages in various trade structured finance activities to leverage the value of its trade flows across its operating regions. For the three months ended March 31, 2017 and 2016, the net return from these activities, was \$11 million and \$15 million, respectively, and were included as a reduction of cost of goods sold in the

Table of Contents

accompanying consolidated statements of income. These activities include programs under which Bunge generally obtains U.S. dollar-denominated letters of credit ( LCs ) (each based on an underlying commodity trade flow) from financial institutions, and time deposits denominated in either the local currency of the financial institutions counterparties or in U.S. dollars, as well as foreign exchange forward contracts, all of which are subject to legally enforceable set-off agreements. The LCs and foreign exchange contracts are presented within the line item letter of credit obligations under trade structured finance program on the condensed consolidated balance sheets as of March 31, 2017 and December 31, 2016.

The table below summarizes the assets and liabilities included in the condensed consolidated balance sheets and the associated fair value amounts at March 31, 2017 and December 31, 2016, related to the program. The fair values approximated the carrying amount of the related financial instruments.

(US\$ in millions)	March 31, 2017	December 31, 2016
<b>Current assets:</b>		
Carrying value of time deposits	\$ 26	\$ 64
Fair value (Level 2 measurement) of time deposits	\$ 26	\$ 64
<b>Non-current assets:</b>		
Carrying value of time deposits	\$ 464	\$ 464
Fair value (Level 2 measurement) of time deposits	\$ 464	\$ 464
<b>Current liabilities:</b>		
Carrying value of letters of credit obligations and foreign exchange contracts	\$ 490	\$ 528
Fair value (Level 2 measurement) of letters of credit obligations	\$ 489	\$ 528
Fair value (Level 2 measurement) of foreign exchange forward contracts-(gains) losses	1	
Total fair value (Level 2 measurement) of letters of credit obligations and foreign exchange contracts	\$ 490	\$ 528

As of March 31, 2017 and December 31, 2016, time deposits, LCs, and foreign exchange contracts of \$6,110 million and \$5,732 million, respectively, were presented net on the condensed consolidated balance sheets as the criteria of ASC 210-20, *Offsetting*, had been met. At March 31, 2017 and December 31, 2016, time deposits, including those presented on a net basis, carried weighted-average interest rates of 2.45% and 2.36%, respectively. During the three months ended March 31, 2017 and 2016, total net proceeds from issuances of LCs were \$1,604 million and \$1,396 million, respectively. These cash inflows are offset by the related cash outflows resulting from placement of the time deposits and repayment of the LCs. All cash flows related to the programs are included in operating activities in the condensed consolidated statements of cash flows.

## 5. INVENTORIES

Inventories by segment are presented below. Readily marketable inventory ( RMI ) are agricultural commodity inventories, such as soybeans, soybean meal, soybean oil, corn and wheat, carried at fair value because of their commodity characteristics, widely available markets and international pricing mechanisms. All other inventories are carried at lower of cost and net realizable value.

Edgar Filing: Bunge LTD - Form 10-Q

(US\$ in millions)	March 31, 2017	December 31, 2016
Agribusiness (1)	\$ 4,138	\$ 3,741
Edible Oil Products (2)	432	404
Milling Products	190	167
Sugar and Bioenergy (3)	354	406
Fertilizer	74	55
<b>Total</b>	<b>\$ 5,188</b>	<b>\$ 4,773</b>

Table of Contents

(1) Includes RMI of \$3,979 million and \$3,593 million at March 31, 2017 and December 31, 2016, respectively. Of these amounts \$2,990 million and \$2,523 million can be attributable to merchandising activities at March 31, 2017 and December 31, 2016, respectively.

(2) Includes RMI of bulk soybean and canola oil in the aggregate amount of \$108 million and \$123 million at March 31, 2017 and December 31, 2016, respectively.

(3) Includes sugar RMI, which can be attributable to Bunge's trading and merchandising business of \$50 million and \$139 million at March 31, 2017 and December 31, 2016, respectively.

## 6. OTHER CURRENT ASSETS

Other current assets consist of the following:

(US\$ in millions)	March 31, 2017	December 31, 2016
Unrealized gains on derivative contracts, at fair value	\$ 1,907	\$ 1,327
Prepaid commodity purchase contracts (1)	252	273
Secured advances to suppliers, net (2)	637	601
Recoverable taxes, net	448	467
Margin deposits	326	251
Marketable securities, at fair value and other short-term investments	151	94
Deferred purchase price receivable, at fair value (3)	95	87
Prepaid expenses	156	148
Other	475	397
<b>Total</b>	<b>\$ 4,447</b>	<b>\$ 3,645</b>

(1) Prepaid commodity purchase contracts represent advance payments against contracts for future delivery of specified quantities of agricultural commodities.

(2) Bunge provides cash advances to suppliers, primarily Brazilian farmers of soybeans and sugarcane, to finance a portion of the suppliers' production costs. Bunge does not bear any of the costs or operational risks associated with the related growing crops. The advances are largely collateralized by future crops and physical assets of the suppliers, carry a local market interest rate and settle when the farmer's crop is harvested and sold. The secured advances to farmers are reported net of allowances of \$10 million at March 31, 2017 and \$1 million at December 31, 2016. There were no significant changes in the allowance at March 31, 2017 and December 31, 2016, respectively.

Interest earned on secured advances to suppliers of \$16 million and \$11 million, respectively, for the three months ended March 31, 2017 and 2016 is included in net sales in the condensed consolidated statements of income.

(3) Deferred purchase price receivable represents additional credit support for the investment conduits in Bunge's accounts receivables sales program (see Note 12).

*Marketable Securities and Other Short-Term Investments* - The Company invests in foreign government securities, corporate debt securities, deposits, and other securities. The following is a summary of amounts recorded on the condensed consolidated balance sheets for marketable securities and other short-term investments.

(US\$ in millions)	March 31, 2017	December 31, 2016
Foreign government securities	\$ 84	\$ 28
Corporate debt securities	60	57
Certificate of deposits/time deposits	5	7
Other	2	2
Total marketable securities and other short-term investments	\$ 151	\$ 94

As of March 31, 2017, total marketable securities and other short-term investments includes \$21 million of assets classified as available for sale, \$123 million as trading and \$7 million as other short-term investments. As of December 31, 2016, total marketable securities and other short-term investments includes \$22 million of assets classified as available for sale, \$63 million as trading and \$9 million as other short-term investments. Held-to-maturity

Table of Contents

foreign government and corporate debt securities and certificate of deposits/time deposits are expected to be converted to cash within a twelve month period and are therefore classified as current. Due to the short term nature of these investments, carrying value approximates fair value.

## 7. OTHER NON-CURRENT ASSETS

Other non-current assets consist of the following:

(US\$ in millions)	March 31, 2017	December 31, 2016
Recoverable taxes, net (1)	\$ 155	\$ 139
Judicial deposits (1)	139	129
Other long-term receivables	26	23
Income taxes receivable (1)	271	261
Long-term investments	62	54
Affiliate loans receivable	27	25
Long-term receivables from farmers in Brazil, net (1)	146	133
Other	175	163
<b>Total</b>	<b>\$ 1,001</b>	<b>\$ 927</b>

(1) These non-current assets arise primarily from Bunge's Brazilian operations and their realization could take several years.

*Recoverable taxes, net*-Recoverable taxes are reported net of allowances of \$27 million and \$32 million at March 31, 2017 and December 31, 2016, respectively.

*Judicial deposits*-Judicial deposits are funds that Bunge has placed on deposit with the courts in Brazil. These funds are held in judicial escrow relating to certain legal proceedings pending legal resolution and bear interest at the SELIC rate, which is the benchmark rate of the Brazilian central bank.

*Income taxes receivable*-Income taxes receivable includes overpayments of current income taxes plus accrued interest. These income tax prepayments are expected to be primarily utilized for settlement of future income tax obligations. Income taxes receivable in Brazil bear interest at the SELIC rate.

*Affiliate loans receivable*-Affiliate loans receivable are primarily interest bearing receivables from unconsolidated affiliates with a remaining maturity of greater than one year.

*Long-term receivables from farmers in Brazil, net of reserves*-Bunge provides financing to farmers in Brazil, primarily through secured advances against farmer commitments to deliver agricultural commodities (primarily soybeans) upon harvest of the then-current year's crop and through credit sales of fertilizer to farmers.

The table below summarizes Bunge's recorded investment in long-term receivables from farmers in Brazil.

(US\$ in millions)	March 31, 2017	December 31, 2016
Legal collection process (1)	\$ 150	\$ 144
Renegotiated amounts (2)	62	52
Other long-term receivables	45	46
Total	\$ 257	\$ 242

---

(1) All amounts in legal process are considered past due upon initiation of legal action.

(2) All renegotiated amounts are current on repayment terms.

Table of Contents

The average recorded investment in long-term receivables from farmers in Brazil for the three months ended March 31, 2017 and the year ended December 31, 2016 was \$255 million and \$235 million, respectively. The table below summarizes Bunge's recorded investment in long-term receivables from farmers in Brazil and the related allowance amounts.

(US\$ in millions)	March 31, 2017		December 31, 2016	
	Recorded Investment	Allowance	Recorded Investment	Allowance
<b>For which an allowance has been provided:</b>				
Legal collection process	\$ 84	\$ 82	\$ 84	\$ 78
Renegotiated amounts	29	29	36	31
<b>For which no allowance has been provided:</b>				
Legal collection process	66		60	
Renegotiated amounts	33		16	
Other long-term receivables	45		46	
<b>Total</b>	<b>\$ 257</b>	<b>\$ 111</b>	<b>\$ 242</b>	<b>\$ 109</b>

The table below summarizes the activity in the allowance for doubtful accounts related to long-term receivables from farmers in Brazil.

(US\$ in millions)	Three Months Ended March 31,	
	2017	2016
Beginning balance	\$ 109	\$ 100
Bad debt provisions	1	
Recoveries	(2)	
Foreign exchange translation	3	8
Ending balance	\$ 111	\$ 108

## 8. INCOME TAXES

Income tax expense is provided on an interim basis based on management's estimate of the annual effective income tax rate and includes the tax effects of certain discrete items, such as changes in tax laws or tax rates or other unusual or nonrecurring tax adjustments in the interim period in which they occur. In addition, jurisdictions with a projected loss for the year or a year-to-date loss where no tax benefit can be recognized are excluded from the estimated annual effective tax rate. The effective tax rate is highly dependent on the geographic distribution of Bunge's worldwide earnings or losses and tax regulations in each jurisdiction. Management regularly monitors the assumptions used in estimating its annual effective tax rate and adjusts estimates accordingly.

For the three months ended March 31, 2017, and 2016, income tax expense related to continuing operations was \$28 million and \$34 million, respectively, resulting in effective tax rates of 34% and 12%. The higher tax rate in 2017 was primarily due to unfavorable earnings mix associated with lower overall pretax income in the first quarter and pretax losses in certain jurisdictions. The lower rate in 2016 was primarily due to certain discrete items, including an income tax benefit of \$60 million recorded for a change in estimate resulting from a tax election for North America, partially offset by an income tax charge of \$32 million recorded for an uncertain tax position related to Asia.

## Edgar Filing: Bunge LTD - Form 10-Q

As a global enterprise, Bunge files income tax returns that are subject to periodic examination and challenge by federal, state and foreign tax authorities. In many jurisdictions, income tax examinations, including settlement negotiations or litigation, may take several years to finalize. While it is difficult to predict the final outcome or timing of resolution of any particular matter, management believes that the condensed consolidated financial statements reflect the largest amount of tax benefit that is more likely than not to be realized.

Table of Contents**9. OTHER CURRENT LIABILITIES**

Other current liabilities consist of the following:

(US\$ in millions)	March 31, 2017	December 31, 2016
Accrued liabilities	\$ 567	\$ 548
Unrealized losses on derivative contracts at fair value	1,539	1,203
Advances on sales	341	395
Other	340	330
<b>Total</b>	<b>\$ 2,787</b>	<b>\$ 2,476</b>

**10. FINANCIAL INSTRUMENTS AND FAIR VALUE MEASUREMENTS**

Bunge's various financial instruments include certain components of working capital such as cash and cash equivalents, trade accounts receivable and trade accounts payable. Additionally, Bunge uses short and long-term debt to fund operating requirements. Cash and cash equivalents, trade accounts receivable, trade accounts payable and short-term debt are stated at their carrying value, which is a reasonable estimate of fair value. See Note 12 for deferred purchase price receivable ( DPP ) related to sales of trade receivables. See Note 7 for long-term receivables from farmers in Brazil, net and other long-term investments and Note 11 for long-term debt. Bunge's financial instruments also include derivative instruments and marketable securities, which are stated at fair value.

The majority of Bunge's exchange traded agricultural commodity futures are settled daily generally through its clearing subsidiary and, therefore, such futures are not included in the table below. Assets and liabilities are classified in their entirety based on the lowest level of input that is a significant component of the fair value measurement. The lowest level of input is considered Level 3.

The following table sets forth, by level, Bunge's assets and liabilities that were accounted for at fair value on a recurring basis.

(US\$ in millions)	Fair Value Measurements at Reporting Date							
	March 31, 2017				December 31, 2016			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total

Table of Contents

---

- (1) Trade accounts receivable and payable are generally stated at historical amounts, net of write-offs and allowances, with the exception of \$8 million and \$1,008 million, at March 31, 2017 and \$6 million and \$522 million at December 31, 2016, respectively, related to certain delivered inventory for which the receivable and payable, respectively, fluctuate based on changes in commodity prices. These receivables and payables are hybrid financial instruments for which Bunge has elected the fair value option.
  
- (2) Unrealized gains on designated and undesignated derivative contracts are generally included in other current assets. There are \$16 million and \$5 million included in other non-current assets at March 31, 2017 and December 31, 2016, respectively.
  
- (3) Other includes the fair values of marketable securities and investments in other current assets and other non-current assets.
  
- (4) Unrealized losses on designated and undesignated derivative contracts are generally included in other current liabilities. There are \$27 million and \$18 million included in other non-current liabilities at March 31, 2017 and December 31, 2016, respectively.

*Derivatives* Exchange traded futures and options contracts and exchange cleared contracts are valued based on unadjusted quoted prices in active markets and are classified within Level 1. Bunge's forward commodity purchase and sale contracts are classified as derivatives along with OTC derivative instruments relating primarily to freight, energy, foreign exchange and interest rates, and are classified within Level 2 or Level 3 as described below. Bunge estimates fair values based on exchange quoted prices, adjusted as appropriate for differences in local markets. These differences are generally valued using inputs from broker or dealer quotations, or market transactions in either the listed or OTC markets. In such cases, these derivative contracts are classified within Level 2.

OTC derivative contracts include swaps, options and structured transactions that are valued at fair value generally determined using quantitative models that require the use of multiple market inputs including quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets which are not highly active, other observable inputs relevant to the asset or liability, and market inputs corroborated by correlation or other means. These valuation models include inputs such as interest rates, prices and indices to generate continuous yield or pricing curves and volatility factors. Where observable inputs are available for substantially the full term of the asset or liability, the instrument is categorized in Level 2. Certain OTC derivatives trade in less active markets with less availability of pricing information and certain structured transactions can require internally developed model inputs that might not be observable in or corroborated by the market. When unobservable inputs have a significant impact on the measurement of fair value, the instrument is categorized in Level 3.

Exchange traded or cleared derivative contracts are classified in Level 1, thus transfers of assets and liabilities into and/or out of Level 1 occur infrequently. Transfers into Level 1 would generally only be expected to occur when an exchange cleared derivative contract historically valued using a valuation model as the result of a lack of observable inputs becomes sufficiently observable, resulting in the valuation price being

## Edgar Filing: Bunge LTD - Form 10-Q

essentially the exchange traded price. There were no significant transfers into or out of Level 1 during the periods presented.

*Readily marketable inventories* RMI reported at fair value are valued based on commodity futures exchange quotations, broker or dealer quotations, or market transactions in either listed or OTC markets with appropriate adjustments for differences in local markets where Bunge's inventories are located. In such cases, the inventory is classified within Level 2. Certain inventories may utilize significant unobservable data related to local market adjustments to determine fair value. In such cases, the inventory is classified as Level 3.

Table of Contents

If Bunge used different methods or factors to determine fair values, amounts reported as unrealized gains and losses on derivative contracts and RMI at fair value in the consolidated balance sheets and consolidated statements of income could differ. Additionally, if market conditions change subsequent to the reporting date, amounts reported in future periods as unrealized gains and losses on derivative contracts and RMI at fair value in the consolidated balance sheets and consolidated statements of income could differ.

*Level 3 Measurements* Transfers in and/or out of Level 3 represent existing assets or liabilities that were either previously categorized as a higher level for which the inputs to the model became unobservable or assets and liabilities that were previously classified as Level 3 for which the lowest significant input became observable during the period. Bunge's policy regarding the timing of transfers between levels is to record the transfers at the beginning of the reporting period.

*Level 3 Derivatives* Level 3 derivative instruments utilize both market observable and unobservable inputs within the fair value measurements. These inputs include commodity prices, price volatility, interest rates, volumes and locations. In addition, with the exception of the exchange cleared instruments, Bunge is exposed to loss in the event of the non-performance by counterparties on OTC derivative instruments and forward purchase and sale contracts. Adjustments are made to fair values on occasions when non-performance risk is determined to represent a significant input in Bunge's fair value determination. These adjustments are based on Bunge's estimate of the potential loss in the event of counterparty non-performance. Bunge did not have significant adjustments related to non-performance by counterparties at March 31, 2017 and December 31, 2016.

*Level 3 Readily marketable inventories and other* The significant unobservable inputs resulting in Level 3 classification for RMI physically settled forward purchase and sale contracts, and trade accounts receivable and payable, net, relate to certain management estimations regarding costs of transportation and other local market or location-related adjustments, primarily freight related adjustments in the interior of Brazil and the lack of market corroborated information in Canada. In both situations, Bunge uses proprietary information such as purchase and sale contracts and contracted prices for freight, premiums and discounts to value its contracts. Movements in the price of these unobservable inputs alone would not have a material effect on Bunge's financial statements as these contracts do not typically exceed one future crop cycle.

The tables below present reconciliations for assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the three months ended March 31, 2017 and 2016. These instruments were valued using pricing models that management believes reflect the assumptions that would be used by a marketplace participant.

*Derivative Instruments*

*Interest rate derivatives* Bunge, from time-to-time uses interest rate derivatives, including interest rate swaps, interest rate basis swaps, interest rate options or interest rate futures. Bunge has entered into interest rate swap agreements for the purpose of managing certain of its interest rate exposures. The interest rate swaps used by Bunge as hedging instruments have been recorded at fair value in the condensed consolidated balance sheets with changes in fair value recorded contemporaneously in earnings. These swap agreements have been designated as fair value hedges. Additionally, the carrying amount of the associated hedged debt is adjusted through earnings for changes in the fair value arising from changes in benchmark interest rates. Ineffectiveness is recognized to the extent that these two adjustments do not offset.

Table of Contents

As of March 31, 2017, Bunge had fixed-to-variable interest rate swap agreements. Below is a summary of Bunge's current interest rate swap agreements designated as fair value hedge agreements as of March 31, 2017.

Notional Amount of Hedged Obligation	Notional Amount of Derivative	Maturity Date	Payment Weighted Average Rate Payable	Fixed Rate Receivable
\$ 500	\$ 500	November 24, 2020	3 month LIBOR plus 1.91%	3.50%
euro 800	euro 800	June 16, 2023	6 month EURIBOR plus 1.64%	1.85%
\$ 550	\$ 550	August 15, 2026	3 month LIBOR plus 1.12%	3.25%

Additionally, on various dates in 2016 and 2017, Bunge entered into interest rate futures, one year interest rate swap agreements and forward rate agreements that do not qualify for hedge accounting, and therefore Bunge has not designated these as hedge instruments for accounting purposes. The interest rate futures, interest rate swaps and forward rate agreements have been recorded at fair value in the consolidated condensed balance sheets with changes in fair value recorded contemporaneously in earnings. Below is a summary of Bunge's outstanding interest rate swap agreements and forward rate agreements.

(US\$ in millions)	March 31, 2017			Unit of Measure
	Exchange Traded Net (Short) & Long (1)	Non-exchange Traded (Short) (2)	Non-exchange Traded Long (2)	
<b>Interest Rate</b>				
Futures	\$	\$	\$	Notional
Swaps		(2,048)	1,476	Notional
Forward Rate Agreements			825	Notional

- (1) Exchange traded derivatives are presented on a net (short) and long position basis.
- (2) Non-exchange traded derivatives are presented on a gross (short) and long position basis.

*Foreign exchange derivatives and hedging activities* - Bunge uses a combination of foreign exchange forward, swap and option contracts in certain of its operations to mitigate the risk from exchange rate fluctuations in connection with certain commercial and balance sheet exposures. The foreign exchange forward and option contracts may be designated as cash flow hedges. Bunge may also use net investment hedges to partially offset the translation adjustments arising from the remeasurement of its investment in certain of its foreign subsidiaries.

Foreign exchange risk is also managed through the use of foreign currency debt. Bunge has 800 million euro senior unsecured euro-denominated notes of which 797 million euro is designated as, and effective as, a net investment hedge of euro denominated assets. Accordingly, foreign currency transaction gains or losses due to spot rate fluctuations on the euro-denominated debt instruments are included in foreign currency translation adjustment within OCI.

## Edgar Filing: Bunge LTD - Form 10-Q

Bunge assesses, both at the inception of the hedge and on an ongoing basis, whether the derivatives that are used in hedge transactions are highly effective in offsetting changes in the hedged items.

The table below summarizes the notional amounts of open foreign exchange positions.

(US\$ in millions)	March 31, 2017				Unit of Measure	
	Exchange Traded Net (Short) & Long (1)	Non-exchange Traded

Table of Contents

- 
- (1) Exchange traded derivatives are presented on a net (short) and long position basis.
- (2) Non-exchange traded derivatives are presented on a gross (short) and long position basis.

*Commodity derivatives* - Bunge uses commodity derivative instruments to manage its exposure to movements associated with agricultural commodity prices. Bunge generally uses exchange traded futures and options contracts to minimize the effects of changes in the prices of agricultural commodities on its agricultural commodity inventories and forward purchase and sale contracts, but may also from time-to-time enter into OTC commodity transactions, including swaps, which are settled in cash at maturity or termination based on exchange-quoted futures prices. Forward purchase and sale contracts are primarily settled through delivery of agricultural commodities. While Bunge considers these exchange traded futures and forward purchase and sale contracts to be effective economic hedges, Bunge does not designate or account for the majority of its commodity contracts as hedges. The forward contracts require performance of both Bunge and the contract counterparty in future periods. Contracts to purchase agricultural commodities generally relate to current or future crop years for delivery periods quoted by regulated commodity exchanges. Contracts for the sale of agricultural commodities generally do not extend beyond one future crop cycle.

The table below summarizes the volumes of open agricultural commodities derivative positions.

	March 31, 2017			Unit of Measure
	Exchange Traded Net (Short) & Long (1)	(Short) (2)	Non-exchange Traded Long (2)	
<b>Agricultural Commodities</b>

Swaps	30,000	(6,932,933)	1,768,321	Metric Tons

- 
- (1) Exchange traded derivatives are presented on a net (short) and long position basis.
- (2) Non-exchange traded derivatives are presented on a gross (short) and long position basis.

*Ocean freight derivatives* Bunge uses derivative instruments referred to as freight forward agreements ( FFAs ) and FFA options to hedge portions of its current and anticipated ocean freight costs. Changes in the fair values of ocean freight derivatives that are not designated as hedges are recorded in earnings. There were no designated hedges at March 31, 2017 and December 31, 2016, respectively.

The table below summarizes the open ocean freight positions.

(1) Exchange cleared derivatives are presented on a net (short) and long position basis.

(2) Non-exchange cleared derivatives are presented on a gross (short) and long position basis.

Table of Contents

*Energy derivatives* Bunge uses energy derivative instruments for various purposes including to manage its exposure to volatility in energy costs. Bunge's operations use energy, including electricity, natural gas, coal, and fuel oil, including bunker fuel.

The table below summarizes the open energy positions.

	March 31, 2017		Unit of Measure (3)
	Exchange Traded Net (Short) & Long (1)	Non-exchange Cleared (Short) (2)      Long (2)	
<b>Natural Gas (3)</b>			
Futures	5,167,500		MMBtus
Swaps		1,236,469	MMBtus
Options			MMBtus
<b>Energy Other</b>			
Futures	(4,454)		Metric Tons
Forwards		6,255,869	Metric Tons
Swaps	271,900		Metric Tons
Options	(403)		Metric Tons

- (1) Exchange traded and cleared derivatives are presented on a net (short) and long position basis.
- (2) Non-exchange cleared derivatives are presented on a gross (short) and long position basis.
- (3) Million British Thermal Units ( MMBtus ) are standard units of measurement used to denote an amount electricity and natural gas, respectively.

*The Effect of Financial Instruments on the Condensed Consolidated Statements of Income*

The table below summarizes the effect of derivative instruments that are designated as fair value hedges and also derivative instruments that are undesignated on the condensed consolidated statements of income for the three months ended March 31, 2017 and 2016.

(US\$ in millions)	Location	Gain or (Loss) Recognized in Income on Derivative Instruments Three Months Ended March 31,	
		2017	2016

Edgar Filing: Bunge LTD - Form 10-Q

<b>Designated Derivative Contracts:</b>				
Interest Rate	Interest income (expense)	\$	5	\$
<b>Total</b>		\$	5	\$
<b>Undesignated Derivative Contracts:</b>				
Foreign Exchange	Foreign exchange gains (losses)	\$	77	\$ 147
Foreign Exchange	Cost of goods sold		92	242
Commodities	Cost of goods sold		270	(230)
Freight	Cost of goods sold		(8)	(6)
Energy	Cost of goods sold		(10)	(1)
<b>Total</b>		\$	421	\$ 152

The table below summarizes the effect of derivative instruments that are designated and qualify as cash flow and net investment hedges on the condensed consolidated statement of income three months ended March 31, 2017.

Edgar Filing: Bunge LTD - Form 10-Q

Table of Contents

(US\$ in millions)	Notional Amount	Gain or (Loss) Recognized in Accumulated OCI (1)	Three Months Ended March 31, 2017		Gain or (Loss) Recognized in Income on Derivatives		
			Gain or (Loss) Reclassified from Accumulated OCI into Income (1)	Location	Amount	Location	Amount (2)
<b>Cash Flow Hedge:</b>

(1) The gain or (loss) recognized relates to the effective portion of the hedging relationship. At March 31, 2016, Bunge expected to reclassify into income in the next 12 months approximately \$16 million of after-tax gains (losses) related to its foreign exchange cash flow hedges and nil for net investment hedges.

(2) There was no gain or loss recognized in income relating to the ineffective portion of the hedging relationships or relating to amounts excluded from the assessment of hedge effectiveness.

(3) The foreign exchange contracts matured at various dates through 2020.

Table of Contents**11. DEBT**

Bunge's commercial paper program is supported by an identical amount of committed back-up bank credit lines (the Liquidity Facility) provided by banks that are rated at least A-1 by Standard & Poor's Financial Services and P-1 by Moody's Investors Service. The cost of borrowing under the Liquidity Facility would typically be higher than the cost of issuing under Bunge's commercial paper program. At March 31, 2017, there were no borrowings outstanding under the commercial paper program and no borrowings under the Liquidity Facility.

At March 31, 2017, Bunge had \$4,838 million of unused and available borrowing capacity under its committed credit facilities totaling \$5,015 million with a number of lending institutions.

The fair value of Bunge's long-term debt is based on interest rates currently available on comparable maturities to companies with credit standing similar to that of Bunge. The carrying amounts and fair value of long-term debt are as follows:

(US\$ in millions)	Carrying Value	March 31, 2017		Carrying Value	December 31, 2016	
		Fair Value (Level 2)	Fair Value (Level 3)		Fair Value (Level 2)	Fair Value (Level 3)
Long-term debt, including current portion	\$ 4,204	\$ 4,351	\$	\$ 4,007	\$ 4,163	\$

**12. TRADE RECEIVABLES SECURITIZATION PROGRAM**

On May 26, 2016, Bunge and certain of its subsidiaries renewed and amended its \$700 million trade receivables securitization program (the Program). Bunge and certain of its subsidiaries participate in the Program with a financial institution, as administrative agent, and certain commercial paper conduit purchasers and committed purchasers (collectively, the Purchasers) that provides for funding of up to \$700 million against receivables sold into the Program.

The table below summarizes the cash flows and discounts of Bunge's trade receivables associated with the Program. Servicing fees under the Program were not significant in any period.

(US\$ in millions)	March 31, 2017	March 31, 2016
Gross receivables sold	\$ 2,382	\$ 2,263
Proceeds received in cash related to transfer of receivables	\$ 2,252	\$ 2,155
Cash collections from customers on receivables previously sold	\$ 2,347	\$ 2,227

(US\$ in millions)	March 31, 2017	March 31, 2016

Deferred purchase price included in other current assets	\$	95	\$	87

13. **RELATED PARTY TRANSACTIONS**

Bunge purchased soybeans, other commodity products and received port services from certain of its unconsolidated investees, totaling \$267 million and \$252 million for the three months ended March 31, 2017 and 2016, respectively. Bunge also sold soybeans, other commodity products and provided port services to certain of its

Table of Contents

unconsolidated investees, totaling \$66 million and \$56 million for the three months ended March 31, 2017 and 2016, respectively.

#### 14. COMMITMENTS AND CONTINGENCIES

Bunge is party to a large number of claims and lawsuits, primarily non-income tax and labor claims in Brazil and non-income tax claims in Argentina, arising in the normal course of business. The ability to predict the ultimate outcome of such matters involves judgments, estimates and inherent uncertainties. Bunge records liabilities related to its general claims and lawsuits when the exposure item becomes probable and can be reasonably estimated. Bunge management does not expect these matters to have a material adverse effect on Bunge's financial condition, results of operations or liquidity. However, these matters are subject to inherent uncertainties and there exists the remote possibility of an adverse impact on Bunge's position in the period the uncertainties are resolved whereby the settlement of the identified contingencies could exceed the amount of provisions included in the condensed consolidated balance sheets. Included in other non-current liabilities at March 31, 2017 and December 31, 2016 are the following amounts related to these matters:

(US\$ in millions)	March 31, 2017	December 31, 2016
Non-income tax claims	\$ 183	\$ 170
Labor claims	93	82
Civil and other claims	94	98
<b>Total</b>	<b>\$ 370</b>	<b>\$ 350</b>

*Non-income Tax claims* These tax claims relate principally to claims against Bunge's Brazilian subsidiaries, primarily value added tax claims (ICMS, IPI, PIS/COFINS). The determination of the manner in which various Brazilian federal, state and municipal taxes apply to the operations of Bunge is subject to varying interpretations arising from the complex nature of Brazilian tax law. In addition to the matter discussed below, Bunge monitors other potential claims in Brazil regarding these value-added taxes. In particular, Bunge monitors the Brazilian federal and state governments' responses to recent Brazilian Supreme Court decisions invalidating on constitutional grounds certain ICMS incentives and benefits granted by various states. While Bunge was not a recipient of any of the incentives and benefits that were the subject of these Supreme Court decisions, it has received other similar tax incentives and benefits, which are being challenged before the Supreme Court. Bunge has not received any tax assessment from the states that granted these incentives or benefits related to their validity and, based on the Company's evaluation of this matter as required by U.S. GAAP, no liability has been recorded in the consolidated financial statements.

On February 13, 2015, Brazil's Supreme Federal Court ruled in a leading case that certain state ICMS tax credits for staple foods (including soy oil, margarine, mayonnaise and wheat flours) are unconstitutional. Bunge, like other companies in the Brazilian food industry, is involved in several administrative and judicial disputes with Brazilian states regarding these tax credits. While the leading case does not involve Bunge and each case is unique in facts and circumstances and applicable state law, the ruling has general precedent authority on lower court cases. Based on management's review of the ruling (without considering the future success of any potential clarification or modulation of the ruling) and its general application to Bunge's pending cases, management recorded a liability of 468 million Brazilian *reais* (approximately \$148 million as of March 31, 2017), plus applicable interest. During the fourth quarter of 2016, Bunge settled a portion of its outstanding liabilities in amnesty programs in certain Brazilian states. As of

March 31, 2017, the accrued liability was 425 million Brazilian *reais* (approximately \$134 million), plus applicable interest.

As of March 31, 2017, the Brazilian state authorities have concluded examinations of the ICMS tax returns from 1990 to the present and have issued over 1,300 assessments totaling approximately 938 million Brazilian *reais* (approximately \$296 million as of March 31, 2017), plus applicable interest and penalties on the outstanding amount. As of December 31, 2016, the claims were approximately 797 million Brazilian *reais* (approximately \$252 million), plus applicable interest and penalties on the outstanding amount. Management intends to continue to vigorously defend against its pending state cases. Management, in consultation with external legal advisors, has established appropriate reserves for potential exposures.

Table of Contents

As of March 31, 2017 the Brazilian authorities have concluded examinations of the PIS-COFINS tax returns and issued assessments relating to years 2004 through the first quarter of 2011. As of March 31, 2017, the cumulative claims for 2004 through 2011 were approximately 550 million Brazilian *reais* (approximately \$173 million), plus applicable interest and penalties on the outstanding amount. As of December 31, 2016, the cumulative claims were approximately 510 million Brazilian *reais* (approximately \$161 million), plus applicable interest and penalties on the outstanding amount. Management, in consultation with external legal advisors, has established appropriate reserves for potential exposures.

Since 2010, the Argentine tax authorities have been conducting a review of income and other taxes paid by exporters and processors of cereals and other agricultural commodities in the country. In that regard, the Company has been subject to a number of assessments, proceedings and claims related to its activities. In 2011, Bunge's subsidiary in Argentina paid \$112 million of accrued export tax obligations under protest and preserved its rights with respect to such payment. In 2012, the Argentine tax authorities further assessed interest on these payments, which as of March 31, 2017, totaled approximately \$241 million. In 2012, the Argentine government suspended Bunge's Argentine subsidiary from a registry of grain traders. While the suspension has not had a material adverse effect on Bunge's business in Argentina, these actions have resulted in additional administrative requirements and increased logistical costs on domestic grain shipments within Argentina. Bunge is challenging these actions in the Argentine courts.

*Labor claims* - The labor claims are principally claims against Bunge's Brazilian subsidiaries. The labor claims primarily relate to dismissals, severance, health and safety, salary adjustments and supplementary retirement benefits.

*Civil and other claims* - The civil and other claims relate to various disputes with third parties, including suppliers and customers.

During the first quarter of 2016, Bunge received a notice from the Brazilian Administrative Council for Economic Defense initiating an administrative proceeding against its Brazilian subsidiary and two of its employees, certain of its former employees, several other companies in the Brazilian wheat milling industry and others for alleged anticompetitive activities in the north and northeast of Brazil. Bunge is defending against this action; however, the proceedings are at an early stage and Bunge cannot, at this time, reasonably predict the ultimate outcome of the proceedings or sanctions, if any, which may be imposed.

*Guarantees* - Bunge has issued or was a party to the following guarantees at March 31, 2017:

(US\$ in millions)	Maximum Potential Future Payments
Unconsolidated affiliates financing (1)(2)	\$ 190
Residual value guarantee (3)	227

<b>Total</b>	<b>\$</b>	<b>417</b>
--------------	-----------	------------

---

(1) Bunge issued guarantees to certain financial institutions related to debt of certain of its unconsolidated joint ventures. The terms of the guarantees are equal to the terms of the related financings which have maturity dates in 2017 through 2022. There are no recourse provisions or collateral that would enable Bunge to recover any amounts paid under these guarantees. At March 31, 2017, Bunge recorded no obligation related to these guarantees.

(2) Bunge issued guarantees to certain third parties related to performance of its unconsolidated joint ventures. The terms of the guarantees are equal to the completion date of a port terminal which is expected to be completed in 2019. There are no recourse provisions or collateral that would enable Bunge to recover any amounts paid under these guarantees. At March 31, 2017, Bunge recorded no obligation related to these guarantees.

(3) Bunge issued guarantees to certain financial institutions which are party to certain operating lease arrangements for railcars and barges. These guarantees provide for a minimum residual value to be received by the lessor at conclusion of the lease term. These leases expire at various dates from 2018 through 2021. At March 31, 2017, Bunge s recorded obligation related to these guarantees was \$4 million.

Table of Contents

Bunge Limited has provided a Guaranty to the Director of the Illinois Department of Agriculture as Trustee for Bunge North America, Inc. ( BNA ), an indirect wholly-owned subsidiary, which guarantees all amounts due and owing by BNA, to grain producers and/or depositors in the State of Illinois who have delivered commodities to BNA s Illinois facilities.

In addition, Bunge Limited has provided full and unconditional parent level guarantees of the outstanding indebtedness under certain credit facilities entered into and senior notes issued by, its subsidiaries. As of March 31, 2017, Bunge s condensed consolidated balance sheet includes debt with a carrying amount of \$4,452 million related to these guarantees. This debt includes the senior notes issued by three of Bunge s 100% owned finance subsidiaries, Bunge Limited Finance Corp., Bunge Finance Europe B.V. and Bunge N.A. Finance L.P. There are largely no restrictions on the ability of Bunge Limited Finance Corp., Bunge Finance Europe B.V. and Bunge N.A. Finance L.P. or any other Bunge subsidiary to transfer funds to Bunge Limited.

## 15. EQUITY

*Share repurchase program* - In May 2015, Bunge established a program for the repurchase of up to \$500 million of Bunge s issued and outstanding common shares. The program has no expiration date. Bunge did not repurchase any common shares during the quarter ended March 31, 2017. Bunge repurchased 3,296,230 common shares in 2016 under this program for \$200 million. Total repurchases under the program from its inception in May 2015 through December 31, 2016 were 4,707,440 shares for \$300 million.

*Accumulated other comprehensive income (loss) attributable to Bunge* - The following table summarizes the balances of related after-tax components of accumulated other comprehensive income (loss) attributable to Bunge:

(US\$ in millions)	Foreign Exchange Translation Adjustment	Deferred Gains (Losses) on Hedging Activities	Pension and Other Postretirement Liability Adjustments	Unrealized Gains (Losses) on Investments	Accumulated Other Comprehensive Income (Loss)
Balance January 1, 2017	\$ (5,734)	\$ (102)	\$ (145)	\$ 3	\$ (5,978)

**16. EARNINGS PER COMMON SHARE**

The following table sets forth the computation of basic and diluted earnings per common share.

Table of Contents

(US\$ in millions, except for share data)	Three Months Ended		
	2017	March 31,	
		2016	
Income (loss) from continuing operations	\$	54	\$ 241
Net (income) loss attributable to noncontrolling interests		(1)	3
Income (loss) from continuing operations attributable to Bunge		53	244
Other redeemable obligations (1)			(5)
Convertible preference share dividends		(8)	(8)
Income (loss) from discontinued operations, net of tax		(6)	(9)
Net income (loss) available to Bunge common shareholders	\$	39	\$ 222
<b>Weighted-average number of common shares outstanding: (2)</b>			
Basic		139,752,305	141,062,415
Effect of dilutive shares:			
stock options and awards		1,144,851	301,236
convertible preference shares			7,849,440
Diluted		140,897,156	149,213,091
<b>Basic earnings per common share:</b>			
Net income (loss) from continuing operations	\$	0.31	\$ 1.64
Net income (loss) from discontinued operations		(0.04)	(0.07)
Net income (loss) attributable to Bunge common shareholders basic	\$	0.27	\$ 1.57
<b>Diluted earnings per common share:</b>			
Net income (loss) from continuing operations	\$	0.31	\$ 1.60
Net income (loss) from discontinued operations		(0.04)	(0.06)
Net income (loss) attributable to Bunge common shareholders diluted	\$	0.27	\$ 1.54

(1) Accretion of redeemable noncontrolling interest of \$5 million for the three months ended March 31, 2016, relates to a non-fair value variable put arrangement whereby the noncontrolling interest holder could require Bunge to purchase the remaining shares of an oilseed processing operation in Central and Eastern Europe. Accretion for the respective period includes the effect of losses incurred by the operations for the three months ended March 31, 2016. In the second quarter of 2016 this variable put arrangement was terminated.

(2) Approximately 2 million outstanding stock options and contingently issuable restricted stock units were not dilutive and not included in the weighted-average number of common shares outstanding for the three months ended March 31, 2017. Approximately 8 million weighted-average common shares that are issuable upon conversion of the convertible preference shares were not dilutive and not included in the weighted-average number of common shares outstanding for the three months ended March 31, 2017.

Approximately 7 million outstanding stock options and contingently issuable restricted stock units were not dilutive and not included in the weighted-average number of common shares outstanding for the three months ended March 31, 2016.

17. **SEGMENT INFORMATION**

## Edgar Filing: Bunge LTD - Form 10-Q

Bunge has five reportable segments - Agribusiness, Edible Oil Products, Milling Products, Sugar and Bioenergy, and Fertilizer, which are organized based upon similar economic characteristics and are similar in nature of products and services offered, the nature of production processes and the type and class of customer and distribution methods. The Agribusiness segment is characterized by both inputs and outputs being agricultural commodities and thus high volume and low margin. The Edible Oil Products segment involves the processing, production and marketing of products derived from vegetable oils. The Milling Products segment involves the processing, production and marketing of products derived primarily from wheat and corn. The Sugar and Bioenergy segment involves sugarcane growing and milling in Brazil, sugar merchandising in various countries, as well as sugarcane-based ethanol production and corn-based ethanol investments and related activities. Following the classification of the Brazilian fertilizer distribution and North American fertilizer businesses as discontinued operations, the activities of the Fertilizer segment include its port operations in Brazil and Argentina and its blending and retail operations in Argentina.

The Discontinued Operations & Unallocated column in the following table contains the reconciliation between the totals for reportable segments and Bunge consolidated totals, which consist primarily of amounts attributable to discontinued operations, corporate items not allocated to the operating segments and inter-segment eliminations. Transfers between the segments are generally valued at market. The segment revenues generated from these transfers are shown in the following table as Inter-segment revenues.

Table of Contents**(US\$ in millions)**

<b>Three Months Ended March 31, 2017</b>	<b>Agribusiness</b>	<b>Edible Oil Products</b>	<b>Milling Products</b>	<b>Sugar and Bioenergy</b>	<b>Fertilizer</b>	<b>Discontinued Operations &amp; Unallocated (1)</b>	<b>Total</b>
Net sales to external customers	\$ 7,819	\$ 1,880	\$ 382	\$ 988	\$ 52	\$	\$ 11,121

Discontinued operations (3)						(9)	(9)
Depreciation, depletion and amortization	(55)	(22)	(14)	(19)	(3)		(113)
Total assets	12,671	1,998	1,444	2,357	292	177	18,939

(1) Includes noncontrolling interests share of interest and tax to reconcile to consolidated noncontrolling interest.

(2) Total segment earnings before interest and taxes ( EBIT ) is an operating performance measure used by Bunge s management to evaluate segment operating activities. Bunge s management believes total segment EBIT is a useful measure of operating profitability, since the measure allows for an evaluation of the performance of its segments without regard to its financing methods or capital structure. In addition, EBIT is a financial measure that is widely used by analysts and investors in Bunge s industry.

(3) Represents net income (loss) from discontinued operations.

A reconciliation of total segment EBIT to net income attributable to Bunge follows:

**Three Months Ended**

Edgar Filing: Bunge LTD - Form 10-Q

(US\$ in millions)		2017	March 31,	2016

**Cautionary Statement Regarding Forward Looking Statements**

This report contains both historical and forward looking statements. All statements, other than statements of historical fact are, or may be deemed to be, forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act). These forward looking statements are not based on historical facts, but rather reflect our current expectations and projections about our future results, performance, prospects and opportunities. We have tried to identify these forward looking statements by using words including may, will, should, could, expect, anticipate, believe, plan, intend, and similar expressions. These forward looking statements are subject to a number of risks, uncertainties and other factors that could cause our actual results, performance, prospects or opportunities to differ materially from those expressed in, or implied by, these forward looking statements. The following important factors, among others, could affect our business and financial performance, industry conditions, including fluctuations in supply, demand and prices for agricultural commodities and other raw materials and products used in our business, fluctuations in energy and freight costs and competitive developments in our industries; the effects of weather conditions and the outbreak of crop and animal disease on our business; global and regional agricultural, economic, financial and commodities market, political, social and health conditions; the outcome of pending regulatory and legal proceedings; our ability to complete, integrate and benefit from acquisitions, dispositions, joint ventures and strategic alliances; our ability to achieve the efficiencies, savings and other benefits anticipated from our cost reduction, margin improvement and other business optimization initiatives; changes in government policies, laws and regulations affecting our business, including agricultural and trade policies, tax regulations and biofuels legislation; and other factors affecting our business generally.

The forward looking statements included in this report are made only as of the date of this report, and except as otherwise required by federal securities law, we do not have any obligation to publicly update or revise any forward looking statements to reflect subsequent events or circumstances.

You should refer to Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2016, filed with the SEC on February 25, 2017, and Part II Item 1A. Risk Factors in this Quarterly Report on Form 10-Q for a more detailed discussion of these factors.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

*First Quarter 2017 Overview*

You should refer to Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Factors Affecting Operating Results in our Annual Report on Form 10-K for the year ended December 31, 2016 for a discussion of key factors affecting operating results in each of our business segments. In addition, you should refer to Item 9A Controls and Procedures in our Annual Report on Form 10-K for the year ended December 31, 2016 and to Item 4 Controls and Procedures in this Quarterly Report on Form 10-Q for the period ended March 31, 2017 for a discussion of our internal controls over financial reporting.

*Non-U.S. GAAP Financial Measures*

Total segment earnings before interest and taxes ( EBIT ) is an operating performance measure used by Bunge s management to evaluate segment operating activities. Bunge s management believes total segment EBIT is a useful measure of operating profitability, since the measure allows for an evaluation of the performance of its segments without regard to its financing methods or capital structure. In addition, EBIT is a financial measure that is widely used by analysts and investors in Bunge s industry. Total Segment EBIT is a non-U.S. GAAP financial measure and is not intended to replace net income attributable to Bunge, the most directly comparable U.S. GAAP financial measure.

*Segment Overview*

*Agribusiness* EBIT for the first quarter of 2017 was \$109 million compared to \$282 million in the first quarter of 2016. Slow farmer selling due to a drop in commodity prices and stronger local currencies negatively impacted our grain origination and soy processing operations in Brazil and Argentina. Grain and Oilseeds

Table of Contents

distribution results were also lower due to limited forward merchandising opportunities. Partially offsetting these lower results were higher softseed processing results in Canada and Europe, which were driven by bigger seed crops and improved vegetable oil demand. Higher oilseed processing results in China, due to improved margins and volumes, offset lower crush results in the U.S., which were down due to decreased margins.

*Edible oil products* EBIT for the first quarter of 2017 was \$36 million compared to \$30 million in the first quarter of 2016. Higher results in the quarter were primarily driven by Brazil, which increased volumes and margins in most product categories in what remains a challenging economic environment. Overall results were partially offset by lower margins in U.S. refining and packaging, which were impacted by increased competition.

*Milling products* EBIT for the first quarter of 2017 was \$9 million compared to \$22 million in the first quarter of 2016. The decline in segment performance was due to our North American operations. In Mexico, results were impacted by lower volumes, unfavorable currency translation and delays in passing through higher raw material costs in local currency due to industry softness. In the U.S., higher volumes were more than offset by lower margins. Brazil results were comparable to last year as higher margins offset lower volumes. Despite continued depressed consumer spending in Brazil and a reduction in industry demand, our team grew market share, positioning us well for the recovery.

*Sugar and Bioenergy* EBIT for the first quarter of 2017 was a loss of \$17 million compared to a loss of \$14 million in the first quarter of 2016. The first quarter is the inter-harvest period in Brazil when sugarcane mills in the Center-South region typically do not operate for most of the quarter and are selling sugar and ethanol inventories from the previous sugarcane harvest.

Results in trading & distribution were negatively impacted by sugar price volatility and were down from last year. Improved results in the quarter were primarily driven by our industrial milling business, which benefited from higher sugar volumes and prices compared to last year.

*Fertilizer* EBIT for the first quarter of 2017 was a loss of \$4 million compared to income of \$2 million in the first quarter of 2016. Decreased results in the quarter were primarily driven by lower margins in our Argentina operation.

***Segment Results***

A summary of certain items in our condensed consolidated statements of income and volumes by reportable segment for the periods indicated is set forth below.

Table of Contents

(US\$ in millions, except volumes)	Three Months Ended	
	2017	March 31, 2016

(1) We refer to our earnings before interest and taxes as Segment EBIT. Segment EBIT is an operating performance measure used by Bunge's management to evaluate its segments' operating activities. Total segment EBIT is a non-U.S. GAAP financial measure and is not intended to replace net income attributable to Bunge, the most directly comparable U.S. GAAP financial measure. Bunge's management believes Segment EBIT is a useful measure of its segments' operating profitability, since the measure allows for an evaluation of the performance of its segments without regard to its financing methods or capital structure. In addition, EBIT is a financial measure that is widely used by analysts and investors in Bunge's industry. Total segment EBIT is not a measure of consolidated operating results under U.S. GAAP and should not be considered as an alternative to net income attributable to Bunge or any other measure of consolidated operating results under U.S. GAAP.

A reconciliation of total Segment EBIT to net income (loss) attributable to Bunge follows:

(US\$ in millions)	Three Months Ended	
	2017	March 31, 2016
Net income attributable to Bunge	\$ 47	\$ 235
Interest income	(12)	(10)
Interest expense	65	57
Income tax expense	28	34
(Income) loss from discontinued operations, net of tax	6	9
Noncontrolling share of interest and tax	(1)	(3)
Total segment EBIT	\$ 133	\$ 322

***Three Months Ended March 31, 2017 Compared to Three Months Ended March 31, 2016***

*Net Income (Loss) Attributable to Bunge* - For the quarter ended March 31, 2017, net income attributable to Bunge decreased by \$188 million to \$47 million from \$235 million in the quarter ended March 31, 2016. This decrease resulted primarily from a decrease in segment EBIT of \$189 million, particularly in agribusiness and milling products, partially offset by decreased losses in discontinued operations and lower income tax expense.

*Income Tax Expense* - In the quarter ended March 31, 2017, income tax expense was \$28 million compared to \$34 million in the quarter ended March 31, 2016. The effective tax rate in the first quarter of 2017 was 34% compared to 12% in the first quarter of 2016. The higher effective tax rate in 2017 was primarily due to the lower level of pretax income

in the quarter, resulting in a disproportionate effect of losses from entities for which no tax benefit is recorded. We expect the unfavorable impact of these losses to normalize over the remainder of the year. In addition, the low effective tax rate in 2016 was primarily due to net discrete tax items including an income tax benefit of \$60 million recorded for a change in estimate resulting from a tax election for North America, partially offset by an income tax charge of \$32 million for an uncertain tax position in Asia.

*Agribusiness Segment* - Agribusiness segment net sales increased by 24% to \$7.8 billion in the first quarter of 2017, compared to \$6.3 billion in the first quarter of 2016. Both volumes and commodity prices increased compared to first quarter 2016, despite slow farmer selling in South America which impacted both our grains and oilseed processing businesses. In our oilseed processing business, net sales increased primarily from higher crush volumes due to our new crush plant in Ukraine which started operations in the second quarter of 2016, and the acquisition of two soybean and rapeseed crushing facilities in Western Europe in the first quarter of 2017.

Cost of goods sold increased by 29%, substantially in line with the increases in net sales noted above. Additionally, the first quarter was impacted by higher freight costs and higher industrial costs and depreciation from the appreciation of the Brazilian *real* against the U.S. dollar compared to the first quarter 2016.

Gross profit decreased to \$278 million in the first quarter of 2017, from \$430 million in the first quarter of 2016, primarily driven by lower results in Brazil and Argentina due to slow farmer selling, lower results in grains and oilseeds trading and distribution, which include higher freight costs, and lower contribution from risk

Table of Contents

management due to spot global customer and a lack of positioning opportunities. This was partially offset by increased results in our softseed crush businesses in Europe and Canada and oilseed processing in China compared to the first quarter 2016.

SG&A expenses increased \$44 million to \$221 million in the first quarter of 2017 which represents a 25% increase from the \$177 million in the same period last year. This increase includes a \$9 million credit adjustment in Brazil, \$7 million of transaction related costs associated with the acquisition of two oil seed processing facilities in Western Europe that will not repeat and from the appreciation of the Brazilian *real* against the U.S. dollar compared to the first quarter 2016. These increases were partially offset by cost savings and operating efficiencies in the first quarter 2017.

Foreign exchange results in the first quarter of 2017 were gains of \$49 million, compared to gains of \$24 million in the first quarter of 2016. These results relate primarily to foreign currency hedges and the appreciation of the Brazilian *real*.

Other income (expenses)-net was income of \$3 million in the first quarter of 2017, which remained unchanged from \$3 million in the first quarter of 2016.

Segment EBIT decreased by \$173 million to \$109 million in the first quarter of 2017 from \$282 million in the first quarter of 2016. This decrease was primarily driven by slow farmer selling in South America, lower results in grains and oilseeds trading and distribution, and lower contribution from risk management activities in first quarter 2017. Also, contributing to lower EBIT, were the impact on costs from the appreciation of the Brazilian *real* against the U.S. dollar as compared to the first quarter 2016 and transaction costs related to the acquisition of two oilseed crushing facilities in Western Europe. These decreases were partially offset by increased capacity from expansion in our softseed crush business in Europe, stronger soft seed crush margins in Europe and Canada and improved crush margins in China compared to the first quarter 2016.

*Edible Oil Products Segment* - Edible oil products segment net sales increased by 23% in the first quarter of 2017 to \$1.9 billion, compared to \$1.5 billion in the first quarter of 2016, resulting primarily from a 12% increase in volumes, driven by increases in Brazil, Argentina and including our acquisition of two edible oil production facilities in Europe.

Cost of goods sold in the first quarter of 2017 increased 24% from the same period of 2016, which is in line with the increase in net sales noted above, and primarily driven by the 20% appreciation of the Brazilian *real* against the U.S. dollar compared to the first quarter 2016.

Gross profit in the first quarter of 2017 increased to \$123 million compared to \$112 million for the first quarter of 2016. The increase was primarily driven by stronger volumes and margins in Brazil, offset in part by lower refining and packaging margins in the U.S. due to increased competition. The first quarter of 2016 included \$12 million of temporary mark-to-market gains that were not repeated in the first quarter of 2017.

## Edgar Filing: Bunge LTD - Form 10-Q

SG&A expenses increased by 9% to \$86 million in the first quarter of 2017 compared with \$79 million in the same period a year ago, driven primarily by a 20% appreciation of the Brazilian *real* against the U.S. dollar compared to the first quarter 2016 and acquisition costs related to our purchase of food processing facilities in Europe in the first quarter of 2017.

Foreign exchange results in the first quarter of 2017 were income of \$3 million, compared to losses of \$1 million in 2016. These results relate primarily to foreign currency hedges.

Segment EBIT increased by 20% to \$36 million for the first quarter of 2017, up from \$30 million in the first quarter of 2016, primarily from higher margins and volumes in our Brazil business and increased volumes with the acquisition of two edible oil production facilities in Europe. Additionally, the first quarter of 2016 included \$12 million of temporary mark-to-market gains that were not repeated in the first quarter of 2017.

*Milling Products Segment* - Milling products segment net sales were \$382 million in the first quarter of 2017, 2% lower as compared to \$391 million for the same period a year ago, resulting primarily from a 3% decrease in volumes driven by softer demand for wheat in Mexico, a 13% depreciation of the Mexico *peso* against the U.S. dollar and pressure from the record wheat crop in Brazil which increased local competition compared to the first quarter 2016.

Table of Contents

Cost of goods sold decreased by 1% to \$334 million for the first quarter of 2017 from \$336 million in the first quarter of 2016 primarily due to the appreciation of the Brazilian *real*.

Gross profit decreased by 13% to \$48 million in the first quarter of 2017, down from \$55 million in the first quarter of 2016, primarily due to North American results, which were impacted by lower volumes and margins and, depreciation of the Mexican *peso* against the U.S. dollar. Additionally, in the U.S, higher volumes were more than offset by lower margins. In Brazil, results were comparable with last year as lower volumes and increased industrial expenses were offset by stronger margins.

SG&A expenses increased to \$37 million in the first quarter 2017 from \$29 million, primarily due to the 20% appreciation of the Brazilian *real* against the U.S. dollar compared to the first quarter 2016 and \$3 million in costs related to severance and labor claims.

Segment EBIT decreased to \$9 million in the first quarter of 2017, from \$22 million last year, primarily as a result of lower gross profit in North America and increases in SG&A expense related to the appreciation of the Brazilian *real* and other items.

*Sugar and Bioenergy Segment* - Sugar and Bioenergy segment net sales increased \$330 million to \$988 million in the first quarter of 2017 compared to \$658 million in the same quarter last year. The approximate 50% increase in sales was primarily driven by higher sales volumes and sugar prices in our industrial and trading and merchandising operations compared to the first quarter of 2016. Additionally, a 20% appreciation of the Brazilian *real* against the U.S. dollar positively impacted domestic sales of sugar and ethanol in Brazil.

Cost of goods sold increased 52% in the first quarter of 2017 compared to the same period of 2016, primarily due to higher volumes and prices, \$6 million of severance and restructuring charges related to our industrial operations and the stronger Brazilian *real* relative to the U.S. dollar.

Gross profit decreased to \$9 million in the first quarter of 2017 from the \$16 million reported in the first quarter of 2016, primarily due to lower margins in our sugar trading and merchandising business and \$6 million in severance and restructuring charges, partially offset by improved performance in our industrial milling business, where higher crush volumes and sugar prices more than offset lower ethanol prices. Results and related development costs associated with our renewable oils joint venture in Brazil was a loss of \$6 million in the quarter.

SG&A expenses increased by 16% to \$29 million in the first quarter of 2017 from \$25 million in the comparable period of 2016, primarily due to the 20% appreciation of the Brazilian *real*, impacting local currency costs translated into U.S. dollars.

## Edgar Filing: Bunge LTD - Form 10-Q

Foreign exchange results in the first quarter of 2017 were \$5 million compared to nil in the same period of 2016. These results relate primarily to foreign currency hedges.

Segment EBIT decreased to a loss of \$17 million in the first quarter of 2017 from a loss of \$14 million in the first quarter of 2016, primarily due to \$6 million in severance and restructuring costs, lower sugar trading and distribution results partially offset by improved results in our industrial milling operations.

*Fertilizer Segment* - Fertilizer segment net sales decreased 10% to \$52 million in the first quarter of 2017, compared to \$58 million in the first quarter of 2016, primarily due to lower volumes and lower margins in Argentina compared to first quarter 2016.

Cost of goods sold decreased by \$1 million in the first quarter of 2017 to \$50 million, compared to \$51 million a year ago primarily driven by lower variable industrial costs from lower volumes.

Gross profit decreased by \$5 million to \$2 million in the first quarter of 2017, from \$7 million income in the comparable period of 2016. The improvement was primarily driven by lower volumes and lower margins in Argentina.

SG&A expenses were \$5 million in the first quarter of 2017, compared to \$4 million in the comparable period of 2016.

Table of Contents

Segment EBIT decreased by \$6 million to a loss of \$4 million in the first quarter of 2017 from a gain of \$2 million in the same period a year ago, primarily driven by lower volumes and margins in 2017 when compared to the first quarter of 2016.

*Interest* - A summary of consolidated interest income and expense for the periods indicated follows:

(US\$ in millions)	Three Months Ended				
	2017		March 31,		2016
Interest income	\$	12	\$	10	
Interest expense		(65)		(57)	

Interest income remained relatively unchanged between 2017 and 2016. Interest expense increased primarily due to higher average outstanding debt in first quarter 2017 compared to first quarter 2016.

*Discontinued Operations* - Discontinued operations results for the first quarter of 2017 were a loss of \$6 million, net of tax, compared to a loss of \$9 million, net of tax, in the first quarter of 2016. Results improved in 2017 primarily driven by lower foreign exchange losses.

**Liquidity and Capital Resources**

***Liquidity***

Our main financial objectives are to prudently manage financial risks, ensure consistent access to liquidity and minimize cost of capital in order to efficiently finance our business and maintain balance sheet strength. We generally finance our ongoing operations with cash flows generated from operations, issuance of commercial paper, borrowings under various bilateral and syndicated revolving credit facilities, term loans and proceeds from the issuance of senior notes. Acquisitions and long-lived assets are generally financed with a combination of equity and long-term debt.

Our current ratio, which is a widely used measure of liquidity and is defined as current assets divided by current liabilities, was 1.39 and 1.44 at March 31, 2017 and December 31, 2016, respectively.

*Cash and Cash Equivalents* - Cash and cash equivalents were \$676 million and \$934 million at March 31, 2017 and December 31, 2016, respectively. Cash balances are managed in accordance with our investment policy, the objectives of which are to preserve the principal value of our cash assets, maintain a high degree of liquidity and deliver

competitive returns subject to prevailing market conditions. Cash balances are invested in short term deposits with highly-rated financial institutions and in U.S. government securities.

*Readily Marketable Inventories ( RMI )* - RMI are agricultural commodity inventories such as soybeans, soybean meal, soybean oil, corn, wheat and sugar that are readily convertible to cash because of their commodity characteristics, widely available markets and international pricing mechanisms. RMI in our Agribusiness segment are reported at fair value and were \$3,979 million and \$3,593 million at March 31, 2017 and December 31, 2016, respectively. Of these amounts \$2,990 million and \$2,523 million were attributable to merchandising activities at March 31, 2017 and December 31, 2016, respectively. RMI at fair value in the aggregate amount of \$108 million and \$123 million at March 31, 2017 and December 31, 2016, respectively, were included in our Edible Oil Products segment inventories. The Sugar and Bioenergy segment included sugar RMI of \$50 million and \$139 million at March 31, 2017 and December 31, 2016, respectively, which can be attributed to our trading and merchandising business.

*Financing Arrangements and Outstanding Indebtedness* - We conduct most of our financing activities through a centralized financing structure that provides the company efficient access to debt and capital markets. This structure includes a master trust, the primary assets of which consist of intercompany loans made to Bunge Limited and its subsidiaries. Bunge Limited's 100% owned finance subsidiaries, Bunge Limited Finance Corp., Bunge Finance Europe B.V. and Bunge Asset Funding Corp., fund the master trust with short and long-term debt obtained from third parties, including through our commercial paper program and certain credit facilities, as well as the issuance of senior notes. Borrowings by these finance subsidiaries carry full, unconditional guarantees by Bunge Limited.

Table of Contents

*Revolving Credit Facilities* - At March 31, 2017, we had approximately \$5,015 million of aggregate committed borrowing capacity under our commercial paper program and various revolving bilateral and syndicated credit facilities, of which \$4,838 million was unused and available. The following table summarizes these facilities as of the periods presented:

(US\$ in millions) Commercial Paper Program and Revolving Credit Facilities	Maturities	Total Committed Capacity March 31, 2017		Borrowings Outstanding March 31, 2017		December 31, 2016
		\$		\$		\$
Commercial paper	2019	\$	600	\$		\$
Long-term revolving credit facilities (1)	2018-2019		4,415		177	
Total		\$	5,015	\$	177	\$

(1) Borrowings under the revolving credit facilities that have maturities greater than one year from the date of the condensed consolidated balance sheets are classified as long-term debt, consistent with the long-term maturity of the underlying facilities. However, individual borrowings under the revolving credit facilities are generally short-term in nature, bear interest at variable rates and can be repaid or renewed as each such individual borrowing matures.

We had no borrowings outstanding at March 31, 2017 under our three-year unsecured bilateral revolving credit facilities (the Facilities) totalling \$700 million, which are maturing at various dates in June and September, 2019. Borrowings under these Facilities bear interest at LIBOR plus a margin, which will vary from 0.65% to 1.40% per annum based on the credit ratings of our senior long-term unsecured debt. Amounts under the Facilities that remain undrawn are subject to a commitment fee payable at a rate ranging from 0.20% to 0.25%.

We had \$177 million of borrowings outstanding at March 31, 2017 under our \$1,750 million unsecured syndicated revolving credit facility (the Facility) with certain lenders party thereto maturing August 10, 2018. We have the option to request an extension of the maturity date of the Facility for two additional one-year periods. Each lender in its sole discretion may agree to any such request. Borrowings under the Facility bear interest at LIBOR plus a margin, which will vary from 0.35% to 1.35% per annum, based on the credit ratings of our senior long-term unsecured debt. We also pay a fee that varies from 0.10% to 0.40% per annum, based on the utilization of the Facility. Amounts under the Facility that remain undrawn are subject to a commitment fee payable quarterly in arrears at a rate of 35% of the margin specified above, which varies based on the rating level at each quarterly payment date. We may, from time-to-time, with the consent of the facility agent, request one or more of the existing lenders or new lenders to increase the total commitments under the Facility by up to \$250 million pursuant to an accordion provision.

We had no borrowings outstanding at March 31, 2017 under our \$865 million five-year unsecured syndicated revolving credit agreement with CoBank, ACB, (the CoBank Facility) as the administrative agent and certain lender party thereto, maturing May 30, 2018. Borrowings under the CoBank Facility bear interest at LIBOR plus a margin, which will vary between 1.050% and 1.675% per annum based on the credit ratings of our long-term senior unsecured debt. Amounts under the CoBank Facility that remain undrawn are subject to a commitment fee ranging from 0.125% to 0.275% per annum based on the ratings of our long-term senior unsecured debt.

We had no borrowings outstanding at March 31, 2017 under our \$1,100 million five-year unsecured syndicated revolving credit agreement (the Credit Agreement) with certain lenders party thereto, maturing November 20, 2019. Borrowings under the Credit Agreement bear interest at LIBOR plus a margin, which will vary from 1.00% to 1.75% per annum based on the credit ratings of our senior long-term unsecured debt (Rating Level). Amounts under the Credit

Agreement that remain undrawn are subject to a commitment fee ranging from 0.10% to 0.25%, varying based on the Rating Level.

Our commercial paper program is supported by committed back-up bank credit lines (the Liquidity Facility ) equal to the amount of the commercial paper program provided by lending institutions that are required to be rated at least A-1 by Standard & Poor's and P-1 by Moody's Investor Services. The cost of borrowing under the Liquidity Facility would typically be higher than the cost of issuance under our commercial paper program. At March 31, 2017, no borrowings were outstanding under the commercial paper program and no borrowings outstanding under the Liquidity Facility. The Liquidity Facility is our only revolving credit facility that requires lenders to maintain minimum credit ratings.

Table of Contents

In addition to committed credit facilities, from time-to-time, we, through our financing subsidiaries, enter into bilateral short-term credit lines as necessary based on our financing requirements. At both March 31, 2017 and December 31, 2016, there were no outstanding borrowings under these bilateral short-term credit lines.

*Short and long-term debt* - Our short and long-term debt increased by \$443 million at March 31, 2017 from December 31, 2016, primarily due to funding of working capital financing requirements. For the three month period ended at March 31, 2017, our average short and long-term debt outstanding was approximately \$4,976 million compared to approximately \$4,546 million for the three months ended at March 31, 2016. Our long-term debt balance was \$4,204 million at March 31, 2017 compared to \$4,007 million at December 31, 2016. The following table summarizes our short-term debt at March 31, 2017.

(US\$ in millions)	Outstanding Balance at Quarter End	Weighted Average Interest Rate at Quarter End (1)	Highest Balance Outstanding During Quarter (1)	Average Balance During Quarter (1)	Weighted Average Interest Rate During Quarter
Bank borrowings	\$ 503	5.73%	\$ 763	\$ 563	6.03%
Commercial paper		0.00%	458	177	0.98%
Total	\$ 503(1)	5.73%	\$ 1,221	\$ 740	4.82%

(1) Includes \$178 million of local currency borrowings in certain Central and Eastern European, South American, African and Asia Pacific countries at a weighted average interest rate of 12.15% as of March 31, 2017.

The following table summarizes our short and long-term indebtedness:

(US\$ in millions)	March 31, 2017	December 31, 2016
Short-term debt: (1)		
Short-term debt(2)	\$ 503	\$ 257
Current portion of long-term debt	938	938
Total short-term debt	1,441	1,195
Long-term debt (3):		
Revolving credit facilities expiry 2018	177	
Term loan due 2019 - three-month Yen LIBOR plus 0.75% (Tranche A)	255	243
Term loan due 2019 - fixed Yen interest rate of 0.96% (Tranche B)	54	51
Term loan due 2019 - three-month LIBOR plus 1.30% (Tranche C)	85	85
5.90% Senior Notes due 2017	250	250
3.20% Senior Notes due 2017	600	600

<b>Total debt</b>	\$	<b>4,707</b>	\$	<b>4,264</b>

- 
- (1) Includes secured debt of \$7 million at March 31, 2017 and December 31, 2016, respectively.
- (2) Includes \$178 million and \$148 million of local currency borrowings in certain Central and Eastern European, South American, African and Asia-Pacific countries at a weighted average interest rate of 12.15% and 13.63% as of March 31, 2017 and December 31, 2016, respectively.
- (3) Includes secured debt of \$37 million and \$34 million at March 31, 2017 and December 31, 2016, respectively.

*Credit Ratings* Bunge's debt ratings and outlook by major credit rating agencies at March 31, 2017 was as follows:

Table of Contents

	Short-term Debt (1)	Long-term Debt	Outlook
Standard & Poor's	A-1	BBB	Stable
Moody's	P-1	Baa2	Stable
Fitch	F1	BBB	Stable

(1) Short-term debt rating applies only to Bunge Asset Funding Corp., the issuer under our commercial paper program.

Our debt agreements do not have any credit rating downgrade triggers that would accelerate maturity of our debt. However, credit rating downgrades would increase our borrowing costs under our syndicated credit facilities and, depending on their severity, could impede our ability to obtain credit facilities or access the capital markets in the future on competitive terms. A significant increase in our borrowing costs could impair our ability to compete effectively in our business relative to competitors with higher credit ratings.

Our credit facilities and certain senior notes require us to comply with specified financial covenants including minimum net worth, minimum current ratio, a maximum debt to capitalization ratio and limitations on secured indebtedness. We were in compliance with these covenants as of March 31, 2017.

*Trade Receivable Securitization Program* - We initially entered into our trade receivable securitization program (the Program) in June 2011, which provides us with an additional source of liquidity. On May 26, 2016, Bunge and certain of its subsidiaries renewed and amended its \$700 million trade receivables securitization program, which terminates on May 26, 2021. However, each committed purchaser's commitment to fund trade receivables sold under the Program will terminate on May 26, 2019 unless extended in accordance with the terms of the receivables transfer agreement.

**Equity**

Total equity is set forth in the following table:

(US\$ in millions)	March 31, 2017	December 31, 2016
Equity:		
Convertible perpetual preference shares	\$ 690	\$ 690
Common shares	1	1
Additional paid-in capital	5,195	5,143
Retained earnings	8,188	8,208
Accumulated other comprehensive income	(5,726)	(5,978)
Treasury shares, at cost - 2017 and 2016- 12,882,313 shares	(920)	(920)
<b>Total Bunge shareholders' equity</b>	<b>7,428</b>	<b>7,144</b>
Noncontrolling interest	205	199

Edgar Filing: Bunge LTD - Form 10-Q

<b>Total equity</b>	\$	<b>7,633</b>	\$	<b>7,343</b>
---------------------	----	--------------	----	--------------

Total shareholders' equity was \$7,428 million at March 31, 2017 compared to \$7,144 million at December 31, 2016. The increase in shareholders' equity was due to cumulative translation gains of \$261 million, primarily resulting from the appreciation of the Brazilian *real* relative to the U.S. dollar and \$47 million net income attributable to Bunge for the three months ended March 31, 2017. These increases were partially offset by declared dividends to common and preferred shareholders of \$59 million and \$8 million, respectively.

Noncontrolling interest increased to \$205 million at March 31, 2017 from \$199 million at December 31, 2016, primarily due to the deconsolidation of a variable interest entity that was previously consolidated.

As of March 31, 2017, we had 6,899,700 of 4.875% cumulative convertible perpetual preference shares outstanding with an aggregate liquidation preference of \$690 million. Each convertible perpetual preference share has an initial liquidation preference of \$100, which will be adjusted for any accumulated and unpaid dividends. The convertible perpetual preference shares carry an annual dividend of \$4.875 per share payable quarterly. As a result

Table of Contents

of adjustments made to the initial conversion price because cash dividends paid on Bunge Limited's common shares exceeded certain specified thresholds, each convertible perpetual preference share is convertible, at the holder's option, at any time into 1.1551 Bunge Limited common shares, based on the conversion price of \$86.57 per share, subject to certain additional anti-dilution adjustments (which represents 7,969,843 Bunge Limited common shares at March 31, 2017). At any time, if the closing price of our common shares equals or exceeds 130% of the conversion price for 20 trading days during any consecutive 30 trading days (including the last trading day of such period), we may elect to cause the convertible perpetual preference shares to be automatically converted into Bunge Limited common shares at the then-prevailing conversion price. The convertible perpetual preference shares are not redeemable by us at any time.

*Cash Flows*

Our cash flows from operations vary depending on, among other items, the market prices and timing of the purchase and sale of our inventories. Generally, during periods when commodity prices are rising, our agribusiness operations require increased use of cash to support working capital to acquire inventories and fund daily settlement requirements on exchange traded futures that we use to minimize price risk related to our inventories.

For the quarter ended March 31, 2017, our cash and cash equivalents decreased by \$258 million, reflecting the net effect of cash flows from operating, investing and financing activities. This compares to an increase of \$112 million in cash and cash equivalents for the three months ended March 31, 2016.

Cash used for operating activities was \$47 million for the three months ended March 31, 2017 compared to cash provided by operating activities of \$77 million for the three months ended March 31, 2016. Net cash outflows for operating activities for the quarter ended March 31, 2017 were principally due to net income, including adjustments for non-cash items, offset by an increase in the use of cash for net operating assets and liabilities.

Certain of our non-U.S. operating subsidiaries are primarily funded with U.S. dollar-denominated debt, while currency risk is hedged with U.S. dollar denominated assets. The functional currency of our operating subsidiaries is generally the local currency. Also, certain of our U.S. dollar functional operating subsidiaries outside the U.S. are partially funded with local currency borrowings, while the currency risk is hedged with local currency denominated assets. The financial statements of our subsidiaries are calculated in the functional currency, and when the local currency is the functional currency, translated into U.S. dollar. U.S. dollar-denominated loans are remeasured into their respective functional currencies at exchange rates at the applicable balance sheet date. Local currency loans are remeasured into U.S. dollar at the exchange rate at the applicable balance sheet date. The resulting gain or loss is included in our consolidated statements of income as foreign exchange gains or losses. For the three months ended March 31, 2017 and 2016, we recorded a foreign exchange loss of \$14 million and a loss of \$78 million, respectively, which were included as adjustments to reconcile net income to cash used for operating activities in the line item Foreign exchange loss (gain) on debt in our condensed consolidated statements of cash flows. This adjustment is required because the cash flow impacts of these gains or losses are non-cash items and will represent financing activities when the subsidiary repays the underlying debt and therefore will have no impact on cash flows from operations.

Cash used for investing activities was \$607 million in the three months ended March 31, 2017 compared to \$212 million in the three months ended March 31, 2016. For the three months ended March 31, 2017, payments were made for capital expenditures of \$182 million, primarily related to upgrade and expansion of an export terminal in the U.S., replanting of sugarcane for our industrial sugar business and the expansion of two crushing facilities in Brazil. In addition, we acquired two

oilseed processing plants in the Netherlands and France for \$344 million, subject to working capital adjustments, an olive oil and seed oil producer in Turkey for \$23 million, net of cash acquired. For the three months ended March 31, 2016, payments made for capital expenditures were \$110 million, primarily related to upgrade and expansion of an export terminal in the U.S., replanting of sugarcane for our industrial sugar business in Brazil and continued construction of a wheat milling facility in Brazil.

Cash provided by financing activities was \$376 million in the three months ended March 31, 2017, compared to cash provided by financing activities of \$219 million in the three months ended March 31, 2016. In the three months ended March 31, 2017, the net increase of \$402 million in borrowings was primarily used to fund acquisitions and finance capital expenditures. In addition, we paid dividends of \$67 million to our common shareholders and holders of our convertible preference shares. In the three months ended March 31, 2016, the net increase of \$469 million in borrowings was primarily used to fund working capital and finance capital expenditures.

Table of Contents

In addition, we paid dividends of \$62 million to our common shareholders and holders of our convertible preference shares. Further, in connection with our common share repurchase program, in 2016 we purchased 2,965,349 of our common shares at a cost of \$181 million.

**Off-Balance Sheet Arrangements**

*Guarantees* - We have issued or were a party to the following guarantees at March 31, 2017:

(US\$ in millions)	Maximum Potential Future Payments
Unconsolidated affiliates financing (1)(2)	\$ 190
Residual value guarantee (3)	227
<b>Total</b>	<b>\$ 417</b>

(1) We issued guarantees to certain financial institutions related to debt of certain of our unconsolidated joint ventures. The terms of the guarantees are equal to the terms of the related financings which have maturity dates in 2017 through 2022. There are no recourse provisions or collateral that would enable us to recover any amounts paid under these guarantees. At March 31, 2017, we recorded no obligation related to these guarantees.

(2) We issued guarantees to certain third parties related to performance of its unconsolidated joint ventures. The term of the guarantees are equal to the completion date of a port terminal which is expected to be completed in 2019. There are no recourse provisions or collateral that would enable us to recover any amounts paid under these guarantees. At March 31, 2017, we recorded no obligation related to these guarantees.

(3) We issued guarantees to certain financial institutions which are party to certain operating lease arrangements for railcars and barges. These guarantees provide for a minimum residual value to be received by the lessor at the conclusion of the lease term. These leases expire at various dates from 2018 through 2021. At March 31, 2017, our recorded obligation related to these guarantees was \$4 million.

Bunge Limited has provided a Guaranty to the Director of the Illinois Department of Agriculture as Trustee for Bunge North America, Inc. ( BNA ), an indirect wholly-owned subsidiary, which guarantees all amounts due and owing by BNA, to grain producers and/or depositors in the State of Illinois who have delivered commodities to BNA s Illinois facilities.

In addition, Bunge Limited has provided full and unconditional parent level guarantees of the outstanding indebtedness under certain credit facilities entered into and senior notes issued by its 100% owned subsidiaries. At March 31, 2017, debt with a carrying amount of

## Edgar Filing: Bunge LTD - Form 10-Q

\$4,452 million related to these guarantees is included in our condensed consolidated balance sheet. This debt includes the senior notes issued by two of our 100% owned finance subsidiaries, Bunge Limited Finance Corp., Bunge Finance Europe B.V. and Bunge N.A. Finance L.P. There are no significant restrictions on the ability of Bunge Limited Finance Corp., Bunge N.A. Finance L.P. or any other of our subsidiaries to transfer funds to Bunge Limited.

### **Dividends**

We paid a regular quarterly cash dividend of \$0.42 per share on March 2, 2017 to common shareholders of record on February 16, 2017. In addition, we paid a quarterly dividend of \$1.21875 per share on our cumulative convertible perpetual preference shares on March 1, 2017 to shareholders of record on February 15, 2017. On March 8, 2017, we announced that our Board of Directors had approved a regular quarterly cash dividend of \$0.42 per common share. The dividend will be payable on June 2, 2017 to common shareholders of record on May 19, 2017. We also announced on March 8, 2017 that we will pay a quarterly cash dividend of \$1.21875 per share on our cumulative convertible perpetual preference shares on June 1, 2017 to shareholders of record on May 15, 2017.

### **Critical Accounting Policies and Estimates**

Critical accounting policies are defined as those policies that are both important to the portrayal of our financial condition and results of operations and require management to exercise significant judgment. For a complete discussion of our accounting policies, see our Annual Report on Form 10-K for the year ended December 31, 2016, filed with the Securities and Exchange Commission. There were no material changes to Bunge's critical accounting policies during the three months ended March 31, 2017. For recent accounting pronouncements refer to Note 2 to the condensed consolidated financial statements in this Quarterly Report on Form 10-Q.

Table of Contents

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

***Risk Management***

As a result of our global operating and financing activities, we are exposed to changes in, among other things, agricultural commodity prices, transportation costs, foreign currency exchange rates, interest rates and energy costs which may affect our results of operations and financial position. We actively monitor and manage these various market risks associated with our business activities. Our risk management decisions take place in various locations but exposure limits are centrally set and monitored, operating under a global governance framework. We have a corporate risk management group which analyzes and monitors various risk exposures globally. Additionally, our Board of Directors Finance and Risk Policy Committee oversees our global governance framework including all risk management policies and limits.

We use derivative instruments for the purpose of managing the exposures associated with commodity prices, transportation costs, foreign currency exchange rates, interest rates and energy costs and for positioning our overall portfolio relative to expected market movements in accordance with established policies and procedures. We enter into derivative instruments primarily with major financial institutions, commodity exchanges in the case of commodity futures and options, or approved exchange clearing shipping companies in the case of ocean freight. While these derivative instruments are subject to fluctuations in value, for hedged exposures those fluctuations are generally offset by the changes in fair value of the underlying exposures. The derivative instruments that we use for hedging purposes are intended to reduce the volatility on our results of operations; however, they can occasionally result in earnings volatility, which may be material. See Note 10 to the condensed consolidated financial statements in this Quarterly Report on Form 10-Q for a more detailed discussion of our use of derivative instruments.

***Credit and Counterparty Risk***

Through our normal business activities, we are subject to significant credit and counterparty risks that arise through normal commercial sales and purchases, including forward commitments to buy or sell, and through various other OTC derivative instruments that we utilize to manage risks inherent in our business activities. We define credit and counterparty risk as a potential financial loss due to the failure of a counterparty to honor its obligations. The exposure is measured based upon several factors, including unpaid accounts receivable from counterparties and unrealized gains from OTC derivative instruments (including forward purchase and sale contracts). Credit and counterparty risk also includes sovereign credit risk. We actively monitor credit and counterparty risk through credit analysis by the local credit staff and review by various local and corporate committees which monitor counterparty performance. We record provisions for counterparty losses from time to time as a result of our credit and counterparty analysis.

During periods of tight conditions in global credit markets, downturns in regional or global economic conditions, and/or significant price volatility, credit and counterparty risks are heightened. This increased risk is monitored through, among other things, increased communication with key counterparties, management reviews and specific focus on counterparties or groups of counterparties that we may determine as high risk. In addition, we have limited new credit extensions in certain cases and reduced our use of non-exchange cleared derivative instruments.

***Commodities Risk***

We operate in many areas of the food industry, from agricultural raw materials to the production and sale of branded food products. As a result, we purchase and produce various materials, many of which are agricultural commodities, including soybeans, soybean oil, soybean meal, softseeds (including sunflower seed, rapeseed and canola) and related oil and meal derived from them, wheat and corn. In addition, we grow and purchase sugarcane to produce sugar, ethanol and electricity. Agricultural commodities are subject to price fluctuations due to a number of unpredictable factors that may create price risk. As described above, we are also subject to the risk of counterparty non-performance under forward purchase or sale contracts. From time-to-time, we have experienced instances of counterparty non-performance, including as a result of significant declines in counterparty profitability under these contracts due to significant movements in commodity prices between the time the contracts were executed and the contractual forward delivery period.

We enter into various derivative contracts with the primary objective of managing our exposure to adverse price movements in the agricultural commodities used and produced in our business operations. We have

Table of Contents

established policies that limit the amount of unhedged fixed price agricultural commodity positions permissible for our operating companies, which are generally a combination of volume and value-at-risk ( VaR ) limits. We measure and review our net commodities position on a daily basis. Bunge also employs stress testing techniques in order to quantify its exposures to price and liquidity risks under non-normal or event driven market conditions.

Our daily net agricultural commodity position consists of inventory, forward purchase and sale contracts, OTC and exchange traded derivative instruments, including those used to hedge portions of our production requirements. The fair value of that position is a summation of the fair values calculated for each agricultural commodity by valuing all of our commodity positions at quoted market prices for the period where available or utilizing a close proxy. VaR is calculated on the net position and monitored at the 95% confidence interval. In addition, scenario analysis and stress testing are performed. For example, one measure of market risk is estimated as the potential loss in fair value resulting from a hypothetical 10% adverse change in prices. The results of this analysis, which may differ from actual results, are as follows:

(US\$ in millions)	Three Months Ended March 31, 2017		Year Ended December 31, 2016	
	Value	Market Risk	Value	Market Risk
Highest daily aggregated position value	\$ 200	\$ (20)	\$ 1,207	\$ (121)
Lowest daily aggregated position value	\$ (475)	\$ (48)	\$ (682)	\$ (68)

***Ocean Freight Risk***

Ocean freight represents a significant portion of our operating costs. The market price for ocean freight varies depending on the supply and demand for ocean vessels, global economic conditions and other factors. We enter into time charter agreements for time on ocean freight vessels based on forecasted requirements for the purpose of transporting agricultural commodities. Our time charter agreements generally have terms ranging from two months to approximately seven years. We use financial derivatives, generally freight forward agreements, to hedge portions of our ocean freight costs. The ocean freight derivatives are included in other current assets and other current liabilities on the condensed consolidated balance sheets at fair value.

***Energy Risk***

We purchase various energy commodities such as electricity, natural gas and bunker fuel that are used to operate our manufacturing facilities and ocean freight vessels. The energy commodities are subject to price risk. We use financial derivatives, including exchange traded and OTC swaps and options for various purposes, including to manage our exposure to volatility in energy costs. These energy derivatives are included in other current assets and other current liabilities on the condensed consolidated balance sheets at fair value.

***Currency Risk***

## Edgar Filing: Bunge LTD - Form 10-Q

Our global operations require active participation in foreign exchange markets. Our primary foreign currency exposures are the Brazilian *real*, Canadian *dollar*, the *euro* and other European currencies, the Argentine *peso*, and the Chinese *yuan/renminbi*. To reduce the risk arising from foreign exchange rate fluctuations, we enter into derivative instruments, such as foreign currency forward contracts, swaps, and options. The changes in market value of such contracts have a high correlation to the price changes in the related currency exposures. The potential loss in fair value for such net currency position resulting from a hypothetical 10% adverse change in foreign currency exchange rates as of March 31, 2017 was not material.

When determining our exposure, we exclude intercompany loans that are deemed to be permanently invested. The repayments of permanently invested intercompany loans are not planned or anticipated in the foreseeable future and therefore are treated as analogous to equity for accounting purposes. As a result, the foreign exchange gains and losses on these borrowings are excluded from the determination of net income and recorded as a component of accumulated other comprehensive income (loss) in the condensed consolidated balance sheets. Included in other comprehensive income (loss) are foreign exchange gains (losses) of \$70 million for the three months ended March 31, 2017 and foreign exchange losses of \$(257) million for the year ended December 31, 2016 related to permanently invested intercompany loans.

Table of Contents

***Interest Rate Risk***

We have debt in fixed and floating rate instruments. We are exposed to market risk due to changes in interest rates. We may enter into interest rate swap agreements to manage our interest rate exposure related to our debt portfolio.

The aggregate fair value of our short and long-term debt based on market yields at March 31, 2017, was \$4,854 million with a carrying value of \$4,707 million. There was no significant change in our interest rate risk at March 31, 2017.

A hypothetical 100 basis point increase in the interest yields on our senior note debt at March 31, 2017 would result in a decrease of approximately \$20 million in the fair value of our debt. Similarly, a decrease of 100 basis points in the interest yields on our debt at March 31, 2017 would cause an increase of approximately \$24 million in the fair value of our debt.

A hypothetical 1% change in LIBOR would result in a change of approximately \$40 million in our interest expense on our variable rate debt at March 31, 2017. Some of our variable rate debt is denominated in currencies other than in U.S. dollars and is indexed to non-U.S. dollar-based interest rate indices, such as EURIBOR and TJLP and certain benchmark rates in local bank markets. As such, the hypothetical 1% change in interest rate ignores the potential impact of any currency movements.

**ITEM 4. CONTROLS AND PROCEDURES**

*Disclosure Controls and Procedures* - Disclosure controls and procedures are the controls and other procedures that are designed to provide reasonable assurance that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act of 1934, as amended (the Exchange Act) is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including the principal executive and principal financial officer, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure.

As of March 31, 2017, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as that term is defined in Exchange Act Rules 13a-15(e) and 15d-15(e), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of the end of the period covered by this Quarterly Report on Form 10-Q.

*Internal Controls Over Financial Reporting* There have been no changes in the Company's internal controls over financial reporting during the first quarter ended March 31, 2017, that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

Table of Contents

**PART II.**  
**INFORMATION**

**ITEM 1. LEGAL PROCEEDINGS**

From time-to-time, we are involved in litigation that we consider to be ordinary and incidental to our business. While the outcome of pending legal actions cannot be predicted with certainty, we believe the outcome of these proceedings, net of established reserves, will not have a material adverse effect on our consolidated financial position, results of operations or liquidity.

For a discussion of certain legal and tax matters relating to Argentina and Brazil, see Notes 8 and 14 our consolidated financial statements included as part of this Quarterly Report on Form 10-Q. Additionally, we are a party to a large number of labor and civil claims relating to our Brazilian operations. We have reserved an aggregate of \$86 million and \$74 million, for labor and civil claims respectively, as of March 31, 2017. The labor claims primarily relate to dismissals, severance, health and safety, salary adjustments and supplementary retirement benefits. The civil claims relate to various legal proceedings and disputes, including disputes with suppliers and customers and include approximately 97 million Brazilian *reais* (approximately \$31 million as of March 31, 2017) related to a legacy environmental claim in Brazil.

**ITEM 1A. RISK FACTORS**

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our 2016 Annual Report on Form 10-K, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

None.

**ITEM 3. DEFAULTS UPON SENIOR SECURITIES**
