CRACKER BARREL OLD COUNTRY STORE, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(In thousands, except percentages, share and per share data)

(Unaudited)

1. Condensed Consolidated Financial Statements

Cracker Barrel Old Country Store, Inc. and its affiliates (collectively, in these Notes to Condensed Consolidated Financial Statements, the “Company”) are principally engaged in the operation and development in the United States of the Cracker Barrel Old Country Store® (“Cracker Barrel”) concept.

The condensed consolidated balance sheets at April 27, 2018 and July 28, 2017 and the related condensed consolidated statements of income, comprehensive income and cash flows for the quarters and/or the nine-month periods ended April 27, 2018 and April 28, 2017, respectively, have been prepared by the Company in accordance with accounting principles generally accepted in the United States of America and pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) without audit. In the opinion of management, all adjustments (consisting of normal and recurring items) necessary for a fair presentation of such condensed consolidated financial statements have been made. The results of operations for any interim period are not necessarily indicative of results for a full year.

These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto contained in the Company’s Annual Report on Form 10-K for the year ended July 28, 2017 (the “2017 Form 10-K”). The accounting policies used in preparing these condensed consolidated financial statements are the same as described in the 2017 Form 10-K. References to a year in these Notes to Condensed Consolidated Financial Statements are to the Company’s fiscal year unless otherwise noted.

Recent Accounting Pronouncements Adopted

Inventory

In July 2015, the Financial Accounting Standards Board (“FASB”) issued accounting guidance which requires companies to measure certain inventory at the lower of cost and net realizable value. This accounting guidance does not apply to inventories measured by using either the last-in, first-out method or the retail inventory method. This accounting guidance is effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years on a prospective basis. The adoption of this accounting guidance in the first quarter of 2018 did not have a significant impact on the Company’s consolidated financial position or results of operations.

Deferred Taxes

In November 2015, in order to simplify the presentation of deferred income taxes, the FASB issued accounting guidance which requires deferred tax liabilities and assets to be classified as noncurrent in the balance sheet. This accounting guidance is effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. This accounting guidance may be applied either prospectively to all deferred tax liabilities and assets or retrospectively to all periods presented. Other than the revised balance sheet presentation of deferred tax liabilities and assets, the adoption of this accounting guidance on a prospective basis in the first quarter of 2018 did not have a significant impact on the Company’s consolidated financial position or results of operations. Prior periods were not retrospectively adjusted for the adoption of this accounting guidance.

Index

Share-Based Payments

In March 2016, the FASB issued accounting guidance in order to simplify certain aspects of the accounting and presentation of share-based payments, including the income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. This accounting guidance is effective for fiscal periods beginning after December 15, 2016, and interim periods within those fiscal years. This guidance may be applied either on a prospective basis, retrospective basis or a modified retrospective basis depending on the specific accounting topic covered in the accounting guidance. The Company adopted this accounting guidance in the first quarter of 2018. The impact of recognizing excess tax benefits of \$759 as a reduction to the provision for income taxes on a prospective basis resulted in a benefit of \$0.03 per diluted share in the first quarter of 2018. The Company elected to apply the presentation of excess tax benefits on the statement of cash flows on a prospective basis; prior periods were not retrospectively adjusted. The Company also elected to continue estimating forfeitures of share-based awards.

Recent Accounting Pronouncements Not Yet Adopted

Revenue Recognition

In May 2014, the FASB issued accounting guidance which clarifies the principles for recognizing revenue and provides a comprehensive model for revenue recognition. Revenue recognition should depict the transfer of goods or services to a customer at an amount that reflects the consideration a company expects to receive in exchange for those goods or services. The guidance also requires additional disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts. This accounting guidance is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early application is permitted for fiscal years beginning after December 15, 2016. A company may apply this accounting guidance either retrospectively or by using the cumulative effect transition method. The Company is currently evaluating the impact of adopting this accounting guidance in the first quarter of 2019.

Leases

In February 2016, the FASB issued accounting guidance which requires the recognition of lease assets and lease liabilities on the balance sheet and disclosure of key information about leasing arrangements. The accounting guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years on a modified retrospective basis. Early adoption is permitted. The Company is currently evaluating the impact of adopting this accounting guidance in the first quarter of 2020.

Recognition of Breakage for Certain Prepaid Stored-Value Products

In March 2016, in order to address diversity in practice related to the derecognition of a prepaid stored-value product liability, the FASB issued accounting guidance requiring breakage for prepaid stored-value product liabilities to be accounted for consistent with the breakage guidance in the revenue recognition standard (see “Revenue Recognition” above). This accounting guidance is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. This accounting guidance may be applied either on a modified retrospective basis or on a retrospective basis. Early application is permitted. The Company is currently evaluating the impact of adopting this accounting guidance in the first quarter of 2019.

Modification of Share-Based Payment Awards

In May 2017, the FASB issued accounting guidance to provide clarity, reduce the diversity in practice and to simplify the accounting guidance related to a change to the terms or conditions of a share-based payment award. This new

standard provides guidance for evaluating which changes to the terms or conditions of a share-based payment award are substantive and require modification accounting to be applied. This accounting guidance is effective for fiscal periods beginning after December 15, 2017, and interim periods within those fiscal years on a prospective basis. Early adoption is permitted. The Company is currently evaluating the impact of adopting this accounting guidance in the first quarter of 2019.

Index

## Accounting for Hedging Activities

In August 2017, the FASB issued accounting guidance which amends the recognition, presentation and disclosure requirements of hedge accounting in order to better portray the economics of entities' risk management activities, increase transparency and understandability of hedging relationships and simplify the application of hedge accounting. This accounting guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early application is permitted. The recognition requirements for cash flow and net investment hedges existing at the date of adoption will be applied using a cumulative-effect adjustment to retained earnings. The amended presentation and disclosure requirements will be applied on a prospective basis. The Company is currently evaluating the impact of adopting this accounting guidance in the first quarter of 2020.

## Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income

On December 22, 2017, the U.S. government enacted P.L. 115-97, the Tax Cuts and Jobs Act (the "Tax Act"). In February 2018, the FASB issued accounting guidance which allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulted from the Tax Act. This accounting guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. If elected, this accounting guidance should be applied either in the period of adoption or retrospectively to each period in which the change in the U.S. federal corporate rate in the Tax Act is recognized. Early application is permitted. The Company is currently evaluating the impact of adopting this accounting guidance in the first quarter of 2020.

2. Fair Value Measurements

The Company's assets and liabilities measured at fair value on a recurring basis at April 27, 2018 were as follows:

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Fair Value
Cash equivalents*	\$ 93,446	\$ --	\$ --	\$ 93,446
Interest rate swap asset (see Note 5)	--	5,968	--	5,968
Deferred compensation plan assets**	31,784	--	--	31,784
Total assets at fair value	\$ 125,230	\$ 5,968	\$ --	\$ 131,198
Interest rate swap liability (see Note 5)	\$ --	\$ 37	\$ --	\$ 37
Total liabilities at fair value	\$ --	\$ 37	\$ --	\$ 37

The Company's assets and liabilities measured at fair value on a recurring basis at July 28, 2017 were as follows:

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Fair Value
Cash equivalents*	\$ 82,524	\$ --	\$ --	\$ 82,524
Interest rate swap asset (see Note 5)	--	32	--	32
Deferred compensation plan assets**	31,196	--	--	31,196
Total assets at fair value	\$ 113,720	\$ 32	\$ --	\$ 113,752

Edgar Filing: CRACKER BARREL OLD COUNTRY STORE, INC - Form 10-Q

Interest rate swap liability (see Note 5)	\$ --	\$ 6,880	\$ --	\$ 6,880
Total liabilities at fair value	\$ --	\$ 6,880	\$ --	\$ 6,880

\*Consists of money market fund investments.

\*\*Represents plan assets invested in mutual funds established under a rabbi trust for the Company's non-qualified savings plan and is included in the Condensed Consolidated Balance Sheets as other assets.

9

---

Index

The Company's money market fund investments and deferred compensation plan assets are measured at fair value using quoted market prices. The fair values of the Company's interest rate swap assets and liabilities are determined based on the present value of expected future cash flows. Since the values of the Company's interest rate swaps are based on the LIBOR forward curve, which is observable at commonly quoted intervals for the full terms of the swaps, it is considered a Level 2 input. Non-performance risk is reflected in determining the fair value of the interest rate swaps by using the Company's credit spread less the risk-free interest rate, both of which are observable at commonly quoted intervals for the terms of the swaps. Thus, the adjustment for non-performance risk is also considered a Level 2 input.

The fair values of the Company's accounts receivable and accounts payable approximate their carrying amounts because of their short duration. The fair value of the Company's variable rate debt, based on quoted market prices, which are considered Level 1 inputs, approximates its carrying amount at April 27, 2018 and July 28, 2017.

3. Inventories

Inventories were comprised of the following at:

	April 27, 2018	July 28, 2017
Retail	\$ 117,557	\$ 119,446
Restaurant	22,058	20,252
Supplies	17,376	16,669
Total	\$ 156,991	\$ 156,367

4. Debt

The Company has a \$750,000 revolving credit facility (the "Revolving Credit Facility"), which expires on January 8, 2020. At both April 27, 2018 and July 28, 2017, the Company had \$400,000 of outstanding borrowings under the Revolving Credit Facility. At April 27, 2018, the Company had \$9,455 of standby letters of credit, which reduce the Company's borrowing availability under the Revolving Credit Facility (see Note 13 for more information on the Company's standby letters of credit). At April 27, 2018, the Company had \$340,545 in borrowing availability under the Revolving Credit Facility.

In accordance with the Revolving Credit Facility, outstanding borrowings bear interest, at the Company's election, either at LIBOR or prime plus a percentage point spread based on certain specified financial ratios under the Revolving Credit Facility. As of April 27, 2018, the Company's outstanding borrowings were swapped at a weighted average interest rate of 3.21% (see Note 5 for information on the Company's interest rate swaps).

The Revolving Credit Facility contains customary financial covenants, which include maintenance of a maximum consolidated total leverage ratio and a minimum consolidated interest coverage ratio. At April 27, 2018, the Company was in compliance with all financial covenants.

The Revolving Credit Facility also imposes restrictions on the amount of dividends the Company is permitted to pay and the amount of shares the Company is permitted to repurchase. Under the Revolving Credit Facility, provided there is no default existing and the total of the Company's availability under the Revolving Credit Facility plus the Company's cash and cash equivalents on hand is at least \$100,000 (the "cash availability"), the Company may declare and pay cash dividends on shares of its common stock and repurchase shares of its common stock (1) in an unlimited amount if, at the time such dividend or repurchase is made, the Company's consolidated total leverage ratio is 3.00 to 1.00 or less and (2) in an aggregate amount not to exceed \$100,000 in any fiscal year if the Company's consolidated total leverage ratio is greater than 3.00 to 1.00 at the time the dividend or repurchase is made; notwithstanding (1) and (2), so long as immediately after giving effect to the payment of any such dividends, cash availability is at least

\$100,000, the Company may declare and pay cash dividends on shares of its common stock in an aggregate amount not to exceed in any fiscal year the product of the aggregate amount of dividends declared in the fourth quarter of the immediately preceding fiscal year multiplied by four.

Index5. Derivative Instruments and Hedging Activities

The Company has interest rate risk relative to its outstanding borrowings (see Note 4 for information on the Company's outstanding borrowings). The Company's policy has been to manage interest cost using a mix of fixed and variable rate debt. To manage this risk in a cost-efficient manner, the Company uses derivative instruments, specifically interest rate swaps.

For each of the Company's interest rate swaps, the Company has agreed to exchange with a counterparty the difference between fixed and variable interest amounts calculated by reference to an agreed-upon notional principal amount. The interest rates on the portion of the Company's outstanding debt covered by its interest rate swaps are fixed at the rates in the table below plus the Company's credit spread. The Company's credit spread at April 27, 2018 was 1.00%. All of the Company's interest rate swaps are accounted for as cash flow hedges.

A summary of the Company's interest rate swaps at April 27, 2018 is as follows:

Trade Date	Effective Date	Term (in Years)	Notional Amount	Fixed Rate
March 18, 2013	May 3, 2015	3	\$ 50,000	1.51 %
April 22, 2013	May 3, 2015	3	25,000	1.30 %
April 25, 2013	May 3, 2015	3	25,000	1.29 %
June 18, 2014	May 3, 2015	4	120,000	2.51 %
June 24, 2014	May 3, 2015	4	90,000	2.51 %
July 1, 2014	May 5, 2015	4	90,000	2.43 %
January 30, 2015	May 3, 2019	2	80,000	2.15 %
January 30, 2015	May 3, 2019	2	60,000	2.16 %
January 30, 2015	May 4, 2021	3	120,000	2.41 %
January 30, 2015	May 3, 2019	2	60,000	2.15 %
January 30, 2015	May 4, 2021	3	80,000	2.40 %

The notional amount for the interest rate swap entered into on June 18, 2014 increases to \$160,000 in May 2018. The notional amounts for the interest rate swaps entered into on June 24, 2014 and July 1, 2014 each increase to \$120,000 in May 2018.

The Company does not hold or use derivative instruments for trading purposes. The Company also does not have any derivatives not designated as hedging instruments and has not designated any non-derivatives as hedging instruments.

Companies may elect to offset related assets and liabilities and report the net amount on their financial statements if the right of setoff exists. Under a master netting agreement, the Company has the legal right to offset the amounts owed to the Company against amounts owed by the Company under a derivative instrument that exists between the Company and a counterparty. When the Company is engaged in more than one outstanding derivative transaction with the same counterparty and also has a legally enforceable master netting agreement with that counterparty, its credit risk exposure is based on the net exposure under the master netting agreement. If, on a net basis, the Company owes the counterparty, the Company regards its credit exposure to the counterparty as being zero.

The estimated fair values of the Company's derivative instruments as of April 27, 2018 and July 28, 2017 were as follows:

(See Note 2)	Balance Sheet Location	April 27, 2018	July 28, 2017
Interest rate swaps	Prepaid expenses and other current assets	\$ 5	\$ 32
Interest rate swaps	Other assets	5,963	--

Total assets	\$ 5,968	\$ 32
Interest rate swaps Other current liabilities	\$ --	\$ 47
Interest rate swaps Other long-term obligations	37	6,833
Total liabilities	\$ 37	\$ 6,880

\*These interest rate swap assets and liabilities are recorded at gross at both April 27, 2018 and July 28, 2017 since there were no offsetting assets and liabilities under the Company's master netting agreements.

Index

The estimated fair value of the Company's interest rate swap assets and liabilities incorporates the Company's non-performance risk (see Note 2). The adjustment related to the Company's non-performance risk at April 27, 2018 and July 28, 2017 resulted in reductions of \$198 and \$103, respectively, in the fair value of the interest rate swap liabilities. The offset to the interest rate swap asset and liabilities is recorded in accumulated other comprehensive income (loss) ("AOCIL"), net of the deferred tax asset, and will be reclassified into earnings over the term of the underlying debt. As of April 27, 2018, the estimated pre-tax portion of AOCIL that is expected to be reclassified into earnings over the next twelve months is \$153. Cash flows related to the interest rate swaps are included in interest expense and in operating activities.

The following table summarizes the pre-tax effects of the Company's derivative instruments on AOCIL for the nine months ended April 27, 2018 and the year ended July 28, 2017:

	Amount of Income Recognized in AOCIL on Derivatives (Effective Portion)	
	Nine Months Ended	Year Ended
	April 27, 2018	July 28, 2017
Cash flow hedges:		
Interest rate swaps	\$ 12,779	\$ 15,402

The following table summarizes the pre-tax effects of the Company's derivative instruments on income for the quarters and nine-month periods ended April 27, 2018 and April 28, 2017:

	Location of Loss Reclassified from AOCIL into Income (Effective Portion)			
	Amount of Loss Reclassified from AOCIL into Income (Effective Portion)			
	Quarter Ended		Nine Months Ended	
	April 27, 2018	April 28, 2017	April 27, 2018	April 28, 2017
Cash flow hedges:				
Interest rate swaps Interest expense	\$ 865	\$ 993	\$ 2,852	\$ 3,354

Any portion of the fair value of the swaps determined to be ineffective will be recognized currently in earnings. No ineffectiveness has been recorded in the nine-month periods ended April 27, 2018 and April 28, 2017.

6. Shareholders' Equity

During the nine months ended April 27, 2018, the Company issued 47,929 shares of its common stock resulting from the vesting of share-based compensation awards and stock option exercises. Related tax withholding payments on these share-based compensation awards exceeded proceeds received from the exercise of stock options, which resulted in a net reduction to shareholders' equity of \$3,360.

During the nine months ended April 27, 2018, the Company repurchased 100,000 shares of its common stock in the open market at an aggregate cost of \$14,772.

During the nine months ended April 27, 2018, total share-based compensation expense was \$6,063.

During the nine months ended April 27, 2018, the Company paid regular dividends of \$3.60 per share of its common stock and declared a regular dividend of \$1.20 per share of its common stock that was paid on May 7, 2018 to shareholders of record on April 13, 2018. On May 22, 2018, the Company declared a regular dividend of \$1.25 per

share of its common stock to be paid on August 6, 2018 to shareholders of record on July 13, 2018. Additionally, on May 22, 2018, the Company declared a special dividend of \$3.75 per share of its common stock to be paid on August 3, 2018 to shareholders of record on July 13, 2018.

Index

The following table summarizes the changes in AOCIL, net of tax, related to the Company's interest rate swaps for the nine months ended April 27, 2018 (see Notes 2 and 5):

	Changes in AOCIL	
AOCIL balance at July 28, 2017	\$ (4,229	)
Other comprehensive income before reclassifications	10,661	
Amounts reclassified from AOCIL	(1,981	)
Other comprehensive income, net of tax	8,680	
AOCIL balance at April 27, 2018	\$ 4,451	

The following table summarizes the amounts reclassified out of AOCIL related to the Company's interest rate swaps for the quarter and nine months ended April 27, 2018:

	Amount Reclassified from AOCIL		Affected Line Item in the Condensed Consolidated Financial Statements
	Quarter Ended	Nine Months Ended	
Loss on cash flow hedges:			
Interest rate swaps	\$ (865 )	\$ (2,852 )	)Interest expense
Tax benefit	264	871	Provision for income taxes
	\$ (601 )	\$ (1,981 )	)Net of tax

7. Seasonality

Historically, the net income of the Company has been lower in the first and third quarters and higher in the second and fourth quarters. Management attributes these variations to the holiday shopping season and the summer vacation and travel season. The Company's retail sales, which are made substantially to the Company's restaurant customers, historically have been highest in the Company's second quarter, which includes the holiday shopping season. Historically, interstate tourist traffic and the propensity to dine out have been higher during the summer months, thereby contributing to higher profits in the Company's fourth quarter. The Company generally opens additional new locations throughout the year. Therefore, the results of operations for any interim period cannot be considered indicative of the operating results for an entire year.

8. Segment Information

Cracker Barrel stores represent a single, integrated operation with two related and substantially integrated product lines. The operating expenses of the restaurant and retail product lines of a Cracker Barrel store are shared and are indistinguishable in many respects. Accordingly, the Company currently manages its business on the basis of one reportable operating segment. All of the Company's operations are located within the United States. Total revenue was comprised of the following for the specified periods:

	Quarter Ended		Nine Months Ended	
	April 27, 2018	April 28, 2017	April 27, 2018	April 28, 2017
Revenue:				
Restaurant	\$592,677	\$575,098	\$1,774,112	\$1,739,888
Retail	128,736	125,312	445,440	443,175
Total revenue	\$721,413	\$700,410	\$2,219,552	\$2,183,063

9. Share-Based Compensation

Share-based compensation is recorded in general and administrative expenses in the accompanying Condensed Consolidated Statements of Income. Total share-based compensation was comprised of the following for the specified periods:

	Quarter Ended		Nine Months Ended	
	April			
	27, 2018	April 28, 2017	April 27, 2018	April 28, 2017
Nonvested stock awards	\$1,495	\$ 1,947	\$ 5,414	\$ 5,045
Performance-based market stock units ("MSU Grants")	247	389	649	1,302
	\$1,742	\$ 2,336	\$ 6,063	\$ 6,347

Index

10. Shareholder Rights Plans

On April 9, 2018, the Company's Board of Directors declared a dividend of one preferred share purchase right (a "Right") for each outstanding share of common stock, par value \$0.01 per share, and adopted a shareholder rights plan, as set forth in the Rights Agreement dated as of April 9, 2018 (the "Rights Agreement"), by and between the Company and American Stock Transfer & Trust Company, LLC, as rights agent. The dividend was payable on April 19, 2018 to the shareholders of record on April 19, 2018. The Rights Agreement replaced the Company's previous shareholder rights plan adopted in 2015 (the "2015 Plan"), and it became effective immediately following the expiration of the 2015 Plan at the close of business on April 9, 2018. The 2015 Plan and the preferred share purchase rights issued thereunder expired by their own terms and shareholders of the Company were not entitled to any payment as a result of the expiration of the 2015 Plan. The Rights Agreement will terminate unless approved by shareholders at the Company's 2018 annual meeting.

The Rights

The Rights initially trade with, and are inseparable from, the Company's common stock. The Rights are evidenced only by the balances indicated in the book-entry account system of the transfer agent for the Company's common stock or, in the case of certificated shares, by certificates that represent shares of the Company's common stock. New Rights will accompany any new shares of common stock the Company issues after April 19, 2018 until the earlier to occur of the Distribution Date, redemption of the Rights by the Company's Board of Directors or the final expiration of the Rights Agreement, each as described below.

Exercise Price

Each Right will allow its holder to purchase from the Company one one-hundredth of a share of Series A Junior Participating Preferred Stock ("Preferred Share") for \$600.00 (the "Exercise Price"), once the Rights become exercisable. This portion of a Preferred Share will give the shareholder approximately the same dividend and liquidation rights as would one share of common stock. Prior to exercise, the Right does not give its holder any dividend, voting, or liquidation rights.

Exercisability

The Rights will not be exercisable until 10 days after the public announcement that a person or group has become an "Acquiring Person" by obtaining beneficial ownership of 20% or more of the Company's outstanding common stock.

Shares held by affiliates and associates of an Acquiring Person, and Notional Common Shares (as defined in the Rights Agreement) held by counterparties to a Derivatives Contract (as defined in the Rights Agreement) with an Acquiring Person, will be deemed to be beneficially owned by the Acquiring Person. Certain synthetic interests in securities created by derivative positions – whether or not such interests are considered to be ownership of the underlying common stock or are reportable for purposes of Regulation 13D of the Securities Exchange Act – are treated as beneficial ownership of the number of shares of the Company's common stock equivalent to the economic exposure created by the derivative.

The date when the Rights become exercisable is the "Distribution Date." Until the Distribution Date, the common stock certificates will also evidence the Rights, and any transfer of shares of common stock will constitute a transfer of Rights. After that date, the Rights will separate from the common stock and will be evidenced by book-entry credits or by Rights certificates that the Company will mail to all eligible holders of common stock. Any Rights held by an Acquiring Person will be void and may not be exercised.

At April 27, 2018, none of the Rights were exercisable.

Consequences of a Person or Group Becoming an Acquiring Person

If a person or group becomes an Acquiring Person, after the Distribution Date, each Right will generally entitle the holder, except the Acquiring Person or any associate or affiliate thereof, to acquire, for the exercise price of \$600.00 per Right (subject to adjustment as provided in the Rights Agreement), shares of the Company's common stock (or, in certain circumstances, Preferred Shares) having a market value equal to twice the Right's then-current exercise price (initially \$1,200.00 per Right).

### Index

In addition, if, the Company is later acquired in a merger or similar transaction after the Distribution Date, each Right will generally entitle the holder, except the Acquiring Person or any associate or affiliate thereof, to acquire, for the exercise price of \$600.00 per Right (subject to adjustment as provided in the Rights Agreement), shares of the acquiring corporation having a market value equal to twice the Right's then-current exercise price (initially \$1,200.00 per Right).

Shares held by affiliates and associates of an Acquiring Person, and Notional Common Shares (as defined in the Rights Agreement) held by counterparties to a Derivatives Contract (as defined in the Rights Agreement) with an Acquiring Person, will be deemed to be beneficially owned by the Acquiring Person.

### Preferred Share Provisions

Each one one-hundredth of a Preferred Share, if issued:

- will not be redeemable;
- will entitle holders to quarterly dividend payments of \$0.01 per share, or an amount equal to the dividend paid on one share of common stock, whichever is greater;
- will entitle holders upon liquidation either to receive \$1.00 per share or an amount equal to the payment made on one share of common stock, whichever is greater;
- will have the same voting power as one share of common stock; and
  - if shares of the Company's common stock are exchanged via merger, consolidation, or a similar transaction, will entitle holders to a per share payment equal to the payment made on one share of common stock.

The value of one one-hundredth of a Preferred Share will generally approximate the value of one share of common stock.

### Redemption

The Board of Directors may redeem the Rights for \$0.01 per Right at any time before any person or group becomes an Acquiring Person. If the Board of Directors redeems any Rights, it must redeem all of the Rights. Once the Rights are redeemed, the only right of the holders of Rights will be to receive the redemption price of \$0.01 per Right. The redemption price will be adjusted if the Company has a stock split or stock dividends of its common stock.

### Qualifying Offer Provision

The Rights would also not interfere with all-cash, fully financed tender offers for all shares of common stock that remain open for a minimum of 60 business days, are subject to a minimum condition of a majority of the outstanding shares and provide for a 20-business day "subsequent offering period" after consummation (such offers are referred to as "qualifying offers"). In the event the Company receives a qualifying offer and the Board of Directors has not redeemed the Rights prior to the consummation of such offer, the consummation of the qualifying offer will not cause the offeror or its affiliates to become an Acquiring Person, and the Rights will immediately expire upon consummation of the qualifying offer.

### Exchange

After a person or group becomes an Acquiring Person, but before an Acquiring Person owns 50% or more of the Company's outstanding common stock, the Board of Directors may extinguish the Rights by exchanging one share of common stock or an equivalent security for each Right, other than Rights held by the Acquiring Person.

### Anti-Dilution Provisions

The Board of Directors may adjust the purchase price of the Preferred Shares, the number of Preferred Shares issuable and the number of outstanding Rights to prevent dilution that may occur from a stock dividend, a stock split, a reclassification of the Preferred Shares or common stock. No adjustments to the Exercise Price of less than 1% will be made.

15

---

Index

Amendments

The terms of the Rights Agreement may be amended by the Board of Directors without the consent of the holders of the Rights. After a person or group becomes an Acquiring Person, the Board of Directors may not amend the agreement in a way that adversely affects holders of the Rights.

Expiration

If the Rights Agreement is approved by the Company's shareholders at the 2018 annual meeting, the Rights will expire on April 9, 2021. If shareholders do not approve the Rights Agreement, the Rights will expire immediately following certification of the vote at the 2018 annual meeting.

11. Income Taxes

The Tax Act makes broad and complex changes to the U.S. tax code, including, but not limited to, reducing the U.S. federal corporate tax rate from 35% to 21% effective January 1, 2018. In accordance with Section 15 of the Internal Revenue Code, the Company will use a blended rate of 26.9% for our fiscal 2018 tax year, by applying a prorated percentage of the number of days prior to and subsequent to the January 1, 2018 effective date of the Tax Act.

The SEC's Staff Accounting Bulletin No. 118 ("SAB 118") provides guidance on accounting for tax effects of the Tax Act. SAB 118 provides a measurement period that should not extend beyond one year from the Tax Act enactment date for companies to complete the accounting guidance under FASB Accounting Standards Codification Topic 740, Income Taxes ("ASC 740"). In accordance with SAB 118, a company must reflect the income tax effects of those aspects of the Tax Act for which the accounting under ASC 740 is complete. To the extent that a company's accounting for certain income tax effects of the Tax Act is incomplete but it is able to determine a reasonable estimate, the company must record a provisional estimate to be included in the financial statements. If a company cannot determine a provisional estimate to be included in the financial statements, it should continue to apply ASC 740 on the basis of the provision of the tax laws that were in effect immediately before the enactment of the Tax Act. While the Company is able to make reasonable estimates of the impact of the reduction in the corporate rate, the final impact of the Tax Act may differ from these estimates, due to, among other things, additional guidance that may be issued by the Internal Revenue Service, expected state tax responses to either follow or reject the federal changes, and changes in our interpretations and assumptions. The Company continues to gather additional information to determine the final impact.

During the second quarter of 2018, the Company recorded a provisional tax benefit for the re-measurement of deferred tax liabilities of \$27,032 and \$2,500 for long-term and short-term deferred tax liabilities, respectively.

12. Net Income Per Share and Weighted Average Shares

Basic consolidated net income per share is computed by dividing consolidated net income available to common shareholders by the weighted average number of shares of common stock outstanding for the reporting period. Diluted consolidated net income per share reflects the potential dilution that could occur if securities, options or other contracts to issue shares of common stock were exercised or converted into shares of common stock and is based upon the weighted average number of shares of common stock and common equivalent shares outstanding during the reporting period. Common equivalent shares related to stock options, nonvested stock awards and units and MSU Grants issued by the Company are calculated using the treasury stock method. The outstanding stock options, nonvested stock awards and units and MSU Grants issued by the Company represent the only dilutive effects on diluted consolidated net income per share.

Index

The following table reconciles the components of diluted earnings per share computations:

	Quarter Ended		Nine Months Ended	
	April 27, 2018	April 28, 2017	April 27, 2018	April 28, 2017
Net income per share numerator	\$48,747	\$46,924	\$186,266	\$148,006
Net income per share denominator:				
Weighted average shares	24,003,611	24,042,573	24,013,435	24,028,175
Add potential dilution:				
Stock options, nonvested stock awards and MSU Grants	62,172	78,630	62,399	83,578
Diluted weighted average shares	24,065,783	24,121,203	24,075,834	24,111,753

13. Commitments and Contingencies

The Company and its subsidiaries are party to various legal and regulatory proceedings and claims incidental to their business in the ordinary course. In the opinion of management, based upon information currently available, the ultimate liability with respect to these proceedings and claims will not materially affect the Company's consolidated results of operations or financial position.

Related to its workers' compensation insurance coverage, the Company is contingently liable pursuant to standby letters of credit as credit guarantees to certain insurers. As of April 27, 2018, the Company had \$9,455 of standby letters of credit related to securing reserved claims under workers' compensation insurance. All standby letters of credit are renewable annually and reduce the Company's borrowing availability under its Revolving Credit Facility (see Note 4).

At April 27, 2018, the Company is secondarily liable for lease payments associated with two properties occupied by a third party. The Company is not aware of any non-performance under these lease arrangements that would result in the Company having to perform in accordance with the terms of these guarantees; and therefore, no provision has been recorded in the Condensed Consolidated Balance Sheets for amounts to be paid in case of non-performance by the primary obligor under such lease arrangements.

The Company enters into certain indemnification agreements in favor of third parties in the ordinary course of business. The Company believes that the probability of incurring an actual liability under such indemnification agreements is sufficiently remote that no such liability has been recorded in the Condensed Consolidated Balance Sheet as of April 27, 2018.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cracker Barrel Old Country Store, Inc. and its subsidiaries (collectively, the “Company,” “our” or “we”) are principally engaged in the operation and development in the United States of the Cracker Barrel Old Country Store (“Cracker Barrel”) concept. At April 27, 2018, we operated 652 Cracker Barrel stores in 45 states and seven Holler & Dash Biscuit House™ locations in five states. All dollar amounts reported or discussed in this Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) are shown in thousands, except per share amounts and certain statistical information (e.g., number of stores). References to years in MD&A are to our fiscal year unless otherwise noted.

MD&A provides information which management believes is relevant to an assessment and understanding of our consolidated results of operations and financial condition. MD&A should be read in conjunction with the (i) condensed consolidated financial statements and notes thereto included in this Quarterly Report on Form 10-Q and (ii) audited consolidated financial statements and the notes thereto included in the Company’s Annual Report on Form 10-K for the fiscal year ended July 28, 2017 (the “2017 Form 10-K”). Except for specific historical information, many of the matters discussed in this report may express or imply projections of items such as revenues or expenditures, estimated capital expenditures, compliance with debt covenants, plans and objectives for future operations, inventory shrinkage, growth or initiatives, expected future economic performance or the expected outcome or impact of pending or threatened litigation. These and similar statements regarding events or results which we expect will or may occur in the future are forward-looking statements that, by their nature, involve risks, uncertainties and other factors which may cause our actual results and performance to differ materially from those expressed or implied by such statements. All forward-looking information is provided pursuant to the safe harbor established under the Private Securities Litigation Reform Act of 1995 and should be evaluated in the context of these risks, uncertainties and other factors. Forward-looking statements generally can be identified by the use of forward-looking terminology such as “trends,” “assumptions,” “target,” “guidance,” “outlook,” “opportunity,” “future,” “plans,” “goals,” “objectives,” “expectations,” “near-term,” “long-term,” “projection,” “may,” “will,” “would,” “could,” “expect,” “intend,” “estimate,” “anticipate,” “believe,” “potential,” “forecasts” or “continue” (or the negative or other derivatives of each of these terms) or similar terminology. We believe the assumptions underlying any forward-looking statements are reasonable; however, any of the assumptions could be inaccurate, and therefore, actual results may differ materially from those projected in or implied by the forward-looking statements. In addition to the risks of ordinary business operations, and those discussed or described in this report or in information incorporated by reference into this report, factors and risks that may result in actual results differing from this forward-looking information include, but are not limited to, those contained in Part I, Item 1A of the 2017 Form 10-K, which is incorporated herein by this reference, as well as the factors described under “Critical Accounting Estimates” on pages 26-30 of this report or, from time to time, in our filings with the Securities and Exchange Commission (“SEC”), press releases and other communications.

Readers are cautioned not to place undue reliance on forward-looking statements made in this report because the statements speak only as of the report’s date. Except as may be required by law, we have no obligation or intention to update or revise any of these forward-looking statements to reflect events or circumstances occurring after the date of this report or to reflect the occurrence of unanticipated events. Readers are advised, however, to consult any future public disclosures that we may make on related subjects in reports that we file with or furnish to the SEC or in our other public disclosures.

Index

## Overview

Management believes that the Cracker Barrel brand remains one of the strongest and most differentiated brands in the restaurant industry, and we plan to continue to leverage that strength throughout 2018 to grow sales and profits. Our priorities for 2018 consist of the following:

- Enhancing the core business by focusing on value, culinary enhancements and speed of service;
- Expanding the footprint in new and developing markets while replenishing our store opening pipeline to accelerate future growth. We anticipate opening eight Cracker Barrel stores during 2018, of which seven opened in the first nine months of 2018; and
- Extending the brand by optimizing on long-term drivers, such as Holler & Dash Biscuit House™, to further drive shareholder value. We have opened three Holler & Dash Biscuit House™ locations during 2018.

We remain committed to delivering on our 2018 strategic priorities.

## Results of Operations

The following table highlights our operating results by percentage relationships to total revenue for the quarter and nine-month period ended April 27, 2018 as compared to the same periods in the prior year:

	Quarter Ended		Nine Months Ended					
	April		April					
	27,	April 28,	27,	April 28,	27,	April 28,		
	2018	2017	2018	2017	2018	2017		
Total revenue	100.0%	100.0	%	100.0	%	100.0	%	
Cost of goods sold (exclusive of depreciation and rent)	30.2	29.4		31.1		30.9		
Labor and other related expenses	35.7	35.8		34.6		34.8		
Other store operating expenses	20.4	19.5		19.9		19.0		
Store operating income	13.7	15.3		14.4		15.3		
General and administrative expenses	4.9	5.1		4.9		4.8		
Operating income	8.8	10.2		9.5		10.5		
Interest expense	0.5	0.5		0.5		0.5		
Income before income taxes	8.3	9.7		9.0		10.0		
Provision for income taxes	1.5	3.0		0.6		3.2		
Net income	6.8	%	6.7	%	8.4	%	6.8	%

The following table sets forth the number of stores in operation at the beginning and end of the quarters and nine-month periods ended April 27, 2018 and April 28, 2017:

	Quarter Ended		Nine Months Ended	
	April		April	
	27,	April 28,	27,	April 28,
	2018	2017	2018	2017
Open at beginning of the period	654	645	649	641
Opened during the period	5	2	10	6
Open at end of the period	659	647	659	647

## Total Revenue

Total revenue for the third quarter and first nine months of 2018 increased 3.0% and 1.7%, respectively, compared to the same periods in the prior year.

Index

The following table highlights the key components of revenue for the quarter and nine-month period ended April 27, 2018 as compared to the quarter and nine-month period ended April 28, 2017:

	Quarter Ended		Nine Months Ended	
	April 27, 2018	April 28, 2017	April 27, 2018	April 28, 2017
Revenue in dollars:				
Restaurant	\$592,677	\$575,098	\$1,774,112	\$1,739,888
Retail	128,736	125,312	445,440	443,175
Total revenue	\$721,413	\$700,410	\$2,219,552	\$2,183,063
Total revenue by percentage relationships:				
Restaurant	82.2	% 82.1	% 79.9	% 79.7
Retail	17.8	% 17.9	% 20.1	% 20.3
Average unit volumes <sup>(1)</sup> :				
Restaurant	\$902.7	\$890.8	\$2,715.5	\$2,702.0
Retail	196.1	194.1	681.8	688.3
Total revenue	\$1,098.8	\$1,084.9	\$3,397.3	\$3,390.3
Comparable store sales increase (decrease):				
Restaurant	1.5	% (0.4 %)	1.0	% 0.5 %
Retail	0.9	% (4.7 %)	(0.6 %)	(3.4 %)
Restaurant and retail	1.4	% (1.2 %)	0.6	% (0.3 %)

<sup>(1)</sup>Average unit volumes include sales of all stores.

For the third quarter of 2018, our comparable store restaurant sales increase consisted of a 2.8% average check increase (including a 2.5% average menu price increase) partially offset by a 1.3% guest traffic decline as compared to the prior year third quarter. For the third quarter of 2018, our comparable store retail sales increase resulted primarily from strong performance in the accessories merchandise category partially offset by lower performance in the décor merchandise category as compared to the prior year third quarter as well as the decline in guest traffic.

For the first nine months of 2018, our comparable store restaurant sales increase consisted of a 2.3% average check increase (including a 2.3% average menu price increase) partially offset by a 1.3% guest traffic decline. For the first nine months of 2018, our comparable store retail sales decrease resulted primarily from the decline in guest traffic and lower performance in décor, toys, and bed and bath merchandise categories partially offset by strong performance in the accessories merchandise category.

Restaurant and retail sales from newly opened stores accounted for the remainder of the total revenue increase in the third quarter and first nine months of 2018 as compared to the same periods in the prior year.

#### Cost of Goods Sold (Exclusive of Depreciation and Rent)

The following table highlights the components of cost of goods sold (exclusive of depreciation and rent) in dollar amounts and as percentages of revenues for the third quarter and first nine months of 2018 as compared to the same periods in the prior year:

	Quarter Ended		Nine Months Ended	
	April 27, 2018	April 28, 2017	April 27, 2018	April 28, 2017
Cost of Goods Sold in dollars:				
Restaurant	\$151,953	\$142,486	\$453,016	\$441,338

Edgar Filing: CRACKER BARREL OLD COUNTRY STORE, INC - Form 10-Q

Retail	65,766	63,396	236,404	232,573				
Total Cost of Goods Sold	\$217,719	\$205,882	\$689,420	\$673,911				
Cost of Goods Sold by percentage of revenue:								
Restaurant	25.6	%	24.8	%	25.5	%	25.4	%
Retail	51.1	%	50.6	%	53.1	%	52.5	%

Index

The increase in restaurant cost of goods sold as a percentage of restaurant revenue in the third quarter of 2018 as compared to the prior year third quarter was primarily the result of commodity inflation, higher food waste and a shift to higher cost menu items partially offset by our menu price increase referenced above. Commodity inflation was 5.1% in the third quarter of 2018. Higher food waste and higher cost menu items each accounted for an increase of 0.1% in restaurant cost of goods sold as a percentage of restaurant revenue for the third quarter of 2018 as compared to the prior year third quarter.

The increase in restaurant cost of goods sold as a percentage of restaurant revenue in the first nine months of 2018 as compared to the same period in the prior year was the result of commodity inflation and higher food waste partially offset by our menu price increase referenced above and a shift to lower cost menu items. Commodity inflation was 2.5% in the first nine months of 2018. Higher food waste accounted for an increase of 0.1% in restaurant cost of goods sold as a percentage of restaurant revenue for the first nine months of 2018 as compared to the same period in the prior year. Lower cost menu items accounted for a decrease of 0.1% in restaurant cost of goods sold as a percentage of restaurant revenue for the first nine months of 2018 as compared to the same period in the prior year.

We presently expect the rate of commodity inflation to be approximately 3.25% in 2018 as compared to 2017.

The increase in retail cost of goods sold as a percentage of retail revenue in the third quarter of 2018 as compared to the prior year third quarter resulted primarily from lower initial margin, higher inventory shrinkage and higher freight expense partially offset by lower markdowns and a decrease in the provision for obsolete inventory.

	Third Quarter Increase (Decrease) as a Percentage of Retail Revenue	
Lower initial margin	1.2	%
Inventory shrinkage	0.8	%
Freight expense	0.1	%
Markdowns	(1.3)	%
Provision for obsolete inventory	(0.4)	%

The increase in retail cost of goods sold as a percentage of retail revenue in the first nine months of 2018 as compared to the same period in the prior year resulted from lower initial margin, higher inventory shrinkage and higher freight expense partially offset by lower markdowns.

	First Nine Months Increase (Decrease) as a Percentage of Retail Revenue	
Lower initial margin	0.9	%
Inventory shrinkage	0.2	%
Freight expense	0.1	%
Markdowns	(0.6)	%

## Labor and Related Expenses

Labor and related expenses include all direct and indirect labor and related costs incurred in store operations. Labor and related expenses as a percentage of total revenue decreased to 35.7% in the third quarter of 2018 as compared to 35.8% in the third quarter of 2017. This percentage change resulted from the following:

Third Quarter  
(Decrease) Increase as a

	Percentage of Total Revenue	
Store bonus expense	(0.2	%)
Employee health care expenses	(0.1	%)
Miscellaneous wages	(0.1	%)
Store hourly labor	0.3	%

21

---

Index

Labor and related expenses as a percentage of total revenue decreased to 34.6% in the first nine months of 2018 as compared to 34.8% in the same period in the prior year. This percentage change resulted primarily from the following:

	First Nine Months (Decrease) Increase as a Percentage of Total Revenue	
Store bonus expense	(0.2	)%
Employee health care expenses	(0.1	)%
Store hourly labor	0.3	%

Lower store bonus expense as a percentage of total revenue for the third quarter and first nine months of 2018 as compared to the same periods in the prior year resulted from lower performance against financial objectives in the third quarter and first nine months of 2018 as compared to the same periods in the prior year.

Lower employee health care expenses as a percentage of total revenue for the third quarter and first nine months of 2018 as compared to the same periods in the prior year resulted primarily from lower claims activity.

The decrease in miscellaneous wages as a percentage of total revenue for the third quarter of 2018 as compared to the prior year third quarter resulted primarily from higher expenses associated with maintenance labor and vacation expense in the prior year third quarter.

The increase in store hourly labor costs as a percentage of total revenue for the third quarter and first nine months of 2018 as compared to the same periods in the prior year resulted primarily from wage inflation exceeding menu price increases and lower productivity.

## Other Store Operating Expenses

Other store operating expenses include all store-level operating costs, the major components of which are utilities, operating supplies, repairs and maintenance, depreciation and amortization, advertising, rent, credit card fees, real and personal property taxes, general insurance and costs associated with our bi-annual manager conference and training event.

Other store operating expenses as a percentage of total revenue increased to 20.4% in the third quarter of 2018 as compared to 19.5% in the third quarter of 2017. This percentage change resulted primarily from the following:

	Third Quarter Increase as a Percentage of Total Revenue	
Maintenance expense	0.4	%
Depreciation expense	0.2	%
Supplies expense	0.2	%

Other store operating expenses as a percentage of total revenue increased to 19.9% in the first nine months of 2018 as compared to 19.0% in the same period in the prior year. This percentage change resulted primarily from the following:

First Nine Months  
Increase as a Percentage  
of Total Revenue

Edgar Filing: CRACKER BARREL OLD COUNTRY STORE, INC - Form 10-Q

Maintenance expense	0.3	%
Depreciation expense	0.2	%
Bi-annual manager conference and training event expense	0.1	%
Supplies expense	0.1	%

22

---

Index

The increases in maintenance expense as a percentage of total revenue for the third quarter and first nine months of 2018 as compared to the same periods in the prior year resulted primarily from the implementation of previously announced initiatives, higher costs associated with snow removal due to adverse weather, higher costs associated with site maintenance and expenses associated with the related repair of certain building components and kitchen equipment.

The increases in depreciation expense as a percentage of total revenue for the third quarter and first nine months of 2018 as compared to the same periods in the prior year resulted from higher capital expenditures in the third quarter and first nine months of 2018 as compared to the same periods in the prior year.

In the first quarter of 2018, we held a bi-annual manager conference and training event that was attended by our store operations management team. We did not hold a manager's conference and training event in 2017.

The increases in supplies expense as a percentage of total revenue for the third quarter and first nine months of 2018 as compared to the same periods in the prior year resulted primarily from costs associated with our off-premise business.

## General and Administrative Expenses

General and administrative expenses as a percentage of total revenue decreased to 4.9% in the third quarter of 2018 as compared to 5.1% in the third quarter of 2017. This percentage change resulted primarily from the following:

	Third Quarter (Decrease) Increase as a Percentage of Total Revenue	
Incentive compensation expense	(0.5	%)
Payroll and related expenses	0.2	%

General and administrative expenses as a percentage of total revenue increased to 4.9% in the first nine months of 2018 as compared to 4.8% in the same period in the prior year. This percentage change resulted primarily from the following:

	First Nine Months Increase (Decrease) as a Percentage of Total Revenue	
Payroll and related expenses	0.2	%
Incentive compensation expense	(0.2	%)

The decreases in incentive compensation as a percentage of total revenue for the third quarter and first nine months of 2018 as compared to the same periods in the prior year resulted primarily from lower performance against financial objectives in the third quarter and first nine months of 2018 as compared to the same periods in the prior year.

The increases in payroll and related expenses as a percentage of total revenue for the third quarter and first nine months of 2018 as compared to the same periods in the prior year resulted primarily from more manager-in-training weeks and higher average wages.

## Interest Expense

Interest expense for the third quarter and first nine months of 2018 remained relatively constant at \$3,594 and \$10,892, respectively, as compared to \$3,389 and \$10,703, respectively, in the third quarter and first nine months of

2017.

---

Index

Provision for Income Taxes

Provision for income taxes as a percentage of income before income taxes (the “effective tax rate”) was 18.4% and 31.1% in the third quarters of 2018 and 2017, respectively. The effective tax rate was 6.8% and 32.5% in the first nine months of 2018 and 2017, respectively. The effective tax rate for the third quarter and the first nine months of 2018 was significantly impacted by P.L. 115-97, the Tax Cuts and Jobs Act (the “Tax Act”), enacted on December 22, 2017 by the U.S. government. The Tax Act makes broad and complex changes to the U.S. tax code, including, but not limited to, reducing the U.S. federal corporate tax rate from 35% to 21% effective January 1, 2018. In accordance with Section 15 of the Internal Revenue Code, we will use a blended rate of 26.9% for our fiscal 2018 tax year, by applying a prorated percentage of the number of days prior to and subsequent to the January 1, 2018 effective date of the Tax Act.

While we are able to make reasonable estimates of the impact of the reduction in corporate rate, the final impact of the Tax Act may differ from these estimates, due to, among other things, additional guidance that may be issued by the Internal Revenue Service, expected state tax responses to either follow or reject the federal changes, and changes in our interpretations and assumptions. We continue to gather additional information to determine the final impact. We presently expect our effective tax rate for 2018 to be approximately 11%.

Liquidity and Capital Resources

Our primary sources of liquidity are cash generated from our operations and our borrowing capacity under our \$750,000 revolving credit facility (the “Revolving Credit Facility”). Our internally generated cash, along with cash on hand at July 28, 2017, was sufficient to finance all of our growth, dividend payments, share repurchases, working capital needs and other cash payment obligations in the first nine months of 2018.

We believe that cash on hand at April 27, 2018, along with cash generated from our operating activities and the borrowing capacity under our Revolving Credit Facility, will be sufficient to finance our continuing operations, expected dividend payments and our continuing expansion plans for at least the next twelve months.

Cash Generated From Operations

Our operating activities provided net cash of \$220,975 for the first nine months of 2018, which represented an increase from the \$203,072 net cash provided during the first nine months of 2017. This increase primarily reflected the timing of payments for accounts payable.

Borrowing Capacity and Debt Covenants

At April 27, 2018, we had \$400,000 of outstanding borrowings under the Revolving Credit Facility and we had \$9,455 of standby letters of credit related to securing reserved claims under our workers’ compensation insurance which reduce our borrowing availability under the Revolving Credit Facility. At April 27, 2018, we had \$340,545 in borrowing availability under our Revolving Credit Facility. See Note 4 to our Condensed Consolidated Financial Statements for further information on our long-term debt.

The Revolving Credit Facility contains customary financial covenants, which include maintenance of a maximum consolidated total leverage ratio and a minimum consolidated interest coverage ratio. We presently are in compliance with all financial covenants.

Index

Capital Expenditures

Capital expenditures (purchase of property and equipment) net of proceeds from insurance recoveries were \$101,685 for the first nine months of 2018 as compared to \$80,861 for the same period in the prior year. Our capital expenditures consisted primarily of capital investments for existing stores, new store locations and capital expenditures for strategic initiatives. The increase in capital expenditures from the first nine months of 2018 to the first nine months of 2017 resulted primarily from an increase in the number of new store locations and capital expenditures for strategic initiatives. We estimate that our capital expenditures during 2018 will be approximately \$150,000. This estimate includes the acquisition of sites and construction costs of eight new Cracker Barrel stores and three new Holler & Dash Biscuit House™ locations that we have opened or expect to open during 2018, as well as for acquisition and construction costs for store locations to be opened in 2019. We also expect to increase capital expenditures for technology and strategic initiatives, which are intended to improve the guest experience and improve margins. We intend to fund our capital expenditures with cash flows from operations and borrowings under our Revolving Credit Facility, as necessary.

Dividends, Share Repurchases and Share-Based Compensation Awards

The Revolving Credit Facility imposes restrictions on the amount of dividends we are permitted to pay and the amount of shares we are permitted to repurchase. Under the Revolving Credit Facility, provided there is no default existing and the total of our availability under the Revolving Credit Facility plus our cash and cash equivalents on hand is at least \$100,000 (the “cash availability”), we may declare and pay cash dividends on shares of our common stock and repurchase shares of our common stock (1) in an unlimited amount if, at the time the dividend or the repurchase is made, our consolidated total leverage ratio is 3.00 to 1.00 or less and (2) in an aggregate amount not to exceed \$100,000 in any fiscal year if our consolidated total leverage ratio is greater than 3.00 to 1.00 at the time the dividend or repurchase is made; notwithstanding (1) and (2), so long as immediately after giving effect to the payment of any such dividends cash availability is at least \$100,000, we may declare and pay cash dividends on shares of our common stock in an aggregate amount not to exceed in any fiscal year the product of the aggregate amount of dividends declared in the fourth quarter of the immediately preceding fiscal year multiplied by four.

During the first nine months of 2018, we paid a regular dividend of \$3.60 per share and declared a dividend of \$1.20 per share that was paid on May 7, 2018 to shareholders of record on April 13, 2018. On May 22, 2018, we declared a regular dividend of \$1.25 per share of our common stock to be paid on August 6, 2018 to shareholders of record on July 13, 2018. Additionally, on May 22, 2018, we declared a special dividend of \$3.75 per share of our common stock to be paid on August 3, 2018 to shareholders of record on July 13, 2018.

We have been authorized by our Board of Directors to repurchase shares at management’s discretion up to \$25,000 during 2018. During the first nine months of 2018, we repurchased 100,000 shares of our common stock in the open market at an aggregate cost of \$14,772.

During the first nine months of 2018, we issued 47,929 shares of our common stock resulting from the vesting of share-based compensation awards and stock option exercises. Related tax withholding payments on these share-based compensation awards exceeded proceeds received from the exercise of stock options, which resulted in a net use of cash of \$3,360.

Working Capital

In the restaurant industry, virtually all sales are either for cash or third-party credit or debit card. Restaurant inventories purchased through our principal food distributor are on terms of net zero days, while restaurant inventories purchased locally are generally financed from normal trade credit. Because of our retail gift shops, which have a lower product turnover than the restaurant business, we carry larger inventories than many other companies in the

restaurant industry. Retail inventories purchased domestically are generally financed from normal trade credit, while imported retail inventories are generally purchased through wire transfers. These various trade terms are aided by the rapid turnover of the restaurant inventory. Employees generally are paid on weekly or semi-monthly schedules in arrears for hours worked except for bonuses that are paid either quarterly or annually in arrears. Many other operating expenses have normal trade terms and certain expenses, such as certain taxes and some benefits, are deferred for longer periods of time.

We had positive working capital of \$18,511 at April 27, 2018 versus negative working capital of \$16,971 at July 28, 2017. The change in working capital from July 28, 2017 to April 27, 2018 primarily resulted from the timing of payments for accounts payable, the increase in cash and lower incentive compensation.

Index

Off-Balance Sheet Arrangements

Other than various operating leases, we have no other material off-balance sheet arrangements. Refer to the sub-section entitled “Off-Balance Sheet Arrangements” under the section entitled “Liquidity and Capital Resources” presented in the MD&A of our 2017 Form 10-K for additional information regarding our operating leases.

Material Commitments

There have been no material changes in our material commitments other than in the ordinary course of business since the end of 2017. Refer to the sub-section entitled “Material Commitments” under the section entitled “Liquidity and Capital Resources” presented in the MD&A of our 2017 Form 10-K for additional information regarding our material commitments.

Recent Accounting Pronouncements Adopted and Not Adopted

See Note 1 to the accompanying Condensed Consolidated Financial Statements for a discussion of recent accounting guidance adopted and not yet adopted. The adopted accounting guidance discussed in Note 1 did not have a significant impact on our consolidated financial position or results of operations. Regarding the accounting guidance not yet adopted, we are still evaluating the impact of adopting the accounting guidance.

Critical Accounting Estimates

We prepare our Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and assumptions about future events and apply judgments that affect the reported amounts of assets, liabilities, revenue, expenses and related disclosures. We base our estimates and judgments on historical experience, current trends, outside advice from parties believed to be experts in such matters, and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. However, because future events and their effects cannot be determined with certainty, actual results could differ from those assumptions and estimates, and such differences could be material.

Our significant accounting policies are discussed in Note 2 to the Consolidated Financial Statements contained in the 2017 Form 10-K. Judgments and uncertainties affecting the application of those policies may result in materially different amounts being reported under different conditions or using different assumptions.

Critical accounting estimates are those that:

· management believes are most important to the accurate portrayal of both our financial condition and operating results, and  
· require management’s most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

We consider the following accounting estimates to be most critical in understanding the judgments that are involved in preparing our Consolidated Financial Statements:

- Impairment of Long-Lived Assets and Provision for Asset Dispositions
- Insurance Reserves
- Retail Inventory Valuation
- Tax Provision

- Share-Based Compensation
- Legal Proceedings

Management has reviewed these critical accounting estimates and related disclosures with the Audit Committee of our Board of Directors.

26

---

Index

Impairment of Long-Lived Assets and Provision for Asset Dispositions

We assess the impairment of long-lived assets whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. Recoverability of assets is measured by comparing the carrying value of the asset to the undiscounted future cash flows expected to be generated by the asset. If the total expected future cash flows are less than the carrying amount of the asset, the carrying value is written down, for an asset to be held and used, to the estimated fair value or, for an asset to be disposed of, to the fair value, net of estimated costs of disposal. Any loss resulting from impairment is recognized by a charge to income. Judgments and estimates that we make related to the expected useful lives of long-lived assets and future cash flows are affected by factors such as changes in economic conditions and changes in operating performance. The accuracy of such provisions can vary materially from original estimates and management regularly monitors the adequacy of the provisions until final disposition occurs.

We have not made any material changes in our methodology for assessing impairments during the first nine months of 2018, and we do not believe that there is a reasonable likelihood that there will be a material change in the estimates or assumptions used by us in the future to assess impairment of long-lived assets. However, if actual results are not consistent with our estimates and assumptions used in estimating future cash flows and fair values of long-lived assets, we may be exposed to losses that could be material.

Insurance Reserves

We self-insure a significant portion of our expected workers' compensation and general liability insurance programs. We purchase insurance for individual workers' compensation claims that exceed \$250, \$750 or \$1,000 depending on the state in which the claim originates. We purchase insurance for individual general liability claims that exceed \$500. We record a reserve for workers' compensation and general liability for all unresolved claims and for an estimate of incurred but not reported ("IBNR") claims. These reserves and estimates of IBNR claims are based upon a full scope actuarial study which is performed annually at the end of our third quarter and is adjusted by the actuarially determined losses and actual claims payments for the fourth quarter. Additionally, we perform limited scope actuarial studies on a quarterly basis to verify and/or modify our reserves. The reserves and losses in the actuarial study represent a range of possible outcomes within which no given estimate is more likely than any other estimate. As such, we record the losses in the lower end of that range and discount them to present value using a risk-free interest rate based on projected timing of payments. We also monitor actual claims development, including incidence or settlement of individual large claims during the interim periods between actuarial studies as another means of estimating the adequacy of our reserves.

Our group health plans combine the use of self-insured and fully-insured programs. Benefits for any individual (employee or dependents) in the self-insured group health program are limited. We record a liability for the self-insured portion of our group health program for all unpaid claims based upon a loss development analysis derived from actual group health claims payment experience. Additionally, we record a liability for unpaid prescription drug claims based on historical experience.

Our accounting policies regarding workers' compensation, general insurance and health insurance reserves include certain actuarial assumptions and management judgments regarding economic conditions, the frequency and severity of claims and claim development history and settlement practices. We have not made any material changes in the accounting methodology used to establish our insurance reserves during the first nine months of 2018 and do not believe there is a reasonable likelihood that there will be a material change in the estimates or assumptions used to calculate the insurance reserves. However, changes in these actuarial assumptions, management judgments or claims experience in the future may produce materially different amounts of expense that would be reported under these insurance programs.

## Retail Inventory Valuation

Cost of goods sold includes the cost of retail merchandise sold at our stores utilizing the retail inventory method (“RIM”). Under RIM, the valuation of our retail inventories at cost and the resulting gross margins are calculated by applying a cost-to-retail ratio to the retail value of our inventories. Inherent in the RIM calculation are certain significant management judgments and estimates, including initial markons, markups, markdowns and shrinkage, which may significantly impact the gross margin calculation as well as the ending inventory valuation.

### Index

Inventory valuation provisions are included for retail inventory obsolescence and retail inventory shrinkage. Retail inventory is reviewed on a quarterly basis for obsolescence and adjusted as appropriate based on assumptions made by management and judgments regarding inventory aging and future promotional activities. Cost of goods sold includes an estimate of shrinkage that is adjusted upon physical inventory counts. Annual physical inventory counts are conducted throughout the third quarter based upon a cyclical inventory schedule. An estimate of shrinkage is recorded for the time period between physical inventory counts by using a three-year average of the physical inventories' results on a store-by-store basis.

We have not made any material changes in the methodologies, estimates or assumptions related to our merchandise inventories during the first nine months of 2018 and do not believe there is a reasonable likelihood that there will be a material change in the estimates or assumptions in the future. However, actual obsolescence or shrinkage recorded may produce materially different amounts than we have estimated.

### Tax Provision

We must make estimates of certain items that comprise our income tax provision. These estimates include effective state and local income tax rates, employer tax credits for items such as FICA taxes paid on employee tip income and the Work Opportunity credit, as well as estimates related to certain depreciation and capitalization policies. Our estimates are made based on current tax laws, the best available information at the time of the provision and historical experience.

We recognize (or derecognize) a tax position taken or expected to be taken in a tax return in the financial statements when it is more likely than not (i.e., a likelihood of more than fifty percent) that the position would be sustained (or not sustained) upon examination by tax authorities. A recognized tax position is then measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement.

We file our income tax returns many months after our year end. These returns are subject to audit by various federal and state governments years after the returns are filed and could be subject to differing interpretations of the tax laws. We then must assess the likelihood of successful legal proceedings or reach a settlement with the relevant taxing authority. Although we believe that the judgments and estimates used in establishing our tax provision are reasonable, an unsuccessful legal proceeding or a settlement could result in material adjustments to our Consolidated Financial Statements and our consolidated financial position (see Note 13 to our Consolidated Financial Statements contained in the 2017 Form 10-K for additional information).

### Share-Based Compensation

Our share-based compensation consists of nonvested stock awards and units and performance-based market stock units ("MSU Grants"). Share-based compensation expense is recognized based on the grant date fair value and the achievement of performance conditions for certain awards. We recognize share-based compensation expense on a straight-line basis over the requisite service period, which is generally the award's vesting period, or the date on which retirement is achieved, if shorter.

Compensation expense is recognized for only the portion of our share-based compensation awards that are expected to vest. Therefore, an estimated forfeiture rate is derived from historical employee termination behavior and is updated annually. The forfeiture rate is applied on a straight-line basis over the service (vesting) period for each separately vesting portion of the award as if the award were, in substance, multiple awards.

Our share-based compensation awards accrue dividends. Dividends will be forfeited for any share-based compensation awards that do not vest.

The fair value of nonvested stock awards which accrue dividends is equal to the market price of our common stock at the date of grant. Our nonvested stock awards are time vested except for certain awards under our long-term incentive plans, which also contain performance conditions. At each reporting period, we reassess the probability of achieving the performance conditions under our long-term incentive plans. Determining whether the performance conditions will be achieved involves judgment, and the estimate of expense for nonvested stock awards may be revised periodically based on changes in our determination of the probability of achieving the performance conditions. Revisions are reflected in the period in which the estimate is changed. If any performance conditions are not met, no shares will be granted, no compensation will ultimately be recognized and, to the extent previously recognized, compensation expense will be reversed.

Index

In addition to requiring the requisite service, MSU Grants contain both a market condition based on total shareholder return and a performance condition based on operating income. Total shareholder return is defined as increases in our stock price plus dividends paid during the performance period. The number of shares awarded at the end of the performance period for each MSU Grant may increase up to 150% of target in direct proportion to any percentage increase in shareholder value during the performance period. The probability of the actual shares expected to be awarded is considered in the grant date valuation; therefore, the expense will not be adjusted to reflect the actual units awarded. However, if the performance condition is not met, no shares will be granted, no compensation will ultimately be recognized and, to the extent previously recognized, compensation expense will be reversed.

The fair value of our MSU Grants was determined using the Monte-Carlo simulation model, which simulates a range of possible future stock prices and estimates the probabilities of the potential payouts. The Monte-Carlo simulation model uses the average prices for the 60-consecutive calendar days beginning 30 days prior to and ending 30 days after the second business day of the performance period. This model also incorporates the following ranges of assumptions:

- The expected volatility is a blend of implied volatility based on market-traded options on our stock and historical volatility of our stock over the period commensurate with the performance period.
- The risk-free interest rate is based on the U.S. Treasury rate assumption commensurate with the performance period.
- The expected dividend yield is assumed to be zero since the award holders are entitled to any dividends paid over the performance period.

We update the historical and implied components of the expected volatility assumption when new grants are made. No MSU Grants have been awarded in 2017 or in 2018.

Beginning in 2017, we adopted long-term incentive plans that award nonvested stock units based upon relative total shareholder return. In addition to requiring the requisite service, these nonvested stock units contain both a market condition based on relative total shareholder return and a performance condition based on operating income. Relative total shareholder return is defined as increases in our stock price plus dividends paid during the performance period as compared to the total shareholder return of a group of peer companies determined by the Compensation Committee. The number of shares awarded at the end of the performance period for each nonvested stock unit may range from 75% to 125% of the target award depending on our performance. The probability of the actual shares expected to be awarded is considered in the grant date valuation; therefore, the expense will not be adjusted to reflect the actual units awarded. However, if the performance condition is not met, no shares will be granted, no compensation will ultimately be recognized and, to the extent previously recognized, compensation expense will be reversed.

The fair value of these nonvested stock units was determined using the Monte-Carlo simulation model, which simulates a range of possible future stock prices and estimates the probabilities of the potential payouts. The Monte-Carlo simulation model uses the average prices for the 60-consecutive calendar days beginning 30 days prior to and ending 30 days after the second business day of the performance period. This model also incorporates the following ranges of assumptions:

- The expected volatility is the historical volatility of our stock and the members of the peer group over the period commensurate with the performance period.
- The risk-free interest rate is based on the U.S. Treasury rate assumption commensurate with the performance period.
- The expected dividend yield is assumed to be zero since the award holders are entitled to any dividends paid over the performance period.

We will update the expected volatility assumption when new grants are made.

We have not made any material changes in our estimates or assumptions used to determine share-based compensation during the first nine months of 2018 and do not believe there is a reasonable likelihood that there will be a material change in the future estimates or assumptions used to determine share-based compensation expense. However, if actual results are not consistent with our estimates or assumptions, we may be exposed to changes in share-based compensation expense that could be material.

Index

Legal Proceedings

We are parties to various legal and regulatory proceedings and claims incidental to our business from time to time. We review outstanding claims and proceedings internally and with external counsel, as necessary and appropriate, to assess probability of loss and for the ability to estimate loss. These assessments are re-evaluated each quarter or as new information becomes available to determine whether a reserve should be established or if any existing reserve should be adjusted. The actual cost of resolving a claim or proceeding ultimately may be substantially different than the amount of the recorded reserve. Although we believe that the judgments and estimates used in establishing our legal reserves are reasonable, an unsuccessful legal proceeding or a settlement could result in material adjustments to our Consolidated Financial Statements and our consolidated financial position.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

Part II, Item 7A of the 2017 Form 10-K is incorporated in this item of this Quarterly Report on Form 10-Q by this reference. There have been no material changes in our quantitative and qualitative market risks since July 28, 2017.

ITEM 4. Controls and Procedures

Our management, including our principal executive and principal financial officers, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Exchange Act) as of the end of the period covered by this report. Based upon this evaluation, our Chief Executive Officer and Chief Financial Officer each concluded that as of April 27, 2018, our disclosure controls and procedures were effective for the purposes set forth in the definition thereof in Exchange Act Rule 13a-15(e).

There have been no changes (including corrective actions with regard to significant deficiencies and material weaknesses) during the quarter ended April 27, 2018 in our internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1A. Risk Factors

There have been no material changes in the risk factors previously disclosed in “Item 1A. Risk Factors” of our 2017 Form 10-K.

ITEM 5. Other Information

Executive Severance Agreements and Change in Control Agreements

On May 25, 2018, the Company entered into separate severance agreements and change in control agreements with all of the executive officers of the Company other than the Company's President and Chief Executive Officer, Sandra B. Cochran, including the named executive officers (as such term is defined by Item 5.02 of Form 8-K) that are presently employed by the Company ("Officers"). These agreements replace the combined change in control and severance agreements previously in place between the Company and these Officers which expired on May 22, 2018. Ms. Cochran's rights with respect to both severance and a change in control in the Company are covered by her existing employment agreement with the Company, which remains in effect until September 26, 2018, unless earlier terminated pursuant to its terms.

Under the new severance agreements, an Officer will receive (i) the accrued obligations and (ii) severance benefits of 12 months' base salary plus one additional week of base salary for each year of service to the Company greater than 15 (all up to a maximum total payment of 18 months' salary), as a result of termination of their employment by the Company other than for "cause" (as defined in the agreements) or upon the termination by these executive officers of their employment for "good reason" (as defined in the agreements). The receipt of the severance benefits under the severance agreements is conditioned upon the execution of an unconditional release from all charges, complaints and claims, including attorney fees, based on employment with the Company, or the termination of that employment, by such Officer at the time of the severance event. The severance agreements have an initial term of three years, after which they will automatically renew for successive one-year terms absent notice of non-renewal by the Company to the Officers not less than 90 days prior to the expiration of the term.

Under the new change in control agreements, if the Company undergoes a change in control (as defined in the agreements), then, for a period of two years following such event, the Company agrees to employ each of the Officers at a salary at least equal to such Officer's highest monthly base salary paid during the 24 months prior to the change in control event, to make such Officer eligible to participate in the Company's incentive compensation programs at a level equal to or greater than the highest target percentage applicable during the 12 months prior to the change in control event, and to continue to provide benefits and perquisites at least equal to those enjoyed during the 12 months prior to the change in control event. In addition, if the Officer is terminated without cause or terminates his employment for "good reason" (as defined in the agreements) within two years after such an event, then the Officer will receive (i) the accrued obligations, (ii) a lump sum payment equal to 1.5 to 2.0 times, depending on the executive's title (with all named executive officers being 2.0x) the sum of (A) his or her base salary as in effect immediately prior to the change in control event and (B) his or her target bonus in effect for the fiscal year in which the termination occurs; (ii) a lump sum payment equal to his or her target bonus for the fiscal year in which the termination occurs, prorated based on the number of days elapsed between the beginning of the period and the termination date; (iii) payment of his or her annual bonus for the fiscal year preceding the year in which termination occurs, if such prior year bonus has not already been paid; and (iv) 24 months' continuation of health and other benefits and perquisites, reimbursed by the Company.

Upon the change in control event, all long-term incentive awards previously granted to the Officers that are unvested at the time of such event will be converted into cash and will be payable to the Officers, with interest, upon the earliest to occur of (i) the termination of the Officer's employment, (ii) the date on which the underlying award would otherwise have vested or been paid in accordance with its terms or (iii) the date that is two years following the change in control event, in each case provided that the Officer has remained employed by the Company or its successor at all times prior to such payment date. Time-based awards will be converted into cash at the market price of the Company's common stock as of the change in control event (less any applicable exercise price and/or withholding amounts). Performance-based awards will be converted into cash assuming performance at a target level in accordance with the original agreement, plan or award notice governing such award. If an Officer's employment is terminated within 180

days prior to a change in control event and the Officer can reasonably demonstrate that such termination was in connection with the contemplated change in control, then the agreements provide that the date of the change in control will be deemed to mean the date immediately prior to the termination of the Officer's employment, and the Officer will receive the termination benefits accordingly. The change in control agreements have an indefinite term but may be terminated by the Company upon not less than one year's prior written notice to the Officers if the Company has not received any proposal or indication of interest from a party regarding, nor is the Company's Board of Directors then considering, a potential change in control transaction.

Index

If an Officer is entitled to receive benefits under his or her change in control agreement in connection with the termination of his or her employment following a change in control event, then such officer will not be receive any severance benefits under his or her severance agreement in respect of the termination. None of the applicable officers has a right under these severance agreements or change in control agreements or otherwise to receive any gross-up payment to reimburse such Officer for any excise tax under Sections 280G and 4999 of the Internal Revenue Code of 1986, as amended. Additionally, these agreements obligate the Company's Officers not to work as an employee or consultant for any multi-unit restaurant business that offers full service family dining for a period equal to the shorter of (i) six months from the termination of the Officer's employment or (ii) the period during which benefits continue to be paid to the Officer pursuant to the agreement. These agreements also obligate the Officers not to solicit Company employees for a period equal to the shorter of (i) twelve months from the termination of the Officer's employment or (ii) the period during which benefits continue to be paid to the executive officer pursuant to the agreement.

The foregoing description of the severance agreements and change in control agreements is qualified in its entirety by reference to the full text of these agreements, forms of which are filed as Exhibits 10.1 and 10.2, respectively, to this Quarterly Report on Form 10-Q and are incorporated herein by reference.
