This analysis should be read in conjunction with Central Fund's financial statements prepared in accordance with Canadian generally accepted accounting principles included in its 2008 Annual Report and the accompanying Management's Discussion and Analysis.

The change in net assets as reported in U.S. dollars from period to period is primarily a result of the public offerings completed during the period and the changing market prices of gold and silver and the proportion of each held by the Company. Changes in the value of the U.S. dollar relative to the Canadian dollar will also have an impact on net assets when reported in Canadian dollars.

Net assets increased by \$755.4 million during the nine months ended July 31, 2009 as a result of the two public offerings completed on February 3, 2009 and April 16, 2009 as well as increases in gold and silver prices.

On August 13, 2009, the Company, through a public offering, issued 11,040,000 Class A shares for proceeds of \$126,120,960 net of underwriting fees of \$5,255,040. Costs relating to this public offering were approximately \$600,000 and net proceeds were approximately \$125,520,960. The Company used the net proceeds from this public offering to purchase 69,342 fine ounces of gold at a cost of \$67,404,584 and 3,467,086 ounces of silver at a cost of \$52,595,695, both in physical bar form. The balance of \$5,520,681 was retained by the Company in interest-bearing cash deposits for working capital purposes.

Virtually all of the income respectively was due to the change in unrealized appreciation of holdings. Certain expenses, such as administration fees which are scaled, have varied in proportion to net asset levels or, in the case of stock exchange fees, with market capitalization based on the number of Class A shares issued. Administration fees, which are calculated monthly based on net assets at each month end, increased during the three month period to \$1,029,723 from \$845,688 for the same period in 2008 and for the nine month period to \$2,755,238 from \$2,444,251 for the same period in 2008 as a direct result of the higher level of net assets under administration.

Expenses as a percentage of average month-end net assets for the three-month period ended July 31, 2009 were 0.08%, compared to 0.09% for the same three-month period in 2008. Expenses as a percentage of average month-end net assets for the nine-month period ended July 31, 2009 were 0.26%, compared to 0.29% for the same nine-month period in 2008. For the twelve months ended July 31, 2009, this expense ratio was 0.35% compared to 0.39% for the prior twelve-month period in 2008.
