Subsequent Events

- On January 8, 2010, the Venezuelan government announced its decision to implement new fixed exchange rates effective January 11, 2010, which resulted in a significant devaluation of the Bolivar against the U.S. dollar. The new regime applies two distinct official rates depending on the applicable sector of the economy. The first exchange rate, applicable to imported goods characterized as essential, will be VEB 2.60 per U.S. dollar, and the rate applicable to all other imported goods and services, including the aviation sector, will be VEB 4.30 per U.S. dollar. The Venezuelan government, however, has announced that it will apply the exchange rate of VEB 2.60 per U.S. dollar to all authorization requests pending approval by the Venezuela Central Bank through January 8, 2010. We estimate that the Company will incur losses related to the devaluation of these funds of approximately US\$21 million, which will be recorded in the first quarter of 2010 in accordance with US GAAP.
 - On February 10, our Board of Directors approved the modification of the Company's dividend policy, which had provided for an annual payment of approximately 10% of our annual consolidated net income to our shareholders. Effective immediately, the new dividend policy provides for annual dividend payments in amounts up to 20% of our annual consolidated net income to be paid pro rata among all our shareholders. The determination of the annual dividend payment each year will remain subject to approval by our Board of Directors and compliance with applicable legal requirements.

MANAGEMENT'S COMMENTS ON 4Q09 RESULTS

Copa Holdings delivered another quarter of solid financial results with fourth quarter operating income coming in at US\$71.8 million and net income at US\$70.4 million. Excluding US\$4.8 million in special charges at Aero Republica related to the accrual of costs associated with the retirement of four MD-80 aircraft and a \$9.6 million non-cash gain associated with the mark-to-market of fuel hedge contracts, operating income and net income reported would have been US\$76.6 million and US\$65.7 million, respectively.

Total revenues decreased 0.9% during the quarter, while capacity increased 5.2%, which resulted in a 5.8% decrease in revenues per ASM (RASM) from 14.6 cents to 13.7 cents. Passenger revenues, which represented 95% of total revenues, decreased 0.4% to US\$324.4 million, due to a 5.3% decline in passenger revenue per ASM (PRASM), driven by an 11.7% drop in yield, which was offset by a 7.2 percentage point increase in consolidated load factor from 74.1% to 79.4%.

In 4Q09, Copa Airlines' yields came in at 15.7 cents, representing a 10.0% decline compared to 4Q08 and a 3.6% increase over 3Q09. Copa Airlines' yields declined year-over-year mainly as a result of lower average fares due to a less robust demand environment. During the same period, Aero Republica's yields decreased 19.2% to 20.2 cents, as a result of a more competitive fare environment. Nevertheless, the effect of lower yields at Aero Republica was partially offset by increased traffic, which for the quarter increased 16.7% and resulted in a load factor of 75%, or 9.9 percentage points above 4Q08.

Consolidated operating expenses for 4Q09 increased 3.5% to US\$271.2 million, while consolidated operating expenses per ASM (CASM) decreased 1.6% to 10.9 cents. CASM, excluding fuel costs and special charges, increased 5.2% from 7.2 cents in 4Q08 to 7.6 cents in 4Q09, mainly due to higher salaries and benefits and passenger related costs.

Aircraft fuel expense decreased 15.1% or US\$13.8 million compared to 4Q08, despite a 5.9% increase in available seat miles (ASMs). The Company's effective jet fuel price, which includes a US\$1.2 million negative fuel hedge effect in 4Q09 and a US\$8.8 million negative fuel hedge effect in 4Q08, decreased from an average of US\$2.73 in 4Q08 to US\$2.21 in 4Q09.

For 4Q09, the Company had fuel hedges in place representing 19% of its consolidated volume. Continuing with the execution of its fuel hedge policy, the Company currently has hedged approximately 19% and 9% of its consolidated volume for 2010 and 2011, respectively.

The Company recorded non-operating income of US\$6.4 million for 4Q09 compared to a US\$50.1 million non-operating expense for 4Q08. Non-operating income for 4Q09 included a fuel hedge mark-to-market gain of US\$9.6 million, compared to a fuel hedge mark-to-market loss of US\$39.5 million in 4Q08.

Copa Holdings closed the quarter with US\$358.5 million in cash, short term and long term investments, representing approximately 29% of last twelve months' revenues. During 2009 the Company funded from cash \$120 million in pre-delivery payments related to aircraft to be delivered between 2010 and 2011. Total debt at the end of 4Q09 amounted to US\$845.5 million, most of which relates to aircraft and equipment financing.

For 4Q09, Aero Republica recorded operating income, excluding special fleet charges, of US\$7.0 million, representing an operating margin of 10.6% compared an operating margin of 19.7% in 4Q08. For full year 2009, Aero Republica recorded an adjusted operating margin of 11.2%.

Aero Republica continues to benefit from its international expansion and fleet transition strategy aimed at replacing its MD-80 fleet with modern and fuel-efficient Embraer-190 aircraft. For 4Q09, Aero Republica's capacity, in terms of ASMs flown in Embraer-190 aircraft as a percentage of its total capacity, increased from 72.5% in 4Q08 to 92.4% in 4Q09. Having returned its last MD-80 aircraft on January 31, 2010, Aero Republica now operates an all Embraer-190 fleet with an average age of approximately 2.2 years, one of the youngest in the industry. Additionally, as part of its international expansion, during 4Q09 Aero Republica's international capacity represented 19.5% of total capacity.

Copa Holdings' fourth quarter and full year 2009 results highlight the Company's ability to operate and grow profitably in a challenging environment. In 2010, the Company expects to increase its consolidated fleet by seven aircraft. Copa Airlines is expected to receive eight Boeing 737-800 aircraft, while Aero Republica completes its fleet renovation program with the return of one remaining MD-80 aircraft. Consolidated capacity for 2010 is expected to increase approximately 10%, with most of this growth coming from Copa Airlines capacity. Copa Holdings' consolidated fleet is expected to end the year at 63 aircraft, composed of 20 Boeing 737-700s, 17 Boeing 737-800s and 26 Embraer-190s.

Copa Holdings continues to deliver industry leading results, despite negative factors that have affected the industry as a whole. This is the result of a solid and well executed business model based on developing the most comprehensive and convenient network for intra Latin America travel. In 2010, the Company will seek to continue strengthening its long term competitive position, with the advantage of maintaining a flexible fleet plan and a strong balance sheet.

OUTLOOK FOR 2010

For 2010, the Company's guidance calls for consolidated capacity growth of approximately 10%. Load factors are expected to come in at 76%, above 2009 levels; while unit revenues (RASM) are expected to increase approximately 3% mainly as a result an improved demand environment which we expect will result in both higher load factors and yields. Unit costs excluding fuel, CASM ex-fuel, are expected to come in at 7.1 cents, slightly below 2009 levels. The estimated effective price per gallon of jet fuel, including the effect of current hedge contracts and into plane costs for 2010 is US\$2.26. As a result, the Company is projecting an operating margin in the range of 20.0% to 22.0% for 2010.

Financial Outlook (US GAAP)	2010 - Full Year
ASMs (billion)	+/-10.9
Average Load Factor	+/-76%
RASM (cents)	+/-13.0
CASM Ex-fuel (cents)	+/- 7.1
