Edgar Filing: Origin Agritech LTD - Form 20-F

Securities registered or to be registered pursuant to Section 12(g) of the Act.

None

(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None

(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period (September 30, 2017) covered by the annual report: 23,343,126 ordinary shares.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

☐Yes ☒No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

☐Yes ☒No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

☒Yes ☐No

Edgar Filing: Origin Agritech LTD - Form 20-F

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 c) Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

☒Yes ☐No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer, or an emerging growth company.

☐Large accelerated filer ☐Accelerated filer ☒Non-accelerated filer ☐Emerging growth company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards† provided pursuant to Section 13(a) of the Exchange Act. "

Indicate by a check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP ☒ International Financial Reporting Standard as Other "
Issued by the International Accounting Standards
Board "

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

☐Item 17 ☐Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

☐Yes ☒No

INTRODUCTION

Except where the context otherwise requires and for purposes of this Annual Report only:

“we,” “us,” “our company,” “our,” the “Company” and “Origin” refer to Origin Agritech Limited, State Harvest Holdings Limited, and the following, which are collectively described in this Annual Report as “our PRC Operating Companies”: Beijing Origin State Harvest Biotechnology Limited, or Origin Biotechnology, Beijing Origin Seed Limited, or Beijing Origin, and its two subsidiaries, Henan Origin Cotton Technology Development Limited, or Henan Origin and Xinjiang Originbo Seed Limited, or Xinjiang Origin, and Origin Agritech USA, LLC or Origin USA.

“last year,” “fiscal year 2017,” “the year ended September 30, 2017” and “the fiscal year ended “September 30, 2017” refer to the twelve months ended September 30, 2017, which is the period covered by this Annual Report;

all references to “Renminbi,” “RMB” or “yuan” are to the legal currency of China; all references to “U.S. dollars,” “dollars,” “or “US\$” are to the legal currency of the United States. Any discrepancies in any table between totals and sums of the amounts listed are due to rounding. The translation of Renminbi amounts into United States dollar amounts has been made for the convenience of the reader. Such translation amounts should not be construed as representations that the Renminbi amounts could be readily converted into United States dollar amounts at that rate or any other rate;

“China” or “PRC” refers to the People’s Republic of China, excluding Taiwan, Hong Kong, and Macau;

“Hong Kong” refers to the Hong Kong Special Administrative Region of the People’s Republic of China; and

“shares” and “ordinary shares” refer to our ordinary shares, “preferred shares” refers to our preferred shares

FORWARD-LOOKING INFORMATION

This Annual Report on Form 20-F contains forward-looking statements that are based on our current expectations, assumptions, estimates, and projections about our company and industry. All statements other than statements of historical fact in this Annual Report are forward-looking statements. These forward-looking statements can be identified by words or phrases such as “may,” “will,” “expect,” “anticipate,” “estimate,” “plan,” “believe,” “is/are likely to” or similar expressions. The forward-looking statements included in this Annual Report relate to, among others:

our expectations for our future business and product development, business prospects, results of business operations and current financial condition;

our plans for seed research and development and other biotechnology activities, including our ability to successfully develop and produce seeds, and receive regulatory approval for and distribute proprietary seed products;

future development of agricultural biotechnology, particularly in China, as a whole and the impact and acceptance of genetically modified crop seeds in our industry;

address the scope and impact of the governing and regulatory policies and laws regarding genetically modified seed products in our market, and our ability to apply for and receive necessary approvals and to develop, produce, market and distribute genetically modified crop seeds;

our plans to license or co-develop seed products or technologies;

- our plans to pursue product offerings in North America;
- likelihood of recurrence of accounting charges or impairments;
- expected changes in our sources of revenues and income base from our business operations or other sources;
- competition in the crop seed industry in China and other international markets;
- future development of the crop seed industry in China and other international markets;
- our plans for current staffing requirements and research and development;
- our ability to successfully raise capital to accommodate company needs which are under acceptable terms and at an acceptable share price; and
- adequacy of our facilities for our operations.

We believe it is important to communicate our expectations to our shareholders. However, there may be certain events in the future that we are not able to predict with accuracy or over which we have no control. The risk factors and cautionary language discussed in this Annual Report provide examples of risks, uncertainties and events that may cause actual results to differ materially from the expectations in these forward-looking statements, including among other things:

- changing interpretations of Generally Accepted Accounting Principles and the adoption or use of International Accounting Standards in the future;
- outcomes of PRC and international government reviews, inquiries, investigations and related litigations;
- continued compliance with government regulations of PRC and other governments;
- legislative and regulatory environments, requirements or changes adversely affecting the businesses in which we and our PRC operating companies are engaged; and

management of the growth of our business and introduction of genetically modified products.

The forward-looking statements in this Annual Report involve various risks, assumptions, and uncertainties. Although we believe that our expectations expressed in these forward-looking statements are reasonable, we cannot be certain that our expectations will materialize. Our actual results could be materially different from our expectations. Important risks and factors that could cause our actual results to be materially different from our expectations are generally set forth in the risk factors included in this Annual Report.

This Annual Report also contains information regarding the sale of certain assets of Origin. A portion of the assets of Origin were transferred to the purchaser of the assets in September 2017 and the remainder of the assets is expected to be transferred to the purchaser in 2018. The partial closing in September 2017 included the assumption of various debt obligations of the Company. The Company transferred the assets in September 2017 on the basis of deferred payment of the majority of the purchase price.

The forward-looking statements made in this Annual Report relate only to events or information as of the date of the statements. Readers should read these statements in conjunction with the risk factors disclosed in this Annual Report.

All forward-looking statements included herein attributable to us or other parties or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. Except to the extent required by applicable laws and regulations, we undertake no obligations to update these forward-looking statements to reflect events or circumstances after the date of this Annual Report or to reflect the occurrence of unanticipated events.

PART I

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISORS

Not Applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not Applicable.

ITEM 3. KEY INFORMATION

A. Selected financial data.

The following selected consolidated financial information was derived from our fiscal year end consolidated financial statements. The following information should be read in conjunction with those statements and Item 5, “Operating and Financial Review and Prospects.”

Our summary consolidated statements of operations and comprehensive income data for the fiscal years ended September 30, 2015, 2016 and 2017 and our summary consolidated balance sheet data as of September 30, 2016 and 2017, as set forth below, are derived from, and are qualified in their entirety by reference to, our audited consolidated financial statements, including the notes thereto, which are included in this Annual Report. Our summary unaudited consolidated balance sheet data as of September 30, 2015, as set forth below, are derived from financial records of Origin.

We have omitted the selected financial data for the years ended September 30, 2013 and 2014, based on the fact that for us to provide the information reflecting our discontinued operations it would take a significant amount of time and cause us to incur an unreasonable expense. We do not believe that to provide the selected financial data for those years, as adjusted to reflect the discontinued operations would provide any meaningful disclosure for investors, given the extent to which the discontinued operations then represented the majority of the revenue and expenses in those years.

Our consolidated financial statements are prepared and presented in accordance with accounting principles generally accepted in the United States, or U.S. GAAP.

(1) Translation of Renminbi amounts into United States dollar amounts has been made for the convenience of the reader for the year ended September 30, 2017, and has been made at the exchange rate quoted by the State Administration of Foreign Exchange in China on September 30, 2017, of RMB6.6369 to US\$1.00. Such translation amounts should not be construed as a representation that the Renminbi amounts could be readily converted into United States dollar amounts at that rate or any other rate.

(2) Current working capital is the difference between total current assets and total current liabilities.

Exchange Rate Information

The conversion of Renminbi into U.S. dollars in this Annual Report is based on the statistics of the State Administration of Foreign Exchange. The consolidated financial statements are presented in Renminbi, which is our reporting currency. The translation of Renminbi amounts into United States dollar amounts has been made for the convenience of the reader and has been made at the exchange rate quoted by the State Administration of Foreign Exchange in China on September 30, 2017, of RMB6.6369 to US\$1.00. Unless otherwise noted, for the years ended September 30, 2013, 2014, 2015, and 2016 all translations from Renminbi to U.S. dollars in this Annual Report were made at RMB6.1480, RMB6.1525, RMB6.3613, and RMB6.6778 per US \$1.00, respectively, which were the prevailing year or period end closing rates for those periods. We make no representation that any Renminbi or U.S. dollar amounts could have been, or could be, converted into U.S. dollars or Renminbi, as the case may be, at any particular rate, the rates stated below, or at all. The PRC government imposes controls over its foreign currency reserves in part through direct regulation of the conversion of Renminbi into foreign exchange and through restrictions on foreign trade.

The following table sets forth information concerning exchange rates between the Renminbi and the U.S. dollar for the periods indicated. These rates are not necessarily the exchange rates that we used in this Annual Report or will use in the preparation of our periodic reports or any other information to be provided to you. The source of the rates is the State Administration of Foreign Exchange in China. At September 30, 2017, the closing exchange rate was RMB6.6369 for one U.S. dollar. As of February 3, 2018, the closing exchange rate was RMB6.2885 for one U.S. dollar.

	Average (1)	High	Low	Period-end
2012	6.3189	6.3482	6.2787	6.3410
2013	6.2318	6.3449	6.1475	6.1480
2014	6.1446	6.1710	6.0930	6.1525
2015	6.1644	6.4085	6.1079	6.3613

December 2017	6.5933	6.6251	6.5342	6.5342

(1) Annual averages are calculated from month-end rates. Monthly averages are calculated using the average of the daily rates during the month.

B. Capitalization and indebtedness.

Not Applicable

C. Reasons for the offer and use of proceeds.

Not Applicable.

D. Risk factors.

Risks relating to our business

If we do not manage our ongoing operations successfully, our growth and chances for profitability will be hindered or impeded.

Our company focuses on researching and developing corn seeds and deployment of our biotechnology assets. We plan to focus on licensing our traits and seed germplasm characteristics within China and around the globe. We also plan on providing contract research and development services to other companies engaged in seed development. All these activities are expected to place on our corporate administrative, operational, and financial personnel and other human resources and on our cash flow needs and the requirement for additional working capital. Our current resources are not likely fully adequate to support our planned operations and expansion.

Our independent auditors have issued their report with a going concern statement.

The report on our financial statements for the fiscal years ended September 30, 2016 and 2017, included in this Annual Report on Form 20-F contains a going concern statement. Based on our financial resources and our planned operations we will need to obtain a substantial amount of capital to continue our business, for which we do not have any arrangements and/or generate increased revenue from operations to cover our expenses, of which we cannot be certain. If we are unable to fund our operations, we may have to curtail substantial parts of our business operations or cease our business operations. Investors should evaluate their investment in the Company based on these financial uncertainties.

The successful development and commercialization of our biotech pipeline of products will be important for our growth.

With the sale of our seed production and distribution business, we are focusing our business on biotechnology development in the seed industry. We conduct our own research and development efforts for genetically modified seeds, referred to as GM. We also collaborate with the Chinese Academy of Agricultural Science, China Agricultural University, Zhejiang University in the PRC under various agreements for seed genetic modifications and other seed biotechnologies that give us the right to market the seeds and technologies they develop. We also are seeking other development and marketing arrangements with other entities in China and elsewhere. The length of time and the risk associated with breeding and biotech pipelines are similar and interlinked because both are required as a package for commercial success in markets where biotech traits are approved for growers. Regulatory requirements affect the development of our biotech products, including the GM crop testing of seeds containing the biotech traits, which could harm our business and results of operations if regulations are not satisfied. The testing procedures can be lengthy and costly, with no guarantee of success. It could have an adverse effect on our operations if our genetically modified products are unable to pass the safety evaluation for genetically modified agricultural organisms.

There has been a worldwide increase in the development and application of genetically modified agricultural products to enhance crop seed quality and increase crop yields. The Biosafety certificate of genetically modified corn and rice seeds have been granted in China only recently. As government policies change to allow more genetically modified seeds and demand develops for these products, we expect that we will produce more genetically modified products to the extent we are able. There is a risk that our current steps to respond to the potential competitive threat posed by genetically modified agricultural products, including our research and development activities with respect to genetically modified crop seeds, may not enable us to compete successfully.

The potential uncertainty in the government regulation in China of genetic technology and genetically modified, or GM, agricultural products and the acceptance of these products by the public could have an adverse effect on our business.

Genetically modified seed products are controversial; thus genetic modification has not yet been accepted in many countries throughout the world. The Chinese government has only recently begun to issue GM crop safety certificates for eventual commercial cultivation of GM seeds. Consumer reaction to GM products is also becoming a factor in the overall approval process and the ability of companies, such as ours, to sell or license our GM products. The relative novelty and the potential uncertainty in the government regulation of genetic technology and ultimate consumer acceptance will have an effect on our business development strategy and research activities and may cause us to re-evaluate our development programs for developing new seeds.

The government may not approve or may limit commercialization of genetically modified corn products, which could have an adverse impact on the future of the company.

Even though we believe biotechnology is important in agricultural applications and the government has supported and approved some uses of genetically modified seeds, we cannot predict whether or when the government will approve the full commercialization of GM seeds, including modified corn. The government may not approve the full commercialization of GM corn, and it may even ultimately conclude to limit or ban commercialization and/or research relating to genetically modified corn and other seed products. Any of these actions could have an adverse impact on our future development, and we would not be able to recover our research and development costs spent in developing biotechnology products.

Any operations outside China will be subject to foreign regulatory and legislative requirements, and it will be costly to comply with those regulatory requirements. If we are unable to meet these requirements, we will not be able to distribute our products.

Foreign regulatory and legislative requirements will impact the development and distribution of our products in the global market. Certain markets may require rigorous testing and pre-approval prior to a market release of the GM seeds.

For example, prior to the entry into the United States market, we believe that we will need to obtain regulatory approval from various federal and state governmental agencies. The United States Department of Agriculture has to determine if there are any “plant pest” issues with the specific crop and traits. Further, because we use Bt genes in some of our products, the US Environmental Protection Agency (the “EPA”) will have to determine if there are any pesticide-related traits that are subject to regulation. We may be required to submit a Microbial Commercial Activity Notice (MCAN) to the EPA, which includes detailed information describing the seed’s characteristics and genetic construction, health and environmental effects, and other data, before our GM seeds can be used in the United States for commercial purposes. Finally, even if our products have the required certificates and permits, we continuously will be subject to Food and Drug Administration (“FDA”) regulations about food safety, which place responsibility on the seed producer to assure the safety of the GM seed in the food chain. We may also need to provide to the FDA information to prove that our GM crop seeds are “substantially equivalent” to non-modified versions of the seed. In the United States, we will also be subject to state regulations: for example, some states have required specific labeling, banned planting and cultivation, and imposed additional certification requirements for use of GM seeds. These types of central and local government regulation and restrictions exist in many other countries around the world.

Obtaining and maintaining permits and certificates for production and sales, and obtaining and maintaining testing, planting and import approvals for our GM seeds, can be time-consuming and costly, with no guarantee of success. In addition, regulatory and legislative requirements may change over time which may affect our sales and profitability in those markets. The failure to receive necessary permits or approvals could have long-term effects on our ability to produce and sell some or all of our current and future products outside China and adversely affect our revenues.

The degree of public acceptance or perceived public acceptance of our biotechnology products can affect our operations.

Although all genetically modified products must go through rigorous testing, some opponents of the technology consistently attempt to raise public concern about the potential for adverse effects of genetically modified seed products on human or animal health, other plants and the environment. The potential for the adventitious presence of commercial biotechnology traits in conventional seed, or in the grain or products produced from conventional or organic crops, is another factor that could affect the public’s acceptance of these traits. Public concern can affect the

timing of, and whether we are able to obtain, government approvals. Even after approvals are granted, public concern may lead to increased regulation or legislation, which could affect our business and operations, and may adversely affect sales of our products to farmers, due to their concerns about available markets for the sale of crops or other products derived from biotechnology.

Our globalization plans may be difficult to achieve due to the expense of establishing a market presence.

Although we believe we have potential seeds that could be of interest outside of China, to establish a global brand and presence will be difficult. Establishing a brand and maintaining a local presence will take substantial resources and time.

The global competition in biotechnology will affect our business.

We believe we are a leader in biotechnology in China since we have been conducting our proprietary biotechnology research program for many years and have an internal biotech research center. However, if and when multinational corporations engaged in the crop seed business expand into the agricultural market in China, we anticipate that they will have a greater portfolio of seed products and more advanced technologies than us. Major multinational competitors have a long history in the research and commercialization of their products, sophisticated marketing capabilities and strong intellectual property estates, all of which may give them competitive advantage over us. Any of these competitive advantages could cause our existing or future products to become less competitive or outdated, and adversely affect our product acceptance in the market place and our results of operations.

We face significant international competition in the GM seed market and the competition may affect our overall sales.

The GM seed market outside China is highly competitive, dominated by a limited number of companies. Many of our competitors have greater experience of the GM market and substantially greater resources in the research and development of plant biotechnology. These companies also have substantial production facilities for crop seeds. In addition, our competitors have established market presence, have obtained patent protection in some instances for different seeds, and have built up their brand reputation and distribution networks globally. For example, in the United States Monsanto Company and E.I. DuPont de Nemours and Company (Pioneer), dominate the GM corn seed market with approximately 70% of that market. These companies' extensive GM portfolio of seeds and their success in developing new traits in the seeds could render our existing products less competitive resulting in reduced sales and licensing opportunities compared to our expectations.

We may not be able to maintain our market advantage by improving our GM seeds to fit the needs of the market.

GM seeds varieties need to be improved and altered over a relatively short time frame because the weeds and insects develop resistance to herbicides and pesticides, which often renders the benefits of a particular GM traits less effective. GM seeds need to be altered to tolerate higher doses and/or new varieties of herbicides and pesticides and other farming practices. If our GM seed portfolio does not keep pace with these changes or goes in a direction that is not effective in the market, our position in the market would be adversely impacted. Alternatively, we believe that this characteristic of GM seeds gives us an opportunity to introduce our products into various seed markets needing new varieties. We will be required to continue to invest in new research to develop our portfolio of GM seeds so that our GM seeds can adapt to new herbicides and pesticides and differing soil, weather and growing conditions.

We have a relatively short operating history in the field of biotechnology research and are subject to the risks of any developing enterprise, any one of which could limit our growth and our product and market development.

It continues to be difficult to predict how our business will develop over the long term. Accordingly, we are still facing all of the risks and uncertainties encountered by companies in the earlier stages of development, such as:

- uncertain and continued market acceptance for our product extensions and our services;

- evolving nature of the crop seed industry in the PRC, which is marked by seed company consolidation, government subsidies to farmers is changing and becoming more limited, over production, less adherence to the qualities of

branded seeds, among other things;

highly competitive conditions from both other branded seeds and unbranded seeds and changing customer preferences or needs that will harm sales of our products;

maintaining our competitive position in the PRC and competing with Chinese and international companies, many of which have longer operating histories and greater resources than us;

the aging technology of our seed products that do not reflect current needs and the continual need to develop new seed products;

maintaining our current licensing arrangements and entering into new ones to expand our product offerings in both our domestic market and sought after international markets;

continuing to offer commercially successful products to attract and retain a larger base of direct customers and ultimate users;

continuing our existing arrangements with farms that grow our seed products and entering into new arrangements with additional production farms;

- maintaining effective control of our costs and expenses; and
- retaining our management and skilled technical staff and recruiting additional key employees.

If we are not able to meet the challenges of our businesses and managing our business plan, the likely result will be slowed growth, lower margins, additional operational costs and lower income, any of which will affect shareholder value.

Any diversion of management attention to matters related to corporate reorganization or any delays or difficulties encountered in connection with changing operations may have an adverse effect on our core business, results of operations, and/or financial condition.

Corporate reorganization and transformation activities present challenges, including geographical coordination, personnel integration and retention of key management personnel, system integration and the unification of corporate culture. These efforts generally divert management attention from our core business, cause a temporary interruption of or loss of momentum in our business and the loss of key personnel from the acquired companies. In addition, any proposed acquisitions and corporate reorganization activities will cause us to incur substantial costs, none of which are generally recoverable.

From time to time we must evaluate whether or not to discontinue a line of business or an expansion effort, which if discontinued could have an adverse impact on our financial position.

From time to time we evaluate whether or not to continue a particular line of business or an expansion effort. In the past we implemented restructuring programs to eliminate our activities in agricultural chemicals and cotton seed development, sales centers, seed distribution and other unprofitable activities. Prior to September 30, 2017, under an agreement signed in September 2016, we sold a significant portion of our seed production and distribution business to Beijing Shihui Agricultural Development Co. Ltd. In 2018, we plan to sell additional assets under the agreement with Shihui. Whenever a company undertakes to discontinue a line of business, there are expenses associated with the sale or closing of those related operations, which are reflected in the accounting for discontinued operations. The actual and accounting costs for discontinued operations may have an adverse effect on the financial position of the company in the period of discontinuance, which may result in an adverse market reaction and decline in our stock price.

We or our licensors may be subject to intellectual property infringement claims, which may force us to incur substantial legal expenses and, if determined adversely against us or our licensors, may materially disrupt our business.

We cannot be certain that our licensed or self-developed proprietary seed products do not or will not infringe the intellectual property rights held by third parties. We, or any of our licensors, may be subject to legal proceedings and claims from time to time related to the intellectual property of others. If we, or any of our licensors, are found to have violated the intellectual property rights of others, we may be required to pay damages and be enjoined from using such intellectual property, and we may incur new or additional licensing fees if we wish to continue using the infringing products, or be forced to develop or license alternative products. In addition, we may incur substantial expenses in defending against these third party infringement claims, regardless of their merit.

Efforts to protect our intellectual property rights and to defend against claims can increase our costs and may not always succeed. Any failures could adversely affect our sales and results of operations or restrict our ability to conduct our business.

Intellectual property rights are important to our business and the seed markets in China face substantial counterfeiting. We endeavor to obtain and protect our intellectual property rights where our products are produced. However, we may be unable to obtain protection for our intellectual property. Even if protection is obtained, competitors, growers or others in the chain of commerce may raise legal challenges to our rights or illegally infringe our rights, including through means that may be difficult to prevent, detect or defend. In addition, because of the rapid pace of technological change and the confidentiality of patent applications in some jurisdictions, competitors may be issued patents from applications that were unknown to us prior to issuance. These patents could reduce the value of our commercial or pipeline products or, to the extent they cover key technologies on which we have unknowingly relied, require that we obtain licenses at a financial cost to us or cease using the technology, no matter how valuable the patents may be to our business. We cannot assure you that we would be able to obtain such licenses on acceptable terms. Also, litigation may be necessary to enforce our intellectual property rights, protect our trade secrets or determine the validity and scope of the proprietary rights of others. There is a risk that the outcome of such potential litigation may not be in our favor. Such litigation may be costly and may divert management attention as well as consume other resources which could otherwise be devoted to our business. An adverse determination in any such litigation will impair our intellectual property rights and may harm our business, prospects and reputation. In addition, we have no insurance coverage against litigation costs due to lack of this kind of insurance being available in China, and we would have to bear all costs arising from such litigation to the extent we are unable to recover such costs from other parties. The occurrence of any of the foregoing may harm our business, results of operations and financial condition.

Finally, implementation of PRC intellectual property-related laws has historically been lacking, primarily because of the ambiguities in the PRC laws and the difficulties in enforcement. Accordingly, intellectual property rights and confidentiality protections in China may not be as effective as they are in the United States or other countries, which increases the risk that we may not be able to adequately protect our intellectual property. The increase in counterfeiting seed products in the market is also affecting the sales of our products.

Historically, we were dependent on revenues from the production and distribution of our corn seed products; after the sale of our seed production and distribution network, we may not be able to generate sufficient or any revenues from our continuing operations.

Seed production and distribution historically represented the principal source of revenues for the Company. For fiscal year ended September 30, 2017, sales and distribution of corn seed products have been reclassified to the income or loss from discontinued operations. In addition, the revenue generated from seed research and development has been and is expected to continue to be immaterial. We cannot estimate at this time if or when we will be able to generate revenue from the seed development business to be able to sustain our operations. We expect that we will have to use

the sale proceeds from the sale of our production and distribution business and additional equity and borrowed capital to continue to develop our research and development business.

Failure to develop and market new products could impact the Company's competitive position and have an adverse effect on the Company's financial results.

The Company's operating results will depend on our ability to renew our pipeline of new seed products and to bring those products to the market. This ability could be adversely affected by difficulties or delays in product development such as the inability to identify viable new products, greater than anticipated development costs, technical difficulties, regulatory obstacles, competition, lack of demand, insufficient intellectual property protection, or lack of market acceptance of new products and services. Due to the lengthy development process, technological challenges and intense competition, there can be no assurance that any of the products the Company is currently developing, or could begin to develop in the future, will achieve substantial commercial success. Consequently, if we are not able to fund our research and development activities and deliver new products to the markets we serve on a timely basis, our growth and operations will be harmed. In addition, sales of the Company's new products could cannibalize sales of some of its current products, offsetting the benefit of even a successful product introduction.

If we fail to introduce and commercialize new crop seeds, we will not be able to recover research, development and cover our other costs.

We cannot guarantee the development and performance of new crop seed varieties, whether licensed or proprietary, or that they will meet our customers' expectations. Farmers generally need time to learn about new seed varieties and how to plant and tend them. Their traditional planting experience may make it difficult for them to adapt to the new varieties. The process and timing for new seed products to gain market recognition and acceptance is long and uncertain. If we fail to introduce and commercialize a new seed variety that meets the demand of farmers and to provide the proper education about the seeds to distributors, farmers and the public, we may not be able to generate sufficient sales to cover our costs or generate a financial return on our investment.

We may be exposed to product quality claims, which may cause us to incur substantial legal expenses and, if determined adversely against us, may cause us to pay significant damage awards.

The performance of our seeds depends on climate, geographical areas, cultivation method, farmers' degree of knowledge and other factors in addition to genetic traits and the quality of our seeds. Natural disasters may also affect the performance of our seeds, particularly when farmers are not able to timely and effectively respond to those disasters. Furthermore, the cultivability of some farmland is deteriorating because of toxic and hazardous materials resulting from farmers' overuse of chemical herbicides and pesticides and the fall-out from other sources of environmental pollution. These factors generally cause underproduction, but farmers may attribute underproduction to seed quality. We may be subject to legal proceedings and claims from time to time relating to our seed quality. The defense of these proceedings and claims can be both costly and time consuming and may significantly divert efforts and resources of our management personnel. An adverse determination in any such proceeding could subject us to significant liability and damage our market reputation and prevent us from achieving increased sales and market share. Protracted litigation could also result in our customers or potential customers deferring or limiting their purchase of our products.

We have limited business insurance coverage in China.

PRC insurance companies do not offer extensive business insurance products. As a result, we have very limited business liability insurance, business disruption insurance, or product liability coverage for our operations in China. We have determined that the difficulties associated with acquiring such insurance on commercially acceptable terms make it impractical for us to obtain such coverage. Most likely we would bear the effects of any business disruption, litigation or natural disaster resulting in our incurring substantial costs and the diversion of our resources, and could adversely affect our operations and financial condition.

The transactions contemplated by the Master Transaction Agreement may not be completed on the terms or timeline currently contemplated, or at all, as Origin or Beijing Shihui Agricultural Development Co. Ltd. may be unable to satisfy the conditions or obtain the approvals required to complete the transactions or such approvals may contain material restrictions or conditions.

In September 2016, we entered into a Master Transaction Agreement ("Master Agreement"), along with our controlled companies, with Beijing Shihui Agricultural Development Co. Ltd. ("Shihui"), to sell our commercial seed production and distribution assets and certain other assets in the PRC (the "Sale"). The transaction involved risks to our overall operations, including but not limited to, the failure to consummate or delay in consummating the proposed transaction; the risk that a condition to closing of the proposed transaction may not be satisfied or that required financing for the proposed transaction may not be available to Shihui or may be delayed; the risk that a regulatory approval that may be required for the proposed transaction is delayed, is not obtained, or is obtained subject to conditions that are not

anticipated; the effect of the announcement of the proposed transaction on our relationships with our customers, operating results, and business generally; and adverse changes in general economic or market conditions. The first stage of the Sale with respect to the seed production and distribution business was completed in July 2017 and a partial of the second stage of the Sales was completed in August 31, 2107. As of September 30, 2017, we received RMB 45,400,000 in purchase price and RMB 142,000,000 of our debt was assumed. We deferred a portion of purchase price to be paid in fiscal year 2018, which included a loan to Shihui of RMB 21,000,000 on an unsecured basis. We cannot estimate when the purchase price and loan will be fully paid, if at all. Additionally, we cannot predict when the second stage of the Sale with respect to certain other assets of the Company will be completed. If the Sale cannot be completed, our results will be adversely impacted and the capital to operate our continuing business may not be available.

After the sale of the production facilities for seeds is completed, the anticipated benefits from the transactions may not be realized.

The consummation of the sale of designated seed production assets is expected to provide us with some financial resources to re-invest in its new strategic business model for and from China. Our overall objective going forward is to upgrade our research and development capabilities, develop additional Origin's biotech traits and seed germplasm to expand our portfolio of products, and pursuing licensing in China and elsewhere in the world. We may not be able to successfully implement this business plan due to various factors, including the following:

we have historically generated our revenue from the corn seed production and distribution business in China. Without that segment of the revenue, our continuing operation results may be negatively impacted;

we currently have little presence outside of China, and in the future, we may not be able to successfully expand our biotechnology and planned genetic research and introduce our products to non-Chinese markets and obtain new customers in those markets;

because of the foreign exchange regulations in China, we may not be able to use the proceeds from the sale to fund foreign operations and provide necessary funding for the expansion of our foreign operations;

we may face additional government regulations in the new markets; and

we may have difficulties in achieving anticipated cost savings, business opportunities and growth prospects from the sale.

Risks relating to doing business in China

If we do not comply with PRC regulations, we may not be able to operate our business or we may be fined, both of which would adversely affect our business, operations and revenues.

The PRC has many regulations relating to the seed business, including obtaining and maintaining operating licenses and permits. Seed products must be licensed and undergo a stringent review process before they may be sold in the PRC. Environmental regulation in the future may be potentially concerned with the development, growing and use of GM seed products. Seed development companies also have requirements for their facilities, personnel and investment. We believe we currently have all the necessary licenses for our business, and that we are in compliance with the other

applicable laws and regulations. If we are not in compliance, we may be fined or lose the ability to sell a particular seed or operate our business altogether. If the fines are substantial or if our ability to sell or operate is withdrawn, this will result in additional costs or the loss of revenues and could prevent us from continuing as an operating business.

If we do not comply with applicable government regulations, we may be prohibited from continuing some or all of our operations, resulting in a reduction of growth and ultimately market share due to loss of competitive position.

Continuation of our business revenues depends on receiving approval from the PRC government to market new seed hybrids that we are developing and will develop. In addition, there may be circumstances under which the governmental approvals granted are subject to change without substantial advance notice, and it is possible that we could fail to obtain the approvals needed to expand our business. The failure to obtain or to maintain such approvals would limit the number and quality of products that we would be able to offer. This reduction in product offerings would cause a reduction in the growth previously experienced and over time would result in the loss of market share from the competitive pressures of seeds developed by others that would likely be better than our products.

The technical services agreements between Origin Biotechnology and the other operating subsidiaries may be subject to scrutiny by the PRC tax authorities for transfer pricing adjustments.

We could face adverse tax consequences if the PRC tax authorities determine that our technical service agreements between Origin Biotechnology and the other PRC operating subsidiaries (and possibly our former subsidiaries), were not entered into based on arm's length negotiations. If the PRC tax authorities determine that these agreements were not entered into on an arm's length basis, they may adjust our income and expenses for PRC tax purposes in the form of a transfer pricing adjustment. A transfer pricing adjustment could result in a reduction, for PRC tax purposes, of deductions recorded by the operating subsidiaries, which could adversely affect us by:

increasing the PRC operating subsidiaries' tax liability without reducing Origin Biotechnology's tax liability, which could further result in late payment fees and other penalties to our PRC operating subsidiaries for under-paid taxes; or

limiting Origin Biotechnology's ability to maintain preferential tax treatment and government financial incentives, which, if the transfer pricing adjustment is significant, could result in Origin Biotechnology failing to qualify for those preferential tax treatments and government financial incentives.

As a result, any transfer pricing adjustment could have an adverse impact on our financial condition.

Our business benefits from certain PRC government subsidies for the agricultural sector. Expiration of, or changes to, these incentives could have a material adverse effect on our operating results.

The PRC government has in the past provided reduced taxes and subsidies and other support across the agricultural industry. For instance, the government subsidizes farmers for their seed purchases, and has increased spending on rural infrastructure. Sales of agricultural products from producers to intermediaries or to farmers are exempt from PRC Value-Added Tax ("VAT"). More recently, the government has cut back on these preferential treatments to the seed industry and farmers. In addition, subsidy policies have an adverse effect on our ability to market our products. Farmers can buy crop seeds designated as "high-quality" at subsidized prices, however, the designation of seeds as "high-quality" is at the discretion of the local government. It is possible that this policy could result in preferential treatment for local seed producers, with locally produced seeds being designated as "high-quality" while ours are not designated as such. If such preferential treatment were to occur, the price for our seeds to farmers in those provinces will be higher than the subsidized local seeds, and the sale of our seeds in that province will suffer, adversely affect our results of operations.

The discontinuation of any of the preferential tax treatments currently available to our PRC subsidiaries could materially increase our tax liabilities.

Beijing Origin is entitled to a preferential enterprise income tax rate of 15% as a result of having the qualification of a "high and new technology enterprise". This qualification is effective for a three-year period from Oct. 2017 and subject to an annual evaluation by the relevant government authorities in China. Additionally, Beijing Origin has recently received a "breed-produce-distribute" integrated crop seed license and is currently applying for a more favorable tax rate. The financial position of the company after the sale of our corn related production and distribution assets may cause the termination of the high and new technology enterprise qualification reapplication and cause an adverse impact on tax or tax rate.

The discontinuation of any of our preferential tax treatments could materially increase our tax obligations, and our future application for more favorable tax rate based on our “breed-produce-distribute” integrated crop seed license may not be approved.

Under China’s Enterprise Income Tax Law, we may be classified as a “resident enterprise” of China. Such classification could result in unfavorable tax consequences to us and our non-PRC shareholders

Under the current Enterprise Income Tax Law, or the New EIT Law, an enterprise established outside of China with “de facto management bodies” within China is considered a “resident enterprise,” meaning that it can be treated in a manner similar to a Chinese enterprise for enterprise income tax purposes. The implementing rules of the EIT Law define de facto management as “substantial and overall management and control over the production and operations, personnel, accounting, and properties” of the enterprise. In April 2009, the SAT issued a circular, known as Circular 82, which provides certain specific criteria for determining whether the “de facto management body” of a PRC-controlled enterprise that is incorporated offshore is located in China. Although this circular only applies to offshore enterprises controlled by PRC enterprises or PRC enterprise groups, not those controlled by PRC individuals or foreigners like us, the criteria set forth in the circular may reflect the SAT’s general position on how the “de facto management body” text should be applied in determining the tax resident status of all offshore enterprises. According to Circular 82, an offshore incorporated enterprise controlled by a PRC enterprise or a PRC enterprise group will be regarded as a PRC tax resident by virtue of having its “de facto management body” in China and will be subject to PRC enterprise income tax on its global income only if all of the following conditions are met: (i) the primary location of the day-to-day operational management is in the PRC; (ii) decisions relating to the enterprise’s financial and human resource matters are made or are subject to approval by organizations or personnel in the PRC; (iii) the enterprise’s primary assets, accounting books and records, company seals, and board and shareholder resolutions, are located or maintained in the PRC; and (iv) at least 50% of voting board members or senior executives habitually reside in the PRC.

However, it is unclear how tax authorities will determine tax residency based on the facts of each case. If the PRC tax authorities determine that our British Virgin Islands holding company is a “resident enterprise” for PRC enterprise income tax purposes, a number of unfavorable PRC tax consequences could follow. First, we may be subject to enterprise income tax on our worldwide taxable income as well as PRC enterprise income tax reporting obligations. Second, we may be required to withhold a 10% withholding tax from dividends we pay to our shareholders that are non-resident enterprises.

In addition to the uncertainty in how the “resident enterprise” classification could apply, it is also possible that the rules may change in the future, possibly with retroactive effect.

Adverse changes in political and economic policies of the PRC, including its policy of reforming its economic system, could have an adverse effect on the growth of private businesses in the PRC such as ours.

Although the PRC has been reforming its economic system to rely more on market forces to influence the deployment of economic resources, it still has strong elements of a planned economy based on governmental dictates and priorities that determine or at least influence business endeavors. We cannot predict whether or not the government will continue to encourage economic liberalization and further loosen its control over the economy and encourage private enterprise or whether it will strengthen its controls through planned industrial policy and control financial and other elements of economic condition. We also cannot predict the timing or extent of future economic policy that may be proposed. Any imposition of planned economy regulation or similar kinds of restrictions could reduce the freedom of private businesses to operate in a profitable manner, restrict inflows of capital or stifle investor willingness to participate in the PRC economy. To the extent we need additional capital; any restrictions on foreign ownership, foreign investment and repatriation of profits will hamper our ability to find capital outside of the PRC.

A return to profit repatriation controls may limit our ability to pay dividends and expand our business, and may reduce the attractiveness of investing in PRC business opportunities.

PRC law allows enterprises owned by foreign investors to remit to other countries their current account items, such as profits, dividends and bonuses earned in the PRC, and the remittance does not require prior approval by the State Administration of Foreign Exchange, or SAFE, upon the proper production of qualified commercial vouchers or legal documents as required by the regulations. However, dividend payments are subject to prior satisfaction of corporate and withholding tax obligations, corporate reserve requirements and board determined social benefit allocations. SAFE regulations generally require extensive documentation and reporting about other kinds of payments to be transmitted outside of China, some of which is burdensome and slows payments. The availability of foreign exchange assets in the banking system will also effect the ability to repatriate profits as well as provide funding for foreign operations. If there is a return to payment restrictions and reporting, the ability of a PRC company to attract investors will be reduced.

Also, our investors may not be able to obtain the benefits of the profits of the business generated in the PRC for other reasons. Relevant PRC laws and regulations permit payment of dividends only from accumulated profits, if any, determined in accordance with PRC accounting standards and regulations. Each of our subsidiaries and our affiliated entities in China is required to set aside at least 10% of its after-tax profits each year, if any, to fund a statutory reserve until such reserve reaches 50% of its registered capital, and to further set aside a portion of its after-tax profits to fund the employee welfare fund at the discretion of the shareholders' meeting or the board. These reserves are not distributable as cash dividends. In addition, the PRC tax authorities may require us to adjust our taxable income under the contractual arrangements we currently have in place in a manner that would materially and adversely affect our subsidiary's ability to pay dividends and other distributions to us. Any limitation on the ability of our subsidiary and our affiliated entity to distribute dividends or other payments to us could materially limit our ability to grow, make investments or acquisitions that could be beneficial to our businesses or otherwise fund and conduct our business.

Pursuant to PRC enterprise income tax law, dividends payable by a foreign-invested enterprise, or FIE, including Origin Biotechnology, from sources in the PRC to its foreign investors are subject to a 10% withholding tax, unless any such foreign investor's jurisdiction of incorporation has a tax treaty with China that provides for a different withholding arrangement. No such treaty currently exists with the British Virgin Islands. Prior to 2008, dividend payments to foreign investors made by FIEs were exempt from PRC withholding tax.

Any fluctuations in exchange rates may adversely affect your investment.

The value of the Renminbi against the U.S. dollar and other currencies may fluctuate and is affected by, among other things, changes in political and economic conditions. Because our earnings and cash from operations are denominated in Renminbi, as the reporting currency, fluctuations in exchange rates between U.S. dollars and Renminbi will affect our balance sheet and earnings per share when stated in U.S. dollars. The translation of Renminbi amounts into United States dollar amounts has been made for the convenience of the reader. Such translation amounts should not be construed as representations that the Renminbi amounts could be readily converted into United States dollar amounts at that rate or any other rate. The appreciation or depreciation in the value of the Renminbi relative to the U.S. dollar would affect our financial results when reported in U.S. dollar terms without giving effect to any underlying change in our business or results of operations. Fluctuations in the exchange rate will affect the relative value of any dividend we issue which will be exchanged into U.S. dollars, the value of any U.S. dollar denominated investments we make in the future and any earnings on such investments.

There are government regulations that limit or prohibit foreign investment in the PRC, which may restrict our growth.

Notwithstanding the general restriction on foreign investment in the seed industry in the PRC, our corporate structure currently enables us to receive foreign investment. Our continued ability to receive foreign investment may be important to our ability to continue to expand our business rapidly and to manage that expansion effectively. We cannot be certain that a change in the regulations allowing us to receive foreign investment will not occur. In the event of such a change, our plan to expand our business could be disrupted.

PRC regulations relating to offshore investment activities by PRC residents may increase the administrative burden we face and create regulatory uncertainties that could restrict our overseas and cross-border investment activity. Failure by our shareholders who are PRC residents to make any required applications and filings pursuant to such regulations may prevent us from being able to distribute profits, if any, and could expose us and our PRC resident shareholders to liability under PRC law.

SAFE promulgated regulations that require registration with local SAFE offices in connection with direct or indirect offshore investment by PRC residents, including PRC individual residents and PRC corporate entities. These regulations apply to our shareholders who are PRC residents and also apply to our prior and future offshore acquisitions. In particular, the SAFE regulations require PRC residents to file with competent SAFE offices information about offshore companies in which they have directly or indirectly invested and to make follow-up filings in connection with certain material transactions involving such offshore companies, such as increases or decreases in investment amount, transfers or exchanges of shares, mergers or divisions, long-term equity or debt investments, or external guarantees or other material events that do not involve return investment.

The SAFE regulations required prior registration of direct or indirect investments previously made by PRC residents in offshore companies. If a PRC resident with a direct or indirect stake in an offshore parent company fails to make the required SAFE registration, the PRC subsidiaries of such offshore parent company may be prohibited from making distributions of profit to the offshore parent and from paying the offshore parent proceeds from any reduction in capital, share transfer or liquidation in respect of the PRC subsidiaries. Further, failure to comply with various SAFE registration requirements described above could result in liability under PRC law for foreign exchange evasion.

We believe our major shareholders who are PRC residents, or whose shares are beneficially owned by PRC residents, have completed foreign exchange registration with the local foreign exchange bureau according to these SAFE regulations. However, with these regulations there is uncertainty concerning the reconciliation of the new regulations with other approval requirements, it is unclear how the regulations, and any future legislation concerning offshore or cross-border transactions, will be interpreted, amended and implemented by the relevant government authorities. We cannot assure you that all of our shareholders who are PRC residents will comply with our request to make or obtain any applicable registrations or approvals required by the regulations or other related legislation. The failure or inability of our PRC resident shareholders to receive any required approvals or make any required registrations may subject us to fines and legal sanctions, restrict our overseas or cross-border investment activities, limit our PRC subsidiary to make distributions or pay dividends or affect our ownership structure. As a result, our business operations and our ability to distribute a dividend to you could be adversely affected.

The PRC legal system has inherent uncertainties that could limit the legal protections available to you.

Nearly all of our assets and all of our operations are in the PRC. The PRC legal system is based on written statutes. Prior court decisions may be cited for reference but are not binding on subsequent cases and have limited precedential value. Since 1979, the PRC legislative bodies have promulgated laws and regulations dealing with such economic matters as foreign investment, corporate organization and governance, commerce, taxation and trade. However, because of the limited volume of published decisions and their non-binding nature, the interpretation and enforcement of these laws and regulations involve uncertainties. The laws in the PRC differ from the laws in the United States and may afford less protection to our non-PRC shareholders.

You may experience difficulties in effecting service of legal process, enforcing foreign judgments or bringing original actions in the PRC based on United States judgments against us, our subsidiaries, officers and directors.

We are incorporated in the British Virgin Islands and our PRC operating subsidiaries are formed under PRC law. Substantially all of our assets are located in the PRC. In addition, some of our directors and executive officers reside within the PRC, and substantially all of the assets of these persons are located within the PRC. It may not be possible to affect service of process within the United States or elsewhere outside the PRC upon our directors, or executive officers and experts, including effecting service of process with respect to matters arising under United States federal securities laws or applicable state securities laws. The PRC does not have treaties providing for the reciprocal recognition and enforcement of judgments of courts with the United States and many other countries. As a result, recognition and enforcement in the PRC of judgments of a court in the United States or many other jurisdictions in relation to any matter, including securities laws, may be difficult or impossible. Furthermore, an original action may be brought in the PRC against our assets and our subsidiaries, our directors and executive officers and experts only if the actions are not required to be arbitrated by PRC law and only if the facts alleged in the complaint give rise to a cause of action under PRC law. In connection with any such original action, a PRC court may award civil liability, including monetary damages.

A reversion in the Chinese government's policy of favoring state owned enterprise including seed companies at the expense of privately owned companies may disadvantage our competitive position in the industry.

In China, state owned enterprises including state owned seed companies typically enjoy preferential policy treatments such as more favorable access to capital, tax breaks and subsidies at various levels of governments. These treatments have created barrier of entry protecting state companies at the expense of private ones, both domestic and international. Despite the reform of the Chinese seed industry in 2008 and the anticipated market-driven industry consolidation going forward, any reversion in the Chinese government's policy to protect state owned seed companies may again pose competitive challenges to non-state owned companies such as Origin.

We may become a passive foreign investment company, which could result in adverse U.S. tax consequences to U.S. holders.

Depending upon the value of our shares and the composition of our assets and income over time, we could be classified as a passive foreign investment company, or PFIC, by the IRS, for U.S. federal income tax purposes. If we were classified as a PFIC in any taxable year in which you hold our shares and you are a U.S. investor, you would generally be taxed at higher ordinary income rates, rather than lower capital gain rates, when we dispose of those shares at a gain in a later year, even if we are not a PFIC in that year. In addition, a portion of the tax imposed on your gain would be increased by an interest charge. Moreover, if we were classified as a PFIC in any taxable year, you would not be able to benefit from any preferential tax rate with respect to any dividend distribution that you may receive from us in that year or any later year. Finally, you would also be subject to special U.S. tax reporting requirements.

Based on our understanding and current assessment, we believe that we were not a PFIC for the taxable year 2015. However, there can be no assurance that we will not be a PFIC for the taxable year and/or later taxable years, as PFIC status is re-tested each year and depends on the facts in such year. For example, we would be a PFIC for the taxable year 2015 if the sum of our average market capitalization, which is our share price multiplied by the total number of our outstanding shares, and our liabilities over that taxable year is not more than twice the value of our cash, cash equivalents, and other assets that produce, or are held for the production of, passive income. We could also be a PFIC for any taxable year if the gross income that we and our subsidiaries earn from passive investments is substantial in comparison with the gross income from our business operations. While we will continue to examine our PFIC status, we cannot assure you that we will not be a PFIC for any future taxable year.

Risks relating to our shares

Certain provisions in our organizational documents may discourage our acquisition by a third party, which could limit your opportunity to sell your shares at a premium.

Our memorandum and articles of association include provisions that could limit the ability of others to acquire control of us. Under those provisions, our board of directors has the power to issue preferred shares with such rights attaching to them as they decide and this power could be used in a manner that would delay, defer or prevent a change of control of us. These provisions could have the effect of depriving you of the opportunity to sell your shares at a premium over prevailing market prices by discouraging third parties from seeking to acquire control of us in a tender offer or similar transactions.

We qualify as a foreign private issuer and, as a result, are subject to reduced requirements with respect to the reporting of financial statements and other material events to our shareholders and the SEC.

As a foreign private issuer, we are obligated to file an Annual Report with audited financial statements and Form 6-K reports with the United States Securities and Exchange Commission, or the SEC, at such times as we release information to the public either voluntarily or pursuant to the laws of the British Virgin Islands or the PRC. Therefore, the regularity of financial and other information may be less than would be applicable to a domestic United States registered company under the rules and regulations of the SEC. Investors may not receive information on a timely basis, which could increase their risk of investment in us.

Because we are a foreign private issuer, we have elected to follow British Virgin Islands law in connection with compliance under the Nasdaq Marketplace Rules, which restrict the application of the Nasdaq corporate governance requirements.

The Nasdaq Marketplace Rules permit foreign private issuers to elect not to be governed by all the corporate governance rules. We have elected to avail ourselves of the exemption provided by Nasdaq, and we have elected to be governed by only the British Virgin Island laws and the terms of our memorandum and articles, which for example do not require us to hold an annual meeting each year. Consequently, investors may not have the ability to express their opinion on our business and the actions of directors through the voting process for directors. In other respects, we do follow the Nasdaq Marketplace Rules, such as having a nominations and compensation committee, but these are voluntary and may be eliminated at any time.

We currently have an outstanding Loan Note which is convertible into our ordinary shares, and an equity line financing facility, under which we can sell ordinary shares. As a result, our shareholders may experience numerical and economic dilution from the sale of the ordinary shares of the resulted Equity Line or conversion of the Loan Note.

To finance our business in North America during 2017, we issued a convertible note for an aggregate principal amount of \$2,344,828 with a U.S. investor in July 2017 (the “Loan Note”), which bears interest and has various default penalties. The Loan Note, starting January 5, 2018, is converted into our ordinary shares at the lowest trading price during the 15 days prior to the conversion. As of the filing date of this report, the Loan Note holder has converted approximately \$500,000 of the amount due. The Loan Note is currently in default for non-repayment of the principle when due and certain other asserted defaults. We have also entered into an equity line financing facility (the “Equity Line”) that allows us to require under certain conditions that the investor of the Loan Note purchase up to \$4,500,000 worth of our ordinary shares from time to time at a per share price lower than the then market price of the shares. The maximum number of ordinary shares that may be issued under the Equity Line is 6,000,000 shares representing approximately 25% of the current number of issued and outstanding ordinary shares of the Company. To the extent the Company puts ordinary shares under the Equity Line or issues ordinary shares on conversion of the Loan Note, the additional ordinary shares will dilute the percentage ownership of the Company of the then current stockholders. Additionally, to the extent that the price of an ordinary share is sold or converted at is less than the price paid or the book value of an ordinary share at such time, there will be an economic dilution effect on the outstanding shares.

There is no assurance that we will be able to sell our ordinary shares under the Equity Line.

Although we have the right to put ordinary shares under the Equity Line up to a maximum value of \$4,500,000, because there is an immediate discount of 6%, we would only be able to realize, before expenses, a maximum of \$4,230,000 in proceeds if all the ordinary shares under the Equity Line are sold by the Company to the selling stockholder. Additionally, we may not be able to sell the full amount of the ordinary shares because there are a number of conditions to the put rights, including a requirement that we cannot put shares if the market price of an ordinary share is less than \$.75. If we are not able to raise capital through this means, we will have to find other sources of capital to the extent necessary to supplement our revenues from our ongoing business and the proceeds from the sale of assets. If we do not have the necessary capital and income resources, we may have to adjust our business endeavors and curtail some of our restructuring and expansionary plans.

The Loan Note is potentially convertible into a large number of ordinary shares and has numerous default provisions.

The Loan Note bears interest at 8%, requires repayment premiums and requires the issuance of shares at the time of each drawdown. Additionally, the amounts due are convertible into ordinary shares at a discount rate, which may

result in a substantial number of shares being issued in repayment. These shares may have to be issued at a time when it is not convenient for the Company, and may have an adverse impact on the market price of the stock in the manner of a market overhang. Additionally, the loan provisions contain many covenants and default provisions, which could cause the Company to be in default. One of the default provisions is if the market price of an ordinary share is less than \$.75. If the Company is in default, the entire loan amount will be due and could be converted into ordinary shares. In its other loan arrangements that the Company has outstanding from time to time, there are cross default provisions, so the default under the Loan Note or another loan arrangement may cause all other outstanding institutional loans to be in default. There is no assurance that the Company would be able to repay any debt that is in default or renegotiate terms so that that the Company is not then in default.

The Loan Note is secured by the United States located assets of the Company.

For the Loan Note the Company pledged as security the United States based assets of the Company. The existence of a security arrangement while the Loan Note is outstanding may limit the ability of the Company, and particularly the United States based operations, to be able to borrow from other commercial and private lenders, who may be reluctant to take a second position on any assets or extend any amount as a loan. The inability to borrow funds when needed may restrict the ability of the Company to implement its business objectives or fund operations as needed or repay or renegotiate outstanding debt instruments.

Offers or availability for sale of a substantial number of our ordinary shares may cause the market price to decline.

The sale of substantial amounts of our ordinary shares in the public market, or the perception that sales could occur, may cause the market price of our stock to decline. The availability for sale of a substantial number of our ordinary shares under the Equity Line or on conversion of the Loan Note, whether or not sales have occurred or are occurring, could make it more difficult for us to raise additional financing through the sale of equity or equity-related securities in the future when needed, on acceptable terms, or at all.

A consistently active trading market for shares of our ordinary shares may not be sustained.

Historically, trading in our ordinary shares has been volatile. Generally, the market for our ordinary shares is characterized as “thinly-traded.” There have been, and may in the future be, extended periods when trading activity in our shares is minimal, as compared to a seasoned issuer with a large and steady volume of trading activity. The trading volume at a point in time, combined with the availability of stock, generally will impact the price at which our ordinary shares trade. Trading of a relatively small quantity of ordinary shares may disproportionately influence the market price of our ordinary shares. A consistently active and liquid trading market in our securities may never develop or be sustained.

Our stock price may be volatile.

The market price of our ordinary shares is likely to be highly volatile and could fluctuate widely in response to various factors, many of which are beyond our control, including the following: our ability to execute our business plan; operating results that fall below expectations; industry or regulatory developments; investor perception of our industry or our prospects; economic and other external factors; and the other risk factors as discussed below.

In addition, the securities markets have from time to time experienced significant price and volume fluctuations that are unrelated to the operating performance of particular companies. These market fluctuations may also materially and adversely affect the market price of our ordinary shares.

Leverage and debt service obligations may adversely affect our cash flows.

Edgar Filing: Origin Agritech LTD - Form 20-F

We currently have short-term borrowings of approximately RMB15.0 million (US\$2.26 million) and the current portion of long-term borrowings of approximately RMB35.5 million (US\$5.35 million) and long-term borrowings of approximately RMB56.8 million (US\$8.6 million). The degree to which we are leveraged could, among other things:

- require us to dedicate a portion of our near term cash flows from operations and other capital resources to debt service;

- make it difficult for us to obtain necessary financing in the future for working capital, acquisitions or other purposes on favorable terms, if at all;

- make us more vulnerable to industry downturns and competitive pressures;

- limit our flexibility in planning for, or reacting to changes in, our business, and

- require us to dedicate a portion of our near term cash flows from operations and other capital resources to debt service;.

Our ability to meet our debt service obligations will depend upon our future performance, which will be subject to financial, business and other factors affecting our operations, many of which are beyond our control.

In the course of preparing our consolidated financial statements for the years ended September 30, 2017, we and our independent registered public accounting firm identified a material weakness in our internal control over financial reporting. If we fail to implement, achieve and maintain an effective system of internal controls, we may be unable to accurately report our financial results, and investor confidence and the market price of our shares may be adversely impacted.

In the course of preparing our consolidated financial statements for the years ended September 30, 2017, a material weakness in our internal control over financial reporting was identified. The material weakness identified primarily related to the lack of sufficient qualified financial reporting and accounting personnel to properly address complex accounting issues under U.S. GAAP and timely to report and review our consolidated financial statements and related disclosures to fulfill U.S. GAAP and securities and Exchange commission financial reporting requirements, resulted from the high staff turnover rate in fiscal year 2017.

We are planning for the complete remediation of the above issue in fiscal year 2018 by seeking people with expertise in this aspect. Additionally, the existing controls and procedures will be reviewed and steps will be taken to return the financial reporting to its former efficiencies using the reviewed controls and procedures. We cannot assure you that the measures we take will be sufficient to remediate the material weakness in our internal control over financial reporting, and, if we fail to timely achieve and maintain the adequacy of our internal controls, we may continue to be unable to conclude that we have effective internal controls over financial reporting. Moreover, effective internal controls over financial reporting are necessary for us to produce reliable financial reports and are important to prevent fraud. As a result, our failure to achieve and maintain effective internal controls over financial reporting could result in the loss of investor confidence in the reliability of our financial statements, which in turn could harm our business and negatively impact the market price of our ordinary shares.

Our auditor, like other independent registered public accounting firms operating in China, is not permitted to be subject to inspection by Public Company Accounting Oversight Board, and as such, investors may be deprived of the benefits of such inspection.

The independent registered public accounting firm that issues the audit reports included in our annual reports filed with the SEC, as an auditor of companies that are traded publicly in the United States and a firm registered with the Public Company Accounting Oversight Board (United States), or PCAOB, is required by the laws of the United States to undergo regular inspections by PCAOB to assess its compliance with the laws of the United States and professional standards. Because our auditor is located in China, a jurisdiction where PCAOB is currently unable to conduct inspections without the approval of the PRC authorities, our auditor, like other independent registered public accounting firms operating in China, is currently not inspected by PCAOB. Inspections of other firms that PCAOB has conducted outside of China have identified deficiencies in those firms' audit procedures and quality control procedures, which may be addressed as part of the inspection process to improve future audit quality. The inability of PCAOB to conduct inspections of independent registered public accounting firms operating in China makes it more difficult to evaluate the effectiveness of our auditor's audit procedures or quality control procedures. As a result,

investors may be deprived of the benefits of PCAOB inspections.

On May 24, 2013, the PCAOB announced that it has entered into a Memorandum of Understanding (“MOU”) on Enforcement Cooperation with the China Securities Regulatory Commission (the “CSRC”) and the Ministry of Finance (the “MOF”). The MOU establishes a cooperative framework between the parties for the production and exchange of audit documents relevant to investigations in both countries’ respective jurisdictions. More specifically, it provides a mechanism for the parties to request and receive from each other assistance in obtaining documents and information in furtherance of their investigative duties. In addition to developing enforcement MOU, the PCAOB has been engaged in continuing discussions with the CSRC and MOF to permit joint inspections in China of audit firms that are registered with the PCAOB and audit Chinese companies that trade on U.S. exchanges.

ITEM 4. INFORMATION ON THE COMPANY

A. History and development of the Company.

Origin was first incorporated in the British Virgin Islands on February 10, 2005, and is governed by the BVI Business Companies Act, 2004, or BCA, by re-registration on July 10, 2006.

Chardan China Acquisition Corp., the predecessor of Origin, was a blank check company organized as a corporation under the laws of the State of Delaware on December 5, 2003, formed for the purpose of effecting a business combination with companies having operations based in China.

On December 20, 2004, Chardan entered into a stock purchase agreement, referred to as the Stock Purchase Agreement, with State Harvest, a company incorporated in the British Virgin Islands on October 6, 2004, and all the shareholders of State Harvest. On February 10, 2005, Chardan formed a wholly-owned subsidiary under the laws of the British Virgin Islands, under the name “Origin Agritech Limited” to effect the stock acquisition of State Harvest. Chardan merged into Origin to re-domesticate out of the United States, and immediately thereafter, Origin acquired all of the issued and outstanding stock of State Harvest.

On June 26, 2007, our common shares began trading on the Nasdaq Global Select Market, where they continue to trade. Prior to trading on that market, our common shares had been listed on the Nasdaq Global Market from November 8, 2005 to June 25, 2007.

Over the years, our strategic focus was on the corn seed distribution business and corn seed biotechnologies in China. In 2015, we announced our strategic transition from a traditional seed company to a biotechnology seed company. We have developed transgenic corn seed products including our first generation biotech product phytase traits, second generation biotech product glyphosate tolerance traits and our new technologies of stacked traits of Bt and glyphosate

tolerance genes. In 2016, we completed the laboratory and field production trials for our first generation pest/weed trait. We anticipate that, our first generation weed and pest/weed traits will be incorporated into our elite corn inbred lines and into the products of leading Chinese seed industry partners preparing for future regulatory approval and commercialization.

We announced our intention to expand our business globally in 2016. We received the first transgenic corn seed export permit from China's Government agencies, following required protocols. Our U.S. collaborator has secured an importation permit for these seeds from the United States Department of Agriculture ("USDA"). In late 2016 corn seeds containing our lead trait event and a back-up were successfully shipped from China to the US and planted in a USDA designated greenhouse. The new seeds produced in the greenhouse was tested in a collaborative trial in Iowa in the summer of 2017 and the results confirmed our field observations in China. Furthermore, corn seeds carrying our insect resistance and herbicide tolerance technologies developed in China will enter collaborative field experiments in 2018 to conduct testing required by the USDA, Environmental Protection Agency and the Food and Drug Administration.

To further shift our focus from seed production and distribution to seed biotechnologies, in September 2016, we entered into a Master Transaction Agreement, along with our controlled companies Beijing Origin Seed Limited ("Beijing Origin"), Denong Zhengcheng Seed Limited ("Denong"), Changchun Origin Seed Technology Development Limited, ("Changchun Origin"), Linze Origin Seed Limited ("Linze Origin"), with Beijing Shihui Agricultural Development Co. Ltd., a company incorporated under the Laws of the PRC ("Shihui"), to sell our commercial seed production and distribution assets and certain other assets in the PRC to Shihui (the "Sale"). In July 2017 we sold the seed production and distribution assets to Shihui at the first closing and in August 2017 we transferred the control of Zhenzhou Branch to Shihui and accordingly Zhengzhou's assets intended to sold at the second closing were considered sold. The sales of the balance of the headquarters building in Beijing are expected to be completed in 2018. We retain our biotech research facilities and business in China. The Sale is designed to further orient Origin to a seed development company, capitalizing on its biotechnology assets and skills and to allow us to focus on strategic partnerships both within China and in other countries.

For the first closing of the Sale, Shihui should pay us a total consideration of RMB221,000,000, consisting of cash payment of RMB79,000,000 and bank loans reduction of RMB142,000,000 for the 98.58% equity ownership interest in Denong, 100% equity ownership interest in Changchun Origin and 100% equity ownership interest in Linze Origin. Upon the completion of the second closing, Shihui is expected to pay RMB 190,000,000, payable in cash after offsetting the then outstanding payables to the Buyer up to RMB150,000,000, at which time the deposit of RMB 10,000,000 (which was received in September 2016) will be released, for the 100% ownership interest in Origin Beijing Branch, which is formed as part of the Company's reorganization to hold certain designated assets and the headquarters building located in Beijing, PRC.

The management believes that the net proceeds from the Sale will help fund the Company in developing and expanding its seed research and seed development capabilities. Focusing on the seed development of the out-put traits of Phytase, input traits of herbicide tolerance and insect resistance, and native traits of germplasm and genome editing, the Company believes that it will be able to globalize its business and take advantage of partnerships and licensing opportunities in markets in international markets. The Company will continue to address the China seed market with its current products, maintain its "green pass" qualification, and pursue GM seed development, which the Chinese government is increasingly finding acceptable as an important development in its need to satisfy food security for its population.

The future focus of Origin is to become the preferred provider of seed products and seed technologies by licensing its hybrid seed products, inbred seed breeding lines, and biotech traits. The Company also plans to provide contract research and development services to other seed companies using its research platforms.

Our principal executive offices are located at No. 21 Sheng Ming Yuan Road, Changping District, Beijing 102206, China, and our telephone number is (86-10) 5890-7588.

B. Business Overview.

Overview

Origin Agritech Limited, along with its subsidiaries, is focused on agricultural biotechnology, operating primarily in the PRC. The seed research and development specializes in crop seed breeding and genetic improvement. Origin believes that it has built a solid capacity for breeding technologies, including marker-assisted breeding and doubled haploids technologies, which it believes, along with its rich germplasm resources, will allow it to become a global seed technology company.

We built an agricultural biotechnology research center in 2005 and have been leading the development of biotechnology among crop seed companies in China since then. We have established plant genetic engineering technology platforms, including transforming herbicide tolerance, insect resistance, nitrogen utilization efficiency, and drought stress tolerance traits into corn inbred lines. Of note, we made significant strides in developing our exclusive herbicide tolerance, insect resistance and phytase products. In November 2009, our genetically modified phytase corn received the Bio-Safety Certificate from China's Ministry of Agriculture. This was the world's first genetically modified phytase corn and also the first genetically modified corn seed product in China. The certificate was renewed by the Ministry of Agriculture in January 2015. We also are pursuing the approval of other GM seed products in China, including glyphosate tolerant corn and insect resistant corn. We believe we have established a substantial seed product and germplasm pipeline.

Through the subsidiary Xinjiang Origin, the Company maintains its "Green Pass" status, providing the Company with the competitive advantage of introducing new hybrid varieties to the Chinese market under an expedited government approval process.

We seek to utilize China's emerging technology base for our future development. In particular, from time to time we enter and further develop cooperative agreements with publicly funded research institutes in China. In exchange for providing funding to these institutes, we receive rights, which are frequently exclusive rights, to market any seeds developed by these institutes. When a seed is ready to be marketed, we negotiate with the institute to establish an arrangement by which we are permitted to sell the newly developed seeds in exchange for the payment of certain fees to the institute. We believe that these cooperative agreements allow us to access new products without expending substantial costs for our own research and development.

In the first quarter of 2015, we submitted a patent application to the United States Patent and Trademark Office for our glyphosate-tolerance technologies which entered public stage in 2016. In addition, we have also applied for a patent in Brazil for similar biotechnologies. In 2016, we filed a patent application on insect resistant corn technology with Patent Cooperation Treaty (PCT), an international patent system assists applicants seeking patent protection of their inventions internationally. We also filed a patent on insect resistant corn technology in Argentina in 2016. We believe these patents will further strengthen our leading position in the genetically modified seed technologies in China and will allow us to expand our biotechnology position in the international seed market

In April 2016, we entered into a commercial licensing agreements with DuPont Pioneer, the advanced seed and genetic business of DuPont. Pursuant to the license, the Company and DuPont will jointly develop new seeds for Chinese farmers.

In 2017, our export of a corn germplasm from China to our collaboration partner, Arcadia, in California was successfully completed in compliance with all regulations and protocols. Seed was harvested in March and April

2017 in California and was sent to Iowa for the summer 2017 growing season. Further testing will be required in 2018. Global regulatory protocols and procedures are being followed in our activities as we prepare for future submissions in the USA and other key markets.

In September 2017, Origin entered into a commercial license and collaboration agreement with KWS SAAT SE (“KWS”). KWS is a global seed company, active in the business of maize, sugar beet and cereal seed production and marketing, as well as research and development in plant breeding. The agreement is the continuation of a collaborative effort dating back to 2011 when the two companies formed an arrangement under which Origin granted rights to certain of its transgenic traits in maize to KWS and performed services on behalf of KWS relating to those traits and accompanying technologies. This 2017 agreement provides for the prolongation and extension of the collaboration between the companies covering the rights of KWS to use the traits for commercial purposes, including marketing seeds with improved performance.

Under the 2017 agreement, both companies grant to each other a non-exclusive, transferable and sub-licensable to its affiliates only, license to use the Origin transgenic traits and the KWS germplasm and resulting project material for testing, research and development with the primary aim to introgress the Origin traits into KWS germplasm and test the generated project material for agronomic performance and efficacy. The parties will develop a project plan, which will cover a budget and project details, and include testing by Origin in China under project plan protocols. KWS will provide funding according to the project plan, which plan budget will not include funding for other operations of Origin. KWS will have rights to certain information about the testing by Origin. KWS will also have testing rights outside of China, at its own cost and fulfillment of regulatory requirements. Origin also grants to KWS an exclusive, non-transferable, sub-licensable commercial license to use the Origin transgenic traits for all purposes related to the production, distribution and commercialization of the transgenic material developed under the project plan and the defined KWS varieties in China. The license terms include milestone payments subject to fulfillment of pre-conditions, including regulatory permitting, and royalty fees on sales based on quantities of seed sold that have the licensed traits. It is anticipated that royalty revenue for germplasm would not commence until fiscal year 2019, after 2018 growing season testing, and trait revenue would not commence until 2019 at the earliest, after final biotech cultivation approvals by the Chinese government are obtained. Notwithstanding these predictions, there can be no assurance given that Origin will generate any significant revenues from the license arrangements or that they will commence as anticipated.

The Company has arrangements with a number of leading academic institutions in the PRC, including the Chinese Academy of Agricultural Sciences. Genes for three new trait leads for multiple insect resistances have been accessed from the leading discovery laboratory in China. These will provide Origin with candidates for next generation insect control seeds for a broad array of insect pests. This pipeline enrichment will be evaluated extensively in the coming summer months. Multiple modes of action against the most serious insect pests is critical to ensuring effective protection and insect resistance management.

Five product registrations were granted as of September 30, 2017 for Origin's elite corn hybrids utilizing the "green channel" system, which is a critical requirement towards an effective licensing business in China with our partners.

Research and Development

Developments in the science of genetics have allowed seed producers to create entirely new products. Compared with conventional varieties, the obvious advantages of these new products, known as GM products, are higher yield, better quality and increased insect-resistance and herbicide tolerance. Farmers plant GM varieties to save time and cost, while also reducing field labor. GM corn, soybean and cotton have been widely used in the United States and many other countries to guard against insect damage and to increase yield. Since receiving the Chinese government approval in 1997, cotton that has been genetically modified to guard against damage from borer insects and is now widely planted and accepted in China. The Chinese market has widely accepted GM cotton and the PRC Ministry of Agriculture has approved GM corn and rice traits in biosafety evaluations. The government also is encouraging of GM crops, generally, although it faces a low level of public acceptance. We believe that GM food crop seeds in time will

be approved by the PRC Ministry of Agriculture for production and sale and will be accepted in the Chinese market over time.

Utilizing our existing hybrid seed product line, the Company seeks to further increase crop yield and produce higher quality seeds with the addition of GM traits. We commenced our own biotechnology research program in early 2000's with a goal of having technology in place to produce GM products when demand for these products is sufficiently high. In 2005, we built an internal research and development center in China for GM crop seeds. Our key focus is biotechnology for GM varieties of corn. We currently employ people who are primarily engaged in genetic transformation, molecular biomarker testing and genetic mapping activities. Our development efforts go beyond our internal biotechnology center, as this unit serves as a central hub to connect with other research facilities in other parts of China. We are collaborating with the China Agricultural University, Zhejiang University and China Academy of Agriculture Science in the field of biotechnology. These cooperative arrangements help enhance our research capabilities and will help enable us to develop and commercialize our products. We have established several plant genetic engineering technology platforms, which incorporate increased herbicide tolerance, insect resistance, nitrogen efficiency, and drought stress tolerance traits into corn inbred lines. The GM traits and products we are working on now include increased herbicide tolerance, insect resistance, nitrogen efficiency, and drought stress tolerance in corn. We developed phytase GM corn, the first genetically modified corn seed product in China. Notwithstanding our obtaining the Bio-Safety Certificate from the Chinese government, there can be no assurance that GM products generally will be approved in China, and we expect that the introduction and acceptance of GM products will be cautious.

In addition to biotechnology, our internal research and development also invests considerable effort in the conventional breeding of hybrid. In August 2016, we hired a new Chief Technology Officer, Dr. Jihong Liang, to direct our global biotechnology and plant genetic research, and to coordinate and accelerate external collaborations with private, academic and governmental partners to further develop our technologies, traits and seed products. In order to maintain our position as a quality producer of advanced products and develop new seed products through our biotechnology programs, we plan to invest substantially in our research and development activities.

The Company has received government funding for research and development activities. Such funding was received in the fiscal years of 2015, 2016 and 2017 in the amounts of RMB7.08 million, RMB10.37 million and RMB4.04 million (US\$0.6 million) respectively.

Intellectual Property

Our intellectual property includes trademarks and patents relating to our seed products. Substantially all of the intellectual property has been registered for IP protection in China (or is the subject of a pending application). We believe that our intellectual property is crucial to our business, and bears directly on our ability to generate revenues.

We currently have nineteen Chinese patents registered with the State Intellectual Property Office (“SIPO”) of various countries. Among these nineteen patents, fourteen domestic patents in China, one in each of US, Brazil and Argentina, and two PCT patent are related to the biotechnology corn seed. Also, we have applied for one additional patents in the field of our biotechnology corn seed in 2017, and the applications have been accepted and are now being reviewed by SIPO.

In addition, we currently have thirty-one Chinese trademarks registered with the Trademark Office of China’s State Administration for Industry and Commerce (“SAIC”).

In addition to the domestic patents and patent applications, we have filed patent application outside of China. During the first quarter of fiscal year 2015, we submitted a patent application to the United States Patent and Trademark Office for our glyphosate-tolerance technologies which entered public stage in 2016. In addition, we have also applied for a patent in Brazil for similar biotechnologies. In 2016 we filed a patent application on insect resistant corn technology with Patent Cooperation Treaty (PCT), an international patent system assists applicants seeking patent protection of their inventions internationally. We also file a patent on insect resistant corn technology in Argentina in 2016. We file one new patent in china in 2017 relating to the method of detection of origin’s transgenic event that is insect resistant and herbicide tolerant. We believe these patents will strengthen further our leading position in the genetically modified seed technologies in China and will allow us to expand our biotechnology position in the

international seed market.

As of September 2017, we had twenty-six proprietary corn seed products.

Out-Bound Licensed Products

We have entered into licenses to co-develop seeds with other entities and sell our developed seed to third party distributions. We entered into two commercial licensing agreements with DuPont Pioneer, the advanced seed and genetic business of DuPont, in April 2016 and January 2017. Pursuant to the April license, we and DuPont will jointly develop new seeds for Chinese farmers, and pursuant to the January license, we may gain access to non-GM corn seed products and bring such products into Origin's North America non-GM/Organic business. This opportunity will be further exploited when the business condition becomes feasible and beneficial.

In September 2017, Origin entered into a commercial license and collaboration agreement with KWS SAAT SE (“KWS”). KWS is a global seed company, active in the business of maize, sugar beet and cereal seed production and marketing, as well as research and development in plant breeding. The agreement is the continuation of a collaborative effort dating back to 2011 when the two companies formed an arrangement under which Origin granted rights to certain of its transgenic traits in maize to KWS and performed services on behalf of KWS relating to those traits and accompanying technologies. This 2017 agreement provides for the prolongation and extension of the collaboration between the companies covering the rights of KWS to use the traits for commercial purposes, including marketing seeds with improved performance.

Under the 2017 agreement, both companies grant to each other a non-exclusive, transferable and sub-licensable to its affiliates only, license to use the Origin transgenic traits and the KWS germplasm and resulting project material for testing, research and development with the primary aim to introgress the Origin traits into KWS germplasm and test the generated project material for agronomic performance and efficacy. The parties will develop a project plan, which will cover a budget and project details, and include testing by Origin in China under project plan protocols. KWS will provide funding according to the project plan, which plan budget will not include funding for other operations of Origin. KWS will have rights to certain information about the testing by Origin. KWS will also have testing rights outside of China, at its own cost and fulfillment of regulatory requirements. Origin also grants to KWS an exclusive, non-transferable, sub-licensable commercial license to use the Origin transgenic traits for all purposes related to the production, distribution and commercialization of the transgenic material developed under the project plan and the defined KWS varieties in China. The license terms include milestone payments subject to fulfillment of pre-conditions, including regulatory permitting, and royalty fees on sales based on quantities of seed sold that have the licensed traits. It is anticipated that royalty revenue for germplasm would not commence until fiscal year 2019, after 2018 growing season testing, and trait revenue would not commence until 2019 at the earliest, after final biotech cultivation approvals by the Chinese government are obtained. Notwithstanding these predictions, there can be no assurance given that Origin will generate any significant revenues from the license arrangements or that they will commence as anticipated.

Licensed Seed Products

We signed research agreements with domestic seed companies to incorporate Origin biotech traits into their leading seed varieties in a similar relationship as we have developed with the multinational seed companies. The process is generally planned in two steps: first to introgress the traits into partners parental lines and conduct field tests to confirm efficacy; once the results are confirmed and meet the expectations, then we enter into the second step which involves negotiation of a commercial agreement to define rights and benefit sharing.

With regards to the licensed GM varieties, we have entered into a strategic cooperation agreement with the China Academy of Agriculture Science, or CAAS, to work on biotechnology research and development. That agreement gives us the right to produce and sell the GM crop varieties that are developed in connection with this arrangement, subject to our obligation to reimburse certain of CAAS’ expenses.

Competition

We face competition at three primary levels, including large Chinese companies, small local seed companies, and large multinational hybrid and GM seed producers. Currently, we believe that we can compete effectively with each of these competitors and that we can continue to do so in the future. We also face competition from counterfeiting of corn seeds, which has become an increasing problem in China.

While there are several Chinese seed companies that control approximately 25% of the corn seed market of China, we believe we possess a very competitive technology base, including the capability to develop and commercialize genetically modified seeds. However, there is little public information in this regard and, as a result, other companies' internal research pipelines remain unclear. Much of the genetically-modified product research remains at the academic level. The majority of the largest crop seed companies have been in existence for considerably longer periods of time than we have, and though they have sophisticated breeding techniques, are somewhat entrenched in their ways. Some of these larger entities are evolved state owned enterprises and some stayed as state-owned entities. We compete within this group on the basis of our consistent product quality, brand identity, customer and technical support, enforcement of our intellectual property rights and a pipeline of proprietary products.

The local seed companies in China are the legacy of the centrally planned agricultural economy that was predominant in China until recently. Most of these were affiliated with county governments, which played a role in determining what crops would be grown and by whom. As was often the case with planned economies, these extensions of the bureaucracy had no profit motive, and no incentive to improve efficiencies, increase sales or innovate with new products. Market expansion was limited by the tight geographic boundaries within which they were designed to operate.

The majority of these local companies lack the scale and the resources to compete with us in a number of ways. They lack access to the improved, proprietary hybrids. For the most part they do not have research and development programs for new seeds, effective marketing, advertising, technical support or customer service operations

We also face competition from the large multinational companies, including Pioneer (DuPont), Monsanto and Syngenta. These companies present a formidable competitive threat because of their financial resources, the high quality of their seed products, and biotechnological capabilities. These companies will present significant competition in the international market context. However, the unique aspects of the Chinese crop seed market, which distinguishes it from the markets in Western countries, have proven a hurdle for market success for these very large companies, even though they have come to the China market through joint ventures formed with existing Chinese seed companies.

These multinationals rely heavily on GM seed products in the non-PRC markets. GM seed products have only begun to be accepted in China and has been relatively limited, and the extent of future acceptance is not yet determinable. To date, phytase corn and Bt Rice are the only genetically modified major food crop seed products that have received safety certificates, and they have yet to obtain approval for commercial seed sales in China. The limited GM technology approval therefore currently limits their competitive advantage. Should GM seed products become approved by the government on a larger scale and begin to gain broader acceptance in the market, as we expect they will in the future, the large biotech companies will become more serious competitors.

PRC Government Regulation

We operate our business mainly in China under a legal regime that consists, at the national level, of the State Council, which is the highest authority of the executive branch of the PRC central government, and several ministries and agencies under its leadership, including:

Ministry of Agriculture and its local authorities;

- Ministry of Commerce and its local authorities;
- State Administration of Foreign Exchange and its local authorities;
- State Administration of Industry and Commerce and its local authorities;
- State Environmental Protection Administration; and
- State Administration of Taxation, and the Local Taxation Bureau.

The following sets forth a summary of the significant regulations or requirements that affect our business activities in China and our shareholders' right to receive dividends and other distributions from us.

PRC Seed Law and Other Relevant Regulations

Participation in the crop seed business is a highly regulated activity in the PRC. In July 2000, China enacted its Seed Law, which became effective on December 1, 2000 (the “Seed Law”). The Seed Law was amended in August 2004, September 2011 and November 2015. The latest revision to the Seed Law amendment became effective on January 1, 2016 (the “Revised Law”). The Seed Law sets forth provisions concerning the development, approval, production and distribution of crop seeds.

Seed Production and Operation License

The Revised Law combined the seed production license and distribution license regimes into one Seed Production and Operation License (“SP&O License”). An SP&O License can be obtained at either the provincial level or the national level. Depends on the variety of seeds the licensee is seeking to produce, the license application requires minimum facility size with respect to office space, laboratory space, breeding space, and storage space; minimum equipment and machinery specifications; minimum number of technical personnel on-site; and minimum number of registered seed breed being produced.

Seed Registration Process

In September 2012, the Ministry of Agriculture issued the first group of Breed-Produce-Distribute Vertically-Integrated Crop Seed Distribution Licenses (BPDVI License) based on new administrative measures. Beijing Origin was included as a licensee among the first 32 crop seed companies that received the BPDVI License.

Many types of seeds must undergo a stringent regulatory review before they may be sold in China. Prior to 2016, 28 types of seeds were subject to approval requirements before being sold in China. The Revised Law has reduced the seed types that need pre-sale approval from 28 to 5 major seeds that now are rice, corn, wheat, soybean and cotton seeds. The reduction is intended to incentivize seed research innovation and guarantee China's food security. Producers for seeds other than the abovementioned five major ones will only need to register their products with the regulators under the Revised Law.

Seed approval can be applied at the provincial level and/or the national level. Under the Revised Law, seeds that have been approved in one province can be distributed in other provinces that share a similar ecological region, as long as the approved seeds register with the relevant agricultural department in those provinces. An approval at the national

level means the approved seed can be distributed nationwide.

The approval process requires the applicant to submit the application to the provincial variety authorization committee and/or the national variety authorization committee. The seed must have undergone two growing seasons of monitored growth in at least five different locations in a province (depending on the type of seed, some seeds may require monitored growth in up to 20 different locations in the province). These tests are conducted and administered by the government designated institutes, the number of products one Company may submit for testing is usually limited to a small number due to testing capacity limitation. Seeds submitted for testing are planted together with control seeds that are typically the most popular seeds with farmers in the testing locations. Only seeds that have an increased yield of 8% or higher versus the control seeds and that rank among the top six seeds then being tested are cleared to proceed to the second year of testing, during which the results of the initial test season must be confirmed .

The most significant development in the hybrid corn seed approval process in China is the introduction of the Corn Seed Green Pass Test System. Origin is now one of a few major seed companies in China able to use the national level Corn Seed Green Pass Test System. Under this system, Origin can introduce to the market our new hybrid varieties with the field tests conducted by us at our own test sites following a protocol developed by the government. This is an important step to accelerate new product introduction to the market.

Seeds developed outside of China must also follow the above procedures before they can be distributed in China.

The ability to process an application for approval is an important element of success, especially in view of the long timeframe associated with obtaining approval after the seed has been developed. Failures and delays in getting the approvals on a timely basis can seriously disrupt the production company's seed production plan. A minimum of six years – three years to obtain approval and three years to develop the first crop of seed for commercial distribution – generally is required to bring a seed to the market after it has been developed. Because of our extensive network of seed-producing farmers, we have consistently been able to bring new products to the market within a short period of time. Other seed companies often take an additional season or more to bring an approved product to the market, which can be a significant disadvantage for other companies.

As of the September 30, 2017, we have twenty six registered breeds of seeds.

GMO Safety Regulations

The Chinese government published Regulations on Administration of Agricultural Genetically Modified Organisms Safety in December 2011 and the regulations were updated in October 2017 (the “GMO Regulations”). The GMO Regulations govern the research, experiment, production, processing, marketing, import and export of agricultural genetically modified organisms (“GMO”) in China. The GMO Regulations classified agricultural genetically modified organisms, or GMO, into Classes I, II, III and IV according to the extent of their risks to human beings, animals, plants, microorganisms and the ecological environment. The principal difference among the classes is the reporting obligation to the relevant agricultural administration. The testing of agricultural GMO will normally go through three stages, i.e. restricted field testing, enlarged field testing and productive testing. Depending on the classification of the GMO, the GMO research entity will differing levels of reporting obligation to the agricultural administrative department of the State Council (“Ministry of Agriculture”) prior to the commencement of the testing and when the GMO advances from one testing stage to the next testing stage. After the completion of productive testing, the GMO research entity may make an application to the Ministry of Agriculture Department for a safety certificate of the tested GMO. Our products are generally classified as Class I. As of September 30, 2017, the Company has received safety certificate for its phytase corn products. Two of our products are in the Biosafety certification application stage.

A production license from the Ministry of Agriculture is required for the production of GMO seeds (the “GMO License”). To obtain a GMO License, the business must obtain a safety certificate of agricultural GMO and passed variety examination, plant and breed in the designated areas, adopt appropriate safety administration and precautionary measures and comply with other conditions provided for by the Agricultural Department. We are in the process of applying for GMO Biosafety certificate as application were submitted in November 2017.

International Expansion of Our Biotechnology Business

Although we continue to consider expanding our biotechnology business internationally, expansion into markets where we have little experience and brand acknowledgement will be difficult and may be unsuccessful. There can be no assurance that we will achieve any level of international expansion or that it will generally start earning revenues. Currently our expansionary plans are limited and will be dependent on having sufficient capital to establish and sustain operations in other jurisdictions.

The GM corn seed varieties need to be improved and altered over time to maintain efficacy of the traits and quality of the seeds because of variable weather and soil conditions, farming practices and changing resistance of weeds and insects to herbicides and pesticides. It appears, however, that farmers, when faced with changing conditions for, or growing resistance to pests and weeds to the benefits of, one variety of GM seeds, tend to stay with GM products changing over to new varieties, rather than abandoning GM products. We believe that this character of the GM corn seeds and the farmer's behavior give us an opportunity to introduce our double stacked products into other markets. We also believe that the North American markets are more receptive to GM products, and the governments and farmers are more willing to promote and use GM seeds.

Entry into international markets will take substantial time and economic resources. For example, GM products in the United States are regulated under health, safety, and environmental legislation, mostly at the federal level under the Coordinated Framework for Regulation of Biotechnology. United States regulation focuses on the nature of the product rather than the process in which they are produced. Plant GM products are regulated by the United States Department of Agriculture's Animal and Plant Health Inspection Service under the Plant Protection Act. GM products in food, drugs and biological products are regulated by the Food and Drug Administration under the Federal Food, Drug and Cosmetic Act and the Public Health Service Act. GM products that have pesticide and microorganism qualities are regulated by the Environmental Protection Agency pursuant to the Federal Insecticide, Fungicide and Rodenticide Act and the Toxic Substances Control Act. The importation of GM plants are regulated under the Plant Protection Act, which can be used to prohibit or restrict the importation, entry, exploitation and movement in interstate commerce of any plant that may result in the introduction of plant pests and noxious weeds within the United States. GM plants are considered potential plant pests, and therefore are subject to a notification process, permitting process and determination of non-regulated status before entry into the United States market.

Additionally, some states in the United States separately are establishing regulation with respect to GM plants. These regulations take a number of forms, including banning the planting and cultivating of GM plants, labeling requirements and permitting requirements. We may have to meet these requirements depending on the anticipated markets for our products.

We are currently exploring various strategies in connection with the introduction of our products into the United States market and other markets. Our products have no market presence in any of these markets at this time. We will need to establish our brand reputation and introduce our products to farmers via marketing and distribution networks. We may need to enter into licensing arrangements and/or arrangements with local distributors, independent retailers and dealers, and agricultural cooperatives and agents to market our brand and our products in different regions. We also will have to establish production facilities to the extent that we need to produce seeds to meet demand. We believe our products are highly valuable in the United States GM corn seed market and will attract the local distributors' interests.

The international markets are highly competitive. In the United States, for example, it is estimated that Monsanto Company and E.I. DuPont de Nemours Inc. (Pioneer) dominate the corn seed market in the United States, with about 70% of the market. It is estimated that independent seed producers only have about 11% of the market. We believe that we will have to compete based on many different aspects of a market, including seed traits, overall seed quality, customer acceptance and service, and value added technology. Additionally, our ability to compete will be impacted by shifts in acreage planted with corn, commodity price changes, and weather conditions and planting practices. Our competitive position will also be affected by government farm subsidies and government programs that favor certain crops and seeds such as those that encourage and subsidize GM seeds to be used in marginal lands and draught prone areas.

Foreign Ownership Restrictions of Chinese Companies

Currently, China restricts foreign ownership of businesses in the seed industry. A foreign invested enterprises, or FIE that is engaged in the production, marketing, distribution and sale of food crop seeds is limited to 49% foreign ownership pursuant to the Regulation on the Approval and Registration of Foreign Investment Enterprises in Agricultural Seed Industry (effective on September 8, 1997) and the Foreign Investment Industrial Guidance Catalogue (effective on December 1, 2007).

In addition to restrictions in the conventional seed business, China forbids FIEs from engaging in the development, production and distribution of genetically modified corn seeds pursuant to the Foreign Investment Industrial Guidance Catalogue distributed by the Ministry of Commerce of China in 2007. Furthermore, FIEs need to obtain government approvals to engage in the breeding of GM research and testing pursuant to the Agricultural Genetically Modified Organisms Safety Regulation.

Based on the foregoing, we conduct our seed development activities under Beijing Origin, which is a domestic company and not a FIE.

Tax

Origin and State Harvest are both tax-exempted companies organized in the British Virgin Islands.

Our PRC Operating Companies are organized in the PRC and governed by PRC laws. PRC enterprise income tax, or EIT, is calculated based on taxable income determined under PRC accounting principles. Under the New EIT law, effective January 1, 2008, FIEs and domestic companies are now subject to a uniform EIT rate of 25% and the tax exemption, reduction and preferential treatments which were applicable only to FIEs were ended. However, any enterprises established before the promulgation of the New EIT law in 2008 that were entitled to preferential tax treatments for a fixed period continued to be entitled to such preferential tax treatment until the expiration of those periods.

The applicable tax rate under new EIT law to Beijing Origin is 15% since January 1, 2008, because Beijing Origin has been approved as new technology enterprises and enjoys the reduced New EIT rate of 15%. Our other operating companies are subject to the New EIT at a uniform rate of 25%. The preferential treatment of high and new technology enterprise or HNTE, is subject to a reapplication every three-year period. The financial position of the Company after the sale of our corn related production and distribution assets may cause the termination of the HNTE qualification or restrict reapplication for that status, in which event there would be an adverse impact on our tax obligations and tax rate.

Pursuant to the Provisional Regulation of China on Value Added Tax, or VAT, and their implementing rules, all entities and individuals that are engaged in the sale of goods, the provision of repairs and replacement services and the importation of goods in China are generally required to pay VAT at a rate of 17% of the gross sales proceeds received, less any deductible VAT already paid or borne by the taxpayer. Pursuant to the Notice of the Ministry of Finance and the State Taxation Administration on Exempting the Value Added Tax for Agricultural Material, self-produced agricultural products sold by agricultural producers shall be exempt from VAT. Pursuant to an approval document received from Beijing Haidian District State Tax Bureau, Beijing Origin has been entitled to exemption from VAT since August 1, 2001.

Dividend Distribution

Under PRC law, FIEs in China, including Origin Agritech may pay dividends only out of their accumulated profits, if any, determined in accordance with PRC accounting principles. In addition, FIEs in China are required to set aside at least 10% of their after-tax profit based on PRC accounting standards each year for their general reserves until the accumulative amount of such reserves reaches 50% of registered capital. These reserves are not distributable as cash dividends. The Board of Directors of a FIE has the discretion to allocate a portion of its after-tax profits to staff welfare and bonus funds, and expansion (development) funds which may not be distributed to equity owners except in the event of liquidation. The amount set aside as of September 30, 2016 and 2017 were RMB24,789 and RMB20,848, respectively. We are currently in compliance with all applicable PRC laws and regulations relating to our business.

Discontinued Operations

In September 2017, we sold our seed production and distribution business to Beijing Shihui Agricultural Development Co. Ltd. pursuant to a Master Transaction Agreement. The first stage of the sale was completed on July 31, 2017 pursuant to which we sold our production, processing and distribution services, production and processing centers and marketing centers to Shihui. For additional information, please refer to Note 4 - Discontinued Operations in our consolidated financial statements.

C. Organizational structure.

Origin Agritech is a holding company with no operations of its own. We conduct our operations in China primarily through our PRC Operating Companies. The following diagram illustrates our current organizational structure as of September 30, 2017, taking into account the Sale transaction that was completed in September 2017, but not any reorganization and asset sales transactions after September 30, 2017.

We do not have any ownership interest in Beijing Origin, Henan Origin, and Xinjiang Origin, rather, through State (1)Harvest, we have entered into a series of stock consignment agreements with their respective shareholders which provides us control of Beijing Origin and its subsidiaries.

The table below lists each of our group companies, their place of incorporation and their percentage of ownership interest as of October 1, 2017, after the sale to Shihui:

Name	Place of incorporation (or establishment)/operation	Percentage of ownership
State Harvest	British Virgin Islands	100% owned by Origin
Origin USA	Des Moines, Iowa, USA	100% owned by Origin (operations suspended)
Origin Biotechnology	Haidian District, Beijing, PRC	100% owned by State Harvest
Beijing Origin	Haidian District, Beijing, PRC	97.96% controlled by State Harvest
Henan Origin	Zhengzhou, Henan Province, PRC	92.04% owned by Beijing Origin
Xinjiang Origin	Jinbo City, Xinjiang Province, PRC	51% owned by Beijing Origin

Stock Consignment Agreements

Under Chinese law, foreign ownership of businesses engaged in the breeding of new varieties, development, production, marketing, distribution and sale of hybrid food crop seeds is limited to 49% pursuant to the Regulation on the Approval and Registration of Foreign Investment Enterprises in Agricultural Seed Industry and The Foreign Investment Industrial Guidance Catalogue. State Harvest, as a non-Chinese corporation, may not directly own more than 49% of any of the PRC Operating Companies. However, Chinese law does not forbid the owner of stock to consign rights associated with the stock, as long as the owner does not transfer title to the stock. Moreover, if we engage in the research and development of genetically modified seed products, then foreign entities are not currently permitted to own any of the seed production company.

To gain control over the PRC Operating Companies (other than Origin Biotechnology, which is not subject to the 49% ownership restriction and which State Harvest entirely owns), State Harvest entered into a series of stock consignment agreements with shareholders of those companies or, the parent of those entities. These agreements consign all of the rights of ownership of the shares involved other than legal title, effectively transferring the control of the shares subject to the agreements. Those rights include the right to manage in all respects the shares held in title by the shareholders that are parties to them, including all shareholder rights to call meetings of shareholders, to submit shareholder proposals, to elect directors, to vote the shares on all matters and to exercise all other rights of a shareholder in respect of the shares consigned. More specifically, the consignment agreements include giving the right to select, replace and increase the number of the directors and supervisors, recommend new directors and supervisory personnel and to exercise management rights, controlling rights and decision-making power over the shares of the subject company. Additionally, the shares of the PRC operating companies are pledged.

Each title holder of these shares has agreed not to interfere with the consignee's exercise of its rights and to cooperate fully and promptly to permit them to exercise its authority over the consigned shares. This includes all limitations on the ability of the consignee to transfer or dispose of the shares to someone other than to the consignee, give guarantees using the shares, consign the shares to another, alter the ownership proportion in any way, dispose of any rights in the ownership of the shares, and agree to any debt or restructuring of the shares. The consignee has the right to take all action in respect of the consigned shares to avoid any damage or infringement of its rights, including in the event of the consigning shareholder's bankruptcy. The consignee, under the agreements, has virtually all of the property rights of the consigned shares, including the profits, interests, dividends, bonuses and residual assets, except for legal title. If in the future any stock subject to the consignment agreements can be legally transferred, then, without further action by the consignee, it shall be transferred to the consignee in whole or in part for no additional consideration to the consigning shareholder.

The stock consignment agreements also provide that if and when the restriction on foreign ownership of food production companies to 49% is removed or the allowed ownership percentage is increased, the consigned shares will then be transferred to the consignee. If not, the consignment agreements continue in full force and govern the consignee's rights over the shares.

The agreements are subject to force majeure limitations. The term of the agreements is initially three years, but they are automatically renewed indefinitely until both the consignee and the consignor agree to terminate. There is no unilateral right of termination except in the event of a breach, in which event the non-breaching party may cancel the consignment agreement after notice and a reasonable cure period has passed and the breach continues. The consigning shareholders have warranted their authority to enter into the agreements and that the consignee has the exclusive right to control the shares that are subject to the consignment agreements. The agreements are binding on the successors, assignors and heirs of the respective consigning shareholders.

The importance of the stock consignment agreements is that, under U.S. GAAP, the consignee corporation may consolidate the financial reporting of those PRC Operating Companies whose shares are subject to stock consignment agreements in the manner of wholly and majority owned subsidiaries and enjoy the economic benefits of such subsidiaries. Each stock consignment agreement is subject to enforceability and other limitations of the laws and rules of PRC. The consignee may not transfer the consignment agreement, except as permitted by PRC law. However, we may transfer our interest in the intermediate consignee corporation without limitation. If there is non-performance by the shareholder or some or all of an agreement is unenforceable, we and the consignee may lose the benefits of the agreements and suffer severe economic loss as a result. No assurance can be given that the consignee will be able to enforce its rights vis-à-vis the consigning shareholders in the courts of the PRC, and we are not aware of any cases where these types of stock consignment agreements have been interpreted by PRC courts.

We believe that these agreements are enforceable under current PRC law. However, none of these kinds of agreements have yet been subject to judicial review or interpretation. The consignment agreements provide that if there is any interpretation of the terms by a PRC court, the agreements should be construed in such a way as to give the consignee as much of the full and actual ownership and full beneficial rights and benefits of the consigned stock as is possible, so as to approximate full ownership under all applicable law.

In the event that the consignment agreement is not enforced or is terminated because of a breach by the consignee that is not cured, the right to the underlying stock would be lost and the economic rights would be terminated. However, such a termination would not terminate the separate agreements entered into by Beijing Origin and Henan Origin to transfer technology from those companies to Origin Biotechnology, so even in the event of a termination of a consignment agreement, the consignee would continue to own the applicable PRC entity's technology and intellectual property through Origin Biotechnology, its wholly owned subsidiary (see "Technical Service Agreements" below). Also, the termination of one shareholder's consignment agreement does not cause the termination of any of the other consignment agreements, so it would only result in a reduction in consigned shares under the consignee's control.

The following is a table of the parties to the consignment agreements of the Company:

PRC Operating Company	Consigning Owner	% of Shares	
		Consigned	
Beijing Origin	Gengchen Han	34.40	%
	Yasheng Yang	28.68	%
	Liang Yuan	25.80	%
	Yuping Zhao	3.99	%
	Weidong Zhang	3.13	%
	Weicheng Chen	1.96	%
		97.96	%
Henan Origin	Beijing Origin	92.04	%
	Yingli Zhang	4.08	%
	Yasheng Yang	3.88	%
		100.00	%

Technical Service Agreements

All of the intellectual property rights of the Company are held by Origin Biotechnology pursuant to technical service agreements dated December 25, 2004. The purpose of this arrangement was to permit better management and licensing of the intellectual property that the three assignors developed. Under the technical service agreements, Origin Biotechnology will provide technical research and production and distribution services to the other PRC

operating companies. These services include support in the research and development of agricultural seeds, analysis of breeding technologies, environment and feasibility suggestions, technical tutorials and breeding field supervision, market analysis and seed promotion, insect prevention and technical education to distributors and farmers. The fees payable under the agreements are variable, depending on differing formulae for different categories of seeds, and are to be charged on the sales of certain seed products in each fiscal year. These agreements are considered intra-company transactions.

Master Transaction Agreement

In September 2016, Origin entered into a Master Transaction Agreement to sell its seed production and distribution business to Beijing Shihui Agricultural Development Co. Ltd. (“Shihui”). The first closing of the sales and a portion of the second closing were completed as of September 30, 2017. The remaining of the second closing is expected to be sold in 2018. By separate agreement, after the second closing, it is the intention of the parties that Shihui will enter into license arrangements to pay Beijing Origin a royalty for the present and future seed portfolio and a technology access fee for the research and development effort that Beijing Origin will provide going forward in the areas of product discovery and development, hybrid registration, trait integration and intellectual property protection.

For the first closing of the Sale, Shihui should pay us a total consideration of RMB221,000,000, consisting of cash payment of RMB79,000,000 and bank loans reduction of RMB142,000,000 for the 98.58% equity ownership interest in Denong, 100% equity ownership interest in Changchun Origin and 100% equity ownership interest in Linze Origin. Upon the completion of the second closing, Shihui is expected to pay RMB 190,000,000, payable in cash after offsetting the then outstanding payables to the Buyer up to RMB150,000,000, at which time the deposit of RMB 10,000,000 (which was received in September 2016) will be released, for the 100% ownership interest in Origin Beijing Branch, which is formed as part of the Company's reorganization to hold certain designated assets and the headquarters building located in Beijing, PRC.

Shihui and Beijing Origin is going to negotiate separate license agreements regarding Shihui's continued use of the trademarks and trade names owned by Beijing Origin and licensing designated seeds developed by Beijing Origin or Beijing Biotechnology.

Beijing Origin has agreed that for ten years after the closing, without the written consent of Shihui, it and its affiliated entities will not directly conduct any business in the distribution of crop seeds in the PRC, except for the distribution of crop seeds in Xinjiang province by Xinjiang Origin. This limitation will not prohibit Origin, Beijing Origin or Beijing Biotechnology from conducting the businesses of crop seed licensing, transgenic materials licensing, transgenic traits licensing or other activities related to its intellectual property in the PRC. This non-competition provision will terminate if more than 50% of the equity interest or assets of Origin Agritech are acquired by an independent third party during the restrictive period.

D. Property, plant and equipment.

Our principal executive offices are located in the Changping District in Beijing where we own approximately 10,320 square meters of office space, and the right to use approximately 19,250 square meters of land. The land uses right, and the property, plant, and equipment of our headquarters in Beijing currently secures a four-year finance lease of RMB78 million. The lease program is with Beijing Agriculture investment. The office building in Beijing is expected to be sold to Shihui at the second closing of the Sale.

We own or lease manufacturing facilities, laboratories, seed production and other agricultural facilities, office space, warehouses, research stations and breeding centers in various locations in China. The leased facilities are rented at regular commercial rates, and management believes other facilities are available at competitive rates should it be required to change locations or add facilities.

From 2015 to date, our capital expenditures consisted primarily of construction and purchase of plant and equipment, which are located in the PRC and financed mainly by bank borrowing. The table below sets forth the amount of our

capital expenditures for the periods shown:

For the year ended September 30, 2015 RMB	For the year ended September 30, 2016 RMB	For the year ended September 30, 2017 RMB	For the year ended September 30, 2017 USD
20.36 million	16.96 million	-	-

We believe that our existing facilities are adequate to conduct our current and foreseeable future business operations.

ITEM 4A. UNRESOLVED STAFF COMMENTS

Not Applicable

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following discussion of our financial results of operations and condition is based upon and should be read in conjunction with our consolidated financial statements and their related notes included in this Annual Report on Form 20-F. This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including, without limitation, statements regarding our expectations, beliefs, intentions or future strategies that are signified by the words “expect,” “anticipate,” “intend,” “believe,” or similar language. All forward-looking statements included in this Annual Report are based on information available to us on the date hereof, and we assume no obligation to update any such forward-looking statements. Actual results could differ materially from those projected in these forward-looking statements. In evaluating our business, you should carefully consider the information provided under the caption “Risk Factors” in this Annual Report on Form 20-F. We caution you that our businesses and financial performance are subject to substantial risks and uncertainties.

A. Operating Activities and Results.

Corporate Strategies Origin started as a hybrid corn seed company in 1997 as the first private seed company in China. With the success in and strong cash flow from the hybrid corn seed business, Origin started its seed biotechnology research in early 2000's and established Origin Life Science Center in 2005. The Company has since focused on the seed biotech product development and funded the biotech research and development with its free cash flow from the traditional hybrid seed business.

After more than 10 years of seed biotech development, the Company is now re-orienting itself as a biotech company, primarily focused on its GMO (Genetically Modified Organism) technologies and product pipelines that are waiting to be commercialized. In 2017, it took action to sell the majority of its seed production and distribution assets. The Company plans on selling additional production and distribution assets in fiscal 2018. As a result of the sale of assets, the Company will continue to serve the China market and will seek opportunities in international markets with its GMO product pipelines represented by its first generation trait phytase transgenic corn, first generation weed (herbicide tolerance) management corn seed, and its first generation weed/pest stacked traits of herbicide tolerance and insect resistance. The Company also has built a capacity for breeding technologies, including marker-assisted breeding and doubled haploids technologies.

Biotechnology Progress

While we continue to advance our GMO product pipelines with phytase traits and glyphosate tolerance technologies, the most significant progress made in the last several years is in the new biotech pipelines of stack traits of insect resistance and herbicide tolerance. 2017 marks the sixth year that our double stacked products of Bt and glyphosate

tolerance genes were tested in the field against the technologies currently used in the global market. Additionally, we have started to build triple stacked traits of Bt and herbicide tolerance genes.

In 2016, Origin completed the laboratory and field production trials for its first generation PEST/WEED trait. In these trials, molecular characteristics, field efficacy, environmental safety and food safety were thoroughly evaluated and the results met critical biosafety regulation standards. Dossiers summarizing the laboratory and field-test studies internal to Origin and in collaboration with third party research labs were submitted in November 2016 to request Phase 5 Safety Certificate approval. In 2017 we conducted more tests following the feedback from the National Committee of Biosafety. Optimized and complete regulatory dossiers were re-submitted in November 2017 to request Safety Certificate approval. Origin's first generation WEED and PEST/WEED traits have been incorporated into the elite corn inbred lines of Origin and into the products of leading Chinese seed industry partners preparing for future regulatory approval and commercialization.

Biotechnology Corn Seed Product Pipelines and Regulatory Approval in China

For the double stacked Bt and GT genes, our repeated field testing in both our northern testing site (for summer testing) and southern testing site (for winter testing and with heavy natural insect pressure) has shown very positive and stable insect resistance results. We believe the Bt gene (Cry1Ah) used in our double stacked traits could be highly valuable in the North American corn seed market, a major reason we plan to enter the U.S. corn seeds and traits market.

Origin's first generation biotechnology trait for insect resistance and herbicide tolerance (PEST/WEED) has been successfully exported from China to the U.S. with permits from the Chinese and U.S. governments. This initiates the global regulatory approval process and represents the first export of such technology by a Chinese company to a strategic partner based in the U.S. Origin has successfully requested and received the first transgenic corn seed export permit from China's Government agencies, following required protocols. Specifically, our U.S. collaborator has secured an importation permit for these seeds from the United States Department of Agriculture ("USDA"). In late 2016 corn seeds containing our lead trait event and a back-up were successfully shipped from China to the US and planted in a USDA designated greenhouse.

Corn seeds carrying Origin's insect resistance and herbicide tolerance technologies developed in China entered collaborative field experiments in the summer of 2017 to confirm efficacy of the traits.

Based on our successful development in biotech seed products, we have continued to take steps to secure our biotechnologies intellectual property protections. We believe these patents will strengthen our position in the genetically modified seed technologies and will allow us to maintain our leading position in China and enter the global biotech traits market.

Overall Analysis

On September 26, 2016, we entered into an Master Transaction Agreement with Beijing Shihui, a related party being controlled by close family members of our Chairman, formerly known as Beijing Shihui Agricultural Ltd., under which the Buyer agreed to purchase the corn seed production and distribution assets, the office building in Beijing, PRC, and generally the business of commercial corn seed production and sales operated by us.

The assets and liabilities of the entities that were sold and to be sold have been reclassified as “assets of discontinued operations” and “liabilities of discontinued operations” within current and non-current assets and liabilities, respectively, on the consolidated balance sheets as of September 30, 2016 and 2017. The results of operations of the entities or assets that were sold and to be sold have been reclassified to “net income (loss) from discontinued operations” in the consolidated statements of income and comprehensive income for the years ended September 30, 2015, 2016 and 2017. We will mainly discuss the continuing business in the following paragraphs.

For the fiscal year ended September 30, 2017, no revenue was recorded from continuing operation, however for the fiscal year ended September 30, 2016, we recorded revenue of RMB0.5 million primarily due to fees for services from the Company's collaborators.

Operating expenses from continuing operation for the fiscal year ended September 30, 2017 were RMB68.6million (US\$10.3 million), representing an increase of 5.8% from RMB64.8 million in the fiscal year 2016. General and administrative expenses for the fiscal year ended September 30, 2017 were RMB34.9million (US\$5.3 million), an increase of 9.8% from RMB31.8 million year-over-year mainly due to the increasing expense in US subsidiary.

Net loss from continuing operation for the fiscal year ended September 30, 2017 was RMB76.1 million (US\$11.5 million), remained stable to compared with operating loss of RMB71.9 million in fiscal year 2016.

Net loss from discontinued operations for the fiscal year ended September 30, 2017 was RMB30.1 million (US\$4.5 million), compared to net loss of RMB5.0 million in fiscal year 2016.

Net loss attributable to Origin for the fiscal year ended September 30, 2017 was RMB75.7million (US\$11.4 million) compared to the net loss of RMB65.6 million for the fiscal year ended September 30, 2016.

Net loss per share was RMB(3.24) or US\$(0.49) for the fiscal year 2017, compared with net loss per share of RMB(2.87) in fiscal year 2016.

As of September 30, 2017, and 2016, we had approximately RMB3.2 million (US\$0.5 million) and RMB3.6 million, respectively, in cash and cash equivalents of continuing operations. Total borrowings of continuing operations as of September 30, 2017 and 2016 were RMB107.3 million (US\$16.2 million) and RMB152.1 million, respectively. During fiscal year 2017, net cash used in operating activities was RMB120.2 million (US\$18.1 million) compared with net cash provided by RMB47.9 million for the fiscal year ended September 30, 2016. Net cash provided by investing activities was RMB29.5 million (US\$4.5 million) for the fiscal year ended September 30, 2017 compared with net cash used in investing activities of RMB6.5 million for the fiscal year ended September 30, 2016. Net cash provided by financing activities was RMB47.0 million (US\$7.1 million) for the fiscal year ended September 30, 2017 compared with net cash used in financing activities of RMB48.8 million for the fiscal year ended September 30, 2016.

Research and Development Activities

Origin was built on its research and development platform and we believe a commitment to research and development is essential to the growth of the Company, particularly as we orientate our operations to biotechnology. During fiscal year 2017, we continue to make significant progress both in our conventional hybrid crop seed development programs and biotechnology research and development activities.

Key developments for Origin's GM corn seeds:

Phytase: Four commercial hybrids with phytase traits have completed a number of variety production tests. These varieties with phytase traits have been submitted to the Chinese government (the Ministry of Agriculture) to obtain variety safety certificates. We are waiting for the final approval from the Chinese government.

Glyphosate Tolerance: One GM glyphosate tolerance event (the unique DNA recombination event that took place in one plant cell) completed a third year Phase 4 – Production Test and the summary of test results has been submitted to the MOA for the Phase 5 – Safety Certificate.

Glyphosate(G2) Tolerance insect resistance (Bt): The double stacked traits of insect resistance and glyphosate tolerance genes have completed the second year Production Test (Phase 4). The lab and field tests conducted internally and in collaborations with 3rd party research institutes and universities that are certified by MOA showed consistently positive performance same as that we have observed in the tests of previous years. The molecular characteristics, field efficacy of insect resistance and herbicide tolerance traits, agronomic performance, environmental safety, food safety of the transgenic event were thoroughly evaluated. These results meet the standards of the government GM regulations. The summary of these results has been submitted to MOA for safety certificate (phase 5).

Triple Stacked Traits: Stacked triple and quadruple traits of insect resistance and herbicide tolerance genes with different resistance mechanisms have been under intermediate testing. These traits are expected to increase herbicide tolerance and expand the insecticidal spectrum and durability. More than 3,000 events of the stacked traits were screened in a greenhouse environment of Phase 1-Laboratory Research. More events will be generated to meet the high standard of efficacies.

Backcrossing Programs: Multiyear programs of backcrossing of our biotech products, including phytase, glyphosate tolerance, and stacked traits of Bt and G2 genes, into corn varieties from our own product lines as well as several product lines of multinational companies are progressing well. Successful backcrossing products into our own varieties are and will be submitted for government approvals in due course.

Hybrid Corn Seed Development Program:

The most significant development in the hybrid corn seed approval process in China is the introduction of the Corn Seed Green Pass Test System. Origin is now one of a few major seed companies in China able to use the national level Corn Seed Green Pass Test System. Under this system, Origin can introduce to the market our new hybrid varieties with the field tests conducted by us at our own test sites following a protocol developed by the government. This is an important step to accelerate new product introduction to the market.

Previously in China, new hybrid seed varieties needed to go through an official approval process prior to sales. This approval process typically involves three to four years of registered trials and normally proceeds according to the following sequential steps:

Pre-Registration “ Registration Trial 1 “ Registration Trial 2 “ Field Demo “ Approval

Each step leading up to approval takes approximately one year unless it needs to be repeated. In some localities the Registered Trial 2 and Field Demo steps are treated as one and the same step.

In the standard official approval process, the government test sites are limited by the size of test fields. So seed companies are limited in the amount of varieties submitted for testing. Under the new Corn Seed Green Pass Test System, Origin can conduct testing of much larger pools of varieties even in the early stage, which allows us to better screen the varieties from our breeding programs and introduce the best varieties earlier.

During fiscal year 2017, the third year under the new Green Pass Test System, we had more than eighteen tests going through different stages of the testing stages. As the results of multiyear testing, we received five registration approval for three of our new varieties. During the fiscal years 2014 to 2017, we received a total of twenty two approvals for our corn seed hybrid products.

Hybrid Corn Seed Registration and Approval table

Year	Pre-Registration Trial	Registration Trial 1	Registration Trial 2	Field Demo	Registration Trial 2 + Field Demo	Approved
2011	72	16	5	5	4	0
2012	33	18	5	5	3	3
2013	44	12	3	6	2	7
2014	18	6	3	5	3	8
2015	13	27	4	3	N/A	7
2016	9	13	6	5	3	2
2017	1	28	6	4	6	5

Note: One variety may be tested for more than one ecological zone, therefore one variety may receive more than one approval, e.g. in 2017, we received five approvals for three varieties.

Research and Development Outlook

With the continued growth of the Chinese economy, demand for higher levels of food production and agricultural products have increased substantially, and we expect that this demand will continue. This demand is being driven by several factors: by consumer desire for high-quality food products, increasing usage of agricultural products as bio-fuels, and dwindling arable land. The Chinese central government has taken a series of measures to deal with these issues. One of the approaches has been the approval of GM plant varieties. Compared with conventional varieties, the advantages of GM varieties include higher yield, higher quality and increased disease and weed resistance. Farmers plant GM varieties to save time and cost, while reducing the amount of field work. GM corn, soybean, and cotton have been widely used in the United States and in many other developed countries to guard against insect damage and to increase crop yields. A 10% to 15% increase in crop yields with the successful application of biotechnology has been routinely reported by Monsanto and Syngenta. According to the International services for the Acquisition of Agri - biotech Applications, the planted area for GM crops increased from 160,000 hectares in 1996 to about 185.1 million hectares in 2016 world wide. Since receiving approval from the Chinese government, cotton has been genetically modified to guard against damage from insects, such as the borer, and these varieties are now widely planted throughout China. GM cotton is widely accepted in the Chinese market. The Chinese authorities have taken preliminary steps in approving GM crop seed research and commercialization to meet the increasing demand for agricultural food products, as evidenced by the approval of our phytase corn and BT rice seed. We expect the Chinese authorities to continue in this direction, albeit with caution.

In the past several years, our focus on biotechnology research has continued to accelerate significantly. We initially were approved for the first GM corn seed crop in China. Our glyphosate-tolerant gene has been approved to advance to the next phase of development. We seek to become the leader in biotechnology and GM product commercialization in China. We expect that GM crop seeds will eventually gain wide acceptance in China and for this reason we have pursued biotechnology seed development and invested in genetic modification programs that focus on improving yields, product quality, and insect resistance and disease tolerance for corn seeds and other selected crop seeds. The development of biotechnology attributes remains a cornerstone of our business strategy. As a result, a significant proportion of our management resources are dedicated to building these capabilities across the Company for the introduction into the PRC domestic crop seed market.

During the past few years, we have established several plant genetic engineering technology platforms. These include introducing traits such as herbicide tolerance, insect resistance, nitrogen efficiency, and drought stress tolerance into inbred corn lines. We seek to efficiently utilize modern biotechnology in China and aim to expand beyond China.

Currently, we possess exclusive rights to five genetic traits in various stages of testing and development. We have continued to build our technology platform based upon cooperative relationships with top universities and research institutes in China. These cooperative arrangements allow us to limit our own risk exposure and fixed cost structure and maximize our flexibility in developing applicable technology.

Under government regulations, a registrant company must follow the following procedures prior to registration and marketing GM crops in China. Each step (except laboratory research) has an associated reporting and approval process established by the Ministry of Agriculture, the clearance of which is necessary in order to proceed:

1. Laboratory Research: defined by genetic manipulations and research work conducted under a control system within laboratory;
2. Intermediate Testing Phase: a small-scale test conducted under a regulated control system;
3. Environmental Release Test: a medium-scale test conducted under natural condition by taking relatively secure measures;
4. Production Test: a relatively large-scale test before production and application; and
5. Obtaining the safety certificate on genetically modified organisms

Since we are considered a domestic Chinese company, we can proceed through all five phases of the GM approval in China, while international entities are restricted to only phase one, and currently forbidden to proceed to phases two through five. We have already had several of our products submitted to testing in phases two through four, and one product has completed the five-step process. We are the first company to obtain safety certificate for GM corn seeds in China.

If GM seed products are approved by the government on a broader scale and begin to gain widespread acceptance in the market, which we expect will occur in the future, large international biotech companies could likely become more serious competitors. However, they may continue to face numerous obstacles in competing with us in China. Foreign companies are currently prohibited from developing or producing genetically modified plant seeds, breeding livestock and poultry, or producing aquatic seed according to *Catalog Guiding Foreign Investment Industries* (distributed by Ministry of Commerce of China). As a result, we believe we will continue to be in a strong competitive position in the genetically modified segment of the seed market when it becomes meaningful and legally permissible to do so.

As part of our internal efforts, we developed genetic markers to enhance the selection of disease resistance corn lines to accelerate the breeding process. In addition, we continued to utilize our previously implemented data mining infrastructure to search for stable and high-yielding hybrids. Our business model draws from existing and new technologies using both conventional breeding and advancement in biotechnology. We aim to build upon our current hybrid base where we have accumulated parental seeds with advantageous traits optimized to local soil conditions.

Our accomplishments with hybrid crop seeds provide a foundation to launch into a range of GM products. Our agronomists and technical support provide the platform for us to educate farmers on the benefits of GM products. Our accumulated germplasm from conventional breeding techniques forms a basis to transform our genetic traits. Our high-end processing, production, and quality control will continue to ensure high-quality seed production. Our nationwide footprint and comprehensive data mining infrastructure allow for the matching of products with their most appropriate locations throughout China.

Key factors affecting our growth, operating results and financial condition

We expect our future growth, operating results and financial condition to be driven and affected by a number of factors and trends including but not limited to:

- our ability to strategically manage our growth and expansion, organically or through mergers and acquisitions. If we do not manage our growth effectively, our growth may slow down and we may not be able to achieve or maintain profitability;

- our ability to fit acquisitions and our corporate reorganization into our growth strategies to generate sufficient value to justify their cost;

- our ability to develop new products through research and development;

our ability to expand internationally and develop our business in different regulatory, distribution and competitive markets;

our ability to evaluate our business lines and take action to discontinue aspects of our business as well as to take cost savings measures for the future growth of the company;

- our ability to partner or joint venture for the creation of more advanced bio-technology products;

market fluctuations in the demand for and supply of crop seeds in China and our ability to anticipate market demand and adjust our volume and product mix to maximize revenues and maintain sufficiently high margins to achieve and maintain profitability;

our ability to continue to license or acquire crop seeds from third party developers and our ability to develop proprietary crop seeds;

- future consolidations in the crop seed industry in China that may give rise to new or strengthened competitors;
- the possibility that the crop seed industry in China may favor genetically modified seeds over hybrid seeds, and our ability to develop and market such products;
- the Chinese government's continuing support for the growth and development of the agriculture sector;
- the impact of regulation affecting our industry; and

our benefits from certain government incentives including tax incentives, the expiration of which, or changes to which, could have an adverse effect on our operating results.

Critical Accounting Policies

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of those financial statements requires us to make estimates and judgments that affect the reported amount of assets and liabilities, revenues and expenses and related disclosure of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are those that reflect significant judgments or uncertainties, and potentially result in materially different results under different assumptions and conditions. We have described below what we believe are our most critical accounting policies that involve a high degree of judgment and the methods of their application. For a description of all of our significant accounting policies, see Note 2 to our consolidated financial statements.

Discontinued Operations

We report operating results for discontinued operations separately from continuing operations to distinguish the financial impact of disposal transactions from ongoing operations. Through September 30, 2017, we reported discontinued operations when the operations and cash flows of a component of the Company had been eliminated or intended to be eliminated from ongoing operations. For a component to be disposed of by sale, financial results were classified as discontinued only when held for sale criteria were met. For a component to be disposed of other than by sale, financial results were not classified as discontinued until abandonment, distribution, or exchange occurred,

depending on the manner of disposal. The operating results of the operations associated with Changchun Origin Seed Technology Development Limited, Denong Zhengcheng Seed Limited, Zhengzhou Branch of Beijing Origin Seed Limited and other accounts related to the seed production and distribution business are presented as discontinued operations.

Revenues

We utilize the guidance set forth in the FASB's ASC Topic 605, "Revenue Recognition", regarding the recognition, presentation and disclosure of revenue in our consolidated financial statements. We recognize revenue when pervasive evidence of an arrangement exists, the price is fixed and determinable, collection is reasonably assured and delivery of products or services has been rendered.

We derive revenues primarily from the sale of various crop seeds, including corn, rice and canola seeds in China. We sometimes carry a sizeable deferred revenues that reflects the value of our crop seeds delivered after evidence of a sales arrangement is confirmed, delivery to the customer is made and pre-payments from the customer are received, but before the final sales price is fixed and determined at the end of the selling season. This aspect of our revenues recognition policy does not have a significant effect when deferred revenues in the periods being compared remain approximately the same proportion to overall sales. However, when the proportion of our sales classified as deferred revenues varies significantly from year to year, as sometimes occurs, our revenues and earnings as reported in our financial statements may not exactly reflect our operating activities. The revenues generated from the seed production and distribution business are reported in discontinued operations due to our strategic shift to a research and development company.

Impairment of long-lived assets

The Company reviews the carrying value of long-lived assets to be held and used, including other intangible assets subject to amortization, when events and circumstances warrants such a review. The carrying value of a long-lived asset is considered impaired when the anticipated undiscounted cash flow from such asset is separately identifiable and is less than its carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset and intangible assets. Fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved. Losses on long-lived assets and intangible assets to be disposed are determined in a similar manner, except that fair market values are reduced for the cost to dispose. The Company has performed an impairment analysis on the plant and equipment in Xinjiang Originbo Seed Company Limited and recorded an impairment loss of RMB 25,873. The impairment loss was reported in discontinued operations as the impaired long-lived assets are related to the seed production and distribution business.

Write-down of Inventories

Our inventories are stated at the lower of cost or net realizable value. Any excess of the cost over the net realizable value of the inventories is recognized as a provision for reduction in the value of inventories.

We assess the write-downs of inventories using three criteria: 1) the quality of seeds according to standards promulgated by the PRC government on the germination percentage and purity level of seeds; 2) a comparison of the inventory unit cost with the market selling price and subsequent write-down of those inventories where the unit cost exceeds its expected net selling price; and 3) evaluation of the unsold balance of the existing inventory that cannot be sold in the coming three years, based on sales forecasts and marketing plan.

We have assessed the product quality, unsold quantity and the amount unit cost exceed the selling price performed by our quality inspectors and sales staff on an annual basis, and accordingly, determined the inventory write-downs based on the assessment results. We believe that the current methodologies on impairment assessment are adequate to address the risks of inventory write-downs. For fiscal year 2017, we had a write down of RMB18.80 million (US\$2.8 million) which was mainly due to the unit cost exceeds its expected net selling price, compared to RMB 20.5 million for fiscal year 2016 and RMB10.97 million for fiscal year 2015.

Due to the nature of the seed industry, we normally produce seeds according to our annualized production that is developed at least one year before delivery to our customers. If our production plan is too aggressive, we could produce more seeds than the market demands, resulting in aged seeds. We may decide not to sell the aged seeds as

crop seed products, taking into account factors such as the quality of the seeds and commodity pricing. In that case, the aged inventory may be sold as common feed products at greatly reduced prices. Aged inventory could result in asset impairment risk, in which case we would suffer a risk of additional inventory write-downs.

Our inventories and provisions related to the seed production and distribution business are reported in discontinued business. Our inventories reported in the continuing business mainly consist of low value supplies and parent seeds that are used for research and development activities.

Income taxes

Income taxes are accounted for using the asset and liability method. Under this method, deferred income tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which these temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance would be provided for those deferred tax assets if it is more likely than not that the related benefit will not be realized. A full valuation allowance has been established against all net deferred tax assets as of December 31, 2016 and 2017 based on our estimates of recoverability.

Stock-based compensation

We adopted FASB ASC 718-10, to measure our issued share options based on the grant-date fair value of the options and recognized as compensation expense over the requisite service period, with a corresponding addition to equity. We adopt the Black-Scholes Model to value the fair value of the share options.

Results of Operations

Fiscal Year Ended September 30, 2017 Compared To Fiscal Year Ended September 30, 2016

Revenues

For the fiscal year ended September 30, 2017, no revenue was recorded from continuing operation, however for the fiscal year ended September 30, 2016, we recorded revenue of RMB0.5 million primarily due to fees for services from the Company's collaborators.

Operating expenses

Operating expenses from continuing operation for the fiscal year 2017 were RMB68.6million (US\$10.3 million), representing an increase of 5.8% from RMB64.8 million in the fiscal year 2016. The increase in operating expenses was mainly due to the decrease in other income of RMB3.2 million (US\$0.5 million).

General and administrative

General and administrative expenses primarily consist of salary and compensation, depreciation and amortization, legal fees, professional expenses and other expenses, including travel and other general business expenses and office supplies. General and administrative expenses for the fiscal year 2017 were RMB34.9million (US\$5.3 million), an increase of 9.8% from RMB31.8 million in the fiscal year 2016 mainly due to the increasing expense in US subsidiary.

Research and development

Research and development expenses primarily consist of salary and compensation expenses of personnel engaged in the research and development of our proprietary crop seeds and genetically modified products, travelling expenses, depreciation of plant and equipment, and expenses paid to certain research institutes to carrying research projects on behalf of Origin during the period. Research and development expenses decreased to RMB38.7 million (US\$5.8 million) in fiscal year 2017 from RMB41.3 million in fiscal year 2016.

Other income, net

Other income primarily consists of raw material sales, office building rental income and government subsidy income, offset by costs related to raw material sales and fixed assets disposal loss. Other income decreased to RMB5.0 million (US\$0.8 million) in fiscal year 2017 from RMB8.3 million in fiscal year 2016.

Loss from continuing operations

As a result of the impact of the components described above, loss from continuing operations were RMB68.6 million (US\$10.3 million) in fiscal year 2017 compared with operating income of RMB64.3 million in fiscal year 2016.

Net loss from discontinued operations.

Net loss from discontinued operations was RMB30.1 million (US\$4.5 million) in fiscal year 2017, compared to a loss of RMB5.0 million in fiscal year 2016. The net loss from discontinued operations in fiscal year 2017 was a result of the disposal of our seed distribution and production business.

Interest expense

Interest expense was RMB9.0 million (US\$1.4 million) for the fiscal year 2017 compared to RMB7.6 million a year ago. This mainly represents interest expense from the total borrowing of continuing operations.

Net Loss

Net loss attributable to Origin for the fiscal year ended September 30, 2017 was RMB75.7million (US\$11.4 million) compared to the net loss of RMB65.6 million for the fiscal year ended September 30, 2016.

Fiscal Year Ended September 30, 2016 Compared To Fiscal Year Ended September 30, 2015

Revenues

For the fiscal year ended September 30, 2016, we recorded revenue from continuing operation of RMB0.5 million, primarily due to fees for services from our collaborators. In the fiscal year ended September 30, 2015, we recorded revenue of RMB0.3 million.

Operating expenses

Operating expenses from continuing operation for the fiscal year 2016 were RMB64.8million, representing an increase of 28.1% from RMB50.6 million in the fiscal year 2015. The increase was mainly due to increase in G&A expenses.

General and administrative

General and administrative expenses primarily consist of salary and compensation, depreciation and amortization, legal fees, professional expenses and other expenses, including travel and other general business expenses and office supplies. General and administrative expenses for the fiscal year 2016 were RMB31.8million, an increase of 125.3% from RMB14.1 million in the fiscal year 2015 mainly due to the increasing expense in US subsidiary.

Research and development

Research and development expenses primarily consist of salary and compensation expenses of personnel engaged in the research and development of our proprietary crop seeds and genetically modified products, travelling expenses, depreciation of plant and equipment, and expenses paid to certain research institutes to carrying research projects on behalf of Origin during the period. Research and development expenses decreased to RMB41.3 million in fiscal year 2016 from RMB46.1 million in fiscal year 2015.

Other income, net

Other income primarily consists of raw material sales, office building rental income and government subsidy income, offset by costs related to raw material sales and fixed assets disposal loss. Other income decreased to RMB8.3 million in fiscal year 2016 from RMB9.7 million in fiscal year 2015.

Loss from continuing operations

As a result of the impact of the components described above, loss from operations were RMB71.9 million in fiscal year 2016 compared with net loss of RMB60.2 million in fiscal year 2015.

Net income/(loss) from discontinued operations.

Net loss from discontinued operations was RMB5.0 million in fiscal year 2016, compared to a net income of RMB42.4 million in fiscal year 2015. The net loss from discontinued operations in fiscal year 2016 was an operating result earned by the disposed assets of our seed distribution and production business.

Interest expense

Interest expense was RMB7.6 million for the fiscal year 2016 compared to RMB10.6 million a year ago. This mainly represents interest expense from the total borrowing of continuing operations.

Net Loss

Net loss attributable to Origin for the fiscal year ended September 30, 2016 was RMB65.6 million compared to the net loss of RMB13.8 million for the fiscal year ended September 30, 2015.

B. Liquidity and Capital Resources.

As of September 30, 2015, 2016 and 2017, we had approximately RMB66.0 million, RMB54.5 million and RMB3.2 million (US\$0.5 million), respectively, in cash and cash equivalents. Our cash and cash equivalents primarily consisted of cash on hand and short term liquid investments with maturities of three months or less deposited with banks and other financial institutions.

We financed our operations through cash generated from operating activities and bank borrowings. As of September 30, 2017, we had a total short-term borrowings of RMB50.5 million (US\$7.6 million) and long-term borrowings of RMB56.8 million(US\$8.6 million). Please see Note 13 to our consolidated financial statement for the details of bank borrowings and Note 14 for convertible note with L2 Capital LLC.

The following table shows our cash flows with respect to operating activities, investing activities and financing activities for the 12 months ended September 30, 2015, 2016 and 2017.

Item (In thousands)	September 30			
	2015 RMB	2016 RMB	2017 RMB	2017 US\$
Net cash provided by (used in) operating activities	52,189	47,905	(120,167)	(18,106)
Net cash provided by (used in) investing activities	(20,359)	(6,481)	29,539	4,451
Net cash provided by (used in) financing activities	(9,466)	(48,816)	47,008	7,083
Net (decrease) increase in cash and cash equivalents	22,364	(7,392)	(43,620)	(6,572)
Cash and cash equivalents, beginning of year	46,268	66,025	54,509	8,213
Effect of exchange rate changes on cash and cash equivalents	(2,607)	(4,124)	(7,644)	(1,152)
Cash and cash equivalents, end of year	66,025	54,509	3,245	489

Operating activities:

Net cash used in operating activities was RMB120.2 million (US\$18.1 million) for the fiscal year ended September 30, 2017, compared with provided by operating activities of RMB47.91 million for the fiscal year ended September 30, 2016. The cash outflow this year in the operating activities was mainly due to operating loss of RMB106.3 million (US\$16.0 million) for the fiscal year.

Investing activities:

Net cash provided by investing activities was RMB29.5 million (US\$4.5 million) for the fiscal year ended September 30, 2017, compared with cash used of RMB6.5 million for the fiscal year ended September 30, 2016. The increase was mainly due to proceeds from the disposal of commercial seed business of RMB33.2 million (US\$5.0).

Financing activities:

Net cash provided by financing activities was RMB47.0 million (US\$7.1 million) for the fiscal year ended September 30, 2017, compared with cash used of RMB48.82 million for the fiscal year ended September 30, 2016. The increase was mainly due to proceeds of long-term borrowings netting off payment of short-term borrowings.

Relevant PRC laws and regulations permit payments of dividends by our PRC operating companies only out of their retained earnings, if any, as determined in accordance with PRC accounting standards and regulations. In addition, the statutory general reserve fund requires that annual appropriations of 10% of net after-tax income be set aside prior to payment of any dividends. As a result of these and other restrictions under PRC laws and regulations, our PRC Operating Companies are restricted in their ability to transfer a portion of their net assets to us either in the form of dividends, loans or advances.

Even though we currently do not require any such dividends, loans or advances from our PRC Operating Companies, we may in the future require additional cash resources from our PRC Operating Companies due to changes in business conditions, to fund future acquisitions or developments, or merely to declare and pay dividends or distributions to our shareholders, although we currently have no intention to do so.

Substantial doubt about the ability to continue as going concern

We incurred net losses of RMB17.8 million, RMB76.8 million and RMB106.3 million (US\$16.0 million) in the years ended September 30, 2015, 2016 and 2017, respectively. Working capital deficit was RMB136.4 million and RMB45.0 million (US\$6.8 million) as of September 30, 2016 and 2017, respectively. Accumulated deficit was RMB182.4 million and RMB258.1 million (US\$38.9 million) as of September 30, 2016 and 2017, respectively. The recurring losses from operations and net capital deficiency raise substantial doubt concerning the Company's ability to continue as a going concern for a reasonable period of time.

On September 26, 2016, the Company entered into a Master Transaction Agreement with Beijing Shihui, pursuant to which, the Buyer agreed to purchase the business of commercial corn seed production and sales operated by the Company for an aggregate purchase price of RMB400.0 million (US\$60.1 million). The aggregate purchase price was increased to RMB421.0 million (US\$63.4 million) as amended by a Supplemental Agreement effective August 16, 2017. Total cash consideration after offsetting certain payables to the Buyers and deducting certain bank loans from the aggregate purchase price amounted to RMB129.0 million (US\$19.4 million). As of the date of this report, the Company has received cash of RMB64.0 million (US\$9.6 million). The remaining cash balance of RMB65.0 million (US\$9.8 million) will be received upon the Second Closing pursuant to the Supplemental agreement. The Company expects the Second Closing will be completed in fiscal year ended 2018.

On July 5, 2017, the Company entered into an equity purchase agreement (the "Equity Purchase Agreement") with L2 Capital, LLC. Upon the terms and subject to the conditions thereof, L2 Capital, LLC is committed to purchase that number of ordinary shares of the Company equal to an aggregate market price of up to US\$4.5 million. Commencing on the date on which a registration statement registering the ordinary shares to be purchased becomes effective, the Company may sell its ordinary shares to L2 Capital, LLC subject to other limitation. The Company is currently preparing the registration statement and expects the registration statement will be filed and become effective during the fiscal year of 2018.

On December 21, 2017, the Company entered into a Property Transfer Agreement with Liaoning Agricultural Chemicals, Ltd to sell its office building and land use right in Shenyang for a total purchase price of RMB16.8 million (US\$2.5 million). The Company has received 100% of the total purchase price as of the date of this report.

Besides the expected cash inflows from the aforementioned existing agreements, the Company is also seeking funds from other resources including but not limited to licensing its corn seed traits to its customers, applying for government grants for research and development activities, pursuing other capital investment from investors and selling certain company assets. The Company consistently reviews its working capital requirements and has also taken steps to reduce expenses. The Company has closed down the office of Origin Agritech USA, LLC in Iowa, United States and cut down the related personnel and administrative costs. The Company is also currently working with certain vendors and creditors to extend repayment terms.

Despite the Company's effort to obtain additional funding and reduce operating costs, there is no assurance that the Company's plans and actions will be successful. In addition, there can be no assurance that in the event additional sources of funds are needed they will be available on acceptable terms, if at all.

C. Research and Development, Patents and Licenses, etc.

We focus our research and development efforts on biotechnology, crop breeding and the development of new crop seeds. In November 2001, we established a seed research and development center in Tongzhou, Beijing, which conducts research and development of commercial crop breeding. In September 2005, we established the "Origin Life Science Research Center" in Zhong-Guan-Cun (ZGC) Life Science Park in Beijing, the principal activities of which include crop gene engineering, molecular marker-assisted breeding, and molecular identification. We also have six breeding stations located in different regions in China.

We have established technological cooperative relationships with five universities and sixteen research institutes in China, including Zhejiang University, China Agricultural University, Chinese Academy of Agricultural Sciences, and Henan Agriculture University. We employ seventy-two full-time research personnel.

Our research and development expenditures were RMB46.14 million, RMB41.27 million and RMB38.68 million (US\$5.83 million) for fiscal years ended September 30, 2015, 2016 and 2017, respectively. Our continued research and development spending is a result of our efforts to self-develop seed varieties and biotechnology traits both through joint development and in-house efforts.

The company has received government funding for research and development activities. Such funding was received in the fiscal years 2015, 2016 and 2017 in the amounts of RMB7.08 million, RMB10.37 million and RMB 4.04 million (US\$0.6 million), respectively.

D. Trend Information.

Other than as disclosed elsewhere in this Annual Report, we are not aware of any trends, uncertainties, demands, commitments or events in the period from October 1, 2016 to September 30, 2017 that were reasonably likely to have a material effect on our net revenues, income, profitability, liquidity or capital resources, or that caused the disclosed financial information to be not necessarily indicative of future operating results or financial conditions, or that had the trends relating to the current-year increases in expenses and reduction in revenues and profits.

E. Off-balance Sheet Arrangements.

We do not have any off-balance sheet guarantees, interest rate swap transactions or foreign currency forward contracts or outstanding derivative financial instruments. We do not engage in trading activities involving non-exchange traded contracts.

F. Tabular Disclosure of Commitments and Contingencies.

We have various contractual obligations that will affect our liquidity. The following table sets forth our contractual obligations as of September 30, 2017.

Contractual Obligations	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Capital Commitment	2,702	2,702	-	-	-
Short term Debt Obligations	15,000	15,000	-	-	-
Long term Debt Obligations	92,273	35,504	56,769	-	-
Interest on Debt Obligations	14,486	5,006	9,480	-	-
Convertible Promissory Notes	8,335	8,335	-	-	-
Operating Lease Obligations	6,334	1,128	1,031	908	3,267
Total	136,468	69,813	62,480	908	3,267

G. Safe Harbor.

Except for historical facts and financial data, the information included in Items 5.A through 5.D and 5.F is deemed to be a “forward looking statement” as that term is defined in the statutory safe harbors. The safe harbor provided in Section 27A of the Securities Act and Section 21E of the Exchange Act shall apply to all forward-looking information provided in this Item 5.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES**A. Directors and Senior Management.**

The following table sets forth certain information regarding our directors and executive officers as of January 31, 2018.

Name	Age	Position
Gengchen Han	62	Chairman of the Board, acting CEO
Xin Zhou	42	Chief Financial Officer
Jihong Liang	59	Chief Technology Officer
Min Tang	64	Independent Director
Michael W. Trimble	60	Independent Director
James Chen	52	Director
Weibin Yan	51	Independent Director

Dr. Gengchen Han is the Chairman of Origin and currently is the acting Chief Executive Officer. He also served, in the past, as the President and the Chief Executive of Origin at various times. Dr. Han is also the Executive Chairman of Beijing Origin and its affiliated companies, a position that he has held since founding the business in 1997. Dr. Han was the Co-Chief Executive Officer and Chief Executive Officer of the Company from its inception in 1997 until January 1, 2009 and from August 1, 2011 to April 25, 2016. Dr. Han has more than 20 years of experience in research and development of hybrid seed products, particularly corn seed. From 1982 until 1984, Dr. Han was a lecturer at the Henan Agriculture University. From 1984 to 1987, Dr. Han received his Ph.D. degree in Plant Breeding and Cytogenetics from Iowa State University. From 1989 until 1990 he worked for the International Maize and Wheat Improvement Center, or CIMMYT, in Mexico. He worked for Pioneer Hi-bred International from 1990 to 1996; his positions there included Regional Technical Coordinator for Asia/Pacific and Regional Supervisor for China Business.

Ms. Xin Zhou has been the Chief Financial Officer of Origin since October 2017. Ms. Zhou commenced employment with Origin in July 2017, and succeeded to the position of Chief Financial Officer in October 2017. Prior to her employment at Origin, Ms. Zhou was employed at Monsanto China for seven years, with the most recent position being held as China finance controller for four years. Ms. Zhou received her MAcc degree from the University of Glasgow, United Kingdom. She is a CICPA and FCCA.

Dr. Jihong Liang has been serving as the Chief Technology Officer of Origin since August, 2016. Prior to Origin, Dr. Liang most recently served as the head of Syngenta's global rice seed research and development. He has more than 25 years of global industry experience, leading research and development at companies such as Syngenta, Monsanto and the Monsanto-Cargill joint venture Renessen. He has held leadership positions in multiple disciplines, including technology scouting, global crop strategy planning, market research and business development in China, Singapore and the United States. Liang's scientific work has resulted in 10 patents globally and numerous research articles published in world-class scientific journals. Dr. Liang earned his Bachelor of Science degree in microbiology from China Agricultural University, doctorate in biochemistry from the University of Wisconsin-Madison, post-doctoral fellowship in molecular biology from the University of Chicago and Master of Business Administration from Keller Graduate School of Management in St. Louis.

Dr. Min Tang has been a director of Origin since January 2009. Dr. Tang is currently the Executive Vice Chairperson of China Social Entrepreneur Foundation, a social development and entrepreneurship education initiative. Previously,

Dr. Tang sat as the Deputy Secretary General of the China Development Research Foundation in charge of financial reform, energy conservation, and social development for the Development Research Center reporting to the State Council of China. Prior to his position, Dr. Tang worked in Asia Development Bank for 18 years. From 2000-2007, he was the Chief Economist of Asian Development Bank Resident Mission in China. Dr. Tang received his masters and PhD. degree in Economics from University of Illinois at Urbana Champaign, USA.

Dr. Michael W. Trimble has been a director of Origin since May 2006. Dr. Trimble is the founder of Trimble Genetics International LLC, or Trimble Genetics, and has been the President of Trimble Genetics since 2001. Trimble Genetics is a plant genetics research company that has expanded business and research relationships to include activities in North America, South America, Asia, Europe, the Middle East and Africa. Dr. Trimble is a leader in plant genetics research with over thirty years of experience in crop breeding and the agricultural seed industry. Dr. Trimble is an inventor of numerous patents in the field of plant genetics. Dr. Trimble graduated with a Ph.D. degree from the University of Minnesota and also completed graduate programs at Purdue University and Iowa State University.

Dr. Z. James Chen became a director of the Company in August 2017. Previously, Dr. Chen was the Chief Financial Officer of Origin from January 2012 to January 2016. Mr. Chen is currently the CFO of Yunji, Inc. Prior to being employed by Origin, Dr. Chen served as an Investment Manager at Abu Dhabi Investment Authority (ADIA) and he worked as an equity research analyst at Morgan Joseph and BB&T Capital Markets. Dr. Chen also worked as a Product Manager at Celanese and as a License Product Technology Manager at Univation Technologies, a joint venture between ExxonMobil and Dow Chemical. Dr. Chen received his Ph.D. Degree in Chemical Engineering from the University of Connecticut and his M.B.A degree from New York University.

Mr. Weibin Yan has been a director of the Company since August 2017. Mr. Yan has been the Chairman and Executive Director of Ausnutria Dairy Corporation Ltd., with principal places of business located in mainland China, Hong Kong and the Netherlands, a company focused on production, distribution and sales of infant formula since June 2013. Mr. Yan founded Ausnutria Dairy (China) Co., Ltd. in 2003 and served as its Chairman since that time. From April 2010 to December 2011 and June 2012 to January 2016, Mr. Yan was the Vice-Chairman of the Board of Directors of Yuan Longping High-Tech Agriculture Co. Ltd., located in Changsha, Hunan Province of China, a company focused on seed industry. Mr. Yan was the CFO of Yuan Longping High-Tech Agriculture Co., Ltd. from April 2010 to June 2012, he was also a director and CEO of Yuan Longping High-Tech Agriculture Co., Ltd. from 2004 to April 2010 and December 2011 to June 2012. Mr. Yan was also a managing director and vice president of Hunan Ava Seed Co., Ltd., which had been a listed company on the Shenzhen Stock Exchange. Mr. Yan graduated from the Economic and Management Engineering Department and Business School of Hunan University with a bachelor's degree in engineering and a master's degree in business administration.

B. Compensation.

The aggregate cash compensation paid to our directors and executive officers as a group was RMB6.94 million (US\$1.05 million) for the twelve months ended September 30, 2017. Options granted are stated in the chart found below.

2009 Performance Equity Plan

On April 22, 2010, our company adopted the 2009 Performance Equity Plan, under which we are able to issue equity awards with the right to acquire up to 1,500,000 ordinary shares to our directors, officers, employees, individual consultants and advisors. The main purpose of the plan was to provide an existing structure and renewable benefit plan for senior management and directors and others providing services to the company. We had outstanding awards for 700,000 ordinary shares under the 2009 Plan at September 30, 2017.

2014 Performance Equity Plan

On December 22, 2014, the company adopted the 2014 Performance Equity Plan, under which we are able to issue equity awards for up to 5,000,000 ordinary shares to our directors, officers, employees, individual consultants and advisors. The main purpose of the plan is to provide an existing structure and renewable benefit plan for senior management and directors and others providing services to the company. In addition to current equity awards to the directors and officers, we plan to expand our equity awards to a broader range of employees in order to align our employee incentives towards our stock performance. We had outstanding awards for 1,510,000 ordinary shares under the 2014 Plan at September 30, 2017.

Those awards held by the directors and officers are listed below.

Name	Ordinary Shares Underlying Outstanding Option	Exercise Price	Grant Date	Expiration Date
Gengchen Han	120,000	\$ 1.27	/Share January 2, 2014	January 1,2019
	120,000	\$ 1.48	/Share January 2, 2015	January 1,2020
	120,000	\$ 1.38	/Share January 4, 2016	January 4, 2021
	120,000	\$ 2.07	/Share January 3, 2017	January 2, 2022
William S. Niebur	600,000	\$ 2.05	/Share April 19, 2016	November 30, 2019
Michael Trimble	5,000	\$ 1.27	/Share January 2, 2014	January 1,2019
	5,000	\$ 1.48	/Share January 2, 2015	January 1,2020
	5,000	\$ 1.38	/Share January 4, 2016	January 4, 2021
	20,000	\$ 2.07	/Share January 3, 2017	January 2, 2022
Min Tang	5,000	\$ 1.27	/Share January 2, 2014	January 1,2019
	5,000	\$ 1.48	/Share January 2, 2015	January 1,2020
	5,000	\$ 1.38	/Share January 4, 2016	January 4, 2021
	20,000	\$ 2.07	/Share January 3, 2017	January 2, 2022
James Chen	200,000	\$ 1.27	/Share January 2, 2014	January 1,2019
	50,000	\$ 1.48	/Share January 2, 2015	January 1,2020
Shashank Aurora	200,000	\$ 1.65	/Share May 16, 2016	October 1, 2019
Zhou Xin	25,000	\$ 1.65	/Share October 2, 2017	October 1, 2022
Jihong Liang	200,000	\$ 2.00	/Share August 3, 2016	August 3, 2026

Mr. William S. Niebur, former Chief Executive Officer, holds options to acquire 600,000 shares of common stock, exercisable at \$2.05, which expire in November 30, 2019. These options were issued while an officer and were continued as part of his severance agreement.

Mr. Shashank Aurora, former Chief Financial Officer, holds options to acquire 200,000 ordinary shares, exercisable at \$1.65, which expire in October 1, 2019. These options were issued while an officer and were continued as part of his severance agreement.

C. Board Practices.

Terms of directors and executive officers

Our directors are not subject to a specific term of office and hold office until the next annual meeting of shareholders or until such director's earlier resignation, removal from office, death or incapacity. Any vacancy on the board of directors resulting from death, resignation, removal or other cause and any newly created directorship resulting from any increase in the authorized number of directors between meetings of shareholders may be filled either by the affirmative vote of a majority of all the directors then in office (even if less than a quorum) or by a resolution of shareholders.

Our officers are appointed by the board of directors and hold office until their successors are duly elected and qualified, but may be removed at any time, with or without cause, by resolution of directors. Any vacancy occurring in any office may be filled by resolution of directors.

Employment Agreements

Dr. Han, our Chairman has an employment agreement with us. The agreement currently has a term of three years commencing on January 1, 2015. Dr. Han is entitled to insurance benefits, five weeks' vacation, a car and reimbursement of business expenses and, if necessary, relocation expenses. The agreement is terminable by Origin for death, disability and cause. Dr. Han may terminate the agreement and his employment for good reason, which includes Origin's breach, the executive's loss of his seat on the board of directors, and change of control of Origin. In the event of termination for good reason or without cause, the executive will receive compensation and benefits under his employment agreement through the earlier of two years from the date of termination or through the term of the agreement. The agreements contain provisions for the protection of confidential information and a three-year non-competition period within China.

Dr. Liang, our CTO has an employment agreement with us. The agreement currently has a term of five years commencing on August 3, 2016. Dr. Liang is entitled to employee benefits including medical and life insurance, five weeks of paid vacation, Directors and Officers insurance, and relocation. The agreement will terminate upon any of the following: (i) termination upon death; (ii) termination for disability; (iii) termination for cause; (v) resignation without good reason; and (vi) resignation for good reason. Provided, however that: (a) Executive must provide notice of a good reason event within thirty (30) days after the act or omission which constitutes good reason first occurs, (b) the Company shall be provided thirty (30) days following such notice to remedy such or omission, and following any such notice to remedy Executive shall no longer have good reason to terminate employment, and (c) if the Company does not, or is not able to, remedy such act or omission, Executive must terminate his employment within sixty (60) days after the occurrence of such act or omission first occurs. Mr. Liang was granted 300,000 performance-based restricted stock units (“PSU”) of the Company. The PSU will vest in two portions. The first portion of the PSU will vest when certain performance criteria are met. The remaining portion of the PSU will vest on the fifth anniversary of the grant, provided that certain performance criteria have been met and the employment of the grantee is not terminated prior to the fifth anniversary. On the vesting date, the grantee is entitled to receive an amount of Ordinary Share of the Company equals to 50%, 100% or 150% (depending on the performance criteria attained) multiplied by the amount of vested PSU the grantee holds. If the performance criteria threshold is not met prior to the earlier of the fifth anniversary or the grantee’s termination, then none of the grantee’s PSU will vest.

The company also granted PSUs to Mr. William S. Niebur, its former Chief Executive Officer, and to Mr. Shashank Aurora, its former Chief Financial Officer. As part of their severance agreements, there are outstanding 800,000 PSUs held by Mr. Niebure and 300,000 PSUs held by Mr. Aurora. if a Change in Control on company is initiated on or before January 1, 2019. The 300,000 PSUs held by Mr. Aurors can be fully vested at the target level, but will be forfeited entirety if there is no change in control on company is initiated on or before January 1, 2019. The 800,000 PSUs held by Mr. Niebur, if a Change in Control on company is initiated on or before January 1, 2020. The 800,000 PSUs held by Mr. Niebure can be fully vested at the target level, but will be forfeited entirety if there is no change in control on company is initiated on or before January 1, 2020.

Board committees

Our board of directors has established an Audit Committee, a Compensation Committee and a Nominations Committee.

Audit Committee

The members of our Audit Committee are Weibin Yan (chairman), Michael Trimble and Min Tang. Our board of directors has determined that all of our Audit Committee members are independent directors within the meaning of Nasdaq Marketplace Rule 4200(a)(15) and meet the criteria for independence set forth in Rule 10A-3(b)(1) of the

Securities Exchange Act of 1934.

The board of directors has determined that each of Messrs. Weibin Yan (chairman), Michael Trimble and Min Tang has an understanding of Generally Accepted Accounting Principles and financial statements, the ability to assess the general application of such principles in connection with our financial statements, including estimates, accruals and reserves, experience in analyzing or evaluating financial statements of similar breadth and complexity as our financial statements, an understanding of internal controls and procedures for financial reporting and an understanding of Audit Committee functions.

The board of directors believes that Mr. Yan qualifies as an “audit committee financial expert” within the meaning of all applicable rules. The board of directors believes that Mr. Yan has financial expertise because of his educational backgrounds and his extensive experience in executive leadership positions and participation in financial reporting for private and public companies and his consulting activities in the areas of accounting, corporate finance, capital formation and corporate financial analysis.

We adopted an Audit Committee charter, amended by the board of directors at the board meeting held on August 16, 2007, under which the Audit Committee is responsible for reviewing the scope, planning and staffing of the audit and preparation of our financial statements. This includes consultation with management, the auditors and other consultants and professionals involved in the preparation of the financial statements and reports. The Audit Committee is responsible for performing oversight of our relationship with our independent auditor. The Audit Committee also has a general compliance oversight role in assuring that our directors, officers and management comply with our code of ethics, reviews and approves related party transactions, deals with complaints regarding accounting, internal controls and auditing matters, and oversees compliance with accounting and legal requirements applicable to us.

Pursuant to the terms of its charter, as amended, the Audit Committee's responsibilities include, among other things:

- annually reviewing and reassessing the adequacy of the Audit Committee's form of charter;

- reviewing our annual audited financial statements with our management and our independent auditors and the adequacy of our internal accounting controls;

- reviewing analyses prepared by management and independent auditors concerning significant financial reporting issues and judgments made in connection with the preparation of our financial statements;

- engaging of the independent auditor;

- reviewing the independence of the independent auditors;

- reviewing our auditing and accounting principles and practices with the independent auditor and reviewing major changes to our auditing and accounting principles and practices as suggested by the independent auditor or our management;

- appointment of the independent auditor; and

- approving professional services provided by the independent auditors, including the range of audit and non-audit fees.

The Audit Committee pre-approves the services to be provided by our independent auditors. The Audit Committee also reviews and recommends to the board of directors whether or not to approve transactions between us and any officer or director that occurs outside the ordinary course of business.

Compensation Committee

The members of our Compensation Committee are Min Tang (chairman) and Michael Trimble. The Compensation Committee also administers our equity award plans, including the authority to make and modify awards under the 2009 and 2014 Performance Equity Plans. The current charter of the Compensation Committee, which was adopted March 16, 2007, provides that the committee is responsible for:

reviewing and making recommendations to our board of directors regarding our compensation policies and forms of compensation provided to our directors, officers and other senior employees;

- reviewing and determining performance-based awards and compensation for our officers and other employees;

reviewing and determining share-based compensation (including the 2009 and 2014 Performance Equity Plans) for our directors, officers, employees and consultants;

administering our equity incentive plans (including the 2009 and 2014 Performance Equity Plans) in accordance with the terms thereof; and

such other matters that are specifically delegated to the Compensation Committee by our board of directors from time to time.

Nominating Committee

Our Nominating Committee consists of Michael W. Trimble (chairman), Min Tang and Weibin Yan. The Nominating Committee is responsible for overseeing the selection of persons to be nominated to serve on our board of directors. The Nominating Committee will identify, evaluate and recommend candidates to become members of the Board of Directors with the goal of creating a balance of knowledge and experience. The Nominating Committee is not a fully independent committee.

Pursuant to a vote by the board of directors taken at a board meeting held March 16, 2007, the Nominating Committee charter was amended. Pursuant to the terms of its charter, as amended, the Nominating Committee's responsibilities include, among other things:

- actively seeking and evaluating qualified individuals to become new directors as needed;

- reviewing current directors' suitability when their terms expire or one has a significant change in status;

- making recommendations with respect to succession planning for the co-chief executive officer and other officers; and

- such other matters that are specifically delegated to the Nominating Committee by our board of directors from time to time.

Summary of Significant Differences in Corporate Governance Practices for Purposes of Rule 5615 of the Nasdaq Marketplace Rules

We are incorporated under the laws of the British Virgin Islands. Our ordinary shares are registered with the SEC and are listed on the Nasdaq Global Select Market. As a result, our corporate governance framework is subject to laws of the British Virgin Islands, or BVI, the securities laws and regulations of the United States and the listing requirements of the Nasdaq Stock Market.

Under Rule 5615 of the Nasdaq Marketplace Rules, a foreign private issuer may follow its home country practice in lieu of the requirements of the Nasdaq Marketplace Rules. Rule 5605 requires U.S. domestic listed companies have a majority of independent directors on its board of directors. We are not required to have a majority of independent

directors on our board of directors under BVI laws. However, currently, three of our five directors are independent directors under applicable Nasdaq rules.

Under Rule 5605 a U.S. domestic listed company is required to have a nominations committee and compensation committee. We are not required to have such committees under the BVI laws, and therefore are not required to have these committees under the Nasdaq rules. Notwithstanding the fact that they are not required, we do have these two committees, and follow the Nasdaq Marketplace rules in the independence requirements of the members.

Under Rule 5620, a U.S. domestic issuer must solicit proxies and provide proxy statements for all meetings of shareholders. There are no such mandatory requirements under BVI laws, and therefore, we are not required to hold an annual meeting of the shareholders. There were no specific items that our board of directors requested the shareholders to vote on.

Under Rule 5635, a US domestic listed company is required to obtain shareholder approval of equity award plans and issuances of equity securities in excess of certain amounts when at less than market or book value. There are no such mandatory requirements under BVI law. We do not plan to get shareholder approval for future increases in the 2009 Plan and 2014 Plan or for any other equity award plan approved by the directors in the future or for issuances of equity securities that exceed 20% of the outstanding shares of the Company if they are sold at less than market or book value.

We have filed documentation with Nasdaq exempting the company under those provisions that BVI law does not require.

D. Employees.

We currently have 72 employees, including management, managers and research and related personnel. All of our employees are located in China.

We offer our employees additional annual merit-based bonuses in accordance with the overall performance of our company, his or her department and the individual. We are required by applicable PRC regulations to contribute amounts approximate to 20%, 7.7%, 9.7%, 1%, 0.6% and 0.7%, of our employees' aggregate salary to a pension contribution plan, a medical insurance plan, a housing fund, an unemployment insurance plan, a personal injury insurance plan and a maternity insurance plan, respectively, for our employees.

Our employees are not covered by any collective bargaining agreement. We believe that we have a good relationship with our employees.

During the last five years, the Company has initiated corporate wide restructuring programs and operating improvement efforts. During these initiatives, As a result, the Company has paid out RMB2.0 million, RMB3.54 million and RMB0.85 million as the severance packages for the fiscal years 2015, 2016 and 2017, respectively. In connection with the sale of the operating business in 2017 to Shihui, we had a further reduction in employees, but because the employees were transferred to Shihui, no severance costs were incurred by the Company.

E. Share ownership.

The following table sets forth information with respect to the beneficial ownership of our ordinary shares as of January 31, 2018, by each of our directors and executive officers who beneficially own our ordinary shares, and other principal shareholders.

* Beneficial ownership and percentage is determined in accordance with Rule 13d-3 under the Securities Exchange Act of 1934, as amended.

The business address of each of the individuals is c/o 21 Shengmingyuan Road, Changping District, Beijing, PRC (1) 102206. See Item 6B. “Directors, Senior Management, and Employees – Compensation” for discussion of option included in the table granted under the 2005, 2009 and 2014 Performance Equity Plans.

The shares reported in the above table are held by Dr. Han through a personal holding company, Sinodream Limited, a company formed under the laws of the British Virgin Islands of which he is the sole shareholder, officer and director. Therefore, Dr. Han will have voting and dispositive authority over all the shares. Includes 480,000 shares that may be acquired under stock options held by Dr. Han.

(3) Excludes 25,000 shares that may be acquired in the future under stock options held by Ms. Zhou.

- (4) Includes 35,000 shares that may be acquired under stock options held by Mr. Tang.
- (5) The business address of Mr. Trimble is 6159 Brandywine Drive, Johnston, IA 50131. Includes 35,000 shares that may be acquired under stock options held by Mr. Trimble.
- (6) Includes 133,334 shares that may be acquired under stock options held by Dr. Liang. Excludes 66,666 shares that may be acquired in the future under stock options held by Mr. Liang.
- (7) Includes 250,000 shares that may be acquired under stock options held by Mr. Chen.
- (8) Includes 0 shares that may be acquired under stock options held by Mr. Yan.

None of the above shareholders have voting rights that differ from the voting rights of other shareholders.

A substantial number of the ordinary shares are held in “street name,” and the company believes that a large portion of these shares represent holdings of non-United States shareholders through brokers in non-United States jurisdictions. Because these holdings are in street name, the company cannot determine the actual number or jurisdictions in which these shares are held.

ITEM 7 MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

A Major shareholders.

Please refer to Item 6.E “Directors, Senior Management and Employees – Share Ownership.”

1. Related party transactions.

Stock Consignment Agreements

In order to comply with PRC regulations, we operate our business in China through our PRC Operating companies. We have entered into stock consignment agreements with our PRC Operating Companies other than Origin

Biotechnology. The material provisions of these agreements are discussed under Item 4.C of this Annual Report.

Technical Service Agreements

All of the intellectual property rights of the Company are held by Origin Biotechnology pursuant to technology service agreements dated December 25, 2004. The material provision of the technology service agreements are discussed under Item 4.C of this Annual Report.

Corn Originator Agreement

Beijing Origin entered into this agreement with Trimble Genetics International LLC, or Trimble Genetics, a plant genetics research company. Michael W. Trimble, one of our directors, is the founder and president of Trimble Genetics and currently owns 100% of its equity interest. Under this agreement, Beijing Origin hires Trimble Genetics as its agent to test, promote, license and collect research fees on hybrids involving inbred lines of corn developed by Beijing Origin. Trimble Genetics retains fifty percent of such research fees and pays the remaining fifty percent to Beijing Origin. This agreement is immaterial in amount or significance.

Corn Inbred and Hybrid Transfer and Use Agreement

Beijing Origin entered into this agreement with Trimble Genetics on September 6, 2002. Under this agreement, Trimble Genetics provides corn inbreds and hybrids to Beijing Origin for experimental testing purposes. The agreement applies to all corn inbreds and hybrids transferred from Trimble Genetics to Beijing Origin previously, currently or in the future. If a hybrid from the testing proves to be marketable, the parties will negotiate a license agreement. If for any reason, it is not possible to conclude a license agreement, Beijing Origin agrees to return all remnant inbred seed and to destroy any inbreds or hybrids that may have originated from the material provided by Trimble Genetics. This agreement is immaterial in amount or significance.

New Corn Seed Liyu 35 Joint Development Agreement

Beijing Origin entered into three Joint Development agreements with Liyu on March 30, 2006 to jointly develop a new hybrid corn seed, Liyu 35. The proprietary right to the seed developed under this agreement belongs to Liyu but Beijing Origin has exclusive production and marketing rights to this variety of seed. The agreement has no fixed term or termination date, but the agreement automatically terminates if the seeds produced by Beijing Origin are less than 3 million kilograms for three consecutive years, subject to limited exceptions. The fees payable by Beijing Origin represent a percentage of revenues from the sale of the varieties and plus a flat fee.

Joint Development Agreements

Beijing Origin is a party to three joint development agreements with Corn Research Institute of Li County in Hebei Province, China, to develop new hybrid corn seeds. Corn Research Institute of Li County was incorporated as Liyu on May 2004, of which a 30% equity interest was owned by Yang Yasheng, one of our major shareholders and a former director. Yang Yasheng transferred his 30% interest to Beijing Origin on September 2004. On March 11, 2004, Corn Research Institute of Li County, Liyu and Beijing Origin entered into an agreement pursuant to which all the rights and obligations of Corn Research Institute of Li County under the three joint development agreements were assumed by Liyu after the dissolution of Corn Research Institute of Li County. In accordance with these joint development agreements, the parties agreed to jointly develop six varieties of new corn hybrid seeds, Liyu 26, Liyu 16, Liyu 6, Liyu 15, Li 168, and Liyu 35. The proprietary rights to the varieties of seeds developed under these agreements belongs to Corn Research Institute of Li County, now Liyu but Beijing Origin has exclusive right to production and marketing of these seeds. The fees payable by Beijing Origin represent a percentage of revenues from the sale of the varieties, and plus a flat fee with respect to Liyu 26 and Liyu 16. The agreements have no fixed term or termination date. The agreements may be terminated for breach by either party. We may terminate the agreements at any time, in effect, by not producing seeds, without penalty.

Xinjiang Origin

In May 2011 Beijing Origin established Xinjiang Origin for seed production and distribution. Beijing Origin invested RMB51 million for a 51% ownership of Xinjiang Origin.

Technology Transfer Agreement

Beijing Origin, or its predecessor, entered into this agreement with Henan Agriculture University in 1998. Henan Agriculture University currently owns a 2.04% equity interest in Beijing Origin. Under this agreement, the proprietary right to the new variety of seed, Yuyu 22, belongs to Henan Agriculture University. Beijing Origin has the right to propagate, produce and sell the new corn variety. The fee payable under this agreement is RMB20 per mu (unit of area equivalent to 0.164 of an acre) of seed production area per year. There is no fixed term or termination date of this agreement.

IT and Distribution Arrangements with Beijing Shihui Agricultural Development Co, Ltd.

Based in Beijing, China, Beijing Shihui Agricultural Development Co, Ltd (“Shihui”) was established in 2010 by the brother of the Company’s Chairman, Dr. Han Gengchen. As of the date of this report, Dr. Han’s son and brother are the principal shareholders of Shihui. Shihui is mainly engaged in crop seed sales, information technology services and internet operations. Shihui has been providing seed distributing services to Origin since 2014.

During fiscal year 2015, the Company acquired information systems of RMB2.0 million from Shihui.

During 2014 and 2015, Shihui took over Origin's sales employees and sales centers in Hubei, Sichuan, Xuzhou, Shenyang, Zhengzhou, Hunan and Shandong. During the fiscal year 2016, the sales to Shihui were RMB102.23 million (US\$15.31 million), which accounted for 30.5% of the sales of the Company.

In September, 2017, the Company entered into a loan agreement with Shihui pursuant to which the Company provided a loan of RMB21 million to Shihui. The loan is unsecured, and does not have a defined due date. Shihui is a company of which the principal shareholders are the brother and son of Dr. Han Gengchen, our chairman of the board and of which the brother of Dr. Han is the principal executive officer.

From time to time, the Company has provided security to the institutional lenders of Shihui, none of which has been called upon by the lenders. Shihui is a company of which the principal shareholders are the brother and son of Dr. Han Gengchen, our chairman of the board and of which the brother of Dr. Han is the principal executive officer.

Shihui's office is located at the headquarters of Origin in Beijing, China. The rent charged to Shihui was RMB 0.25 million (US\$0.04 million).

Master Transaction Agreement with Beijing Shihui

On September 26, 2016, the Company entered into a definitive agreement to sell its proprietary China-based commercial corn seed production and distribution business for RMB421 million (US\$63.4 million) to Shihui. Shihui is a company of which the principal shareholders are the brother and son of Dr. Han Gengchen, our chairman of the board and of which the brother of Dr. Han is the principal executive officer.

2. Interests of experts and counsel.

Not applicable.

ITEM 8. FINANCIAL INFORMATION

A Consolidated statements and other financial information.

We have appended consolidated financial statements filed as part of this Annual Report. See Item 18 “Financial Statements.”

Legal Proceedings

We may from time to time be subject to various legal or administrative proceedings, either as plaintiff or defendant, arising in the ordinary course of our business. Except otherwise disclosed in this report, we are not currently a party to, nor are we aware of, any legal proceeding, investigation or claim that, in the view of our management, is likely to materially and adversely affect our business, financial position or results of operations.

Dividend Policy

We have never declared or paid any dividends, nor do we have any present plan to pay any cash dividends on our ordinary shares in the foreseeable future. We currently intend to retain most, if not all, of our available funds and any future earnings to operate and expand our business.

Our board of directors by resolution may authorize payment of dividends if the directors are satisfied, on reasonable grounds, that Origin will, immediately after the distribution of dividends, (i) satisfy the solvency test as stipulated in Section 56 of the BVI Business Companies Act, (ii) any of our applicable contractual obligations and (iii) the laws of China. Even if our board of directors decides to pay dividends, the form, frequency and amount will depend upon our future operations and earnings, capital requirements and surplus, general financial condition, contractual restrictions and other factors that the board of directors may deem relevant.

Significant changes.

No significant changes since September 30, 2017

ITEM 9. THE OFFER AND LISTING**A. Offering and listing details.**

Origin's ordinary shares are listed on the Nasdaq Global Select Market where they trade under the SEED ticker symbol.

The following table provides the historical high and low trading United States dollar prices for Origin's ordinary shares for the periods indicated below:

	Nasdaq Price per Share (US\$)	
	High	Low
Annual Market Prices		
Year 2013 (until September 30, 2013)	1.89	1.34
Year 2014 (until September 30, 2014)	3.47	1.17
Year 2015 (until September 30, 2015)	2.89	1.02
Year 2016 (until September 30, 2016)	3.19	1.07
Year 2017 (until September 30, 2017)	2.87	1.3

ITEM 10. ADDITIONAL INFORMATION

A. Share capital.

Not applicable.

B. Memorandum and articles of association.

We incorporate by reference into this Annual Report the description of our amended and restated memorandum and articles of association contained in our 20-F annual report, as amended, initially filed with the Commission on July 14, 2006.

C. Material contracts.

We have not entered into any material contracts other than in the ordinary course of business and other than those described in Item 4, “Information on the Company,” Item 7, “Major Shareholders and Related Party Transactions,” filed (or incorporated by reference) as exhibits to this Annual Report or otherwise described or referenced in this Annual Report.

D. Exchange controls.

British Virgin Islands

There are no material exchange controls restrictions on payment of dividends, interest or other payments to the holders of our ordinary or preferred shares or on the conduct of our operations in the BVI, where we are incorporated. There are no material BVI laws that impose any material exchange controls on us or that affect the payment of dividends, interest or other payments to nonresident holders of our ordinary or preferred shares. BVI law and our amended and restated memorandum and articles of association impose no material limitations on the right of non-residents or foreign owners to hold or vote our ordinary or preferred shares.

China

Under the Foreign Currency Administration Rules promulgated in 1996 and revised in 1997, and various regulations issued by State Administration of Foreign Exchange, or SAFE, and other relevant PRC government authorities, RMB is convertible into other currencies without prior approval from SAFE only to the extent of current account items, such as trade related receipts and payments, interest and dividends and after complying with certain procedural requirements. The conversion of RMB into other currencies and remittance of the converted foreign currency outside PRC for the purpose of capital account items, such as direct equity investments, loans and repatriation of investment, requires the prior approval from SAFE or its local office. Payments for transactions that take place within China must be made in RMB. Unless otherwise approved, PRC companies must repatriate foreign currency payments received from abroad. Foreign-invested enterprises may retain foreign exchange in accounts with designated foreign exchange banks subject to a cap set by SAFE or its local office. Unless otherwise approved, domestic enterprises must convert all of their foreign currency proceeds into RMB.

On October 21, 2005, SAFE issued the Notice on Issues Relating to the Administration of Foreign Exchange in Fund-raising and Reverse Investment Activities of Domestic Residents Conducted via Offshore Special Purpose Companies, which became effective as of November 1, 2005. According to the notice, a special purpose company, or SPV, refers to an offshore company established or indirectly controlled by PRC residents for the special purpose of carrying out financing of their assets or equity interest in PRC domestic enterprises. Prior to establishing or assuming control of an SPV, each PRC resident, whether a natural or legal person, must complete the overseas investment foreign exchange registration procedures with the relevant local SAFE branch. The notice applies retroactively. As a result, PRC residents who have established or acquired control of these SPVs that previously made onshore investments in China were required to complete the relevant overseas investment foreign exchange registration procedures by March 31, 2006. These PRC residents must also amend the registration with the relevant SAFE branch in the following circumstances: (i) the PRC residents have completed the injection of equity investment or assets of a domestic company into the SPV; (ii) the overseas funding of the SPV has been completed; (iii) there is a material change in the capital of the SPV. Under the rules, failure to comply with the foreign exchange registration procedures may result in restrictions being imposed on the foreign exchange activities of the violator, including restrictions on the payment of dividends and other distributions to its offshore parent company, and may also subject the violators to penalties under the PRC foreign exchange administration regulations.

On August 29, 2008, SAFE promulgated Notice 142 which regulates the conversion by a foreign-funded enterprise of foreign currency into RMB by restricting how the converted RMB may be used. Notice 142 requires that RMB funds converted from the foreign currency capital of a foreign-funded enterprise may only be used for purposes within the business scope approved by the applicable governmental authority and may not be used for equity investments within the PRC unless specifically provided for otherwise. In addition, SAFE strengthened its supervision over the flow and use of RMB funds converted from the foreign currency capital of a foreign-funded enterprise. The use of such RMB capital may not be changed without SAFE's approval, and may not, in any case, be used to repay or prepay RMB loans if such loans are outstanding. Violations of Notice 142 will result in severe penalties, such as heavy fines as set out in the relevant foreign exchange control regulations.

E. Taxation.

The following is a general summary of certain material British Virgin Islands and U.S. federal income tax considerations. The discussion is not intended to be, nor should it be construed as, legal or tax advice to any existing or prospective shareholder. The discussion is based on laws and relevant interpretations thereof in effect as of the date hereof, all of which are subject to change or different interpretations, possibly with retroactive effect. The discussion does not address United States state or local tax laws, or tax laws of jurisdictions other than the British Virgin Islands and the United States.

Taxation in British Virgin Islands Taxation

The British Virgin Islands, or BVI, does not impose a tax on dividends paid by us to holders of our ordinary or preferred shares, nor does the BVI levy any capital gains or income taxes on us.

A holder of our ordinary or preferred shares who is not a resident of the BVI is exempt from the BVI income tax on dividends paid with respect to the ordinary or preferred shares. Holders of ordinary or preferred shares are not subject to the BVI income tax on gains realized on the sale or disposition of the ordinary or preferred shares.

Our ordinary and preferred shares are not subject to transfer taxes, stamp duties or similar charges in the BVI. However, as a business company, we are required to pay the BVI government an annual license fee based on the number of shares we are authorized to issue.

There is no income tax treaty or convention currently in effect between the United States and the BVI.

Taxation in China

We are a holding company incorporated in the BVI, which indirectly holds our equity interests in our PRC operating subsidiaries. The EIT Law and its implementation rules, both of which became effective as of January 1, 2008, provide that a PRC enterprise is subject to a standard income tax rate of 25%, and China-sourced income of foreign enterprises, such as dividends paid by a PRC subsidiary to its overseas parent, will normally be subject to PRC withholding tax at a rate of 10%, unless there are applicable treaties between the overseas parent's jurisdiction of incorporation and China to reduce such rate.

According to the Notice Regarding Interpretation and Recognition of Beneficial Owners under Tax Treaties, the term "beneficial owner" refers to a person who has the right to own and dispose of the income and the rights or properties generated from the said income. The "beneficial owner" may be an individual, a company or any other organization which is usually engaged in substantial business operations. A conduit company is not a "beneficial owner." The term "conduit company" refers to a company which is usually established for purposes of dodging or reducing taxes, and transferring or accumulating profits. Such a company is only registered in the country of domicile to satisfy the organizational form as required by law, but it does not engage in such substantial business operations as manufacturing, distribution and management.

Under the EIT Law, an enterprise established outside of China with “de facto management bodies” within China is considered a resident enterprise and will normally be subject to an EIT of 25% on its global income. The implementing rules define the term “de facto management bodies” as “an establishment that exercises, in substance, overall management and control over the production, business, personnel, accounting, etc., of a Chinese enterprise.”

It remains unclear whether the PRC tax authorities would require or permit our overseas registered entities to be treated as PRC resident enterprises. We do not currently consider our company to be a PRC resident enterprise. However, if the PRC tax authorities determine that we are a “resident enterprise” for PRC enterprise income tax purposes, a number of unfavorable PRC tax consequences could follow. First, we may be subject to the enterprise income tax at a rate of 25% on our worldwide taxable income as well as PRC enterprise income tax reporting obligations. In our case, this would mean that income such as interest on offering proceeds and non-China source income would be subject to PRC enterprise income tax at a rate of 25%. Second, although under the EIT Law and its implementing rules dividends paid to us from our PRC subsidiaries would qualify as “tax-exempt income,” we cannot guarantee that such dividends will not be subject to a 10% withholding tax, as the PRC foreign exchange control authorities, which enforce the withholding tax, have not yet issued guidance with respect to the processing of outbound remittances to entities that are treated as resident enterprises for PRC enterprise income tax purposes. Finally, it is possible that future guidance issued with respect to the new “resident enterprise” classification could result in a situation in which a 10% withholding tax is imposed on dividends we pay to our non-PRC shareholders and with respect to gains derived by our non-PRC shareholders from transferring our shares.

United States Federal Income Taxation

This discussion describes the material U.S. federal income tax consequences of the purchase, ownership and disposition of our ordinary shares. This discussion does not address any aspect of U.S. federal gift or estate tax, or the state, local or foreign tax consequences of an investment in our ordinary shares. This discussion applies to you only if you hold and beneficially own our ordinary shares as capital assets for tax purposes. This discussion does not apply to you if you are a member of a class of holders subject to special rules, such as:

- dealers in securities or currencies;
- traders in securities that elect to use a mark-to-market method of accounting for securities holdings;
- banks or other financial institutions;
- insurance companies;

tax-exempt organizations;

partnerships and other entities treated as partnerships for U.S. federal income tax purposes or persons holding ordinary shares through any such entities;

persons that hold ordinary shares as part of a hedge, straddle, constructive sale, conversion transaction or other integrated investment;

U.S. Holders (as defined below) whose functional currency for tax purposes is not the U.S. dollar;

persons liable for alternative minimum tax; or

persons who actually or constructively own 10% or more of the total combined voting power of all classes of our shares (including ordinary shares) entitled to vote.

This discussion is based on the U.S. Internal Revenue Code of 1986, as amended, which we refer to in this discussion as the Code, its legislative history, existing and proposed regulations promulgated there under, published rulings and court decisions, all as currently in effect. These laws are subject to change, possibly on a retroactive basis. In addition, this discussion relies on our assumptions regarding the value of our shares and the nature of our business over time.

You should consult your own tax advisor concerning the particular U.S. federal income tax consequences to you of the purchase, ownership and disposition of our ordinary shares, as well as the consequences to you arising under the laws of any other taxing jurisdiction.

For purposes of the U.S. federal income tax discussion below, you are a “U.S. Holder” if you beneficially own ordinary shares and are:

- a citizen or resident of the United States for U.S. federal income tax purposes;

- a corporation, or other entity taxable as a corporation, that was created or organized in or under the laws of the United States or any political subdivision thereof;

- an estate the income of which is subject to U.S. federal income tax regardless of its source; or

- a trust if (a) a court within the United States is able to exercise primary supervision over its administration and one or more U.S. persons have the authority to control all substantial decisions of the trust, or (b) the trust has a valid election in effect to be treated as a U.S. person.

If you are not a U.S. person, please refer to the discussion below under “Non-U.S. Holders.”

For U.S. federal income tax purposes, income earned through a foreign or domestic partnership or other flow-through entity is attributed to its owners. Accordingly, if a partnership or other flow-through entity holds ordinary shares, the tax treatment of the holder will generally depend on the status of the partner or other owner and the activities of the partnership or other flow-through entity.

U.S. Holders

Dividends on ordinary shares

Subject to the “Passive Foreign Investment Company” discussion below, if we make distributions and you are a U.S. Holder, the gross amount of any distributions you receive on your ordinary shares will generally be treated as dividend

income if the distributions are made from our current or accumulated earnings and profits, calculated according to U.S. federal income tax principles. Dividends will generally be subject to U.S. federal income tax as ordinary income on the day you actually or constructively receive such income. However, if you are an individual and have held your ordinary shares for a sufficient period of time, dividend distributions on our ordinary shares will generally constitute qualified dividend income taxed at a preferential rate as long as our ordinary shares continue to be readily tradable on the Nasdaq Global Select Market and certain other conditions apply. You should consult your own tax adviser as to the rate of tax that will apply to you with respect to dividend distributions, if any, you receive from us.

We do not intend to calculate our earnings and profits according to U.S. tax accounting principles. Accordingly, distributions on our ordinary shares, if any, will generally be taxed to you as dividend distributions for U.S. tax purposes. Even if you are a corporation, you will not be entitled to claim a dividends-received deduction with respect to distributions you receive from us. Dividends generally will constitute foreign source passive income for U.S. foreign tax credit limitation purposes.

Sales and other dispositions of ordinary shares

Subject to the “Passive Foreign Investment Company” discussion below, when you sell or otherwise dispose of ordinary shares, you will generally recognize capital gain or loss in an amount equal to the difference between the amount realized on the sale or other disposition and your adjusted tax basis in the ordinary shares, both as determined in U.S. dollars. Your adjusted tax basis will generally equal the amount you paid for the ordinary shares. Any gain or loss you recognize will be long-term capital gain or loss if your holding period in our ordinary shares is more than one year at the time of disposition. If you are an individual, any such long-term capital gain will be taxed at preferential rates. Your ability to deduct capital losses will be subject to various limitations.

Passive Foreign Investment Company

If we were a PFIC, in any taxable year in which you hold our ordinary shares, as a U.S. Holder, you would generally be subject to adverse U.S. tax consequences, in the form of increased tax liabilities and special U.S. tax reporting requirements.

We will be classified as a PFIC in any taxable year if either: (1) the average percentage value of our gross assets during the taxable year that produce passive income or are held for the production of passive income is at least 50% of the value of our total gross assets or (2) 75% or more of our gross income for the taxable year is passive income (such as certain dividends, interest or royalties). For purposes of the first test: (1) any cash, cash equivalents, and cash invested in short-term, interest-bearing debt instruments or bank deposits that is readily convertible into cash, will generally count as producing passive income or held for the production of passive income and (2) the average value of our gross assets is calculated based on our market capitalization. We will be treated as owning our proportionate share of the assets and earning our proportionate share of the income of any other corporation in which we own, directly or indirectly, 25% or more (by value) of the stock.

We believe that we were not a PFIC for the taxable year 2016. However, there can be no assurance that we will not be a PFIC for the taxable year 2016 and/or later taxable years, as PFIC status is re-tested each year and depends on the facts in such year. For example, we would be a PFIC for the taxable year 2016 if the sum of our average market capitalization, which is our share price multiplied by the total number of our outstanding shares, and our liabilities over that taxable year was not more than twice the value of our cash, cash equivalents, and other assets producing passive income or held for production of passive income. We could also be a PFIC for any taxable year if the gross income that we and our subsidiaries earn from passive investments is substantial in comparison with the gross income from our business operations.

If we were a PFIC, you would generally be subject to additional taxes and interest charges on certain “excess distributions” we make and on any gain realized on the disposition or deemed disposition of your ordinary shares, regardless of whether we continue to be a PFIC in the year in which you receive an “excess distribution” or dispose of or are deemed to dispose of your ordinary shares. Distributions in respect of your ordinary shares during a taxable year would generally constitute “excess distributions” if, in the aggregate, they exceed 125% of the average amount of distributions in respect of your ordinary shares over the three preceding taxable years or, if shorter, the portion of your holding period before such taxable year.

To compute the tax on “excess distributions” or any gain, (1) the “excess distribution” or the gain would be allocated ratably to each day in your holding period, (2) the amount allocated to the current year and any tax year before we became a PFIC would be taxed as ordinary income in the current year, (3) the amount allocated to other taxable years would be taxable at the highest applicable marginal rate in effect for that year, and (4) an interest charge at the rate for

underpayment of taxes for any period described under (3) above would be imposed with respect to any portion of the “excess distribution” or gain that is allocated to such period. In addition, if we were a PFIC, no distribution that you receive from us would qualify for taxation at the preferential rate discussed in the “Dividends on ordinary shares” section above.

If we were a PFIC in any year, and if you are a U.S. Holder, you would be required to make an annual return on IRS Form 8621 regarding your ordinary shares. However, we do not intend to generate, or share with you, information that you might need to properly complete IRS Form 8621. You should consult with your own tax adviser regarding reporting requirements with regard to your ordinary shares.

If we were a PFIC in any year, you would generally be able to avoid the “excess distribution” rules described above by making a timely so-called “mark-to-market” election with respect to your ordinary shares provided our ordinary shares are “marketable.” Our ordinary shares will be “marketable” as long as they remain regularly traded on the Nasdaq Global Select Market. If you made this election in a timely fashion, you would generally recognize as ordinary income or ordinary loss the difference between the fair market value of your ordinary shares on the first day of any taxable year and their value on the last day of that taxable year. Any ordinary income resulting from this election would generally be taxed as ordinary income rates and would not be eligible for the reduced rate of tax applicable to qualified dividend income. Any ordinary losses would be limited to the extent of the net amount of previously included income as a result of the mark-to-market election, if any. Your basis in the ordinary shares would be adjusted to reflect any such income or loss. You should consult with your own tax adviser regarding potential advantages and disadvantages to you of making a “mark-to-market” election with respect to your ordinary shares. Separately, if we were a PFIC in any year, you would be able to avoid the “excess distribution” rules by making a timely election to treat us as a so-called “Qualified Electing Fund”, or QEF. You would then generally be required to include in gross income for any taxable year (1) as ordinary income, your pro rata share of our ordinary earnings for the taxable year, and (2) as long-term capital gain, your pro rata share of our net capital gain for the taxable year. However, we do not intend to provide you with the information you would need to make or maintain a QEF election and you will, therefore, not be able to make or maintain such an election with respect to your ordinary shares.

Non-U.S. Holders

If you beneficially own ordinary shares and are not a U.S. Holder for U.S. federal income tax purposes, or a Non-U.S. Holder, you generally will not be subject to U.S. federal income tax or withholding on dividends received from us with respect to ordinary shares unless that income is considered effectively connected with your conduct of a U.S. trade or business and, if an applicable income tax treaty so requires, as a condition for you to be subject to U.S. federal income tax with respect to income from your ordinary shares, such dividends are attributable to a permanent establishment that you maintain in the United States. You generally will not be subject to U.S. federal income tax, including withholding, on any gain realized upon the sale or exchange of ordinary shares, unless:

that gain is effectively connected with the conduct of a U.S. trade or business and, if an applicable income tax treaty so requires as a condition for you to be subject to U.S. federal income tax with respect to income from your ordinary shares, such gain is attributable to a permanent establishment that you maintain in the United States; or

you are a nonresident alien individual and are present in the United States for at least 183 days in the taxable year of the sale or other disposition and either (1) your gain is attributable to an office or other fixed place of business that you maintain in the United States or (2) you have a tax home in the United States.

If you are engaged in a U.S. trade or business, unless an applicable tax treaty provides otherwise, the income from your ordinary shares, including dividends and the gain from the disposition of ordinary shares, that is effectively connected with the conduct of that trade or business will generally be subject to the rules applicable to U.S. Holders

discussed above. In addition, if you are a corporation, you may be subject to an additional branch profits tax at a rate of 30% or any lower rate under an applicable tax treaty.

U.S. information reporting and backup withholding rules

In general, dividend payments with respect to the ordinary shares and the proceeds received on the sale or other disposition of those ordinary shares may be subject to information reporting to the IRS and to backup withholding (currently imposed at a rate of 28%). Backup withholding will not apply, however, if you (1) are a corporation or come within certain other exempt categories and, when required, can demonstrate that fact or (2) provide a taxpayer identification number, to certify as to no loss of exemption from backup withholding and otherwise comply with the applicable backup withholding rules. To establish your status as an exempt person, you will generally be required to provide certification on IRS Form W-9, W-8BEN or W-8ECI, as applicable. Any amounts withheld from payments to you under the backup withholding rules will be allowed as a refund or a credit against your U.S. federal income tax liability, provide that you furnish the required information to the IRS.

HOLDERS OF OUR ORDINARY SHARES SHOULD CONSULT WITH THEIR OWN TAX ADVISORS REGARDING THE APPLICATION OF THE U.S. FEDERAL INCOME TAX LAWS TO THEIR PARTICULAR SITUATIONS AS WELL AS ANY TAX CONSEQUENCES RESULTING FROM PURCHASING, HOLDING OR DISPOSING OF THE ORDINARY SHARES, INCLUDING THE APPLICABILITY AND EFFECT OF THE TAX LAWS OF ANY STATE, LOCAL OR FOREIGN JURISDICTION AND INCLUDING ESTATE, GIFT, AND INHERITANCE LAWS.

F. Dividends and paying agents.

Not applicable.

G. Statement by experts.

Not applicable.

H. Documents on display.

We have filed this Annual Report on Form 20-F with the SEC under the Securities Exchange Act of 1934, as amended, or the Exchange Act. Statements made in this Annual Report as to the contents of any document referred to are not necessarily complete. With respect to each such document filed as an exhibit to this Annual Report, reference is made to the exhibit for a more complete description of the matter involved, and each such statement shall be deemed qualified in its entirety by such reference.

We are subject to the informational requirements of the Exchange Act as a foreign private issuer and file reports and other information with the SEC. Reports and other information filed by us with the SEC, including this Annual Report on Form 20-F, may be inspected and copied at the public reference room of the SEC at 450 Fifth Street N.W. Washington D.C. 20549.

You can also obtain copies of this Annual Report on Form 20-F by mail from the Public Reference Section of the SEC, 450 Fifth Street, N.W., Washington D.C. 20549, at prescribed rates. Additionally, copies of this material may be obtained from the SEC's Internet site at <http://www.sec.gov>. The SEC's telephone number is 1-800-SEC-0330.

I. Subsidiaries information.

See Item 4. "Information on the Company, Subpart C – Organizational Structure."

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest rate risk

Our significant interest-bearing financial liabilities are bank borrowings. Short-term and long-term borrowings account for 47% and 53%, respectively, of total borrowings as of September 30, 2017. Short-term borrowings will mature at various dates within the year ending September 30, 2017, which does not expose us to interest rate risk. Our interest rate risk arises primarily from long-term borrowings. During the year ended September 30, 2017, all of our long-term borrowings were issued at variable rates, hence exposing us to cash flow interest rate risk which is partially offset by cash held at variable rates.

Our exposure to market rate risk for changes in interest rates also relates to the interest income generated by excess cash invested in short term money market accounts and certificates of deposit. We have not used derivative financial instruments in our investment portfolio. Interest earning instruments carry a degree of interest rate risk. We have not been exposed nor do we anticipate being exposed to material risks due to changes in interest rates. However, our future interest income may fall short of expectations due to changes in interest rates.

Foreign currency risk

Substantially all our revenues and expenses are denominated in Renminbi and a substantial portion of our cash is kept in Renminbi, but a portion of our cash is also kept in U.S. dollars. Although we believe that, in general, our exposure to foreign exchange risks should be limited, the value of our shares will be affected by the foreign exchange rate between U.S. dollars and Renminbi. For example, to the extent that we need to convert U.S. dollars into Renminbi for our operational needs and the Renminbi appreciate against the U.S. dollar at that time, our financial position and the price of our shares may be adversely affected. Conversely, if we decide to convert our Renminbi into U.S. dollars for the purpose of declaring dividends on our shares or otherwise and the U.S. dollar appreciates against the Renminbi, the U.S. dollar equivalent of our earnings in China would be reduced.

We have recorded RMB7.6 million (US\$1.5 million) of foreign exchange gain in our net income for the twelve months ended September 30, 2017, due to fluctuations in the currency exchange rate. The PRC government may further readjust the current rate at which Renminbi-U.S. dollar exchanges are exchanged, as well as re-evaluate its policy of using a fixed-rate regime to a basket of currencies govern foreign currency transactions, although the PRC government has not committed itself to take any such action currently. Since we have not engaged in any hedging activities, we may experience economic loss as a result of any foreign currency exchange rate fluctuations.

Inflation

In recent years, China has not experienced significant inflation, and thus inflation has not had a significant effect on our business during the past three years. According to the China Statistical Bureau, China's overall national inflation rate, as represented by the general consumer price index, was approximately 1.6%, 1.9% and 1.5% in the fiscal year ended September 30, 2015, 2016 and 2017 respectively. Sustained or increased inflation in China could have an adverse impact on China's economy, which could affect demand for our products or services or increase our cost of services or operating expenses. As we have not previously operated during a period of significant inflation, we cannot predict with confidence the effect that such inflation may have on our business.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not Applicable.

PART II

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

Not Applicable.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

The rights of securities holders have not been materially changed during the period covered by this Annual Report.

ITEM 15. CONTROLS AND PROCEDURES

(a) *Disclosure Controls and Procedures:* As of September 30, 2017 (the “Evaluation Date”), the Company conducted an evaluation (under the supervision and participation of the Company’s management including the Chief Executive Officer and the Chief Financial Officer, pursuant to Rule 13a-15 promulgated under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) of the effectiveness of the design and operation of the Company's disclosure controls and procedures. We concluded that the Company’s disclosure controls and procedures as of September 30, 2017 were ineffective as management has identified a material weakness which is detailed in the accompanying Item 15(b), *Report of Origin’s Management on Internal Control over Financial Reporting*.

(b) *Report of Origin’s Management on Internal Control over Financial Reporting:* Origin’s Board of Directors and management are responsible for establishing and maintaining adequate internal control over financial reporting. The Company’s internal control system is designed to provide reasonable assurance to the Company’s management and Board of Directors regarding the reliability of financial reporting and the preparation and fair presentation of its published consolidated financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective may not provide or detect misstatements and can only provide reasonable assurances with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Origin's management assessed the effectiveness of the Company's internal control over financial reporting as of September 30, 2017. In making this assessment, it used the criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on the evaluation under these criteria, the management identified a material weakness in the Company's internal control over financial statement closing process, and as a result, management concluded that the Company's internal control over financial reporting was not effective as of September 30, 2017.

Management is aware of the following material weakness in internal control over financial reporting:

Lack of sufficient qualified financial reporting and accounting personnel with an appropriate level of expertise to properly address complex accounting issues under U.S. GAAP, and to prepare and review our consolidated financial statements and related disclosures to fulfill U.S. GAAP and Securities and Exchange Commission financial reporting requirements on a timely basis, resulted from high staff turnover during the fiscal year 2017. During the course of the audit for fiscal year 2017, BDO China Shu Lun Pan Certified Public Accountants LLP, our independent registered public accounting firm, has corrected the misstatements relating to accounts and disclosures, in aggregate, material to the consolidated financial statements for the year ended September 30, 2017.

Management has plans to address these identified issues by seeking to expand its accounting staff to address the issues related to internal controls over financial reporting, under the leadership of the new Chief Financial Officer. Additionally, under the leadership of the new Chief Financial Officer, the existing controls and procedures will be reviewed and steps will be taken to return the financial reporting to its former efficiencies using the reviewed controls and procedures. There is no assurance, however, that the Company will have a full complement of accounting personnel to provide for a complete level of risk management for a public company given the restrictions on capital and the smaller size of the Company operations. Management will monitor its controls and procedures periodically to evaluate this situation and report to the registered public accounting firm to the Company about this condition.

(c) Report of Independent Registered Public Accounting Firm

This annual report does not include an attestation report of the company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT.

The board of directors believes that Mr. Weibin Yan, a member of our Audit Committee, meets the criteria for an “audit committee financial expert” as established by the SEC and is an independent director.

Mr. Yan will not be deemed an “expert” for any purpose, including, without limitation, for purposes of Section 11 of the Securities Act of 1933, as amended, as a result of being designated or identified as an audit committee financial expert. The designation or identification of Mr. Yan as an audit committee financial expert does not impose on him any duties, obligations or liability that are greater than the duties, obligations and liability imposed on him as a member of our Audit Committee and board of directors in the absence of such designation or identification. The designation or identification of Mr. Yan as an audit committee financial expert does not affect the duties, obligations or liability of any other member of our Audit Committee or board of directors, and Mr. Yan is determined to be independent directors.

ITEM 16B. CODE OF ETHICS.

On January 18, 2007, our board of directors adopted a code of ethics for senior executive and financial officers, including our chief executive officer and our principal financial officer (i) to promote the honest and ethical conduct of our senior executive and financial officers, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships, (ii) to promote full, fair, accurate, timely and understandable disclosure in periodic reports required to be filed with or submitted to the SEC and in other public communications by us; (iii) to promote compliance with all applicable laws, rules and regulations that apply to us and our senior executive and financial officers; (iv) to deter wrongdoing; and (v) to promote prompt internal reporting of breaches of, and accountability for adherence to, this code. A copy of the code of ethics is filed as an exhibit to this Annual Report by incorporation by reference.

On January 18, 2007, our board of directors also adopted a code of conduct for our employees, including directors and officers. The purpose of this code of conduct is to provide a summary of certain of our key policies and procedures and to help ensure lawful and ethical conduct. A copy of the code of conduct is filed as an exhibit to this Annual Report by incorporation by reference.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

(a) Audit Fees.

The aggregate fees billed for professional services rendered by BDO China Shu Lun Pan Certified Public Accountants LLP in connection with the audit of the consolidated financial statements for the fiscal year ended September 30, 2017, and for the audits of internal controls over financial reporting and the consolidated financial statements as of and for the fiscal years ended September 30, 2016 were RMB2.0 million (US\$0.3 million) and RMB2.0 million, respectively.

(b) Audit - Related Fees.

The aggregate fees billed for professional services rendered by BDO China Shu Lun Pan Certified Public Accountants LLP for the performance of agreed-upon procedures on the quarterly financial statements during the year ended September 30, 2017 and 2016 were RMB0.19 million (US\$0.03 million) and RMB 0.19 million, respectively. We also incurred fees of RMB0.53 million (US\$0.08 million) during the year ended September 30, 2017 to BDO China Shu Lun Pan Certified Public Accountants LLP for their consent to incorporation by reference to the prior years' auditors' reports in our Registration Statement on Form F-3 and agreed-upon procedures on the financial information in the proxy statement for the use at the extraordinary general meeting of shareholders held on April 13, 2017.

(c) Tax Fees.

We did not enter into any engagement during the fiscal years ended September 30, 2017 or 2016 for professional services rendered by our principal accountant for tax compliance, tax advice or tax planning.

(d) All Other Fees.

No fees were billed in either of the last two fiscal years for products and services provided by our principal accountant, other than the services reported in paragraphs (a) through (b) of this Item 16C for the fiscal year ended September 30, 2017 and 2016.

(e) Audit Committee Pre-Approval Policies and Procedures.

Our Audit Committee pre-approves all auditing services and permitted non-audit services to be performed for us by our independent auditor, including the fees and terms thereof (subject to the de minimis exceptions for non-audit services described in Section 10A(i)(1)(B) of the Exchange Act that are approved by our Audit Committee prior to the completion of the audit).

(f) Not applicable.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES.

We have been granted an exemption from the applicable listing standards for the Audit Committee of our board of directors. See Item 6, Subpart C – Summary of Significant Differences in Corporate Governance Procedures for an explanation of the exemptions from the listing standards of The Nasdaq Stock Market listing standards that apply to the company as a foreign private issuer.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS.

None.

ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT.

Not Applicable.

ITEM 16G. CORPORATE GOVERNANCE.

As a foreign private issuer ("FPI") whose securities are listed on the Nasdaq Global Market, we are permitted to follow certain home country corporate governance practices instead of the requirements of the Nasdaq Marketplace Rules (the "Nasdaq Rules") pursuant to Nasdaq Rule 5615, which provides for an exemption from compliance with the Nasdaq Rule 5600 Series. We have provided to Nasdaq the necessary documentation to afford the Company these exemptions. See Item 6, Subpart C – Summary of Significant Differences in Corporate Governance Procedures for purposes of Rule 5615 of the Nasdaq Marketplace Rules.

PART III

ITEM 17. FINANCIAL STATEMENTS

We have provided financial statements pursuant to Item 18.

ITEM 18. FINANCIAL STATEMENTS

The following financial statements are filed as part of this annual report on Form 20-F.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Origin Agritech Limited

We have audited the accompanying consolidated balance sheets of Origin Agritech Limited and its subsidiaries and variable interest entities (the “Company”) as of September 30, 2016 and 2017 and the related consolidated statements of income and comprehensive income, equity and cash flows for the years ended September 30, 2015, 2016 and 2017. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company as of September 30, 2016 and 2017, and the results of its operations and its cash flows for the years ended September 30, 2015, 2016 and 2017, in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As described in Note 2 to the consolidated financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to this matter are also described in Note 2. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

ORIGIN AGRITECH LIMITED**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017****(In thousands, except number of share, per share data and unless otherwise stated)****1. ORGANIZATION AND PRINCIPAL ACTIVITIES**

Origin Agritech Limited (“Agritech”), incorporated under the laws of the British Virgin Islands, and its subsidiaries and variable interest entities are referred to in this report as “we”, “us”, “our”, or “the Company”. We are principally engaged in hybrid crop seed development, production and distribution business.

On September 26, 2016, we entered into a Master Transaction Agreement with Beijing Shihui Agricultural Development Co., Ltd. (“Beijing Shihui” or the “Buyer”, a related party being controlled by close family members of the Company’s Chairman), formerly known as Beijing Shihui Agricultural Ltd., under which the Buyer agreed to purchase the corn seed production and distribution assets, the office building in Beijing, China, and generally the business of commercial corn seed production and sales now operated by the Company. On July 31, 2017, we completed the sale of 100% equity ownership interest in Changchun Origin Seed Technology Development Limited (“Changchun Origin”), 98.58% equity ownership interest in Denong Zhengcheng Seed Limited (“Denong”), 100% equity ownership interest in Linze Origin Seed Limited and Linze Branch of Beijing Origin Seed Limited (“Linze Origin”). On August 31, 2017, we transferred the control of Zhengzhou Branch of Beijing Origin Seed Limited (“Zhengzhou Branch”) to Beijing Shihui pursuant to a Management Agreement. For additional information, see note 4 - Discontinued Operations.

As of September 30, 2017, the Company’s subsidiaries and variable interest entities included in continuing operations consisted of the following:

Name	Date of Incorporation or Establishment	Place of Incorporation or Establishment	Percentage of Ownership	Principal Activity
Subsidiaries:				
State Harvest Holdings Limited (“State Harvest”)	October 6, 2004	British Virgin Islands	100	% Investment Holding
Beijing Origin State Harvest Biotechnology Limited	December 1, 2004	People’s Republic of China (“PRC”)	100	% Hybrid seed technology development

(“BioTech”)

Origin Agritech USA LLC (“Origin USA”)	August 12, 2016	United States of America (“USA”)	100	%	Hybrid seed technology development
Variable interest entity:					
Beijing Origin Seed Limited (note (i)) (“Beijing Origin”)	December 26, 1997	PRC	-		Hybrid crop seed development, production and Distribution
Subsidiaries held by Beijing Origin:					
Henan Origin Cotton Technology Development Limited (note (i)) (“Henan Cotton”)	March 2, 2001	PRC	92.04	%	Hybrid crop seed development, production and distribution
Xinjiang Originbo Seed Company Limited (note (i)) (“Xinjiang Origin”)	July 13, 2011	PRC	51	%	Hybrid crop seed development, production and distribution

Note (i): Beijing Origin Seed Limited, Henan Origin Cotton Technology Development Limited, and Xinjiang Originbo Seed Company Limited are collectively referred to as “Beijing Origin”.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

Reorganization of State Harvest prior to the share exchange transaction with Chardan China Acquisition Corp. (“Chardan”)

On December 1, 2004, State Harvest established BioTech, a wholly-owned foreign enterprise (“WFOE”) under the laws of the PRC with an operating period of 20 years.

Under PRC law, foreign entities are not currently permitted to own more than 49% of a seed production company. In order to address those restrictions, State Harvest conducts substantially all of its business through contractual agreements with its variable interest entity (“VIE”), Beijing Origin. These agreements are summarized in the following paragraphs.

Stock Consignment Agreements

As discussed above in “Foreign Ownership Restrictions,” under Chinese law, foreign ownership of businesses engaged in the breeding of new varieties, development, production, marketing, distribution and sale of hybrid food crop seeds is limited to 49% pursuant to the Regulation on the Approval and Registration of Foreign Investment Enterprises in Agricultural Seed Industry and The Foreign Investment Industrial Guidance Catalogue. State Harvest, as a non-Chinese corporation, may not directly own more than 49% of any of the PRC Operating Companies. However, Chinese law does not forbid the owner of stock to consign rights associated with the stock, as long as the owner does not transfer title to the stock. To gain control over the PRC Operating Companies, State Harvest entered into a series of stock consignment agreements with shareholders of those companies.

State Harvest has been assigned 97.96% voting rights by the shareholders of Beijing Origin through a consignment agreement which includes the following terms: (1) The shares of Beijing Origin cannot be transferred without the approval of State Harvest; (2) State Harvest has the right to appoint all directors and senior management personnel of Beijing Origin and (3) The shareholder rights including voting rights require the transfer of the shares of Beijing Origin to State Harvest or any party designated by State Harvest within three years upon the removal of the PRC legal

restriction.

Technical Service Agreements

Beijing Origin entered into Technical Service Agreements with BioTech dated December 25, 2004. Under these agreements, BioTech shall provide, with its own technical research resource and team, technical services for the production and distribution of agricultural seeds during the period of the agreements. In return, Beijing Origin is required to pay BioTech service fee calculated according to the weight of corn, rice and cotton seeds sold by the Beijing Origin.

Through the contractual agreements described above, State Harvest is deemed the sole beneficiary of Beijing Origin resulting in Beijing Origin being deemed a subsidiary of State Harvest under the requirements of Financial Accounting Standards Board (“FASB”) Accounting Standard Codification (“ASC”) 810-10-05. The agreements described above provided for effective control of Beijing Origin to be transferred to State Harvest at December 25, 2004. Neither State Harvest nor BioTech had any operating activity prior to entering into the consignment agreements with Beijing Origin. In substance, State Harvest has substantially all the same shareholders of Beijing Origin. This transaction has been accounted for on a basis similar to reorganization between entities under common control. Accordingly, State Harvest’s consolidated financial statements are prepared by including the consolidated financial statements of Beijing Origin through December 24, 2004, and subsequently the Company’s consolidated financial statements include the financial statements of State Harvest, its majority owned subsidiary and Beijing Origin through the date of the Share Exchange Transaction.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

Risks in relation to the VIE structure

Three of our PRC operating subsidiaries are controlled subsidiaries through stock consignment agreements rather than by direct ownership of shares, the terms of which may have to be enforced, which would require us to incur extra costs, create uncertainty as to ownership of the operating businesses involved and risk the possible loss of rights. There is the risk, however, that a consigning shareholder will not fulfill its obligations under the stock consignment agreement. In that event, we may need to resort to the PRC courts to have our rights under the applicable agreement enforced. Such enforcement will cause us to incur legal expenses. In addition, while a case is pending there will be uncertainty regarding our rights as to the three PRC operating subsidiaries involved. In addition, a PRC court may decide not to enforce the agreements in whole or in part. To the extent these agreements are neither observed nor enforced as intended, the PRC operating subsidiaries will not be controlled by us as intended, which will affect our enterprise value and restrict our ability to obtain the income and other rights of ownership associated with the consigned stock. It may also prevent the consolidation of our financial statements with the PRC operating subsidiaries, which would reduce the reported earnings of the consolidated companies. The uncertainty of ownership may also adversely affect the market value of our ordinary shares.

Whether or not a stock consignment agreement is terminated depends on the consensus of our Board and the consignees. Any such termination could result in a possible loss of certain rights or assets held by us without receiving fair value in return. The stock consignment agreements relating to our control of the stock of our PRC operating subsidiaries may be terminated after three years upon mutual agreement between us and the consignees. Holding this amount of stock will allow these officers to control or greatly influence the selection of directors and matters submitted to a vote of our shareholders, including voting to terminate the stock consignment agreements.

There are corporate protections in place designed to protect our interests, such as an independent Board of Directors, an audit committee comprised of independent directors that must approve insider transactions, a code of conduct requiring fair dealing with the Company, and the British Virgin Islands statutory provision that a disposition of more than 50% of the assets of a company must be approved by a majority of the shareholders. Moreover, if consigned stock is transferred to us as provided in the stock consignment agreements when the restrictions under PRC law are lifted, that stock will no longer be subject to the stock consignment agreements, and the termination of the stock consignment agreements would then have no effect on the ownership of that stock. However, if the stock consignment agreements are terminated, then we would lose our rights with respect to the consigned stock and the profits from the

issuing corporation. Such a loss would impair the value of the Company and would reduce our ability to generate revenues.

The Company has aggregated the financial information of Beijing Origin and its subsidiaries in the table below. The aggregated carrying amount of assets and liabilities of Beijing Origin and its subsidiaries after elimination of intercompany transactions and balances consolidated in the Company's consolidated balance sheets as of September 30, 2016 and 2017 are as follows:

Other payables and accrued expenses	39,221	30,454	4,589
Current liabilities of discontinued operations	428,780	31,041	4,677
Total current liabilities	593,913	123,450	18,601
Long-term borrowings	20,000	56,769	8,554
Other long-term liability	19,426	20,468	3,084
Non-current liabilities of discontinued operations	8,080	-	-
Total liabilities	641,419	200,687	30,239

As of September 30, 2016 and 2017, consolidated assets of RMB247,231 and RMB 42,979, respectively, are collateral for the VIE's obligations. These consolidated assets consisted of land use right of RMB17,867, and RMB 13,648, plant and equipment of RMB192,928 and RMB 29,331 and inventory of RMB 36,436 and nil as of September 30, 2016 and 2017, respectively.

The consolidated revenues of the Company generated from the VIE and its subsidiaries for the year ended September 30, 2015, 2016 and 2017 are 99.92%, 99.86% and 100.00%, of the total revenues respectively which are reported in discontinued operations. The VIE and its subsidiaries also account for 98.95% and 96.43% of the total assets of the Company as at September 30, 2016 and 2017, respectively.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of consolidation

The consolidated financial statements of the Company are prepared in accordance with accounting principles generally accepted in the United States of America ("US GAAP"); include the assets, liabilities, revenues, expenses and cash flows of all subsidiaries and variable interest entities. Intercompany balances, transactions and cash flows are eliminated on consolidation.

Liquidity and Going Concern

The Company incurred net losses of RMB17,814, RMB76,833 and RMB106,261 in the years ended September 30, 2015, 2016 and 2017, respectively. Working capital deficit was RMB136,398 and RMB45,045 as of September 30, 2016 and 2017, respectively. Accumulated deficit was RMB182,386 and RMB258,060 as of September 30, 2016 and 2017, respectively. The recurring losses from operations and net capital deficiency raise substantial doubt concerning the Company's ability to continue as a going concern for a reasonable period of time.

On September 26, 2016, the Company entered into a Master Transaction Agreement with Beijing Shihui, pursuant to which, the Buyer agreed to purchase the business of commercial corn seed production and sales operated by the Company for an aggregate purchase price of RMB400,000. See note 4 for further details. The aggregate purchase price was increased to RMB421,000 as amended by a Supplemental Agreement effective August 16, 2017. Total cash consideration after offsetting certain payables to the Buyers and deducting certain bank loans from the aggregate purchase price amounted to RMB129,000. As of the date of this report, the Company has received cash of RMB64,040. The remaining cash balance of RMB64,960 will be received upon the Second Closing (defined in note 4) pursuant to the Supplemental agreement. The Company expects the Second Closing will be completed in fiscal year ended 2018.

On July 5, 2017, the Company entered into an equity purchase agreement (the “Equity Purchase Agreement”) with L2 Capital, LLC. Upon the terms and subject to the conditions thereof, L2 Capital, LLC is committed to purchase that number of ordinary shares of the Company equal to an aggregate market price of up to US\$4,500. See note 19 for further details. Commencing on the date on which a registration statement registering the ordinary shares to be purchased becomes effective, the Company may sell its ordinary shares to L2 Capital, LLC subject to other limitation. The Company is currently preparing the registration statement and expects the registration statement will be filed and become effective during the fiscal year of 2018.

On December 21, 2017, the Company entered into a Property Transfer Agreement with Liaoning Agricultural Chemicals, Ltd to sell its office building and land use right in Shenyang for a total purchase price of RMB16,800. The Company has received 100% of the total purchase price as of the date of this report.

Besides the expected cash inflows from the aforementioned existing agreements, the Company is also seeking funds from other resources including but not limited to licensing its cord seed traits to its customers, applying for government grants for research and development activities, pursuing other capital investment from investors and selling certain company assets. The Company consistently reviews its working capital requirements and has also taken steps to reduce expenses. The Company has closed down the office of Origin USA and cut down the related personnel and administrative costs. The Company is also currently working with certain vendors and creditors to extend repayment terms.

Despite the Company’s effort to obtain additional funding and reduce operating costs, there is no assurance that the Company’s plans and actions will be successful. In addition, there can be no assurance that in the event additional sources of funds are needed they will be available on acceptable terms, if at all. The Company’s consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and liquidation of liabilities during the normal course of operations.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

Convenience translation into United States dollars

The consolidated financial statements are presented in Renminbi. The translation of Renminbi amounts into United States dollar amounts has been made for the convenience of the reader and has been made at the exchange rate quoted by the middle rate by the State Administration of Foreign Exchange in China on September 30, 2017 of RMB 6.6369 to US \$1.00. Such translation amounts should not be construed as representations that the Renminbi amounts could be readily converted into United States dollar amounts at that rate or any other rate.

Use of estimates

The preparation of the consolidated financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates are adjusted to reflect actual experience when necessary. Significant accounting estimates reflected in the Company's consolidated financial statements include inventory valuation, account receivable valuation, useful lives of plant and equipment and acquired intangible assets, the valuation allowance for deferred income tax assets, valuation of long-lived assets and share-based compensation expense. Actual results could differ from those estimates.

Cash and cash equivalents

Cash and cash equivalents consist of cash on hand, cash accounts, interest bearing savings accounts, time certificates of deposit and debt securities with a maturities of three months or less when purchased.

Inventories

Inventories are stated at the lower of cost, determined by weighted-average method, or net realizable value. Work-in-progress and finished goods inventories consist of raw materials, direct labor and overhead associated with the manufacturing process. The Company's commercial seed inventories are reported in discontinued operations. Parent seed represents the seeds that are used for research and development activities.

The Company periodically performs an analysis of inventory to determine obsolete or slow-moving inventory and determine if its cost exceeds the estimated market value. Write down of potentially obsolete or slow-moving inventory are recorded based on management's analysis of inventory levels.

Land use rights, net

Land use rights are recorded at cost less accumulated amortization. Amortization is provided over the term of the land use right agreements on a straight-line basis for the beneficial period.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

Plant and equipment, net

Plant and equipment are recorded at cost less accumulated depreciation and amortization. Maintenance and repairs are charged to expense as incurred. Depreciation is calculated on a straight-line basis over the following estimated useful lives:

Plant and building	20-40 years
Machinery and equipment	10-15 years
Furniture and office equipment	5-8 years
Motor vehicles	5-10 years
Leasehold improvements	Shorter of the useful lives or the lease term

The Company constructs certain of its facilities. In addition to costs under construction contracts, external costs directly related to the construction of such facilities, including duty and tariff, and equipment installation and shipping costs, are capitalized. Depreciation is recorded at the time assets are placed in service.

Leases

Leases are classified at the inception date as either a capital lease or an operating lease. For the lessee, a lease is a capital lease if any of the following conditions exist: a) ownership is transferred to the lessee by the end of the lease term, b) there is a bargain purchase option, c) the lease term is at least 75% of the property's estimated remaining economic life or d) the present value of the minimum lease payments at the beginning of the lease term is 90% or more of the fair value of the leased property to the lessor at the inception date. A capital lease is accounted for as if there was an acquisition of an asset and an incurrence of an obligation at the inception of the lease. All other leases are accounted for as operating leases. The Company has no capital leases for any of the periods presented.

Acquired intangible assets, net

Acquired intangible assets primarily consist of purchased technology rights and distribution network and are stated at cost less accumulated amortization. Amortization is calculated on a straight-line basis over the estimated useful lives of these assets and recorded in operating expenses. Amortization is calculated on a straight-line basis over the following estimated useful lives for the main acquired intangible assets:

Technology rights for licensed seeds	3-20 years
Distribution network	6-14 years
Trademark	Indefinite

Trademarks, which have indefinite lives are not amortized but are reviewed for impairment at least annually, at year end date, or earlier upon the occurrence of certain triggering events.

Equity investments

Equity method investment is accounted for using the equity method whereby they are initially recognized at cost and thereafter, their carrying amount are adjusted for the Company's share of the post-acquisition change in the net assets of equity method investments less impairment losses, if any. The dividend received was accounted for as a reduction in equity investments.

Cost method investment is stated at cost less impairment loss, if any.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

Valuation of long-lived asset

The Company reviews the carrying value of long-lived assets to be held and used, including other intangible assets subject to amortization, when events and circumstances warrants such a review. The carrying value of a long-lived asset is considered impaired when the anticipated undiscounted cash flow from such asset is separately identifiable and is less than its carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset and intangible assets. Fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved. Losses on long-lived assets and intangible assets to be disposed are determined in a similar manner, except that fair market values are reduced for the cost to dispose. The Company has performed an impairment analysis on the plant and equipment in Xinjiang Origin and recorded an impairment loss of RMB 25,873. The impairment loss was reported in discontinued operations. See note 4 for details.

Revenue recognition

The Company derives its revenues primarily from the sale of various branded conventional seeds and branded seeds with biotechnology traits.

Revenue is recognized when pervasive evidence of an arrangement exists, products have been delivered, the price is fixed or determinable, collectability is reasonably assured and the right of return has expired. The Company generally determines the final selling price after a period the goods are delivered to the customers. Accordingly, the Company defers revenues recognition until the selling price has been finalized with the customers. The estimated amounts of revenues billed in excess of revenues recognized are recorded as deferred revenues. Revenue generated from seed production and distribution business is reported in discontinued operations.

Government subsidies

A government subsidy is not recognized until there is reasonable assurance that: (a) the enterprise will comply with the conditions attached to the grant; and (b) the grant will be received.

When the Company received the government subsidies but the conditions attached to the grants have not been fulfilled, such government subsidies are deferred and recorded under other payables and accrued expenses, and other long-term liability. The reclassification of short-term or long-term liabilities is depended on the management's expectation of when the conditions attached to the grant can be fulfilled.

The Company received several financial supports from various levels of the government. At fiscal years ended 2016 and 2017, the Company received government subsidies of RMB10,368 and RMB2,660, respectively for R&D and others. Government subsidies recognized as other income in the statement of income for the years ended September 30, 2015, 2016 and 2017, were RMB4, 631, RMB3, 688 and RMB1,407, respectively.

Cost of revenues

Cost of revenues consists of expenses directly related to sales, including the purchase prices and development costs for seeds and, during the fiscal years ended September 30, 2015, 2016 and 2017, agricultural chemical products, depreciation and amortization, impairment of inventory, shipping and handling costs, salary and compensation, supplies, license fees, and rent. Cost of revenue related to commercial seed production and distribution business is reported in discontinued operations.

Research and development costs

Research and development costs relating to the development of new products and processes, including significant improvements and refinements to existing products, are expensed as incurred.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

Advertising costs

Advertising costs are expensed when incurred and included in selling and marketing expenses. For the years ended September 30, 2015, 2016 and 2017, advertising costs were RMB919, RMB3,237 and RMB521, respectively.

Shipping and handling cost

The Company includes shipping and handling costs as either cost of goods sold or selling and administrative expenses depending on the nature of the expenses. Shipping and handling costs which relate to transportation of products to customers' locations is charged to selling and marketing expenses and shipping and handling which relate to the transportation of goods to factories from suppliers and from one factory to another is charged to cost of revenues.

For the years ended September 30, 2015, 2016 and 2017, shipping and handling cost included in selling and marketing expenses were RMB44, RMB2,055, and RMB1,604, respectively.

Borrowing cost

Borrowing costs attributable directly to the acquisition, construction or production of qualifying assets which require a substantial period of time to be ready for their intended use or sale, are capitalized as part of the cost of those assets. Income earned on temporary investments of specific borrowings pending their expenditure on those assets is deducted from borrowing costs capitalized. All other borrowing costs are recognized in interest expenses in the statement of income and comprehensive income in the period in which they are incurred.

Allowance for doubtful account

The Company regularly monitors and assesses the risk of not collecting amounts owed to the Company by customers. This evaluation is based upon a variety of factors including: an analysis of amounts current and past due along with relevant history and facts particular to the customer. Based on the result of this analysis, the Company records an allowance for doubtful accounts.

Income taxes

Deferred income taxes are recognized for the future tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts in the consolidated financial statements, net of operating loss carry forwards and credits. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Current income taxes are provided for in accordance with the laws of the relevant tax authorities.

The Company adopted FASB ASC 740-10. The Company's policy on classification of all interest and penalties related to unrecognized tax benefits, if any, as a component of income tax provisions.

Foreign currency translation

The functional currency of the Company excluding Agritech, Origin USA and State Harvest is Renminbi. Monetary assets and liabilities denominated in currencies other than Renminbi are translated into Renminbi at the rates of exchange ruling at the balance sheet date. Transactions in currencies other than Renminbi are converted into Renminbi at the applicable rates of exchange prevailing the transactions occurred. Transaction gains and losses are recognized in the consolidated statements of income and comprehensive income.

The functional currency of Agritech, Origin USA and State Harvest are maintained in United State dollars. Assets and liabilities are translated at the exchange rates at the balance sheet date, equity accounts are translated at historical exchange rates and revenues, expenses, gains and losses are translated using the average rate for the period. Translation adjustments are reported as cumulative translation adjustments and are shown as a separate component of other comprehensive (loss)/income. The Company has chosen Renminbi as its reporting currency.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

Comprehensive income

Comprehensive income is defined to include all changes in equity except those resulting from investments by owners and distributions to owners. Comprehensive income for the years has been disclosed within the consolidated statements of income and comprehensive income for presentational purpose of the disclosure of comprehensive income attributable to Agritech and the non-controlling interests respectively.

Income (loss) per share

Basic income (loss) per share is computed by dividing net income (loss) by the weighted average number of common shares outstanding during the years. Diluted income (loss) per share gives effect to all dilutive potential common shares outstanding during the years. The weighted average number of common shares outstanding is adjusted to include the number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued. In computing the dilutive effect of potential common shares, the average stock price for the period is used in determining the number of treasury shares assumed to be purchased with the proceeds from the exercise of options.

Share-based compensation

The Company adopts FASB ASC 718-10. ASC 718-10 requires that share-based payment transactions with employees, such as share options, be measured based on the grant-date fair value of the equity instrument issued and recognized as compensation expense over the requisite service period, with a corresponding addition to equity. Under this method, compensation cost related to employee share options or similar equity instruments is measured at the grant date based on the fair value of the award and is recognized over the period during which an employee is required to provide service in exchange for the award, which generally is the vesting period.

Fair value measurement

The Company adopted FASB ASC 820-10, and which defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. ASC 820-10 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information.

ASC 820-10 establishes a three-level valuation hierarchy of valuation techniques based on observable and unobservable inputs, which may be used to measure fair value and include the following:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Classification within the hierarchy is determined based on the lowest level of input that is significant to the fair value measurement.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

Discontinued Operations

The Company reports operating results for discontinued operations separately from continuing operations to distinguish the financial impact of disposal transactions from ongoing operations. Through September 30, 2017, the Company reported discontinued operations when the operations and cash flows of a component of the Company had been eliminated or intended to be eliminated from ongoing operations. For a component to be disposed of by sale, financial results were classified as discontinued only when held for sale criteria were met. For a component to be disposed of other than by sale, financial results were not classified as discontinued until abandonment, distribution, or exchange occurred, depending on the manner of disposal. The operating results of the seed production and distribution entities and assets mainly including Changchun Origin, Denong, Linze Origin, Zhengzhou Branch, the office building in Beijing, PRC are presented as discontinued operations.

Recently issued accounting pronouncements

In May 2014, the FASB issued Accounting Standards Update (“ASU”) No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. This ASU will replace most existing revenue recognition guidance in the U.S. GAAP when it becomes effective and permits the use of either the retrospective or cumulative effect transition method. The guidance also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts.

In August 2015, the FASB issued ASU No. 2015-14, *Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date*. The amendments in this update defer the effective date of ASU No. 2014-09. Public business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in ASU No. 2014-09 to annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Earlier application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period.

Further to ASU No. 2014-09 and ASU No. 2015-14, the FASB issued ASU No. 2016-08, *Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)*, in March 2016, ASU No. 2016-10, *Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing*, in April 2016, and ASU No. 2016-12, *Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients*, in May 2016, respectively. The amendments in ASU No. 2016-08 clarify the implementation guidance on principal versus agent considerations, including indicators to assist an entity in determining whether it controls a specified good or service before it is transferred to the customers. ASU No. 2016-10 clarifies guideline related to identifying performance obligations and licensing implementation guidance contained in the new revenue recognition standard. The updates in ASU No. 2016-10 include targeted improvements based on input the FASB received from the Transition Resource Group for Revenue Recognition and other stakeholders. It seeks to proactively address areas in which diversity in practice potentially could arise, as well as to reduce the cost and complexity of applying certain aspects of the guidance both at implementation and on an ongoing basis. ASU No. 2016-12 addresses narrow-scope improvements to the guidance on collectability, non-cash consideration, and completed contracts at transition. Additionally, the amendments in this ASU provide a practical expedient for contract modifications at transition and an accounting policy election related to the presentation of sales taxes and other similar taxes collected from customers. The effective date and transition requirements for ASU No. 2016-08, ASU No. 2016-10 and ASU No. 2016-12 are the same as ASU No. 2014-09.

In December 2016, the FASB further issued ASU No. 2016-20, *Technical Corrections and Improvements (Topic 606), Revenue from Contracts with Customers*, which makes minor corrections or minor improvements to the Codification that are not expected to have a significant effect on current accounting practice or create a significant administrative cost to most entities. The amendments are intended to address implementation and provide additional practical expedients to reduce the cost and complexity of applying the new revenue standard. This amendment is effective for financial statements issued for annual reporting periods beginning after December 15, 2017, including interim reporting periods therein.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

The Company does not expect the adoption of ASU No. 2014-09, ASU No. 2016-08, ASU No. 2016-10, ASU No. 2016-12 and ASU No. 2016-20 have a material impact on its consolidated financial statements and related disclosures.

In July 2015, the FASB issued ASU No. 2015-11, *Inventory (Topic 330): Simplifying the Measurement of Inventory*. The amendments in this update require an entity to measure inventory within the scope of ASU No. 2015-11 (the amendments in ASU No. 2015-11 do not apply to inventory that is measured using last-in, first-out or the retail inventory method. The amendments apply to all other inventory, which includes inventory that is measured using first-in, first-out or average cost) at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. Subsequent measurement is unchanged for inventory measured using last-in, first-out or the retail inventory method. The amendments in ASU No. 2015-11 more closely align the measurement of inventory in U.S. GAAP with the measurement of inventory in International Financial Reporting Standards (“IFRS”). ASU No. 2015-11 is effective for public business entities for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The amendments in ASU No. 2015-11 should be applied prospectively with earlier application permitted as of the beginning of an interim or annual reporting period. The Company does not expect the adoption of this ASU will have a material impact on its consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01, *Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*. The amendments in this update require all equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under equity method of accounting or those that result in consolidation of the investee). The amendments in this update also require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. In addition the amendments in this update eliminate the requirement for to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet for public entities. For public business entities, the amendments in ASU No. 2016-01 are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Except for the early application guidance discussed in ASU No. 2016-01, early adoption of the amendments in this update is not permitted. The Company does not expect the adoption of ASU No. 2016-01 will have a material impact on its consolidated financial statements.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)*. The amendments in this update create Topic 842, Leases, and supersede the leases requirements in Topic 840, Leases. Topic 842 specifies the accounting for leases. The objective of Topic 842 is to establish the principles that lessees and lessors shall apply to report useful information to users of financial statements about the amount, timing, and uncertainty of cash flows arising from a lease. The main difference between Topic 842 and Topic 840 is the recognition of lease assets and lease liabilities for those leases classified as operating leases under Topic 840. Topic 842 retains a distinction between finance leases and operating leases. The classification criteria for distinguishing between finance leases and operating leases are substantially similar to the classification criteria for distinguishing between capital leases and operating leases in the previous leases guidance. The result of retaining a distinction between finance leases and operating leases is that under the lessee accounting model in Topic 842, the effect of leases in the statement of comprehensive income and the statement of cash flows is largely unchanged from previous GAAP. The amendments in ASU No. 2016-02 are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years for public business entities. Early application of the amendments in ASU No. 2016-02 is permitted. The Company is currently in the process of evaluating the impact of the adoption of ASU No. 2016-02 on its consolidated financial statements.

In April 2016, the FASB issued ASU No. 2016-09, *Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*, which simplifies several aspects of the accounting for employee share-based payment transactions. The areas for simplification in ASU No. 2016-09 include the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The amendments in this ASU will be effective for annual periods beginning after December 15, 2016 and interim periods within those annual periods. Early adoption is permitted. The Company does not expect the adoption of ASU No. 2016-09 will have a material impact on its consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*. Financial Instruments—Credit Losses (Topic 326) amends guideline on reporting credit losses for assets held at amortized cost basis and available-for-sale debt securities. For assets held at amortized cost basis, Topic 326 eliminates the probable initial recognition threshold in current GAAP and, instead, requires an entity to reflect its current estimate of all expected credit losses. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial assets to present the net amount expected to be collected. For available-for-sale debt securities, credit losses should be measured in a manner similar to current GAAP, however Topic 326 will require that credit losses be presented as an allowance rather than as a write-down. ASU No. 2016-13 affects entities holding financial assets and net investment in leases that are not accounted for at fair value through net income. The amendments affect loans, debt securities, trade receivables, net investments in leases, off balance sheet credit exposures, reinsurance receivables, and any other financial assets not

excluded from the scope that have the contractual right to receive cash. The amendments in this ASU will be effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. The Company is currently evaluating the impact of the adoption of ASU No. 2016-13 on its consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*, which addresses the following eight specific cash flow issues: Debt prepayment or debt extinguishment costs; settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing; contingent consideration payments made after a business combination; proceeds from the settlement of insurance claims; proceeds from the settlement of corporate-owned life insurance policies (including bank-owned life insurance policies; distributions received from equity method investees; beneficial interests in securitization transactions; and separately identifiable cash flows and application of the predominance principle. The amendments in this ASU are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. The Company is currently evaluating the impact of the adoption of ASU No. 2016-15 on its consolidated financial statements.

ORIGIN AGRITECH LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017

(In thousands, except number of share, per share data and unless otherwise stated)

In February 2017, the FASB issued ASU 2017-05 *Other Income—Gains and Losses from the de-recognition of Nonfinancial Assets (Subtopic 610-20): Clarifying the Scope of Asset De-recognition Guidance and Accounting for Partial Sales of Nonfinancial Assets*, which clarifies the scope of the nonfinancial asset guidance in Subtopic 610-20. This ASU also clarifies that the de-recognition of all businesses and nonprofit activities (except those related to conveyances of oil and gas mineral rights or contracts with customers) should be accounted for in accordance with the de-recognition and deconsolidation guidance in Subtopic 810-10. The amendments in this ASU also provide guidance on the accounting for what often are referred to as partial sales of nonfinancial assets within the scope of Subtopic 610-20 and contributions of nonfinancial assets to a joint venture or other non-controlled investee. The amendments in this ASU are effective for annual reporting reports beginning after December 15, 2017, including interim reporting periods within that reporting period. Public entities may apply the guidance earlier but only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. The Company does not expect the adoption of ASU 2017-05 to have a material impact on our consolidated financial statements.

In May 2017, the FASB issued ASU 2017-09-*Compensation—Stock Compensation (Topic 718): Scope of Modification Accounting*. The requirement provides guidance on determining which changes to the terms and conditions of share-based payment awards require an entity to apply modification accounting under Topic 718. For public business entities, this ASU should be effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2017. The Company is currently evaluating the impact the adoption of ASU 2017-09 will have on its consolidated financial statements.

In July 2017, the FASB issued ASU No. 2017-11, *Earnings Per Share (Topic 260); Distinguishing Liabilities from Equity (Topic 480); Derivatives and Hedging (Topic 815): (Part I) Accounting for Certain Financial Instruments with Down Round Features, (Part II) Replacement of the Indefinite Deferral for Mandatorily Redeemable Financial Instruments of Certain Nonpublic Entities and Certain Mandatorily Redeemable Noncontrolling Interests with a Scope Exception*, which addresses the complexity of accounting for certain financial instruments with down round features. Down round features are features of certain equity-linked instruments (or embedded features) that result in the strike price being reduced on the basis of the pricing of future equity offerings. Current accounting guidance creates cost and complexity for entities that issue financial instruments (such as warrants and convertible instruments) with down round features that require fair value measurement of the entire instrument or conversion option. For public business entities, the amendments in Part I of this Update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The Company is evaluating the impact of the adoption of ASU No. 2017-11 on its consolidated financial statements.

As further described in note 4, on September 26, 2016, the Company entered into a Master Transaction Agreement to sell its proprietary China-based commercial corn seed production and distribution business for RMB 400,000 to Beijing Shihui. On August 16, 2017, the Company entered into a supplemental agreement to the Master Transaction Agreement to increase the total consideration to RMB 421,000 and modify the payment terms.

(In thousands, except number of share, per share data and unless otherwise stated)

4.DISCONTINUED OPERATIONS

On September 26, 2016, the Company entered into a Master Transaction Agreement with Beijing Shihui, under which the Buyer agreed to purchase the corn seed production and distribution assets, the office building in Beijing, China, and generally the business of commercial corn seed production and sales operated by the Company. On August 16, 2017, the Company entered into a Supplemental Agreement to the Master Transaction Agreement, pursuant to which, the aggregate purchase price was increased from RMB 400,000 to RMB 421,000 and certain payment arrangement provisions were amended.

The overall transaction is conducted in two steps. The first step is the sale of the equity held by Beijing Origin of each of the Denong, Changchun Origin and Linze Origin companies, and the second step is the sale of a company holding the assets of Zhengzhou Branch and the office building in Beijing, PRC. The second step requires Beijing Origin to effect a restructuring to form an entity to own the current office building located in Beijing, China and certain other assets (together the “Zhengzhou Branch Assets”), which entity is sold to the Buyer so as to transfer the building and assets to the Buyer.

When the first step is completed (the “First Closing”), the Buyer should give Beijing Origin a total consideration of RMB 221,000, consisting of cash payment of RMB 79,000 and bank loans reduction of RMB 142,000, for the 98.58% equity ownership interest in Denong, 100% equity ownership interest in Changchun Origin and 100% equity ownership interest in Linze Origin (together the “VIE Subsidiaries”). The First Closing is conditioned (among other things) on Beijing Origin acquiring the current minority percentage ownership of Changchun Origin that is held by the Company’s Chairman, so as to deliver to the Buyer 100% of the equity ownership of Changchun Origin. The minority interest of Denong should continue to be held by two third parties and should not be sold to the Buyer. When the second step is completed (the “Second Closing”), the Buyer should give Beijing Origin a total consideration of RMB200,000, payable in cash after offsetting the then outstanding payables to the Buyer up to RMB 150,000, for the 100% ownership interest in an entity formed by Beijing Origin as part of its reorganization to hold the Zhengzhou Branch Assets.

On July 31, 2017, the Company completed the First Closing and sold the VIE subsidiaries. On August 31, 2017, the Company transferred the control of Zhengzhou Branch to Beijing Shihui pursuant to a Management Agreement and

the net assets in Zhengzhou Branch intended to be sold at the Second Closing are considered sold. Of the total purchase price of RMB421,000, RMB347,085 was allocated to the aforementioned disposed entities and assets and RMB73,915 was allocated to the office building in Beijing, China. As of September 30, 2017, (1) total cash consideration of RMB45,400 inclusive of the RMB10,000 deposits was received, (2) principal amount of the bank loans amounted to RMB142,000 in the VIE subsidiaries was offset against the purchase price, (3) outstanding payables of RMB121,485 by Zhengzhou Branch to Buyer was offset against the purchase price. During the year ended September 30, 2017, we recognized a loss of RMB3,282 on the sale of commercial corn seed production and sales business operated by the Company. The loss is reported in discontinued operations in the consolidated statements of operations and comprehensive income.

The assets and liabilities of the entities that were sold and to be sold have been reclassified as “assets of discontinued operations” and “liabilities of discontinued operations” within current and non-current assets and liabilities, respectively, on the consolidated balance sheets as of September 30, 2016 and 2017. The results of operations of the entities or assets that were sold and to be sold have been reclassified to “net income (loss) from discontinued operations” in the consolidated statements of income and comprehensive income for the years ended September 30, 2015, 2016 and 2017.

Construction in progress	5,615	1,511
Plant and equipment, net	152,059	144,832

Included in plant and building with net values of RMB 144,184 and RMB 37,720 have been pledged for bank loans as of September 30, 2016 and September 30, 2017.

The depreciation expenses for the years ended September 30, 2015, 2016 and 2017 were RMB7,859, RMB8,805, and RMB8,724, respectively.

Construction in progress mainly refers to the new seed incubation facilities under construction.

10.LONG TERM INVESTMENTS

Equity investments consist of the following:

	September 30,	
	2016	2017
	RMB	RMB
Cost method investment	18,721	18,721

In previous years, the Company owned 23% equity interest in Jinong and accounted for equity method investment. In 2012, one shareholder of Jinong increased its investment in Jinong's shares, thereby the equity interests held by the Company were reduced to 17.94% and the Company is considered to no longer have a significant influence on Jinong. Therefore, the investment in Jinong was accounted for the cost method investment as of September 30, 2016 and 2017.

14. NOTES PAYABLE

On July 5, 2017, the Company issued a convertible promissory note (the “Loan Note”) to L2 Capital, LLC (“L2”) in the aggregate principal amount of up to a maximum amount of RMB15,562 (US\$2,345), which will be available in five tranches. Each tranche is available to be withdrawn when the specified milestone is achieved. The Loan Note bears interest at 8% per annum and has an original issue discount of approximately 13%. In connection with each draw down of the Loan Note, the Company should issue its common stocks, for an aggregate maximum of 293,087 shares (“Commitment Shares”). The Loan Note matures six months from the date of each draw down, and the principal is repaid with a premium ranging from 115% to 130%, depending on the date of repayment. The default repayment premium is 40%. The maturities may be extended for two-week periods upon the prepayment of a percentage portion of the principal then due. The Loan Note must also be repaid in full upon a qualified offering of in excess of US\$2,000. The Loan Note is convertible to common stock at any time on or after an event of default as defined in the Loan Note agreement at a conversion price equaled to the lowest trading price of the common stock during the 15 trading days prior to the conversion. The Loan Note is secured by all the assets of the Company located in the United States. As of September 30, 2017, the Company has completed Tranche 1 and Tranche 2 withdrawals with cash proceeds of RMB8,628 (US\$1,300) and issued 189,644 shares for Commitment Shares. The aggregate principal of Tranche 1 and Tranche 2 amounted to RMB10,068 (US\$1,517).

The Company evaluated FASB ASC 480-10, *Distinguishing Liabilities from Equity* to determine the appropriate classification of the Loan Note. The Loan Note will be settled with a variable number of common stocks the monetary value of which is based solely or predominantly on a fixed monetary amount known at inception, and therefore is accounted for as liabilities in accordance with FASB ASC 480-10, no further analysis for FASB ASC 815, *Derivatives and Hedging* was required. The Company measured the Loan Note initially at fair value, which is accreted up to the amounts expected to be settled (either cash expected to be paid or common stocks expected to be converted) based on the Company’s analysis. At the inception, the Company considered the principal, interests and penalty (default repayment premium) amounts will be very likely to be settled in full by the conversion of common stocks at the maturity of the Loan Note due to the Company’s working capital deficiency situation (note 2), the fair value of the Loan Note is therefore determined and accounted for at the maximum amounts of principal, interest and default repayment premium under the effective interest method. The related debt issuance costs including the original issuance discount, the legal fees and the Commitment Shares are reported in the balance sheet as a direct deduction from the fair value of the Loan Note.

The Loan Note was measured subsequently at fair value with changes in fair value recognized in earnings. No changes in fair value was recognized as of September 30, 2017. As of September 30, 2016 and 2017, the balance of Loan Note was nil and RMB8,335 (US\$1,256), respectively.

15. OTHER PAYABLES AND ACCRUED EXPENSES

Other payables and accrued expenses consist of:

	September 30,	
	2016	2017
	RMB	RMB
Payable for purchase of plant and equipment	79	69
Payable for purchase of construction-in-progress	8,641	5,346
Professional fee payable	9,154	6,741
Salaries and bonus payable	7,841	8,537
Accrued interest	-	390
Other taxes payable	544	303
Deposits from others	7,302	652
Payable for labor union, housing fund and education expenses	785	488
Deferred government subsidies	4,806	4,782
Others	243	3,870
	39,395	31,178

16. OTHER LONG-TERM LIABILITY

During the fiscal year 2011, the Company received government subsidies from the local PRC government for plant and equipment projects of RMB14.00 million and land use right of RMB10.90 million; in fiscal year 2016, the Company received government subsidies from the local PRC government for equipment projects of RMB8.63 million. In fiscal year 2017, the Company received government subsidies from the local PRC government for equipment projects of RMB4.04 million (US\$0.6 million). The non-current portion of such government subsidies are recorded as long-term liability for, which will be amortized over the estimated useful lives related to the plant and equipment and land use right.

(In thousands, except number of share, per share data and unless otherwise stated)

17.SHARE OPTION PLANS

On November 8, 2005, the Company adopted the 2005 Performance Equity Plan (the “2005 Plan”) which allows the Company to offer a variety of incentive awards to employees to acquire up to 1,500,000 ordinary shares under the 2005 Plan. On April 22, 2010, the Company adopted the 2009 Performance Equity Plan (the “2009 Plan”) and is authorized to issue equity based awards for up to 1,500,000 ordinary shares to the Company’s employees and senior managements. On December 22, 2014 the Company adopted the 2014 Performance Equity Plan, under which we are able to issue equity awards with the right to acquire up to 5,000,000 ordinary shares to our directors, officers, employees, individual consultants and advisors. The main purpose of the plan is to provide an existing structure and renewable benefit plan for senior management and directors and others providing services to the company. In addition to current equity awards to the directors and officers, we plan to expand our equity awards to a broader range of employees in order to align our employee incentives towards the stock performance. The main purpose of the two plans is to provide an existing structure and renewable benefit plan for senior management and directors, employees and consultants.

Under the terms of the 2005 Plan on January 4, 2010 the Company granted its employees options to purchase 125,000 ordinary shares at the price of US\$12.23 (“Tranche 5”). Under the terms of the 2009 Plan, on January 3, 2011, the Company granted its employees options to purchase 120,000 ordinary shares at the price of US\$10.84 (“Tranche 6”); and on January 3, 2012, the Company granted its employees options to purchase 365,000 ordinary shares at the price of US\$2.55 (“Tranche 7”), and on January 2, 2013, the Company granted its employees options to purchase 360,000 ordinary shares at the price of US\$1.44 (“Tranche 8”) Subject to the modifications discussed below, and on January 2, 2014, the Company granted its employees options to purchase 350,000 ordinary shares at the price of US\$1.27 (“Tranche 9”).

Under the terms of the 2014 Plan, on January 2, 2015 the Company granted its employees options to purchase 195,000 ordinary shares at the price of US\$1.48 (“Tranche 10”), on January 4, 2016 the Company granted its employees options to purchase 185,000 ordinary shares at the price of US\$1.38 (“Tranche 11”), on April 19, 2016 the Company granted its employees options to purchase 600,000 ordinary shares at the price of US\$2.05 (“Tranche 12”), on May 16, 2016 the Company granted its employees options to purchase 200,000 ordinary shares at the price of US\$1.65 (“Tranche 13”), on August 3, 2016 the Company granted its employees options to purchase 200,000 ordinary shares at the price of US\$2.0 (“Tranche 14”), on January 3, 2017 the Company granted its employees options to purchase 180,000 ordinary shares at the price of US\$2.07 (“Tranche 15”).

All the options have an expiration date that is 5 to 10 years from the date of grant and vest immediately or over a period of 1 to 5 years. 1,060,000 and 700,000 options under the 2009 Plan, and 1,380,000 and 1,510,000 options under the 2014 Plan were outstanding as of September 30, 2016 and 2017, respectively.

After the adjusted awards, all the option awards have an exercise price of USD 1.27 to USD 12.23 and expire 5 to 10 years from the date of grant and vest immediately or over a period of 1 to 5 years.

On December 22, 2014, January 2, 2016 and December 28, 2016, the compensation committee of the Board of Directors approved the substitution of restricted stock for outstanding grants under Tranche 5,6&7 respectively, that no longer offer the kind of incentive opportunity originally sought for valued employees given the fall in the market price of the ordinary shares during recent years. The revised terms of the stock options were accounted for as a modification in accordance with ASC 718-20. For the purpose of determining the amount of any incremental share-based compensation cost that may have resulted from the modification of the exercise prices, the Company compared the fair value of modified awards and that of the original awards, determined that RMB616, RMB542 and RMB982(US\$148) respectively, of the modifications required the recognition of additional share-based payment expense, respectively.

For the options outstanding at September 30, 2016 and 2017, the weighted average remaining contractual lives are 5.1 and 4.9 years, respectively.

ORIGIN AGRITECH LIMITED**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017****(In thousands, except number of share, per share data and unless otherwise stated)**

The Company recorded share-based compensation expense of RMB1,612, RMB8,796 and RMB3,016 for the years ended September 30, 2015, 2016 and 2017 respectively. As of September 30, 2016 and 2017, there were RMB2,676 and RMB690 of total unrecognized compensation expense related to non-vested share-based compensation arrangement under the 2014 Plan. The unrecognized compensation expense is expected to be recognized over a weighted-average period of 0.87 year.

A summary of the share option activity under the 2005, 2009 and 2014 Plans is as follows:

	Tranche 6	Tranche 7	Tranche 8	Tranche 9	Tranche 10	Tranche 11	Tranche 12	Tranche 13	Tranche 14	Tranche 15

Dividend yield	-	-	-	-	-	-	-	-	-	-

The aggregate intrinsic value as of September 30, 2016 and 2017 is USD1,476 and USD265, respectively.

18. TREASURY STOCK

During the year ended September 30, 2007, the Company repurchased 498,851 common stock of the Company with a total cost of RMB29,377 under the approval of the Board of Directors. In February 2013, the board of directors approved a share repurchase program for open market and negotiated transactions for a 12 month period in the amount of USD5 million, under which 611,386 and 167,385 shares with a total cost of RMB6,286 and RMB1,782 were bought in the Nasdaq market during the year ended September 30, 2013 and 2014, respectively, in compliance with U.S. securities laws. The Company recorded the entire purchase price of the treasury stock as a reduction of equity.

During the year ended September 30, 2017, the Company sold 500,000 shares of treasury stock with a total cost of RMB 14,654 for a total sale price of RMB 6,115.

(In thousands, except number of share, per share data and unless otherwise stated)

19.EQUITY LINE

On July 5, 2017, the Company entered into an equity purchase agreement (the “Equity Purchase Agreement”) with L2 Capital, LLC. Upon the terms and subject to the conditions thereof, the selling stockholder is committed to purchase that number of ordinary shares of the Company (the “Purchase Shares”) equal to an aggregate market price of up to US\$4,500 (the “Total Commitment Amount”). From time to time, commencing on the date on which a registration statement registering the ordinary shares to be purchased becomes effective, the Company may, in its sole discretion, provide the selling stockholder with a put notice (each a “Put Notice”) to purchase a specified number of the Purchase Shares (each a “Put Amount Requested”), subject to the limitations and conditions stated in the Equity Purchase Agreement. Upon delivery of a Put Notice, the Company must deliver the Put Amount Requested as a Deposit Withdrawal at Custodian so as to deliver the ordinary shares being sold to the selling stockholder within two trading days. There are certain equity conditions that the Company must meet to be able to deliver a Put Notice, including being in compliance with the terms of the aforementioned Loan Note and the Equity Purchase Agreement, a Put Amount Request cannot exceed the full committed amount under the Equity line, a Put Amount Request cannot exceed 9.99% of the outstanding ordinary shares, the continued listing and trading of the ordinary shares, and the registration statement of which this prospectus is a part, is effective and the information therein is current.

The Put Amount Requested pursuant to any single Put Notice is limited to a maximum of 150% of the average trading volume of the ordinary shares as traded on Nasdaq or other exchange on which the ordinary shares are listed, and not less than US\$25 in value. A subsequent put may only be made 10 trading days after the earlier put. The equity line may be terminated at any time, subject to a short notice period.

The actual amount of proceeds the Company receives pursuant to each Put Notice (each, the “Put Amount”) is to be determined by multiplying the Put Amount Requested by the applicable purchase price. The purchase price for each of the Purchase Shares equals to 94% of the lowest market price of the Company’s ordinary shares on Nasdaq for any trading day during the 5 trading days immediately after the date of the respective Put Notice.

As of September 30, 2017, no registration statement has taken effect and the Company only issued 108,696 ordinary shares to L2 Capital, LLC for its commitment to enter into the Equity Purchase Agreement.

20. INCOME TAXES

Agritech and its subsidiary, State Harvest are incorporated in the British Virgin Islands and are exempted from the income tax under the laws of the British Virgin Islands. State Harvest's subsidiary and State Harvest's variable interest entity, Beijing Origin and its majority owned subsidiaries (together, the "PRC entities") were incorporated in the PRC and governed by the PRC laws.

The applicable tax rate of the PRC Enterprise Income Tax ("EIT") was changed from 33% to 25% on January 1, 2008, according to the Corporate Income Tax Law. The preferential tax rate previously enjoyed by the PRC entities is gradually transitioned to the new standard rate of 25% over a five-year transitional period. In addition, article 28 of the new tax law stated that the income tax rate of a "high technology" company (high-tech status) is to remain at 15%.

Preferential tax treatment of Beijing Origin as "high technology" company (High-tech Status) from October 28, 2011 to October 27, 2017 has been granted by the relevant tax authorities. Beijing Origin is entitled to a preferential tax rate of 15% which is subject to annual review. As a result of these preferential tax treatments, the reduced tax rates applicable to Beijing Origin Seed Limited for 2015, 2016 and 2017 are 15%. Xinjiang Origin is entitled to a preferential tax of 2 years exemption and 3 years of half EIT from January 1, 2012 to December 31, 2016 in accordance with Cai Shui [2011] No. 53 and Cai Shui [2011] No. 60 issued by the PRC State Administration of Taxation and Xin Cai Fa Shui [2011] No. 51 issued by the Xinjiang Local Taxation Bureau. Xinjiang Origin is currently in the status of 25% for the year ended September 30, 2017.

ORIGIN AGRITECH LIMITED**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017****(In thousands, except number of share, per share data and unless otherwise stated)**

Had all the above tax holidays and concessions not been available, the tax charges would have been (decreased)/increased by RMB(1,149), RMB(5,609) and RMB4,274, and the basic net loss per share would have been (decreased)/increased by RMB(0.13), RMB(0.25) and RMB0.18 for the years ended September 30, 2015, 2016 and 2017, respectively. The diluted net loss per share for the years ended September 30, 2015, 2016 and 2017 would have been (decreased)/increased by RMB(0.13), RMB(0.25) and RMB0.18, respectively.

The Company's liability for income taxes includes the liability for unrecognized tax benefits, interest and penalties which relate to tax years still subject to review by taxing authorities. Audit periods remain open for review until the statute of limitations has passed. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the Company's liability for income taxes. Any such adjustment could be material to the Company's results of operations for any given quarterly or annual period based, in part, upon the results of operations for the given period. Until September 30, 2017, the management considered that the Company had no uncertain tax positions affected its consolidated financial position. The Company's uncertain tax positions are related to tax years that remain subject to examination by the relevant tax authorities and the major one is the China tax authority. The open tax years for examinations in China are 5 years.

The provision for income taxes expenses consists of the following:

	Year ended		
	September 30,		
	2015	2016	2017
	RMB	RMB	RMB
Current	-	-	-
Deferred	-	-	-
	-	-	-

The principal components of the deferred income tax assets are as follows:

	September 30,	
	2016	2017
	RMB	RMB
Non-current deferred tax assets:		
Net operating loss carry forward	21,567	39,578
Impairment on inventory	(82)	(82)
Others	2,383	(26,230)
Non-current deferred income tax assets	23,868	13,266
Valuation allowances	(23,868)	(13,266)
Net non-current deferred income tax assets	-	-

The Company did not have any significant temporary differences relating to deferred tax liabilities as of September 30, 2016 and 2017.

A significant portion of the deferred tax assets recognized relates to net operating loss and credit carry forwards. The Company operates through the PRC entities and the valuation allowance is considered on each individual basis.

ORIGIN AGRITECH LIMITED**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017****(In thousands, except number of share, per share data and unless otherwise stated)**

The net operating loss attributable to those PRC entities can only be carried forward for a maximum period of five years. Tax losses of non-PRC entities can be carried forward indefinitely. The expiration period of unused tax losses is as follows:

	Year ended	
	September 30,	
	2016	2017
	RMB	RMB
Calendar year ending,		
2016	40,099	-
2017	21,254	9,804

(In thousands, except number of share, per share data and unless otherwise stated)

22.EMPLOYEE BENEFIT PLAN AND PROFIT APPROPRIATION

Full time employees of the PRC entities participate in a government mandated multi-employer defined contribution plan pursuant to which certain pension benefits, medical care, unemployment insurance, employee housing fund and other welfare benefits are provided to employees. Chinese labor regulations require the Company to accrue for these benefits based on certain percentages of the employees' salaries. The total provisions for such employee benefits were RMB8,332, RMB7,875 and RMB7,241 for the years ended September 30, 2015, 2016 and 2017 respectively.

Pursuant to the laws applicable to the PRC, domestic PRC entities must make appropriations from after-tax profit to non-distributable reserves funds including: (i) the statutory surplus reserve and; (ii) the statutory public welfare fund. Subject to the limits of 50% of the entity's registered capital, the statutory surplus reserve fund requires annual appropriations of 10% of after-tax profit (as determined under accounting principles generally accepted in the PRC ("PRC GAAP") at each year-end). The Company's wholly foreign owned subsidiary, BioTech, however subject to the law applicable to foreign invested enterprises in the PRC, was required annual appropriation of the general reserve fund, no less than 10% of after-tax profit (as determined under PRC GAAP at each year-end). These reserve funds can only be used for specific purposes of enterprise expansion and staff welfare and are not distributable as cash dividends. No appropriation has been made for the years ended September 30, 2015, 2016 and 2017. There was no after-tax profit recorded in the PRC statutory accounts for 2016 and 2017. On the other hand, the amount set aside as of September 30, 2016 and 2017 were RMB24,789 and RMB20,848.

23.COMMITMENTS AND CONTINGENCIES

(a)Capital commitments

As of September 30, 2016 and 2017, capital commitments for the purchase of long-term assets are as follows:

	September 30,
	2016 2017

	RMB	RMB
Equipment	4,172	2,702
Intangible assets	1,000	-
	5,172	2,702

(b) Operating lease

The Company leased certain land use rights for seed development and office premises under non-cancellable leases. Rental expenses under operating leases for the years ended September 30, 2015, 2016 and 2017 were RMB1,855, RMB2,314 and RMB2,908, respectively.

As of September 30, 2017, the Company was obligated under operating leases requiring minimum rental as follows:

Year ending September 30,	RMB
2018	1,128
2019	550
2020	481
2021	453
2022	455
Thereafter	3,267
	6,334

(In thousands, except number of share, per share data and unless otherwise stated)

24. FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amounts of cash and cash equivalents, restricted cash, accounts receivable, accounts payable and borrowings are reasonable estimates of their fair value. All the financial instruments are for trade purposes. No level 2 or 3 fair value assessment has been made.

25. OPERATING RISK

Concentrations of credit risk

Financial instruments that subject the Company to concentrations of credit risk consist primarily of cash and cash equivalents. The Company maintains its cash and cash equivalents with high-quality institutions. Generally these deposits may be redeemed upon demand and therefore bear minimal risk.

Interest risk

The interest rates and terms of repayment of bank and other borrowings ranged from 4.57% to 10.35%, which are fixed at the inception of the borrowings. Other financial assets and liabilities do not have material interest rate risk.

Liquidity risk

We believe our working capital is sufficient to meet our present requirements. We may, however, require additional cash due to changing business conditions or other future developments, including any investments or acquisitions we

may decide to pursue. In the long-term, we intend to rely primarily on cash flow from operations and additional borrowings from banks to meet our anticipated cash needs. If our anticipated cash flow is insufficient to meet our requirements, we may also seek to sell additional equity, debt or equity-linked securities.

Country risk

The Company has significant investments in the PRC. The operating results of the Company may be adversely affected by changes in the political and social conditions in the PRC and by changes in Chinese government policies with respect to laws and regulations, anti-inflationary measures, currency conversion and remittance abroad, and rates and methods taxation, among other things. There can be no assurance; however, those changes in political and other conditions will not result in any adverse impact.

26.SUBSEQUENT EVENTS

The Loan Note issued July 5, 2017, to L2 Capital, LLC has a conversion provision that allows the holder to convert at its discretion, from time to time, the outstanding principal, interest and penalties and other amounts due thereon into shares of common stock based on a formula tied to the market price of an ordinary share. The holder's conversion right commenced January 5, 2018, and will continue until the Loan Note is paid in full. Through January 29, 2018, the holder has converted an aggregate of US\$887 due under the terms of the Loan Note into an aggregate of 1,086,929 ordinary shares. As of January 29, 2018, total amount due on the Loan Note is US\$1,517, consisted of overdue principal, accrued interest and penalties of US\$874, US\$294 and US\$350, respectively.

ORIGIN AGRITECH LIMITED**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEARS ENDED SEPTEMBER 30, 2015, 2016 AND 2017****(In thousands, except number of share, per share data and unless otherwise stated)****27.CONDENSED FINANCIAL INFORMATION OF THE PARENT COMPANY**

The condensed financial statements of Origin Agritech Limited (the “parent company”) have been prepared in accordance with accounting principles generally accepted in the United States of America. Under the PRC laws and regulations, the Company’s PRC subsidiaries are restricted in their ability to transfer certain of their net assets to the parent company in the form of dividend payments, loans or advances. The amounts restricted include paid-in capital, capital surplus and statutory reserves, as determined pursuant to PRC generally accepted accounting principles, totaling RMB109,651 and RMB84,517 as of September 30, 2016 and 2017, respectively.

The following represents condensed unconsolidated financial information of the parent company only:
