2	SEMI-ANNUAL REPORT	AUGUST 31, 2009	
		,	

Dear Shareholder

The past 12 months reveal two distinct economic and market backdrops one of extreme investor pessimism and decided weakness, and another of increased optimism amid growing signs of recovery. The start of the period was characterized by the former. September through December 2008 saw the surge of the economic storm that sparked the worst recession in decades. The months featured, among others, the infamous collapse of Lehman Brothers, uniformly poor economic data and plummeting investor confidence that resulted in massive government intervention (on a global scale) in the financial system and the economy. The tide turned dramatically in March 2009, however, on the back of new US government initiatives, as well as better-than-expected economic data and upside surprises in corporate earnings.

In this environment, US equities contended with extraordinary volatility, posting steep declines through mid-March before embarking on a rally that resulted in strong year-to-date returns for all major indexes. June saw a brief correction, though it appeared to be induced more by profit-taking and portfolio rebalancing than by a change in the economic outlook. The experience in international markets was similar to that in the United States. Notably, emerging markets staged a strong comeback in 2009 as these areas of the globe have generally seen a stronger acceleration in economic activity.

In fixed income markets, the flight-to-safety premium in Treasury securities prevailed during the equity market downturn, but more recently, ongoing concerns about deficit spending, debt issuance, inflation and dollar weakness have kept Treasury yields higher. At the same time, relatively attractive yields and distressed valuations among non-Treasury assets, coupled with a more favorable macro environment, drew in sidelined investors and triggered a sharp recovery in these sectors. This was particularly evident in the high yield sector, which has firmly outpaced all other taxable asset classes since the start of 2009. The municipal bond market enjoyed strong returns in 2009 as well, buoyed by a combination of attractive valuations, robust retail investor demand and a slowdown in forced selling. Moreover, the Build America Bond program has alleviated supply pressures, creating a more favorable technical environment. In particular, August marked the municipal market s best monthly performance in more than 20 years, as the asset class has regained year-to-date all that was lost during 2008.

Overall, results for the major benchmark indexes were mixed. Higher-risk assets (i.e., equities and high yield bonds) and Treasuries reflected a bifurcated market, while less-risky fixed income investments posted stable, modest returns.

Total Returns as of August 31, 2009	6-month	12-month
US equities (S&P 500 Index)	40.52%	(18.25)%
Small cap US equities (Russell 2000 Index)	48.25	(21.29)
International equities (MSCI Europe, Australasia, Far East Index)	53.47	(14.95)
US Treasury securities (BofA Merrill Lynch 10-Year US Treasury Index*)	(1.61)	6.77
Taxable fixed income (Barclays Capital US Aggregate Bond Index)	5.95	7.94
Tax-exempt fixed income (Barclays Capital Municipal Bond Index)	5.61	5.67
High yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index)	36.31	7.00

* Formerly a Merrill Lynch Index.

The market environment has visibly improved since the beginning of the year, but a great deal of uncertainty and risk remain. Through periods of market turbulence, as ever, BlackRock s full resources are dedicated to the management of our clients assets. We invite you to visit **www.blackrock.com/funds** for our most current views on the economy and financial markets. As always, we thank you for entrusting BlackRock with your investments, and we look forward to continuing to serve you in the months and years ahead.

Sincerely,

Rob Kapito President, BlackRock Advisors, LLC

Announcement to Shareholders

On June 16, 2009, BlackRock, Inc. announced that it received written notice from Barclays PLC (Barclays) in which Barclays Board of Directors had accepted BlackRock s offer to acquire Barclays Global Investors (BGI). At a special meeting held on August 6, 2009, BlackRock s proposed purchase of BGI was approved by an overwhelming majority of Barclays voting shareholders, an important step toward closing the transaction. The combination of BlackRock and BGI will bring together market leaders in active and index strategies to create the preeminent asset management firm. The transaction is scheduled to be completed in the fourth quarter of 2009, subject to important fund shareholder and regulatory approvals.

Fund Summary as of August 31, 2009

BlackRock Corporate High Yield Fund, Inc.

Investment Objective

BlackRock Corporate High Yield Fund, Inc. (COY) (the Fund) seeks to provide shareholders with current income with a secondary objective of providing shareholders with capital appreciation. The Fund seeks to achieve its objective by investing primarily in a diversified portfolio of fixed-income securities that are rated below investment grade by the established rating services (Ba or lower by Moody s Investors Service, Inc. (Moody s) or BB or lower by Standard & Poor s Corporation (S&P s)) or are unrated securities of comparable quality.

No assurance can be given that the Fund s investment objective will be achieved.

Performance

For the six months ended August 31, 2009, the Fund returned 66.35% based on market price and 49.85% based on net asset value (NAV). For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 50.49% on a market price basis and 40.06% on a NAV basis. During the period, the Fund moved from a discount to a premium to NAV, which accounts for the difference between performance based on price and performance based on NAV. The period featured the largest six-month rise in high yield market history, providing a good environment for bottom-up security selection, with no emphasis on any one sector. We gradually decreased cash and increased the Funds risk as market conditions dictated. Overall, there was a wide dispersion of returns among the Funds Lipper competitors, as many funds did well while others struggled with credit issues or retained too defensive a strategy. Security selection was the primary contributor to performance during the period. The Fund maintains a 16% position in floating rate loan interests, which detracted as these securities underperformed high yield corporate bonds. During the period, the Fund moved from a larger cash balance to a balance of less than 3%, which has benefited performance in the rising market.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

4 SEMI-ANNUAL REPORT AUGUST 31, 2009

Fund Summary as of August 31, 2009

BlackRock Corporate High Yield Fund III, Inc.

Investment Objective

BlackRock Corporate High Yield Fund III, Inc. (CYE) (the Fund) seeks to provide shareholders with current income by investing primarily in a diversified portfolio of fixed income securities that are rated in the lower rating categories of the established rating services (Ba or lower by Moody s or BB or lower by S&P s) or are unrated securities of comparable quality.

No assurance can be given that the Fund s investment objective will be achieved.

Performance

For the six months ended August 31, 2009, the Fund returned 68.87% based on market price and 52.83% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 50.49% on a market price basis and 40.06% on a NAV basis. All returns reflect reinvestment of dividends. The Fund's discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The period featured the largest six-month rise in high yield market history, providing a good environment for bottom-up security selection, with no emphasis on any one sector. We gradually decreased cash and increased the Fund's risk as market conditions have dictated. Overall, there was a wide dispersion of returns among the Fund's Lipper competitors, as many funds did well while others struggled with credit issues or retained too defensive a strategy. Security selection was the primary contributor to performance during the period. The Fund maintains a 16% position in floating rate loan interests, which detracted as these securities underperformed high yield corporate bonds. During the period, the Fund moved from a larger cash balance to a balance of less than 1%, which has benefited performance in the rising market.

SEMI-ANNUAL REPORT AUGUST 31, 2009 5

Fund Summary as of August 31, 2009

BlackRock Debt Strategies Fund, Inc.

Investment Objective

BlackRock Debt Strategies Fund, Inc. (DSU) (the Fund) seeks to provide current income by investing primarily in a diversified portfolio of US companies debt instruments, including corporate loans, that are rated in the lower rating categories of the established rating services (Ba or lower by Moody s or BB or lower by S&P s) or unrated debt instruments of comparable quality.

No assurance can be given that the Fund s investment objective will be achieved.

Performance

For the six months ended August 31, 2009, the Fund returned 74.49% based on market price and 51.87% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 50.49% on a market price basis and 40.06% on a NAV basis. All returns reflect reinvestment of dividends. The Fund moved from a discount to a premium to NAV, which accounts for the difference between performance based on price and performance based on NAV. The Fund benefited from a slight bias to lower-quality credits, which outperformed higher-quality credits during the six months. Unlike its Lipper peers, the Fund invests in floating rate loan interests as well as high yield bonds. Loans underperformed bonds for the period; consequently, the Fund s 41% average allocation to loans detracted from relative performance. The Fund also maintained a relatively low level of leverage (less than 15%), which detracted in the strong market environment. During the period, the Fund moved from a larger cash balance to a balance of less than 1%, which has benefited performance in the rising market.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

6 SEMI-ANNUAL REPORT AUGUST 31, 2009

Fund Summary as of August 31, 2009

BlackRock Floating Rate Income Strategies Fund II, Inc.

Investment Objective

BlackRock Floating Rate Income Strategies Fund II, Inc. (FRB) (the Fund) seeks a high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments.

No assurance can be given that the Fund s investment objective will be achieved.

Performance

For the six months ended August 31, 2009, the Fund returned 46.51% based on market price and 42.76% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 54.27% on a market price basis and 37.19% on a NAV basis. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The Fund benefited from a slight bias to lower-quality credits, which outperformed higher-quality in 2009, and a 27% allocation to high yield corporate bonds, which outperformed floating rate loan interests. The Fund s relatively low level of leverage (around 16%) detracted in the strong market environment. During the period, the Fund moved from a larger cash balance to a balance of less than 2%, which has benefited performance in the rising market.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT	AUGUST 31, 2009	7

Fund Summary as of August 31, 2009

BlackRock Senior High Income Fund, Inc.

Investment Objective

BlackRock Senior High Income Fund, Inc. (ARK) (the Fund) seeks to provide shareholders with as high a level of current income as is consistent with its investment policies and prudent investment management by investing principally in senior debt obligations of companies, including corporate loans made by banks and other financial institutions and both privately placed and publicly offered corporate bonds and notes.

No assurance can be given that the Fund s investment objective will be achieved.

Performance

For the six months ended August 31, 2009, the Fund returned 51.37% based on market price and 43.72% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 50.49% on a market price basis and 40.06% on a NAV basis. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The Fund benefited from a slight bias to lower-quality credits, which outperformed higher-quality credits. Unlike its Lipper peers, the Fund invests in floating rate loan interests as well as high yield corporate bonds. Loans underperformed bonds for the period; consequently, the Fund s 40% average allocation to floating rate loan interests detracted from relative performance. The Fund also maintained a relatively low level of leverage (less than 15%), which detracted in the strong market environment. During the period, the Fund moved from a larger cash balance to a balance of less than 1%, which has benefited performance in the rising market.

8	SEMI-ANNUAL REPORT	AUGUST 31, 2009

The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV. However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage through borrowings or issuance of short-term debt. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund s shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund s capitalization is \$100 million and it issues debt securities for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays interest expense on the \$30 million of debt securities based on the lower short-term interest rates. At the same time, the securities purchased by the Fund with assets received from the debt securities issuance earn the income based on long-term interest rates. In this case, the interest expense of the debt securities is significantly lower than the income earned on the Fund s long-term investments, and therefore the shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Fund pays interest expense on the higher short-term interest rates whereas the Fund s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Fund s portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Fund s debt securities do not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Fund s NAV positively or negatively in addition to the impact on Fund performance from leverage from debt securities.

The use of leverage may enhance opportunities for increased income to the Funds and shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in each Fund s NAV, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, each Fund s net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Fund s net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. A Fund may be required to sell portfolio securities at inopportune times at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments which may cause a Fund to incur losses. The use of leverage may limit a Fund s ability to invest in certain types of securities or use certain types of hedging strategies. A Fund will incur expenses in connection with the use of leverage, all of which are borne by the shareholders and may reduce income.

Under the Investment Company Act of 1940, the Funds are permitted to borrow through a credit facility and the issuance of short-term debt securities up to 33¹/₃% of their total managed assets. As of August 31, 2009, the Funds had outstanding leverage from credit facility borrowings as a percentage of total managed assets as follows:

	Percent of Leverage
COY CYE	16%
CYE	18%

DSU	12%
FRB	16%
ARK	8%

Derivative Financial Instruments

The Funds may invest in various derivative instruments, including swap agreements, foreign currency exchange contracts and options, as specified in Note 2 of the Notes to Financial Statements, which constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the counterparty to the transaction and illiquidity of the derivative instrument. A Fund s ability to successfully use a derivative instrument depends on the investment advisor s ability to accurately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require the Funds to sell or purchase portfolio securities at inopportune times or for distressed values, may limit the amount of appreciation the Funds can realize on an investment or may cause the Funds to hold a security that they might otherwise sell. The Funds investments in these instruments are discussed in detail in the Notes to Financial Statements.
