Company Press Release

Nova Measuring Instruments Announces 2002 Fourth Quarter and Year-End Results

Rehovoth, Israel, March 3, 2003 Nova Measuring Instruments, Ltd. (Nasdaq: NVMI), today reported results for the fourth quarter of 2002 and year ended December 31, 2002.

2002 Fourth Quarter Results

Total revenues for the fourth quarter of 2002 were \$5.6 million, a 3% sequential increase over revenues of \$5.4 million for the third quarter of 2002, and a 54% increase over revenues of \$3.6 million reported for the fourth quarter of 2001.

The Company reported gross profit of \$1.8 million (32% of revenues) compared with gross profit of \$2.0 million (37% of revenues) in the third quarter of 2002, and gross profit of 0.6 million (16% of sales) for the fourth quarter of 2001. Net loss for the quarter was \$(2.5) million, or \$(0.17) per share, compared with a net loss of \$(2.7) million, or \$(0.18) per share, in the third quarter of 2002 and net loss of \$(3.3) million, or \$(0.23) per share, in the fourth quarter of 2001. Fourth quarter 2002 results includes stock-based compensation expenses of \$0.2 million. Excluding these expenses, net loss was \$(2.3) million, or \$(0.16) per share.

Research and development expenses were \$2.2 million (40% of revenues) compared with \$2.4 million (44% of revenues) in the third quarter of 2002 and \$2.4 million (67% of revenues), in the fourth quarter of 2001. Sales and marketing expenses were \$1.7 million (31% of revenues) compared with \$1.8 million (33% of revenues) in the third quarter of 2002, and \$1.4 million (37% of revenues) in the fourth quarter of 2001.

Year 2002 Annual Results

The Company reported total revenues for the year 2002 of \$20.4 million, a 4% sequential decrease of revenues compared with 2001. Gross profit was \$7.0 million (34% of revenues) in 2002, compared with gross profit of \$4.7 million (22% of revenues) in 2001. Service revenues for the year 2002 were \$5.9 million (29% of revenues).

Net loss for the year was \$(13.0) million, or \$(0.88) per share, compared with net loss of \$(16.9) million, or \$(1.16) per share, in 2001. Year 2002 financial results include stock-based compensation expenses of approximately \$1.1 million. Excluding these expenses, the net loss for the year was \$(11.9) million, or \$(0.80) per share.

Year 2002 Annual Results

Edgar Filing: NOVA MEASURING INSTRUMENTS LTD - Form 6-K

Research and development expenses relating to the development of a number of new process control systems for copper CMP, Photolithography and Etch, were \$9.9 million (49% of revenues), as compared with \$13.3 million (63% of revenues) in 2001. Operating expenses includes one time payment of \$1.5 million for technology purchasing done in Q1 2002.

Though significantly reduced from previous years, this high level of R&D expenditure reflects the Company's continuing efforts to develop and introduce several novel integrated process control systems and their corresponding engineering systems for the major semiconductor processes, despite the current market slowdown.

Sales & Marketing expenses were \$6.9 million (34% of revenues), as compared with \$6.9 million (32% of revenues) in 2001. These expenses represent the Company's efforts to increase penetration of new products, to enhance the penetration into China and Asia-Pacific, along with focused efforts to boost collaboration with the leading process equipment manufacturers.

Dr. Giora Dishon, President & CEO of Nova commented, "Year 2002 was a difficult year for Nova and for the industry. According to Dataquest, a leading market research company, total Wafer Front-end Equipment (WFE) declined 33% over 2001. However, we continued our efforts in developing and maturing several new process control systems based on our pioneering Integrated Process Control concept, a concept that has become a major trend in the semiconductor industry. As a result of these efforts we maintained our leading 70% market share position and increased revenues from Asia Pacific and China. About half of the sales were for 300mm systems, strengthening our position going forward when we expect these lines to pick the next upturn in the industry. In addition, we focused on building strategic alignment with the leading equipment suppliers along with increased cooperation and joint development efforts, such as the copper CMP process control. We are encouraged by having completed the Beta testing of the new Copper CMP system, the beginning of sales, and by the first sale of the NovaTrack, our Lithography (overlay and macro) IPC system. We believe that both systems will provide an upside opportunity to the Company."

Dr. Dishon added, "2002 was the second year of reduced revenues across the entire semiconductor equipment industry, the steepest decline in the history of the semiconductor equipment market. We continued to manage our business, looking towards the future growth of the Company, whilst continuing to implement cost-cutting measures; we expect the impact of last quarter's workforce reduction will be more significant this quarter, the first quarter of 2003, and onwards. As a result we maintained our strong cash position with no decline in the cash and equivalents from the previous quarter."

Dr. Dishon concluded, "Looking forward, according to Dataquest's most recent research (Dec. 2002), the Integrated Process Control (IPC) market, which we pioneered and dominate, is expected to grow much faster than most other market segments. We do not expect the general market conditions to change significantly before the end of this year. However, we want to assure our valued shareholders that we will continue our focused development and marketing efforts to bring new products to the industry, which will enable us to leverage from the industry's continuous technology moves to smaller design rules, copper and low-k, from the transition to 300mm manufacturing, and from the upturn when it arrives, with the anticipated fast growth IPC market."

About Nova

Nova Measuring Instruments Ltd. develops, designs and produces integrated process control systems in the semiconductor manufacturing industry. Nova provides a broad range of integrated process control solutions that link between different semiconductor processes and process equipment. The Company's website is www.nova.co.il.

This press release may contain forward-looking statements, including statements related to anticipated growth rates, manufacturing capacity and tax rate. Actual results may differ materially from those projected due to a number of risks, including changes in customer demands for our products, new product offerings from our competitors, changes in or an inability to execute our business strategy, unanticipated manufacturing or supply problems, or changes in tax requirements. Nova cannot guarantee future results, levels of activity, performance or achievements. The matters discussed in this press release also involve risks and uncertainties summarized under the heading "Risk Factors" in Nova's Form F-1 filed with the Securities and Exchange Commission on April 9, 2000. These factors are updated from time to time through the filing of reports and registration statements with the Securities and Exchange Commission. Nova Measuring Instruments Ltd. does not assume any obligation to update the forward-looking information contained in this press release.
