### **Historical Results**

For periods prior to and including May 17, 2006, the date of Embarq s spin-off from Sprint Nextel, reported operating income reflects the combined performance of the specific legal entities that were spun off from Sprint Nextel in accordance with

Embarq Corporation (NYSE: EQ) Page 1 of 5

generally accepted accounting principles (GAAP). The reported information for these entities prior to and including the date of separation does not include certain items that will be reflected in Embarq s reported operating income for periods subsequent to May 17, 2006. These items primarily consist of the following:

In-territory consumer and business long distance customers transferred to Embarq by Sprint Nextel, as well as certain in-territory equipment and professional service customers transferred to Sprint Nextel by Embarq; and

Other assets and liabilities related to the ongoing operations of our business transferred to Embarq by Sprint Nextel.

In order to facilitate a comparison of Embarq s historical operating performance to performance subsequent to the spin-off, the attached tables provide an as adjusted view of Embarq s quarterly operating income for 2005 and the first quarter of 2006. Management uses this information and believes it is important to investors because it recasts historical information to reflect the current composition of our business and enables a more appropriate comparison with current information. The as adjusted financial information assumes the spin-off from Sprint Nextel had occurred on January 1, 2005 and includes the items described above. The as adjusted financial information is a non-GAAP measure and should be considered in addition to, but not as a substitute for, the information contained in our financial reporting.

Note: Certain prior year amounts have been reclassified to conform to the current period presentation. Historical and pro forma Embarq results as presented in Embarq s registration statements on Form 10 and Form S-1 filed with the SEC were presented consistent with the Sprint Nextel presentation of its local division results. In the 2006 first quarter, we modified the classifications of revenues and operating expenses consistent with Embarq management s view of these activities. These reclassifications had no effect on total net operating revenues, total operating expenses or net income as previously reported.
