Press Release April 14, 2008

WACHOVIA REPORTS 1ST QUARTER RESULTS; ANNOUNCES INITIATIVES

TO FURTHER ENHANCE CAPITAL BASE AND FLEXIBILITY

Plans to Raise Capital through Public Offering

Reduces Quarterly Dividend to \$0.375 Per Common Share, Preserving \$2.0 Billion of

Capital Annually

Increases Credit Reserves; Provision \$2.1 Billion Above Net Charge-offs

Net Loss of \$350 Million or \$393 Million (20 Cents) after Preferred Dividend

Strong Sales Momentum and Solid Underlying Expense Control Cushions Impact of

Rising Credit Costs and Market Disruption Losses

CHARLOTTE, N.C. Wachovia today announced a series of actions to further enhance its capital base and operational flexibility, and updated its credit reserve modeling to reflect greater emphasis on forecasted changes in customer behavior assuming continued house price depreciation. These actions include:

Plans to raise capital through a public offering of common stock and perpetual convertible preferred stock;

Lowering the quarterly common stock dividend, which preserves \$2.0 billion of capital annually, to build capital ratios and provide more operational flexibility. The board of directors declared a quarterly common stock dividend of \$0.375 cents per common share, payable on June 16, 2008, to stockholders of record on May 30, 2008. This dividend level is consistent with Wachovia's capital needs and growth opportunities for each of its business segments, and with an anticipated 40 percent to 50 percent cash payout ratio over the intermediate horizon; and

The update in the credit reserve modeling in response to the current and forecasted market environment and its effect on consumer behavior, particularly in stressed markets, resulting in a significant increase in the first quarter 2008 provision for credit losses. In addition, the scope of credit disclosures was increased to provide enhanced insight into the payment option consumer real estate portfolio. In addition, Wachovia reported a first quarter 2008 net loss of \$350 million before preferred dividends, or a net loss available to common stockholders of \$393 million, (20 cents per common share). These results, which reflect higher credit costs and the continued disruption in the capital markets, compared with earnings of \$2.30 billion, or \$1.20 per share, in the first quarter of 2007.

Edgar Filing: WACHOVIA CORP NEW - Form FWP

While solid underlying performance was overshadowed by market disruption-related valuation losses of \$2.0 billion, Wachovia generated total revenue of \$7.9 billion on higher loans and deposits and strength in fiduciary and asset management fees, brokerage commissions and traditional banking fees, including the impact of the A.G. Edwards acquisition.

I'm deeply disappointed with our first quarter results, but I am confident we're taking prudent and appropriate actions in this challenging period to restore Wachovia to a more profitable path. The precipitous decline in housing market conditions and unprecedented changes in consumer behavior prompted us to update our credit reserve modeling and rely less heavily on historical trends to forecast losses. As a result, we have substantially increased our reserves," said Ken Thompson, Wachovia's chief executive officer. The most painful decision was to reduce the dividend because it adversely affects our shareholders. But we believe the long-term benefit to

more

Table of Contents**WACHOVIA REPORTS 1ST QUARTER RESULTS; ANNOUNCES CAPITAL INITIATIVES/page 2**

shareholder value outweighs the disadvantage of the dividend reduction as we fortify our balance sheet against continued instability in the housing and capital markets.

It is important to note that in early 2007 in advance of the market dislocation, we took steps to bolster our liquidity and reduce market-related exposures in products originally intended for distribution, Thompson added. We have generally been a provider of liquidity to the market during this period of market disruption, and we also continue to reduce our market-related exposures. The actions we announced today will further enhance and ensure our ongoing financial flexibility to invest and drive future earnings growth. With strengthened reserves and capital, and our strong deposit base, we believe we are well-positioned to continue to successfully weather this uniquely challenging period.

Earnings Highlights

	Three Months Ended

Allowance for loan losses as % of loans, net	1.37		0.98		0.80	
Allowance for credit losses as % of loans, net (c)	1.41		1.02		0.84	

Edgar Filing: WACHOVIA CORP NEW - Form FWP

Net charge-offs as % of average loans, net	0.66	0.41	0.15
Nonperforming assets as % of loans, net, foreclosed properties and loans held for sale	1.70%	1.14	0.42

(a) Tax-equivalent.

(b) The first quarter of 2008 is based on estimates.

(c) The allowance for credit losses is the sum of the allowance for loan losses and the reserve for unfunded lending commitments.

Results include after-tax net merger-related expenses of 6 cents per share in the first quarter of 2008; these expenses did not affect earnings per share in the first quarter of 2007. Excluding the merger-related expenses, results were a net loss available to common stockholders of \$270 million, or 14 cents per share, in the first quarter of 2008. Results also include the impact of the A.G. Edwards, Inc., acquisition from October 1, 2007.

Table of Contents**WACHOVIA REPORTS 1ST QUARTER RESULTS; ANNOUNCES CAPITAL INITIATIVES/page 3****Wachovia Corporation**

(In millions)	Three Months Ended		
	March 31, 2008	December 31, 2007	March 31, 2007
Net interest income (<i>Tax-equivalent</i>)	\$ 4,805	4,674	4,537
Fee and other income	3,091	2,744	3,734
Total revenue (<i>Tax-equivalent</i>)	7,896	7,418	8,271
Provision for credit losses	2,831	1,497	177
Noninterest expense	5,441	5,786	4,621
Income (loss) from continuing operations before income taxes (benefits) (<i>Tax-equivalent</i>)	(531)	28	3,337
Income taxes (benefits) (<i>Tax-equivalent</i>)	(181)	(165)	1,035
Net income (loss) available to common stockholders	(393)	51	2,302
Average loans, net	465,936	449,805	415,261
Average core deposits	\$ 394,513	390,043	369,270

Other key trends in the first quarter of 2008 compared with the first quarter of 2007 included:

Revenue of \$7.9 billion on higher loan and deposit balances, while fee and other income declined due to net market disruption-related valuation losses of \$2.0 billion and significantly reduced fee income related to the disruption in the capital markets. Otherwise, strong momentum continued in fiduciary and asset management fees and brokerage commissions reflecting the A.G. Edwards acquisition and organic growth. Results included \$445 million in net gains related to adoption of new fair value accounting standards and a \$225 million gain related to the Visa initial public offering.

Net interest margin compression of 14 basis points year over year, although the margin rose 4 basis points from the fourth quarter of 2007. Net interest income rose modestly, reflecting growth in average commercial loans, up 26 percent, and average consumer loans, up 4 percent, as well as solid core deposit growth, up 7 percent. Average loan growth included the impact of \$7.3 billion of transfers to the loan portfolio from held-for-sale as well as strength in commercial, commercial real estate and traditional conforming mortgage loans. Deposit growth was led by strength in IRAs and money market accounts.

An 18 percent increase in noninterest expense largely reflecting the impact of A.G. Edwards, as well as growth in credit-related sundry expense.

Provision for credit losses of \$2.8 billion, which exceeded net charge-offs by \$2.1 billion. The provision largely reflected more severe deterioration in the residential housing market, particularly in specific markets in California and Florida, as well as the result of the refinements made to the credit reserve model for the payment option product. These refinements incorporate multiple and more granular factors regarding unprecedented consumer behavior, housing price deterioration and increased foreclosures. Net charge-offs were \$765 million, or an annualized 0.66 percent of average net loans. Total nonperforming assets including loans held for sale were \$8.4 billion, or 1.70 percent of loans, foreclosed properties and loans held for sale, largely reflecting increases in consumer real estate-related nonperforming assets due to the effects of the weakened housing industry.

Lines of Business

Edgar Filing: WACHOVIA CORP NEW - Form FWP

The following discussion covers the results for Wachovia's four core business segments and is on a segment earnings basis, which excludes net merger-related and restructuring expenses, other intangible amortization and discontinued operations. Segment earnings are the basis on which

more

Table of Contents**WACHOVIA REPORTS 1ST QUARTER RESULTS; ANNOUNCES CAPITAL INITIATIVES/page 4**

Wachovia manages and allocates capital to its business segments. In accordance with Wachovia's business segment methodology, provision expense in excess of charge-offs, which amounted to \$2.1 billion in the first quarter of 2008, is not allocated to business segments.

Pages 13 and 14 include a reconciliation of segment results to Wachovia's consolidated results of operations in accordance with GAAP.

General Bank Highlights

(In millions)	Three Months Ended		
	March 31, 2008	December 31, 2007	March 31, 2007
Net interest income <i>(Tax-equivalent)</i>	\$ 3,455	3,402	3,398
Fee and other income	990	929	845
Total revenue <i>(Tax-equivalent)</i>	4,500	4,389	4,290
Provision for credit losses	569	320	147
Noninterest expense	2,050	2,041	1,869
Segment earnings	\$ 1,195	1,287	1,444
Cash overhead efficiency ratio <i>(Tax-equivalent)</i>	45.55%	46.50	43.56
Average loans, net	\$ 311,447	303,269	288,229
Average core deposits	297,680	296,568	284,046
Economic capital, average	\$ 12,695	11,179	10,662

General Bank

The General Bank includes retail, small business and commercial customers. The first quarter of 2008 compared with the first quarter of 2007 included:

Earnings of \$1.2 billion, down \$249 million, driven by rapidly rising credit costs and related expenses, which overshadowed continued strong sales momentum reflected in total revenue of \$4.5 billion, up 5 percent.

Average loan growth of 8 percent, with double digit growth in wholesale businesses and 4 percent growth in mortgage lending as a decline in prepayments offset lower volumes on the payment option mortgage product.

Significant efforts in the mortgage business included a restructuring of the operating model, extensive loss mitigation efforts and initiatives to increase the volume of marketable mortgages.

A home equity lending decline of 41 percent, reflecting implementation of tightened credit standards. Over 95 percent of our home equity loans are originated through our branch network and other direct channels.

A 26 percent increase in auto loan originations

Edgar Filing: WACHOVIA CORP NEW - Form FWP

Average core deposit growth of 5 percent, largely reflecting strength in wholesale deposits, which were up 10 percent, and an increase of 4 percent in retail deposits.

Growth in net new retail checking accounts slowed to a still strong increase of 174,000 in the first quarter of 2008 compared with an increase of 268,000 in the first quarter of 2007.

Net new checking accounts include 139,000 linked to the new Way2Save accounts, which launched in mid-January 2008.

more

Table of Contents**WACHOVIA REPORTS 1ST QUARTER RESULTS; ANNOUNCES CAPITAL INITIATIVES/page 5**

17 percent growth in fee and other income, with strength in service charges, interchange income and mortgage banking fee income. Strong interchange income reflected an 18 percent increase in debit/credit card volume from the first quarter of 2007.

Noninterest expense up 10 percent due to growth in credit-related sundry expense, as well as on continued strategic investment in de novo branch activity, Western expansion and buildup in credit card operations. During the first quarter of 2008, 23 de novo branches were opened and 58 branches were consolidated. As a result of performance initiatives, operating leverage continued to improve, which enabled the continued strategic investment.

A \$422 million increase in the provision for credit losses largely reflecting rapid deterioration in consumer real estate in certain housing markets and higher losses on auto loans.

Wealth Management Highlights

(In millions)	Three Months Ended		
	March 31, 2008	December 31, 2007	March 31, 2007
Net interest income <i>(Tax-equivalent)</i>	\$ 181	183	181
Fee and other income	211	214	196
Total revenue <i>(Tax-equivalent)</i>	397	400	380
Provision for credit losses	5	7	1
Noninterest expense	246	249	247
Segment earnings	\$ 92	91	84
Cash overhead efficiency ratio <i>(Tax-equivalent)</i>	62.08%	62.27	65.12

Average core deposits	17,397	16,773	17,267
Economic capital, average	\$ 705	616	592

Wealth Management

Wealth Management includes private banking, personal trust, investment advisory services, charitable services, financial planning and insurance brokerage. The first quarter of 2008 compared with the first quarter of 2007 included:

Earnings of \$92 million on 4 percent revenue growth in challenging markets.

Strong fiduciary and asset management fees as a pricing initiative implemented in the third quarter of 2007 and new sales offset declines in equity valuations. Insurance commissions declined largely due to a soft market for insurance premiums and nonstrategic insurance account dispositions.

Relatively flat net interest income as solid loan growth offset deposit spread compression.

Edgar Filing: WACHOVIA CORP NEW - Form FWP

A slight decline in expense driven by efficiency initiatives, which offset the impact of private banking and Western expansion investment.

5 percent growth in assets under management to \$79.8 billion as asset gathering overcame market depreciation.

Economic capital, average	\$ 13,242	11,293	8,329

Corporate and Investment Bank

The Corporate and Investment Bank includes corporate lending, investment banking, and treasury and international trade finance. First quarter 2008 results compared with the first quarter of 2007 included:

A segment loss of \$77 million driven by \$1.6 billion in net valuation losses reflecting continued disruption in the capital markets and reduced origination volume in most market-related businesses.

Market valuation losses, net of applicable hedges, of:

\$339 million in subprime residential asset-backed collateralized debt obligations and other related exposures, compared with \$818 million in fourth quarter 2007, excluding discontinued operations;

\$521 million in commercial mortgage structured products, compared with \$600 million in fourth quarter 2007;

\$251 million in consumer mortgage structured products, compared with \$123 million in fourth quarter 2007;

\$309 million in leveraged finance net of fees, compared with a net \$93 million gain in fourth quarter 2007; and

\$144 million in non-subprime collateralized debt obligations and other structured products, compared with a \$59 million net gain in fourth quarter 2007.

Edgar Filing: WACHOVIA CORP NEW - Form FWP

A 44 percent increase in net interest income, which reflected 38 percent growth in average loans including the transfer into the loan portfolio at fair value of certain loans originally slated for disposition, as well as loan growth in the corporate lending and global financial institutions business.

Principal investing revenue of \$414 million, largely due to a net \$486 million of gains related to the adoption of new fair value accounting standards in January 2008, offset by mark-to-market losses in the direct investment portfolio.

more

Table of Contents**WACHOVIA REPORTS 1ST QUARTER RESULTS; ANNOUNCES CAPITAL INITIATIVES/page 7**

An 18 percent decline in noninterest expense primarily due to lower variable compensation and reduced headcount in investment banking.

Provision of \$197 million largely reflecting residential-related commercial real estate losses.

Capital Management Highlights

(In millions)	Three Months Ended		
	March 31, 2008	December 31, 2007	March 31, 2007
Net interest income (<i>Tax-equivalent</i>)	\$ 274	318	259
Fee and other income	2,191	2,211	1,477

Average core deposits	43,084	38,019	31,683
Economic capital, average	\$ 2,143	2,120	1,334

Capital Management

Capital Management includes retail brokerage services and asset management. The first quarter of 2008 compared with the first quarter of 2007 included:

Earnings of \$381 million on 42 percent revenue growth, which primarily reflected the A.G. Edwards acquisition. In addition, solid growth in retail brokerage managed account and other asset-based fees despite declining equity markets offset lower transactional revenue and equity syndicate distribution fees. The impact of FDIC sweep deposit growth of \$11.0 billion partially offset spread compression in the declining interest rate environment.

Record annuity sales of \$2.7 billion, including \$1.5 billion in the General Bank financial centers.

50 percent growth in noninterest expense largely due to the effect of A.G. Edwards, as well as higher legal expense and revenue-based commissions.

Total assets under management of \$258.7 billion at March 31, 2008, decreased 6 percent from December 31, 2007, primarily due to declining market valuations.

Edgar Filing: WACHOVIA CORP NEW - Form FWP

Wachovia Corporation (NYSE:WB) is one of the nation's largest diversified financial services companies, with assets of \$808.9 billion and market capitalization of \$53.8 billion at March 31, 2008. Wachovia provides a broad range of retail banking and brokerage, asset and wealth management, and corporate and investment banking products and services to customers through 3,300 retail financial centers in 21 states from Connecticut to Florida and west to Texas and California, and nationwide retail brokerage, mortgage lending and auto finance businesses. Globally, clients are served in selected corporate and institutional sectors and through more than 40 international offices. Our retail brokerage operations under the Wachovia Securities brand name manage more than \$1.1 trillion in client assets through 18,600 registered representatives in 1,500 offices nationwide. Online banking is available at wachovia.com; online brokerage products and services at wachoviasec.com; and investment products and services at evergreeninvestments.com.

WACHOVIA REPORTS 1ST QUARTER RESULTS; ANNOUNCES CAPITAL INITIATIVES/page 8

Forward-Looking Statements

This news release contains various forward-looking statements. A discussion of various factors that could cause Wachovia Corporation's actual results to differ materially from those expressed in such forward-looking statements is included in Wachovia's filings with the Securities and Exchange Commission, including its Current Report on Form 8-K dated April 14, 2008.

Explanation of Wachovia's Use of Certain Non-GAAP Financial Measures

In addition to results presented in accordance with GAAP, this news release includes certain non-GAAP financial measures, including those presented on page 2 and on page 11 under the captions "Earnings Excluding Merger-Related and Restructuring Expenses, and Discontinued Operations" and "Earnings Excluding Merger-Related and Restructuring Expenses, Other Intangible Amortization and Discontinued Operations", and which are reconciled to GAAP financial measures on pages 21 and 22. In addition, in this news release certain designated net interest income amounts are presented on a tax-equivalent basis, including the calculation of the overhead efficiency ratio.

Wachovia believes these non-GAAP financial measures provide information useful to investors in understanding the underlying operational performance of the company, its business and performance trends and facilitates comparisons with the performance of others in the financial services industry. Specifically, Wachovia believes the exclusion of merger-related and restructuring expenses, discontinued operations and the cumulative effect of a change in accounting principle permits evaluation and a comparison of results for on-going business operations, and it is on this basis that Wachovia's management internally assesses the company's performance. Those non-operating items are excluded from Wachovia's segment measures used internally to evaluate segment performance in accordance with GAAP because management does not consider them particularly relevant or useful in evaluating the operating performance of our business segments. In addition, because of the significant amount of deposit base intangible amortization, Wachovia believes the exclusion of this expense provides investors with consistent and meaningful comparisons to other financial services firms. Wachovia's management makes recommendations to its board of directors about dividend payments based on reported earnings excluding merger-related and restructuring expenses, other intangible amortization, discontinued operations and the cumulative effect of a change in accounting principle, and has communicated certain dividend payout ratio goals to investors on this basis. Management believes this payout ratio is useful to investors because it provides investors with a better understanding of and permits investors to monitor Wachovia's dividend payout policy. Wachovia also believes the presentation of net interest income on a tax-equivalent basis ensures comparability of net interest income arising from both taxable and tax-exempt sources and is consistent with industry standards. Wachovia operates one of the largest retail brokerage businesses in our industry, and we have presented an overhead efficiency ratio excluding these brokerage services, which management believes is useful to investors in comparing the performance of our banking business with other banking companies.

Although Wachovia believes the above non-GAAP financial measures enhance investors' understanding of its business and performance, these non-GAAP financial measures should not be considered an alternative to GAAP basis financial measures.

Earnings Conference Call and Supplemental Materials

Wachovia CEO Ken Thompson and CFO Tom Wurtz will review Wachovia's first quarter 2008 results in a conference call and audio web cast beginning at 8:00 a.m. Eastern Daylight Saving Time today. This review may include a discussion of certain non-GAAP financial measures. Supplemental materials relating to first quarter results, which also include a reconciliation of any non-GAAP measures to Wachovia's reported financials, are available on the Internet at Wachovia.com/investor, and investors are encouraged to access these materials in advance of the conference call.

Web cast Instructions: To gain access to the web cast, which will be listen-only, go to Wachovia.com/investor and click on the link "Wachovia First Quarter Earnings Audio Web cast." In order to listen to the web cast, you will need to download either Real Player or Media Player.

Teleconference Instructions: The telephone number for the conference call is 888-357-9787 for U.S. callers or 706-679-7342 for international callers. You will be asked to tell the answering coordinator your name and the name of your firm. Mention the conference Access Code: WB Investor.

Replay: Monday, April 14, by 12:00 Noon EST and continuing through 5 p.m. EST Friday, July 11. Replay telephone number is 706-645-9291; access code: 43662109.

	<u> </u>	<u> </u>	<u> </u>	<u> </u>	<u> </u>

-
- (a) Principally auto loans; nonaccrual status does not apply to student loans.
- (b) Troubled debt restructurings were not significant prior to the first quarter of 2008.
- (c) These ratios do not include nonperforming assets included in loans held for sale.
- (d) These ratios reflect nonperforming loans included in loans held for sale. Loans held for sale are recorded at the lower of cost or market value, and accordingly, the amounts shown and included in the ratios are net of the transferred allowance for loan losses and the lower of cost or market value adjustments.

* The letters included in the columns are provided to show how the various ratios presented in the tables on pages 21 and 22 are calculated. For example, return on average assets on a GAAP basis is calculated by dividing income (GAAP) by average assets (GAAP) (i.e., A/K) and annualized where appropriate.

Loss
of
\$350
million,
EPS
(a)
of
(\$0.20)
-

Operating loss of \$270 million, EPS of (\$0.14)
Core strength in General Bank, Capital Management and Wealth Management
overwhelmed by credit costs and continued market disruption losses

-
\$2.8 billion provision including \$1.1 billion Pick-a-Pay reserve build
Enhanced Pick-a-Pay credit modeling with greater emphasis on forecasted future changes in customer behaviors assuming continued house price depreciation, particularly in stressed markets
Expect further robust provisioning in 2008-2009

-
\$2.0 billion of market disruption-related losses including \$729 million on unfunded leveraged finance positions
Proactive actions provide solid foundation in order to further strengthen the balance sheet and build capital to top tier levels

-
Reduce dividend by 41% to quarterly level of \$0.375 per share
Annual capital retention of \$2.1 billion

-
Plans
to
raise
capital
of
approximately
\$7

-
8
billion
through
public
offering

-
Provides capacity to build Tier 1 capital ratio in excess of 8.8% by YE2009

Results significantly
affected by higher
credit costs and
continued market
disruption-related
losses

Significant actions
taken to strengthen
the balance sheet

1Q08 Quarterly highlights

(a) EPS calculated on net loss available to common stockholders of \$393 million, reflecting preferred dividends of \$43 million.

2

Financial highlights

Results include \$2.1 billion reserve build and \$2.0 billion of market disruption losses somewhat offset by \$445 million of FAS 157/159 fair value net gains and Visa IPO gain of \$225 million

NII up 6% YoY and up 3% QoQ on strong earning asset growth and improved margin

-

Low-cost core deposits up 7% YoY; up 3%

QoQ

Fees down 17% YoY on higher market
disruption losses;

up 13% QoQ

-

Effects of market disruption overwhelm
underlying strength in traditional banking

Expenses up 18% YoY and down 6% QoQ

-

QoQ declines driven by lower incentives
somewhat offset by higher FAS123R expense

New dividend level consistent with
anticipated 40-50% cash payout ratio over
intermediate horizon

General Bank summary

Segment earnings of \$1.2 billion, down 17%

YoY and 7% QoQ largely reflecting rising
credit costs

NII reflects balance sheet growth despite
margin compression and rising NPAs

Fees up 17% YoY reflecting strong fee
growth in most categories

-

Strong service charge and interchange income
growth on higher volumes

-

Mortgage banking fees up on higher marketable
origination volumes

-

Investment sales referral income up on in-bank
annuity sales

Modest expense growth

-

34% of expense increase driven by higher
credit-related expenses and 18% by growth
initiatives

Provision driven by higher losses in
consumer real estate and auto

-6.1%

Nationwide

1Q08

Trough

Peak

1Q08

Portfolio-weighted OFHEO-

based home price forecasts

At 3/31/08, new model results in a higher 12-month forward view of expected losses that required additional portfolio reserves of \$1.1 billion due to increased propensity to default tied to further home price declines

-

Reflects

February

current

LTVs

which

indicate

that

approximately

14%

of

the

Pick-a-Pay

portfolio

has

current

LTV > 100% with 75% in California and 10% in Florida

More precisely captures key factors observed to drive default rates and economic losses

Reflects

February

estimated

traditional

correlation

between

borrower

credit

profile

and

default

frequency

but

incorporates

the

view

that

changes

in

borrowers

equity

levels

are
a
greater
predictor
of
future
losses
than
FICO
scores

Includes approximately 20 loan / borrower characteristics to further enhance loss forecast by:

-
Borrower propensity to default and loss severity correlated to changes in the OFHEO index

-
Connecting borrower equity to projected changes in home prices by geographic region

Model variables influenced by management's current economic outlook:

-
Full year 2008 GDP of flat to 1% growth with negative growth in first half

-
Rising unemployment reaches 6% sometime in 2009

-
Management forecast of the OFHEO index: Currently estimate that we are roughly halfway through the housing price decline

Utilized newly developed loss forecasting model that more strongly correlates forward expected losses to changes in home prices and the resulting change in consumer behavior on default frequency and loss severity; less reliant on historical roll rates

Expect
trough to
occur in
mid-09

an
estimated
cumulative
losses
range
of

7

8%
over
the
remaining
life of the pool

As an illustration, a 7.5% cumulative loss scenario could imply that 20% of the loans in the portfolio default through foreclosure and suffer a loss of 45% of the original property values, on average, assuming loans were originated at a 75% LTV, plus disposition costs of 10% of the loan balance

These forecast outcomes may be affected by changes in a variety of factors including actual home price trends, economic conditions, changes in borrower behavior, regulatory changes and loss mitigation strategies

(a) Based on assumptions on page 21, as of March 31, 2008. Future changes in assumptions could cause forecasts to change.

(b) Assumes forecasted loan balances for 2008 and 2009.

Summary and Outlook

Expect 2Q08 net interest income to grow by approximately 5 - 7% over 1Q08 and then grow modestly over remaining period of 2008

-

Sources of growth to include:

Modest loan growth from 1Q08 levels

Continued deposit growth including growth in FDIC sweep deposits

Benefit of capital raise and lower dividend rate

Fees remain exposed to net market disruption losses/gains

No share repurchases in the rest of 2008

Targeted capital raise of approximately \$7 billion

Tax rate of 28.5 -

29%

Pick-a-Pay reserve model

Our use of OFHEO in reserve modeling

Office of Federal Housing Enterprise Oversight (OFHEO) is a widely recognized source of data that measures average price changes in home sales financed by conventional mortgages, purchased by Fannie Mae or Freddie Mac, and therefore the data excludes

information on home sales financed by jumbo loans.

We utilize the OFHEO data set as the basis for our allowance modeling for our Pick-a-Pay portfolio because we believe the data most closely represents the geographic diversity and

granularity, the lower average loan size and the higher average owner equity of this portfolio. OFHEO's data set is very robust, granular and covers a long time series which we believe is a critical foundation for any modeling exercise. Our historical data and model correlations have been calibrated to the sensitivities of the OFHEO index.

Notes on non-GAAP financial measures

The information contained herein includes certain non-GAAP financial measures.

Please

refer

to

our

First

Quarter

2008

Quarterly
Earnings
Report
for
additional
information
reconciling
non-GAAP
financial
measures
and

for an important explanation of our use of non-GAAP measures and reconciliation of those non-GAAP measures to GAAP.

Wachovia believes these non-GAAP financial measures provide information useful to investors in understanding the underlying performance of the company, its business and performance trends and facilitates comparisons with the performance of others in services industry.

Specifically,
Wachovia
believes
the
exclusion
of

A.G.
Edwards
(AGE)
and
European
Credit
Management
(ECM)
from
the
key

performance measures of fiduciary and asset management fees and expenses permits evaluation and a comparison of results for ongoing business operations, and it is on this basis that Wachovia management internally assesses the company's performance.

15,
references
to
Capital
Management's
results
excluding
AGE
and
ECM
reflect
the
following
growth
for

the
first
quarter
of
2008:

Fiduciary and asset management fees

\$360 million

Expenses

\$572 million

Table of Contents

44

Notes on non-GAAP financial measures

Wachovia also provides certain information regarding its auto loan portfolio on a "managed" basis, which is a non-GAAP financial measure. This non-GAAP financial measure combines auto loans reported on-balance sheet on a GAAP basis with auto loans that have been transferred to special purpose vehicles and are off-balance sheet. Management believes that providing information on a "managed" basis is useful to investors in understanding operational performance, trends, and facilitates comparisons with the performance of others in the financial services industry. Cross-references are made regarding the managed auto portfolio which is reconciled as follows for the first quarter of 2008, fourth quarter of 2007, and first quarter of 2007:

- (a) 1Q08, 4Q07 and 3Q07 include taxes on discontinued operations.
(b) The tax-equivalent tax rate applies to fully tax-equivalized revenues.
(c) The first quarter of 2008 is based on estimates.

1Q08 vs. 4Q07

Net loss of \$350 million; net loss of \$393 million, after preferred dividends, down \$444 million and down \$2.7 billion from 1Q07; net loss per share of \$0.20 down \$0.23

Results reflect a \$473 million increase in market disruption-related valuation losses of \$2.0 billion and higher credit costs, partially offset by fair value accounting gains and a gain from the Visa IPO

Momentum in traditional banking businesses, asset management and retail brokerage masked by effects of credit headwinds and continued market disruption

Revenues of \$7.9 billion up 6% from 4Q07; down 5% from 1Q07 despite the addition of A.G. Edwards (AGE)

Net interest income rose \$131 million, or 3%, as the benefits of our liability sensitive rate position, strong earning asset growth of \$8.9 billion, improving loan spreads and low-cost core deposit growth were somewhat offset by higher wholesale funding costs and increases in nonaccrual loans

Net interest margin increase of 4 bps to 2.92% reflects the benefit of our liability sensitive rate position and improving loan spreads, partially offset by higher wholesale funding including the effects of increased liquidity and rising nonaccrual loans

Fee income increased \$347 million as \$445 million of FAS 157/159 net gains, largely in principal investing, a \$225 million gain associated with the Visa IPO and improved advisory and underwriting fees were partially offset by a \$523 million increase in market disruption valuation losses and seasonal declines in service charges and commissions despite higher daily volumes; fiduciary and asset management fees, and other banking fees were stable

Table of Contents

Wachovia 1Q08 Quarterly Earnings Report

Other noninterest expense decreased \$391 million, or 7%, largely reflecting lower salaries and benefits expense, despite \$109 million in retirement-eligible employee stock compensation expense, as well as lower sundry expense; 1Q08 results included \$44 million relating to strategic growth initiatives and \$12 million of non-merger related severance costs

Average loans up 4% on growth of 6% in commercial and 2% in consumer; up 12% from 1Q07

Strength in foreign and commercial real estate including the \$3.3 billion average net effect of transfers into the loan portfolio from held-for-sale and large corporate reflecting strong growth and changing market conditions

Consumer growth driven by consumer real estate, auto and student

Average core deposits increased 1%; up 7% from 1Q07

Strong momentum in money market and interest checking reflecting strong sales and a flight to quality, partially offset by declines in CDs and lower DDA balances

Provision expense of \$2.8 billion increased \$1.3 billion largely reflecting increased risk in the consumer real estate, commercial and auto portfolios as well as higher charge-offs

Net charge-offs of \$765 million, or 66 bps of loans, reflecting higher losses in consumer real estate, commercial and auto

Tier 1 capital ratio of 7.5% relatively flat from 4Q07 despite the January 2008 issuance of \$3.5 billion of Tier 1 qualifying securities on lower net earnings

Trading account profits (losses)	(308)	(524)	(301)	195	128	(41)	
Principal investing	446	41	372	298	48		
Securities gains (losses)	(205)	(320)	(34)	23	53	(36)	
Other income	(630)	(321)	(286)	490	456	96	
Total fee and other income	\$ 3,091	2,744	2,933	4,240	3,734	13%	(17)

KEY POINTS

Fee and other income of \$3.1 billion increased \$347 million, or 13%, from 4Q07 and decreased \$643 million, or 17%, from 1Q07

1Q08 fees improved 13% largely driven by FAS 157/159 net gains, largely in principal investing, the Visa IPO gain, and stable fiduciary and asset management fees and other banking fees, which were more than offset by higher market disruption-related losses, seasonally lower service charges and insurance commissions, as well as modestly lower retail brokerage transaction revenue

(Please see page 5 for additional detail on market disruption-related losses)

Declines from 1Q07 reflect market disruption-related valuation losses and lower advisory and underwriting fees which more than offset higher fiduciary and asset management fees and commissions, partially reflecting merger activity, higher principal investing gains, and growth in service charges and interchange fees

Service charges declined 6% as seasonally lower consumer service charges more than offset a modest increase in commercial service charges; up 10% from 1Q07 driven by a 12% increase in consumer and 7% increase in commercial

Edgar Filing: WACHOVIA CORP NEW - Form FWP

Other banking fees were flat as growth in mortgage banking was largely offset by lower letter of credit and interchange fees reflecting seasonality; increased 20% from 1Q07 largely on increases in mortgage banking and interchange fees

Commissions declined \$56 million, or 6%, on lower brokerage and insurance commissions, including seasonality

Fiduciary and asset management fees were relatively flat despite lower valuation levels; results increased \$486 million from 1Q07 on the addition of AGE and strength in retail brokerage managed account and other asset-based fees

Advisory, underwriting and other investment banking fees increased 5% from depressed 4Q07 levels reflecting increased originations in high grade and equities despite continued weak overall market activity; results decreased 36% from strong 1Q07 levels driven by market disruption

Trading account losses of \$308 million improved \$216 million reflecting \$178 million lower market disruption-related valuation losses

Principal investing results improved \$405 million, and \$398 million from 1Q07, driven by FAS 157 net gains of \$486 million as well as gains in the direct investment portfolio, partially offset by losses in the public portfolio

Securities losses were \$205 million in 1Q08 compared to losses of \$320 million in 4Q07 and gains of \$53 million in 1Q07; 1Q08 results included market disruption-related impairment losses of \$480 million compared to \$327 million in 4Q07, partially offset by \$225 million in gains related to the Visa IPO

Other Income

(In millions)	2008	2007				1Q08 vs 4Q07	1Q08 vs 1Q07
	First Quarter	Fourth Quarter	Third Quarter	Second Quarter	First Quarter		
Consumer loan-related sale/ securitization activity	\$ 13	(115)	4	45	68	%	(81)
Commercial mortgage-related sale/ securitization activity	(246)	(365)	(381)	142	99	(33)	
Other income	(397)	159	91	303	289		
Total other income (loss)	\$ (630)	(321)	(286)	490	456	96%	

Other income results include:

\$128 million improvement in consumer loan sales/securitization activity driven by improved consumer real estate and student loan despite \$64 million in market disruption losses vs. \$59 million in 4Q07

\$119 million improvement in commercial mortgage-related sales/securitization activity largely reflecting a \$124 million reduction in market disruption-related losses

Higher market disruption-related losses of \$792 million in leveraged finance vs. \$87 million in 4Q07

No net market disruption-related results on subprime ABS CDO/CLO and other warehouses vs. a net loss of \$38 million in 4Q07

\$39 million increase in results relating to certain corporate investments

Total noninterest expense	\$ 5,441	5,786	4,525	4,890	4,621	(6)%	18

Other noninterest expense decreased \$391 million driven by lower salaries and employee benefits, legal costs and professional and consulting fees

1Q08 results included \$12 million of non-merger severance costs and \$44 million associated with growth initiatives including de novo/branch consolidations and Western expansion

Salaries and employee benefits expense decreased \$208 million driven by a decrease in salaries and incentives, which included lower revenue-based incentives and non-merger severance expense, somewhat offset by \$109 million higher retirement-eligible employee stock compensation expense; up 10% from 1Q07 largely due to merger activity

Occupancy and equipment expense relatively flat reflecting continued expense discipline; up 13% from 1Q07 largely reflecting merger activity

Professional and consulting fees decreased \$75 million reflecting seasonally higher expense in 4Q07

Sundry expense decreased \$113 million, or 15%, driven by lower legal costs

Total core deposits	\$ 394,513	390,043	379,009	378,496	369,270	1%	7

KEY POINTS

Trading assets increased \$7.0 billion, or 18%, primarily due to \$6.8 billion in securities moved to trading from available for sale concurrent with the election to carry them at fair value under SFAS 159; average VAR of \$66 million vs. \$44 million in 4Q07

Securities decreased \$5.0 billion, or 4%, as a \$6.8 billion decrease related to securities moved to trading as noted above and \$1.5 billion in sales/maturities were partially offset by the \$3.2 billion average effect of consumer real estate securitizations; the average duration of the securities portfolio increased to 3.5 years from 3.4 years in 4Q07, driven by increased balances in mortgage-backed securities

Commercial loans increased \$10.4 billion, or 6%, on higher foreign and commercial real estate, including the \$3.2 billion average net effect of \$5.0 billion in transfers to the portfolio from held for sale, growth in large corporate loans, higher middle-market and business banking as well as the \$219 million average effect of \$644 million of leveraged finance loans transferred from held for sale; period-end commercial loans up \$13.1 billion

Consumer loans increased \$5.7 billion, or 2%, reflecting the \$1.3 billion average net effect of transfers from held for sale driven by real estate secured and auto, as well as growth in consumer real estate, student and auto, partially offset by the \$3.2 billion average effect of consumer real estate sales and securitizations; period-end consumer loans up \$5.4 billion with growth in real estate secured, auto and student, partially offset by \$2.3 billion of consumer real estate transferred to held for sale at quarter end

Loans held for sale declined \$7.4 billion as transfers to the portfolio in commercial and consumer real estate and auto, sales activity and lower originations in commercial real estate were somewhat offset by leveraged finance fundings

Other earning assets down 6% on wholesale funding changes including lower fed funds sold and interest bearing bank balances

Table of Contents

Wachovia 1Q08 Quarterly Earnings Report

Total average earning assets rose \$8.9 billion, or 1%, and 11% from 1Q07

Core deposits increased \$4.5 billion, or 1%, reflecting strong momentum in money market, interest checking and brokerage FDIC sweep products due to a flight to quality and including \$1.5 billion of FDIC average deposits from AGE, partially offset by declines in CDs and savings products; up 7% from 1Q07

Average short-term borrowings decreased \$2.2 billion, or 4%, from 4Q07

Average long-term debt increased \$6.8 billion, or 4%, and increased \$23.6 billion from 1Q07

(a) Lower of cost or market value adjustments exclude amounts related to unfunded commitments. Market disruption-related write-downs on unfunded commitments amounted to \$729 million, \$78 million and \$311 million in the first quarter of 2008 and in the fourth and third quarters of 2007, respectively.

(b) Includes \$1.8 billion in third quarter 2007 in connection with the consolidation of a structured lending vehicle; first quarter of 2008 and fourth quarter of 2007 include funding of the structured lending vehicle's commitments amounting to \$54 million and \$159 million, respectively.

(c) Nonperforming assets included in loans held for sale at March 31, 2008 and at December 31, September 30, June 30 and March 31, 2007, were \$5 million, \$62 million, \$59 million, \$42 million and \$26 million, respectively.

Period-end loans held for sale of \$11.4 billion decreased \$5.3 billion

Loans held for sale related to core business activity decreased \$6.7 billion primarily due to lower foreign and commercial real estate, which included a net \$957 million of sale and securitization activity and \$3.5 billion in transfers to the portfolio; consumer activity included a net \$2.7 billion transfer of loans to the portfolio driven by real estate and auto, partially offset by a net \$1.3 billion in origination activity; loan syndication positions decreased \$469 million

In 1Q08, we originated \$5.9 billion of consumer mortgages and delivered \$5.0 billion to agencies/privates

Loans held for sale related to portfolio management activity increased \$1.3 billion reflecting net transfers into held for sale of \$2.3 billion primarily due to consumer real estate, partially offset by \$990 million of commercial sale activity

KEY POINTS

Total NPAs of \$8.4 billion rose \$3.0 billion driven by a \$1.8 billion increase in consumer real estate and a \$691 million increase in commercial real estate; up 58 bps to 1.74% of loans

Consumer real estate nonaccrual loan growth reflects the continued deterioration in the housing market, particularly in California and Florida, and includes \$632 million in modified loans

Commercial real estate nonaccrual loan growth largely relates to residential real estate loans in the Real Estate Financial Services (REFS) portfolio

Provision expense of \$2.8 billion largely reflecting the effects of continuing significant deterioration in the housing market

Results included \$2.1 billion of reserve build largely reflecting higher expected losses for the consumer real estate and auto portfolios as well as continued deterioration in estimated default frequency and loss severity in the commercial portfolio

Net charge-offs of \$765 million, or 66 bps of average loans, increased \$304 million driven by higher consumer real estate, commercial and installment losses

Allowance for credit losses of \$6.8 billion, or 1.41% of net loans

Allowance for loan losses covers annualized 1Q08 net charge-offs 2.15 times

Allowance reflects higher expected losses across our loan portfolio, particularly in our residential mortgage portfolio, on increased frequency and severity

(a) Principally auto loans.

(b) Annualized.

Net charge-offs in the loan portfolio of \$765 million increased \$304 million, or 66%, driven by growth in consumer real estate, commercial and auto; annualized net charge-offs up 25 basis points to 0.66% of average loans

Commercial net charge-offs of \$237 million increased \$75 million, or 29 bps, to 0.41% of loans

Commercial net charge-offs of \$157 million increased \$112 million driven in part by a \$66 million loss associated with a loan that financed the sale of \$255 million of residential subprime mortgage assets

Commercial real estate net charge-offs of \$80 million, or 0.73% of loans, declined \$37 million on lower income producing losses

Consumer net charge-offs of \$528 million increased \$229 million, or 33 bps to 0.79%, driven by a \$194 million increase in consumer real estate net charge-offs and \$35 million higher installment loan losses

1Q08 results include \$341 million in consumer real estate losses, including \$240 million in the Pick-a-Payment portfolio, \$29 million in traditional mortgage and \$73 million in home equity

Installment loan net charge-offs of \$185 million were driven by auto losses of \$145 million and consumer DDA overdraft losses of \$23 million

Allowance for credit losses							
as % of loans, net	1.41%	1.02	0.82	0.83	0.84		

- (a) The allowance for credit losses is the sum of the allowance for loan losses and the reserve for unfunded lending commitments.
(b) The provision related to loans transferred or sold includes recovery of lower of cost or market losses.
(c) These ratios do not include nonperforming assets included in loans held for sale.

Allowance for credit losses increased \$2.1 billion to \$6.8 billion, reflecting increased risk in the consumer real estate, commercial and auto portfolios largely resulting from a more uncertain credit environment following a dramatic downturn in the residential housing market, as well as continued loan growth

\$1.6 billion of the increase related to consumer

\$1.5 billion reflects an increase in our expected loss factors on our consumer real estate portfolios driven by continued market weakness in certain geographic regions, particularly California and Florida

\$1.1 billion associated with the Pick-a-Payment portfolio to 155 bps of loans compared to 66 bps at the end of 4Q07

\$242 million of the increase related to our home equity portfolio to 79 bps of loans

\$114 million of the increase related to auto, largely reflecting higher expected losses to 321 bps of loans

\$253 million of the increase related to commercial

\$144 million reflects an increase in FAS 114 reserves and \$109 million relates to higher expected losses on performing loans given the continued economic weakness in large part influenced by the impact of the downturn in the housing market on related commercial sectors

\$165 million of the increase related to growth in unallocated reserves due to increased credit risk uncertainty stemming from economic and other environmental factors

As a percentage of loans, the allowance for loan losses of 1.37% and the allowance for credit losses of 1.41% both rose 39 bps

(b) Restructured loans are not significant.
(c) These ratios do not include nonperforming assets included in loans held for sale.
(d) These ratios reflect nonperforming assets included in loans held for sale.

Nonperforming loans in the loan portfolio of \$7.8 billion increased \$2.8 billion driven by growth in consumer and commercial real estate

Commercial nonaccruals of \$2.7 billion rose \$1.0 billion driven by a \$691 million increase in commercial real estate

Commercial real estate nonaccruals of \$1.8 billion included \$615 million in new REFS portfolio inflows following the 4Q07 and 1Q08 reviews of all land and condominium loans as well as residential-related loans with an average loan balance in excess of \$2 million; \$477 million of this increase related to the residential portion of the REFS portfolio

Table of Contents

Wachovia 1Q08 Quarterly Earnings Report

Commercial, financial and agricultural nonaccruals of \$908 million rose \$306 million

Consumer nonaccruals of \$5.2 billion increased \$1.9 billion largely on consumer real estate and included \$1.4 billion from the Pick-a-Payment portfolio

1Q08 results include \$632 million of Pick-a-Payment modified loans vs. \$286 million in 4Q07

\$253 million of the increase reflects non-branch originated Alt-A loans in the Corporate and Investment Bank transferred at market value from held-for-sale to the portfolio

1Q08 period-end average LTV of the consumer real estate nonaccrual loan portfolio of 75% based on values at origination and only 3% of nonaccrual loans were originated with an LTV of 90% or higher

\$75 million, or 1.5%, of consumer real estate nonaccrual loans secured by a second lien

Foreclosed properties of \$530 million increased \$141 million driven by consumer real estate

Pick-a-Payment foreclosed properties increased \$67 million to \$237 million, up 282 properties to 917

During the quarter 825 properties were sold compared with 1,107 new properties reflecting our strategy of aggressive resolution of problem assets

Wachovia 1Q08 Quarterly Earnings Report

SUMMARY OPERATING RESULTS**BUSINESS SEGMENTS**

Business segment results are presented excluding (i) merger-related and restructuring expenses, (ii) deposit base intangible and other intangible amortization expense, (iii) amounts presented as discontinued operations, and (iv) the cumulative effect of a change in accounting principles. This is the basis on which we manage and allocate capital to our business segments. We continuously assess assumptions, methodologies and reporting classifications to better reflect the true economics of our business segments and the management of our businesses.

A provision for credit losses is allocated to each core business segment based on net charge-offs, and the difference between the total for each segment and the consolidated provision for credit losses is recorded in the Parent segment.

In order to remove interest rate risk from each core business segment, the management reporting model employs a funds transfer pricing (FTP) system. The FTP system matches the duration of the funding used by each segment to the duration of the assets and liabilities contained in each segment. Matching the duration, or the effective term until an instrument is expected to reprice or mature, allocates interest income and/or interest expense to each segment to insulate its resulting net interest income from interest rate risk.

In a falling rate environment, we experience a tightening spread between deposit costs and wholesale funding costs. However, our FTP system passes the effect of this tightening to deposit-providing business units on a lagged basis. Additionally, the effect of the FTP system is a decrease in charges to business units for funding to support predominantly floating-rate assets. The impact of lower rates earned on floating-rate assets and lagging rates on longer duration deposits is captured in the central money book in the Parent. Interest rate risk at Wachovia is actively managed at the corporate level and is unaffected by volatility in the central money book that may arise as a result of our FTP methodology.

ADOPTION OF NEW ACCOUNTING STANDARDS

On January 1, 2008, we adopted Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements, and SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities. SFAS 157 establishes a framework for measuring fair value under U.S. GAAP, expands disclosures about fair value measurements and provides new income recognition criteria for certain derivative contracts. SFAS 157 does not establish any new fair value measurements; rather it defines fair value for other accounting standards that require the use of fair value for recognition or disclosure. SFAS 159 permits companies to elect to carry certain financial instruments at fair value with corresponding changes in fair value recorded in the results of operations. The effect of adopting SFAS 157 is recorded either directly to first quarter 2008 results of operations or as a cumulative effect of a change in accounting principle through an adjustment to beginning retained earnings on January 1, 2008, depending on the nature of the fair value adjustment. The transition adjustment for SFAS 159 is recorded as a cumulative effect of a change in accounting principle through an adjustment to beginning retained earnings on January 1, 2008.

The adoption of SFAS 157 resulted in net gains in the first quarter 2008 results of operations of \$517 million pre-tax related primarily to a change in the methodology used to calculate the fair value of certain investments in private equity funds held in a wholly-owned investment company. Also, on January 1, 2008, we recorded a \$38 million after-tax gain (\$61 million pre-tax) as a cumulative effect adjustment to beginning retained earnings related to removal of blockage discounts previously applied in determining the fair value of certain actively traded public equity investments and to profits previously deferred on certain derivative transactions. SFAS 157 prohibits the use of blockage discounts in determining the fair value of financial instruments.

Upon adoption of SFAS 159, we elected to record certain existing securities available for sale and a small percentage of our loans held-for-sale portfolio at fair value, and in connection therewith recorded a \$38 million after-tax (\$60 million pre-tax) charge to 2008 beginning retained earnings as a cumulative effect of the adoption of SFAS 159. During first quarter 2008, we elected fair value for certain newly originated retail mortgage loans held for sale, resulting in gains of \$42 million in results of operations. Securities elected upon adoption and their related interest-rate hedges resulted in a net \$114 million charge to results of operations. Prospectively, we plan to elect fair value for certain newly originated loans and loans held for sale, certain purchased securities and certain debt issuances with related unrealized gains and losses reported in the results of operations.

Table of Contents

Wachovia 1Q08 Quarterly Earnings Report

To summarize, the total impact of adoption of SFAS 157 was a net gain of \$517 million, and the total impact of adoption of SFAS 159 was a net charge of \$72 million, for a total net gain of \$445 million in results of operations.

On January 1, 2008, we adopted two EITF issues relating to the accounting for split-dollar life insurance policies that we hold on certain current and former employees. The impact of adoption of these standards amounted to a \$19 million after-tax reduction in beginning retained earnings.

INVESTMENT IN BLUEPOINT

Wachovia controls 100% of the outstanding equity of BluePoint Re Limited (BluePoint), a Bermuda-based monoline bond reinsurer, and accordingly consolidates this subsidiary. BluePoint management is pursuing a restructuring strategy that, if completed, would lead to a significant reduction in Wachovia's ownership interest in BluePoint and result in de-consolidation of BluePoint in Wachovia's financial statements.

Management currently expects that a resolution with respect to BluePoint will be effected by September 30, 2008. Accordingly, the results for the third and fourth quarters of 2007 have been reclassified to reflect the results of BluePoint as a discontinued operation. Results from inception of BluePoint in 2005 through the third quarter of 2007 were not material, and accordingly, have not been included in discontinued operations.

In 2007, BluePoint recorded significant losses on ABS CDO certain derivative instruments (principally, credit default swaps on ABS CDOs) and these losses through December 31, 2007, approximated substantially all of Wachovia's investment in BluePoint and were included in Wachovia's 2007 consolidated financial results. Wachovia has no further obligation to inject capital in BluePoint. BluePoint continued to record these instruments at fair value in the first quarter of 2008. In estimating the fair value of these instruments under SFAS 157, a company must consider, among other things, its own credit rating, which in this case is BluePoint's. As Wachovia has no obligation to fund losses in excess of BluePoint's equity, BluePoint assessed the discount required in valuing these instruments to reflect a market participant's view of BluePoint's non-performance risk. BluePoint's valuation at March 31, 2008, reflected a very significant discount for its non-performance risk, such that BluePoint recorded no further loss on the derivative instruments in the quarter. Accordingly, our first quarter 2008 consolidated results reflect no additional losses in discontinued operations.

GOODWILL

We test goodwill for impairment on an annual basis, or more often if events or circumstances indicate there may be impairment. If the carrying amount of a reporting unit's goodwill exceeds its implied fair value, we would recognize an impairment loss in an amount equal to that excess. A reporting unit is our sub-segment level.

Historically, we determined fair values of reporting units using two methods, one based on market earnings multiples of peer companies for each reporting unit, and the other based on discounted cash flow models with estimated cash flows based on internal forecasts of revenues and expenses. In the first quarter of 2008, we added a third method, one based on the previously described market earnings multiples of peer companies adjusted to include a control premium calculated based on comparable transactions for each reporting unit. The earnings multiples for the first method ranged between 8.7 times and 17.2 times. The estimated cash flows for the second method used market-based discount rates ranging from 12.4 percent to 17.8 percent. The earnings multiple method adjusted for a control premium ranged from 11.8 times to 23.7 times. These three methods provide a range of valuations we use in evaluating goodwill for possible impairment. Also, we stress the results of each of our three testing methods by 20% to identify areas where additional investigation or procedures may be necessary to complete our analysis.

Our goodwill impairment testing indicated that none of our goodwill is impaired at March 31, 2008. However, as a result of the market disruption, the impact of which is demonstrated by the further spread between our market capitalization and our book value, the excess of the fair value over the carrying value of several of our reporting units continues to narrow. A prolonged period of market disruption, or further market deterioration, may result in the impairment of our goodwill in the future.

(b) Retail and small business.

SEGMENT EARNINGS OF \$1.2 BILLION, DOWN 7% AND 17% FROM 1Q07

Revenue of \$4.5 billion increased 3% and 5% from 1Q07

Net interest income rose \$53 million, or 2%, as 3% loan and low-cost core deposit growth more than offset the effect of rising nonperforming assets and lower deposit spreads

Strong fee growth of 7% reflected improved mortgage banking on improved securitization spreads and higher marketable volumes, partially offset by seasonally lower consumer service charges; fees were up 17% from 1Q07 on strong consumer service charge growth and robust interchange income on higher volumes

Provision expense increased \$249 million to \$569 million driven by higher losses in consumer real estate

Expenses were relatively flat, reflecting strong core expense discipline, despite strategic investment, as well as higher loss mitigation and real estate owned (REO) expense

Includes \$30 million in retirement-eligible stock compensation expense

Reflects strategic investment spend of \$42 million including \$19 million of de novo and branch consolidation costs and \$23 million relating to the Western expansion

Average loans grew 3% and 8% from 1Q07

Consumer loans increased \$5.9 billion, or 3%, driven by growth in consumer real estate, student and auto

Commercial loans up \$2.3 billion, or 3%, driven by growth in middle-market and business banking

Average core deposits were relatively stable as strong momentum in money market and interest checking reflecting strong sales and a flight to quality were partially offset by declines in CDs and lower DDA balances

Retail net new checking account sales of 174,000 compared with 94,000 in 4Q07

422,000 Way2Save accounts opened to date and include 139,000 linked to new checking accounts

(a) Includes \$39 billion in assets managed by and reported in Capital Management.

SEGMENT EARNINGS OF \$92 MILLION, UP 1% AND 10% FROM 1Q07

Revenue of \$397 million decreased 1%, up 4% from 1Q07

Net interest income declined 1% as tighter spreads more than offset strong growth in average loans and core deposits

Fee and other income decreased 1% as record fiduciary and asset management fees were more than offset by lower insurance commissions on continued market weakness

Fiduciary and asset management fees included a \$12 million increase related to a receivables adjustment driven in part by 2007 pricing increases which more than offset declines in equity valuations

Expenses decreased 1% as efficiency initiatives and lower severance expense more than offset \$8 million in retirement eligible employee stock compensation expense

Average loans grew 3% and 10% from 1Q07, led by commercial lending

Assets under management decreased 5% from 4Q07 due to market performance; up 5% vs. 1Q07 as asset gathering overcame market depreciation

SEGMENT LOSS OF \$77 MILLION, IMPROVED \$354 MILLION; DOWN \$627 MILLION FROM 1Q07

Revenue of \$823 million increased \$440 million and decreased \$959 million from 1Q07

Results reflect the continued effect of the market disruption with valuation losses of \$1.6 billion somewhat offset by \$539 million of net gains related to FAS 157/159 fair value accounting adoption, largely in principal investing

Edgar Filing: WACHOVIA CORP NEW - Form FWP

Net interest income increased \$44 million, or 4%, largely reflecting higher trading related income in global rate products and equities as well as increased loan outstandings in structured products and corporate lending

Average loans rose 10% led by 4Q07 and 1Q08 transfers of commercial and residential real estate and leveraged finance loans from held for sale to the portfolio as well as growth in corporate lending; up 38% from 1Q07

Fee and other income increased \$396 million driven by principal investing largely reflecting the adoption of the new accounting standard on fair value, improved advisory and underwriting fees and service charges, partially offset by \$175 million higher market disruption-related losses and reduced origination volume across most investment banking areas; down \$1.3 billion from 1Q07

(Please see page 22 for additional detail on market disruption-related losses)

Principal investing gains of \$447 million increased \$405 million from 4Q07 and included \$486 million in fair value accounting adjustments, partially offset by mark-to-market losses in the direct investment portfolio

Securities losses of \$66 million improved \$194 million from losses of \$260 million in 4Q07 due to lower market disruption-related losses in structured products

Trading account losses of \$247 million improved \$298 million from losses of \$545 million largely reflecting lower net market disruption-related valuation losses of \$399 million vs. \$577 million in 4Q07

Advisory and underwriting revenue of \$308 million increased \$7 million from 4Q07 reflecting increased originations in high grade and equities despite the continued negative impact of the credit market disruption on investment banking activity

Other income decreased \$495 million to a net loss of \$889 million on a \$548 million increase in market disruption-related losses, largely in leveraged finance, partially offset by lower write-downs in structured products as well as reduced lower of cost or market valuation losses on loans held for sale

Table of Contents

Wachovia 1Q08 Quarterly Earnings Report

Provision expense increased \$85 million largely driven by higher losses in residential-related commercial real estate as well as increased losses in commercial loans collateralized by residential mortgage asset-backed securities

Expenses decreased \$205 million, or 22%, driven by lower salaries and incentives despite \$15 million in retirement-eligible employee stock compensation expense; down 18% from 1Q07

Net market disruption-related valuation losses were \$1.6 billion and reflected higher leveraged finance and consumer mortgage-related losses, partially offset by decreased marks in structured product warehouses (CDO/CLO and other structured products) and commercial mortgage

(a) Includes \$39 billion in assets managed for Wealth Management, which are also reported in that segment.

SEGMENT EARNINGS OF \$381 MILLION, UP 4% AND UP 22% FROM 1Q07 INCLUDING THE EFFECT OF AGE

Revenue of \$2.5 billion down 3%; up 42% from 1Q07 including \$718 million relating to acquisitions

Net interest income declined 14% as FDIC deposit growth of \$5.0 billion reflecting organic growth including increases from AGE was more than offset by spread compression

Fee and other income decreased \$20 million, or 1%, on slightly lower retail brokerage commissions and asset management fees reflecting lower valuations partially offset by improvement from lower 4Q07 levels which included a \$17 million valuation loss on certain asset-backed commercial paper purchased from Evergreen money market funds in 3Q07; up \$714 million, or 48%, from 1Q07

Expenses decreased \$83 million, or 4%, driven by lower commissions, other incentives and legal costs, partially offset by \$30 million in retirement eligible employee stock compensation expense; up 50% from 1Q07 largely reflecting merger activity and legal costs

Assets under management decreased 6% largely reflecting lower market valuations

Growth in recently hired, high producing brokers offset by lower producing broker attrition

Strong growth in Series 6 Financial Advisors throughout footprint, including Western region

AGE integration on track

Combined broker-dealers

Re-branding under way

Credit product rollout

Retail Brokerage Transaction

The Retail Brokerage Services sub-segment results shown in the above table include 100% of the results of the Wachovia Securities retail brokerage business which is the combination of Wachovia and Prudential's retail brokerage operations. The combined entity is owned by Wachovia Securities Financial Holdings, LLC (WSFH), which is a consolidated subsidiary of Wachovia Corporation for GAAP purposes.

As a result of Wachovia's contribution to WSFH of the retail securities business of A.G. Edwards on January 1, 2008, Prudential Financial's percentage interest in WSFH has been diluted as of that date based on the value of the contributed business relative to the value of WSFH. Although the adjustment in Prudential Financial's interest will be effective as of the January 1, 2008, contribution date, the valuations necessary to calculate the precise reduction in that percentage interest are not yet complete. Based on currently available information, Wachovia estimates that Prudential Financial's percentage interest will be diluted from its pre-contribution interest of 38% to approximately 23% as a result of the A.G. Edwards contribution.

Prudential Financial's minority interest is included in minority interest expense reported in the Parent (see page 29) and in Wachovia Corporation's consolidated statements of income on a GAAP basis, which differs from our segment reporting as noted on page 1. For the three months ended March 31, 2008, Prudential Financial's pre-tax minority interest on a GAAP basis was \$48 million. This amount may be adjusted higher or lower in a subsequent quarter if the final valuations differ from Wachovia's current estimate.

Edgar Filing: WACHOVIA CORP NEW - Form FWP

The Retail Brokerage Services sub-segment results reported in the above table also include our Insurance Services business, as well as additional corporate allocations not included in the Wachovia Securities Financial Holdings results.

Capital Management Eliminations

In addition to the above sub-segments, Capital Management results include eliminations among business units. Certain brokerage commissions earned on mutual fund sales by our brokerage sales force are eliminated and deferred in the consolidation of Capital Management reported results. In 1Q08, brokerage revenue and expense eliminations were a reduction of \$2 million and \$3 million, respectively.

Wachovia 1Q08 Quarterly Earnings Report

EXPLANATION OF OUR USE OF CERTAIN NON-GAAP FINANCIAL MEASURES

In addition to results presented in accordance with GAAP, this quarterly earnings report includes certain non-GAAP financial measures, including those presented on pages 1 and 3 under the captions **Earnings Reconciliation**, and **Other Financial Measures**, with the sub-headings **Earnings excluding merger-related and restructuring expenses**, **Earnings excluding merger-related and restructuring expenses, and discontinued operations** and **Earnings excluding merger-related and restructuring expenses, other intangible amortization and discontinued operations**, and which are reconciled to GAAP financial measures on pages 32-35. In addition, in this quarterly earnings report certain designated net interest income amounts are presented on a tax-equivalent basis, including the calculation of the overhead efficiency ratio.

Wachovia believes these non-GAAP financial measures provide information useful to investors in understanding the underlying operational performance of the company, its business and performance trends and facilitates comparisons with the performance of others in the financial services industry. Specifically, Wachovia believes the exclusion of merger-related and restructuring expenses and discontinued operations permits evaluation and a comparison of results for on-going business operations, and it is on this basis that Wachovia's management internally assesses the company's performance. Those non-operating items are excluded from Wachovia's segment measures used internally to evaluate segment performance in accordance with GAAP because management does not consider them particularly relevant or useful in evaluating the operating performance of our business segments. In addition, because of the significant amount of deposit base intangible amortization, Wachovia believes the exclusion of this expense provides investors with consistent and meaningful comparisons to other financial services firms. Wachovia's management makes recommendations to its board of directors about dividend payments based on reported earnings excluding merger-related and restructuring expenses, other intangible amortization, discontinued operations and the cumulative effect of a change in accounting principle, and has communicated certain dividend payout ratio goals to investors on this basis. Management believes this payout ratio is useful to investors because it provides investors with a better understanding of and permits investors to monitor Wachovia's dividend payout policy. Wachovia also believes the presentation of net interest income on a tax-equivalent basis ensures comparability of net interest income arising from both taxable and tax-exempt sources and is consistent with industry standards. Wachovia operates one of the largest retail brokerage businesses in our industry, and we have presented an overhead efficiency ratio excluding these brokerage services, which management believes is useful to investors in comparing the performance of our banking business with other banking companies.

Although Wachovia believes the above non-GAAP financial measures enhance investors' understanding of our business and performance, these non-GAAP financial measures should not be considered an alternative to GAAP basis financial measures.
