GRACO INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. The consolidated balance sheet of Graco Inc. and Subsidiaries (the Company) as of July 1, 2011 and the related statements of earnings for the thirteen and twenty-six weeks ended July 1, 2011 and June 25, 2010, and cash flows for the twenty-six weeks ended July 1, 2011 and June 25, 2010 have been prepared by the Company and have not been audited.

In the opinion of management, these consolidated financial statements reflect all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the financial position of Graco Inc. and Subsidiaries as of July 1, 2011, and the results of operations and cash flows for all periods presented.

In the fourth quarter of 2010, the Company changed its cash flow presentation of notes payable activity, for all periods presented, to separately disclose borrowings and payments. The Company also changed the cash flow presentation of activity on the swingline portion of its long-term revolving credit arrangement by changing the method it uses to accumulate borrowing and payment amounts. In prior periods, such activity was disclosed on a net basis. The effect of this change was to increase both borrowings and payments on long-term line of credit by \$46 million in the first half of 2010. These changes had no impact on net cash used in financing activities.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. Therefore, these statements should be read in conjunction with the financial statements and notes thereto included in the Company's 2010 Annual Report on Form 10-K.

The results of operations for interim periods are not necessarily indicative of results that will be realized for the full fiscal year.

10. The Company accounts for all derivatives, including those embedded in other contracts, as either assets or liabilities and measures those financial instruments at fair value. The accounting for changes in the fair value of derivatives depends on their intended use and designation.

As part of its risk management program, the Company may periodically use forward exchange contracts and interest rate swaps to manage known market exposures. Terms of derivative instruments are structured to match the terms of the risk being managed and are generally held to maturity. The Company does not hold or issue derivative financial instruments for trading purposes. All other contracts that contain provisions meeting the definition of a derivative also meet the requirements of, and have been designated as, normal purchases or sales. The Company's policy is to not

enter into contracts with terms that cannot be designated as normal purchases or sales.

Table of Contents

The Company periodically evaluates its monetary asset and liability positions denominated in foreign currencies. The Company enters into forward contracts or options, or borrows in various currencies, in order to hedge its net monetary positions. These instruments are recorded at current market values and the gains and losses are included in other expense (income), net. The notional amount of contracts outstanding as of July 1, 2011, totaled \$23 million. The Company believes it uses strong financial counterparts in these transactions and that the resulting credit risk under these hedging strategies is not significant.

The Company uses significant other observable inputs to value the derivative instruments used to hedge interest rate volatility and net monetary positions, including reference to market prices and financial models that incorporate relevant market assumptions. The fair market value and balance sheet classification of such instruments follows (in thousands):

	Balance Sheet Classification	July 1, 2011	Dec 31, 2010
Gain (loss) on interest rate hedge contracts	Other current liabilities	\$ -	\$ (454)
Gain (loss) on foreign currency forward contracts			
Gains		\$ 41	\$ 92
Losses		(344)	(284)
Net	Other current liabilities	\$ (303)	\$ (192)

11. In March 2011, the Company entered into a note agreement and sold \$150 million of unsecured notes (series A and B) in a private placement. Proceeds were used to repay revolving line of credit borrowings and invested in cash equivalents. In July 2011, the Company sold an additional \$150 million in unsecured notes (series C and D). Proceeds were invested in cash equivalents.

Interest rates and maturity dates on the four series of notes are as follows (dollars in millions):

Series	Amount	Rate	Maturity
A	\$ 75	4.00 %	March 2018
B	\$ 75	5.01 %	March 2023
C	\$ 75	4.88 %	January 2020
D	\$ 75	5.35 %	July 2026

The note agreement requires the Company to maintain certain financial ratios as to cash flow leverage and interest coverage.

The Company is in compliance with all financial covenants of its debt agreements.

The estimated fair value of the notes sold in March 2011 is not significantly different from the \$150 million carrying amount as of July 1, 2011.

Table of Contents

12. In April 2011, the Company entered into a definitive agreement to purchase the finishing businesses of Illinois Tool Works Inc. (ITW) in a \$650 million cash transaction. Closing on the purchase is subject to regulatory reviews and other customary closing conditions. The Company is cooperating with the Federal Trade Commission to obtain clearance to close on the transaction. The Company plans to finance the acquisition through a new committed \$450 million revolving credit facility that will become effective upon closing of the purchase, and funds available under the long-term notes referenced above.

Also in April 2011, the Company acquired the assets and assumed certain liabilities of Eccentric Pumps, LLC (Eccentric) for approximately \$2.1 million cash. Eccentric was engaged in the business of designing and selling peristaltic hose pumps for metering, dosing and transferring fluids. The Company expects to employ the Eccentric assets to expand and complement its Industrial segment business. The purchase price was allocated based on estimated fair values, including \$1.7 million of goodwill and \$0.7 million of other identifiable intangible assets.

All segments and geographic regions had strong percentage revenue growth over last year for the quarter and year-to-date. Volume increases continued to drive improvement in net earnings. Changes in translation rates increased net earnings for the quarter by approximately \$4 million and increased year-to-date earnings by approximately \$5 million.

Sales by geographic area were as follows (in millions):

Sales for the quarter increased 22 percent (18 percent at consistent translation rates), including increases of 14 percent in the Americas, 32 percent in Europe (21 percent at consistent translation rates) and 34 percent in Asia Pacific (27 percent at consistent translation rates). Year-to-date sales increased 27 percent (24 percent at consistent translation rates), with increases of 23 percent in the Americas, 30 percent in Europe (24 percent at consistent translation rates) and 35 percent in Asia Pacific (29 percent at consistent translation rates).

Gross profit margin, expressed as a percentage of sales, was 56¹/₂ percent for the quarter, up 3 percentage points from the second quarter last year. The year-to-date gross margin rate was 57 percent, also 3 percentage points higher than the rate for the comparable period last year. The favorable effects of higher volume, translation, and selling price increases were offset somewhat by higher material costs for both the quarter and the year-to-date.

Total operating expenses increased \$11 million for the quarter and \$22 million year-to-date. Selling, marketing and distribution expenses increased \$7 million for the quarter and \$15 million year-to-date, from translation, headcount increases (mostly in Europe and Asia Pacific) and higher marketing and promotion expenses (mainly in Contractor segment). General and administrative expense for the quarter increased \$4 million, including \$3 million related to the pending acquisition of ITW's finishing businesses.

The effective income tax rate of 32 percent for the quarter and 33 percent for the year-to-date is lower than the 35 percent rate for both the quarter and year-to-date periods last year. The decrease is mainly due to the federal R&D credit included in the 2011 rate (the federal R&D credit was not available in 2010 until the fourth quarter).

Liquidity and Capital Resources

Net cash provided by operating activities was \$44 million in 2011 and \$28 million in 2010. The effect of higher net earnings was offset by higher 2010 incentive and bonus payments made in the first quarter of 2011.

Since the end of 2010, inventories increased by \$22 million to meet higher demand, and accounts receivable increased by \$35 million due to higher sales levels.

At July 1, 2011, the Company had various lines of credit totaling \$272 million, of which \$261 million was unused.

In March 2011, the Company entered into a note agreement and sold \$150 million of unsecured notes in a private placement. One series of notes totaling \$75 million bears interest at 4.0 percent and matures in 2018. Another series of notes totaling \$75 million bears interest at 5.01 percent and matures in 2023. Under terms of the agreement, the Company sold an additional \$150 million of unsecured notes on July 26, 2011. One series of notes issued in July totaling \$75 million bears interest at 4.88 percent and matures in 2020. Another series of notes issued in July totaling \$75 million bears interest at 5.35 percent and matures in 2026. Proceeds were used to repay revolving line of credit borrowings and invested in cash equivalents.

Under terms of the note agreement, interest is payable quarterly. The Company is required to maintain a cash flow leverage ratio of not more than 3.25 to 1.00 and an interest coverage ratio of not less than 3.00 to 1.00. If a significant acquisition is consummated, the agreement allows, for a one-year period, for a cash flow leverage ratio of 3.75 to 1.00

and an interest coverage ratio of not less than 2.50 to 1.00. The note agreement contains covenants typical of

unsecured credit facilities, including customary default provisions. If an event of default occurs, all outstanding obligations may become immediately due and payable. The Company was in compliance with all financial covenants at July 1, 2011.

In April 2011, the Company entered into a definitive agreement to purchase the finishing business operations of Illinois Tool Works Inc. (ITW) in a \$650 million cash transaction. Closing on the purchase is subject to regulatory reviews and other customary closing conditions. On July 5, 2011, the Company received a request for additional information from the Federal Trade Commission. The issuance of this second request extends the waiting period to close the acquisition to thirty days after the Company has substantially complied with the request. The Company is in the process of responding to the second request.

The Company plans to finance the acquisition with borrowings under the long-term notes referenced above and with borrowings under a new revolving credit facility that will become effective upon closing of the purchase. In May 2011, the Company entered into a credit agreement providing the Company access to a \$450 million unsecured revolving credit facility until May 2016. The Company may not obtain any loans under the credit agreement until certain conditions are met, including the closing of the acquisition of ITW's finishing businesses and the Company receiving not less than \$75 million in proceeds from the issuance of additional long-term notes.

Internally generated funds and unused financing sources are expected to provide the Company with the flexibility to meet its liquidity needs in 2011.

Outlook

On a global basis, incoming order rates are stable and management expects market conditions in the second half of 2011 to be generally favorable, with the exception of the U.S. housing and commercial construction markets, which continue to be challenging. Percentage growth trends in the second half of 2011 are expected to be lower as comparisons to prior year become more difficult.

The pending acquisition of the ITW finishing businesses would advance all of the Company's stated core growth strategies, including new products and technology, geographic expansion, and new markets.

Pending Acquisition - Our pending acquisition of the finishing business operations of Illinois Tool Works Inc. is subject to regulatory approvals and the expected benefits from the acquisition may not be fully realized.

We have entered into a definitive agreement to purchase the finishing business of Illinois Tools Works Inc. (ITW) in a \$650 million cash transaction. If we terminate the agreement before April 1, 2012 due to failure to obtain regulatory approval, we will be required to pay a \$20 million termination fee. After the transaction closes, significant changes to our financial condition as a result of global economic changes or difficulties in the integration of the newly acquired businesses may affect our ability to obtain the expected benefits from the transaction or to satisfy the financial covenants included in the terms of the financing arrangements.
