NAV Reinvested Percentile Rank (1 = best; 100 = worst)	59th	67th
Number of Funds in Category	985	967

<sup>\*</sup>Percentile ranks calculated using the Fund s NAV Reinvested results within the Lipper Large-Cap Core Mutual Fund Universe. Figures shown for the Fund and the Lipper Large-Cap Core Mutual Fund Average are total returns, which include dividends, after deducting fund expenses. Figures for the unmanaged S&P 500® Index are total returns, including dividends. A description of the Lipper benchmark and the S&P 500® Index can be found on page 18.

Past performance cannot predict future results. Performance will fluctuate with market conditions. Current performance may be lower or higher than the performance data shown. Performance information does not reflect the deduction of taxes that shareholders would pay on Fund distributions or the sale of Fund shares. An investment in the Fund involves risk, including loss of principal.

The Fund is a closed-end fund and does not continuously offer shares. The Fund trades in the secondary market, investors wishing to buy or sell shares need to place orders through an intermediary or broker by using the Fund sticker symbol: USA. The share price of a closed-end fund is based on the market svalue. Shares of closed-end funds frequently trade at a discount to net asset value. The price of the Fund s shares is determined by a number of factors, several of which are beyond the control of the Fund. Therefore, the Fund cannot predict whether its shares will trade at, below or above net asset value.

Liberty All-Star® Equity Fund

President s Letter

Fellow Shareholders: October 2012

After giving up ground in the second quarter, equities returned to positive territory in the third quarter not rivaling the exceptional returns of the first quarter, but a gratifying three months nonetheless. The S&P 500<sup>®</sup> Index returned 6.35 percent for the quarter, bringing its year-to-date return through September 30 to 16.44 percent. Other key equity indices also registered gains.

The same fears that dealt a setback to equities in the second quarter simmered beneath the surface in the third quarter; these were largely macro concerns, including worries over defaults on sovereign debt in Europe, slower economic growth in China, and federal budget deficits and the looming fiscal cliff in the U.S. Nevertheless, investors were more willing to take on risk during the third quarter. Equities benefited from expectations that central banks around the world would take steps to stimulate their economies. In the euro zone, investors were heartened by the European Central Bank s plan to buy government debt and thus reduce some nations borrowing costs. In the U.S., the economy continued to be burdened by the weakest economic recovery since the Great Depression. The housing sector showed some strength, however, and consumer confidence posted a surprising increase in August. Corporations earnings reports generally topped expectations; select technology companies, in particular, performed well.

For the quarter, Liberty All-Star Equity Fund posted net asset value (NAV) based results in-line with its relevant benchmarks, while exceeding those benchmarks with shares valued at market price (with dividends reinvested). The Fund returned 6.05 percent with shares valued at NAV, 6.03 percent with shares valued at NAV with dividends reinvested and 8.91 percent with shares valued at market price (with dividends reinvested). Through the first nine months of the year, shares valued at NAV advanced 13.05 percent while shares valued at NAV with dividends reinvested returned 13.43 percent. The Fund s shares valued at market price (with dividends reinvested) returned a particularly strong 20.42 percent through September 30. This compares with a 16.44 percent return for the S&P 500<sup>®</sup> Index and 14.67 percent for the Lipper Large-Cap Core Mutual Fund Average.

The Fund s quarterly return would have been better but for a slow start in July, as volatility from the second quarter spilled over into the start of the third quarter. The Fund gained momentum through the rest of the period, however, with solid outperformance in August and September. The discount at which the Fund s shares trade relative to their underlying NAV continued to narrow, as it ranged from 9.2 percent to 12.6 percent over the quarter.

The Fund s distribution policy, which has been in place since 1988, is a major component of the Fund s total return. The Fund pays out 1.5 percent of its NAV each quarter, or 6 percent annually. Often, however, these distributions either in cash or reinvested in additional Fund shares are overlooked. As you will see in the table on the inside front cover of this report, the Fund has paid distributions of \$0.24 through three quarters and will pay \$0.32 cents for the year. Bear in mind, as well, that these distributions add up over time in fact, since the advent of the policy back in 1988, they total \$22.66 per share through September 30.

Third Quarter Report (Unaudited) | September 30, 2012

President s Letter	Liberty All-Star® Equity Fund
We are pleased that the Fund has delivered double-digit returns thus far in 2012, especially range of factors likely to influence the equity market in the final quarter including the powhat the investment environment holds, please be assured that your management team at a committed to diligence, prudence and discipline.	residential election it should be an interesting close to the year. <sup>\*</sup> The Fund's net investment income and net realized capital gains exceeded the amount to be distributed under the Fund's distribution policy. In each case, the Fund elected to pay taxes on the undistributed income and passed through a proportionate tax credit to shareholders.

### DISTRIBUTION POLICY

Liberty All-Star® Equity Fund s current policy is to pay distributions on its shares totaling approximately 6 percent of its net asset value per year, payable in four quarterly installments of 1.5 percent of the Fund s net asset value at the close of the New York Stock Exchange on the Friday prior to each quarterly declaration date. The fixed distributions are not related to the amount of the Fund s net investment income or net realized capital gains or losses and may be taxed as ordinary income up to the amount of the Fund s current and accumulated earnings and profits. If, for any calendar year, the total distributions made under the distribution policy exceed the Fund s net investment income and net realized capital gains, the excess will generally be treated as a non-taxable return of capital, reducing the shareholder s adjusted basis in his or her shares. If the Fund s net investment income and net realized capital gains for any year exceed the amount distributed under the distribution policy, the Fund may, in its discretion, retain and not distribute net realized capital gains and pay income tax thereon to the extent of such excess. The Fund retained such excess gains in 1993, 1996 and 1997.

<sup>\*\*</sup> The number of shares offered was increased by an additional 25% to cover a portion of the over-subscription requests.

<sup>\*\*\*</sup> Effective with the second quarter distribution, the annual distribution rate was changed from 10 percent to 6 percent.

Schedule of Investments

Liberty All-Star® Equity Fund

Gross unrealized appreciation and depreciation at September 30, 2012 based on cost of investments for federal income tax purposes is as follows:

Gross unrealized appreciation	\$ 145,542,150
Gross unrealized depreciation	(138,442,121)
Net unrealized appreciation	\$ 7,100,029

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications for reporting ease. Industries are shown as a percent of net assets. These industry classifications are unaudited.

See Notes to Schedule of Investments.

Liberty All-Star® Equity Fund

Notes to Schedule of Investments

#### **Security Valuation**

Equity securities including common stocks and exchange traded funds are valued at the last sale price at the close of the principal exchange on which they trade, except for securities listed on the National Association of Securities Dealers Automated Quotations ( NASDAQ ) exchange, which are valued at the NASDAQ official closing price. Unlisted securities or listed securities for which there were no sales during the day are valued at the closing bid price on such exchanges or over-the-counter markets.

Debt securities generally are valued by pricing services approved by the Fund s Board of Trustees (the Board). The services may use various pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data, as well as broker quotes. Debt securities for which quotations are readily available are valued at an over-the-counter or exchange bid quotation.

Short-term debt obligations maturing in more than 60 days for which market quotations are readily available are valued at current market value. Short-term debt obligations maturing within 60 days are valued at amortized cost, which approximates market value.

Investments for which market quotations are not readily available are valued at fair value as determined in good faith under consistently applied procedures approved by and under the general supervision of the Board.

#### **Foreign Securities**

The Fund may directly purchase securities of foreign issuers. Investing in securities of foreign issuers involves special risks not typically associated with investing in securities of U.S. issuers. The risks include possible reevaluation of currencies, the inability to repatriate foreign currency, less complete financial information about companies and possible future adverse political and economic developments. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of securities of comparable U.S. issuers. For the period ended September 30, 2012, the Fund only held American Depositary Receipts and did not hold any securities denominated in foreign currencies.

#### **Security Transactions**

Security transactions are recorded on trade date. Cost is determined and gains/(losses) are based upon the specific identification method for both financial statement and federal income tax purposes.

### Repurchase Agreements

The Fund engages in repurchase agreement transactions with institutions that the Fund s investment advisor has determined are creditworthy. The Fund, through its custodian, receives delivery of underlying securities collateralizing a repurchase agreement. Collateral is at least equal, at all times, to the value of the repurchase obligation including interest. A repurchase agreement transaction involves certain risks in the event of default or insolvency of the counterparty. These risks include possible delays or restrictions upon a Fund s ability to dispose of the underlying securities and a possible decline in the value of the underlying securities during the period while the Fund seeks to assert its rights.

Liberty All-Star® Equity Fund

#### **Income Recognition**

Interest income is recorded on the accrual basis. Premiums and discounts are amortized and accreted, respectively, on all debt securities. Corporate actions and dividend income are recorded on the ex-date.

The Fund estimates components of distributions from real estate investment trusts (REITs). Distributions received in excess of income are recorded as a reduction of the cost of the related investments. Once the REIT reports annually the tax character of its distributions, the Fund revises its estimates. If the Fund no longer owns the applicable securities, any distributions received in excess of income are recorded as realized gains.

#### Fair Value Measurements

The Fund discloses the classification of its fair value measurements following a three-tier hierarchy based on the inputs used to measure fair value. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability that are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity s own assumptions about the assumptions market participants would use in pricing the asset or liability that are developed based on the best information available.

Various inputs are used in determining the value of the Fund s investments as of the end of the reporting period.

When inputs used fall into different levels of the fair value hierarchy, the level in the hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The designated input levels are not necessarily an indication of the risk or liquidity associated with these investments. These inputs are categorized in the following hierarchy under applicable financial accounting standards:

- Level 1 Unadjusted quoted prices in active markets for identical investments, unrestricted assets or liabilities that a Fund has the ability to access at the measurement date;
- Level 2 Quoted prices which are not active, quoted prices for similar assets or liabilities in active markets or inputs other than quoted prices that are observable (either directly or indirectly) for substantially the full term of the asset or liability; and
- Level 3 Significant unobservable prices or inputs (including the Funds own assumptions in determining the fair value of investments) where there is little or no market activity for the asset or liability at the measurement date.

The following is a summary of the inputs used to value the Fund s investments as of September 30, 2012. The Fund recognizes transfers between the levels as of the beginning of the annual period in which the transfer occurred.

Notes to Schedule of Investments

### **Valuation Inputs**

### Investments in Securities at

Value*	Level 1	Level 2	Level 3	Total
Common Stocks	\$ 975,150,990	\$	\$	\$ 975,150,990
Short Term Investment		17,120,000		17,120,000
Total	\$ 975,150,990	\$ 17,120,000	\$	\$ 992,270,990

<sup>\*</sup>See Schedule of Investments for industry classifications

For the period ended September 30, 2012, the Fund did not have any significant transfers between Level 1 and Level 2 securities. The Fund did not have any securities which used significant unobservable inputs (Level 3) in determining fair value.

#### Indemnification

In the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties and which provide general indemnities. The Fund s maximum exposure under these arrangements is unknown, as this would involve future claims against the Fund. Also, under the Fund s organizational documents and by contract, the Trustees and Officers of the Fund are indemnified against certain liabilities that may arise out of their duties to the Fund. However, based on experience, the Fund expects the risk of loss due to these warranties and indemnities to be minimal.

Benchmark and The S&P 500® Index

Liberty All-Star® Equity Fund

September 30, 2012 (Unaudited)

### **Lipper Large-Cap Core Mutual Fund Average**

The average of funds that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) above Lipper s U.S. domestic equity large-cap floor. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P 500® Index.

#### S&P 500® Index

A representative sample of 500 leading companies in leading industries of the U.S. economy. Focuses on the large-cap segment of the market with approximately 75% coverage of U.S. equities.

You cannot invest directly in an index.
