

SPRINT NEXTEL CORP
Form 425
June 03, 2013

Filed by SoftBank Corp.

Pursuant to Rule 425 under the Securities Act of 1933

And deemed filed pursuant to Rule 14a-6

Under the Securities Exchange Act of 1934

Subject Company: Sprint Nextel Corporation

Commission File No.: 001-04721

Third Party Commentary on SoftBank / Sprint Transaction

The deal, if approved by the Federal Communications Commission and Sprint's shareholders, should make the telecommunications industry more competitive by providing consumers better and cheaper choices for phone and broadband connections.

If it competes aggressively in the United States, SoftBank could help shake up the highly concentrated American industry. The wireless industry is dominated by four national providers, and most consumers have either one or two choices for high-speed Internet service at home.

A Deal That Could Benefit Mobile Users, New York Times Editorial Board

May 29, 2013

ISS said Sprint shareholders should vote for the proposed transaction with SoftBank, given the strategic merits of the SoftBank deal, the sales and negotiation process overseen by the board, the strength of the valuation relative to precedent transactions and the market reaction to the offer.

ISS recommends vote for SoftBank's Sprint bid, Reuters

June 1, 2013

Sprint needs more investment to bulk up its long-term evolution network to offer faster Internet speeds, helping it lure subscribers from AT&T and Verizon, ISS said. SoftBank offers the resources and experience to help Sprint, it said.

Softbank's Sprint Bid Backed by ISS as Dish Ruling Left Open, Bloomberg News

June 1, 2013

In its report, I.S.S. found that SoftBank's offer fairly valued Sprint and provided much-needed capital that would help the wireless provider expand its network and turn around its long-struggling fortunes.

I.S.S. Backs Sprint's Deal With SoftBank, New York Times Dealbook

June 1, 2013

Were Dish to win Sprint, the combined company would also be the most highly leveraged among large telecoms, leaving little-to-no room for error.

U.S. consumers already have experience with highly levered, capital scarce wireless industry competitors to AT&T and Verizon. No matter the discounts offered by Sprint, T-Mobile and MetroPCS as independent wireless providers, consumers have regularly fled the networks when adopting smartphones, favoring higher priced but better data service offered by AT&T and Verizon.

Ultimately, SoftBank's deal for Sprint and Sprint's deal for Clearwire give consumers the best chance at price competitive nationwide smartphone service.

Wireless Goes Wild as Consumer Is Given Shakedown, TheStreet

June 1, 2013

Dish's core business, a subscription video business, is in secular decline.

The whole premise of Ergen's thesis is that Sprint-Dish together can offer a bundle to the home. I would argue they are late in that game. I don't think they have the assets combined to compete with the Verizons and Comcasts of the world.

The problem with the Dish-Sprint proposal is Sprint's problem for a long time was that they were overleveraged and they didn't have the financial wherewithal to build out their network, to really compete with AT&T and Verizon. SoftBank solves that problem. Dish exacerbates that.

In his heart of hearts, [Charlie Ergen] doesn't really want to own Clearwire. He doesn't really want to own Sprint. He wants to agitate to get a network access deal from Sprint.

Dish Trying to Agitate Sprint, Not Buy: Grubman, CNBC

May 31, 2013

SoftBank is much further along in the approval process. And Dish, which only started due diligence on Sprint last week, would need to assume another \$9 billion in debt to finance its deal. That could seriously hurt the competitiveness of the combined company.

Heard on the Street: Clearwire Wager Has High Stakes for Dish Investors, Wall Street Journal

May 30, 2013

But by upping the offer for Clearwire now, Dish risks an increase in its total costs if it succeeds in buying Sprint - its ability to finance that \$25.5bn deal has already been questioned, among others by some Sprint directors

Dish, a fickle suitor, turns to its old dance partner Clearwire after Softbank-Sprint deal clears hurdle, Quartz

May 30, 2013

The question is whether a less leveraged Sprint able to execute its network vision on the sturdier financial footing provided by Softbank's cash and delivering a growing suite of wireless broadband services creates more shareholder value than an unproven Quad Play attempting to take share with a highly leveraged balance sheet and assets that require significant capital investment. History suggests that the alternative of a SoftBank/Sprint combination will create more shareholder value.

The growth prospects of the combination of SoftBank and Sprint, however, with a deleveraged balance sheet and a strong core wireless business, are far better than being part of a highly leveraged company whose core business is in secular decline.

Grubman: Dish/Sprint Numbers Don't Add Up to Shareholder Value, New York Times Dealbook

29 May 2013

Softbank is far along in the government approval process. Dish, on the other hand, could be a long way from gaining FCC approval.

The Softbank-Sprint deal cleared the national security hurdle, so what's Dish's next move? Quartz

29 May 2013

As The Washington Post reported, CFIUS approval of the SoftBank proposal makes Dish's offer less attractive because the proposed deal came later and faces potentially lengthy regulatory reviews.

Sprint, SoftBank get clearance on national security concerns, Washington Post, Post Tech Blog

29 May 2013

SoftBank's deal, which was announced last October, is expected to give Sprint more muscle to compete with the major players in the wireless industry. The increased size achieved by the combined operations of the two carriers could lead to a better selection of phones, more competitive price plans, and ultimately, better service.

Sprint, SoftBank reportedly reach security deal with U.S., CNET.com

28 May 2013

SoftBank's bid got a momentum boost today after California's Public Utilities Commission signed off on its Sprint transaction, giving the deal the final state approval it needed. The process of 23 state reviews took seven months.

SoftBank Said to Give U.S. Veto Power Over Sprint Board Seat, Bloomberg News

23 May 2013

SoftBank says it is committed to using only network equipment that is acceptable to the U.S. government and will not use equipment from China's Huawei in Sprint's network. Dish has not made such promises.

Dish on national security PR offensive against SoftBank, Reuters News

May 22, 2013

SoftBank has promised to rip out networking equipment used by Sprint's network partner Clearwire and produced by Huawei, a Chinese manufacturer embodying the U.S. Congress's cybersecurity concerns.

Dish hasn't yet made a similar promise alongside its \$26 billion offer for all of Sprint, which suggests its complaint isn't really about national security, but rather about having the weaker position in an M&A fight. Lawmakers and investors alike can afford to ignore the diversion.

BREAKINGVIEWS-Security is diversion in \$20 bln-plus Sprint fight, Reuters Breakingviews

May 23, 2013

[Regarding national security protections] The government wouldn't have as many levers to pull if Sprint were to accept a rival \$25.5 billion takeover offer from Dish Network Corp.

Wary of China, U.S. Steps Into Sprint's Board, Wall Street Journal

May 23, 2013

Trying to stir up objections now feels like a desperate act.

Softbank has also offered to pay \$1 billion to remove the Huawei equipment already used by Clearwire, the US wireless company that Sprint is trying to fully acquire. Dish, by contrast, which doesn't require CFIUS approval, has not said what it would do with Clearwire's Huawei equipment.

Dish Network shows its desperation by resorting to fear-mongering against Softbank, Quartz

May 22, 2013

Dish Network's pay-TV pain signals trouble for its \$25.5 billion bid for Sprint Nextel. Weak quarterly results unveiled on Thursday show why the company covets the telecom operator. But the poor earnings - net income dropped 40 percent - also show why Sprint shareholders should be skeptical of Dish's offer.

The company's pay-TV business is maturing quickly. It added a net 36,000 subscribers in the three months to March, compared to 104,000 a year ago. Dish is also finding it more costly to acquire subscribers.

Moreover, Dish is swimming against increasingly unfavorable tides

The trouble is, Dish's earnings flop makes rival bidder SoftBank's offer look even more appealing. Granted, the Japanese company is offering only \$20 billion. But it would plow money into Sprint, unlike Dish, which would pile on more debt. Also, under SoftBank's offer, Sprint's investors would still own a pure-play telecommunications company, whereas Dish's deal would leave them with a pay-TV business with uncertain long-term prospects.

Dish's pay-TV pain signals trouble for Sprint bid, Reuters Breakingviews

May 9, 2013

SoftBank could close the acquisition this year while DISH could be a lot further out, he said.

In the long run, SoftBank also is a better partner, Moorman said. SoftBank is in the wireless telecom business and brings expertise in the 2.5 GHz spectrum to Sprint

Moreover, SoftBank has a history of making acquisitions and driving up EBITDA margins.

As for Sprint's network build-out, SoftBank has the access to capital that will be necessary in deploying all of Clearwire's spectrum and building a wireless network that can compare to Verizon and AT&T, Moorman said in an April 25 research note he provided to SNL Kagan. The network buildout would be much slower under the DISH alternative versus the SoftBank alternative and this could hurt [Sprint] competitively as LTE has become [the] competitive tool of choice for wireless providers.

DISH does not have any experience in the wireless business.

Analysts: SoftBank is better for Sprint, but DISH offers more money, SNL Financial (quoting an analyst with S&P Capital IQ)

May 9, 2013

If Dish wins control of Sprint, the wireless company's stock owners would be putting their faith in Ergen, an industry outsider. With Son and SoftBank, today's Sprint shareholders become minority owners to a proven industry insider.

Sprint shareholders' choice: Trust in Son or Ergen? Denver Business Journal

May 8, 2013

We think one of the challenges that Dish faces is that the offering record that they have in their own pay-TV business makes us question whether they have the capabilities to win in wireless

SoftBank/Sprint Decision Could Fall on Clyburn's Watch, Communications Daily (citing an analyst with New Street Research)

May 6, 2013

SoftBank is beating all comers in the race for Sprint Nextel. Dish Network's \$25.5 billion bid may look better on paper, but it actually falls short of SoftBank's \$20.1 billion proposal. The Dish pitch would pump the U.S. telecom's debt levels so high that they could weaken the combined company and leave investors with a pay TV business poised for decline.

SoftBank beating all comers in race for Sprint, Reuters Breakingviews

April 30, 2013

In many ways, SoftBank's proposal, which delivers a one-time \$4.9 billion cash infusion into Sprint on top of the \$3.1 billion the Japanese carrier has already invested, seems to carry lower risk.

Heard on the Street: Sprint Shareholders Shouldn't Rush Into Dish's Arms, Wall Street Journal

April 30, 2013

The most arresting [of Mr. Son's valuation sums] were around the cost to Sprint of the delay in much-needed investment (61c/share) should it choose to wait for Dish, and the hefty \$1bn (9c/share) charge if the SoftBank deal is broken.

SoftBank: Sprint finish, Financial Times Lex Column

April 30, 2013

Softbank is providing capital that would fund Sprint's network construction and leave the company with a slimmer balance sheet.

Sprint gets waivers from Softbank to talk to Dish, The Deal

April 29, 2013

The wireless industry might prefer Ergen to win over Softbank because Ergen's resulting debt leverage would hamper his ability to invest the necessary capital to be competitive.

Intel Backs SoftBank Offer for Sprint Over Dish, TheStreet (quoting an analyst with BTIG)

April 29, 2013

SoftBank brings a cash infusion for Sprint; Dish brings a boatload of debt.

Standard & Poor's and Moody's revised their outlooks on Sprint's credit rating to "developing" and "uncertain," respectively, upon Dish's bid. In contrast, S&P and Moody's put the ratings on review for a possible upgrade following SoftBank's offer.

Debt Dish May Give Sprint Indigestion, Wall Street Journal

April 25, 2013

Investors' two main worries, she wrote, are that Ergen would not achieve his ambitious synergies and that capital expenditures would be more than expected.

Sprint taps advisers to weigh Dish bid, The Deal (citing an analyst with Wells Fargo Securities)

April 23, 2013

Sprint and SoftBank are already far along in the regulatory-approval process, with the Department of Justice having already signed off on antitrust issues. A Dish bid would reset the clock, costing Sprint precious time in the highly competitive wireless market, as a report from policy research firm MGA pointed out last week.

April 19, 2013

The proposed transaction with Dish leaves the combined entity with potentially too much leverage for a company with investment-grade competitors.

Sprint Lenders Clash With Owners on Dish Bid: Corporate Finance, Bloomberg News (citing a money manager with Seix Investment Advisors LLC)

April 18, 2013

On the face of it the Dish bid looks dangerously levered. Dish-Sprint would have more than \$40bn in net debt, nearly five times expected earnings before interest, tax, depreciation and amortisation.

Additionally, Dish would have to spend billions building out a network to make use of the spectrum it has, to support a unified offering of mobile phone, internet and video services.

Finally, Dish would be responsible for continuing losses at Clearwire, a wireless internet provider that Sprint is buying. Clearwire burnt through \$500m last year, an improvement over 2011. People close to the company said the losses would continue for years.

New Street Research analyst Jonathan Chaplin argued that the Dish offer failed to bring the capital or management needed to build and operate a next-generation mobile network.

Rival offers weighed up in race for Sprint, Financial Times

April 17, 2013

[B]oth proposals would also see existing Sprint shareholders keep a stake in the post-merger company this is where SoftBank may be on stronger footing Dish's case rests on still-vague plans to boost revenue by bundling satellite TV subscriptions with wireless contracts. SoftBank, however, says it can back Sprint with resources and expertise to invest in the rollout of a fourth-generation network that competes with AT&T and Verizon.

Heard on the Street: SoftBank No Rush on Sprint, Wall Street Journal

April 17, 2013

One potential downside to a Dish/Sprint deal for regulators is that the SoftBank/Sprint transaction is already in day 136 of its review at the FCC. A Dish/Sprint deal would have to start with a fresh clock.

Dish Offers \$25.5 Billion in Rival Bid for Sprint, Communications Daily

April 16, 2013

[T]he company would likely have less flexibility to make additional investments into its wireless network and/or acquisitions under Dish's proposal than under SoftBank's deal terms.

Wall Street Divided Over Dish Deal, Wall Street Journal MoneyBeat (citing an analyst with Gabelli & Company)

April 16, 2013

One of the most compelling elements of the SoftBank combination is that SoftBank has a proven track record of turning around a struggling wireless asset and being outstanding cost managers.

Wall Street Divided Over Dish Deal, Wall Street Journal MoneyBeat (citing an analyst with New Street Research)

April 16, 2013

Sprint is heavily indebted already, and Dish would issue about \$9 billion in debt to finance the acquisition, bringing the total for the combined company to \$47 billion, Novosel calculates. That's about 5.8 times the combined company's annual earnings before interest, taxes, depreciation and amortization, which would call into question the company's ability to pay off its debt, he said.

Dish's Ergen says Sprint debt manageable, Associated Press (citing a corporate bond analyst with Gimme Credit)

April 16, 2013

Dish could face a difficult transition from the traditional pay-television business into the fast-paced wireless industry if it wins the bid, says Carrie MacGillivray, program vice president for mobile services at IDC Research. SoftBank, in contrast, has more experience with mobile operations.

Will Dish serve Sprint customers well? MarketWatch

April 16, 2013

SoftBank would be a more compelling partner for Sprint. They don't have to match what Dish does because the value proposition after any deal closes we think is stronger with SoftBank than it is with Dish.

Surprise Bids for Sprint Have Further to Go: Real M&A, Bloomberg (citing an analyst with New Street Research)

April 16, 2013

With SoftBank, Sprint would get an additional \$4.9 billion of cash and a majority owner willing to weather the short-term pains of churn and heavy investment.

Heard on the Street: Serving up Sprint on a Dish, Wall Street Journal

April 15, 2013

If Dish were to acquire Sprint, the combined company would take on about \$36 billion in debt. Much of the revenue for the new company will come from the paid TV business of Dish, which analysts say is on the decline.

Wireless spectrum is the key to Dish's \$25.5 B bid for Sprint, CNET.com

April 15, 2013

SoftBank is a much larger company and a wireless one, to boot. SoftBank could bring its own innovations, leverage over handset makers in the form of ownership of spectrum in Japan, and history of successfully competing against larger telecom companies to the US.

Sprint is Dish's last, desperate attempt to be able to offer cell service before its deal with the FCC runs out, Quartz.com

April 15, 2013

Part of Dish's justification is that the deal would create new revenue opportunities worth almost as much, in present value terms, as the offer for Sprint. It's the kind of vague promise that's easy to make but very difficult to deliver.

Dish \$25.5bln Sprint bid mixes hype with reality, Reuters Breakingviews

April 15, 2013

However, we believe there is substantial risk to realizing expected cost and revenue synergies. We expect a combined DISH/Sprint would have significant network capital investment requirements over a multiyear period beyond current expectations in order to deliver a robust video, wireless data, fixed broadband, and mobile video solution that DISH outlined in its proposal.

DISH Bid for Sprint Laced with Risk and Reward Ratings Endorsement Policy, Fitch Ratings

April 15, 2013

For his video plan to work, though, Mr. Ergen would likely need the programmers who control rights to mobile use of their shows to sign off. While Dish executives have said they have sewn up some of those rights, Dish's relationships with media partners are among the most contentious of any major TV distributor.
