

CORNING INC /NY
Form 10-K
February 27, 2007

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549**

Form 10-K

**ANNUAL REPORT PURSUANT TO
[X] SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2006
OR
TRANSITION REPORT PURSUANT TO
[] SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the transition period from ___ to ___
Commission file number: 1-3247**

**CORNING
INCORPORATED**

(Exact name of registrant as specified in its charter)

NEW YORK
(State or other jurisdiction of incorporation or organization)

16-0393470
(I.R.S. Employer Identification No.)

ONE RIVERFRONT PLAZA, CORNING, NY
(Address of principal executive offices)

14831
(Zip Code)

607-974-9000
(Registrant's telephone number, including area code)

[None]
(Former name, former address and former fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class
Common Stock, \$0.50 par value per share

Name of each exchange on which registered
New York Stock Exchange
SWX Swiss Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes X
No ___

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes ___ No X

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes X No ___

Edgar Filing: CORNING INC /NY - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment of this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of June 30, 2006, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was \$35.8 billion based on the \$24.19 as reported on the New York Stock Exchange.

There were 1,569,697,474 shares of Corning's common stock issued and outstanding as of February 7, 2007.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's definitive Proxy Statement dated February 26, 2007, and filed for the Registrant's 2007 Annual Meeting of Shareholders are incorporated into Part III, as specifically set forth in Part III.

PART I

Corning Incorporated and its consolidated subsidiaries are hereinafter sometimes referred to as "the Company," "the Registrant," "Corning," or "we."

This report contains forward-looking statements that involve a number of risks and uncertainties. These statements relate to our future plans, objectives, expectations and estimates and may contain words such as "believes," "expects," "anticipates," "estimates," "forecasts," or similar expressions. Our actual results could differ materially from what is expressed or forecasted in our forward-looking statements. Some of the factors that could contribute to these differences include those discussed under "Forward-Looking Statements," "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this report.

Item 1. Business

General

Corning traces its origins to a glass business established in 1851. The present corporation was incorporated in the State of New York in December 1936. The Company's name was changed from Corning Glass Works to Corning Incorporated on April 28, 1989.

Corning is a global, technology-based corporation that operates in four reportable business segments: Display Technologies, Telecommunications, Environmental Technologies and Life Sciences.

Display Technologies Segment

Corning's Display Technologies segment manufactures glass substrates for active matrix liquid crystal displays (LCDs), that are used primarily in notebook computers, flat panel desktop monitors, and LCD televisions. Corning's facilities in Kentucky, Japan and Taiwan and those of Samsung Corning Precision Glass Co., Ltd. (Samsung Corning Precision, which is 50% owned by Corning) in South Korea develop, manufacture and supply high quality glass substrates using a proprietary fusion manufacturing process and technology expertise. Samsung Electronics Co., Ltd. has a 43% interest in Samsung Corning Precision, which sells glass to LCD panel manufacturers in Korea. Another shareholder owns the remaining 7% interest in Samsung Corning Precision. Panel manufacturers in the other leading LCD-producing areas of the world, Japan, Taiwan, Singapore and China, are supplied by Corning.

Corning has been a leader to market with new large-generation sized glass substrates used by our customers in the production of larger LCDs for monitors and television. We are recognized for providing product innovations that help our customers produce larger, lighter, thinner and higher-resolution displays more affordably. Glass substrates are currently available from Corning in sizes up to Generation 8 (2160mm x 2460mm), which was

introduced by Corning in late 2006. Large substrates (Generation 5 and higher) allow LCD manufacturers to produce larger and a greater number of panels from each substrate. The larger size leads to economies of scale for LCD manufacturers and is expected to enable lower display prices for consumers in the future. At the end of 2006, approximately 85% of Corning and Samsung Corning Precision's volume of LCD glass was Generation 5 (1100mm x 1250mm) and higher.

Corning's proprietary fusion manufacturing process was invented by the Company. It is the cornerstone of Corning's technology leadership in the LCD industry. The automated process yields high quality glass substrates with excellent dimensional stability and uniformity — essential attributes for the production of increasingly larger, high performance active matrix LCDs. Corning's fusion process is scalable and has proven to be among the most effective processes in producing large size substrates. In 2006, Corning launched EAGLE XG, the industry's first environmentally-friendly LCD glass substrate that is free of all heavy metals.

2

LCD glass manufacturing is a highly capital intensive business. Corning continues to make significant investments to expand its LCD glass facilities in response to anticipated customer demand. The environment is very competitive. Important success attributes include efficient manufacturing, access to capital, technology know-how, and patents.

Patent protection and proprietary trade secrets are important to the segment's operations. Corning has a growing portfolio of patents relating to its products, technologies and manufacturing processes. Corning licenses certain of its patents to Samsung Corning Precision and other third parties and generates revenue from these licenses. Reference is made to the material under the heading "Patents and Trademarks" for information relating to patents and trademarks.

The Display Technologies segment represented 41% of Corning's sales for 2006.

Telecommunications Segment

The Telecommunications segment produces optical fiber and cable, and hardware and equipment products for the worldwide telecommunications industry. Corning invented the world's first low-loss optical fiber more than 30 years ago. It offers a range of optical fiber technology products and enhancements for a variety of applications, including premises, fiber-to-the-premises access, metropolitan, long-haul and submarine networks. Corning makes and sells InfiniCor® fibers for local area networks, data centers and central offices; NexCor® fiber for converged services networks; SMF-28e® single mode optical fiber that provides additional transmission wavelengths in metropolitan and access networks; MetroCor® fiber products for metropolitan networks; LEAF® optical fiber for long-haul, regional and metropolitan networks; and Vascade® submarine optical fibers for use in submarine networks. Corning has two large optical fiber manufacturing facilities in North Carolina and another facility in China. As a result of lowered demand for optical fiber products, in 2002 Corning mothballed its optical fiber manufacturing facility in Concord, North Carolina and transferred certain capabilities to its Wilmington, North Carolina facility. Corning believes that the Concord facility can be returned to productive capacity within six to nine months of a decision to reopen.

A significant portion of Corning's optical fiber is sold to subsidiaries such as Corning Cable Systems LLC (Corning Cable Systems), and Corning Cable Systems GmbH. Optical fiber is cabled prior to being sold in cable form. The remaining fiber production is sold directly to end users or third party cabling companies around the world. Corning's cabling operations include large facilities in North Carolina, Poland, and Germany and smaller regional locations and equity affiliates.

Corning's hardware and equipment products include cable assemblies, fiber optic hardware, fiber optic connectors, optical components and couplers, closures and pedestals, splice and test equipment and other accessories for optical connectivity. For copper connectivity, Corning's products include subscriber demarcation, connection and protection devices, xDSL (different variations of DSL) passive solutions and outside plant enclosures. Each of the product lines may be combined in Corning's fiber-to-the-premises solutions. Corning has manufacturing operations for hardware and equipment products in North Carolina and Texas, as well as Europe, Mexico, China, Arizona, and the Caribbean. In addition, Corning offers products for the cable television industry, including coaxial connectors and associated tools.

Patent protection is important to the segment's operations. The segment has an extensive portfolio of patents relating to its products, technologies and manufacturing processes. The segment licenses certain of its patents to third parties and generates revenue from these licenses, but the royalty revenue is not currently material to the business. Corning is also licensed to use certain patents owned by others. These licenses are also important to the segment's operations. Reference is made to the material under the heading "Patents and Trademarks" for information relating to the Company's patents and trademarks.

The Telecommunications segment represented 33% of Corning's sales for 2006.

Environmental Technologies Segment

Corning's environmental products include ceramic technologies and solutions for emissions and pollution control in mobile and stationary applications around the world, including gasoline and diesel substrate and filter products. In the early 1970's, Corning developed an economical, high-performance cellular ceramic substrate that is now the standard for catalytic converters worldwide. In response to tightening emission control obligations around the world, Corning has continued to develop more efficient substrate products with higher density and greater surface area. Corning manufactures these products in New York, Virginia, China, Germany and South Africa. Corning is investing in new ceramic substrate and filter technologies for diesel emission control device products, with a new production facility in New York to produce such products for diesel vehicles worldwide. Corning sells its ceramic substrate and filter products worldwide to manufacturers of emission control systems who then sell to automotive and diesel engine manufacturers. Although our sales are to the emission control systems manufacturers, the use of Corning substrates and filters is generally required by the specifications of the automotive and diesel engine manufacturers.

Patent protection is important to the segment's operations. The segment has an extensive portfolio of patents relating to its products, technologies and manufacturing processes. The segment is also licensed to use certain patents owned by others. These licenses are also important to the segment's operations. Reference is made to the material under the heading "Patents and Trademarks" for information relating to the Company's patents and trademarks.

The Environmental Technologies segment represented 12% of Corning's sales for 2006.

Life Sciences Segment

Life Sciences laboratory products include microplate products, coated slides, filter plates for genomics sample preparation, plastic cell culture dishes, flasks, cryogenic vials, roller bottles, mass cell culture products, liquid handling instruments, Pyrex® glass beakers, pipettors, serological pipettes, centrifuge tubes and laboratory filtration products. Corning sells products under 3 primary brands: Corning, Costar and Pyrex. Corning manufactures these products in Maine, New York, United Kingdom and Mexico and markets them worldwide, primarily through distributors, to government entities, pharmaceutical and biotechnology companies, hospitals, universities and other research facilities.

Patent protection is important to the segment's operations, particularly for some of its emerging products. The segment has a growing portfolio of patents relating to its products, technologies and manufacturing processes. Brand recognition, through some well known trademarks, is important to the segment. Reference is made to the material under the heading "Patents and Trademarks" for information relating to the Company's patents and trademarks.

The Life Sciences segment represented approximately 6% of Corning's sales for 2006.

Other Products

Other products made by Corning include semiconductor optics, ophthalmic glass and plastic products, technical products, such as polarizing glass, glass for high temperature applications and machinable glass ceramic products. Semiconductor optics manufactured by Corning include: high-performance optical material products; optical-based metrology instruments; and optical assemblies for applications in the global semiconductor industry. Corning's semiconductor optics products are manufactured in New York. Other specialty glass products

include glass lens and window components and assemblies. Other specialty glass products are made in New York, Virginia, United Kingdom and France or sourced from China. Corning's Eurokera and Keraglass equity ventures with Saint Gobain Vitrage S.A. of France manufacture smooth cooktop glass/ceramic products in France, China, and South Carolina.

4

Corning owns a 50% interest in Samsung Corning Company, Ltd. (Samsung Corning), a producer of glass panels and funnels for cathode ray tubes for televisions and computer monitors, with manufacturing facilities in Korea, Germany, China and Malaysia. Samsung Electronics Company, Ltd. owns the remaining 50% interest in Samsung Corning.

Other products represented approximately 8% of Corning's sales for 2006.

We manufacture and process products at more than 47 plants and 15 countries.

Additional explanation regarding Corning and our four segments is presented in Management's Discussion and Analysis of Financial Condition under Operating Review and Results of Operations and Note 19 (Operating Segments) to the Consolidated Financial Statements.

Corporate Investments

Corning and The Dow Chemical Company (Dow Chemical) each own half of Dow Corning Corporation (Dow Corning), an equity company in Michigan that manufactures silicone products worldwide. Dow Corning emerged from its Chapter 11 bankruptcy proceedings during 2004. Dow Corning's sales were \$4 billion in 2006. Additional discussion about Dow Corning appears in the Legal Proceedings section. Dow Corning's financial statements are attached in Item 15, Exhibits and Financial Statement Schedules.

Corning and PPG Industries, Inc. each own half of Pittsburgh Corning Corporation (PCC), an equity company in Pennsylvania that manufactures glass products for architectural and industrial uses. PCC filed for Chapter 11 bankruptcy reorganization in April 2000. Additional discussion about PCC appears in the Legal Proceedings section. Corning also owns half of Pittsburgh Corning Europe N.V., a Belgian corporation that manufactures glass products for industrial uses primarily in Europe.

Additional information about corporate investments is presented in Note 8 (Investments) to the consolidated financial statements.

Competition

Corning competes across all of its product lines with many large and varied manufacturers, both domestic and foreign. Some of these competitors are larger than Corning, and some have broader product lines. Corning strives to maintain its position through technology and product innovation. For the future, Corning believes its competitive advantage lies in its commitment to research and development, and its commitment to quality. There is no assurance that Corning will be able to maintain its market position or competitive advantage.

Display Technologies Segment

Corning is the largest worldwide producer of glass substrates for active matrix LCD displays. That market position remained relatively stable over the past year. Corning believes it has competitive advantages in LCD glass substrate products from investing in new technologies, offering a consistent source of reliable supply and using its proprietary fusion manufacturing process. This process allows us to deliver glass that is larger, thinner and lighter with exceptional surface quality. Asahi Glass, Nippon Electric Glass and NH Techno are Corning's principal competitors in display glass substrates. In addition, new entrants are seeking to expand their presence in this business.

Telecommunications Segment

Competition within the telecommunications equipment industry is intense among several significant companies. Corning is a leading competitor in the segment's principal product lines which include optical fiber and cable and

hardware and equipment. Price and new product innovations are significant competitive factors. The competitive landscape has experienced increasing competition causing price pressure in all regions. These competitive conditions are likely to persist.

5

Corning is the largest producer of optical fiber and cable products, but faces significant competition due to continued excess capacity in the market place, price pressure and new product innovations. Corning believes its large scale manufacturing experience, fiber process, technology leadership and intellectual property assets yield cost advantages relative to several of its competitors. The primary competing producers of optical fiber and cable products are Furukawa OFS, Fujikura Ltd., Sumitomo, Prysmian Communications and Draka Comteq.

For hardware and equipment products, significant competitors are 3M Company (3M), Tyco Electronics, Furukawa OFS, CommScope, and ADC Communications.

Environmental Technologies Segment

For worldwide automotive ceramic substrate products, Corning has a leading market position that has remained relatively stable over the past year. Corning believes its competitive advantage in automotive ceramic substrate products for catalytic converters is based upon global presence, customer service, engineering design services and product innovation. Corning has established a strong presence in the heavy duty and light duty diesel vehicle substrate market. Corning's Environmental Technologies products face principal competition from NGK, Denso, Ibiden and Emitec.

Life Sciences Segment

Corning is a leading supplier of glass and plastic science laboratory products, with a growing plastics products market presence in North America and Europe, and a solid laboratory glass products market presence. Corning seeks to maintain competitive advantages by emphasizing product quality, product availability, supply chain efficiency, a wide product line and superior product attributes. For laboratory products, Schott Glaswerke, Kimble, Greiner and Becton Dickinson are the principal worldwide competitors. Corning also faces increasing competition from large distributors that have backward integrated or introduced private label products.

Other Products

Corning is a leading supplier of materials and products for lithography optics in the semiconductor industry and that market position remained relatively stable during the past year. Corning seeks to compete by providing superior optical quality, leading optical designs and a local Corning presence supporting its customers. For Corning's semiconductor optical material products, general specialty glass/glass ceramic products and ophthalmic products, Schott Glaswerke, Shin-Etsu Quartz Products, Hoya and Heraeus are the main competitors.

Samsung Corning is a leading producer of cathode ray tube glass products for conventional televisions. Its relative competitive position has remained stable over the past year, although there has been a significant decline in the industry as end-market customers have turned to flat panel displays or projection technologies. Samsung Corning seeks to maintain its competitive advantage through customer support, logistics expertise and a lower cost manufacturing structure. Nippon Electric Glass, Asahi, and various other Asian manufacturers compete with Samsung Corning. Samsung Corning is also pursuing a diversification strategy to mitigate the impact of the decline in the cathode ray tube glass.

Raw Materials

Corning's production of specialty glasses, ceramics, and related materials requires significant quantities of energy, certain precious metals, and batch materials.

Although energy shortages have not been a problem recently, the cost of energy has increased. Corning has achieved flexibility through important engineering changes to take advantage of low-cost energy sources in most significant processes. Specifically, many of Corning's principal manufacturing processes can be operated with natural gas, propane, oil or electricity, or a combination of these energy sources.

As to resources (ores, minerals, polymers, and processed chemicals) required in manufacturing operations, availability appears to be adequate. Corning's suppliers from time to time may experience capacity limitations in their own operations, or may eliminate certain product lines; nevertheless, Corning believes it has adequate programs to ensure a reliable supply of batch chemicals and raw materials. For many products, Corning has alternate glass compositions that would allow operations to continue without interruption in the event of specific materials shortages.

Certain key materials and proprietary equipment used in the manufacturing of products are currently sole sourced or available only from a limited number of suppliers. Any future difficulty in obtaining sufficient and timely delivery of components could result in delays or reductions in product shipments, or reduce Corning's gross margins.

Patents and Trademarks

Inventions by members of Corning's research and engineering staff have been, and continue to be, important to the Company's growth. Patents have been granted on many of these inventions in the United States and other countries. Some of these patents have been licensed to other manufacturers, including companies in which Corning has equity investments. Many of the earlier patents have now expired, but Corning continues to seek and obtain patents protecting its newer innovations. In 2006, Corning was granted over 195 patents in the U.S. and over 275 patents in countries outside the U.S.

Each business segment possesses its own patent portfolio that provides certain competitive advantages in protecting Corning's innovations. Corning has historically enforced, and will continue to enforce, its intellectual property rights. At the end of 2006, Corning and its wholly owned subsidiaries owned over 4,700 unexpired patents in various countries of which about 2,350 were U.S. patents. Between 2007 and 2009, approximately 1% of these patents will expire, while at the same time Corning intends to seek patents protecting its newer innovations. Worldwide, Corning has over 3,400 patent applications in process, with about 950 in process in the U.S. Corning believes that its patent portfolio will continue to provide a competitive advantage in protecting Corning's innovation, although Corning's competitors in each of its businesses are actively seeking patent protection as well.

The Display Technologies segment has over 270 patents in various countries of which over 90 were U.S. patents. No one patent is considered material to this business segment. Some of the important issued U.S. patents in this segment include patents relating to glass compositions and methods for the use and manufacture of glass substrates for display applications. There is no group of important Display Technology segment patents set to expire between 2007 and 2009.

The Telecommunications segment has over 1,650 patents in various countries of which over 800 were U.S. patents. No one patent is considered material to this business segment. Some of the important issued U.S. patents in this segment include: (i) patents relating to optical fiber products including dispersion compensating fiber, low loss optical fiber and high data rate optical fiber and processes and equipment for manufacturing optical fiber including methods for making optical fiber preforms and methods for drawing, cooling and winding optical fiber; (ii) patents relating to optical fiber ribbons and methods for making such ribbon, fiber optic cable designs and methods for installing optical fiber cable; and (iii) patents relating to optical fiber and electrical connectors and associated methods of manufacture. A few patents relating to optical fiber connectors will expire between 2007 and 2009.

The Environmental Technologies segment has over 550 patents in various countries of which over 260 were U.S. patents. No one patent is considered material to this business segment. Some of the important issued U.S. patents in this segment include patents relating to cellular ceramic honeycomb products, together with ceramic batch and binder system compositions, honeycomb extrusion and firing processes, and honeycomb extrusion dies and equipment for the high-volume, low-cost manufacture of such products. One family of patents relating to batch formation of ceramic honeycomb products will expire between 2007 and 2009.

The Life Sciences segment has over 175 patents in various countries of which over 75 are U.S. patents. No one patent is considered material to this business segment. Some of the important issued U.S. patents in this segment

include patents relating to methods and apparatus for the manufacture and use of scientific laboratory equipment including nucleic acid arrays, multiwell plates, and cell culture products as well as equipment for label independent drug discovery. There is no group of important Life Sciences segment patents set to expire between 2007 and 2009.

Many of these patents are used in Corning's operations or are licensed for use by others, and Corning is licensed to use patents owned by others. Corning has entered into cross licensing arrangements with some major competitors, but the scope of such licenses has been limited to specific product areas or technologies.

Corning's principal trademarks include the following: Corning, Celcor, DuraTrap, Eagle2000, EagleXG, Epic, HPFS, Pyrex, SMF-28e, Steuben, Lanscape, Evolant, and Vycor.

Protection of the Environment

Corning has a program to ensure that its facilities are in compliance with state, federal and foreign pollution-control regulations. This program resulted in capital and operating expenditures during the past several years. In order to maintain compliance with such regulations, capital expenditures for pollution control in continuing operations were approximately \$50 million in 2006 and are estimated to be \$13 million in 2007.

Corning's 2006 operating results from continuing operations were charged with approximately \$44 million for depreciation, maintenance, waste disposal and other operating expenses associated with pollution control. Corning believes that its compliance program will not place it at a competitive disadvantage.

Employees

At December 31, 2006, Corning had approximately 24,500 full-time employees, including approximately 10,100 employees in the United States. From time to time, Corning also retains consultants, independent contractors, and temporary and part-time workers. Unions are certified as bargaining agents from approximately 30% of Corning's United States employees.

Executive Officers of the Registrant

Wendell P. Weeks President and Chief Executive Officer

Mr. Weeks joined Corning in 1983 and was named a vice president and deputy general manager of the Telecommunications Products division in 1995, vice president and general manager of Telecommunications Products in 1996, senior vice president in 1997, senior vice president of Opto-Electronics in 1998, executive vice president of Optical Communications in 1999, president, Corning Optical Communications in 2001, President and Chief Operating Officer in 2002 and to his present position in 2005. Mr. Weeks will become chairman and chief executive officer on April 26, 2007. Mr. Weeks is a director of Merck & Co., Inc. Director since 2000. Age 47.

James B. Flaws Vice Chairman and Chief Financial Officer

Mr. Flaws joined Corning in 1973 and served in a variety of controller and business management positions. Mr. Flaws was elected assistant treasurer of Corning in 1993, vice president and controller in 1997 and vice president of finance and treasurer in May 1997, senior vice president and chief financial officer in December 1997, executive vice president and chief financial officer in 1999 and to his current position in 2002. Mr. Flaws is a director of Dow Corning Corporation. Mr. Flaws has been a member of Corning's Board of Directors since 2000. Age 58.

Peter F. Volanakis Chief Operating Officer

Mr. Volanakis joined Corning in 1982 and subsequently held various marketing, development and commercial positions in several divisions. He was named managing director Corning GmbH in 1992, executive vice president of CCS Holding, Inc., formerly known as Siecor Corporation, in 1995, senior vice president of Advanced Display Products in 1997, executive vice president of Display Technologies and Life Sciences in 1999 and president of Corning Technologies in 2001. Mr. Volanakis was elected to his current position on April 28, 2005. Mr. Volanakis will become president and chief operating officer on April 26, 2007. Mr. Volanakis is a director of Dow Corning Corporation. Mr. Volanakis has been a member of Corning's Board of Directors since 2000. Age 51.

Kirk P. Gregg *Executive Vice President and Chief Administrative Officer*

Mr. Gregg joined Corning in 1993 as director of Executive Compensation. He was named vice president of Executive Resources and Employee Benefits in 1994, senior vice president, administration in December 1997 and to his current position in 2002. Prior to joining Corning, Mr. Gregg was with General Dynamics Corporation as corporate director, Key Management Programs, and was responsible for executive compensation and benefits, executive development and recruiting. Age 47.

Joseph A. Miller *Executive Vice President and Chief Technology Officer*

Dr. Miller joined Corning in 2001 as senior vice president and chief technology officer. He was appointed to his current position in 2002. Prior to joining Corning, Dr. Miller was with E.I. DuPont de Nemours, Inc., where he served as chief technology officer and senior vice president for research and development since 1994. He began his career with DuPont in 1966. Dr. Miller is a director of Wilson Greatbatch Technologies and Dow Corning Corporation. Age 65.

Pamela C. Schneider *Senior Vice President and Operations Chief of Staff*

Ms. Schneider joined Corning in 1986 as senior financial analyst in the Controllers Division. In 1988 she became manager of internal audit. In 1990 she was named controller and in 1991 chief financial officer of Corning Asahi Video Products Company. In January 1993, she was appointed vice president and chief financial officer and in 1995 vice president for Corning Consumer Products Company. In 1997, she was named vice president and in 1999 senior vice president, Human Resources and Diversity Officer for Corning. Ms. Schneider was appointed to her present position in April 2002. Age 52.

Katherine A. Asbeck *Senior Vice President - Finance*

Ms. Asbeck joined Corning in 1991 as director of accounting. She was appointed assistant controller in 1993, designated chief accounting officer in 1994, elected vice president and controller in 1997 and senior vice president in 2001. She was elected to her current position in October 2005. Ms. Asbeck is a director of Samsung Corning Co., Ltd. and Samsung Corning Precision Glass Co., Ltd. Age 50.

William D. Eggers *Senior Vice President and General Counsel*

Mr. Eggers joined Corning in 1997 as vice president and deputy general counsel. He was elected senior vice president and general counsel in February 1998. Mr. Eggers was a Partner with the Rochester firm of Nixon, Hargrave, Devans & Doyle, LLP, before joining Corning. Mr. Eggers is a director of Chemung Financial Corp. Age 62.

Mark S. Rogus *Senior Vice President and Treasurer*

Mr. Rogus joined Corning in 1996 as manager of corporate finance. He was appointed assistant treasurer in 1999, vice president and treasurer in 2000 and was elected to his current position in 2004. Prior to joining Corning, Mr. Rogus held various business development positions at Wachovia Bank. Mr. Rogus is a director of Cormetech, Inc. Age 47.

Larry Aiello Jr. *President and Chief Executive Officer* □ *Corning Cable Systems*

Mr. Aiello joined Corning in 1973 and served in several positions in manufacturing from 1975 to 1981. He was named manager-Domestic Accounting in 1981, controller-Telecommunications Products Division in 1984, director-Control and Analysis in 1987 and assistant controller and director in 1989. He was named division vice president and director-Business Development and Planning, Opto-Electronics Group in 1990, general manager-Component Products Group in 1992, vice president and controller, Corning Incorporated in 1993, senior vice president-International and president-Corning International Corporation in 1997, senior vice president and chief of staff-Corning Optical Communications in 2000 and to his current position in 2002. Age 57.

Robert B. Brown *Executive Vice President, Environmental Technologies*

Mr. Brown joined Corning in 1972 and served in a variety of manufacturing and engineering positions. He was appointed division vice president-manufacturing and engineering, Telecommunications Products Division in 1995, vice president manufacturing and engineering, Opto-Electronics in 1999, president-Corning Lasertron in February 2000, vice president and general manager-Amplification Products in December 2000, vice president and general manager □ Optical Fiber in April 2002, senior vice president and general manager □ Telecommunications in 2003, senior vice president and general manager □ Environmental Technologies in January 2005, and to his current position in August 2005. Mr. Brown is a director of Cormetech, Inc. Age 56.

Lawrence D. McRae Senior Vice President, Strategy and Corporate Development

Mr. McRae joined Corning in 1985 and served in various financial, sales and marketing positions. He was appointed vice president-Corporate Development in 2000, senior vice president-Corporate Development in 2003 and most recently, senior vice president-Strategy and Corporate Development in October 2005. Mr. McRae is on the board of directors of Dow Corning Corporation, Samsung Corning Co., Ltd. and Samsung Corning Precision Glass Co., Ltd. Age 48.

Eric S. Musser Vice President and General Manager, Optical Fiber

Mr. Musser joined Corning in 1986 and held various manufacturing, planning and quality positions. He assumed the role of President for Corning Lasertron in 2000, became Corning's director of Manufacturing Operations, Photonic Technologies in 2002, then division vice president, Development and Engineering in 2003, and was elected to his current position in January 2005. Age 47.

Jane D. Poulin Chief Accounting Officer and Division Vice President

Ms. Poulin joined Corning in September 2005. Prior to joining Corning, she was an Associate Chief Accountant in the Office of the Chief Accountant of the U.S. Securities and Exchange Commission from June 2000 to September 2005. She previously served as corporate controller at a privately held manufacturer and was an audit senior manager at Ernst & Young LLP. Age 44.

Tony Tripeny Vice President and Corporate Controller

Mr. Tripeny became the corporate accounting manager for Corning Cable Systems in 1985. After serving in other financial functions, he was appointed chief financial officer of Corning Cable Systems in 2000. In 2003, he became group controller for Corning's Telecommunications business, and division vice president and operations controller of Corning in 2004, and was elected to his current position in October 2005. Age 47.

Document Availability

A copy of Corning's 2006 Annual Report on Form 10-K filed with the Securities and Exchange Commission is available upon written request to Ms. Denise A. Hauselt, Secretary and Assistant General Counsel, Corning Incorporated, HQ-E2-10, Corning, NY 14831. The Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments pursuant to Section 13(a) or 15(d) of the Exchange Act and other filings are available as soon as reasonably practicable after such material is electronically filed or furnished to the SEC, and can be accessed electronically free of charge, through the Investor Relations category of the Corning home page on the Internet at www.corning.com. The information contained on the Company's website is not included in, or incorporated by reference into, this Annual Report on Form 10-K.

Item 1A. Risk Factors

Set forth below are some of the principal risks and uncertainties that could cause our actual business results to differ materially from any forward-looking statements contained in this Report. Future results could be materially affected by general industry and market conditions, changes in laws or accounting rules, general economic and political conditions, including a global economic slowdown, fluctuation of interest rates or currency exchange rates, terrorism, political unrest or international conflicts, political instability or major health concerns, natural disasters or other disruptions of expected business conditions. These risk factors should be considered in addition to our cautionary comments concerning forward-looking statements in this Annual Report.

Our sales could be negatively impacted if one or more of our key customers substantially reduce orders for our products

Corning's ten largest customers account for about 50% of our sales. No individual customer accounts for more than 10% of consolidated sales except for AU Optronics Corporation (AUO) which accounted for 13% of consolidated sales in 2006.

In addition, a relatively small number of customers accounted for a high percentage of net sales in each of our reportable operating segments. For 2006, three customers of the Display Technologies segment, which individually accounted for more than 10% of segment net sales, represented 64% of total segment sales when combined. In the Telecommunications segment, two customers, which individually accounted for more than 10%

of segment net sales, represented 25% of total segment sales when combined. In the Environmental Technologies segment, three customers, which individually accounted for more than 10% of segment net sales, represented 72% of total segment sales in aggregate. In the Life Sciences segment, one distributor accounted for 43% of this segment's sales in 2006.

Samsung Corning Precision's sales were also concentrated in 2006, with sales to two LCD panel makers located in South Korea accounting for approximately 92% of total Samsung Corning Precision sales.

Although the sale of LCD glass substrates has increased in 2006, there can be no assurance that positive trends will continue. Our customers are LCD panel and color filter makers. As they switch to larger size glass, the pace of their orders may be uneven while they adjust their manufacturing processes and facilities. Additionally, consumer preferences for panels of differing sizes, price, or other seasonal factors, may lead to pauses in market growth from time to time. Our customers may not be able to maintain profitable operations or access sufficient capital to fund ongoing and future planned expansions, which may limit their pace of orders to us. Emerging technologies could replace our glass substrates for certain applications resulting in a decline in demand for our LCD products.

Our Telecommunications segment customers' purchases of our products are affected by their capital expansion plans, general market and economic uncertainty and regulatory changes, including broadband policy. Sales in the Telecommunications segment are expected to be impacted by the pace of Verizon Communication Inc. (Verizon) fiber-to-the-premises deployments. Our sales will be dependent on Verizon's planned targets for homes passed and connected. Changes in Verizon's deployment plan could adversely affect future sales in any quarter or for the full year.

In the Environmental Technologies segment, sales of our ceramic substrate and filter products for automotive and diesel emissions and pollution control are expected to fluctuate with vehicle production. Changes in governmental laws and regulations for air quality and emission controls may also influence future sales. Sales in our Environmental Technologies segment are to four catalyzers and emission system component manufacturers. Our customers sell these systems to automotive original equipment manufacturers and diesel engine manufacturers. Sales within this segment may be affected by adverse developments in the U.S. auto industry or by such factors as higher fuel prices that may affect vehicles sales.

Sales in our Life Sciences segment were historically through two large distributors to government entities, pharmaceutical and biotechnology companies, hospitals, universities and other research facilities. During 2005, we did not renew the contract with one large distributor and transitioned the sales through this distributor to our remaining primary distributor and other existing and developing channels. This change had an adverse impact on sales volumes. In 2006, our remaining primary distributor accounted for 43% of Life Sciences segment sales.

If the markets for our products do not develop and expand as we anticipate, demand for our products may decline, which would negatively impact our results of operations and financial performance

The markets for our products are characterized by rapidly changing technologies, evolving industry or government standards and new product introductions. Our success is expected to depend, in substantial part, on the successful introduction of new products, or upgrades of current products, and our ability to compete with new technologies. The following factors related to our products and markets, if not achieved, could have an adverse impact on our results of operations:

- our ability to introduce leading products such as glass substrates for liquid crystal displays, optical fiber and cable and hardware and equipment, and environmental substrate products that can command competitive prices;
- our ability to achieve a favorable sales mix of large generation sizes of liquid crystal display glass;
- our ability to develop new products in response to government regulations and laws, particularly diesel filter products in the Environmental Technologies segment;
- continued strong demand for notebook computers and LCD monitors;
- growth in purchases of LCD televisions to replace other technologies;
- screen size of LCD televisions, which affects glass demands; and

- growth of the fiber-to-the-premises build-out in North America.

We face pricing pressures in each of our leading businesses that could adversely affect our results of operations and financial performance

We face pricing pressure in each of our leading businesses as a result of intense competition, emerging new technologies, or over-capacity. While we will work toward reducing our costs to offset pricing pressures, we may not be able to achieve proportionate reductions in costs. As a result of overcapacity in the Telecommunications segment, we anticipate pricing pressures will continue into 2007 and beyond. Pricing pressure in our Display Technologies segment was at a historically high level in 2006. Although we are taking steps to reduce the rate of price decline in 2007, we cannot be assured of success. Our 2007 pricing strategy may also result in lost market share.

We face risks related to our international operations and sales

We have customers and significant operations, including manufacturing and sales, located outside the U.S. We have large manufacturing operations for liquid crystal display glass substrates in Taiwan and the Asia-Pacific region, including an equity investment in Samsung Corning Precision operating in South Korea that makes glass substrates for the LCD market. All of our Display segment customers are located in the Asia-Pacific region. As a result of these and other international operations, we face a number of risks, including:

- geographical concentration of our factories and operations;
- periodic health concerns;
- difficulty of managing global operations;
- difficulty in protecting intellectual property;
- tariffs, duties and other trade barriers including anti-dumping duties;
- undeveloped legal systems;
- natural disasters;
- potential power loss affecting glass production and equipment damage;
- political and economic instability in foreign markets, and
- foreign currency risk.

Any of these items could cause our sales or profitability to be significantly reduced.

12

We face risks due to foreign currency fluctuations

Because we have significant customers and operations outside the U.S., fluctuations in foreign currencies, especially the Japanese yen, the New Taiwan dollar, the Korean won, and the euro, affect our sales and profit levels. Foreign exchange rates may make our products less competitive in countries where local currencies decline in value relative to the dollar and Japanese yen. Sales in our Display Technologies segment, representing 41% of Corning's sales, are denominated in Japanese yen. The expected sales growth of the Display Technologies segment will increase our exposure to currency fluctuations. Although we hedge significant transaction and balance sheet currency exposures, we do not hedge translation risk and thus changes in exchange rates (especially the yen) may significantly impact our reported revenues and results of operations.

If the financial condition of our customers declines, our credit risks could increase

Although we have a rigorous process to administer credit and believe our reserve is adequate, we have experienced, and in the future may experience, losses as a result of our inability to collect our accounts receivable. If our customers fail to meet their payment obligations to us, we could experience reduced cash flows and losses in excess of amounts reserved. Some customers of our Display Technologies segment are thinly capitalized and/ or marginally profitable. In our Environmental products segment, the U.S. auto customers and certain of their suppliers have encountered credit downgrades or, in the case of Delphi Corporation, bankruptcy. These factors may result in an inability to collect receivables or a possible loss in business. As of December 31, 2006, reserves for trade receivables totaled approximately \$21 million.

If we do not successfully adjust our manufacturing volumes and fixed cost structure, or achieve manufacturing yields or sufficient product reliability, our operating results could suffer, and we may not achieve anticipated profitability levels

We are investing heavily in additional manufacturing capacity of certain businesses, including liquid crystal display glass and diesel emission substrates and filters. The speed of constructing the new facilities presents challenges. We may face technical and process issues in moving to commercial production. There can be no assurance that Corning will be able to pace its capacity expansion to the actual demand. It is possible that manufacturing capacity may exceed customer demand during certain periods.

The manufacturing of our products involves highly complex and precise processes, requiring production in highly controlled and dust-free environments. Changes in our manufacturing processes could significantly reduce our manufacturing yields and product reliability. In some cases, existing manufacturing may be insufficient to achieve the requirements of our customers. We will need to develop new manufacturing processes and techniques to achieve targeted volume, pricing and cost levels that will permit profitable operations. While we continue to fund projects to improve our manufacturing techniques and processes, we may not achieve satisfactory cost levels in our manufacturing activities that will fully satisfy our profitability targets.

Our future operating results depend on our ability to purchase a sufficient amount of materials, parts, and manufacturing equipment components to meet the demands of our customers

Our ability to meet customer demand depends, in part, on our ability to obtain timely and adequate delivery of materials, parts and components from our suppliers. We may experience shortages that could adversely affect our operations. Although we work closely with our suppliers to avoid shortages, there can be no assurances that we will not encounter these problems in the future. Furthermore, certain manufacturing equipment or components are available only from a single source or limited sources. We may not be able to find alternate sources in a timely manner. A reduction or interruption in supplies, or a significant increase in the price of supplies, could have a material adverse effect on our businesses.

13

We have incurred, and may in the future incur, restructuring and other charges, the amounts of which are difficult to predict accurately

We have recorded several charges for restructuring, impairment of assets, and the write-off of cost and equity based investments. It is possible we may record additional charges for restructuring or other asset impairments if additional actions become necessary.

We have incurred, and may in the future incur, goodwill and other intangible asset impairment charges

At December 31, 2006, Corning had goodwill and other intangible assets of \$316 million. While we believe the estimates and judgments about future cash flows used in the goodwill impairment tests are reasonable, we cannot provide assurance that future impairment charges will not be required if the expected cash flow estimates as projected by management do not occur.

If our products or materials purchased from our suppliers experience performance issues, our business will suffer

Our business depends on the production of products of consistently high quality. Our products, components and materials purchased from our suppliers, are typically tested for quality. These testing procedures are limited to evaluating our products under likely and foreseeable failure scenarios. For various reasons, our products, including materials purchased from our suppliers, may fail to perform as expected. In some cases, product redesigns or additional expense may be required to correct a defect. A significant or systemic product failure could result in customer relations problems, lost sales, and financial damages.

We face competition in most of our businesses

We expect that we will face additional competition from existing competitors, low cost manufacturers and new entrants. We must invest in research and development, expand our engineering, manufacturing and marketing capabilities, and continue to improve customer service and support in order to remain competitive. We cannot provide assurance that we will be able to maintain or improve our competitive position.

We may experience difficulties in enforcing our intellectual property rights and we may be subject to claims of infringement of the intellectual property rights of others

We may encounter difficulties in protecting our intellectual property rights or obtaining rights to additional intellectual property necessary to permit us to continue or expand our businesses. We cannot assure you that the patents that we hold or may obtain will provide meaningful protection against our competitors. Litigation may be necessary to enforce our intellectual property rights. Litigation is inherently uncertain and the outcome is often unpredictable. Other companies hold patents on technologies used in our industries and are aggressively seeking to expand, enforce and license their patent portfolios.

The intellectual property rights of others could inhibit our ability to introduce new products. We are, and may in the future be, subject to claims of intellectual property infringement or misappropriation that may result in loss of revenue, require us to incur substantial costs, or lead to monetary damages or injunctive relief against us. We cannot assure you as to the outcome of such claims.

Current or future litigation may harm our financial condition or results of operations

Pending, threatened or future litigation is subject to inherent uncertainties. Our financial condition or results of operations may be adversely affected by unfavorable outcomes, expenses and costs exceeding amounts estimated or insured. In particular, we have been named as a defendant in numerous lawsuits alleging personal injury from exposure to asbestos. As described in Legal Proceedings, our negotiations with the representatives of asbestos claimants produced a tentative plan of settlement through a PCC Plan of Reorganization, but this Plan has not been confirmed by the Bankruptcy Court. The proponents of the Plan have moved for reconsideration of the order entered by the Court on December 21, 2006 denying Plan confirmation. It is reasonably possible that changes to the Plan may be negotiated, but the elements of the Plan and final approval are subject to a number of contingencies. Total charges of \$816 million have been recorded through December 31, 2006; however, additional charges or credits are possible due to the potential fluctuation in the price of our common stock, other adjustments in the proposed settlement, and other litigation factors.

We face risks through our equity method investments in companies that we do not control

Corning's net income includes significant equity in earnings of associated companies. For the year ended December 31, 2006, we recognized \$960 million of equity earnings, of which \$889 million came from our two largest investments: Dow Corning Corporation (which makes silicone products) and Samsung Corning Precision (which makes liquid crystal display glass). Samsung Corning Precision is located in the Asia-Pacific region and is subject to political and geographic risks mentioned above, as well as business and other risks within the Display segment. Our equity investments may not continue to perform at the same levels as in recent years. In 2005 and 2006, we recognized equity losses associated with Samsung Corning Co., Ltd. (our 50% equity method investment that makes glass panels and funnels for conventional televisions), which recorded fixed asset and other impairment charges. As the conventional television market will be negatively impacted by strong growth in the LCD glass market, it is reasonably possible that Samsung Corning Co., Ltd. may incur additional restructuring or impairment charges or net operating losses in the future.

We may not have adequate insurance coverage for claims against us

We face the risk of loss resulting from product liability, securities, fiduciary liability, intellectual property, antitrust, contractual, warranty, fraud and other lawsuits, whether or not such claims are valid. In addition, our product liability, fiduciary, directors and officers, property, natural catastrophe and comprehensive general liability insurance may not be adequate to cover such claims or may not be available to the extent we expect. Our insurance costs can be volatile and, at any time, can increase given changes in market supply and demand. We may not be able to obtain adequate insurance coverage in the future at acceptable costs. A successful claim that

exceeds or is not covered by our policies could require us to pay substantial sums. Some of the carriers in our excess insurance programs are in liquidation and may not be able to respond if we should have claims reaching into excess layers. The financial health of other insurers may deteriorate. In addition, we may not be able to obtain adequate insurance coverage for certain risk such as political risk, terrorism or war.

Changes in accounting may affect our reported earnings and operating income

Generally accepted accounting principles and accompanying accounting pronouncements, implementation guidelines, and interpretations for many areas of our business, such as revenue recognition, accounting for investments, and accounting for stock options, are very complex and involve significant and sometimes subjective judgments. Changes in these rules or their interpretation could significantly impact our reported earnings and operating income and could add significant volatility to those measures in the future, without a corresponding change in our cash flows.

Other

Additional information in response to Item 1 is found in Note 19 (Operating Segments) to the consolidated financial statements and selected financial data.

Item 1B. Unresolved Staff Comments

None.

15

Item 2. Properties

We operate approximately 47 manufacturing plants and processing facilities, of which approximately one half are located in the U.S. We own substantially all of our executive and corporate buildings, which are located in Corning, New York. We also own substantially all of our manufacturing and research and development facilities and more than half of our sales and administrative facilities.

For the years ended 2006, 2005 and 2004, we invested a total of \$3.6 billion, primarily in facilities outside the U.S. in our Display Technologies segment. Of the \$1.2 billion spent in 2006, \$721 million was for facilities outside the U.S.

Manufacturing, sales and administrative, and research and development facilities have an aggregate floor space of approximately 24 million square feet. Distribution of this total area follows:

(million square feet)	Total	Domestic	Foreign
Manufacturing	18	7	11
Sales and administrative	4	3	1
Research and development	2	2	
Total	24	12	12

Total assets and capital expenditures by operating segment are included in Note 19 (Operating Segments) to the Consolidated Financial Statements. Information concerning lease commitments is included in Note 14 (Commitments, Contingencies, and Guarantees) to the Consolidated Financial Statements.

During 2006, we continued the restructuring program that closed or consolidated certain smaller manufacturing facilities. Throughout 2007 we expect to have excess manufacturing capacity in our Telecommunications segment and will not utilize a portion of space in the facilities listed above. The largest unused portion is our optical fiber manufacturing facility in Concord, North Carolina that has been mothballed until fiber demand rebounds. We believe that the Concord facility can be returned to productive capacity within six to nine months of a decision to do so.

Item 3. Legal Proceedings

Environmental Litigation. Corning has been named by the Environmental Protection Agency (the Agency) under the Superfund Act, or by state governments under similar state laws, as a potentially responsible party at 18 active hazardous waste sites. Under the Superfund Act, all parties who may have contributed any waste to a hazardous waste site, identified by such Agency, are jointly and severally liable for the cost of cleanup unless the Agency agrees otherwise. It is Corning's policy to accrue for its estimated liability related to Superfund sites and other environmental liabilities related to property owned by Corning based on expert analysis and continual monitoring by both internal and external consultants. Corning has accrued approximately \$16 million (undiscounted) for its estimated liability for environmental cleanup and litigation at December 31, 2006. Based upon the information developed to date, management believes that the accrued reserve is a reasonable estimate of the Company's liability and that the risk of an additional loss in an amount materially higher than that accrued is remote.

Dow Corning Bankruptcy. Corning and Dow Chemical each own 50% of the common stock of Dow Corning. In May 1995, Dow Corning filed for bankruptcy protection to address pending and claimed liabilities arising from many thousand breast implant product lawsuits. On June 1, 2004, Dow Corning emerged from Chapter 11 with a Plan of Reorganization (the Plan) which provided for the settlement or other resolution of implant claims. The Plan also includes releases for Corning and Dow Chemical as shareholders in exchange for contributions to the Plan.

16

Under the terms of the Plan, Dow Corning has established and is funding a Settlement Trust and a Litigation Facility to provide a means for tort claimants to settle or litigate their claims. Inclusive of insurance, Dow Corning has paid approximately \$1.5 billion to the Settlement Trust. As of December 31, 2006, Dow Corning had recorded a reserve for breast implant litigation of \$1.7 billion and anticipates insurance receivables of \$185 million. As a separate matter arising from the bankruptcy proceedings, Dow Corning is defending claims asserted by a number of commercial creditors who claim additional interest at default rates and enforcement costs, during the period from May 1995 through June 2004. On July 26, 2006, the U.S. Court of Appeals vacated the judgment of the District Court fixing the interest component, ruled that default interest and enforcement costs may be awarded subject to equitable factors to be determined, and directed that the matter be remanded for further proceedings. Dow Corning filed a petition for rehearing by the Court of Appeals, which was denied. It has filed a petition for writ of certiorari with the U.S. Supreme Court, which has not yet been decided. As of December 31, 2006, Dow Corning has estimated the interest payable to commercial creditors to be within the range of \$68 million to \$208 million. As Dow Corning management believes no single amount within the range appears to be a better estimate than any other amount within the range, Dow Corning has recorded the minimum liability within the range. Should Dow Corning not prevail in this matter, Corning's equity earnings would be reduced by its 50% share of the amount in excess of \$68 million, net of applicable tax benefits. There are a number of other claims in the bankruptcy proceedings against Dow Corning awaiting resolution by the U.S. District Court, and it is reasonably possible that Dow Corning may record bankruptcy-related charges in the future. There are no remaining tort claims against Corning, other than those that will be channeled by the Plan into facilities established by the Plan or otherwise defended by the Litigation Facility.

Pittsburgh Corning Corporation. Corning and PPG Industries, Inc. (PPG) each own 50% of the capital stock of Pittsburgh Corning Corporation (PCC). Over a period of more than two decades, PCC and several other defendants have been named in numerous lawsuits involving claims alleging personal injury from exposure to asbestos. On April 16, 2000, PCC filed for Chapter 11 reorganization in the U.S. Bankruptcy Court for the Western District of Pennsylvania. As a result of PCC's bankruptcy filing, Corning recorded an after-tax charge of \$36 million in 2001 to fully impair its investment in PCC and discontinued recognition of equity earnings. At the time PCC filed for bankruptcy protection, there were approximately 12,400 claims pending against Corning in state court lawsuits alleging various theories of liability based on exposure to PCC's asbestos products and typically requesting monetary damages in excess of one million dollars per claim. Corning has defended those claims on the basis of the separate corporate status of PCC and the absence of any facts supporting claims of direct liability arising from PCC's asbestos products. Corning is also currently named in approximately 10,900 other cases (approximately 42,300 claims) alleging injuries from asbestos and similar amounts of monetary damages per claim. Those cases have been covered by insurance without material impact to Corning to date. Asbestos litigation is inherently difficult, and past trends in resolving these claims may not be indicators of future outcomes.

In the bankruptcy court in April 2000, PCC obtained a preliminary injunction against the prosecution of asbestos actions arising from PCC's products against its two shareholders to afford the parties a period of time in which to negotiate a plan of reorganization for PCC (the PCC Plan).

On May 14, 2002, PPG announced that it had agreed with certain of its insurance carriers and representatives of current and future asbestos claimants on the terms of a settlement arrangement applicable to claims arising from PCC's products.

On March 28, 2003, Corning announced that it had reached agreement with the representatives of asbestos claimants for the settlement of all current and future asbestos claims against it and PCC, which might arise from PCC products or operations. The proposed settlement, if the Plan is approved and becomes effective, will require Corning to relinquish its equity interest in PCC, contribute its equity interest in Pittsburgh Corning Europe N.V. (PCE), a Belgian corporation, and contribute 25 million shares of Corning common stock. Corning also agreed to pay a total of \$140 million in six annual installments (present value \$131 million at March 2003), beginning one year after the Plan becomes effective, with 5.5 percent interest from June 2004, and to assign certain insurance policy proceeds from its primary insurance and a portion of its excess insurance at the time of settlement.

17

Since March 28, 2003, we have recorded total net charges of \$816 million to reflect the agreed settlement contributions and subsequent adjustments for the change in the fair value of the components.

The liability expected to be settled by contribution of our investment in PCE, assigned insurance proceeds, and the 25 million shares of our common stock (totaling \$656 million at December 31, 2006) is recorded in the other accrued liabilities component in our consolidated balance sheets. This portion of the PCC liability is considered a "due on demand" obligation and is classified as a current liability. The remaining portion of the settlement liability (totaling \$160 million at December 31, 2006), representing the net present value of the cash payments, is recorded in the other liabilities component in our consolidated balance sheets.

Two of Corning's primary insurers and several excess insurers have commenced litigation for a declaration of the rights and obligations of the parties under insurance policies, including rights that may be affected by the settlement arrangement described above. Corning is vigorously contesting these cases. Management is unable to predict the outcome of this insurance litigation.

The PCC Plan received a favorable vote from creditors in March 2004. Hearings to consider objections to the Plan were held in the Bankruptcy Court in May 2004. In February, 2006, the Bankruptcy Court requested that the Plan proponents delete references to Section 105(a) of the Bankruptcy Code and resubmit the Plan. The final round of oral argument was held on July 21, 2006. On December 21, 2006, the Bankruptcy Court issued an order denying confirmation of the Plan for reasons set out in a memorandum opinion. The opinion generally supports the elements of the Plan except for the breadth of the channeling injunction applicable to claims against either of the two shareholders when those claims do not derive from the products or operations of PCC itself. The Court declared a three part test whereby other claims may be channeled if PCC is named a defendant, a shareholder is named, and conspiracy theories are alleged. Several parties, including Corning, have filed motions of reconsideration, which are scheduled for a hearing before the Bankruptcy Court on March 5, 2007. If the Bankruptcy Court does not approve the PCC Plan in its current form, changes to the Plan are probable as it is likely that the Court will allow the proponents time to propose amendments. The outcome of these proceedings is uncertain, and confirmation of the current Plan or any amended Plan is subject to a number of contingencies. However, apart from the quarterly mark-to-market adjustment in the value of the components of the settlement, management believes that the likelihood of a material adverse impact to Corning's financial statements is remote.

Seoul Guarantee Insurance Co. and other creditors against Samsung Group and affiliates. As of March 2005, Samsung Corning Precision Glass Co., Ltd. (Samsung Corning Precision) and Samsung Corning Co. Ltd. (Samsung Corning) are two of approximately thirty co-defendants in a lawsuit filed by Seoul Guarantee Insurance Co. and 14 other creditors (SGI and Creditors) for alleged breach of an agreement that approximately thirty affiliates of the Samsung group entered into with SGI and Creditors in September 1999. The lawsuit is pending in the courts of Korea. According to the agreement, the Samsung affiliates agreed to sell 3.5 million shares of Samsung Life Insurance Co., Ltd. (SLI) by December 31, 2000, which were transferred to SGI and Creditors in connection with the petition for court receivership of Samsung Motor Inc. In the lawsuit, SGI and Creditors allege that, in the event that the proceeds of sale of the SLI shares is less than 2.45 trillion Korean won (approximately \$2.64 billion), the Samsung affiliates allegedly agreed to compensate SGI and Creditors for the shortfall, by other

means, including Samsung affiliates' purchase of equity or subordinated debentures to be issued by SGI and Creditors. Any excess proceeds are to be distributed to the Samsung affiliates. As of March 2005, the shares of Samsung Life Insurance Co., Ltd. had not been sold. The suit asks for damages of approximately \$4.6 billion plus penalty interest. Samsung Corning Precision and Samsung Corning combined guarantees should represent no more than 3.1% of the Samsung affiliates' total financial obligation. Although noting that the outcome of these matters is uncertain, Samsung Corning Precision and Samsung Corning have stated that these matters are not likely to result in a material ultimate loss to their financial statements. No claim in these matters has been asserted against Corning Incorporated.

18

Ellsworth Industrial Park, Downers Grove, IL Environmental Litigation. In August 2005, Corning was named as a fourth party defendant in a class action, Ann Muniz v. Rexnord Corp, filed in the U.S. District Court for the N.D. Illinois, claiming an unspecified amount of damages and asserting various personal injury and property damage claims against a number of corporate defendants. These claims allegedly arise from the release of solvents from the operations of several manufacturers at the Ellsworth Industrial Park into soil and ground water. On July 10, 2006, plaintiffs settled with a number of defendants and third-party defendants for \$15.75 million, and the settling defendants are mediating allocation. In November 2006, Corning settled with three of the third-party defendants for a total of approximately \$99,000. The claim of the remaining third-party defendant against Corning is scheduled for trial in March 2007. Corning was also named as a third or fourth party defendant in two personal injury lawsuits against a number of corporate defendants as a result of an alleged groundwater contamination at this industrial park site. Corning has a number of defenses to these claims, which management intends to contest vigorously. Management believes these matters are not likely to be material to the financial statements of Corning in any period.

Item 4. Submission of Matters to a Vote of Security Holders

None.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

- (a) Corning Incorporated common stock is listed on the New York Stock Exchange and the SWX Swiss Exchange. In addition, it is traded on the Boston, Midwest, Pacific and Philadelphia stock exchanges. Common stock options are traded on the Chicago Board Options Exchange. The abbreviated ticker symbol for Corning Incorporated is "GLW."

The following table sets forth the high and low sales price of Corning's common stock as reported on the Composite Tape.

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2006				
Price range				
High	\$ 28.28	\$ 29.61	\$ 24.90	\$ 25.57
Low	\$ 19.35	\$ 20.39	\$ 17.50	\$ 18.62
2005				
Price range				
High	\$ 12.40	\$ 17.08	\$ 21.95	\$ 21.62
Low	\$ 10.61	\$ 10.97	\$ 16.03	\$ 16.61

As of December 31, 2006, there were approximately 25,700 record holders of common stock and approximately 595,000 beneficial shareholders.

Corning discontinued the payment of dividends on its common stock in 2001.

19

Equity Compensation Plan Information

The following table shows the total number of outstanding options and shares available for other future issuances of options under all of our existing equity compensation plans, including our 2005 Employee Equity Participation Program, our 2003 Equity Plan for Non-Employee Directors and our 2002 Worldwide Employee Share Purchase Plan as of December 31, 2006.

Plan Category	A	B	C
	Securities To Be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (excluding securities reflected in column A)
Equity Compensation Plans Approved by Security Holders (1)	95,729,896	\$ 24.19	116,065,029
Equity Compensation Plans Not Approved by Security Holders	0	\$ 0.00	0
Total	95,729,896	\$ 24.19	116,065,029

(1) Shares indicated are total grants under the most recent shareholder approved plans as well as any shares remaining outstanding from any prior shareholder approved plans.

20

Performance Graph

The following graph illustrates the cumulative total shareholder return over the last five years of Corning's Common Stock, the S&P 500 and the S&P Communications Equipment Companies (in which Corning is currently included). The graph includes the capital weighted performance results of those companies in the communications equipment companies classification that are also included in the S&P 500.

(b) Not applicable.

(c) This table provides information about our purchases of our common stock during the fiscal fourth quarter of 2006:

Issuer Purchases of Equity Securities*

Total	Average	Total Number of Shares Purchased	Approximate
			Dollar Value of Shares that May
Number			

Period	of Shares	Price Paid	as Part of Publicly	Yet Be
	Purchased**	per Share**	Announced Plan*	Purchased Under the Plan*
October 1-31, 2006	60,379	\$ 21.91	0	\$0
November 1-30, 2006	120,300	\$ 20.87	0	\$0
December 1-31, 2006	54,416	\$ 21.06	0	\$0
Total	235,095	\$ 21.18	0	\$0

* During the quarter ended December 31, 2006, we did not have a publicly announced program for repurchase of shares of our common stock. We did not repurchase our common stock in open-market transactions outside of such a program.

** This column reflects the following transactions during the fiscal fourth quarter of 2006: (i) the deemed surrender to us of 225,220 shares of common stock to pay the exercise price and to satisfy tax withholding obligations in connection with the exercise of employee stock options, and (ii) the surrender to us of 9,875 shares of common stock to satisfy tax withholding obligations in connection with the vesting of restricted stock issued to employees.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Our key priorities for 2006 remained unchanged from the previous two years: protect our financial health, improve our profitability, and invest in the future. We made significant progress on all three in 2006.

Financial Health

In 2006, our balance sheet remained strong and we delivered positive cash flows from operating activities. Significant activities in 2006 included the following:

22

- We issued \$250 million aggregate principal amount of 7.25% senior unsecured notes due 2036 for general corporate purposes and in support of an objective to extend the timing of future debt maturities.
- We reduced our long-term debt in the following transactions:

- We redeemed \$119 million of our 6.25% Euro notes, due in 2010;
- We repurchased \$96 million of our 6.3% notes due in 2009; and
- We redeemed \$125 million of our 8.3% medium-term notes due in 2025.

- We received \$171 million in deposits against orders relating to our multi-year supply agreements with customers in the Display Technologies segment. These agreements have helped us to meet the rapid growth of the LCD market.
- All three of our rating agencies upgraded our ratings to either BBB or Baa2.
- We generated cash flows from operating activities in excess of our capital expenditures.

We ended 2006 with \$3.2 billion in cash, cash equivalents and short-term investments. This represents an increase of \$733 million from December 31, 2005.

In November 2006, we amended our revolving credit facility so that it now provides us access to a \$1.1 billion unsecured multi-currency revolving line of credit through March 2011. We believe we have sufficient liquidity for the next several years to fund operations, capital expenditures and scheduled debt repayments.

Profitability

For the year ended December 31, 2006, we generated net income of \$1,855 million or \$1.16 per share compared to net income of \$585 million or \$0.38 per share for 2005.

We recorded restructuring, impairment, and other charges and credits in the past three years which affect the comparability of those years. Refer to Note 3 (Restructuring, Impairment and Other Charges and (Credits)), Note 7 (Income Taxes), and Note 8 (Investments) to the consolidated financial statements for additional information.

Investing in our future

We remain committed to investing in research, development, and engineering to drive innovation. We are investing in a wide variety of technologies with a focus on glass substrates for active matrix LCDs, diesel filters and substrates in response to tightening emissions control standards, and the optical fiber and cable and hardware and equipment that will enable fiber-to-the-premises.

Our research, development and engineering expenditures have increased by \$74 million or 17% compared to 2005. We believe our spending levels are adequate to support our growth strategies.

We also remain committed to investing in manufacturing capacity to match increased demand in our businesses. Our capital expenditures are primarily focused on expanding manufacturing capacity for LCD glass substrates in the Display Technologies segment and diesel products in the Environmental Technologies segment. Total capital expenditures for 2006 were \$1,182 million, of which \$829 million was directed toward our Display Technologies segment and \$146 million was invested in our Environmental Technologies segment primarily in anticipation of the emerging market for diesel emission control systems.

We expect our 2007 capital spending to be in the range of \$1.1 billion to \$1.2 billion, of which approximately \$700 million will be directed toward our Display Technologies segment and approximately \$100 million will be directed toward our Environmental Technologies segment.

RESULTS OF CONTINUING OPERATIONS

Selected highlights from our continuing operations follow (dollars in millions):

	2006	2005	2004	% Change	
				06 vs. 05	05 vs. 04
Net sales	\$ 5,174	\$ 4,579	\$ 3,854	13	19
Gross margin	\$ 2,283	\$ 1,984	\$ 1,415	15	40
(gross margin %)	44%	43%	37%		
Selling, general and administrative expenses	\$ 857	\$ 756	\$ 653	13	16
(as a % of revenues)	17%	17%	17%		
Research, development and engineering expenses	\$ 517	\$ 443	\$ 355	17	25
(as a % of revenues)	10%	10%	9%		
Restructuring, impairment and other charges and (credits)	\$ 54	\$ (38)	\$ 1,789	(242)	(102)

(as a % of revenues)

36%

13%

(58)%

Net Sales

The net sales increase in 2006 compared to 2005 was the result of increased demand for LCD glass substrates in our Display Technologies segment and year-over-year increased volume in the Telecommunications segment. Net sales for all other segments were comparable to the prior year. Movements in foreign exchange rates negatively impacted 2006 net sales by approximately \$125 million (or 3%) when compared with 2005.

The net sales increase in 2005 compared to 2004 was the result of a significant increase in demand for LCD glass substrates in our Display Technologies segment. Modest gains in demand for products in our Telecommunications segment to support fiber-to-the-premises projects and in our Environmental Technologies segment also contributed to the sales increase. The impact of movements in foreign exchange rates on 2005 net sales was less than 1% when compared with net sales in 2004.

Reflecting the growth in our Display Technologies segment, net sales into international markets continued to surpass those into the U.S. market. For 2006, 2005, and 2004, sales into international markets accounted for 71%, 71%, and 65% of net sales, respectively.

Cost of Sales

The types of expenses included in the cost of sales line item are: raw materials consumption, including direct and indirect materials; salaries, wages and benefits; depreciation and amortization; production utilities; production-related purchasing; warehousing (including receiving and inspection); repairs and maintenance; inter-location inventory transfer costs; production and warehousing facility property insurance; rent for production facilities; and other production overhead.

24

Gross Margin

As a percentage of net sales, 2006 gross margin was up slightly from 2005 driven primarily by our Display Technologies segment. Gross margins for this segment were essentially even with 2005 reflecting the negative impact of price declines offset by higher volumes and cost reductions. Display Technologies segment sales increased from 38% of total Corning's sales in 2005 to 41% of Corning's sales in 2006. As Display Technologies has a higher gross margin than our consolidated gross margin, the added concentration in Display Technologies in 2006 caused Corning's gross margin percentage to increase from 43% in 2005 to 44% in 2006.

For 2005, as a percentage of net sales, gross margin improved 6 percentage points versus 2004. The improvement was driven by increased volume, improved mix of large generation glass and manufacturing efficiencies in our Display Technologies segment.

Selling, General, and Administrative Expenses

The increase in selling, general and administrative expenses for 2006 compared to 2005, in dollars, was primarily due to an increase in stock-based compensation expense as a result of the Company's adoption of Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004) Share-Based Payment (SFAS 123(R)), effective January 1, 2006. The increase in spending in 2005 compared to 2004 was primarily driven by increases in compensation costs. As a percent of net sales, selling, general, and administrative expenses were comparable for all periods presented.

The types of expenses included in the selling, general and administrative expenses line item are: salaries, wages and benefits; travel; sales commissions; professional fees; and depreciation and amortization, utilities, and rent for administrative facilities.

Share-Based Compensation

Prior to January 1, 2006, the Company accounted for share-based awards granted under the Company's stock compensation programs using the intrinsic value method in accordance with Accounting Principles Board Opinion (APB) No. 25, "Accounting for Stock Issued to Employees" (APB 25) and SFAS No. 123, "Accounting for Stock-Based Compensation" (SFAS 123). Under the intrinsic value method, no share-based compensation cost related to stock options had been recognized in the Company's consolidated statements of operations, because the exercise price was at least equal to the market value of the common stock on the grant date. As a result, the recognition of share-based compensation cost was generally limited to the expense attributed to restricted stock awards, and stock option modifications. As permitted under SFAS 123, the Company reported pro-forma disclosures presenting results and earnings per share as if we had used the fair value recognition provisions of SFAS 123 in the notes to the Company's consolidated financial statements.

Effective January 1, 2006, the Company adopted the provisions of SFAS 123(R) using the modified prospective application method. Under the modified prospective application method, compensation cost recognized in 2006 includes: (a) compensation cost for all share-based awards granted prior to, but not yet vested as of January 1, 2006 based on the grant date fair value estimated in accordance with the original provisions of SFAS 123, and (b) compensation cost for all share-based awards granted subsequent to January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of SFAS 123(R). Compensation cost is recognized in the consolidated statements of operations over the period during which an employee is required to provide service in exchange for the award. In accordance with the modified prospective application method, results for prior periods have not been restated. The adoption of SFAS 123(R) resulted in a decrease of \$0.05 in basic and diluted earnings per share for the year ended December 31, 2006. See Note 18 (Share-based Compensation) to the consolidated financial statements for further detail on the impact of SFAS 123(R).

25

Research, Development, and Engineering Expenses

Research, development and engineering expenditures increased by \$74 million in 2006 when compared to 2005, but remained consistent as a percentage of net sales. Expenditures in 2006 were focused on our Display Technologies, Environmental Technologies and Telecommunications segments as we looked to capitalize on market opportunities in those segments. Expenses in 2006 also included costs associated with exploratory projects to support future growth. Expenditures increased in 2005 when compared to 2004, due to increased spending to support growth initiatives including glass substrates for LCDs, diesel filter and substrates in response to tightening emissions control standards, as well as exploratory projects.

Restructuring, Impairment and Other Charges and (Credits)

Corning recorded significant net charges in 2004 which affect the comparability of our results for 2006, 2005, and 2004. A summary of the net charges and credits for all years presented is provided in the following table (in millions):

	For the years ended December		
	2006	31, 2005	2004
Impairment of goodwill			\$ 1,420
Impairment of long-lived assets other than goodwill			
Assets to be disposed of by sale or abandonment	\$ (2)	\$ 6	302
Assets to be held and used	50		24
Reversal of currency translation adjustment		(84)	
Accelerated depreciation			37
Loss on sale of businesses			12
Impairment of available-for-sale securities		25	
Restructuring charges and (credits)	6	15	(6)
Total restructuring, impairment other charges and (credits)	\$ 54	\$ (38)	\$ 1,789

Impairment of Goodwill

2004 Impairment Charge

Pursuant to SFAS No. 142, "Goodwill and Other Intangible Assets," (SFAS 142) goodwill is required to be tested for impairment annually at the reporting unit level. In addition, goodwill should be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting unit below its related carrying value. In the third quarter of 2004, we identified certain factors that caused us to lower our estimates and projections for the long-term revenue growth of the Telecommunications segment, which indicated that the fair value of the Telecommunications segment reporting unit was less than its carrying value. We performed an interim impairment test of the Telecommunications segment goodwill in the third quarter of 2004 and, as a result, recorded an impairment charge of \$1,420 million to reduce the carrying value of goodwill to its implied fair value at September 30, 2004 of \$117 million.

Impairment of Long-Lived Assets Other Than Goodwill

Given our restructuring actions and the market conditions facing certain of our businesses, at various times throughout 2004 to 2006, we performed evaluations of the recoverability of our held for use long-lived assets other than goodwill. When an impairment evaluation was required, we developed expected future cash flows against which to compare the carrying value of the asset group being evaluated. If our projections indicated that our long lived assets were not recoverable through future cash flows, we were then required to estimate the fair value of the long-lived assets, limited to property, plant and equipment, using the expected cash flow approach as a measure of fair value.

26

2006 Impairment Charge

Assets to be held and used

In 2006, we recorded an asset held for use impairment charge of \$44 million to impair certain long-lived assets of our Telecommunications segment in accordance with SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" (SFAS 144). Due to our lowered long-term outlook for this business, we determined that an event of impairment, as defined by SFAS 144, had occurred in that business, which further required us to test this asset group for impairment. We assess recoverability of the carrying value of long-lived assets at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. We estimated the fair value of the long-lived assets for this business using a discounted expected cash flow approach as a measure of fair value. As a result of our impairment evaluation, we recorded an impairment charge to write-down the asset group to its estimated fair value.

2004 Impairment Charge

Assets to be disposed of by sale or abandonment

These charges comprise the following:

- *Telecommunications segment:* In 2004, we recorded a net charge of \$344 million to impair plant and equipment related to certain facilities to be disposed of or shutdown. Approximately \$332 million of this net charge was comprised of the partially completed sections of our Concord, N.C. optical fiber facility. As a result of our lowered outlook, we have permanently abandoned this construction in progress as we no longer believe the demand for optical fiber will warrant the investment necessary to complete this facility. We have mothballed and will continue to depreciate the separate previously-operated portion of the Concord fiber facility.
- *Other businesses:* We recorded net credits of \$42 million, primarily for gains on the sale of assets Corning Asahi Video Products (CAV) sold to a third party in China. This represented proceeds in excess of assumed salvage values for assets previously impaired. This represented the substantial completion of the sale of CAV's assets.

Assets to be held and used

In 2004, due to our decision to permanently abandon certain assets and lower our long-term outlook for the Telecommunications segment in 2004, we determined that an event of impairment had occurred in our Telecommunications segment which required us to test the segment's long-lived assets other than goodwill for impairment. As a result of this impairment evaluation, we recorded a \$24 million impairment charge in the third quarter of 2004 to write-down certain assets to fair value.

Other Credits

2005 Reversal of Currency Translation Adjustment

In 2003, Corning sold its photonic business operations to Avanex. The photonics business was the sole operation of Corning O.T.I. S.r.l. (OTI), a wholly-owned Italian subsidiary of Corning, whose results were included in Corning's Telecommunications segment. Subsequent to the sale of the operating assets of OTI to Avanex, Corning began liquidating OTI. In October 2005, the assets of OTI were determined to be substantially liquidated. As a result of the substantial liquidation, OTI's cumulative translation account was reversed, resulting in a gain of \$84 million in the fourth quarter.

27

Accelerated Depreciation

2004 Accelerated Depreciation

We recorded \$37 million of accelerated depreciation relating to the final shutdown of our semiconductor materials manufacturing facility in Charleston, South Carolina, which we announced in the fourth quarter of 2003.

Loss on Sale of Businesses

2004 Loss on Sale of Business

On September 1, 2004 we completed the sale of our frequency controls business, which was part of the Telecommunications segment, for net cash proceeds of \$80 million. We recorded a loss on the sale of \$14 million, which included an allocation of \$30 million of the Telecommunications segment goodwill.

Impairment of Available for Sale Securities

2005 Impairment Charge

In 2005, we recorded impairment charges of \$25 million for an other than temporary decline in the fair value of our investment in Avanex Corporation (Avanex) below its adjusted cost basis. Our investment in Avanex was accounted for as an available-for-sale security under SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities" (SFAS 115). In the fourth quarter of 2005, we completed the sale of our shares of Avanex.

Restructuring Actions

2005 Restructuring Actions

Corning recorded net restructuring charges of \$15 million in 2005 which included the following:

- A charge of \$30 million comprising severance costs for a restructuring plan in the Telecommunications segment to continue to reduce costs in this segment.

- Net credits to prior year restructuring plans totaling \$15 million primarily for revisions to plans related to the shutdown of Corning Asahi Video Products and to our specialty materials business.

Legal Settlement - Asbestos

On March 28, 2003, we announced that we had reached agreement with the representatives of current and future asbestos claimants on a settlement arrangement that was thereafter incorporated into the Pittsburgh Corning Corporation (PCC) plan of reorganization (the PCC Plan). This settlement remains subject to a number of contingencies, including approval by the Bankruptcy Court. If the PCC Plan is approved and becomes effective, our settlement will require Corning to relinquish its equity interest in PCC, contribute its equity interest in Pittsburgh Corning Europe N.V. (PCE), and contribute 25 million shares of Corning common stock. The common stock and other components of the settlement will be marked-to-market each quarter until the PCC Plan is approved, thus resulting in adjustments to income and the settlement liability as appropriate. Corning will also make cash payments of \$140 million (net present value of \$131 million at March 2003) in six installments beginning one year after the plan is effective. In addition, we will assign insurance policy proceeds from our primary insurance and a portion of our excess insurance as part of the settlement. Two of Corning's primary insurers and several excess insurers have commenced litigation for a declaration of the rights and obligations of the parties under insurance policies, including rights that may be affected by the settlement arrangement described above. Corning is vigorously contesting these cases. Management is unable to predict the outcome of this insurance litigation.

28

The PCC Plan received a favorable vote from creditors in March 2004. Hearings to consider objections to the PCC Plan were held in the Bankruptcy Court in May 2004. In February 2006, the Bankruptcy Court requested that the PCC Plan proponents delete references to Section 105(a) of the Bankruptcy Code and resubmit the PCC Plan. The final round of oral argument was held on July 21, 2006. On December 21, 2006, the Bankruptcy Court issued an order denying confirmation of the PCC Plan for reasons set out in a memorandum opinion. Several parties, including Corning, have filed motions for reconsideration, which are scheduled for a hearing before the Bankruptcy Court on March 5, 2007. If the Bankruptcy Court does not approve the PCC Plan in its current form, changes to the PCC Plan are probable as it is likely that the Court will allow the proponents time to propose amendments. The outcome of these proceedings is uncertain, and confirmation of the current Plan or any amended Plan is subject to a number of contingencies. However, apart from the quarterly mark-to-market adjustment in the value of the 25 million shares of Corning stock, management believes that the likelihood of a material adverse impact to Corning's financial statements is remote.

The following summarizes the charges and gains we have recorded for the asbestos settlement (in millions):

	For the years ended December 31,			
	2006	2005	2004	2003
Initial settlement charge				\$ 392
Fair market value adjustment for other components	\$ 22	\$ 21	\$ 32	28
Mark-to-market common stock	(24)	197	33	115
Asbestos settlement	\$ (2)	\$ 218	\$ 65	\$ 535

See Legal Proceedings for additional information about this matter.

Income (Loss) From Continuing Operations Before Income Taxes

In addition to the items identified under Gross Margin, Restructuring, Impairment and Other Charges and (Credits) and Asbestos Settlement, we retired a significant amount of our outstanding debentures during 2006, 2005 and 2004, that resulted in losses of \$11 million, \$16 million, and \$36 million, respectively.

Movements in currency exchange rates negatively impacted income (loss) from continuing operations in 2006 and 2005 when compared to the respective previous years.

Provision for Income Taxes

Edgar Filing: CORNING INC /NY - Form 10-K

Our provision for income taxes and the related effective income tax (benefit) rates were as follows (in millions):

	For the years ended December 31,		
	2006	2005	2004
Provision for income taxes	\$ 55	\$ 578	\$ 1,084
Effective income tax rate	5.7%	103.4%	67.6%

The effective income tax rate for 2006 differed from the U.S. statutory rate of 35% primarily due to the following items:

- The impact of not recording tax expense on income generated in the U.S.;
- The release of valuation allowances on all Australian deferred tax assets and on a portion of our deferred tax assets in Germany; and
- The benefit of tax holidays in foreign jurisdictions.

In 2004 and 2005 we recorded valuation allowances against our entire U.S. deferred tax assets because we incurred significant losses in the U.S. in recent years. As a result, our tax provision in these years has included only the net tax expense attributable to certain foreign operations. While we did generate income from continuing operations in the U.S. in 2006, such income was largely offset by tax adjustments not reflected in our continuing operations. In the absence of an appropriate level of overall profitability in the U.S., we did not record tax expense on income from continuing operations in the U.S. in 2006, resulting in a reduction in our effective tax rate of 14.2%.

29

In 2004, we also recorded valuation allowances against most of our foreign deferred tax assets. In 2006, due to sustained profitability and positive earnings projections in both Australia and at certain of our German operations, we have concluded that it is more likely than not that the underlying tax benefits are realizable and released valuation allowances, resulting in a reduction in our effective tax rate of 8.7%.

Certain foreign subsidiaries in China, South Africa and Taiwan are operating under tax holiday arrangements. The nature and extent of such arrangements vary, and the benefits of such arrangements phase out in years (2006 to 2010) according to the specific terms and schedules of the relevant taxing jurisdictions. The impact of the tax holidays on our effective rate is a reduction in the rate of 10.1%, 8.9%, and 1.2% for 2006, 2005, and 2004, respectively.

In addition to the aforementioned benefit of tax holidays, the effective income tax rate for:

- 2005 differed from the U.S. statutory rate of 35% primarily due to tax expense of \$525 million to increase Corning's valuation allowance.
- 2004 differed from the U.S. statutory rate of 35% primarily due to establishing a valuation allowance against certain domestic (U.S. federal, state and local) and foreign deferred tax assets, and the write-off of nondeductible goodwill.

In 2004, significant events occurred which required us to increase our valuation allowances against certain U.S. and German deferred tax assets resulting in an increase in our effective tax rate of 78.9%. Refer to Note 3 (Restructuring, Impairment and Other Charges and (Credits)) for additional information on these events and the related charges. At that time, we believed that it was more likely than not that we could realize the remaining net U.S. deferred tax assets of approximately \$525 million through a tax planning strategy involving the sale of our investment in Dow Corning, a non-strategic appreciated asset, if we were faced with expiring net operating loss carryforwards.

During 2005, Dow Corning's performance was much stronger than expected and Dow Corning resumed paying a dividend; both of which are expected to continue in the future. Due to this improved performance, we concluded that Dow Corning provides strong financial, geographic and market balance to Corning's portfolio of businesses, the profitability of which has become more concentrated due to the success of the display operating segment. As

a result, we considered Dow Corning to be a strategic investment and could no longer assert that a potential tax planning strategy involving the sale of Dow Corning would be prudent, as required by SFAS No. 109, "Accounting for Income Taxes" (SFAS 109). Therefore, we no longer believed, in the fourth quarter of 2005, that it was more likely than not that we would realize the remaining net deferred tax assets. Accordingly, we increased our valuation allowance by \$525 million to fully reserve our net U.S. deferred tax assets in the fourth quarter of 2005, which increased our effective tax rate by 94%.

During the third quarter of 2005, Corning filed its 2004 consolidated U.S. Federal income tax return, which included a \$3.9 billion worthless stock deduction for the loss on our investment in the photonic technologies business associated with the Pirelli acquisition. This acquisition was completed in December 2000 and was substantially impaired in the second quarter of 2001. Prior to the third quarter of 2005, we did not record a deferred tax asset for this item as the ultimate realization of such deduction was uncertain, and consistent with the requirements of SFAS No. 5, "Accounting for Contingencies," recognition of an asset prior to the time management determines the realization of the asset is probable is prohibited. On September 2, 2005, Corning and the Commissioner of the IRS entered into a closing agreement under section 7121 of the Internal Revenue Code of 1986 which provides that Corning is entitled to this worthless stock deduction. We recorded a \$1.5 billion deferred tax asset for this item in the third quarter, which was concurrently offset by a valuation allowance of an equal amount due to our inability to record tax benefits for U.S. net operating losses. The net result had no impact of our effective tax rate for 2005.

30

Equity in Earnings of Affiliated Companies, Net of Impairments

The following provides a summary of equity earnings of affiliated companies, net of impairments (in millions):

	2006	2005	2004
Samsung Corning Precision	\$ 555	\$ 408	\$ 277
Dow Corning	334	253	116
Samsung Corning		(112)	32
All other	71	62	29
Total equity earnings	\$ 960	\$ 611	\$ 454

The 2006 and 2005 increases in equity earnings of affiliated companies, net of impairments, are primarily due to strong sales and earnings performance at Samsung Corning Precision and at Dow Corning.

In addition to the above, equity in earnings of affiliated companies, net of impairments, included the following restructuring and impairment charges and other credits:

- In 2006, Dow Corning reached settlement with the IRS regarding liabilities for tax years 1992 to 2003. Equity earnings reflected a \$33 million gain as a result of the settlement which resolved all Federal tax issues related to Dow Corning's implant settlement.
- In 2006, Samsung Corning recorded the following items which increased Corning's equity earnings by \$2 million, net: a gain on the sale of land which increased Corning's equity earnings by \$61 million; an impairment charge on certain long-lived assets which reduced Corning's equity earnings by \$46 million; and the establishment of a valuation allowance for certain deferred tax assets which reduced Corning's equity earnings by \$13 million.
- In 2005, Samsung Corning incurred impairment and other charges as a result of a decline in the projected operating results for its cathode ray tube (CRT) glass business. The charge, which included certain manufacturing assets and severance and exit costs, reduced Corning's equity earnings by \$106 million in the third quarter.
- In 2005, Dow Corning recorded a gain on the issuance of subsidiary stock. Corning's equity earnings included \$11 million related to this gain.
- In 2004, Corning incurred charges of \$35 million to impair equity method investments in the Telecommunications segment to their estimated fair value.

- In 2004, Dow Corning recorded charges related to restructuring actions and adjustments to interest liabilities recorded on its emergence from bankruptcy. Corning's equity earnings included \$21 million related to these charges.

In 2003, 2005, and 2006, Samsung Corning recorded significant fixed asset and other impairment charges. As the conventional television glass market will be negatively impacted by strong growth in the LCD glass market, it is reasonably possible that Samsung Corning may incur additional restructuring or impairment charges or operating losses in the foreseeable future. Samsung Corning is currently investing in several developing businesses which Samsung Corning management believes will offset the decline in conventional television glass market over time. Should these new businesses not achieve expected results, additional operating losses, asset impairments and restructuring charges are likely to occur and Samsung Corning's long-term financial viability may come into question. These events could result in Corning incurring an impairment of its investment in Samsung Corning. Corning management believes it is more likely than not that an impairment of our investment will occur in the foreseeable future. Corning's investment in Samsung Corning was \$254 million at December 31, 2006.

Income (Loss) From Continuing Operations

As a result of the items discussed above, the income (loss) from continuing operations and per share data was as follows (in millions, except per share amounts):

	For the years ended December 31,		
	2006	2005	2004
Income (loss) from continuing operations	\$ 1,855	\$ 585	\$ (2,251)
Basic earnings (loss) per common share from continuing operations	\$ 1.20	\$ 0.40	\$ (1.62)
Diluted earnings (loss) per common share from continuing operations	\$ 1.16	\$ 0.38	\$ (1.62)
Shares used in computing basic per share amounts	1,550	1,464	1,386
Shares used in computing diluted per share amounts	1,594	1,535	1,386

RESULTS OF DISCONTINUED OPERATIONS

In the third quarter of 2004, Corning and 3M reached a final settlement agreement for funds held in escrow associated with the 2002 sale of Corning's precision lens business to 3M. As a result, we recognized a \$20 million gain upon receipt of the proceeds in 2004.

OPERATING SEGMENTS

Our reportable operating segments include Display Technologies, Telecommunications, Environmental Technologies, and Life Sciences. The Environmental Technologies reportable segment is an aggregation of our Automotive and Diesel operating segments, as these two segments share similar economic characteristics, products, customer types, production processes and distribution methods. The following provides a brief description of the products and markets served by each reportable segment:

- Display Technologies □ manufactures liquid crystal display glass for flat panel displays;
- Telecommunications □ manufactures optical fiber and cable, and hardware and equipment components for the worldwide telecommunications industry;
- Environmental Technologies □ manufactures ceramic substrates and filters for automobile and diesel applications; and
- Life Sciences □ manufactures glass and plastic consumables for scientific applications.

We prepared the financial results for our reportable segments on a basis that is consistent with the manner in which we internally disaggregate financial information to assist in making internal operating decisions. We

include the earnings of equity affiliates that are closely associated with our operating segments in the respective segment's net income. We have allocated certain common expenses among segments differently than we would for stand-alone financial information prepared in accordance with GAAP. These expenses include interest, taxes and corporate functions. Segment net income may not be consistent with measures used by other companies. The accounting policies of our reportable segments are the same as those applied in the consolidated financial statements.

On January 1, 2006, Corning changed its measurement of segment profit or loss as follows:

- We removed the net impact of financing costs, such as interest expense on debt instruments and interest costs associated with benefit plans, from reportable segments and included these amounts in Corporate unallocated expense.
- We changed the allocation method for taxes to more closely reflect the Company's current tax position.
- We removed the impact of non-cash stock compensation expense from reportable segments and included this amount in Corporate unallocated expense.

32

- We removed the allocation of exploratory research, development and engineering expense from reportable segments and included these amounts in Corporate unallocated expense.
- We changed certain other allocation methods for corporate functions.

The following discussion reflects segment information that has been revised to reflect the changes to segment performance measurement as described above.

Display Technologies

The following table provides net sales and other data for the Display Technologies segment (dollars in millions):

	2006	2005	2004	% Change	
				06 vs. 05	05 vs. 04
Net sales	\$2,133	\$ 1,742	\$ 1,113	22	57
Income before equity earnings	\$1,052	\$ 823	\$ 429	28	92
Equity earnings of affiliated companies	\$ 565	\$ 416	\$ 288	36	44
Net income	\$1,617	\$ 1,239	\$ 717	31	73

2006 vs. 2005

The net sales increase for 2006 continues to reflect overall LCD glass market growth. During 2006, glass substrate volumes (measured in square feet of glass sold) increased 52% compared with 2005, driven by increased LCD monitor and TV market penetration, demand for larger-size substrates (generation 5 and above), and continued strong demand for glass for notebook computers. Sales of large-size glass substrates, which carry a slightly higher selling price per square foot, accounted for 82% of 2006 sales volumes compared to 69% in 2005. The growth in volume was partially offset by declines in weighted average selling prices of approximately 16%. Sales of the Display Technologies segment are denominated primarily in the Japanese yen. Movements in the U.S. dollar □ Japanese yen exchange rate negatively impacted 2006 sales by approximately \$122 million (or 7%) when compared with 2005.

In the second quarter of 2006, the Display Technologies segment reported its first quarterly sequential decline in volume since the third quarter of 2001. The lower volume was the result of a number of our customers, primarily in Taiwan, idling part of their facilities and thus reducing their demand for glass, as a result of a build-up of panel inventory in the supply chain. In comparison to the second quarter of 2006, both volume and sales increased in the third quarter of 2006. As expected, our customers reduced their inventories and began ramping up LCD panel production to meet seasonally stronger demand expected in the fourth quarter.

For 2006, the increase in income before equity earnings was primarily the result of higher volumes as described above and manufacturing cost reductions, offset somewhat by lower prices and the impact of exchange rates. Movements in currency exchange rates negatively impacted 2006 income before equity earnings by approximately 5% when compared with 2005.

The increase in our equity earnings, primarily from Samsung Corning Precision, was largely driven by the same market factors identified for our wholly owned business except that the impact of the panel maker inventory build in Korea in the second quarter of 2006 was not as significant. In 2006, Samsung Corning Precision's earnings were negatively impacted by approximately 8% from movements in exchange rates compared to 2005. Equity earnings from Samsung Corning Precision are susceptible to movements in the U.S. dollar Japanese yen and U.S. dollar Korean won exchange rates.

The Display Technologies segment has a concentrated customer base comprised of LCD panel and color filter makers primarily located in Japan and Taiwan. On October 1, 2006, AU Optronics Corporation (AUO), a customer of the Display Technologies segment, completed its previously announced merger with Quanta Display Inc. (QDI), another customer of Corning's Display Technologies segment. In addition, through two subsequent transactions, AUO now holds a 49% equity stake in Toppan CFI, a subsidiary of Toppan Printing Co., Ltd., also a customer of the Display Technologies segment. As a result of these transactions, AUO, QDI, and Toppan CFI are considered to be a single customer reported as AUO. For 2006, AUO (including QDI and Toppan CFI), Chi Mei Optoelectronics Corporation, and Sharp Corporation, which individually accounted for more than 10% of segment net sales, accounted for 64% of total segment sales when combined.

33

In addition, Samsung Corning Precision's sales are concentrated across a small number of its customers. In 2006, sales to two LCD panel makers located in Korea, Samsung Electronics Co., Ltd. and LG Phillips LCD Co., Ltd. accounted for approximately 92% of total Samsung Corning Precision sales.

In 2005 and 2004, Corning and several customers entered into long-term purchase and supply agreements in which the Display Technologies segment agreed to supply large-size glass substrates to the customers over periods of up to six years. As part of the agreements, these customers agreed to make advance cash deposits to Corning for a portion of the contracted glass to be purchased. In 2006, Corning received \$171 million of customer deposits and issued \$126 million in credit memoranda. Refer to Note 11 (Other Liabilities) to the consolidated financial statements for additional information.

In the event the customers do not make all customer deposit installment payments or elect not to purchase the agreed upon quantities of product, subject to specific conditions outlined in the agreements, Corning may retain certain amounts of the customer deposits. If Corning does not deliver agreed upon product quantities, subject to specific conditions outlined in the agreements, Corning may be required to return certain amounts of the customer deposits. In the ordinary course of business, Corning will continue to negotiate multi-year supply agreements with its large customers where feasible but we believe it is unlikely that we will negotiate agreements that require additional deposits.

Corning is investing heavily to expand capacity to meet increasing demand for LCD glass substrates. In 2006, capital spending was \$829 million and is expected to be approximately \$700 million in 2007. Capital spending in 2007 will be used primarily to expand manufacturing facilities in Taichung, Taiwan and Shizuoka, Japan.

2005 vs. 2004

The 2005 sales increase reflected the overall growth of the LCD glass substrate market. During 2005, glass substrate volumes increased approximately 64% compared with 2004. For 2005, large-size glass substrates accounted for 69% of total sales volumes, compared to 46% in 2004. Movements in the U.S. dollar Japanese yen exchange rate did not have a significant impact on the comparability of sales.

For 2005, the key drivers for the increase in income before equity earnings were higher volumes, ongoing improvements in manufacturing efficiencies, and a lower effective tax rate. Movements in currency exchange rates did not have a significant impact on income before equity earnings. The increase in our equity earnings from Samsung Corning Precision was largely driven by higher volumes and ongoing improvements in manufacturing efficiencies.

Outlook:

We expect to see a continuation of the overall industry growth and the trend toward large size substrates driven by increased end market demand for LCD televisions. We anticipate the volume growth in the LCD glass market to be in the mid-30% range in 2007. The expected market volume growth, measured in square feet, for the year should be equal to or greater than the volume growth in the market in 2006. Corning's LCD glass volume is expected to grow at the upper end of this range, while Samsung Corning Precision's volume growth may be slightly lower. Growth rates by region for the industry generally, and thus for Corning's wholly owned business and Samsung Corning Precision, may be different based on market dynamics.

We believe prices will decline in 2007 but not to the extent that we experienced in 2006. We also expect to be able to reduce our manufacturing costs to address the impact of price declines. We expect price declines of 1-2% in the first quarter of 2007 when compared to the fourth quarter of 2006.

34

As glass for LCD television becomes a higher percentage of total LCD glass demand, we anticipate that our business will become more seasonal. We currently anticipate that glass volume will decline 10-15% in the first quarter from the seasonally strong fourth quarter of 2006 and that sales and earnings in this segment will be more concentrated in the second half of 2007 than in prior years.

Although we believe that end market demand for LCD televisions, monitors and notebooks remains strong, we are cautious about the potential negative impact that economic conditions and political tensions could have on consumer demand. There is no assurance that the end-market rates of growth will continue at the rates experienced in recent years, that we will be able to pace our capacity expansions to actual demand, or that the rate of cost declines will offset price declines in any given period. While the industry has grown rapidly, consumer preferences for panels of differing sizes; prices; or other factors may lead to pauses in market growth. Therefore, it is possible that glass manufacturing capacity may exceed demand from time to time. In addition, changes in foreign exchange rates, principally the Japanese yen, will continue to impact the sales and profitability of this segment.

Telecommunications

The following table provides net sales and other data for the Telecommunications segment (dollars in millions):

	2006	2005	2004	% Change	
				06 vs. 05	05 vs. 04
Net sales:					
Optical fiber and cable	\$ 877	\$ 834	\$ 755	5	10
Hardware and equipment	852	789	784	8	1
Total net sales	\$ 1,729	\$ 1,623	\$ 1,539	7	5
Net income (loss)	\$ 7	\$ 68	\$ (1,874)	(90)	(104)

2006 vs. 2005

Increases in Telecommunications segment net sales were driven by improved sales in North America, Europe and China. The increase was driven by a broader recovery in the Telecommunications industry, including greater deployment of fiber-to-the premises products and growth in the private network market. The volume increase was offset somewhat by continued price declines when compared to 2005. Movements in foreign exchange rates which can affect this segment's net sales, primarily the Euro and Japanese yen, did not have a significant impact on sales in 2006 when compared to the previous year.

Effective April 1, 2006, ACS, an equity company affiliate, assumed responsibility for optical cable and hardware and equipment sales in Japan. As a result, sales in 2006 were negatively impacted as ACS, which is accounted for under the equity method, began to sell into the Japanese market. Sales of optical cable and hardware and equipment in Japan, which are now recorded by an equity affiliate, were \$75 million in 2005 and \$23 million in the first quarter of 2006.

In 2006, we recorded an asset held for use impairment charge of \$44 million to impair certain long-lived assets of our cabling business in accordance with SFAS 144. Due to our lowered long-term outlook for this business, we determined that an event of impairment, as defined by SFAS 144, had occurred, which further required us to test this asset group for impairment. We assess recoverability of the carrying value of long-lived assets at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. We estimated the fair value of the long-lived assets for this business using the expected cash flows discounted cash flow approach as a measure of fair value associated with these assets. As a result of our impairment evaluation, we recorded an impairment charge to write-down the asset group to its estimated fair value.

For the Telecommunications segment, net income in 2006 and 2005 was impacted by restructuring, impairment, and other charges and credits. In 2006, we recorded an after-tax impairment charge of \$44 million, described above. In 2005, we recorded net after-tax credits of \$47 million. Refer to Results of Continuing Operations for a discussion of these charges. The decline in net income for this segment in 2006 when compared to 2005 was primarily the result of the 2006 impairment charge described above and the absence of net after-tax credits of \$47 million that were recorded in 2005. Movements in exchange rates did not significantly impact the results for this operating segment.

35

The Telecommunications segment has a concentrated customer base. In 2006, two customers of the Telecommunications segment, which individually accounted for more than 10% of total segment net sales, accounted for 25% of total segment sales when combined.

2005 vs. 2004

Results for the Telecommunications segment reflected a solid performance in 2005. The net sales increase was largely driven by sales in North America and Europe. Excluding the impact of the frequency controls business, a hardware and equipment manufacturer sold in September 2004, net sales for the Telecommunications segment increased 10% in 2005 when compared to the previous year. Movements in exchange rates did not significantly impact sales for either 2005 or 2004.

For the Telecommunications segment, net income in 2005 and the net loss in 2004 were impacted by restructuring, impairment, and other charges and credits. In 2005, we recorded net after-tax credits of \$47 million related to these items and in 2004, we recorded after-tax charges of \$1,798 million. Refer to Results of Continuing Operations for a detailed discussion of these charges.

Outlook:

For the Telecommunications segment, we expect sales and earnings to increase in 2007, reflecting a broader-based increase in demand than in the last two years. However, sales will still be impacted by the seasonal buying patterns of our largest customer. Changes in our customer's expected deployment plan, or additional reductions in their inventory levels of fiber-to-the-premises products, could also affect the sales level. Should these plans not occur at the pace anticipated, our sales and earnings would be adversely affected.

Environmental Technologies

The following table provides net sales and other data for the Environmental Technologies segment (dollars in millions):

	2006	2005	2004	% Change	
				06 vs. 05	05 vs. 04
Net sales:					
Automotive	\$ 451	\$ 482	\$ 479	(6)	1
Diesel	164	98	69	67	42
Total net sales	\$ 615	\$ 580	\$ 548	6	6
Net income	\$ 7	\$ 15	\$ 21	(53)	(29)

2006 vs. 2005

Sales of this segment in 2006 were somewhat higher than last year due to improvements in Diesel products sales, primarily for light-duty diesel vehicle applications. However, we also experienced a decline in automotive product sales due to lower volumes. As end customers shift demand toward smaller, more energy efficient vehicles, demand for larger automobiles has declined. This shift in demand has caused our automotive substrate volumes to decline because our market share is relatively higher for manufacturers of larger vehicles. In addition, volumes have been negatively impacted because smaller vehicles require proportionately smaller substrates. Movements in exchange rates did not have a significant impact on sales for this segment.

The decrease in net income in 2006 versus 2005 was due primarily to increased research, development, and engineering spending in preparation for the growth in sales of heavy duty and light duty diesel products.

36

2005 vs. 2004

The 2005 increase in net sales was the result of continued growth in diesel products sales. For automotive products, sales in 2005 were flat when compared to prior year. The 2005 decrease in net income compared to 2004 resulted primarily from increased operating expenses primarily to support our emerging diesel products. Movements in exchange rates did not significantly impact net sales or net income of this segment in 2005 when compared to 2004.

The Environmental Technologies segment sells to a concentrated customer base of manufacturers of catalyzers and emission control systems, who then sell to automotive and diesel engine manufacturers. Although our sales are to the emission control systems manufacturers, the use of substrates and filters is generally required by the specifications of the automotive and diesel engine manufacturers. In 2006, three customers of the Environmental Technologies segment, which individually accounted for more than 10% of segment net sales, accounted for 72% of total segment sales.

Outlook:

We expect both sales and earnings improvements in the Environmental Technologies segment in 2007. Automotive substrate sales are expected to remain even with 2006 levels. Diesel products sales are expected to increase more than 60% in 2007 as regulations that require heavy duty diesel filters such as ours to meet tighter emission standards became effective in the U.S. on January 1, 2007. Segment profitability is expected to increase due to higher diesel volumes and manufacturing cost reductions. Changes in automotive production could adversely impact sales and net income of this segment.

Life Sciences

The following table provides net sales and other data for the Life Sciences segment (dollars in millions):

	2006	2005	2004	% Change	
				06 vs. 05	05 vs. 04
Net sales	\$ 287	\$ 282	\$ 304	2	(7)
Net (loss) income	\$ (17)	\$ (4)	\$ 16	325	(125)

2006 vs. 2005

Net sales of the Life Sciences segment were up slightly in 2006 when compared to 2005 due to increased prices offset by volume declines in the U.S. Movements in foreign exchange rates did not have a significant impact on the comparability of sales.

The segment continues to operate at a loss due to significant research, development, and engineering spending related to the Epic® System, a high-throughput label-free screening platform based on optical biosensor technology, which had its market launch in 2006. The segment loss also includes \$5 million of severance,

curtailment, and asset impairment costs related to the shutdown of a facility in the United Kingdom.

In the Life Sciences segment, one customer accounted for approximately 43% of this segment's net sales in 2006.

2005 vs. 2004

The decrease in net sales in 2005 when compared to 2004 was due to volume decreases as a result of a change in our distribution channel that was made in early 2005. Prior to 2005, approximately 56% of the Life Sciences segment sales were to two distributors, who in turn sold to end-users such as pharmaceutical and biotechnology companies, government entities, academic institutions and other research facilities. As a result of a change in business strategy by one of the distributors, Corning did not renew the distribution agreement. Approximately 30% of Life Sciences 2004 sales were made through this distributor. As expected, the change had a negative impact on sales volumes in 2005.

37

The net loss in 2005 was due to lower sales and higher operating expenses to implement the change in distribution channels and to support new product development efforts. Movement in foreign exchange rates did not have a significant impact on the comparability of this segment's net sales or net income for 2005 and 2004.

Outlook:

Sales for 2007 are expected to increase slightly over 2006. We expect a lower net loss for 2007 as a result of higher sales and the absence of severance and curtailment charges.

Unallocated and Other

The following table provides net sales and other data (dollars in millions):

				% Change	
	2006	2005	2004	06 vs. 05	05 vs. 04
Other businesses net sales	\$ 410	\$ 352	\$ 350	16	1
Net income (loss)	\$ 47	\$ (66)	\$ 50	(171)	(232)

Unallocated and Other includes all other operating segments that do not meet the quantitative threshold for separate reporting.

Sales in this segment for 2006 were higher than last year due to increased sales in the Specialty Materials business. Net income for 2006 and net loss for 2005 reflected the impact of impairment and other charges and credits recorded by Samsung Corning Co. Ltd. In 2006 and 2005, Corning's share of these items was a credit of \$2 million and a charge of \$106 million, respectively. Refer to Note 8 (Investments) to the consolidated financial statements for additional information.

LIQUIDITY AND CAPITAL RESOURCES

Financing Activities

During 2006, we had a number of significant financing transactions as follows:

- We redeemed the entire \$125 million principal amount of our 8.3% medium-term notes due April 4, 2025, which, at the redemption date, had a book value of \$129 million.
- We redeemed \$119 million of our 6.25% Euro notes due February 18, 2010. We recognized a loss of \$8 million upon the early redemption of these notes.
- We repurchased \$96 million principal amount of our 6.3% notes due March 1, 2009. We recognized a loss of \$3 million upon the repurchase of these notes.

- We issued \$250 million of 7.25% senior unsecured notes for net proceeds of approximately \$246 million for general corporate purposes and in support of an objective to extend the timing of future debt maturities.
Although the notes mature on August 15, 2036, we can redeem or repurchase them at any time.

Refer to Note 12 (Debt) to the consolidated financial statements for further information.

In November 2006, we amended our revolving credit facility so that it now provides us access to a \$1.1 billion unsecured multi-currency revolving line of credit through March 2011. The facility includes two financial covenants: a leverage ratio and an interest coverage ratio. At December 31, 2006, we were in compliance with both financial covenants.

Customer Deposits

Certain customers of our Display Technologies segment have entered into long-term supply agreements and agreed to make advance cash deposits to secure supply of large-size glass substrates. The deposits will be reduced through future product purchases, thus reducing operating cash flows in later periods as credits are applied for cash deposits received in earlier periods.

38

Customer deposits have been or will be received in the following periods (in millions):

	2005	2006	Estimated 2007	Total
Customer deposits received	\$ 457	\$ 171	\$ 105	\$ 733

In 2006 and 2005, we issued \$126 million and \$29 million, respectively, in credit memoranda. These credit amounts are not included in the above amounts and were applied against customer receivables.

In 2007, we expect to issue credits in the range of \$250 million to \$300 million.

Capital Spending

Capital spending totaled \$1.2 billion, \$1.6 billion and \$857 million in 2006, 2005, and 2004, respectively. Capital spending activity in all three years primarily included expansion of LCD glass capacity in the Display Technologies segment and new capacity for diesel products in the Environmental Technologies segment. Our 2007 capital spending program is expected to be in the range of \$1.1 billion to \$1.2 billion, with approximately \$700 million used to expand manufacturing capacity for LCD glass substrates in the Display Technologies segment. Additionally, approximately \$100 million will be directed toward our Environmental Technologies segment to support the emerging diesel emissions control products.

Restructuring

During 2006, 2005, and 2004, we made payments of \$15 million, \$25 million, and \$85 million, respectively, related to employee severance and other exit costs resulting from restructuring actions. Cash payments for employee-related costs will be substantially completed by the end of 2007, while payments for exit activities will be substantially completed by the end of 2010.

Key Balance Sheet Data

At December 31, 2006, cash, cash equivalents and short-term investments totaled \$3.2 billion, compared with \$2.4 billion at December 31, 2005. The increase from December 31, 2005, was primarily due to operating cash flows of \$1.8 billion.

Balance sheet and working capital measures are provided in the following table (dollars in millions):

	As of December 31,	
	2006	2005
Working capital	\$ 2,479	\$ 1,490
Working capital, excluding cash, cash equivalents, and short-term investments	\$ (688)	\$ (944)
Current ratio	2.1:1	1.6:1
Trade accounts receivable, net of allowances	\$ 746	\$ 629
Days sales outstanding	48	49
Inventories	\$ 639	\$ 570
Inventory turns	4.6	4.7
Days payable outstanding	81	89
Long-term debt	\$ 1,696	\$ 1,789
Total debt to total capital	19%	25%

39

Credit Ratings

As of February 26, 2007, our credit ratings were as follows:

RATING AGENCY	Rating Long-Term Debt	Outlook Last Update
Fitch	BBB	Stable April 26, 2006
Standard & Poor's	BBB	Stable April 10, 2006
Moody's	Baa2	Stable July 17, 2006

Management Assessment of Liquidity

Our major source of funding for 2007 and beyond will be our operating cash flow, our existing balances of cash, cash equivalents and short term investments, and proceeds from the exercise of employee stock options. From time to time, we may issue debt securities to refinance debt securities maturing in the next few years. We believe we have sufficient liquidity for the next several years to fund operations, restructuring, the asbestos settlement, research and development, capital expenditures, and scheduled debt repayments. Due to the significant increase in cash, cash equivalents and short term investments over the past few years, during 2007 we will evaluate further reductions in our long-term debt, share repurchases, and dividends.

Off Balance Sheet Arrangements

Off balance sheet arrangements are transactions, agreements, or other contractual arrangements with an unconsolidated entity for which Corning has an obligation to the entity is not recorded in our consolidated financial statements.

Corning's off balance sheet arrangements include the following:

- guarantee contracts that require applying the provisions of FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others" (FIN 45), and
- variable interests held in certain unconsolidated entities.

FIN 45 requires a company, at the time a guarantee is issued, to recognize a liability for the fair value or market value of the obligation it assumes. In the normal course of our business, we do not routinely provide significant third-party guarantees. Generally, third-party guarantees provided by Corning are limited to certain financial guarantees, including stand-by letters of credit and performance bonds, and the incurrence of contingent liabilities in the form of purchase price adjustments related to attainment of milestones. These guarantees have various terms, and none of these guarantees are individually significant.

Refer to Note 14 (Commitments, Contingencies, and Guarantees) to the consolidated financial statements for additional information.

Corning leases certain transportation equipment from three Trusts that qualify as variable interest entities under FIN 46R, *Consolidation of Variable Interest Entities, an Interpretation of Accounting Research Bulletin No. 51, Revised* (FIN 46R). The sole purpose of these entities is to lease transportation equipment to Corning.

For variable interest entities, we assess the terms of our interest in each entity to determine if we are the primary beneficiary as prescribed by FIN 46R. The primary beneficiary of a variable interest entity is the party that absorbs a majority of the entity's expected losses, receives a majority of its expected residual returns, or both, as a result of holding variable interests, which are the ownership, contractual, or other pecuniary interests in an entity that change with changes in the fair value of the entity's net assets excluding variable interests.

40

Corning is the primary beneficiary of one of the three entities, and as required by FIN 46R the financial statements of the entity are included in Corning's consolidated financial statements. Corning is not the primary beneficiary of two of the three variable interest entities and as such, FIN 46R does not require Corning to include them in its consolidated financial statements.

Refer to Note 1 (Summary of Significant Accounting Policies) to the consolidated financial statements for additional information.

Corning does not have retained interest in assets transferred to an unconsolidated entity that serve as credit, liquidity or market risk support to that entity.

In the reporting year 2005 and prior to adopting SFAS 123(R), Corning had employee compensation awards (stock options) that were excluded from the balance sheet. SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" (SFAS 133), requires all derivative instruments to be recorded on the balance sheet at fair market value. Paragraph 11(a) of SFAS No. 133 provides an exception to this requirement for contracts that are indexed to an entity's own stock and classified in the shareholders' equity section of the consolidated financial statements. Therefore, prior to adopting SFAS 123(R), employee stock option awards were excluded from the balance sheet because they met the paragraph 11(a) criteria. In 2006, those options are recorded in the equity section of the consolidated balance sheet. In 2005 and in the first quarter of 2006, we had other non-employee contracts that did not meet the criteria in paragraph 11(a). Those contracts were considered derivative instruments and were accounted for as such in the respective reporting periods.

Contractual Obligations

The amounts of our obligations follow (in millions):

	Total	Amount of commitment and contingency expiration per period				
		Less than 1 year	1 to 2 years	2 to 3 years	3 to 4 years	5 years and thereafter
Performance bonds and guarantees	\$ 70	\$ 14	\$ 5	\$ 1	\$ 1	\$ 49
Credit facilities for equity companies	177			16		161
Stand-by letters of credit ⁽¹⁾	73	63	10			
Loan guarantees	14	1				13

Edgar Filing: CORNING INC /NY - Form 10-K

Subtotal of commitment expirations per period	\$ 334	\$ 78	\$ 15	\$ 17	\$ 1	\$ 223
Purchase obligations	161	74	30	26	22	9
Capital expenditure obligations ⁽²⁾	261	261				
Total debt ⁽³⁾	1,707	20	20	72	297	1,298
Minimum rental commitments	286	62	66	28	24	106
Interest on long-term debt ⁽⁴⁾	1,390	106	105	103	101	975
Subtotal of contractual obligation payments due by period	\$ 3,805	\$ 523	\$ 221	\$ 229	\$ 444	\$ 2,388
Total commitments and contingencies	\$ 4,139	\$ 601	\$ 236	\$ 246	\$ 445	\$ 2,611

- (1) At December 31, 2006, \$35 million of the \$73 million was included in other accrued liabilities on our consolidated balance sheets.
- (2) Capital expenditure obligations, primarily related to our Display Technologies segment expansions, are included on our balance sheet.
- (3) At December 31, 2006, \$1,716 million was included on our balance sheet. Amounts above are stated at their maturity value.
- (4) The estimate of interest payments assumes interest is paid through the date of maturity/expiration of the related debt, based upon stated rates in the respective debt instruments.

41

We have provided financial guarantees and contingent liabilities in the form of stand-by letters of credit and performance bonds, some of which do not have fixed or scheduled expiration dates. We have agreed to provide a credit facility related to Dow Corning as noted above and discussed in Note 8 (Investments) and Note 14 (Commitments, Contingencies, and Guarantees) to the consolidated financial statements. The funding of the Dow Corning credit facility will be required only if Dow Corning is not otherwise able to meet its scheduled funding obligations in its confirmed Bankruptcy Plan. We believe the significant majority of these guarantees and contingent liabilities will expire without being funded.

Pensions

We have a number of defined benefit pension plans covering certain domestic and international employees. Our largest single pension plan is Corning's U.S. qualified plan. At December 31, 2006, this plan accounted for 79% of our consolidated defined benefit pension plans' projected benefit obligation and 90% of the related plans' assets.

At December 31, 2004, the accumulated benefit obligation (ABO) for our domestic qualified and non-qualified plans and several international plans exceeded the fair value of related plan assets, requiring Corning to record an additional minimum pension liability in accordance with SFAS No. 87, "Employers' Accounting for Pensions" (SFAS 87). However, in 2005, due primarily to contributions of Corning stock to the domestic qualified pension plan, the fair value of this plan's assets at December 31, 2005 exceeded the ABO and, accordingly, Corning eliminated this plan's minimum pension liability.

At December 31, 2006, Corning adopted SFAS 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)" (SFAS 158). SFAS 158 requires employers to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in its balance sheet and to recognize changes in that funded status in accumulated other comprehensive income in the year in which the changes occur. The impact of adopting SFAS 158 resulted in a reduction to stockholders' equity of \$669 million after tax. Dow Corning's adoption of this standard resulted in a reduction to our investment in Dow Corning and a decrease to stockholders' equity of \$94 million after tax.

Refer to Note 13 (Employee Retirement Plans) to the consolidated financial statements for additional information.

We have traditionally contributed to the U.S. qualified pension plan on an annual basis in excess of the IRS minimum requirements, and as a result, mandatory contributions are not expected to be required for this plan until at least 2008. For 2006, we did not make any contributions to our pension plans. For 2005, we issued and

contributed 10 million shares of Corning common stock with a value of approximately \$199 million to our domestic pension plan. We anticipate making voluntary cash contributions of approximately \$100 million to our domestic and international pension plans in 2007.

ENVIRONMENT

We have been named by the Environmental Protection Agency under the Superfund Act, or by state governments under similar state laws, as a potentially responsible party for 18 active hazardous waste sites. Under the Superfund Act, all parties who may have contributed any waste to a hazardous waste site, identified by such Agency, are jointly and severally liable for the cost of cleanup unless the Agency agrees otherwise. It is our policy to accrue for the estimated liability related to Superfund sites and other environmental liabilities related to property owned and operated by us based on expert analysis and continual monitoring by both internal and external consultants. At December 31, 2006 and 2005, we had accrued approximately \$16 million (undiscounted) and \$13 million (undiscounted), respectively, for the estimated liability for environmental cleanup and related litigation. Based upon the information developed to date, we believe that the accrued amount is a reasonable estimate of our liability and that the risk of an additional loss in an amount materially higher than that accrued is remote.

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements requires us to make estimates and assumptions that affect amounts reported therein. The estimates, including future projections of performance and relevant discount rates, that required us to make difficult, subjective or complex judgments follow.

Impairment of goodwill

SFAS 142 requires us to make certain difficult, subjective, and complex judgments on a number of matters, including assumptions and estimates used to determine the fair value of our reporting units.

Our annual goodwill recoverability assessment is completed in the fourth quarter, as it is traditionally based on our annual strategic planning process that runs from June to October. This process includes reviewing expectations for the long-term growth of our businesses and forecasting future cash flows. We measure fair value on the basis of discounted expected future cash flows. Our estimates are based upon our historical experience, our current knowledge from our commercial relationships, and available external information about future trends.

Telecommunications

Results for the Telecommunications segment in 2006 were moderate, as pricing in the telecommunications industry continues to decline. We expect the worldwide telecommunications industry market to remain stable, fiber volumes to increase modestly, and pricing pressures to continue.

The results of our impairment tests in 2006 indicated that the fair value of the reporting unit exceeded its book value. A discount rate of 13% was used in both 2005 to 2006. Our conclusion would not have changed had we used a discount rate of 12.5% or 13.5%.

Specialty Materials

The results of our impairment tests in 2006 indicated that the fair value of the reporting unit exceeded its book value. A discount rate of 12% was used in 2006 and 13% was used in 2005. We determined a range of discount rates between 11.5% and 13.5% would not have affected our conclusion.

Impairment of assets held for use

SFAS 144 requires us to assess the recoverability of the carrying value of long-lived assets when an event of impairment has occurred. We must exercise judgment in assessing whether an event of impairment has occurred. For purposes of recognition and measurement of an impairment loss, a long-lived asset or assets is grouped with

other assets and liabilities at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. We must exercise judgment in assessing the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. In certain circumstances, we concluded that locations or businesses which share production along the supply chain must be combined in order to appropriately identify cash flows that are largely independent of the cash flows of other assets and liabilities.

Once it has been determined that an impairment has occurred, an impairment assessment requires the exercise of judgment in assessing the future use of and projected value to be derived from the impaired assets to be held and used. This may require judgment in estimating future cash flows and relevant discount rates and terminal values in estimating the current fair value of the impaired assets to be held and used.

Restructuring charges and impairments resulting from restructuring actions

SFAS No. 146, "Accounting for Costs Associated with Exit or Disposal Activities," requires us to assess whether and when a restructuring event has occurred and in which periods charges related to such events should be recognized. We must estimate costs of plans to restructure including, for example, employee termination costs. Restructuring charges require us to exercise judgment about the expected future of our businesses, of portions thereof, their profitability, cash flows and in certain instances eventual outcome. The judgment involved can be difficult, subjective and complex in a number of areas including assumptions and estimates used in estimating the future profitability and cash flows of our businesses.

43

Restructuring events often give rise to decisions to dispose of or abandon certain assets or asset groups which, as a result, require impairment in accordance with SFAS 144. SFAS 144 requires us to carry assets to be sold or abandoned at the lower of cost or fair value. We must exercise judgment in assessing the fair value of the assets to be sold or abandoned.

During 2004, we recorded write-downs of property, plant and equipment as a result of decisions to exit facilities, primarily in the Telecommunications segment. Assets impaired were primarily equipment, construction in progress and buildings, which were sold or abandoned. We used information available from recent auctions of telecommunications equipment to estimate salvage value when measuring impairment. The estimated salvage values were very low, primarily due to the depressed market for telecommunications related equipment. The salvage values of property impaired were also estimated to be minimal as certain facilities will be abandoned and not sold. It is possible that actual results will differ from assumptions and require adjustments to reserves.

Valuation allowances for deferred income taxes

SFAS 109, "Accounting for Income Taxes" requires us to exercise judgment about our future results in assessing the realizability of our deferred tax assets. Inherent in this estimation process is the requirement for us to estimate future book taxable income and possible tax planning strategies. These estimates require us to exercise judgment about our future results and the prudence and feasibility of possible tax planning strategies. It is possible that actual results will differ from assumptions and require adjustments to allowances. If we sustain an appropriate level of profitability, primarily in the U.S. and Germany, or if we are able to develop tax planning strategies, adjustments to current allowances will be required and may affect future net income. Refer to Note 7 (Income Taxes) to the consolidated financial statements.

Probability of litigation outcomes

SFAS No. 5, "Accounting for Contingencies," (SFAS 5) requires us to make judgments about future events that are inherently uncertain. In making determinations of likely outcomes of litigation matters, we consider the evaluation of legal counsel knowledgeable about each matter, case law, and other case-specific issues. See Legal Proceedings for a discussion of the material litigation matters we face. The most significant matter involving judgment is the PCC asbestos liability. There are a number of factors bearing upon our potential liability, including the inherent complexity of a Chapter 11 filing, our history of success in defending asbestos claims, our assessment of the strength of our corporate veil defenses, our continuing dialogue with our insurance carriers and the claimants' representatives. We have reached a tentative plan of settlement on PCC as disclosed in Legal Proceedings and Note 8 (Investments) to the Consolidated Financial Statements. The settlement is subject to a number of contingencies, including approval by the bankruptcy court and resolution of any appeals. On

December 21, 2006, the bankruptcy court denied confirmation of the PCC Plan of Reorganization due to the scope of the channeling injunction proposed of the two shareholders with respect to other asbestos claims not deriving directly from PCC's products or operations. Several parties, including Corning, have moved for reconsideration of the ruling. We continue to exercise judgment in assessing the likelihood that reconsideration will lead to a revised ruling, or that an alternative plan of reorganization will emerge to address the claim deriving from PCC. It is possible that actual results will differ from assumptions and require adjustments to accruals.

Other possible liabilities

SFAS 5 and other similarly focused accounting literature require us to make judgments about future events that are inherently uncertain. In making determinations of likely outcomes of certain matters, including certain tax planning matters and environmental matters, these judgments require us to consider events and actions that are outside our control in determining whether probable or possible liabilities require accrual or disclosure. It is possible that actual results will differ from assumptions and require adjustments to accruals.

44

Pension and other postretirement employee benefits (OPEB)

Pension and OPEB costs and obligations are dependent on assumptions used in calculating such amounts. These assumptions include discount rates, health care cost trend rates, benefits earned, interest cost, expected return on plan assets, mortality rates, and other factors. In accordance with GAAP, actual results that differ from the assumptions are accumulated and amortized over future periods and, therefore, generally affect recognized expense and the recorded obligation in future periods. While management believes that the assumptions used are appropriate, differences in actual experience or changes in assumptions may affect Corning's pension and other postretirement obligations and future expense.

As of December 31, 2006, the Projected Benefit Obligation (PBO) for U.S. pension plans was \$2,237 million.

The following information illustrates the sensitivity to a change in certain assumptions for U.S. pension plans:

Change in Assumption	Effect on 2007 Pre-Tax Pension Expense	Effect on December 31, 2006 PBO
25 basis point decrease in discount rate	+\$5.4 million	+\$63 million
25 basis point increase in discount rate	-\$6.0 million	-\$62 million
25 basis point decrease in expected return on assets	+\$5.1 million	
25 basis point increase in expected return on assets	-\$5.1 million	

The above sensitivities reflect the impact of changing one assumption at a time. Note that economic factors and conditions often affect multiple assumptions simultaneously and the effects of changes in key assumptions are not necessarily linear. These changes in assumptions would have no effect on Corning's funding requirements.

In addition, at December 31, 2006, a 25 basis point decrease in the discount rate would decrease stockholders' equity by \$85 million before tax, a 25 basis point increase in the discount rate would increase stockholders' equity by \$84 million. In addition, the impact of greater than a 25 basis point decrease in discount rate would not be proportional to the first 25 basis point decrease in the discount rate.

The following table illustrates the sensitivity to a change in the discount rate assumption related to Corning's U.S. OPEB plans:

Change in Assumption	Effect on 2007 Pre-Tax OPEB Expense	Effect on December 31, 2006 APBO
25 basis point decrease in discount rate	+\$1 million	+\$22 million

25 basis point increase in discount rate

-\$1 million

-\$22 million

The above sensitivities reflect the impact of changing one assumption at a time. Note that economic factors and conditions often affect multiple assumptions simultaneously and the effects of changes in key assumptions are not necessarily linear.

Revenue Recognition

In certain instances, revenue recognition is based on estimates of fair value of deliverables as well as estimates of product returns, allowances, discounts, and other factors. These estimates are supported by historical data. While management believes that the estimates used are appropriate, differences in actual experience or changes in estimates may affect Corning's future results.

45

Stock Compensation

Stock based compensation expense and disclosures are dependent on assumptions used in calculating such amounts. These assumptions include risk-free discount rates, expected term of the stock based compensation instrument granted, volatility of stock and option prices, expected time between grant date and date of exercise, attrition, performance, and other factors. These assumptions require us to exercise judgment. Our estimates of these assumptions typically are based upon our historical experience and currently available market place data. While management believes that the assumptions used are appropriate, differences in actual experience or changes in assumptions may affect Corning's future stock based compensation expense and disclosures.

NEW ACCOUNTING STANDARDS

Refer to Note 1 (Summary of Significant Accounting Policies) to the consolidated financials statements.

FORWARD-LOOKING STATEMENTS

The statements in this Annual Report on Form 10-K, in reports subsequently filed by Corning with the Securities and Exchange Commission (SEC) on Forms 10-Q, Forms 8-K, and related comments by management which are not historical facts or information and contain words such as "believes," "expects," "anticipates," "estimates," "forecasts" and similar expressions are forward-looking statements. These forward-looking statements involve risks and uncertainties that may cause the actual outcome to be materially different. Such risks and uncertainties include, but are not limited to:

- global economic and political conditions;
- tariffs, import duties and currency fluctuations;
- product demand and industry capacity;
- competitive products and pricing;
- availability and costs of critical components and materials;
- new product development and commercialization;
- order activity and demand from major customers;
- fluctuations in capital spending by customers;
- possible disruption in commercial activities due to terrorist activity, armed conflict, political instability or major health concerns;
- facility expansions and new plant start-up costs;
- effect of regulatory and legal developments;
- ability to pace capital spending to anticipated levels of customer demand, which may fluctuate;
- credit rating and ability to obtain financing and capital on commercially reasonable terms;
- adequacy and availability of insurance;
- financial risk management;
- acquisition and divestiture activities;

- rate of technology change;
- level of excess or obsolete inventory;
- ability to enforce patents;
- adverse litigation;
- product and components performance issues;
- stock price fluctuations;
- customer acceptance of LCD televisions;
- a downturn in demand or decline in growth rates for LCD glass substrates;
- customer ability, most notably in the Display Technologies segment, to maintain profitable operations and obtain financing to fund their manufacturing expansions;
- fluctuations in supply chain inventory levels;
- equity company activities, principally at Dow Corning Corporation, Samsung Corning Precision, and Samsung Corning;
- movements in foreign exchange rates, primarily the Japanese yen, Euro, and Korean won; and
- other risks detailed in Corning's SEC filings.

Item 7A. Quantitative and Qualitative Disclosures About Market Risks

We operate and conduct business in many foreign countries and as a result are exposed to movements in foreign currency exchange rates. Our exposure to exchange rates have the following effects:

- exchange rate movements on financial instruments and transactions denominated in foreign currencies which impact earnings, and
- exchange rate movements upon conversion of net assets and net income of foreign subsidiaries for which the functional currency is not the U.S. dollar, which impact our net equity.

Our most significant foreign currency exposure is the Japanese yen and to a much lesser extent the Korean won, the Taiwan dollar, and the Euro. We selectively enter into foreign exchange forward and option contracts with durations generally 15 months or less to hedge our exposure to exchange rate risk on foreign source income and purchases. These hedges are scheduled to mature coincident with the timing of the underlying foreign currency commitments and transactions. The objective of these contracts is to neutralize the impact of exchange rate movements on our operating results. We also enter into foreign exchange forward contracts when situations arise where our foreign subsidiaries or Corning enter into lending situations, generally on an intercompany basis, denominated in currencies other than their local currency. We do not hold or issue derivative financial instruments for trading purposes. Corning uses derivative instruments (forwards) to limit the exposure to foreign currency fluctuations associated with certain monetary assets and liabilities. These derivative instruments are not designated as hedging instruments for accounting purposes and, as such, are referred to as undesignated hedges. Changes in the fair value of undesignated hedges, along with foreign currency gains and losses arising from the underlying monetary assets or liabilities, are recorded in current period earnings in the other income, net component in the consolidated statement of operations.

Equity in earnings of affiliated companies has historically contributed a significant amount to our income from continuing operations. Equity in earnings of affiliated companies, net of impairments was \$960 million in 2006 and \$611 million in 2005 with foreign-based affiliates comprising over 65% of this amount in 2006. Equity earnings from Samsung Corning and Samsung Corning Precision totaled \$555 million for 2006 and \$296 million for 2005. Exchange rate fluctuations and actions taken by management of these entities can affect the earnings of these companies.

We use a sensitivity analysis to assess the market risk associated with our foreign currency exchange risk. Market risk is defined as the potential change in fair value of assets and liabilities resulting from an adverse movement in foreign currency exchange rates. At December 31, 2006, we had open forward contracts, open option contracts, and foreign denominated debt with values exposed to exchange rate movements, all of which were designated as hedges at December 31, 2006. A 10% adverse movement in quoted foreign currency exchange rates could result in a loss in fair value of these instruments of \$113 million. Specific to the Japanese

yen, a 10% adverse movement in quoted yen exchange rates could result in a loss in fair value of these instruments of \$39 million.

As we derive approximately 70% of our net sales from outside the U.S., our sales and net income could be affected if the U.S. dollar significantly strengthens or weakens against foreign currencies, most notably the Japanese yen and Euro. Our outlooks included in Management's Discussion and Analysis assume exchange rates during 2007 remain constant at January 2007 levels. A plus or minus 10 point movement in the U.S. dollar - Japanese yen exchange rate would result in a change to 2006 net sales of approximately \$200 million and net income of approximately \$140 million. A plus or minus 10 point movement in the U.S. dollar - Euro exchange rate would result in a change to 2006 net sales of approximately \$60 million but would have a negligible effect on net income.

Interest Rate Risk Management

It is our policy to conservatively manage our exposure to changes in interest rates. Our policy prescribes that total variable rate debt will not exceed 35% of the total debt portfolio at anytime. At December 31, 2006, our consolidated debt portfolio contained less than 1% of variable rate instruments.

47

Item 8. Financial Statements and Supplementary Data

See Item 15 (a) 1.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

Our principal executive and principal financial officers, after evaluating the effectiveness of our disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) or 15d-15(e)) as of the end of the period covered by this report, have concluded that based on the evaluation of these controls and procedures required by paragraph (b) of Exchange Act Rules 13a-15 or 15d-15, that our disclosure controls and procedures were effective.

Internal Control Over Financial Reporting

(a) Management's Annual Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate disclosure controls and procedures and adequate internal control over financial reporting for Corning. Management is also responsible for the assessment of the effectiveness of disclosure controls and procedures and the effectiveness of internal control over financial reporting.

Disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Act is recorded, processed, summarized, and reported, within the time periods specified in the SEC's rules and forms. Corning's disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by Corning in the reports that it files or submits under the Exchange Act is accumulated and communicated to Corning's management, including Corning's principal executive and principal financial officers, or other persons performing similar

functions, as appropriate to allow timely decisions regarding required disclosure.

Corning's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Corning's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of Corning's assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that Corning's receipts and expenditures are being made only in accordance with authorizations of Corning's management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of Corning's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Management conducted an evaluation of the effectiveness of the system of internal control over financial reporting based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that Corning's internal control over financial reporting was effective as of December 31, 2006. Management's assessment of the effectiveness of Corning's internal control over financial reporting has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included herein.

48

(b) Attestation Report of the Independent Registered Public Accounting Firm

Refer to Part IV, Item 15.

(c) Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors and Executive Officers of the Registrant

Directors of the Registrant

The section entitled "Nominees for Election as Directors" in our Definitive Proxy Statement relating to our annual meeting of shareholders to be held on April 26, 2007, is incorporated by reference in this Annual Report on Form 10-K. Information regarding executive officers is presented in Item I of this report on Form 10-K under the caption "Executive Officers of the Registrant."

Audit Committee and Audit Committee Financial Expert

Corning has an Audit Committee and has identified at least one member of the Audit Committee as the Audit Committee Financial Expert. See sections entitled "Meetings and Committees of the Board" and "Corporate Governance Matters" in our definitive Proxy Statement relating to our annual meeting of shareholders to be held on April 26, 2007, which are incorporated by reference in this Annual Report on Form 10-K.

Compliance with Section 16(a) of the Exchange Act

The section entitled "Section 16(a) Beneficial Ownership Reporting Compliance" in our Definitive Proxy Statement relating to our annual meeting of shareholders to be held on April 26, 2007, is incorporated by reference in this Annual Report on Form 10-K.

Code of Ethics

Our Board of Directors adopted the Code of Ethics for the Chief Executive Officer and Financial Executives and the Code of Conduct for Directors and Executive Officers which supplements the Code of Conduct governing all employees and directors that has been in existence for more than ten years. During 2006, no amendments to or waivers of the provisions of the Code of Ethics were made with respect to any of our directors or executive officers. A copy of the Code of Ethics is available on our website at www.corning.com/inside_corning/corporate_governance/downloads.aspx. We will also provide a copy of the Code of Ethics to shareholders without charge upon written request to Ms. Denise A. Hauselt, Secretary and Assistant General Counsel, Corning Incorporated, HQ-E2-10, Corning, NY 14831. We will disclose future amendments to, or waivers from, the Code of Ethics on our website within four business days following the date of such amendment or waiver.

49

Item 11. Executive Compensation

The sections entitled "Executive Compensation," "Compensation Discussion and Analysis," "Compensation Committee Report," and "Directors Compensation" in our definitive Proxy Statement relating to the annual meeting of shareholders to be held on April 26, 2007, are incorporated by reference in this Annual Report on Form 10-K.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The section entitled "Security Ownership of Certain Beneficial Owners" in our definitive Proxy Statement relating to the annual meeting of shareholders to be held on April 26, 2007, are incorporated by reference in this Annual Report on Form 10-K. The information required by this item related to the Company's securities authorized for issuance under equity compensation plans as of December 31, 2006 is included in Part I, "Item 5. Market for Registrant's Common Equity Related Stockholder Matters and Issuer Purchases of Equity Securities" of this Report on Form 10-K.

Item 13. Certain Relationships and Related Transactions

The section entitled "Other Matters - Certain Business Relationships," "Other Matters" "Related Party Policy and Procedures," and "Corporate Governance Matters" in our definitive Proxy Statement relating to the annual meeting of shareholders to be held on April 26, 2007, is incorporated by reference in this Annual Report on Form 10-K.

Item 14. Principal Accounting Fees and Services

The sections entitled "Independent Auditors" Fees Paid to Independent Auditors" and "Independent Auditors" Policy Regarding Audit Committee Pre-Approval of Audit and Permitted Non-Audit Services of Independent Auditors" in our definitive Proxy Statement relating to the annual meeting of shareholders to be held on April 26, 2007, is incorporated by reference in this Annual Report on Form 10-K.

In January 2006, our independent registered public accounting firm, PricewaterhouseCoopers LLP ("PwC"), notified the Audit Committee of Corning's Board of Directors (the "Audit Committee") that certain non-audit work performed by its network firms in Europe and China raised questions regarding PwC's independence with respect to its role as Corning's independent auditor.

Based upon PwC's disclosure, Corning evaluated PwC's non-audit services provided to Corning during the relevant time periods and did not identify any additional non-audit services that may have compromised PwC's independence for purposes herein. Corning and PwC continue to evaluate and review processes relevant to the maintenance of PwC's independence.

At that time, PwC concluded that its objectivity and impartiality were unaffected by those services and therefore its independence had not been impaired. This conclusion was based upon the nature of services and the fact that none of its personnel who were involved in providing the tax services or remitting amounts on Corning's behalf performed any audit or audit-related services for Corning. The Audit Committee discussed with PwC its independence from Corning and concurred with PwC's assessment.

In January 2007, PwC issued its annual Independence Standards Board Standard No. 1 independence letter to the Audit Committee of our Board of Directors and therein reported that it is independent under applicable standards in connection with its audit opinion for the financial statements contained in this report. The Audit Committee has discussed with PwC its independence from Corning and concurred with PwC.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Corning Incorporated:

We have completed integrated audits of Corning Incorporated's 2006, 2005 and 2004 consolidated financial statements and of its internal control over financial reporting as of December 31, 2006 in accordance with the standards of the Public Company Accounting Oversight Board (United States). Our opinions, based on our audits, are presented below.

Consolidated financial statements and financial statement schedule

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Corning Incorporated and its subsidiaries at December 31, 2006 and 2005, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2006 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Notes 1, 13, and 18 to the consolidated financial statements the Company changed the manner in which it accounts for share-based compensation and employee benefit plans in 2006.

Internal control over financial reporting

Also, in our opinion, management's assessment, included in "Management's Annual Report on Internal Control Over Financial Reporting" appearing under Item 9A, that the Company maintained effective internal control over financial reporting as of December 31, 2006 based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), is fairly stated, in all material respects, based on those criteria. Furthermore, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control - Integrated Framework* issued by the COSO. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express opinions on management's assessment and on the effectiveness of the Company's internal control over financial reporting based on our audit. We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we consider necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

57

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The accompanying notes are an integral part of these consolidated financial statements.

Notes to Consolidated Financial Statements

Corning Incorporated and Subsidiary Companies

1. Summary of Significant Accounting Policies

Organization

Corning Incorporated is a provider of high-performance glass for computer monitors, LCD televisions, and other information display applications; optical fiber and cable and hardware and equipment products for the telecommunications industry; ceramic substrates for gasoline and diesel engines in automotive and heavy duty vehicle markets; laboratory products for the scientific community and specialized polymer products for biotechnology applications; advanced optical materials for the semiconductor industry and the scientific community; and other technologies. In these notes, the terms "Corning," "Company," "we," "us," or "our" mean Corning Incorporated and subsidiary companies.

Basis of Presentation and Principles of Consolidation

Our consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) and include the assets, liabilities, revenues and expenses of all majority-owned subsidiaries over which Corning exercises control and, when applicable, entities for which Corning has a controlling financial interest.

For variable interest entities, we assess the terms of our interest in the entity to determine if we are the primary beneficiary as prescribed by FIN 46R, *Consolidation of Variable Interest Entities, an Interpretation of Accounting Research Bulletin No. 51, Revised* (FIN 46R). The primary beneficiary of a variable interest entity is the party that absorbs a majority of the entity's expected losses, receives a majority of its expected residual returns, or both, as a result of holding variable interests. Variable interests are the ownership, contractual, or other pecuniary interests in an entity that change with changes in the fair value of the entity's net assets excluding

variable interests. We consolidate one variable interest entity in which we are the primary beneficiary.

The equity method of accounting is used for investments in affiliated companies which are not controlled by Corning and in which our interest is generally between 20% and 50% and we have significant influence over the entity. Our share of earnings or losses of affiliated companies, in which at least 20% of the voting securities is owned and we have significant influence but not control over the entity, is included in consolidated operating results.

We use the cost method to account for our investments in companies that we do not control and for which we do not have the ability to exercise significant influence over operating and financial policies. In accordance with the cost method, these investments are recorded at cost or fair value, as appropriate.

All material intercompany accounts, transactions and profits are eliminated in consolidation.

Certain prior year amounts have been reclassified to conform to the current-year presentation. These reclassifications had no impact on our results of operations or changes in shareholders' equity.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect amounts reported in the consolidated financial statements and related notes. Significant estimates and assumptions in these consolidated financial statements include restructuring and other charges and credits, allowances for doubtful accounts receivable, estimates of fair value associated with goodwill and long-lived asset impairment tests, estimates of the fair value of assets held for disposal, estimates of fair value of investments, environmental and legal liabilities, warranty liabilities, income taxes and deferred tax valuation allowances, the determination of discount and other rate assumptions for pension and other postretirement employee benefit expenses and the determination of the fair value of stock based compensation involving assumptions about termination rates, stock volatility, discount rates, and expected time to exercise. Due to the inherent uncertainty involved in making estimates, actual results reported in future periods may be different from these estimates.

1. Summary of Significant Accounting Policies (continued)

Revenue Recognition

Revenue for sales of goods is recognized when a firm sales agreement is in place, delivery has occurred and sales price is fixed and determinable and collectibility is reasonably assured. If customer acceptance of products is not reasonably assured, sales are recorded only upon formal customer acceptance. Sales of goods typically do not include multiple product and/or service elements.

At the time revenue is recognized, allowances are recorded, with the related reduction to revenue, for estimated product returns, allowances and price discounts based upon historical experience and related terms of customer arrangements. Where we have offered product warranties, we also establish liabilities for estimated warranty costs based upon historical experience and specific warranty provisions. Warranty liabilities are adjusted when experience indicates the expected outcome will differ from initial estimates of the liability.

Royalty income from the licensing of technology is reported as other non-operating income and is recognized as it is earned.

Research and Development Costs

Research and development costs are charged to expense as incurred. Research and development costs totaled \$409 million in 2006, \$348 million in 2005, and \$289 million in 2004.

Foreign Currency Translation and Transactions

The determination of the functional currency for Corning's foreign subsidiaries is made based on the appropriate economic factors. For most foreign operations, the local currencies are generally considered to be the functional currencies. Prior to 2005, non-U.S. operations which did not use the local currency as the functional currency used the U.S. dollar. Effective January 1, 2005, our Taiwan subsidiary changed its functional currency from the new Taiwan dollar (its local currency) to the Japanese yen due to the increased significance of Japanese yen based transactions of that subsidiary. As a result of this change in functional currency, exchange rate gains and losses are recognized on transactions in currencies other than the Japanese yen and included in income for the period in which the exchange rates changed. The same is true for all transactions denominated in a currency other than a subsidiary's functional currency.

Foreign subsidiary functional currency, balance sheet accounts are translated at current exchange rates, and statement of operations accounts are translated at average exchange rates for the year. Translation gains and losses are recorded as a separate component of accumulated other comprehensive income (loss) in shareholders' equity. The effects of remeasuring non-functional currency assets and liabilities into the functional currency are included in current earnings.

Stock-Based Compensation

Corning implemented the provisions of SFAS 123(R) on January 1, 2006, following the "prospective adoption" transition method and accordingly began expensing share-based payments in the first quarter of 2006. Following the prospective adoption transition method prior periods were not restated.

Corning grants restricted shares and stock options that are subject to specific vesting conditions (for example, three-year graded vesting). For stock options granted prior to January 1, 2006, Corning specified that the employee will continue to vest in the award after retirement without providing any additional services. Corning accounted for this type of arrangement by recognizing compensation cost on a pro forma disclosure basis over the requisite vesting period (the "stated vesting period approach"). For time-based and performance-based restricted shares granted prior to January 1, 2006, Corning specified that the employee will vest in the award after retirement without providing any additional services. Corning accounted for this type of arrangement by recognizing compensation cost over the nominal vesting period and, if the employee retires before the end of the vesting period, recognizing any remaining unrecognized compensation cost at the date of retirement (the "nominal vesting period approach").

1. Summary of Significant Accounting Policies (continued)

SFAS 123(R) specifies that an award is vested when the employee's retention of the award is no longer contingent on providing subsequent service (the "non-substantive vesting period approach"). That would be the case for Corning awards that vest when employees retire and are granted to retirement eligible employees. Effective January 1, 2006, related compensation cost must be recognized immediately for awards granted to retirement eligible employees or over the period from the grant date to the date retirement eligibility is achieved, if that is expected to occur during the nominal vesting period.

We continue to follow the stated and nominal vesting period approaches for any share-based awards granted prior to adopting SFAS 123(R) and will continue to do so for the remaining portion of such unvested outstanding awards after adopting SFAS 123(R). Effective with the adoption of SFAS 123(R), on January 1, 2006, we now apply the non-substantive vesting period approach to new grants that have retirement eligibility provisions.

Refer to Note 18 (Share-based Compensation) to the Consolidated Financial Statements for additional information.

Cash and Cash Equivalents

Cash equivalents consist of highly liquid investments that are readily convertible into cash. We consider securities with contractual maturities of three months or less, when purchased, to be cash equivalents. The carrying amount of these securities approximates fair value because of the short-term maturity of these instruments.

Supplemental disclosure of cash flow information follows (in millions):

	Years ended December 31,		
	2006	2005	2004
Non-cash transactions:			
Retirement of short-term borrowings			\$ 26
Retirement of debt in exchange for stock		\$ 388	\$ 368
Pension contribution in common shares		\$ 199	
Issued credit memoranda for settlement of customer receivables	\$ 126	\$ 29	
Cash paid for interest and income taxes:			
Interest (1)	\$ 106	\$ 126	\$ 129
Income taxes, net of refunds received	\$ 225	\$ 140	\$ 64

(1) Included in this amount is approximately \$37 million, \$27 million, and \$22 million of interest costs that were capitalized as part of property, net in 2006, 2005, and 2004, respectively.

Short-Term Investments

Our short-term investments consist of debt securities classified as available-for-sale, which are stated at estimated fair value. These debt securities include U.S. treasury notes, state and municipal bonds, asset-backed securities, auction rate securities, corporate bonds, commercial paper and certificates of deposit. These investments are on deposit with a major financial institution. Unrealized gains and losses, net of tax, are computed on the first-in first-out basis and are reported as a separate component of accumulated other comprehensive income (loss) in shareholders' equity until realized. Realized gains and losses are recorded in other income (expense), net.

Allowance for Doubtful Accounts

The Company's allowance for doubtful accounts is determined based on a variety of factors that affect the potential collectibility of the related receivables, including length of time receivables are past due, customer credit ratings, financial stability of customers, specific one-time events and past customer history. In addition, in circumstances where the Company is made aware of a specific customer's inability to meet its financial obligations, a specific allowance is established. The majority of accounts are individually evaluated on a regular basis and appropriate reserves are established as deemed appropriate based on the above criteria. The remainder of the reserve is based on management's estimates and takes into consideration historical trends, market conditions and the composition of the Company's customer base.

1. Summary of Significant Accounting Policies (continued)

Environmental Liabilities

The Company accrues for its environmental investigation, remediation, operating, and maintenance costs when it is probable that a liability has been incurred and the amount can be reasonably estimated. For environmental matters, the most likely cost to be incurred is accrued based on an evaluation of currently available facts with respect to each individual site, current laws and regulations and prior remediation experience. For sites with multiple potential responsible parties (PRP's), the Company considers its likely proportionate share of the anticipated remediation costs and the ability of the other parties to fulfill their obligations in establishing a provision for those costs. Where no amount within a range of estimates is more likely to occur than another, the minimum is accrued. When future liabilities are determined to be reimbursable by insurance coverage, an accrual is recorded for the potential liability and a receivable is recorded related to the insurance reimbursement when reimbursement is virtually certain. The uncertain nature inherent in such remediation and the possibility that initial estimates may not reflect the final outcome could result in additional costs.

Inventories

Inventories are stated at the lower of cost (first-in, first-out basis) or market.

Property, Net of Accumulated Depreciation

Land, buildings, and equipment are recorded at cost. Depreciation is based on estimated useful lives of properties using the straight-line method. Except as described in Note 3 (Restructuring, Impairment and Other Charges and (Credits)) related to accelerated depreciation arising from restructuring programs, the estimated useful lives range from 20 to 40 years for buildings and 3 to 20 years for equipment.

Included in the subcategory of equipment are the following types of assets:

Asset type	Range of useful life
Computer hardware and software	3 years
Manufacturing equipment	3 to 15 years
Furniture and fixtures	5 to 7 years
Transportation equipment	20 years

Included in manufacturing equipment are certain components of production equipment that are coated with or constructed of precious metals. These metals have an indefinite useful life because they will be returned to their elemental state and reused or sold.

Goodwill and Other Intangible Assets

Goodwill is the excess of cost of an acquired entity over the amounts assigned to assets acquired and liabilities assumed in a business combination. Goodwill is tested for impairment annually in the fourth quarter, and will be tested for impairment between annual tests if an event occurs or circumstances change that more likely than not would indicate the carrying amount may be impaired. Impairment testing for goodwill is done at a reporting unit level. Reporting units are either one level below the operating segment level or an aggregation of two or more reporting units within the same operating segment if such reporting units share similar economic characteristics. Goodwill relates and is assigned directly to a specific reporting unit. An impairment loss generally would be recognized when the carrying amount of the reporting unit's net assets exceeds the estimated fair value of the reporting unit. The estimated fair value of a reporting unit is determined using a discounted cash flow analysis. Refer to Note 3 (Restructuring, Impairment and Other Charges and (Credits)) and Note 10 (Goodwill and Other Intangible Assets) for additional information.

1. Summary of Significant Accounting Policies (continued)

Other intangible assets include patents, trademarks, and other intangible assets acquired from an independent party. Such intangible assets have a definite life and are amortized on a straight-line basis over estimated useful lives ranging from 5 to 20 years.

Impairment of Long-Lived Assets

We review the recoverability of our long-lived assets, such as plant and equipment and intangible assets, when events or changes in circumstances occur that indicate that the carrying value of the asset or asset group may not be recoverable. The assessment of possible impairment is based on our ability to recover the carrying value of the asset or asset group from the expected future pre-tax cash flows (undiscounted and without interest charges) of the related operations. We assess the recoverability of the carrying value of long-lived assets at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. If these cash flows are less than the carrying value of such asset or asset group, an impairment loss is measured based on the difference between estimated fair value and carrying value. Assets to be disposed are written-down to the greater of their fair value or salvage value. Fair values are based on assumptions concerning the amount and timing of estimated future cash flows and assumed discount rates, reflecting varying degrees of perceived risk.

Treasury Stock

Shares of common stock repurchased by us are recorded at cost as treasury stock and result in a reduction of shareholders' equity in the consolidated balance sheets. From time to time, treasury shares may be reissued as contributions to our employee benefit plans and for the retirement or conversion of certain debt instruments. When shares are reissued, we use an average cost method for determining cost. The difference between the cost of the shares and the reissuance price is added to or deducted from additional paid-in capital.

Income Taxes

The Company accounts for income taxes in accordance with SFAS 109, which establishes financial accounting and reporting standards for the effect of income taxes. The objective of accounting for income taxes is to recognize the amount of taxes payable or refundable for the current year and the deferred tax liabilities and assets for the future tax consequences of events that have been recognized in the entity's financial statements. The Company is subject to income taxes in the United States and in numerous foreign jurisdictions. No provision is made for U.S. income taxes on the undistributed earnings of its wholly owned foreign subsidiaries because substantially all such earnings are indefinitely reinvested in those companies. Provision for the tax consequences of distributions, if any, from consolidated foreign subsidiaries is recorded in the year the distribution is declared. Significant judgment is required in determining the Company's worldwide income tax position as well as its effective tax rate.

The Company has provided for potential liabilities due in various jurisdictions. In the ordinary course of global business, there are many transactions and calculations where the ultimate tax outcome is uncertain. Some of these uncertainties arise as a consequence of cost reimbursement arrangements among related entities. SFAS 109 requires us to exercise judgment about our future results in assessing the realizability of our deferred tax assets. Inherent in this estimation process, especially since we are in a net gross deferred tax asset position, in part due to prior year net operating losses, is the requirement for us to estimate future book taxable income and possible tax planning strategies. Although the Company believes its estimates are reasonable, no assurance can be given that the final tax outcome of these matters will not be different than that which is reflected in the historical income tax provisions and accruals. Such differences could have a material impact on the Company's income tax provision and operating results in the period in which such determination is made.

1. Summary of Significant Accounting Policies (continued)**Fair Value of Financial Instruments**

Management believes that the carrying values of financial instruments, including cash and cash equivalents, short-term investments, accounts receivable, accounts payable, and accrued liabilities approximate fair value as a result of the short-term maturities of these instruments.

Derivative Instruments

We participate in a variety of foreign exchange forward contracts and foreign exchange option contracts entered into in connection with the management of our exposure to fluctuations in foreign exchange and interest rates. These financial exposures are managed in accordance with corporate policies and procedures.

All derivatives are recorded at fair value on the balance sheet. Changes in the fair value of derivatives designated as cash flow hedges and hedges of net investments in foreign operations are recorded in accumulated other comprehensive income (loss). Amounts, related to cash flow hedges are reclassified from accumulated other comprehensive income (loss) when the underlying hedged item impacts earnings. This reclassification is recorded in the same line item of the consolidated statement of operations as where the effects of the hedged item are recorded, typically sales or cost of sales. Changes in the fair value of derivatives designated as fair value hedges are recorded currently in earnings offset to the extent the derivative was effective, by the change in the fair value of the hedged item. Corning currently does not have any fair value hedges. Changes in the fair value of derivatives not designated as hedging instruments are recorded currently in earnings in the other income line of the consolidated statement of operations.

We have issued foreign currency denominated debt that has been designated as a hedge of the net investment in a foreign operation. The effective portion of the changes in fair value of the debt is reflected as a component of other comprehensive income (loss) as part of the foreign currency translation adjustment.

Variable Interest Entities

For variable interest entities, we assess the terms of our interest in each entity to determine if we are the primary beneficiary as prescribed by FIN 46R. The primary beneficiary of a variable interest entity is the party that absorbs a majority of the entity's expected losses, receives a majority of its expected residual returns, or both, as a result of holding variable interests, which are the ownership, contractual, or other pecuniary interests in an entity that change with changes in the fair value of the entity's net assets excluding variable interests.

Corning leases certain transportation equipment from a Trust that qualifies as a variable interest entity under FIN 46R. The sole purpose of this entity is leasing transportation equipment to Corning. Since Corning is the primary beneficiary of this entity, the financial statements of the entity are included in Corning's consolidated financial statements. The entity's assets are primarily comprised of fixed assets which are collateral for the entity's borrowings. These assets, amounting to approximately \$28.7 million and \$29.5 million as of December 31, 2006 and 2005, respectively, are classified as long-term assets in the consolidated balance sheet.

Corning leases certain transportation equipment from two additional Trusts that qualify as variable interest entities under FIN 46R. Corning is not the primary beneficiary of these entities. The sole purpose of the entities is leasing transportation equipment to Corning. Corning has been involved with these entities as lessee since the inception of the Trusts. Lease revenue generated by these Trusts was \$1.6 million, \$1.5 million, and \$1.6 million for the years ended December 31, 2006, 2005 and 2004, respectively. Corning's maximum exposure to loss as a result of its involvement with the Trusts is estimated at approximately \$15.5 million and \$16.6 million at December 31, 2006 and 2005, respectively.

1. Summary of Significant Accounting Policies (continued)

New Accounting Standards

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections" (SFAS 154), which replaces APB Opinion No. 20, "Accounting Changes," (APB 20) and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements." SFAS 154 changes the requirements for the accounting for and reporting of a change in accounting principle. Upon the adoption of SFAS 154 beginning January 1, 2006, Corning has applied the standard's guidance to changes in accounting methods as required. The adoption of SFAS 154 was not material to Corning's consolidated results of operations and financial condition.

In February 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments" an amendment of FASB Statements No. 133 and 140 (SFAS 155). SFAS 155 is effective for all financial instruments acquired or issued after January 1, 2007, and amends SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," and SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities." This Statement resolves issues addressed in Statement 133 Implementation Issue No. D1, "Application of Statement 133 to Beneficial Interests in Securitized Financial Assets." Corning does not expect the adoption of SFAS 155 to have a material impact on its consolidated results of operations and financial condition.

In March 2006, the FASB issued SFAS No. 156, "Accounting for Servicing of Financial Assets" an amendment of FASB Statement No. 140 (SFAS 156). This Statement amends SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," with respect to the accounting for separately recognized servicing assets and servicing liabilities. Corning adopted SFAS No. 156 on January 1, 2006. The impact of adopting SFAS 156 was not material to Corning's consolidated results of operations and financial condition.

In April 2006, the FASB issued FASB Staff Position (FSP) FIN 46R-6, "Determining the Variability to Be Considered in Applying FASB Interpretation No. 46(R)" (FIN 46R-6). This FSP addresses how a reporting enterprise should determine the variability to be considered in applying FIN 46R and is effective on the first day of the first reporting period beginning after June 15, 2006. Corning adopted FIN 46R-6 on the effective date of

July 1, 2006. Our approach to applying FIN 46-R was consistent with guidance in FSP FIN 46R-6. As a result, the adoption of FSP FIN 46R-6 was not material to Corning's consolidated results of operations and financial condition.

In June 2006, the FASB issued Interpretation No.48, "Accounting for Uncertainty in Income Taxes" an interpretation of FASB Statement No. 109 (FIN 48). This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS109. This Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. Corning is required to adopt the provisions of FIN 48 as of January 1, 2007; the cumulative effect of adoption will be recorded as an adjustment to the opening balance of retained earnings for 2007. We currently estimate that the adjustment to the opening balance of retained earnings for 2007 will be less than \$10 million. We estimate compliance with FIN 48 will not have a material impact on our consolidated results of operations or cash flows.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in applying generally accepted accounting principles, and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. Corning is currently evaluating the impact of SFAS 157 on its consolidated results of operations and financial condition.

1. Summary of Significant Accounting Policies (continued)

In September 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - An amendment of FASB Statements No. 87, 88, 106, and 132(R)" (SFAS 158). SFAS 158 requires employers to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in its statement of financial position, to recognize changes in that funded status in the year in which the changes occur through accumulated other comprehensive income of a business entity, and to measure the funded status of a plan as of the date of its year-end statement of financial position. Corning adopted SFAS 158 as required on December 31, 2006, with the exception of the change in measurement date which is effective for fiscal years beginning after December 15, 2008. The impact of adopting SFAS 158 resulted in a reduction to stockholders' equity of \$669 million after tax. Dow Corning's adoption of this standard resulted in a reduction to our investment in Dow Corning and a decrease to stockholders' equity of \$94 million after tax. See Note 13 (Employee Retirement Plans) to the consolidated financial statements for further information on the adoption of SFAS 158.

In September 2006, the FASB issued FSP AUG AIR-1, "Accounting for Planned Major Maintenance Activities" (AUG AIR-1). The FSP prohibits companies from accruing the cost of planned major maintenance in advance of the activities actually occurring. This FSP is effective for fiscal years beginning after December 15, 2006. The adoption of FSP AUG AIR-1 is not expected to have a material impact on Corning's consolidated results of operations and financial condition.

In September 2006, the SEC staff issued Staff Accounting Bulletin No. 108, "Financial Statements - Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements" (SAB 108). The SEC staff is providing guidance on how prior year misstatements should be taken into consideration when quantifying misstatements in current year financial statements for purposes of determining whether the current year's financial statements are materially misstated. SAB 108 is effective for fiscal years ending after November 15, 2006. The adoption of SAB 108 did not impact Corning's consolidated results of operations and financial condition.

2. Discontinued Operation

In the third quarter of 2004, Corning and 3M Company (3M) reached a final settlement agreement for funds held in escrow associated with the 2002 sale of Corning's precision lens business to 3M. As a result, we recognized a \$20 million gain upon receipt of the proceeds in 2004. This gain is included in income from discontinued operation in the 2004 consolidated statement of operations.

3. Restructuring, Impairment and Other Charges and (Credits)**2006 Actions**

Corning recorded net charges of \$54 million in 2006. A summary of the charges and credits follows:

- We recorded a \$44 million asset impairment charge in accordance with FAS 144 for certain assets in our Telecommunications segment.
- We approved a disinvestment plan related to certain manufacturing operations of our Life Sciences segment and Specialty Materials business in the U.K. As a result, we recorded a charge of \$5 million which is comprised of severance and curtailment costs.
- We recorded a \$6 million impairment charge related to certain manufacturing operations of our Life Sciences segment and Specialty Materials business in the U.K.
- We recorded a \$7 million charge for a revision to an existing restructuring plan for a German location in our Telecommunications segment.
- We recorded credits of \$3 million related to previously recorded severance costs; we recorded other credits of \$4 million related to existing restructuring plans; and we recorded credits of \$2 million related to previously impaired assets.

70

3. Restructuring, Impairment and Other Charges and (Credits) (continued)

The following table summarizes the restructuring, impairment, and other charges and (credits) as of and for the year ended December 31, 2006 (in millions):

	Year ended December 31, 2006					Reserve at Dec. 31, 2006
	Reserve at January 1, 2006	Charges/ (credits)	Revisions to existing plans	Net charges/ (reversals)	Cash payments	
Restructuring:						
Employee related costs	\$ 36	\$ 6	\$ 4	\$ 10	\$ (6)	\$ 40
Other charges (credits)	49		(4)	(4)	(9)	36
Total restructuring charges	\$ 85	\$ 6	\$	\$ 6	\$ (15)	\$ 76
Impairment of long-lived assets:						
Assets to be held and used		\$ 50		\$ 50		
Assets to be disposed of by sale or abandonment			\$ (2)	(2)		
Total impairment charges		\$ 50	\$ (2)	\$ 48		
Total restructuring, impairment and other charges and (credits)		\$ 56	\$ (2)	\$ 54		

Cash payments for employee-related costs will be substantially completed by the end of 2007, while payments for exit activities will be substantially completed by the end of 2010.

2005 Actions

Corning recorded net credits of \$38 million in 2005. A summary of the charges and credits follows:

- We recorded a credit of \$84 million for the reversal of the cumulative translation account of O.T.I. S.r.l. (OTI), a wholly-owned foreign subsidiary of Corning, upon OTI's substantial liquidation. The photonics business in Milan, Italy, was the sole operation of OTI, whose results were included in Telecommunications segment. Subsequent to Corning's agreement to sell its photonics business operations to Avanex Corporation (Avanex) in 2003, Corning began liquidating OTI. In October 2005, the assets were substantially liquidated and OTI's cumulative translation account was reversed.
- We recorded a charge of \$30 million which was comprised of severance costs for a restructuring plan in the Telecommunications segment to continue to reduce costs in this segment.
- We recorded net credit adjustments of \$9 million to prior year restructuring plans which included charges of \$8 million related to our Telecommunications segment and credits of \$17 million for businesses in our Unallocated and Other segment.
- We recorded impairment charges of \$25 million in the Telecommunications segment for an other than temporary decline in the fair value of our investment in Avanex below its adjusted cost basis. Our investment in Avanex was accounted for as an available-for-sale security under SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities" (SFAS 115). In the fourth quarter of 2005, we completed the sale of our remaining shares of Avanex.

71

3. Restructuring, Impairment and Other Charges and (Credits) (continued)

The following table summarizes the restructuring, impairment, and other charges and (credits) as of and for the year ended December 31, 2005 (in millions):

	Reserve at January 1, 2006	Year ended December 31, 2005			Cash payments	Reserve at Dec. 31, 2006
		Charges/ (credits)	Revisions to existing plans	Net charges/ (reversals)		
Restructuring:						
Employee related costs	\$ 18	\$ 30	\$ (1)	\$ 29	\$ (11)	\$ 36
Other charges (credits)	77		(14)	(14)	(14)	49
Total restructuring charges	\$ 95	\$ 30	\$ (15)	\$ 15	\$ (25)	\$ 85
Impairment of long-lived assets:						
Impairment of available-for-sale securities		\$ 25		\$ 25		
Assets to be disposed of by sale or abandonment			\$ 6	6		
Total impairment charges		\$ 25	\$ 6	\$ 31		
Reversal of currency translation adjustment		\$ (84)		\$ (84)		
Total restructuring, impairment and other charges and (credits)		\$ (29)	\$ (9)	\$ (38)		

In 2005, net charges (reversals) for restructuring, impairment, and other actions included a credit of \$47 million for the Telecommunications segment and charges of \$9 million for the other segments.

2004 Actions

Corning recorded net charges of \$1,789 million in 2004. A summary of the significant charges and credits follows:

- We recorded a charge of \$1,420 million to impair a significant portion of our Telecommunications segment goodwill balance. Refer to Note 10 (Goodwill and Other Intangible Assets) for additional information on this charge.
- We recorded a \$350 million charge to impair certain fixed assets in accordance with SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" (SFAS 144). This charge primarily relates to our third quarter decision to permanently abandon approximately \$332 million of construction in progress at our optical fiber manufacturing facility in Concord, North Carolina that had been stopped in 2002. As a result of our lowered outlook for the Telecommunications segment, we have permanently abandoned this construction in progress as we no longer believe the demand for optical fiber will warrant the investment necessary to complete this facility.
- We recorded an asset held for use impairment charge of \$24 million to impair certain fixed assets and intangible assets other than goodwill in accordance with SFAS 144. Due to our decision to permanently abandon certain fixed assets and lower long-term outlook for the Telecommunications segment, we determined that an event of impairment, as defined by SFAS 144, had occurred in our Telecommunications segment which required us to test the segment's long-lived assets other than goodwill for impairment. As a result of our impairment evaluation, we recorded an impairment charge to write-down certain assets to their estimated fair values.

3. Restructuring, Impairment and Other Charges and (Credits) (continued)

- We recorded a gain of \$33 million related to proceeds in excess of assumed salvage values for assets of Corning Asahi Video Products Company (CAV) that were previously impaired but later sold to a Henan Anyang CPT Glass Bulb Group, Electronic Glass Co., Ltd. (Henan Anyang), located in China. This represented the substantial completion of the sale of CAV's assets.
- We recorded \$37 million of accelerated depreciation relating to the final shutdown of our semiconductor materials manufacturing facility in Charleston, South Carolina, which we announced in the fourth quarter of 2003.
- We recorded a loss of \$14 million on the sale of our frequency controls business for net cash proceeds of \$80 million. The frequency controls business, which was part of our Telecommunications segment, had annual sales of \$76 million.
- We recorded net credits of \$25 million related to adjustments to prior period restructuring, impairment, and other charges.

The following table summarizes the charges, credits and balances of the restructuring liabilities as of and for the year ended December 31, 2004 (in millions):

	Year ended December 31, 2004					Reserve at Dec. 31, 2004
	Reserve at January 1, 2004	Charges	Revisions to existing plans	Net charges/ (reversals)	Cash payments	
Restructuring:						
Employee related costs	\$ 78				\$ (60)	\$ 18
Exit costs	108	\$ 2	\$ (8)	\$ (6)	(25)	77
Total restructuring charges	\$ 186	\$ 2	\$ (8)	\$ (6)	\$ (85)	\$ 95
Impairment of long-lived assets:						
Goodwill		\$ 1,420		\$ 1,420		
Assets to be disposed of by sale or abandonment		350	\$ (48)	302		
Asset to be held and used		24		24		
Total impairment charges		\$ 1,794	\$ (48)	\$ 1,746		
Other:						
Accelerated depreciation		\$ 37		\$ 37		
Loss on sale of business		14	\$ (2)	12		
Total other charges		\$ 51	\$ (2)	\$ 49		
Total restructuring, impairment and other charges and (credits)		\$ 1,847	\$ (58)	\$ 1,789		

In 2004, net charges (reversals) for restructuring, impairment, and other actions included \$1,798 million for the Telecommunications segment and were a credit of \$9 million for the Other segments.

4. Short-Term Investments

The following is a summary of the fair value of available-for-sale securities (in millions):

	December 31,	
	2006	2005
Bonds, notes and other securities		
U.S. government and agencies	\$ 326	\$ 259
States and municipalities	61	77
Asset-backed securities	591	374
Commercial paper	383	57
Other debt securities	649	325
Total short-term investments	\$ 2,010	\$ 1,092

Gross unrealized gains and losses were insignificant at December 31, 2006 and 2005.

The following table summarizes the contractual maturities of available-for-sale securities at December 31, 2006 (in millions):

Less than one year	\$ 720
Due in 1-5 years	658
Due in 5-10 years	68
Due after 10 years	564
Total	\$ 2,010

Proceeds from sales and maturities of short-term investments totaled \$2.0 billion, \$1.5 billion and \$1.4 billion in 2006, 2005 and 2004, respectively. The gross realized gains and losses related to sales of short-term investments were insignificant in 2006, 2005 and 2004.

5. Significant Customer

On October 1, 2006, AU Optronics Corporation (AUO), a customer of the Display Technologies segment, completed its previously announced merger with Quanta Display Inc. (QDI), another customer of Corning's Display Technologies segment. In addition, through two recently announced transactions, AUO now holds a 49% equity stake in Toppan CFI, a subsidiary of Toppan Printing Co., Ltd., also a customer of the Display Technologies segment.

Corning's combined 2006 sales to AUO, QDI and Toppan represented 13% of the company's consolidated net sales.

6. Inventories

Inventories comprise the following (in millions):

	December 31,	
	2006	2005
Finished goods	\$ 139	\$ 135
Work in process	233	198
Raw materials and accessories	125	124
Supplies and packing materials	142	113
Total inventories	\$ 639	\$ 570

7. Income Taxes

Income (loss) from continuing operations before income taxes follows (in millions):

Edgar Filing: CORNING INC /NY - Form 10-K

	Years ended December 31,		
	2006	2005	2004
U.S. companies	\$ 175	\$ (213)	\$ (1,578)
Non-U.S. companies	786	772	(26)
Income (loss) from continuing operations before income taxes	\$ 961	\$ 559	\$ (1,604)

The current and deferred amounts of the provision (benefit) for income taxes follow (in millions):

	Years ended December 31,		
	2006	2005	2004
Current:			
Federal		\$ (14)	\$ (20)
State and municipal	\$ (8)		(7)
Foreign	164	167	111
Deferred:			
Federal		443	593
State and municipal			227
Foreign	(101)	(18)	180
Provision for income taxes	\$ 55	\$ 578	\$ 1,084

Amounts are reflected in the preceding tables based on the location of the taxing authorities.

Reconciliation of the U.S. statutory income tax rate to our effective tax rate for continuing operations follows:

	Years ended December 31,		
	2006	2005	2004
Statutory U.S. income tax (benefit) rate	35.0%	35.0%	(35.0)%
State income benefit, net of federal benefit	(0.2)	(1.9)	(2.4)
Nondeductible goodwill and other expenses	0.4	0.3	27.0 ⁽⁹⁾
Worthless stock deductions	(1.4)	(272.7) ⁽³⁾	(0.2)
Tax holidays ⁽⁷⁾	(10.1)	(8.9)	(1.2)
Investment & other tax credits ⁽⁸⁾	(3.6)	(12.7)	(0.6)
Rate difference on foreign earnings	6.1	10.2	2.5
Minimum pension obligation		(14.6) ⁽¹⁰⁾	
Currency translation adjustment		(5.2)	
Valuation allowances:			
Provision (release) of prior period valuation allowances	(8.6) ⁽⁶⁾	94.0 ⁽²⁾	57.6 ⁽¹⁾
Tax benefits (expenses) not recorded on losses (income)	(13.4) ⁽⁵⁾	280.0 ⁽³⁾⁽⁴⁾	21.3 ⁽⁴⁾
Other items, net	1.5	(0.1)	(1.4)
Effective income tax rate	5.7%	103.4%	67.6%

Significant items that cause our effective tax rate to vary from the U.S. statutory rate of 35% are as follows:

- In 2004, significant events occurred which required us to increase our valuation allowances against certain U.S. and German deferred tax assets resulting in an increase in our effective tax rate of 57.6%. Refer to Note 3 (Restructuring, Impairment and Other Charges and (Credits)) for additional information on these events and the related charges. At that time, we believed that it was more likely than not that we could realize the remaining net U.S. deferred tax assets of approximately \$525 million through a tax planning strategy involving the sale of our investment in Dow Corning, a non-strategic appreciated asset, if we were faced with expiring net operating loss carryforwards.

7. Income Taxes (continued)

- (2) During 2005, Dow Corning's performance was much stronger than expected and Dow Corning resumed paying a dividend; both of which are expected to continue in the future. Due to this improved performance, we concluded that Dow Corning provides strong financial, geographic and market balance to Corning's portfolio of businesses, the profitability of which has become more concentrated due to the success of the display operating segment. As a result, we considered Dow Corning to be a strategic investment and could no longer assert that a potential tax planning strategy involving the sale of Dow Corning would be prudent, as required by FAS 109. Therefore, we no longer believed, in the fourth quarter of 2005, that it was more likely than not that we would realize the remaining net deferred tax assets. Accordingly, we increased our valuation allowance by \$525 million to fully reserve our net U.S. deferred tax assets in the fourth quarter of 2005, which increased our effective tax rate by 94%.
- (3) During the third quarter of 2005, Corning filed its 2004 consolidated U.S. Federal income tax return, which included a \$3.9 billion worthless stock deduction for the loss on our investment in the photonic technologies business associated with the Pirelli acquisition. This acquisition was completed in December 2000 and was substantially impaired in the second quarter of 2001. Prior to the third quarter of 2005, we did not record a deferred tax asset for this item as the ultimate realization of such deduction was uncertain, and consistent with the requirements of SFAS 5, recognition of an asset prior to the time management determines the realization of the asset is probable is prohibited. On September 2, 2005, Corning and the Commissioner of the IRS entered into a closing agreement under section 7121 of the Internal Revenue Code of 1986 which provides that Corning is entitled to this worthless stock deduction. We recorded a \$1.5 billion deferred tax asset for this item in the third quarter, which was concurrently offset by a valuation allowance of an equal amount due to our inability to record tax benefits for U.S. net operating losses. The net result had no impact of our effective tax rate for 2005.
- (4) We were unable to record tax benefits on net operating losses generated in the U.S. and certain foreign jurisdictions, resulting in an increase in the effective tax rate of 7.3% and 21.3% for 2005 and 2004, respectively.
- (5) As described in, (1) and (2) above, in 2004 and 2005, due to losses in the U.S. in recent years, we recorded valuation allowances against 100 percent of our U.S. deferred tax assets and concluded that our tax provision would include only the net tax expense attributable to certain foreign operations until we achieve an appropriate level of profitability in the U.S. or we are able to develop tax planning strategies that enable us to conclude that it is more likely than not that a portion of our deferred tax assets would be realizable. While we did generate income from continuing operations in the U.S. in 2006, such income was largely offset by tax adjustments not reflected in our continuing operations. In the absence of an appropriate level of overall profitability in the U.S., we did not record tax expense on income from continuing operations in the U.S. in 2006, resulting in a reduction in our effective tax rate of 14.2%.
- (6) In 2006, due to sustained profitability and positive earnings projections in both Australia and at certain of our German operations, we have concluded that it is more likely than not that the underlying tax benefits are realizable

and released valuation allowances, resulting in a reduction in our effective tax rate of 8.7%.

- (7) Certain foreign subsidiaries in China, South Africa and Taiwan are operating under tax holiday arrangements. The nature and extent of such arrangements vary, and the benefits of existing arrangements phase out in future years (2006 to 2010) according to the specific terms and schedules of the relevant taxing jurisdictions. The impact of the tax holidays on our effective rate is a reduction in the rate of 10.1%, 8.9% and 1.2% for 2006, 2005 and 2004, respectively.
- (8) Taiwan grants investment tax credits for investments in qualifying machinery and equipment. The impact of such credits on our effective tax rate is a reduction in the rate of 3.1%, 12.3%, and 0.4% for 2006, 2005, and 2004, respectively.
- (9) The impairment of Telecommunications segment goodwill in 2004 was not deductible for tax purposes, resulting in an increase in the effective tax rate of 26.2%.
- (10) The elimination of our minimum pension liability for the domestic qualified plan in 2005 resulted in a decrease in the effective tax rate of 14.6%.

76

7. Income Taxes (continued)

The tax effects of temporary differences and carryforwards that gave rise to significant portions of the deferred tax assets and liabilities follows (in millions):

	December 31,	
	2006	2005
Loss and tax credit carryforwards	\$ 2,399	\$ 2,723
Capitalized research and development	142	176
Restructuring reserves	215	230
Postretirement medical and life benefits	309	248
Inventory	63	51
Intangible and other assets	64	86
Other accrued liabilities	339	340
Other employee benefits	182	
Other	17	
Gross deferred tax assets	3,730	3,854
Valuation allowance	(3,542)	(3,672)
Deferred tax assets	188	182
Fixed assets	(50)	(80)
Other employee benefits		(67)
Other		(7)
Deferred tax liabilities	(50)	(154)
Net deferred tax assets	\$ 138	\$ 28

The net deferred tax assets are included in (in millions):

	December 31,	
	2006	2005
Current assets	\$ 47	\$ 44
Other assets	114	10
Other current liabilities	(1)	

Other noncurrent liabilities	(22)	(26)
Net deferred tax assets	\$ 138	\$ 28

Details on the tax effects of loss and tax credit carryforwards at December 31, 2006 follow (in millions):

	Amount	Expiration			Indefinite
		2007-2011	2012-2016	2017-2025	
Federal net operating losses	\$ 1,633		\$ 5	\$ 1,628	
State net operating losses	190	\$ 20	16	154	
Capital losses	61	61			
Contributions	9	9			
Foreign net operating losses/credits	324	51		3	\$ 270
Foreign tax credits	70	70			
Research & other credits	30	1	2	27	
Alternative minimum tax credits	41				41
Various state tax credits	41	15	15	11	
Totals as of December 31, 2006	\$ 2,399	\$ 227	\$ 38	\$ 1,823	\$ 311

77

7. Income Taxes (continued)

The tax effects of Federal and state net operating losses above exclude \$134 million in 2006 tax benefits attributable to stock-based compensation. The benefits are not recognized until the related deductions reduce taxes payable; since in our case the tax benefits do not reduce taxes payable due to net operating losses in the current period and/or due to loss carryforwards, the windfall tax benefits are not reflected in our deferred tax asset for losses and tax credit carryforwards as of December 31, 2006.

Changes in the valuation allowance balance follow:

	Years ended December 31,	
	2006	2005
Valuation allowance at beginning of year	\$3,672	\$1,747
Charged (credited) to income tax expense	(211)	2,089
Charged (credited) to equity earnings	(28)	(22)
Charged (credited) to other comprehensive income	258	(91)
Charged (credited) to deferred taxes	(149)	(51)
Valuation allowance at end of year	\$3,542	\$3,672

The change credited to deferred taxes is attributable to translation, write-offs due to entity structure changes and other adjustments.

We do not provide income taxes on the post-1992 earnings of domestic subsidiaries that we expect to recover tax-free without significant cost. Income taxes have been provided for post-1992 unremitted earnings of domestic corporate joint ventures that we do not expect to recover tax-free. Unremitted earnings of domestic subsidiaries and corporate joint ventures that arose in fiscal years beginning on or before December 31, 1992 have been indefinitely reinvested. We currently provide income taxes on the earnings of foreign subsidiaries and affiliated companies to the extent these earnings are currently taxable or expected to be remitted. As of December 31, 2006, taxes have not been provided on approximately \$3.2 billion of accumulated foreign unremitted earnings

which are expected to remain invested indefinitely.

The American Jobs Creation Act of 2004 (the "Act") was signed into law on October 22, 2004. The Act introduced a special one-time (for 2004 or 2005) 85% dividends received deduction for certain repatriated foreign earnings. Our remittance plans did not change as a result of this provision. Our accumulated foreign unremitted earnings are expected to remain invested indefinitely.

The Act also provided for the repeal of the extraterritorial income tax regime (through reduced benefits in 2005 and 2006, with full repeal effective for 2007) and the allowance of a deduction for qualified domestic production activities (phased in over the years 2005 to 2009 and fully effective in 2010). Neither of these changes is expected to have a significant impact on our effective tax rate or U.S. tax liabilities because of our loss position in the U.S. and the resulting valuation allowances against our U.S. deferred tax assets.

We are subject to income tax examinations in various jurisdictions, the most significant of which are the U.S., Germany, Japan and Taiwan. We believe our tax contingency liabilities are adequate for any adjustments which may ultimately result from these examinations. However, since tax laws and regulations are subject to interpretation, the final results of income tax examinations could differ significantly from what we have reflected in our income tax accounts and could have a material effect on our tax provision, net income and/or cash flows in a future period or periods in which such a conclusion is reached. Due to the complexity involved in these matters we are not able to estimate the range of reasonably possible losses in excess of amounts recorded.

As described in Note 1, Corning is required to adopt the provisions of FIN 48 as of January 1, 2007; the cumulative effect of adoption will be recorded as an adjustment to the opening balance of retained earnings for 2007. We currently estimate that the adjustment to the opening balance of retained earnings for 2007 will be less than \$10 million. We estimate compliance with FIN 48 will not have a material impact on our consolidated results of operations or cash flows.

78

8. Investments

Investments comprise the following (in millions):

	Ownership Interest ⁽¹⁾	December 31,	
		2006	2005
Affiliated companies accounted for under the equity method:

8. Investments (continued)

- (1) Equity in earnings shown above and in the consolidated statements of operations are net of amounts recorded for income tax.
- (2) Amounts include the following restructuring and impairment charges:

- In 2006, Dow Corning reached settlement with the IRS regarding liabilities for tax years 1992 to 2003. Equity earnings reflected a \$33 million gain as a result of the settlement which resolved all Federal tax issues related to Dow Corning's implant settlement.
- In 2006, Samsung Corning recorded the following items which increased Corning's equity earnings by \$2 million, net: a gain on the sale of land which increased Corning's equity earnings by \$61 million; an impairment charge for certain long-lived assets which reduced Corning's equity earnings by \$46 million; and the establishment of a valuation allowance for certain deferred tax assets which reduced Corning's equity earnings by \$13 million.
- In 2005, Samsung Corning incurred impairment and other charges as a result of a decline in the projected operating results for its cathode ray tube (CRT) glass business. The charge, which included certain manufacturing assets and severance and exit costs, reduced Corning's equity earnings by \$106 million in the third quarter.
- In 2005, Dow Corning recorded a gain on the issuance of subsidiary stock. Our equity earnings included \$11 million related to this gain.
- In 2004, Corning incurred charges of \$35 million to impair equity method investments in the Telecommunications segment to their estimated fair value.

- In 2004, Dow Corning recorded charges related to restructuring actions and adjustments to interest liabilities recorded on its emergence from bankruptcy. Our equity earnings included \$21 million related to these charges.

We have contractual agreements with several of our equity investees which include sales, purchasing, licensing and technology agreements.

At December 31, 2006, approximately \$2,154 million of equity in undistributed earnings of equity companies was included in our accumulated deficit.

8. Investments (continued)

A discussion and summarized results of Corning's significant investees at December 31, 2006 follows:

Samsung Corning Precision Glass Co., Ltd. (Samsung Corning Precision)

Samsung Corning Precision is a South Korea-based manufacturer of liquid crystal display glass for flat panel displays. Samsung Corning Precision's financial position and results of operations follow (in millions):

	For the years ended December 31,		
	2006	2005	2004
Statement of Operations:			
Net sales	\$ 2,115	\$ 1,660	\$ 1,097
Gross profit	\$ 1,510	\$ 1,234	\$ 820
Net income	\$ 1,128	\$ 848	\$ 561
Corning's equity in earnings of Samsung Corning Precision	\$ 555	\$ 408	\$ 277
Related Party Transactions:			
Corning sales to Samsung Corning Precision	\$ 15		\$ 6
Corning purchases from Samsung Corning Precision	\$ 39	\$ 71	\$ 76
Corning transfer of machinery and equipment to Samsung Corning Precision at cost (1)	\$ 71	\$ 116	\$ 90
Dividends received from Samsung Corning Precision	\$ 210	\$ 156	\$ 71
Royalty income from Samsung Corning Precision	\$ 82	\$ 65	\$ 42
	December 31,		
	2006	2005	
Balance Sheet:			
Current assets	\$ 606	\$ 400	
Noncurrent assets	\$ 2,565	\$ 1,848	
Short-term borrowings, including current portion of long-term debt	\$ 28	\$ 57	
Other current liabilities	\$ 256	\$ 359	
Long-term debt		\$ 28	
Other long-term liabilities	\$ 125	\$ 86	

(1) Corning purchases machinery and equipment on behalf of Samsung Corning Precision to support its capital expansion initiatives. The machinery and equipment are transferred to Samsung Corning Precision at our cost basis, resulting in no revenue or gain being recognized on the transaction. Balances due to and from Samsung Corning Precision were \$2 million and \$19 million at December 31, 2006 and \$41 million and \$18 million at December 31, 2005, respectively.

As of December 31, 2006, Samsung Corning Precision and Samsung Corning Co., Ltd. were two of approximately thirty co-defendants in a lawsuit filed by Seoul Guarantee Insurance Co. and 14 other creditors. Refer to Samsung Corning Co., Ltd. section of this note for additional information.

In February 2006, Corning made a capital contribution to Samsung Corning Precision in the amount of 75 billion Korean won (approximately \$77 million USD).

81

8. Investments (continued)

Samsung Corning Co., Ltd. (Samsung Corning)

Samsung Corning is a South Korea-based manufacturer of glass panels and funnels for cathode ray tube (CRT) television and display monitors.

In the fourth quarter of 2006, Samsung Corning recorded a gain on the sale of land totaling \$122 million, which increased Corning's equity earnings by \$61 million. Samsung Corning also recorded a charge of \$25 million for the establishment of a valuation allowance against certain deferred tax assets. This charge reduced Corning's equity earnings by approximately \$13 million in the fourth quarter. During 2006, Samsung Corning incurred impairment and other charges totaling \$93 million as a result of a decline in the projected operating results for certain display businesses. These charges reduced Corning's equity earnings by \$46 million.

In 2005, Samsung Corning incurred impairment and other charges of \$212 million as a result of decline in the projected operating results of its CRT glass business. The charge, which included certain manufacturing assets and severance and exit costs, reduced Corning's equity earnings by \$106 million.

Samsung Corning's financial position and results of operations follow (in millions):

	For the years ended December 31,		
	2006	2005	2004
Statement of Operations:			
Net sales	\$ 786	\$ 823	\$ 1,019
Gross profit	\$ 68	\$ 87	\$ 245
Net (loss) income		\$ (249)	\$ 94

Royalty income from Samsung Corning	\$ 4	\$ 9	\$ 2

	December 31,		
	2006	2005	
Balance Sheet:			
Current assets	\$ 526	\$ 345	
Noncurrent assets	\$ 247	\$ 391	
Other current liabilities	\$ 139	\$ 154	
Long-term debt	\$ 53	\$ 48	
Other long-term liabilities	\$ 23	\$ 24	

Minority interest	\$	48	\$	45
-------------------	----	-----------	----	----

In 2003, 2005, and 2006, Samsung Corning recorded significant fixed asset and other impairment charges. As the conventional television glass market will be negatively impacted by strong growth in the LCD glass market, it is reasonably possible that Samsung Corning may incur additional restructuring or impairment charges or operating losses in the foreseeable future. Samsung Corning is currently investing in several developing businesses which Samsung Corning management believes will offset the decline in conventional television glass market over time. Should these new businesses not achieve expected results, additional operating losses, asset impairments and restructuring charges are likely to occur and Samsung Corning's long-term financial viability may come into question. These events could result in Corning incurring an impairment of its investment in Samsung Corning. Corning management believes it is more likely than not that an impairment of our investment will occur in the foreseeable future. Corning's investment in Samsung Corning was \$254 million at December 31, 2006.

Corning reviews the recoverability of all long-lived assets, including equity investments, when events or changes in circumstances occur that indicate that the carrying value of the asset or asset group may not be recoverable. As a result of the impairment events described above, Corning considered whether its investment in Samsung Corning had incurred an other-than-temporary impairment in 2006 and concluded that it had not. We will continue to monitor this investment.

82

8. Investments (continued)

Samsung Corning Precision Glass Co., Ltd. (Samsung Corning Precision) and Samsung Corning Co. Ltd. (Samsung Corning) are two of approximately thirty co-defendants in a lawsuit filed by Seoul Guarantee Insurance Co. and 14 other creditors (SGI and Creditors) for alleged breach of an agreement that approximately thirty affiliates of the Samsung group entered into with SGI and Creditors in September 1999. The lawsuit is pending in the courts of Korea. According to the agreement, the Samsung affiliates agreed to sell 3.5 million shares of Samsung Life Insurance Co., Ltd. (SLI) by December 31, 2000, which were transferred to SGI and Creditors in connection with the petition for court receivership of Samsung Motor Inc. In the lawsuit, SGI and Creditors allege that, in the event that the proceeds of sale of the SLI shares is less than 2.45 trillion Korean won (approximately \$2.64 billion), the Samsung affiliates allegedly agreed to compensate SGI and Creditors for the shortfall, by other means, including Samsung affiliates' purchase of equity or subordinated debentures to be issued by SGI and Creditors. Any excess proceeds are to be distributed to the Samsung affiliates. As of March 2005, the shares of Samsung Life Insurance Co., Ltd. had not been sold. The suit asks for damages of approximately \$4.6 billion plus penalty interest. Samsung Corning Precision and Samsung Corning combined guarantees should represent no more than 3.1% of the Samsung affiliates' total financial obligation. Although noting that the outcome of these matters is uncertain, Samsung Corning Precision and Samsung Corning have stated that these matters are not likely to result in a material ultimate loss to their financial statements. No claim in these matters has been asserted against Corning.

Dow Corning Corporation (Dow Corning)

Dow Corning is a U.S. based manufacturer of silicone products. In 1995, Corning fully impaired its investment of Dow Corning upon its entry into bankruptcy proceedings and did not recognize net equity earnings from the second quarter of 1995 through the end of 2002. Corning began recognizing equity earnings in the first quarter of 2003 when management concluded that Dow Corning's emergence from bankruptcy protection was probable. Dow Corning emerged from bankruptcy in 2004. See discussion below for additional information and for a history of this matter. Corning considers the \$249 million difference between the carrying value of its investment in Dow Corning and its 50% share of Dow Corning's equity to be permanent.

Dow Corning's financial position and results of operations follow (in millions):

	For the years ended December 31,		
	2006	2005	2004
Statement of Operations:

83

8. Investments (continued)

In 2006, Dow Corning recorded a gain related to their settlement with the IRS regarding liabilities for tax years 1992 to 2003. This settlement resolves all federal tax issues related to Dow Corning's implant settlement. Corning's equity earnings included \$33 million related to this gain. In 2005, Dow Corning recorded a gain on the issuance of subsidiary stock. Corning's equity earnings included \$11 million related to this gain.

Corning and The Dow Chemical Company (Dow Chemical) each own 50% of the common stock of Dow Corning. In May 1995, Dow Corning filed for bankruptcy protection to address pending and claimed liabilities arising from many thousand breast implant product lawsuits. On June 1, 2004, Dow Corning emerged from Chapter 11 with a Plan of Reorganization (the Plan) which provided for the settlement or other resolution of implant claims. The Plan also includes releases for Corning and Dow Chemical as shareholders in exchange for contributions to the Plan.

Under the terms of the Plan, Dow Corning has established and is funding a Settlement Trust and a Litigation Facility to provide a means for tort claimants to settle or litigate their claims. Inclusive of insurance, Dow Corning has paid approximately \$1.5 billion to the Settlement Trust. As of December 31, 2006, Dow Corning had recorded a reserve for breast implant litigation of \$1.7 billion and anticipates insurance receivables of \$185 million. As a separate matter arising from the bankruptcy proceedings, Dow Corning is defending claims asserted by a collection of commercial creditors who claim additional interest at default rates and enforcement costs, during the period from May 1995 through June 2004. On July 26, 2006, the U.S. Court of Appeals vacated the judgment of the District Court fixing the interest component, ruled that default interest and enforcement costs may be awarded subject to equitable factors to be determined, and directed that the matter be remanded for further proceedings. Dow Corning filed a petition for rehearing by the Court of Appeals, which was denied. It has filed a petition for writ of certiorari with the U.S. Supreme Court, which has not yet been decided. As of December 31, 2006, Dow Corning has estimated the interest payable to commercial creditors to be within the range of \$68 million to \$208 million. As Dow Corning management believes no single amount within the range appears to be a better estimate than any other amount within the range, Dow Corning has recorded the minimum liability within the range. Should Dow Corning not prevail in this matter, Corning's equity earnings would be reduced by its 50% share of the amount in excess of \$68 million, net of applicable tax benefits. There are a number of other claims in the bankruptcy proceedings against Dow Corning awaiting resolution by the U.S. District Court, and it is reasonably possible that Dow Corning may record bankruptcy-related charges in the future. There are no remaining tort claims against Corning, other than those that will be channeled by the Plan into facilities

established by the Plan or otherwise defended by the Litigation Facility.

Pittsburgh Corning Corporation (PCC)

Corning and PPG Industries, Inc. (PPG) each own 50% of the capital stock of Pittsburgh Corning Corporation (PCC). Over a period of more than two decades, PCC and several other defendants have been named in numerous lawsuits involving claims alleging personal injury from exposure to asbestos. On April 16, 2000, PCC filed for Chapter 11 reorganization in the U.S. Bankruptcy Court for the Western District of Pennsylvania. At the time PCC filed for bankruptcy protection, there were approximately 12,400 claims pending against Corning in state court lawsuits alleging various theories of liability based on exposure to PCC's asbestos products and typically requesting monetary damages in excess of \$1 million per claim. Corning has defended those claims on the basis of the separate corporate status of PCC and the absence of any facts supporting claims of direct liability arising from PCC's asbestos products. Corning is also currently named in approximately 10,900 other cases (approximately 42,300 claims) alleging injuries from asbestos and similar amounts of monetary damages per claim. Those cases have been covered by insurance without material impact to Corning to date. Asbestos litigation is inherently difficult, and past trends in resolving these claims may not be indicators of future outcomes.

In the bankruptcy court in April 2000, PCC obtained a preliminary injunction against the prosecution of asbestos actions arising from PCC's products against its two shareholders to afford the parties a period of time in which to negotiate a plan of reorganization for PCC (the PCC Plan). On May 14, 2002, PPG announced that it had agreed with certain of its insurance carriers and representatives of current and future asbestos claimants on the terms of a settlement arrangement applicable to claims arising from PCC's products.

8. Investments (continued)

On March 28, 2003, Corning announced that it had reached agreement with the representatives of asbestos claimants for the settlement of all current and future asbestos claims against it and PCC, which might arise from PCC products or operations. The proposed settlement, if the Plan is approved and becomes effective, will require Corning to relinquish its equity interest in PCC, contribute its equity interest in Pittsburgh Corning Europe N.V. (PCE), a Belgian corporation, and contribute 25 million shares of Corning common stock. Corning also agreed to pay a total of \$140 million in six annual installments (present value \$131 million at March 2003), beginning one year after the Plan becomes effective, with 5.5 percent interest from June 2004, and to assign certain insurance policy proceeds from its primary insurance and a portion of its excess insurance at the time of settlement.

Since March 28, 2003, we have recorded total net charges of \$816 million to reflect the agreed settlement contributions and subsequent adjustments for the change in the fair value of the components.

Two of Corning's primary insurers and several excess insurers have commenced litigation for a declaration of the rights and obligations of the parties under insurance policies, including rights that may be affected by the settlement arrangement described above. Corning is vigorously contesting these cases. Management is unable to predict the outcome of this insurance litigation.

The PCC Plan received a favorable vote from creditors in March 2004. Hearings to consider objections to the Plan were held in the Bankruptcy Court in May 2004. In February 2006, the Bankruptcy Court requested that the Plan proponents delete references to Section 105(a) of the Bankruptcy Code and resubmit the Plan. The final round of oral argument was held on July 21, 2006.

On December 21, 2006, the Bankruptcy Court issued an order denying confirmation of the Plan for reasons it set out in a memorandum opinion. The opinion generally supports the elements of the Plan except for the breadth of the channeling injunction applicable to claims against either of the two shareholders when those claims do not derive from the products or operation of PCC itself. The Court declared a three part test whereby other claims may be channeled if PCC is named as a defendant, a shareholder is named, and conspiracy theories are alleged. Several parties, including Corning, have filed motions for reconsideration, which are scheduled for a hearing before the Bankruptcy Court on March 5, 2007.

If the Bankruptcy Court does not approve the PCC Plan in its current form, changes to the Plan are probable as it is likely that the Court will allow the proponents time to propose amendments. The outcome of these proceedings is uncertain, and confirmation of the current Plan or any amended Plan is subject to a number of contingencies. However, apart from the quarterly mark-to-market adjustment in the value of the components of the settlement, management believes that the likelihood of a material adverse impact to Corning's financial statements is remote.

For the year ended 2006, we recorded asbestos settlement credit of \$2 million, including \$(24) million reflecting the decrease in the value of Corning's common stock from December 31, 2005 to December 31, 2006, and \$22 million to adjust the estimated fair value of the other components of the proposed asbestos settlement. If the book value of the assets to be contributed to the asbestos settlement remains lower than the carrying value of the asbestos settlement liability, a gain would be recognized at the time of the settlement.

For the year ended 2005, we recorded asbestos settlement expense of \$218 million, including \$197 million reflecting the increase in the value of Corning's common stock from December 31, 2004 to December 31, 2005, and \$21 million to adjust the estimated fair value of the other components of the proposed asbestos settlement.

For the year ended 2004, we recorded asbestos settlement expense of \$65 million, including \$33 million reflecting the increase in the value of Corning's common stock from December 31, 2003 to December 31, 2004, and \$32 million to adjust the estimated fair value of the other components of the proposed asbestos settlement.

Since March 28, 2003, we have recorded total net charges of \$816 million to reflect the initial settlement liability and subsequent adjustments for the change in the fair value of the components of the liability.

85

8. Investments (continued)

The fair value of the liability expected to be settled by contribution of our investment in PCE, the fair value of 25 million shares of our common stock, and assigned insurance proceeds (in aggregate totaling \$656 million, \$667 million, and \$456 million at December 31, 2006, 2005, and 2004, respectively) is recorded in other accrued liabilities in our consolidated balance sheets. As the timing of this obligation's settlement will depend on future judicial rulings (i.e., controlled by a third party and not Corning), this portion of the PCC liability is considered a "due on demand" obligation. Accordingly, this portion of the obligation has been classified as a current liability, even though it is possible that the contribution could be made beyond one year. The remaining portion of the settlement liability (totaling \$160 million, \$152 million, and \$144 million at December 31, 2006, 2005, and 2004, respectively), representing the net present value of the cash payments, is recorded in the other liabilities component in our consolidated balance sheets.

9. Property, Net of Accumulated Depreciation

Property, net follows (in millions):

	December 31,	
	2006	2005
Land	\$ 68	\$ 70
Buildings	2,226	1,999
Equipment	6,163	5,177
Construction in progress	823	1,061
	9,280	8,307
Accumulated depreciation	(4,087)	(3,632)
Total	\$ 5,193	\$ 4,675

Approximately \$37 million, \$27 million, and \$22 million of interest costs were capitalized as part of property, net in 2006, 2005, and 2004, respectively.

10. Goodwill and Other Intangible Assets**Goodwill**

There were no changes in the carrying amount of goodwill for the year ended December 31, 2006. Balances by segment are as follows (in millions):

	Telecommunications	Display Technologies	Other⁽¹⁾	Total
Balance at December 31, 2006	\$118	\$9	\$150	\$277

(1) This balance relates to our Specialty Materials operating segment.

Our annual goodwill recoverability assessment is completed in the fourth quarter, as it is traditionally based on our annual strategic planning process that runs from June to October.

2006 Assessment

The results of our impairment tests in 2006 indicated that the fair value of each reporting unit exceeded its book value.

2005 Assessment

The results of our impairment tests in 2005 indicated that the fair value of each reporting unit exceeded its book value.

10. Goodwill and Other Intangible Assets (continued)2004 Assessment

In the third quarter of 2004, we identified certain factors during our annual strategic planning process that caused us to lower our estimates and projections for the long-term revenue growth of the Telecommunications segment, which indicated that it was more likely than not that the fair value of the Telecommunications segment reporting unit was less than its carrying value. As such, we performed an interim impairment test of the Telecommunications segment goodwill in the third quarter of 2004, the results of which were reviewed with Corning's Board of Directors on October 6, 2004.

Although we were experiencing stronger than expected volume in this segment, the improved demand was from a narrow band of customers, and we saw few signs of a broader recovery in overall demand, mix of premium products, and pricing for our products. The lack of industry consolidations, increased competitive pressures in the industry, and revised estimates of future customer demand for the types of products expected to be deployed caused us to change our assessment of the future pace of recovery. The primary estimates and forecasts that caused the change in our outlook and reduced the fair value of the Telecommunications segment from that measured in 2003 were:

- Revised estimates of future pricing for fiber and cable;
- Revised estimates of demand for premium fiber product; and
- Revised estimates for the long-term worldwide market volume growth.

We estimated the fair value of the Telecommunications segment using a discounted cash flow model based on then-current estimates for the long-term growth of the Telecommunications segment, and concluded that the fair value of the Telecommunications segment was below its carrying amount. Accordingly, we recorded an impairment charge of \$1,420 million to reduce the carrying value of goodwill to its implied fair value. The goodwill impairment charge was included in restructuring, impairment, and other charges and (credits) on the consolidated statement of operations. We updated our Telecommunications segment goodwill test in the fourth quarter of 2004. The result of the test concluded that the fair value of the reporting unit exceeded its book value at that time.

We performed a goodwill impairment test for our Specialty Materials reporting unit in the fourth quarter of 2004. The result of this impairment test indicated that the fair value of our reporting unit exceeded its book value.

As discussed in Note 3 (Restructuring, Impairment and Other Charges and (Credits)), in the third quarter of 2004, we completed the sale of our frequency controls business, which was part of the Telecommunications segment. As required by SFAS No. 142, "Goodwill and Other Intangible Assets," we allocated a portion of the Telecommunications segment goodwill balance to the carrying amount of the frequency controls business in determining the loss on disposal. The amount of goodwill included in that carrying amount was based on the relative fair value of the business to be disposed and the portion of the Telecommunications segment to be retained. The amount of goodwill allocated to the carrying value of frequency controls business was \$30 million.

87

10. Goodwill and Other Intangible Assets (continued)

Other Intangible Assets

The carrying amount of other intangible assets follows (in millions):

	December 31,					
	2006			2005		
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
Amortized intangible assets:						
Patents and trademarks	\$ 147	\$ 112	\$ 35	\$ 143	\$ 88	\$ 55
Non-competition agreements	116	116		111	111	
Other	5	1	4	4	1	3
Total amortized intangible assets	268	229	39	258	200	58
Unamortized intangible assets:						
Intangible pension assets ⁽¹⁾				3		3
Total	\$ 268	\$ 229	\$ 39	\$ 261	\$ 200	\$ 61

(1) Intangible pension assets were eliminated under FAS 158 in 2006.

Amortized intangible assets are primarily related to the Telecommunications segment. Amortization expense related to these intangible assets is expected to be approximately \$11 million in 2007 and 2008, \$11 million in 2009, and insignificant thereafter.

11. Other Liabilities

Other accrued liabilities follow (in millions):

	December 31,	
	2006	2005
Current liabilities:		
Wages and employee benefits	\$ 363	\$ 325
Asbestos settlement	656	667
Income taxes	125	165
Customer deposits	213	164
Other current liabilities	311	341
Other accrued liabilities	\$ 1,668	\$ 1,662
Non-current liabilities:		
Asbestos settlement	\$ 160	\$ 152
Customer deposits	420	431
Other non-current liabilities	440	342
Other liabilities	\$ 1,020	\$ 925

Asbestos Settlement

The current liability is expected to be settled by contribution of our investment in PCE, assigned insurance proceeds, and 25 million shares of Corning common stock, if and when the PCC Plan becomes effective. As the timing of the settlement of the obligation under this portion of the PCC liability is outside of Corning's control, this liability is considered a "due on demand" obligation. Accordingly, this portion of the obligation has been classified as a current liability, even though it is possible that the contribution could be made in 2008 or later. The non-current liability represents the net present value of cash payments which will be contributed to the PCC Plan in six installments beginning one year after the PCC Plan is effective. Refer to Note 8 (Investments) for additional information on the asbestos settlement.

88

11. Other Liabilities (continued)**Customer Deposits**

In 2005 and 2004, several of Corning's customers entered into long-term purchase and supply agreements in which Corning's Display Technologies segment will supply large-size glass substrates to these customers over periods of up to six years. As part of the agreements, these customers agreed to make advance cash deposits to Corning for a portion of the contracted glass to be purchased.

Upon receipt of the cash deposits made by customers, we record a customer deposit liability. This liability is reduced at the time of future product sales over the life of the agreements. As product is shipped to a customer, Corning recognizes revenue at the selling price and issues credit memoranda for an agreed amount of the customer deposit liability. The credit memoranda are applied against customer receivables resulting from the sale of product, thus reducing operating cash flows in later periods as these credits are applied for cash deposits received in earlier periods.

Customer deposits have been or will be received in the following periods (in millions):

	2005	2006	Estimated 2007	Total
Gross customer deposits received	\$457	\$171	\$105	\$733

In 2006 and 2005, we issued credit memoranda which totaled \$126 million and \$29 million for the years, respectively. These credits are not included (netted) in the above amounts.

Customer deposit liabilities were \$633 million and \$595 million at December 31, 2006 and 2005, respectively, of which \$213 million and \$164 million, respectively, were recorded in the current portion of other accrued liabilities in our consolidated balance sheets.

In the event customers do not make all customer deposit installment payments or elect not to purchase the agreed upon quantities of product, subject to specific conditions outlined in the agreements, Corning may retain certain amounts of the customer deposits. If Corning does not deliver agreed upon product quantities, subject to specific conditions outlined in the agreements, Corning may be required to return certain amounts of customer deposits.

12. Debt

(In millions):

	December 31,	
	2006	2005
Current portion of long-term debt	\$ 20	\$ 18

Long-term debt			
Notes, 6.3%, due 2009	\$	54	\$ 150

Less current portion of long-term debt		20	18
Long-term debt	\$	1,696	\$ 1,789

89

12. Debt (continued)

At December 31, 2006 and 2005, the weighted-average interest rate on short-term borrowings was 2.4% and 2.2%, respectively.

Based on borrowing rates currently available to us for loans with similar terms and maturities, the fair value of long-term debt was \$1.8 billion at December 31, 2006, and \$1.9 billion at December 31, 2005.

The following table shows debt maturities by year at December 31, 2006 (in millions):

2007	2008	2009	2010	2011	Thereafter
\$20	\$20	\$72	\$297	\$51	\$1,247

In the first quarter of 2005, we completed negotiations with a group of banks on a new revolving credit facility. Concurrent with the closing of this credit facility, we terminated our previous \$2 billion revolving line of credit that was set to expire in August 2005. The facility negotiated in 2005 provided us access to a \$975 million unsecured multi-currency revolving line of credit and was set to expire in March 2010.

In the fourth quarter of 2006, we amended our existing revolving credit facility. The amended facility provides us access to a \$1.1 billion unsecured multi-currency line of credit and expires in 2011. The facility includes two financial covenants, including a leverage test (debt to capital ratio), and an interest coverage ratio (calculated on the most recent four quarters). As of December 31, 2006, we were in compliance with these covenants.

Debt Retirements

During the years ended December 31, 2006, 2005 and 2004, we retired a significant portion of our outstanding notes and debentures as part of a debt reduction program. The debt was retired through a combination of cash repurchases and exchanges for Corning common stock. The following table summarizes the activities related to our debt retirements (in millions):

Book Value of	Cash	Shares
---------------	------	--------

	Debentures Retired	Paid	Issued	Loss
2006 activity:				
Debentures, 8.3%, due 2025 ⁽¹⁾	\$ 129	\$ 129		
Euro Notes, 6.25%, due 2010	119	127		\$ (8)
Debentures, 6.3%, due 2009	96	99		(3)
Other Loans payable	27	27		
Total 2006 activity	\$ 371	\$ 382		\$ (11)
2005 activity:				
Convertible debentures, 3.5%, due 2008	\$ 297	\$ 2	31	
Euro notes, 5.625%, due 2005	189	189		
Oak 4 7/8% Subordinated notes, due 2008	96		6	
Debentures, 7% due 2007	88	100		\$ (12)
Zero coupon convertible debentures, 2%, due 2015	277	277 ⁽²⁾		(4)
Other Loans payable	11	11		
Total 2005 activity	\$ 958	\$ 579	37	\$ (16)
2004 activity:				
Convertible debentures, 3.5%, due 2008	\$ 368	\$ 37	38	\$ (36)
Zero coupon convertible debentures, 2%, due 2015	119	117		
Other Loans payable	115	115		
Total 2004 activity	\$ 602	\$ 269	38	\$ (36)

(1) Book value includes a deferred gain related to an interest rate swap on the 8.3% coupon medium-term notes due April 4, 2025 of \$5 million.

(2) The zero coupon convertible debentures cash payment includes \$23 million of interest.

90

12. Debt (continued)

Issuance of Long-Term Debt

At December 31, 2006, our remaining capacity under the shelf registration statement was approximately \$1.8 billion. In the third quarter of 2006, we issued \$250 million of 7.25% senior unsecured notes for net proceeds of approximately \$246 million. The notes mature on August 15, 2036. We can redeem or repurchase the debentures at any time.

In the second quarter of 2005, we issued \$100 million of 6.05% senior unsecured notes for net proceeds of approximately \$99 million. The notes mature on June 15, 2015. We may redeem the debentures at any time. The \$100 million debt issuance, along with a common stock offering of 20 million shares for net proceeds of approximately \$323 million, were issued under our existing \$5 billion universal shelf registration statement that became effective in March 2001.

In the first quarter of 2004, we issued \$400 million of debentures, of which \$200 million aggregate principal amount of 5.90% notes mature on March 15, 2014, and \$200 million aggregate principal amount of 6.20% notes mature on March 15, 2016. These debentures were issued under our existing \$5 billion universal shelf registration statement, which became effective in March 2001. We realized net proceeds of approximately \$396 million from the issuance of these debentures, which was used to fund debt repurchases, capital expenditures, and cost of operations.

In 2004, Corning entered into a 10-year loan agreement with a Japanese bank to fund certain capital expansion activities in Japan. An initial loan of approximately \$46 million, bearing interest at 2.6%, was received in 2004. A

final loan of approximately \$48 million, bearing interest at 2.1%, was received in January 2005. The loans will amortize equally from July 2006 through maturity.

13. Employee Retirement Plans

Defined Benefit Plans

We have defined benefit pension plans covering certain domestic and international employees. Our funding policy has been to contribute, as necessary, an amount in excess of the minimum requirements in order to achieve the company's long-term funding targets. In 2006, we made an incremental contribution of \$15 million to our domestic and international pension plans. In 2005, we issued and contributed 10 million shares of Corning common stock, with a value of approximately \$199 million, to our domestic defined benefit plan. In 2004, we made a voluntary incremental contribution of \$52 million to our domestic and international pension plans.

We use a December 31 measurement date for our domestic defined benefit plans. The measurement dates for our foreign defined benefit pension plans are September 30.

In 2000, we amended our U.S. pension plan to include a cash balance pension feature. Certain salaried and non-union hourly employees remain in the traditional defined benefit plan. All salaried and non-union hourly employees hired after July 1, 2000, are automatically participants in the new cash balance plan. Under the cash balance plan, employee accounts are credited monthly with a percentage of eligible pay based on age and years of service. Benefits are 100% vested after five years of service. The Pension Protection Act of 2006 requires vesting after three years for cash balance plans by January 1, 2008. Corning will adopt this measure on January 1, 2008.

Corning offers postretirement plans that provide health care and life insurance benefits for retirees and eligible dependents. Certain employees may become eligible for such postretirement benefits upon reaching retirement age. Prior to January 1, 2003, our principal retiree medical plans required retiree contributions each year equal to the excess of medical cost increases over general inflation rates. For current retirees (including surviving spouses) and active employees eligible for the salaried retiree medical program, we have placed a "cap" on the amount we will contribute toward retiree medical coverage in the future. The cap will equal 120% of our 2005 contributions toward retiree medical benefits. Once our contributions toward salaried retiree medical costs reach this cap, impacted retirees will have to pay the excess amount in addition to their regular contributions for coverage.

13. Employee Retirement Plans (continued)

Obligations and Funded Status

The change in benefit obligation and funded status of our employee retirement plans follow (in millions):

December 31,	Pension Benefits		Postretirement Benefits	
	2006	2005	2006	2005
Change in Benefit Obligation				
Benefit obligation at beginning of year	\$ 2,544	\$ 2,365	\$ 874	\$ 874
Service cost	52	46	11	11
Interest cost	141	132	44	44
Plan participants' contributions	2	2	5	5
Amendments	41		(9)	
Curtailment gain	(2)	(1)		
Actuarial (gains) losses	(23)	194	(56)	
Benefits paid	(156)	(155)	(71)	
Less: Medicare subsidy			5	
Foreign currency translation	39	(39)		
Benefit obligation at end of year	2,638	2,544	803	803

Change in Plan Assets

Fair value of plan assets at beginning of year	2,238	1,978
Actual gain on plan assets	236	218
Employer contributions	15	217
Plan participants' contributions	2	2
Benefits paid	(156)	(155)
Foreign currency translation	26	(22)
Fair value of plan assets at end of year	2,361	2,238

Funded Status at End of Year

Fair value of plan assets	2,361	2,238	
Benefit obligations	(2,638)	(2,544)	(803)
Funded status of plans	\$ (277)	\$ (306)	\$ (803)
Unrecognized transition asset		(1)	
Unrecognized prior service cost (credit)		37	
Unrecognized actuarial loss		623	
Recognized asset (liability)	\$ (277)	\$ 353	\$ (803)

Amounts recognized in the consolidated balance sheets consist of:

Noncurrent asset	\$ 50		
Current liability	(9)		(64)
Noncurrent liability	(318)		(739)
Prepaid benefit cost		\$ 456	
Accrued benefit liability		(103)	
Additional minimum liability		(56)	
Intangible asset		3	
Accumulated other comprehensive loss		53	
Recognized asset (liability)	\$ (277)	\$ 353	\$ (803)

Amounts recognized in accumulated other comprehensive income consist of:

Net actuarial loss	\$ 509	\$ 173
Prior service cost (credit)	69	(25)
Transition asset	(1)	
Amount recognized at end of year	\$ 577	\$ 148

13. Employee Retirement Plans (continued)

The accumulated benefit obligation for defined benefit pension plans was \$2.5 billion and \$2.0 billion at December 31, 2006 and 2005, respectively.

The following information is presented for pension plans where the projected benefit obligation as of December 31, 2006 and 2005 exceeded the fair value of plan assets (in millions):

	December 31,	
	2006	2005
Projected benefit obligation	\$ 567	\$ 2,544
Fair value of plan assets	241	2,238

The following information is presented for pension plans where the accumulated benefit obligation as of December 31, 2006 and 2005 exceeded the fair value of plan assets (in millions):

	December 31,	
	2006	2005
Accumulated benefit obligation	\$ 279	\$ 220
Fair value of plan assets	11	7

The components of net periodic benefit expense for our employee retirement plans follow (in millions):

Years ended December 31,	Pension Benefits			Postretirement Benefits		
	2006	2005	2004	2006	2005	2004
Service cost	\$ 52	\$ 46	\$ 42	\$ 11	\$ 10	\$ 8
Interest cost	141	132	132	44	43	46
Expected return on plan assets	(167)	(154)	(147)			
Amortization of net loss	34	29	21	6	9	7
Amortization of prior service cost (credit)	9	7	9	(3)	(4)	(6)
Net periodic benefit expense	69	60	57	58	58	55
Discontinued operation						
Curtailment loss (gain)		1	(1)			
Special termination benefits		1	1			
Total expense	\$ 69	\$ 62	\$ 57	\$ 58	\$ 58	\$ 55

The Company expects to recognize \$22 million of net loss and \$12 million of net prior service cost as a component of net periodic pension cost in 2007 for its defined benefit pension plans. The Company expects to recognize \$8 million of net loss and \$3 million of net prior service credit as a component of net periodic postretirement benefit cost in 2007.

13. Employee Retirement Plans (continued)

Impact of Adoption of SFAS No. 158

Corning adopted SFAS 158 as required on December 31, 2006, with exception of the change in measurement date which is effective for fiscal years beginning after December 15, 2008. The adoption of SFAS 158 had the following impact on the consolidated balance sheets for the year ended December 31, 2006, to record the funded status of the Company's defined benefit pension and other postretirement benefit plans:

	Balance prior to adoption of SFAS No. 158	SFAS No. 158 adoption adjustments	Balance after adoption of SFAS No. 158
Assets			
Deferred income taxes	\$ 37	\$ 10	\$ 47
Goodwill and other intangible assets, net	343	(27)	316
Other assets	570	(448)	122
Liabilities and Shareholders' Equity			
Other accrued liabilities	1,659	9	1,668
Other liabilities	830	190	1,020
Accumulated other comprehensive income-pension, pre-tax ⁽¹⁾	4	(773)	(769)

Accumulated other comprehensive income-pension, after tax ⁽¹⁾	10	(763)	(753)
--	----	-------	-------

(1) Includes the impact of Dow Corning's SFAS No. 158 adoption adjustment of \$94 million. In 2006 and 2005, Corning used a specific bond matching/spot rate yield curve model for estimating the appropriate discount rate for pension and postretirement benefit assumptions. This model develops a hypothetical yield curve and associated spot rate curve to discount the plan's projected benefit payments and match payment durations. Once the present value of projected benefit payments is calculated, the suggested discount rate is equal to the level rate that results in the same present value. The yield curve is based on actual high-quality corporate bonds across the full maturity spectrum. The curve is developed from yields on approximately 550-600 Moody's Aa-graded, non-callable bonds. The highest and lowest 10th percentile yields are excluded from the curve in order to eliminate outliers in the bond population. We believe such method provides a better estimate of the pension and postretirement benefit discount rates.

Prior to 2005, Corning used a benchmark index technique to establish an appropriate discount rate. The Moody's Aa Corporate Bond Index was the starting point for previous years' discount rate assumptions. It was then adjusted upward to restate the rate from a semi-annual coupon basis to an annual discount rate basis. The composite duration of the cash flows for our benefits obligation was comparable to the Moody's Aa benchmark. This method was consistently applied since the adoption of FAS 87 in 1988 and FAS 106 in 1992.

Measurement of postretirement benefit expense is based on assumptions used to value the postretirement benefit obligation at the beginning of the year.

The weighted-average assumptions used to determine benefit obligations at December 31 follow:

	Pension Benefits						Postretirement Benefits		
	Domestic			International			Domestic		
	2006	2005	2004	2006	2005	2004	2006	2005	2004
Discount rate	5.75%	5.50%	5.75%	4.59%	4.52%	5.21%	5.75%	5.50%	5.75%
Rate of compensation increase	5.00%	4.50%	4.50%	3.89%	3.73%	3.58%	5.00%	4.50%	4.50%

94

13. Employee Retirement Plans (continued)

The weighted-average assumptions used to determine net periodic benefit cost for years ended December 31 follow:

	Pension Benefits						Postretirement Benefits		
	Domestic			International			Domestic		
	2006	2005	2004	2006	2005	2004	2006	2005	2004
Discount rate	5.50%	5.75%	6.25%	4.52%	5.27%	5.33%	5.50%	5.75%	6.25%
Expected return on plan assets	8.00%	8.50%	8.50%	6.80%	7.22%	7.41%			
Rate of compensation increase	4.50%	4.50%	4.50%	3.73%	3.42%	3.42%	4.50%	4.50%	4.50%

The expected rate of return on plan assets was determined based on the current interest rate environment and historical market premiums relative to fixed income rates of equity and other asset classes and adjusted for active management of certain portions of the portfolio.

Assumed Health Care Trend Rates at December 31

	2006	2005
Health care cost trend rate assumed for next year	9%	10%
Rate that the cost trend rate gradually declines to	5%	5%
Year that the rate reaches the ultimate trend rate	2011	2010

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects (in millions):

	One-Percentage-Point-Increase	One-Percentage-Point-Decrease
Effect on annual total of service and interest cost	\$ 4.0	\$ 3.0
Effect on postretirement benefit obligation	\$ 40.7	\$ 33.6

Medicare Prescription Drug, Improvement and Modernization Act of 2003

In December 2003, the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) was passed which expands Medicare to include an outpatient prescription drug benefit beginning in 2006. In May 2004, the FASB issued Staff Position (FSP) No. FAS 106-2, "Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003" (FSP No. 106-1), which provides guidance on how companies should account for the impact of the Act on its postretirement health care plans. To encourage employers to retain or provide postretirement drug benefits, beginning in 2006 the federal government will provide non-taxable subsidy payments to employers that sponsor prescription drug benefits to retirees that are "actuarially equivalent" to the Medicare benefit. Corning has determined that its postretirement health care plans' prescription drug benefits are actuarially equivalent to Medicare Part D benefits to be provided under the Act. Effective in the third quarter of 2004, Corning prospectively adopted the accounting guidance of FSP No. 106-2, which reduced our postretirement health care and life insurance plans' accumulated postretirement benefit obligation by \$73 million and the related annual expense by \$10 million. For 2004, our postretirement benefit expense decreased \$5 million reflecting the adoption of this accounting guidance.

95

13. Employee Retirement Plans (continued)

Plan Assets

The weighted-average asset allocation for domestic and international pension plans at December 31, 2006 and December 31, 2005 by asset category were as follows:

	Plan Assets	
	At December 31,	
	2006	2005
Equity Securities	39%	40%
Fixed Income Securities	42%	42%
Real Estate	5%	5%
Other	14%	13%
Total	100%	100%

The total fair value of domestic plan assets at December 31, 2006 was \$2,120 million and the expected long-term rate of return on these assets was 8%.

We have an investment policy for domestic and international pension plans with a primary objective to adequately provide for both the growth and liquidity needed to support all current and future benefit payment obligations. For domestic plans, the investment strategy is to invest in a diversified portfolio of assets which are expected to satisfy the above objective and produce both absolute and risk adjusted returns competitive with a benchmark that for domestic plans is 60% Russell 3000 Index, 20% Lehman Long Government/Credit Index and 20% Lehman Long Credit Index. For international plans, the investment strategy is the same as for domestic plans and the benchmark is a composite of 50% equities and 50% fixed income indexes. The strategy includes the following target asset allocation:

	Domestic	International
Equity Securities	39%	48%
Fixed Income Securities	40%	49%
Real Estate	6%	
Other	15%	3%
Total	100%	100%

A tactical allocation mandate, which is part of the domestic asset investment strategy, allows the actual domestic allocation in equity securities to be reduced by a maximum of 6% relative to the total domestic assets based on market valuations.

Equity securities include Corning common stock in the amount of \$10 million (0.5% of total domestic plan assets) and \$11 million (0.5% of total domestic plan assets) at December 31, 2006 and 2005, respectively.

Cash Flow Data

We anticipate making voluntary cash contributions of approximately \$100 million to our domestic and international pension plans in 2007.

96

13. Employee Retirement Plans (continued)

The following reflects the gross benefit payments which are expected to be paid for the domestic and international plans and the gross amount of annual Medicare Part D federal subsidy expected to be received (in millions):

	Expected Benefit Payments		Expected Federal Subsidy Payments
	Pension Benefits	Postretirement Benefits	Post Retirement Benefits
2007	\$165	\$ 75	\$ 7
2008	\$168	\$ 79	\$ 7
2009	\$168	\$ 83	\$ 8
2010	\$173	\$ 87	\$ 8
2011	\$178	\$ 90	\$ 9
Years 2012-2015	\$875	\$ 489	\$ 49

Other Benefit Plans

We offer defined contribution plans covering employees meeting certain eligibility requirements. Total consolidated defined contribution plan expense was \$34 million, \$34 million and \$28 million for the years ended December 31, 2006, 2005 and 2004, respectively.

14. Commitments, Contingencies, and Guarantees

The amounts of our obligations follow (in millions):

	Total	Amount of commitment and contingency expiration per period				
		Less than 1 year	1 to 2 years	2 to 3 years	3 to 4 years	5 years and thereafter
Performance bonds and guarantees	\$ 70	\$ 14	\$ 5	\$ 1	\$ 1	\$ 49

Edgar Filing: CORNING INC /NY - Form 10-K

Credit facilities for equity companies	177			16		161
Stand-by letters of credit ⁽¹⁾	73	63	10			
Loan guarantees	14	1				13
Subtotal of commitment expirations per period	\$ 334	\$ 78	\$ 15	\$ 17	\$ 1	\$ 223
Purchase obligations	161	74	30	26	22	9
Capital expenditure obligations ⁽²⁾	261	261				
Total debt ⁽³⁾	1,707	20	20	72	297	1,298
Minimum rental commitments	286	62	66	28	24	106
Interest on long-term debt ⁽⁴⁾	1,390	106	105	103	101	975
Subtotal of contractual obligation payments						
due by period	\$ 3,805	\$ 523	\$ 221	\$ 229	\$ 444	\$ 2,388
Total commitments and contingencies	\$4,139	\$601	\$236	\$246	\$445	\$2,611

- (1) At December 31, 2006, \$35 million of the \$73 million was included in other accrued liabilities on our consolidated balance sheets.
- (2) Capital expenditure obligations, primarily related to our Display Technologies segment expansions, are included on our balance sheet.
- (3) At December 31, 2006, \$1,716 million was included on our balance sheet. Amounts above are stated at their maturity value.
- (4) The estimate of interest payments assumes interest is paid through the date of maturity/expiration of the related debt, based upon stated rates in the respective debt instruments.

97

14. Commitments, Contingencies, and Guarantees (continued)

FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others" (FIN 45), requires a company, at the time a guarantee is issued, to recognize a liability for the fair value or market value of the obligation it assumes. In the normal course of our business, we do not routinely provide significant third-party guarantees. Generally, third-party guarantees provided by Corning are limited to certain financial guarantees, including stand-by letters of credit and performance bonds, and the incurrence of contingent liabilities in the form of purchase price adjustments related to attainment of milestones. These guarantees have various terms, and none of these guarantees are individually significant.

We have agreed to provide a credit facility related to Dow Corning. The funding of the Dow Corning credit facility will be required only if Dow Corning is not otherwise able to meet its scheduled funding obligations in its confirmed Bankruptcy Plan. The purchase obligations primarily represent raw material and energy-related take-or-pay contracts. We believe a significant majority of these guarantees and contingent liabilities will expire without being funded.

Minimum rental commitments under leases outstanding at December 31, 2006 follow (in millions):

2007	2008	2009	2010	2011	2012 and thereafter
\$62	\$66	\$28	\$24	24	\$82

Total rental expense was \$65 million for 2006, \$67 million for 2005 and \$54 million for 2004.

A reconciliation of the changes in the product warranty liability for the year ended December 31 follows (in millions):

	2006	2005
Balance at January 1	\$ 27	\$ 42
Adjustments for warranties issued for current year sales	\$ 7	\$ 5
Adjustments for warranties related to prior year sales	\$ (6)	\$ (6)

Foreign currency translation		\$ (1)
Settlements made during the current year	\$ (2)	\$(13)
Balance at December 31	\$ 26	\$ 27

Corning is a defendant in various lawsuits, including environmental, product-related suits, the Dow Corning and PCC matters discussed in Note 8 (Investments), and is subject to various claims which arise in the normal course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on Corning's consolidated financial position, liquidity, or results of operations.

We have been named by the Environmental Protection Agency under the Superfund Act, or by state governments under similar state laws, as a potentially responsible party for 18 active hazardous waste sites. Under the Superfund Act, all parties who may have contributed any waste to a hazardous waste site, identified by such Agency, are jointly and severally liable for the cost of cleanup unless the Agency agrees otherwise. It is our policy to accrue for the estimated liability related to Superfund sites and other environmental liabilities related to property owned and operated by us based on expert analysis and continual monitoring by both internal and external consultants. At December 31, 2006 and 2005, we had accrued approximately \$16 million (undiscounted) and \$13 million (undiscounted), respectively, for the estimated liability for environmental cleanup and related litigation. Based upon the information developed to date, we believe that the accrued amount is a reasonable estimate of our liability and that the risk of an additional loss in an amount materially higher than that accrued is remote.

The ability of certain subsidiaries and affiliated companies to transfer funds is limited by provisions of foreign government regulations, affiliate agreements and certain loan agreements. At December 31, 2006, the amount of equity subject to such restrictions for consolidated subsidiaries totaled \$151 million. While this amount is legally restricted, it does not result in operational difficulties since we have generally permitted subsidiaries to retain a majority of equity to support their growth programs.

15. Hedging Activities

We operate and conduct business in many foreign countries and as a result are exposed to movements in foreign currency exchange rates. Our exposure to exchange rate effects includes:

- exchange rate movements on financial instruments and transactions denominated in foreign currencies that impact earnings, and
- exchange rate movements upon translation of net assets in foreign subsidiaries for which the functional currency is not the U.S. dollar that impact our net equity.

Our most significant foreign currency exposures relate to Japan, Korea, Taiwan, and western European countries. We selectively enter into foreign exchange forward and option contracts with durations generally 15 months or less to hedge our exposure to exchange rate risk on foreign source income and purchases. The hedges are scheduled to mature coincident with the timing of the underlying foreign currency commitments and transactions. The objective of these contracts is to neutralize the impact of exchange rate movements on our operating results.

We engage in foreign currency hedging activities to reduce the risk that changes in exchange rates will adversely affect the eventual net cash flows resulting from the sale of products to foreign customers and purchases from foreign suppliers. The hedge contracts reduce the exposure to fluctuations in exchange rate movements because the gains and losses associated with foreign currency balances and transactions are generally offset with gains and losses of the hedge contracts. Because the impact of movements in foreign exchange rates on the value of hedge contracts offsets the related impact on the underlying items being hedged, these financial instruments help alleviate the risk that might otherwise result from currency exchange rate fluctuations.

The following table summarizes the notional amounts and respective fair values of Corning's derivative financial instruments, which mature at varying dates, at December 31, 2006 (in millions):

	Notional Amount	Fair Value
Foreign exchange forward contracts	\$ 945	\$ 30
Foreign exchange option contracts	\$ 450	\$ 9

The forward and option contracts we use in managing our foreign currency exposures contain an element of risk in that the counterparties may be unable to meet the terms of the agreements. However, we minimize this risk by limiting the counterparties to a diverse group of highly-rated major domestic and international financial institutions with which we have other financial relationships. We are exposed to potential losses in the event of non-performance by these counterparties; however, we do not expect to record any losses as a result of counterparty default. We do not require and are not required to place collateral for these financial instruments.

In the second quarter of 2005, Corning began using derivative instruments (forwards) to limit the exposure to foreign currency fluctuations associated with certain monetary assets and liabilities. These derivative instruments are not designated as hedging instruments for accounting purposes and, as such, are referred to as undesignated hedges. Changes in the fair value of undesignated hedges are recorded in current period earnings in the other income, net component, along with the foreign currency gains and losses arising from the underlying monetary assets or liabilities in the consolidated statement of operations. At December 31, 2006, the notional amount of the undesignated derivatives was \$836 million.

Cash Flow Hedges

Corning has cash flow hedges that are comprised of foreign exchange forward and option contracts. The critical terms of each cash flow hedge are identical to the critical terms of the hedged item. Therefore, Corning utilizes the critical terms test under SFAS 133, "Accounting for Derivative Instruments and Hedging Activities" (SFAS 133), and the presumption is that there is no hedge ineffectiveness as long as the critical terms of the hedge and the hedged item do not change. During the third quarter of 2006, Corning determined that 2,174 million Japanese yen (19.6 million U.S. dollar equivalent) of anticipated sales transactions would not occur as originally specified. The hedges on these anticipated sales transactions were considered to be ineffective as the critical terms of the hedges and hedged items no longer matched. These derivative financial instruments were de-designated as cash flow hedges, and the gain was recorded immediately in other income, net, in the consolidated statement of operations. The notional amount of the hedges that were de-designated was \$19.6 million; a corresponding gain of \$0.9 million resulted from this ineffectiveness.

15. Hedging Activities (continued)

Corning defers net gains and losses from cash flow hedges into accumulated other comprehensive income on the consolidated balance sheet until such time as the hedged item impacts earnings. At that time, Corning reclassifies net gains and losses from cash flow hedges into the same line item of the consolidated statement of operations as where the effects of the hedged item are recorded, typically sales, cost of sales, or royalty income. Amounts are reclassified from accumulated other comprehensive income when the underlying hedged item impacts earnings. At December 31, 2006, the amount of net gains expected to be reclassified into earnings within the next 12 months is \$14 million.

Fair Value Hedges

Corning records net gains and losses from fair value hedges into the same line item of the consolidated statement of operations as where the effects of the hedged item are recorded. There were no outstanding fair value hedges in 2006 or 2005.

Net Investment in Foreign Operations

We have issued foreign currency denominated debt that has been designated as a hedge of the net investment in a foreign operation. The effective portion of the changes in fair value of the debt is reflected as a component of other accumulated comprehensive income (loss) as part of the foreign currency translation adjustment. Net losses related to this investment included in the cumulative translation adjustment at December 31, 2006 and

2005, were \$139 million and \$107 million, respectively.

100

16. Shareholders' Equity

The following table presents changes in capital stock for the period from January 1, 2004 to December 31, 2006 (in millions):

	Series C Preferred Stock		Common Stock		Treasury Stock	
	Shares	Par Value	Shares	Par Value	Shares	Cost
Balance at December 31, 2003	1	\$ 85	1,401	\$ 701	(58)	\$ (574)
Conversion of preferred stock		(21)	11	5		
Shares issued to benefit plans					4	36
Shares issued in debt retirement					38	379
Other			12	6		(3)
Balance at December 31, 2004	1	\$ 64	1,424	\$ 712	(16)	\$ (162)
Shares issued in equity offerings			20	10		
Conversion of preferred stock	(1)	(64)	32	16		
Shares issued to benefit plans and for option exercises			39	20		1

Preferred Stock

We have designated 2.4 million shares as Series A Junior Participating Preferred Stock for which no shares have been issued. In June 1996, the Board of Directors approved the renewal of the Preferred Share Purchase Right Plan, which entitles shareholders to purchase 0.01 of a share of Series A Junior Participating Preferred Stock upon the occurrence of certain events. In addition, the rights entitle shareholders to purchase shares of common stock at a 50% discount in the event a person or group acquires 20% or more of our outstanding common stock. The preferred share purchase rights became effective July 15, 1996 and expired July 15, 2006.

In 2002, Corning issued 5.75 million shares of 7.00% Series C Mandatory Convertible Preferred Stock. On the mandatory conversion date of August 15, 2005, the remaining outstanding shares were converted into Corning common stock at a conversion rate of 50,813 shares of common stock for each preferred share. Upon conversion of the preferred shares, we issued 31 million shares of Corning common stock resulting in an increase to equity of \$62 million. The Series C mandatory convertible preferred stock had a liquidation preference of \$100 per share, plus accrued and unpaid dividends. At December 31, 2006 and 2005, there were no outstanding shares of Series C Mandatory Convertible Preferred Stock.

(1) Includes adjustments from Dow Corning.

(2) Zero tax effect for 2004, 2005 and 2006. Refer to Note 7 (Income Taxes) for an explanation of Corning's tax paying position.

(3) Net of tax effect of \$2 million in 2005.

(4) Net of tax effect of \$6 million and \$84 million for years 2006 and 2005, respectively.

(5) Net of tax effect of \$10 million in 2006.

17. Earnings (Loss) Per Common Share

Basic earnings (loss) per common share is computed by dividing income (loss) attributable to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted earnings (loss) per common share assumes the issuance of common shares for all potentially dilutive securities outstanding. Since we reported a loss from continuing operations in 2004, the diluted loss per common share is the same as the basic loss per common share, as any potentially dilutive securities would reduce the loss per common share from continuing operations.

17. Earnings (Loss) Per Common Share (continued)

The reconciliation of the amounts used to compute basic and diluted loss per common share from continuing operations follows (in millions, except per share amounts):

	For the years ended								
	2006			2005			2004		
	Income	Weighted-Average Shares	Per Share Amount	Income	Weighted-Average Shares	Per Share Amount	Loss	Weighted-Average Shares	Per Share Amount
Basic earnings (loss) per common share	\$ 1,855	1,550	\$ 1.20	\$ 585	1,464	\$ 0.40	\$ (2,251)	1,386	\$ (1.62)
Effect of dilutive securities:									
Stock compensation awards		44			41				
7% mandatory convertible preferred stock (1)					20				
3.5% convertible debentures				3	10				
Diluted Earnings (Loss) Per Common Share	\$ 1,855	1,594	\$ 1.16	\$ 588	1,535	\$ 0.38	\$ (2,251)	1,386	\$ (1.62)

- (1) On the mandatory conversion date of August 16, 2005, the remaining shares of our 7.00% Series C Mandatory Convertible Preferred Stock were converted into Corning common stock at a conversion rate of 50,813 shares of common stock for each preferred share. Upon conversion of the preferred shares, we issued 31 million shares of Corning common stock resulting in an increase to equity of \$62 million.

The following potential common shares were excluded from the calculation of diluted earnings/loss per common share due to their anti-dilutive effect or, in the case of stock options, because their exercise price was greater than the average market price for the periods presented (in millions):

	For the years ended		
	2006	2005	2004
Potential common shares excluded from the calculation of diluted earnings (loss) per share:			
Stock options			34
7% mandatory convertible preferred stock (1)			36
3.5% convertible debentures			41
4.875% convertible notes (2)		4	6
Zero coupon convertible debentures		2	3
Total		6	120

Stock options excluded from the calculation of diluted earnings (loss) per share because the exercise price was greater than the average market price of the common shares

29 47 59

- (1) On the mandatory conversion date of August 16, 2005, the remaining shares of our 7.00% Series C Mandatory Convertible Preferred Stock were converted into Corning common stock at a conversion rate of 50,813 shares of common stock for each preferred share. Upon conversion of the preferred shares, we issued 31 million shares of Corning common stock resulting in an increase to equity of \$62 million.

(2)

In the third quarter of 2005, substantially all holders of our \$96 million outstanding Oak 4 7/8% subordinated notes elected to convert their notes into Corning common stock. The conversion ratio was 64.41381 shares of Corning common stock for each \$1,000 principal amount of notes. Upon the conversion of these notes, we issued 6 million shares of Corning common stock resulting in an increase to equity of \$95 million.

103

18. Share-based Compensation

Stock Compensation Plans

Corning's share-based compensation programs include the following: employee stock options, time-based restricted stock, performance-based restricted stock, and the Worldwide Employee Stock Purchase Plan (WESPP). At December 31, 2006, our stock compensation programs were in accordance with the 2005 Employee Equity Participation Program and the 2003 Equity Plan for Non-Employee Directors Program. Any ungranted shares from prior years will be available for grant in the current year. Any remaining shares available for grant, but not yet granted, will be carried over and used in the following year. At December 31, 2006, there were approximately 100 million shares available for grant.

On January 1, 2006, the Company adopted SFAS 123(R). SFAS 123(R) requires the measurement and recognition of compensation cost for all share-based payment awards made to employees and directors, including grants of employee stock options and employee stock purchases related to the WESPP, based on estimated fair values. Prior to the adoption of SFAS 123(R), the Company accounted for share-based awards to employees and directors using the intrinsic value method in accordance with APB 25 as allowed under SFAS 123. Under the intrinsic value method, no share-based compensation cost related to stock options had been recognized in the Company's Consolidated Statements of Operations, because the exercise price was at least equal to the market value of the common stock on the grant date. As a result, the recognition of share-based compensation cost was generally limited to the expense attributed to restricted stock awards and stock option modifications. SFAS 123(R) is a revision of SFAS 123 and supercedes APB 25.

The Company elected to use the modified prospective transition method upon adoption of SFAS 123(R), which requires the application of the accounting standard as of January 1, 2006, the first day of the Company's fiscal year 2006. In accordance with the modified prospective transition method, the Company's Consolidated Financial Statements for prior periods have not been restated to reflect, and do not include, the impact of SFAS 123(R).

For share-based payment grants on or after December 1, 2005, the Company estimated the fair value of such grants using a lattice-based option valuation model. Prior to December 1, 2005, the Company estimated the fair value of share-based payment awards using the Black-Scholes option pricing model. Prior to January 1, 2006, these fair values were utilized in developing the Company's pro forma disclosure information required under SFAS 123.

Under SFAS 123(R), for share-based payment awards granted subsequent to January 1, 2006, the fair value of awards that are expected to ultimately vest is recognized as expense over the requisite service periods. SFAS 123(R) requires forfeitures to be estimated at the time of the grant in order to estimate the amount of share-based payment awards that will ultimately vest. Forfeiture rates are based on historical rates. The estimated forfeiture rate will be adjusted if actual forfeitures differ from the original estimates. The effect of any change in estimated forfeitures would be recognized through a cumulative catch-up adjustment that would be included in compensation cost in the period of the change in estimate. For share-based payment awards granted prior to January 1, 2006, the Company will recognize the remaining unvested SFAS 123 pro forma expense according to their remaining vesting conditions.

Share-based compensation cost recognized under SFAS 123(R) for the year ended December 31, 2006, was \$81 million and included (1) employee stock options, (2) time-based restricted stock, (3) performance-based restricted stock, and (4) the WESPP. Share-based compensation recognized under APB 25 for the years ended December 31, 2005 and 2004 was \$37 million and \$11 million, respectively and included (1) time-based restricted stock and (2) performance-based restricted stock. Compensation cost of \$127 million was included in operating activities on the Company's Consolidated Statements of Cash Flows for the year ended December 31, 2006, of which \$81 million is attributed to the effect of the change from applying the original provisions of SFAS 123 to the adoption

of SFAS 123(R). No tax benefits were attributed to the share-based compensation cost because a valuation allowance was maintained for substantially all net deferred tax assets.

18. Share-based Compensation (continued)

On November 10, 2005, the FASB issued FASB Staff Position (FSP) No. SFAS 123(R)-3, "Transition Election Related to Accounting for Tax Effects of Share-Based Payment Awards." This FSP provides an elective alternative transition method related to accounting for the tax effects of share-based payments to employees which is different from the transition method prescribed by SFAS 123R. The alternative method includes simplified methods to establish the beginning balance of additional paid-in capital related to the tax effects of employee share-based compensation (the APIC pool), and to determine the subsequent impact on the APIC pool and the company's consolidated statements of cash flows of the tax effects of employee share-based compensation awards that were outstanding upon adoption of SFAS 123(R). Corning has elected to adopt the alternative transition method provided in this FSP for calculating the tax effects of share-based compensation pursuant to SFAS 123(R).

The following table illustrates the effect of the change from applying the original provisions of SFAS 123 to the adoption of SFAS 123(R) on 2006 income from continuing operations and earnings per share (in millions, except per share amounts):

	Year ended December 31, 2006
Income from continuing operations before income taxes	\$ 81
Income from continuing operations	\$ 81
Net income available to common stockholders	\$ 81
Earnings per Common Share - Basic:	
Income from continuing operations	\$ 0.05
Net income	\$ 0.05
Earnings per Common Share - Diluted:	
Income from continuing operations	\$ 0.05
Net income	\$ 0.05

The following table illustrates the effect on 2005 and 2004 net income (loss) and earnings (loss) per share as if the Company had applied the fair value recognition provisions of SFAS No. 123, as amended by SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure." This standard preceded SFAS 123(R) and required different measurement criteria (in millions, except per share amounts):

	Years ended December 31,	
	2005	2004
Net income (loss), as reported	\$ 585	\$ (2,231)
Add: Stock-based employee compensation expense included in reported net income (loss), net of related tax effects	37	11
Deduct: Total stock-based compensation expense determined under the fair value based method, net of related tax effects	(68)	(168)
Net income (loss), pro forma	\$ 554	\$ (2,388)
Earnings (loss) per Common Share - Basic:		
As reported	\$ 0.40	\$ (1.61)
Pro forma	\$ 0.38	\$ (1.72)
Earnings (loss) per Common Share - Diluted:		
As reported	\$ 0.38	\$ (1.61)
Pro forma	\$ 0.36	\$ (1.72)

On December 1, 2004, Corning's Compensation Committee of the Board of Directors considered and adopted a proposal that accelerated the vesting of all unvested underwater options held by active employees. Unvested underwater options were defined as options granted prior to December 1, 2004, with a grant price greater than \$12.70. Approximately 7 million stock options, or 5 percent of Corning's outstanding stock options, were accelerated. This action was one of a series of actions taken to manage Corning's anticipated future compensation cost for all forms of equity incentives within an acceptable range once SFAS 123(R) was adopted. Other actions included reducing the use of stock options for all employees, increasing the use of performance shares in the executive plan, and reviewing the cost considerations of the global employee share purchase program. As a result of the accelerated vesting, the 2004 stock-based compensation expense determined under the fair value based method, net of related tax effects amount above includes \$13 million of incremental expense relating to these accelerated options.

105

18. Share-based Compensation (continued)

Stock Options

Our stock option plans provide non-qualified and incentive stock options to purchase authorized but unissued or treasury shares at the market price on the grant date and generally become exercisable in installments from one to five years from the grant date. The maximum term of non-qualified and incentive stock options is 10 years from the grant date.

The following table summarizes information concerning options outstanding including the related transactions under the options plans for the year ended December 31, 2006:

	Number of Shares (in thousands)	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term in Years	Aggregate Intrinsic Value (in thousands)
Options Outstanding as of December 31, 2005	120,504	\$ 21.67		
Granted	7,748	\$ 24.43		
Exercised	(28,891)	\$ 10.87		
Forfeited and Expired	(3,631)	\$ 47.52		
Options Outstanding as of December 31, 2006	95,730	\$ 24.19	5.78	\$ 570,846
Options Exercisable as of December 31, 2006	78,006	\$ 26.04	5.21	\$ 479,631

The aggregate intrinsic value (market value of stock less option exercise price) in the preceding table represents the total pretax intrinsic value, based on the Company's closing stock price on December 29, 2006, which would have been received by the option holders had all option holders exercised their options as of that date. The total number of in-the-money options exercisable on December 31, 2006, was approximately 48 million.

The weighted-average grant-date fair value for options granted for the years ended December 31, 2006, 2005, and 2004 was \$9.42, \$6.18, and \$4.99, respectively. The total fair value of options that vested during the years ended December 31, 2006, 2005, and 2004 was approximately \$74 million, \$72 million, and \$333 million, respectively. Compensation cost related to stock options for the year ended December 31, 2006, was approximately \$76 million, and there was zero cost for years ended December 31, 2005 and 2004, respectively.

As of December 31, 2006, there was approximately \$47 million of unrecognized compensation cost related to stock options granted under the Plan. The cost is expected to be recognized over a weighted-average period of 1.35 years.

Proceeds received from the exercise of stock options were \$303 million for the year ended December 31, 2006, which was included in financing activities on the Company's Consolidated Statements of Cash Flows. The total intrinsic value of options exercised for the years ended December 31, 2006, 2005, and 2004 was approximately \$374 million, \$216 million, and \$49 million, respectively, which is currently deductible for tax purposes. However, these tax benefits were not realized due to net operating loss carryforwards available to the Company. Refer to Note 7 (Income Taxes) to the consolidated financial statements.

18. Share-based Compensation (continued)

For stock options granted prior to January 1, 2006, Corning specified that the employee will continue to vest in the award after retirement without providing any additional services. Corning accounted for this type of arrangement by recognizing compensation cost on a pro forma disclosure basis over the requisite vesting period (the "stated vesting period approach"). For time-based and performance-based restricted stock granted prior to January 1, 2006, Corning specified that the employee will vest in the award after retirement without providing any additional services. Corning accounted for this type of arrangement by recognizing compensation cost over the nominal vesting period and, if the employee retires before the end of the vesting period, recognizing any remaining unrecognized compensation cost at the date of retirement (the "nominal vesting period approach"). SFAS 123(R) specifies that an award is vested when the employee's retention of the award is no longer contingent on providing subsequent service (the "non-substantive vesting period approach"). That would be the case for Corning awards that vest when employees retire and are granted to retirement eligible employees. Effective January 1, 2006, related compensation cost must be recognized immediately for awards granted to retirement eligible employees or over the period from the grant date to the date retirement eligibility is achieved, if that is expected to occur during the stated or nominal vesting period. For those share-based awards granted during the year ended December 31, 2006, Corning recognized approximately \$11 million in additional compensation cost in applying the non-substantive vesting period approach versus the stated and nominal period approaches.

For stock options granted prior to December 1, 2005, the fair value of stock options was estimated using the Black-Scholes option-pricing model. The following are weighted-average inputs for the Black-Scholes option-pricing model used for grants under our stock plans through November 2005 and in 2004, respectively:

	2005	2004
Expected life in years	4	4
Risk free interest rate	3.8%	3.4%
Expected volatility	50%	50%
Expected dividends	0	0

During 2004, Corning updated its analysis of the historical stock exercise behavior of its employees, among other relevant factors, and determined that the best estimate of the stock options' expected term granted in 2004 was 4 years, compared to our previous expected term estimate of 5 years. Additionally, Corning used a 10-year mean reversion analysis, as allowed by SFAS 123, to determine the volatility assumption also used to estimate the fair value of options granted in 2004. Prior to 2004, Corning used historical trailing volatility for a period equal to the expected term of our stock options. Corning believes a mean reversion analysis provides a better estimate of future volatility expectations.

The lattice-based valuation model, used to estimate the fair values of option and restricted stock grants after November 30, 2005, incorporates the assumptions (including ranges of assumptions) noted in the table below. Expected volatility is based on the blended short-term volatility (the arithmetic average of the implied volatility and the short-term historical volatility), long-term historical volatility of Corning's stock, and other factors.

Corning also uses historical data to estimate future option exercise and employee termination within the valuation model. Separate groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. The expected time to exercise of options granted is derived using a regression model and represents the period of time that options granted are expected to be outstanding. The range given below results from certain groups of employees exhibiting different behavior. The risk-free rates used in the lattice model are derived from the U.S. Treasury yield curve in effect from the grant date to the option's

expiration date. Since period-by-period calculations are employed in the lattice model, Corning uses risk-free rates that apply from one period to the next, generally quarter to quarter. Such rates are typically referred to as "forward" rates. Being essentially marginal rates, forward rates both vary during the contractual term of the option and exhibit greater variation than the yield curve from which they are derived.

107

18. Share-based Compensation (continued)

The following inputs for the lattice-based valuation model were used for option grants under our Stock Option Plans since December 2005:

	2006	2005
Expected volatility	36-54%	37-53%
Weighted-average volatility	50-53%	49%
Expected dividends	0	0
Risk-free rate	0.4-11.2%	1.0-9.7%
Average risk-free rate	4.6-5.3%	4.7%
Expected time to exercise (in years)	2.6-6.5	2.5-3.6
Pre-vesting departure rate	1.5-2.4%	3%
Post vesting departure rate	3.8-7.1%	10-16%

Incentive Stock Plans

The Corning Incentive Stock Plan permits stock grants, either determined by specific performance goals or issued directly, in most instances, subject to the possibility of forfeiture and without cash consideration. Shares under the Incentive Stock Plan are generally granted at-the-money, contingently vest over a period of 1 to 10 years, and have contractual lives of 1 to 10 years.

The fair value of each restricted stock grant under the Incentive Stock Plans was estimated on the date of grant for performance based grants assuming that performance goals will be achieved. The expected term for grants under the Incentive Stock Plans is 1 to 10 years.

Time-Based Restricted Stock:

Time-based restricted stock is issued by the Company on a discretionary basis, and is payable in shares of the Company's common stock upon vesting. The fair value is based on the market price of the Company's stock on the grant date. Compensation cost is recognized over the requisite vesting period and adjusted for actual forfeitures before vesting.

The following table represents a summary of the status of the Company's nonvested time-based restricted stock as of December 31, 2005, and changes during the year ended December 31, 2006:

	Shares (000's)	Weighted-Average Grant-Date Fair Value
Nonvested shares		
Nonvested shares at December 31, 2005	861	\$ 11.86
Granted	192	24.07
Vested	(212)	10.54
Forfeited	(24)	18.41
Nonvested shares at December 31, 2006	817	\$ 14.88

As of December 31, 2006, there was approximately \$5 million of unrecognized compensation cost related to nonvested time-based restricted stock compensation arrangements granted under the Plan. The cost is expected to be recognized over a weighted-average period of 2.93 years. The total fair value of time-based restricted stock that vested during the years ended December 31, 2006, 2005, and 2004 was approximately \$2 million, \$3 million, and \$2 million, respectively. Compensation cost related to time-based restricted stock was approximately \$3 million, \$2 million, and \$2 million for the years ended December 31, 2006, 2005, and 2004, respectively.

108

18. Share-based Compensation (continued)

Performance-Based Restricted Stock:

Performance-based restricted stock is earned upon the achievement of certain targets, and is payable in shares of the Company's common stock upon vesting typically over a three-year period. The fair value is based on the market price of the Company's stock on the grant date and assumes that the target payout level will be achieved. Compensation cost is recognized over the requisite vesting period and adjusted for actual forfeitures before vesting. During the performance period, compensation cost may be adjusted based on changes in the expected outcome of the performance-related target.

The following table represents a summary of the status of the Company's nonvested performance-based restricted stock units as of December 31, 2005, and changes during the year ended December 31, 2006:

	Shares (000's)	Weighted-Average Grant-Date Fair Value
Nonvested shares		
Nonvested shares at December 31, 2005	6,718	\$ 14.33
Granted	2,922	17.79
Vested	(765)	12.08
Forfeited	(146)	13.95
Nonvested shares at December 31, 2006	8,729	\$ 15.70

As of December 31, 2006, there was approximately \$87 million of unrecognized compensation cost related to nonvested performance-based restricted stock compensation arrangements granted under the Plan. The cost is expected to be recognized over a weighted-average period of 2.25 years. The total fair value of performance-based restricted stock that vested during the year ended December 31, 2006, was approximately \$9 million, and no performance-based restricted stock vested during years ended December 31, 2005 and 2004, respectively. Compensation cost related to performance-based restricted stock was approximately \$43 million, \$35 million, and \$9 million for the years ended December 31, 2006, 2005, and 2004, respectively.

Worldwide Employee Stock Purchase Plan

In addition to the Stock Option Plan and Incentive Stock Plans, we have a Worldwide Employee Share Purchase Plan (WESPP). Under the WESPP, substantially all employees can elect to have up to 10% of their annual wages withheld to purchase our common stock. The purchase price of the stock was 85% of the lower of the beginning-of-quarter or end-of-quarter closing market price through September 30, 2006. Effective October 1, 2006, the purchase price of the stock is 85% of the end-of-quarter closing market price. For the year ended December 31, 2006, approximately \$5 million of compensation cost related to the WESPP was recorded, and there was zero expense for years ended December 31, 2005 and 2004, respectively. For the year ended December 31, 2006, approximately 1.0 million shares were purchased by employees.

19. Operating Segments

Corning conducts its worldwide operations through operating segments, which are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing

performance. Our Chief Operating Decision Making group (CODM) is comprised of the president and chief executive officer, vice chairman and chief financial officer, chief operating officer, executive vice president-chief administrative officer, executive vice president-chief technology officer, and senior vice president and operations chief of staff.

We prepared the financial results for our reportable segments on a basis that is consistent with the manner in which we internally disaggregate financial information to assist in making internal operating decisions. We include the earnings of equity affiliates that are closely associated with our operating segments in the respective segment's net income. Segment net income may not be consistent with measures used by other companies. The accounting policies of our reportable segments are the same as those applied in the consolidated financial statements. Revenue attributed to geographic areas is based on the location of the customer.

19. Operating Segments (continued)

On January 1, 2006, Corning changed its measurement of segment profit or loss for the following items:

- We removed the net impact of financing costs, such as interest expense on debt instruments and interest costs associated with benefit plans, from reportable segments and included these amounts in Corporate unallocated expense.
- We changed the allocation method for taxes to more closely reflect the company's current tax position.
- We removed the impact of non-cash stock compensation expense from reportable segments and included this amount in Corporate unallocated expense.
- We removed the allocation of exploratory research, development and engineering expense from the reportable segments and included these amounts in Corporate unallocated expense.
- We changed certain other expense allocation methods for Corporate functions.

Our reportable operating segments follow:

- Display Technologies - manufactures liquid crystal display glass for flat panel displays;
- Telecommunications - manufactures optical fiber and cable and hardware and equipment components for the telecommunications industry;
- Environmental Technologies - manufactures ceramic substrates and filters for automobile and diesel applications; and
- Life Sciences - manufactures glass and plastic consumables for scientific applications.

The Environmental Technologies reportable segment is an aggregation of our Automotive and Diesel operating segments, as these two segments share similar economic characteristics, products, customer types, production processes and distribution methods.

All other operating segments that do not meet the quantitative threshold for separate reporting have been grouped as "Other Segments."

The following provides historical segment information that has been revised to reflect the changes to segment performance measurement as described above.

19. Operating Segments (continued)

- (1) Depreciation expense for Corning's reportable segments includes an allocation of depreciation of corporate property not specifically identifiable to a segment.
- (2) Research, development, and engineering expenses includes direct project spending which is identifiable to a segment.
- (3) In 2006, restructuring, impairment and other charges and (credits) includes a charge of \$44 million for certain assets in our Telecommunications segment. In 2005, restructuring, impairment and other charges and (credits) includes a gain of \$84 million for the reversal of the cumulative translation account of a wholly-owned subsidiary that was substantially liquidated. Amounts for 2005, also include a charge of \$28 million for a restructuring plan in the Telecommunications segment. In 2004, restructuring, impairment and other charges and (credits) includes a charge of \$1,420 million to impair our Telecommunications segment goodwill balance. Amounts for 2004 also include a charge of \$350 million to impair certain fixed assets of our Telecommunications segment.
- (4) Many of Corning's administrative and staff functions are performed on a centralized basis. Where practicable, Corning charges these expenses to segments based upon the extent to which each business uses a centralized function. Other staff functions, such as corporate finance, human resources and legal are allocated to segments, primarily as a percentage of sales.
- (5) Minority interests included the impact of the following restructuring, impairment, and other charges (credits):
- In 2004, gains from the sale of assets of Corning Asahi Video (CAV) in excess of assumed salvage value of \$17 million, and reversals of CAV severance reserves of \$2 million.
- (6) Equity in earnings of affiliated companies, net of impairments includes the following restructuring and impairment charges:
- In 2006, gains of \$2 million related to impairments and other charges and credits for Samsung Corning is included in other Segments.
 - In 2005, \$106 million to reflect our share of Samsung Corning Co., Ltd.'s asset impairment charges.
 - In 2004, charges of \$35 million to impair equity method investments in the Telecommunications segment to their estimated fair value.
- (7) Segment assets include inventory, accounts receivable, property and associated equity companies and cost investments.

For the year ended December 31, 2006, the following number of customers, which individually accounted for 10% or more of each segment's sales, represented the following concentration of segment sales:

- In the Display segment, three customers accounted for 64% of total segment sales.
- In the Telecommunications segment, two customers accounted for 25% of total segment sales.
- In the Environmental Technologies segment, three customers accounted for 72% of total segment sales.
- In the Life Sciences segment, one customer accounted for 43% of segment sales.

A significant amount of specialized manufacturing capacity for our Display Technologies segment is concentrated in Asia. It is at least reasonably possible that the use of a facility located outside of an entity's home country could be disrupted. Due to the specialized nature of the assets, it would not be possible to find replacement capacity quickly. Accordingly, loss of these facilities could produce a near-term severe impact to our display business and the Company as a whole.

19. Operating Segments (continued)

A reconciliation of reportable segment net income (loss) to consolidated net income (loss) follows (in millions):

	Years ended December 31,		
	2006	2005	2004
Net income (loss) of reportable segments	\$ 1,614	\$ 1,318	\$ (1,120)
Non-reportable segments	47	(66)	50
Unallocated amounts:			
Net financing costs (1)	1	(93)	(164)
Stock-based compensation expense	(127)	(37)	(11)
Exploratory research	(89)	(77)	(68)
Corporate contributions	(30)	(24)	(17)
Equity in earnings of affiliated companies, net of impairments (2)	352	266	127
Asbestos settlement (3)	2	(218)	(65)
Other corporate items (4)	85	(484)	(963)
Net income (loss)	\$ 1,855	\$ 585	\$ (2,231)

(1) Net financing costs include interest expense, interest income, and interest costs and investment gains associated with benefit plans.

(2) Equity in earnings of affiliated companies, net of impairments represents equity in earnings of Dow Corning Corporation which includes the following items:

- In 2006, a \$33 million gain representing our share of a tax settlement relating to an IRS examination at Dow Corning.
- In 2005, a gain of \$11 million which represents our share of Dow Corning's gain on the issuance of subsidiary stock.
- In 2004, charges of \$21 million which represents our share of Dow Corning's charges related to restructuring actions and adjustments to interest liabilities recorded on its emergence from bankruptcy.

(3) In 2006, 2005 and 2004, the asbestos settlement includes a gain of \$24 million, and charges of \$197 million and \$33 million, respectively, to reflect the movement in Corning's common stock price in each year and \$22 million, \$21 million and \$32 million, respectively, to adjust the estimated fair value of the other components of the proposed asbestos settlement. See Note 8 (Investments) to the consolidated financial statements.

(4) Other corporate items include the tax impact of the unallocated amounts and the following significant items:

- In 2006, tax benefits of \$83 million from the release of valuation allowances for certain foreign locations.
- In 2005, an impairment charge of \$25 million for the other-than-temporary decline in our investment in Avanex below its cost basis; a loss of \$16 million associated with the redemption or retirement of debt; a net \$443 million charge to tax expense which included a \$525 million increase to our valuation allowance against deferred tax assets resulting from our conclusion that the sale of an appreciated asset no longer met the criteria established by SFAS No. 109, "Accounting for Income Taxes" (SFAS No. 109) for a viable tax planning strategy offset by an \$82 million credit to tax expense primarily related to the tax impact of eliminating the minimum pension liability associated with our domestic defined benefit plan.
- In 2004, a \$992 million charge to tax expense as a result of the company's decision to provide a valuation allowance against a significant portion of its deferred tax assets and a loss of \$36 million associated with the retirement of significant portion of Corning's long-term debt.

19. Operating Segments (continued)

A reconciliation of reportable segment net assets to consolidated net assets follows (in millions):

	Years ended December 31,		
	2006	2005	2004
Total assets of reportable segments	\$ 6,892	\$ 5,642	\$ 4,521
Non-reportable segments	640	573	724
Unallocated amounts:			
Current assets (1)	3,422	2,682	2,171
Investments (2)	765	531	433
Property, net (3)	794	836	886
Other non-current assets (4)	552	943	1,035
Total assets	\$ 13,065	\$ 11,207	\$ 9,770

- (1) Includes current corporate assets, primarily cash, short-term investments and deferred taxes.
- (2) Represents corporate investments in affiliated companies, at both cost and equity (primarily Dow Corning Corporation).
- (3) Represents corporate property not specifically identifiable to an operating segment.
- (4) Includes non-current corporate assets, pension assets and deferred taxes.
