RELIABILITY INCORPORATED  
NOTES TO UNAUDITED FINANCIAL STATEMENTS  
September 30, 2013

1. OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Operations and Liquidity

The Company was incorporated under the laws of the State of Texas in 1953, but the principal business of the Company, as described in this report, started in 1971, but was closed down in 2007. The Company had two wholly owned subsidiaries, Reliability Singapore, Pte Ltd. and Reliability Contractors of Florida, neither of which is now operating. The Company has no further operating activities and is now a shell company.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. However, the Company has no further operating activities. There can be no assurances that the Company will be able to successfully complete a merger or acquisition or be able to maintain sufficient liquidity to continue to seek a merger or acquisition, in which case the Company might be forced to liquidate or seek protection under the Federal bankruptcy statutes, or both.

The accompanying financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classifications of liabilities that may result from the possible inability of the Company to continue as a going concern.

Pursuant to an agreement dated as of June 14, 2013, the Company relinquished its former ticker symbol (REAL) to an unrelated third party for consideration of \$15,000 that was recorded as other income in the quarter ended June 30, 2013. We are now quoted on the OTCQB marketplace under the symbol "RLBY".

Basis of presentation

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. Operating results for the interim periods ended September 30, 2013 are not necessarily indicative of the results that may be expected for the year ending December 31, 2013.

For further information, refer to the financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2012.

Accounting Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires that management make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

Cash Equivalents

For the purposes of the statements of cash flows, the Company considers all highly liquid cash investments that mature in three months or less when purchased, to be cash equivalents. Cash equivalents are stated at cost, which approximates fair value.

RELIABILITY INCORPORATED  
NOTES TO UNAUDITED FINANCIAL STATEMENTS  
September 30, 2013

#### Income Taxes

Income taxes are provided under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The Company establishes valuation allowances when the realization of specific deferred tax assets is subject to significant uncertainty. The Company has recorded no tax benefits on its operating losses, as the losses will have to be carried forward and realization of any benefit is uncertain.

#### Earnings Per Share

Basic earnings (loss) per share is computed by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the entity. Since the exercise price of the Company's outstanding stock options exceeded the average market price of its common shares during the periods presented, the options would have been anti-dilutive and were not considered in these calculations.

## 2. INCOME TAXES

The Company has substantial U.S. net operating loss carryforwards that will expire in 2023 through 2030. These carryforwards are subject to certain limitations on annual utilization and in the event of a change in ownership, as defined by tax law. See Note 2 to the Company's financial statements in its Form 10-K for the year ended December 31, 2012.

The Company's income tax returns remain subject to examination for the years 2009 through 2012 for federal and state purposes.

## 3. STOCK OPTION PLAN

Under the Company's Amended and Restated 1997 Stock Option Plan (Option Plan), no further option grants are allowed after February 26, 2007, but options theretofore granted remain in effect until satisfied or terminated pursuant to the Option Plan.

At December 31, 2006, all options were fully vested; thus no further stock option expense has been recorded related to the Option Plan. The weighted-average remaining contractual term, as of December 31, 2012, was 3.80 years for outstanding and exercisable options. There were no options exercised and none that expired or were canceled during the years ended December 31, 2012 and 2011 or during the quarter ended September 30, 2013. As of September 30, 2013 and December 31, 2012, there were 370,000 options outstanding under the Company's Stock Option Plan which are exercisable at a weighted average price of \$.21 until July 18, 2016, when they expire.

Mr. Eberwein is an accredited investor, as defined under Rule 501 of the Securities Act. None of the securities issued are convertible.

In addition, as set forth in the Stock Purchase Agreement, Mr. Gottlieb forgave funds in the amount of \$10,000 previously loaned or advanced to the Company, which loans and advances remained outstanding as of the date of the Stock Purchase Agreement.

As a result of the transactions above, a change of control of the Company occurred. For additional detail please refer to the Form 8-K filed on October 3, 2013 in connection with such change of control transaction (the "October 8-K").

No other material subsequent events have occurred since September 30, 2013 that require recognition or disclosure in the financial statements.

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. In order to comply with the terms of the safe harbor, the Company notes that a variety of factors could cause the Company's actual results and experience to differ materially from the anticipated results or other expectations expressed in the Company's forward-looking statements. The Company's actual results could differ materially from those anticipated in these forward-looking statements, including those set forth elsewhere in this report. The Company assumes no obligation to update any such forward-looking statements.

CRITICAL ACCOUNTING POLICIES AND COMMENTS RELATED TO OPERATIONS

The Company has defined a critical accounting policy as one that is both important to the portrayal of the Company's financial condition and results of operations and requires the management of the Company to make difficult, subjective or complex judgments. Estimates and assumptions about future events and their effects cannot be perceived with certainty. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments. These estimates may change as new events occur, as more experience is acquired, as additional information is obtained and as the Company's operating environment changes. There have been no material changes or developments in the Company's evaluation of the accounting estimates and the underlying assumptions or methodologies that it believes to be Critical Accounting Policies and Estimates as disclosed in its Form 10-K for the year ended December 31, 2012.

Management's Discussion included in the Form 10-K for the year ended December 31, 2012 includes discussion of various factors related to the decline in the Company's revenues and items related to the Company's results of operations and liquidity. There have been no other significant changes in most of the factors discussed in the Form 10-K and many of the items discussed in the Form 10-K are relevant to 2013 operations; thus the reader of this report should read Management's Discussion included in Form 10-K for the year ended December 31, 2012.
