**GOL Completes US\$310 mm Facility  
for Pre-Delivery Payments on 21 Aircraft**

**São Paulo, October 15, 2007** - GOL Linhas Aéreas Inteligentes S.A. (NYSE: GOL and Bovespa: GOLL4), the parent company of Brazil's low-cost airlines GOL Transportes Aéreos S.A. and VRG Linhas Aéreas S.A., announces that its subsidiary, GOL Transportes Aéreos S.A., has concluded a committed aircraft pre-delivery payment ( PDP ) loan facility in the amount of US\$310 million for all 21 of its Boeing 737-800 Next Generation aircraft to be delivered in 2008 and 2009.

The facility, a clubbed financing which comprises eight banks, was led by Calyon and Citigroup. GOL Transportes Aéreos S.A. will take delivery of the first aircraft covered by the PDPs in July 2008, with five further aircraft delivered in 2008 and another 15 expected in 2009. Long-term financing will be provided by a combination of sale-leasebacks and long-term loans from financial institutions with support from the U.S Exim Bank.

We appreciate the support of these world-class financial institutions as we improve the liquidity and cost of our balance sheet, while at the same time providing us with additional financial flexibility," says Richard Lark, GOL's Chief Financial Officer. The 2008 and 2009 aircraft deliveries are an important part of the Company's strategy to lower operating costs and better serve the demand for safe, high quality air transportation service in Brazil and South America.

In October 2006, GOL increased the total number of aircraft on order with Boeing to 121 Next Generation 737-800 aircraft (87 firm orders and 34 options), making GOL's order the largest contract between Boeing and a Latin American company. GOL worked closely with Boeing to develop the 737-800 SFP (Short Field Performance) with short runway take-off and landing capabilities. The new aircraft are equipped with winglets, which reduce fuel consumption by approximately 3 percent. In addition to lowering operating costs, winglets provide better flight performance, the ability to operate longer non-stop flights, and reduced noise during take-off. The 737-800 is also larger than the 737-700 and can carry up to 30 percent more passengers.
