MANAGEMENT REPORT

On the first quarter, operating income (EBIT) reached R\$144 million, a 43% year-over-year improvement, with an operating margin of 5.8%.

This result was fueled by a new level of load factor, which reached a record 76%, which together with the continuing increase in yield, resulted in GOL's highest ever net revenue for the first-quarter of R\$2.5 billion, and R\$9.4 billion for the last twelve months.

In regard to the industry as a whole, demand for seats moved up 6.5% over 1Q13, while supply decreased by 0.8%. On the eve of Easter Holiday, GOL transported 140,990 passengers, a record for a single day.

With the objective to offer our passengers even more comfort, the Company announced the expansion of GOL+ to the domestic fleet, resulting in an even more pleasant flying experience of more space with extra leg room, as well as the special GOL+ Conforto seats, with an even greater 34 inches between seats. By the end of May, 80% of GOL's fleet will be equipped with the new configuration. The change is part of a process of standardization, operating efficiency gains and revenue generation.

In order to increase connectivity and become even more appealing, GOL announced new agreements with three leading international airlines that fly to Brazil: Air France-KLM, TAP and Aerolíneas Argentinas. In

the first quarter, it entered into a strategic commercial cooperation partnership with Air France-KLM along the lines of the highly successful agreement with Delta Airlines, including expanded codeshare, improved joint sales procedures, and more benefits for Customers through both Companies' frequent flyer programs. As part of this agreement, recently approved without restrictions by Brazil's antitrust authority (CADE), Air France-KLM will invest US\$100 million in GOL, including the acquisition of around 1.5% of the Company's preferred capital stock for US\$52 million.

The Company also signed codeshare and frequent flyer program agreements with TAP, which are awaiting approval by the regulators and CADE. ANAC (the Civil Aviation Authority) and CADE also approved the codeshare agreement with Aerolíneas Argentinas.

In line with its 2014 guidance, the Company is maintaining its strategy of gradually increasing its international market presence and its foreign-currency denominated revenue. With this in mind, it has announced a series of initiatives,

including the re-start of flights between Santiago and São Paulo (Guarulhos airport), scheduled to begin in July, as well as new flights between Brazil and the United States from Campinas (Viracopos Airport) to Miami via Santo Domingo, in the Dominican Republic, where passengers will be able to connect to a flight to Orlando.

In April, GOL announced a new direct flight, once a week, between Fortaleza and Buenos Aires in association with the Ceará state government, which approved a 13 percentage point reduction in the ICMS tax (state VAT) on jet fuel for all domestic flights from Ceara for airlines operating regular international flights to the same destination. Fortaleza has now joined Brasilia, which reduced its own ICMS in 2013, in offering better conditions for the development of the airline industry and the local economy.

As for costs, the Company maintained its focus on controlling manageable expenses: LTM CASK moved up by 3% and quarterly CASK by 17% over 1Q13, primarily due to the average 18% period devaluation of the Real against Dollar, the all time high fuel price of R\$2.62/liter, and the upturn in Brazilian inflation. The workforce remained stable, closing at 16,157 positions, 1% down compared to 4Q13.

The Company ended the quarter with a cash position of R\$2.8 billion, or 30% of annual net revenue, while leverage closed at 6.5x, versus 27.9x at the end of 1Q13, due to the R\$1.3 billion increase in LTM EBITDAR to R\$1.7 billion, its highest ever figure, in line with continuous deleverage strategy.

In 2014, after 64 years, the World Cup returns to Brazil, the country of football. As a truly Brazilian company, GOL takes great pride in being the Brazilian team's official carrier. Throughout the last few months, the Company has been preparing to offer even better services. Our route network for the event has 974 extra flights or flight-time changes to serve the 12 host cities. Since the end of last year, we have been investing in a new visual identity in all the country's airports and adding three new languages to our electronic kiosks: English, Spanish and French.

We have also reformulated our website and mobile platform, which are now available in Portuguese, English and Spanish. Our employees have also undergone specific training for the event, including in foreign languages, in order to ensure better service for visitors. We will also be hiring additional staff and reallocating personnel among the bases in order to prioritize service in the host cities. In addition, four of our aircraft have received special paint work, once again symbolizing our commitment to the event. All these initiatives are designed to offer GOL's passengers the best World Cup while flying in Brazil.

Once again, GOL would like to thank its customers for their loyalty, its Team of Eagles for their commitment, and its investors for their confidence, all of which increasingly reinforces GOL's vision of being the best company to fly with, work for and invest in.

Conclusion on the individual interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual interim financial information included in the Interim Financial Information (ITR) referred to above is not prepared, in all material respects, in accordance with CPC 21 (R1) applicable to the preparation of Interim Financial Information (ITR) and presented in accordance with the standards issued by the CVM.

GOL LINHAS AÉREAS INTELIGENTES S.A.

NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE PERIOD ENDED ON MARCH 31, 2014

The Interim Financial Information as of March 31, 2014 were reviewed by Independent Auditors to the extent described in the Report on the Review of Interim Financial Information dated on May 13, 2014.

(In thousands of Brazilian Reais - R\$, except when indicated otherwise.)

IAS 34 requires the use of certain accounting estimates by Company's Management. The consolidated interim financial information - ITR was prepared based on historical cost, except for certain financial assets and liabilities, which are measured at fair value.

The interim financial information of the Parent Company was prepared in accordance with the technical pronouncement CPC 21 (R1) which comprises the interim financial reporting.

The individual interim financial information, prepared for statutory purposes, measures investments in subsidiaries by the equity method, according to Brazilian legislation. Thus, the individual interim financial information is not in accordance with IFRS, which requires the valuation of these investments on the individual financial statements of the Parent Company at fair value or cost.

These Individual and Consolidated Interim Financial Information do not include all the information and disclosure items required in the consolidated annual financial statements and, therefore, it must be read along with the consolidated financial statements referring to the year ended December 31, 2013 filed on March 25, 2014, which were prepared in accordance with Brazilian accounting practices and IFRS. There were no changes in accounting policies adopted during the period from December 31, 2013 to March 31, 2014.

The shareholder's equity individual and consolidated quarterly financial information do not present differences on its composition, except in respect of the non-controlling interest in Smiles S.A., highlighted in the consolidated equity.

3. Seasonality

The Company expects that revenues and profits from its flights reach the highest levels during the summer and winter vacation periods, in January and July, respectively, and during the last two weeks of December, during the season holidays. Given the high portion of fixed costs, this seasonality tends to result in fluctuations in our operational

quarter-on-quarter income.

4. Cash and cash equivalents

	Individual		Consolidated	
	03/31/2014	12/31/2013	03/31/2014	12/31/2013
Cash and bank deposits (a)	259,874	320,276	697,723	667,985

	838,974	343,793	2,125,550	1,635,647

As of March 31, 2014, the cash equivalents were represented by private bonds (Bank Deposit Certificates – “CDBs”), government bonds and fixed-income funds, paid at post fixed rates ranging between 95.0% and 103.0% of the Interbank Deposit Certificate Rate (“CDI”).

(a) On January 23, 2014, the Venezuela government announced that the airline companies could request the repatriation of their resources generated by sales in Venezuela through CADIVI ("Comisión de Administración de Divisas") by the official rate of BS 6.30/US\$1.00. This rate experienced a level increase and the rate as of March 31, 2014 was BS 10.70/US\$1.00. The exchange variation control in Venezuela is determined on a weekly basis by its Federal Reserve (SICAD). Given this increase, the Company recorded a currency depreciation justified by the intention to repatriate its values. The total amount of the cash in Venezuela as of March 31, 2014 is R\$350,585 (R\$195,017 as of December 31, 2013), of which the portion accrued as an impairment from the Venezuelan Bolívar related to U.S. Dollar was R\$75,937 with counterpart on "Foreign exchange variation " (see Note 28). The register is subject to future changes due to the doubtful economic scenario on Venezuela, with the possibility of new limitations in the cash flows by CADIVI or sanctions by the government that may difficult the cash repatriation. Accordingly, considering the intention of the Company to perform the repatriation of the amount involved, the recoverable balance of Venezuela's cash as of March 31, 2014 is R\$274,648, recorded as "Cash and bank deposits ."

The Company and its direct subsidiary VRG and indirect subsidiary Webjet have tax losses and negative basis of social contribution in the calculation of taxable income, to compensate with 30% of annual taxable profits, without time limit for expiration, in the following amounts:

As of March 31, 2014, the tax credits arising from tax loss carryforwards and negative social contribution basis were valued based on the reasonably expected generation of future taxable income of the parent Company and its

subsidiaries, subject to legal limitations.

Estimated recovery of deferred tax assets was based on taxable income projections, considering the assumptions above and several financial assumptions, business and internal and external factors considered at the end of the period. Consequently, the estimates may be subject to not materialize in the future, due to the uncertainties inherent in these estimates.

The Company and its subsidiaries hold the total amount of R\$1,297,966, of which R\$80,208 is related to its parent Company GLAI and R\$1,217,758 is related to its subsidiaries VRG and Webjet.

(In thousands of Brazilian Reais - R\$, except when indicated otherwise.)

The forecasts of the parent Company GLAI and the indirect subsidiary Webjet did not present sufficient taxable profits to be realized over the next 10 years and, as a result, a provision was recorded for unrealizable loss tax credits of R\$26,522 for GLAI and R\$248,313 for Webjet. For the subsidiary VRG such forecasts indicate sufficient taxable profits for such to be realized in the next 10 years. However, due to tax losses presented during the recent years, the Administration conducted a sensitivity analysis on the forecast results, and considering significant changes in the macroeconomic scenario, registered the deferred tax assets on tax losses based on the lowest value obtained in this analysis. As a result, the Company and its subsidiaries recognized an impairment provision of R\$433,543 in its subsidiary VRG.

The Company's management considers that the deferred assets recognized as of March 31, 2014 arising from temporary differences will be realized when the provisions are settled and the related future events are resolved.

GLAI

a) The Stock Option Plan

The Company's Board of Directors, within the scope of their functions and in conformity with the Company's stock options plan, approved the grant of preferred stock options to the Company's management and executives. For grants through 2009, the options vest at a rate of 20% per year, and can be exercised within up to 10 years after the grant date.

Due to changes in the Company's Stock Options Plan approved by the Company's Annual Shareholders' Meeting held on April 30, 2010, for plans granted beginning 2010, 20% of the options become vested as from the first year, an additional 30% as from the second, and the remaining 50% as from the third year. The options under these plans may also be exercised within 10 years after the grant date.

The fair value of stock options was estimated on the grant date using the Black-Scholes option pricing model. The expected volatility of the options is based on the historical volatility of 252 working days of the Company's shares traded on the stock exchange.

The date of the Board of Directors' meetings and the assumptions utilized in the Black-Scholes option pricing model are as follows:

Year of the option	Date of the board meeting	Total options granted	Stock Options Plan		Estimate volatility of share price	Expected dividend	Risk-free rate return	Length of the option (in years)

b) Restricted shares

The Restricted Shares Plan was approved on the Extraordinary General Meeting held on October 19, 2012, and the first grants were approved at the Board of Directors' meeting on November 13, 2012. The transfer of the restricted shares will occur after 3 years from the grant date, with an acquisition condition that the beneficiary maintains its employment relationship up to the end of this period.

The fair value of the restricted shares granted was estimated on the grant date using the Black-Scholes pricing model, and the assumptions are listed below:

Year of the share	Date of the Board Meeting	Restricted shares			
		Total shares granted	Fair value of the share at grant date (In Reais)	Estimate volatility of share price	Risk-free rate of return
2012	11/13/2012	589,304	9.70	52.25%	9.0%
2013	05/13/2013	712,632	12.76	46.91%	7.5%

Until March 31, 2014 there were no restricted shares transferred to the plan's participants.

Smiles

On February 22, 2013, the Smiles' Board of Directors, during the Extraordinary General Meeting, approved the grant of a stock options plan, which consists of an additional payment to the Company's management and executives. On August 08, 2013, the Company's Board of Directors approved the grant of 1,058,043 shares related to the stock option plan, of which 260,020 shares were granted to employees of its affiliate VRG.

On February 4, 2014, the Smiles S.A.' Board of Directors approved the issue of 1,150,000 (one million, one hundred and fifty thousand) new stock options at a price of R\$31.28 per share, under the terms of the Stock Options Plan previously established for its management and participants which feature under the terms of the plan. Until March 31, 2014, there was no grant approval of these shares to its beneficiaries.

The fair value of stock options was estimated on the grant date using the Black-Scholes option pricing model. The expected volatility of Smiles shares is based on the historical volatility of 252 working days of the Bovespa index, as the trading of Smiles shares started on April 29, 2013.

The other assumptions utilized in the Black-Scholes option pricing model are as follows:

Year of the share	Date of the Board Meeting	Total shares granted	Restricted Stock Plan		Estimate volatility of share price	Expected dividend	Risk-free rate of return	Length of the option (in years)
			Exercise price of the option (In Reais)	The fair value of the option at grant date (In Reais)				
2013	08/08/2013	1,058,043	21.70	4.12 (a)	36.35%	6.96%	7.40%	10

(a) The fair value calculated for the 2013 plan was R\$4.84, R\$4.20, R\$3.72 and R\$3.72 for the respective periods of vesting (2013, 2014, 2015 and 2016).

For the period ended on March 31, 2014, the Company recorded in shareholders' equity a result from share-based payments in the amount of R\$1,592 related to Company's shareholders and R\$156 related to its non-controlling shareholders (R\$1,504 for the three-month period ended March 31, 2013) for the plans presented above, being the corresponding entry in the income statement result classified as personnel costs.

14. Investments

Due to the changes in Law 6,404/76 introduced by Law 11,638/07, investments in foreign subsidiaries, GAC, Finance and Gol LuxCo were considered as an extension of the controller GLAI and consolidated on a line by line basis, only the subsidiaries Smiles, VRG and Gol Dominicana were considered as an investment.

On February 21, 2014, the subsidiary Smiles S.A., after the CADE's approval, closure the acquisition process of 25% of its affiliate Netpoint Fidelidade S.A. (for further information, see Note 1). Therefore, a consolidated investment balance was generated by this transaction.

15. Losses per share

Although there are differences between common and preferred shares in terms of voting rights and priority in case of liquidation, the Company's preferred shares are not entitled to receive any fixed dividends. Rather, preferred shareholders are entitled to receive dividends per share in the same amount of the dividends per share paid to common shareholders. Therefore, the Company understands that, substantially, there is no difference between preferred shares and common shares, and, accordingly, basic and diluted earnings or losses per share are calculated equally for both shares.

Consequently, basic earnings or loss per share are computed by dividing income or losses by the weighted average number of all classes of shares outstanding during the period. Diluted earnings or loss per share are computed including stock options granted to key management and employees using the treasury stock method when the effect is dilutive. The antidilutive effect of all potential shares is disregarded in calculating diluted earnings or loss per share.

(a) Smiles holds a Stock Options Plan for its employees. These equity instruments have a dilutive effect on earnings per share of this subsidiary, impacting, therefore, the loss considered on the basis calculation of Company's diluted

result per share, in accordance with CPC 41.

Diluted earnings (losses) per share are calculated by the weighted average number of outstanding shares, in order to assume the conversion of all potential dilutive shares.

Diluted earnings or loss per share are calculated based on considering the instruments that may have a potential dilutive effect in the future, such as share-based payment transactions, described in Note 13. However, due to the losses reported for the period ended on March 31, 2014, these instruments issued have anti-dilutive effect and, therefore, are not considered in the total number of outstanding shares.

Adoption of the Provisional Measure 627/13

The provisional measure nº. 627/2013 and the Instruction of Brazil's Internal Revenue Office Measure nº. 1,397, both from 2013, resulted in significant changes to the rules of federal taxes. The measure will be effective starting in the year 2015, with the option of anticipated adoption in 2014.

In order to ensure tax neutrality established in Law no. 11,941, from 2009, since dividend payments occurred until the date of the law's publication, the Company and its subsidiary Smiles S.A.'s managements will chose the early adoption of the PM, as soon as the procedures for this adoption become available. Thus, it will be guaranteed the usage of the equity measured in accordance with the Law no. 6404 from 1976, for purposes of calculating the limits as per laws related to the tax effects of interest on capital.

Regarding the dividends paid or to be paid after this measure publication related to profit or loss for the year 2013, the Smiles S.A.'s management concluded that the values would be higher than amounts calculated in accordance with accounting practices of December 31, 2007 and, therefore, the excess portion of the amount will be subject to the withholding tax on payments to beneficiaries classified as individual and resident and/or domiciled abroad.

The Company and its subsidiary Smiles S.A.'s managements are still analyzing the potential effects of the new standard. The VRG's management is analyzing the potential effects of the new standard and awaits its conversion into Law to decide on measures for its group companies as of 2014.

The Company and its subsidiaries are challenging in the court the ICMS levied on aircraft and engines imported under aircraft lease transactions without purchase options in transactions carried out with lessors' registered in foreign countries. The Company and its subsidiaries' management understand that these transactions represent simple leases in view of the contractual obligation to return the assets that are the subject matter of the contract.

Management believes that there is no evidence of goods circulation and so, there are no legal events to generate the ICMS taxation. Based on the legal counsel opinion and supported by similar lawsuits with favorable decisions to taxpayers by the Superior Court of Justice (STJ) and Supreme Federal Court (STF) in the second quarter of 2007, the Company understands that the likelihood of loss is remote, and thus did not recognize provisions for these amounts. As of March 31, 2014 the estimated aggregated amount of the ongoing lawsuits related to the non-levy of ICMS tax on said imports is R\$234,046 (R\$229,450 as of December 31, 2013) adjusted for inflation, not including late payment charges.

In the individual interim financial information - ITR of the subsidiary Smiles S.A., which represents the segment "Smiles Loyalty Program" and in the information provided to the relevant decision makers, the revenue recognition occurs upon redemption of the miles by the participants. Under the perspective of "Smiles Loyalty Program" segment, this measurement is appropriate given that this is when the revenue recognition cycle is complete. At this point, Smiles has transferred to its suppliers the obligation to provide services or deliver products to its customers.

However, from a consolidated perspective, the revenue recognition cycle related to miles exchanged for flight tickets is only complete when the passengers are effectively transported. Therefore, for purposes of reconciliation with the income/loss, consolidated assets and liabilities, as well as for purposes of equity method of accounting and for consolidation purposes, the Company performed, besides eliminations entries, consolidating adjustments to adjust the accounting practices related to Smiles' revenues. In this case, under the perspective of the consolidated financial statements, the miles that were used to redeem airline tickets are only recognized as revenue when passengers are transported, in accordance with accounting practices and policies adopted by the Company.

The Company performs payments related to aircraft acquisition through its own funds, short and long-term debt, cash provided by operating activities, short and medium-term line of credit and supplier financing.

The Company leases its entire aircraft fleet through a combination of operational and financial leases. As of March 31, 2014, the total fleet leased was comprised of 148 aircraft, excluding 2 aircraft under operating leases in final phase of return and 5 aircraft from Webjet's fleet, of which 102 were under operating leases and 46 were recorded as financial leases. b) Sale-leaseback transactions

During the period ended March 31, 2014, the Company recorded the amount of R\$3,802 and R\$2,672, as “Other payables” in current and noncurrent liabilities, respectively (R\$5,247 and R\$3,118 as of December 31, 2013), related to the gains from sale-leaseback transactions performed by its subsidiary GAC Inc. in 2006 of 8 aircraft 737-800 Next Generation. These gains were deferred and are being amortized proportionally to the payments of the operational lease agreements, of which 1 aircraft have the agreement maturity of 91 months, 5 aircraft have contract term of 96 months and 2 aircraft have contract term of 120 months.

On the same date, the Company held the amount of R\$8,650 and R\$24,456 as “Prepaid expenses” in current and noncurrent assets, respectively (R\$8,923 and R\$26,526 as of December 31, 2013), related to the losses on sale-leaseback transactions performed by its subsidiary GAC Inc. of 9 aircraft. During the years 2007, 2008 and 2009 these losses were deferred, and are being amortized proportionally to the payments of the operational lease agreements over the contract term of 120 months.

Additionally, during the period ended on March 31, 2014, the Company recorded a gain of R\$48,801 resulting from 6 aircraft received during the period (5 aircraft received during the period ended on March 31, 2013) that were used as sale-leaseback transactions and resulted in operating leases. Given that the gains and losses from sale-leaseback transactions will not be offset against future lease payments and were negotiated at fair value, such gain was recognized directly in profit or loss.

31. Financial instruments

The Company and its subsidiaries have financial asset and financial liability transactions, which consist in part of derivative financial instruments.

The financial derivative instruments are used to hedge against the inherent risks related to the Company operations. The Company and its subsidiaries consider as most relevant risks: fuel price, exchange rate and interest rate. These risks are mitigated by using exchange swap derivatives, futures and options contracts based on oil, U.S. Dollar and interest markets. The contracts may be held by means of exclusive investment funds, as described in the Risk Management Policy of the Company.

Management follows a documented guideline when managing its financial instruments, set out in its Risk Management Policy, which is periodically revised by the Risk Committee (CPR), and approved by the Board of Directors. The Committee sets the guidelines and limits, monitors controls, including the mathematical models adopted for a continuous monitoring of exposures and possible financial effects and also prevents the execution of speculative financial instruments transactions.

The gains or losses on these transactions and the application of risk management controls are part of the Committee's monitoring and have been satisfactory when considering the objectives proposed.

The fair values of financial assets and liabilities of the Company and its subsidiaries are established through information available in the market and according to valuation methodologies.

Most of the derivative financial instruments are engaged with the purpose of hedging against fuel and exchange rates risks based on scenarios with low probability of occurrence, and thus have lower costs compared to other instruments with higher probability of occurrence. Consequently, despite the high correlation between the hedged item and the derivative financial instruments contracted, a significant portion of the transactions presents ineffective positions for hedge accounting purposes upon settlement, which are presented in the tables below.

The description of the consolidated account balances and the categories of financial instruments included in the balance sheet as of March 31, 2014 and December 31, 2013 is as follows:

- (c) The Company manages its investments as held for trading to pay its operational expenses;
- (d) Excludes the escrow deposits, as mentioned in Note 11.

On March 31, 2014 the Company had no financial assets available for sale.

Risks

The operating activities expose the Company and its subsidiaries to the following financial risks: market (especially currency risk, interest rate risk, and fuel price risk), credit and liquidity risks.

The Company's risk management policy aims at mitigating potential adverse effects from transactions that could affect its financial performance.

The Company's and its subsidiaries' decisions on the exposure portion to be hedged against financial risk, both for fuel consumption and currency and interest rate exposures, consider the risks and hedge costs.

The Company and its subsidiaries do not usually contract hedging instruments for its total exposure, and thus they are subject to the portion of risks resulting from market fluctuations. The portion of exposure to be hedged is determined and reviewed at least yearly in compliance with the strategies determined in the Risk Policies Committees.

NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE PERIOD ENDED ON MARCH 31, 2014

The Interim Financial Information as of March 31, 2014 were reviewed by Independent Auditors to the extent described in the Report on the Review of Interim Financial Information dated on May 13, 2014.

(In thousands of Brazilian Reais - R\$, except when indicated otherwise.)

The relevant information on the main risks affecting the Company's and its subsidiaries' operation is as follows:

a) Fuel Price Risk

As of March 31, 2014, fuel expenses accounted for 44% of the costs and operating expenses of the Company and its subsidiaries. The aircraft fuel price fluctuates both in the short and in the long term, in line with crude oil and oil byproduct price fluctuations.

To mitigate the risk of fuel price, the Company and its subsidiaries contract derivative financial instruments referenced mainly to crude oil and, eventually, to their derivatives, also contracted, directly with the local supplier, are future fuel deliveries to aircraft at predetermined prices.

b) Exchange Rate Risk

The exchange rate risk derives from the possibility of unfavorable fluctuation of foreign currencies to which the Company's liabilities or cash flows are exposed. The exposure of the Company's and its subsidiaries' assets and liabilities to the foreign currency risk mainly derives from foreign currency-denominated leases and financing.

The Company's and its subsidiaries' revenues are mainly denominated in Brazilian Reais, except for a small portion in U.S. Dollar, Argentinean pesos, Bolivian bolivianos, Chilean peso, Colombian peso, Paraguay Guarani, Uruguayan peso, Venezuela bolivar etc.

To mitigate the risk of exchange rate, the Company and its subsidiaries hold derivative financial instruments that are referenced to the U.S. Dollar.

NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE PERIOD ENDED ON MARCH 31, 2014

The Interim Financial Information as of March 31, 2014 were reviewed by Independent Auditors to the extent described in the Report on the Review of Interim Financial Information dated on May 13, 2014.

(In thousands of Brazilian Reais - R\$, except when indicated otherwise.)

c) Interest rate risk

The Company and its subsidiaries are exposed to fluctuations in domestic and foreign interest rates, substantially the CDI and Libor, respectively. The highest exposure is related to lease transactions, indexed to the Libor at the date that the aircraft are received.

To mitigate the interest rate risk the Company and its subsidiaries hold swap instruments.

d) Credit risk

The credit risk is inherent in the Company's and its subsidiaries' operating and financing activities, mainly represented by trade receivables, cash and cash equivalents, including bank deposits.

The trade receivable credit risk consists of amounts falling due from the largest credit card companies, with credit risk better than or equal to those of the Company and its subsidiaries, and receivables from travel agencies, installment sales, and government sales, with a small portion exposed to risks from individuals or other entities.

As defined in the Risk Management Policy, the Company and its subsidiaries are required to evaluate the counterparty risks in financial instruments and diversify the exposure. Financial instruments are contracted with counterparties rated at least as investment grade by S&P and Moody's. The financial instruments are mostly contracted on commodities and futures exchanges (BM&FBOVESPA and NYMEX), which substantially mitigate the credit risk, derivative transactions contracted on the OTC market (OTC) have counterparts with a minimum rating of "investment grade". The Company's and its subsidiaries' Risk Management Policy establishes a maximum limit of 20% per counterparty for short-term investments.

e) Liquidity risk

Liquidity risk takes on two distinct forms: market and cash flow liquidity risk. The first is related to current market prices and varies in accordance with the types of assets and the markets where they are traded. Cash flow liquidity risk, however, is related to difficulties in meeting the contracted operating obligations at the agreed dates.

As a way of managing the liquidity risk, the Company and its subsidiaries invest its funds in liquid assets (governmental bonds, CDBs, and investment funds with daily liquidity), and the Cash Management Policy establishes that the Company's and its subsidiaries' weighted average debt maturity should be higher than the weighted average maturity of the investment portfolio. As of March 31, 2014, the weighted average maturity of the Company's and its subsidiaries' financial assets was 18 days and of financial debt, excluding perpetual bonds, was 4.3 years.

f) Capital management

The Interim Financial Information as of March 31, 2014 were reviewed by Independent Auditors to the extent described in the Report on the Review of Interim Financial Information dated on May 13, 2014.

(In thousands of Brazilian Reais - R\$, except when indicated otherwise.)

(*) Classified as "Rights with derivative operations" if the amount results in an asset or "Obligation with derivative operations" if the amount results in a liability. Includes R\$3,251 of assets related to hedges held in an exclusive fund. Comprises R\$863 of receivable transaction as of March 31, 2014.

The Company and its subsidiaries adopt hedge accounting. On March 31, 2014, the derivatives contracted to hedge interest rate risk and fuel price risk were classified as "cash flow hedge", according to the parameters described in the Brazilian accounting standard CPC 38, and 40, technical guidance OCPC03 and International Accounting Standard IAS 39.

Classification of derivatives financial instruments

i. Cash flow hedges

The Company and its subsidiaries use cash flow hedges to hedge against future revenue or expense fluctuations resulting from changes in the exchange rates, interest rates or fuel price, and accounts for actual fluctuations of the fair value of derivative financial instruments in shareholders' equity until the hedged revenue or expense is recognized.

The Company and its subsidiaries estimates the effectiveness based on statistical correlation methods and the ratio between gains and losses on the financial instruments used as hedge, and the cost and expense fluctuation of the hedged items.

The instruments are considered as effective when the fluctuation in the value of derivatives offsets between 80 % to 125% the impact of the price fluctuation on the cost or expense of the hedged item.

The balance of the actual fluctuations in the fair values of the derivatives designated as cash flow hedges is transferred from shareholders' equity to profit or loss for the period in which the hedged costs or expenses impacts profit or loss.

Gains or losses on effective cash flow hedges are recorded in balancing accounts of the hedged expenses, by reducing or increasing the operating cost, and the ineffective gains or losses are recognized as financial income or financial expenses for the period.

ii. Derivative financial instruments not designated as hedge

The Company and its subsidiaries hold derivative financial instruments that are not formally designated for hedge accounting. This occurs when transactions are in the short term and the control and disclosure complexity make them unfeasible, or when the change in a derivative's fair value must be recognized in profit or loss for the same period of the effects of the hedged risk.

iii. Derivative equity instruments

In April 2013, the Company entered into an investment agreement with General Atlantic Service Company LLC. ("G.A.") that established the grant by the Company of an option to purchase its Smiles shares enabling the secondary acquisition by G.A. (or other person designated by it), of Smiles S.A. shares held by the Company. These stock options were exercised on February 27, 2014 and, during the period ended March 31, 2014, the Company registered a loss in derivative instruments on the financial result in the amount of R\$15,901 related to the derivative market pricing. On the same date, the Company performed a reversal of this derivative obligation to the equity in the amount of R\$46,216 as described on Note 1.

Hedge activities**a) Fuel hedge**

Due to the low liquidity of jet fuel derivatives traded in commodities exchanges, the Company and its subsidiaries contracts crude oil derivatives (WTI, Brent) and its byproducts (Heating Oil) to hedge against fluctuations in jet fuel prices. Historically, oil prices are highly correlated with jet fuel prices.

As of March 31, 2014, the Company and its subsidiaries have contracts of options and collar, Brent and WTI, designated as a “cash flow hedge accounting” of fuel.

Oil derivative contracts, designated as fuel hedges of the Company and its subsidiaries, are summarized below:

IFRS

Besides the sensitivity analysis based on the above mentioned standards, the Company and its subsidiaries also analyze the impact of the financial instrument quotation fluctuation on the Company's and its subsidiaries' profit or loss and shareholders' equity considering:

- Increase and decrease by 10 percentage points in fuel prices, by keeping all the other variables constant;
- Increase and decrease by 10 percentage points in Dollar exchange rate, by keeping all the other variables constant;
- Increase and decrease by 10 percentage points in Libor interest rate, by keeping all the other variables constant;

The sensitivity analysis includes only relevant monetary items that are material for the risks above mentioned. A positive number indicates an increase in income and equity when the risk appreciates by 10%.

Measurement of the fair value of financial instruments

In order to comply with the disclosure requirements for financial instruments measured at fair value, the Company and its subsidiaries must classify its instruments in Levels 1 to 3, based on observable fair value levels:

- a) Level 1: Fair value measurements are calculated based on quoted prices (without adjustment) in active market or identical liabilities;

b) Level 2: Fair value measurements are calculated based on other variables besides quoted prices included in Level 1, that are observable for the asset or liability directly (such as prices) or indirectly (derived from prices); and

c) Level 3: Fair value measurements are calculated based on valuation methods that include the asset or liability but that are not based on observable market variables (unobservable inputs).

The following table shows a summary of the Company's and its subsidiaries' financial instruments measured at fair value, including their related classifications of the valuation method, as of March 31, 2014 and December 31, 2013:
