**América Móvil's second quarter of
2016 financial and operating report**

Mexico City, July 28, 2016 - América Móvil, S.A.B. de C.V. ("América Móvil") [BMV: AMX] [NYSE: AMX] [NASDAQ: AMOV] [LATIBEX: XAMXL], announced today its financial and operating results for the second quarter of 2016.

We ended June with 364.5 million access lines, 0.9% less than a year before, after net disconnections of 1.6 million prepaid subs in the quarter, most of them in Brazil. This figure includes 282.9 million wireless subscribers, 33.7 million landlines, 26.0 million broadband accesses and 22.0 million PayTV units.

On the mobile platform, the postpaid base was up 5.9% and the prepaid one was down 4.2%. On the fixed line platform, RGUs were up 3.6% year-on-year, driven by broadband accesses that rose 8.9%.

Second quarter revenues rose 6.1% from the year-earlier quarter to 233 billion pesos, with service revenues increasing 3.2%, reflecting the appreciation of several currencies vs. the Mexican peso. At constant exchange rates, service revenues were down 2.1% year-on-year.

EBITDA of 61 billion pesos declined 10.7% in Mexican pesos terms relative to the prior year, 13.2% at constant exchange rates.

We obtained a net profit of 7.7 billion pesos in the second quarter, down 45.2% from the year before. It was equivalent to 0.12 pesos per share or 0.13 dollars per ADR.

Our net debt stood at 608 billion pesos. In dollar terms, our net debt declined by 1.7 billion dollars at nominal exchange rates and by 1.2 billion in flow terms.

Our cash flow from operations, the distributions obtained from our shareholdings—particularly those in KPN—and the unwinding of currency swaps allowed us to finance capital expenditures amounting to 57.2 billion pesos, share

buybacks of 5.2 billion pesos and acquisitions of equity interests of 3.4 billion pesos. In addition, they allowed us to further reduce our net debt.

Relevant Events

On May 9th, our Peruvian subsidiary entered into an agreement to acquire 100% of the capital stock of Olo del Perú and TVS Wireless S.A.C., both of them companies that provide telecommunication services throughout Peru and hold spectrum in the 2.5 GHz band.

On May 26th, our Peruvian subsidiary acquired in a public auction 30 MHz of spectrum in the 700MHz frequency. The cost of the spectrum was 306 million dollars.

On June 9th, our subsidiary Telmex was notified of a resolution issued by the Instituto Federal de Telecomunicaciones related to the internet service UnoTV, by which the IFT resolved that the access to UnoTV's content through Telmex's network did not breach the prohibition to distribute television signals under its concession title.

On July 28th, in line with our commitments under the Syndicate Agreement entered into with ÖBIB in representation of the Republic of Austria, we sold to the market a part of our stake in Telekom Austria, bringing it down by 7.8% to 51.9%.

Access Lines

We ended June with 364.5 million access lines, 0.9% less than a year before, after mobile disconnections of 1.6 million prepaid subs, most of them in Brazil. Altogether we had 282.9 million wireless subscribers, 33.7 million landlines, 26.0 million broadband accesses and 22.0 million PayTV units.

Wireless Subscribers

Our wireless subscriber base ended June with 282.9 million clients, down 2.1% from a year before. Net disconnections topped one million subs, the majority of which took place in Brazil.

(1) Includes total subscribers of all companies in which América Móvil holds an economic interest; does not consider the date in which the companies started being consolidated.

Our postpaid segment continued delivering growth as it registered an annual increase of 5.9% after net additions of 559 thousand in the quarter, including 188 thousand in Mexico and 145 thousand in Colombia. Mexico's subscriber postpaid base increased 10.4%, Ecuador's 8.9%, Brazil's 6.2% and Peru's 5.0%.

We registered net disconnections on the prepaid platform of 1.6 million, taking our subscriber base down 4.2% to 218.5 million clients. Amongst the disconnections, 1.1 million came from Brazil and 575 thousand from Mexico.

Overall, the best performing operations in terms of subscriber growth were Chile and the Central American block, registering increases of 7.8% and 7.2%, respectively. In Argentina our client base was up 5.5% over the year and in the Caribbean 3.5%.

Fixed Revenue Generating Units

We had 81.7 million fixed-line RGUs at the end of June, 3.6% more than a year before. The growth was driven by broadband accesses that expanded 8.9% over the year. The number of landlines was somewhat higher than a year before, mostly as a result of the improvements in Colombia. As regards PayTV, at the end of June we were just shy of 22 million units.

In Brazil we had 36.8 million fixed accesses, 0.8% more than a year before, with broadband units rising 7.1%. In Mexico we ended the quarter with 21.7 million fixed RGUs including nearly nine million fixed-broadband connections, 3.6% more than a year before. Colombia and the Central American block were our fastest growing operations, with accesses increasing 8.5% and 8.8%, respectively over the year.

América Móvil Consolidated Results

The second quarter saw a recovery of several currencies vis-a-vis the U.S. dollar as the likelihood of new interest rates increases by the Fed appeared to wane. Some indicators pointed towards a stabilization of the main financial and economic variables in China, which had previously been a matter of concern for the international capital markets. In Latin America both the Brazilian real and the Colombian peso continued their come-back, but the Mexican peso weakened further.

Revenues rose 6.1% from the year-earlier quarter to 233 billion pesos, with service revenues increasing 3.2% as mobile revenues increased 5.5% and fixed-line revenues 7.4%. These increases reflect the appreciation of several currencies vs. the Mexican peso in the period, particularly the Brazilian real and the Colombian peso. At constant exchange rates service revenues were down 2.1% year-on-year.

Substantially all our operations maintained their growth trends in local currency terms. In Mexico, however, we saw a step down in revenues brought about mostly by more aggressive commercial plans in the pre-paid segment as a greater part of our subscribers moved towards unlimited call plans.

Our EBITDA amounted to 61 billion pesos, in what represented a 10.7% decline in Mexican pesos terms in relation to the prior year—13.2% at constant exchange rates—mostly on account of the above-mentioned revenue losses in Mexico, bringing about a 29.1% reduction in operating profits. These, in turn, brought about a 55% decrease in the provisions for income and deferred taxes in relation to the year-earlier quarter.

We obtained a net profit of 7.7 billion pesos in the second quarter, down 45.2% from the year before. It was equivalent to 0.12 pesos per share or 0.13 dollars per ADR.

Our net debt, 608 billion pesos, was up from 582 billion pesos in December because of exchange rate variations: In dollar terms our gross debt actually came down by 1.9 billion dollars in the first six months at nominal exchange rates, and by 1.5 billion dollars at constant exchange rates, while our *net* debt declined by 1.7 billion dollars at nominal exchange rates and by 1.2 billion in flow terms.

Mexico

Our wireless subscriber base ended June with 73.1 million clients, 0.7% more than a year before. We had net disconnections of 387 thousand in the second quarter, which resulted from cutting-off 575 thousand prepaid clients that were not generating traffic, while adding 188 thousand postpaid subs. Our postpaid base rose 10.4% year-on-year to 11.6 million subscribers.

On the fixed-line platform we ended the quarter with 21.7 million RGUs including 12.8 million landlines and 8.9 million broadband connections. The growth of broadband accesses, 3.6%, more than compensated for voice-line disconnections, leading to a 0.5% increase in RGUs over the year. Our not being allowed yet to provide triple-play bundles has limited our capacity to expand in the fixed-line platform.

Service revenues declined 10.7% year-on-year to 49.4 billion pesos, mostly because of continued reductions in prepaid revenues as we moved a greater part of our subscribers over to the new unlimited plans that involve unlimited calling (and more data usage) for the duration of the cards. Prepaid cards come in different denominations and their life is a function of the given denomination.

Mobile service revenues were down 16.9% over the prior year, mainly on account of reduced prepaid revenues. On the fixed-line platform service revenues declined 1.5%.

In the prepaid segment, our customers are strongly increasing voice and data traffic per subscriber –up to six times more– and paying less than a year ago. This presents us with an important opportunity to significantly expand the services we provide our customers, leveraging the unmatched quality, coverage and capacity of our network.

Equipment revenues increased 23% reflecting both the depreciation of the currency and the fact that subsidies have been reduced.

The Mexican mobile market has become very competitive as other operators try to buy market share –even losing money in the process, after asymmetric subsidies– with plans that are substantially cheaper than the ones they offer in

their home market. They have led the market in the direction of unlimited usage of some services at a low cost.

Argentina, Paraguay and Uruguay

At the end of June we had nearly 23 million wireless subscribers in Argentina, Paraguay and Uruguay; 6.1% more than last year, having added 91 thousand new clients in the second quarter. We also had 588 thousand fixed RGUs.

Second quarter revenues totaled 9.4 billion Argentinean pesos, exceeding by 40.1% those of the prior year, with wireless service revenues rising 32.5% on the back of data revenues that jumped 53.2%. Data services now account for 56.5% of wireless service revenues. Albeit from a small base, fixed-line revenues climbed 56.7% to reach 667 million Argentinean pesos.

EBITDA of 3.1 billion Argentinean pesos was up 33.7% year-on-year, with the EBITDA margin declining slightly to 33.3%.

We formally launched our 4G-LTE services in Paraguay in the second quarter. This will strengthen our position in market, as we will improve the customer experience both in terms of quality and speed.

Brazil

We ended the second quarter with just over 101 million accesses in Brazil, including 64.3 million wireless subscribers and, on the fixed-line platform, 36.8 million RGUs, slightly more than in 2015.

In the postpaid segment we registered a 6.2% expansion of the base year-on-year after net additions of 82 thousand subs in the quarter. In the prepaid segment we continued to disconnect clients that were not generating traffic, with 1.1 million net disconnections in the quarter. On the fixed-line platform broadband connections expanded 7.1% over the year.

Second quarter revenues of 9.1 billion reais remained practically unchanged as compared to the year-earlier quarter. On the fixed division, we saw improvements in all revenue lines, 9.6% on broadband, 4.4% on PayTV and 1.6% in fixed voice. On the mobile platform the decline of voice revenues—part of it coming from the reduction of interconnection rates—is diminishing, but mobile data services fell on account of new promotions.

The period's EBITDA of 2.4 billion reais was 4.5% lower than a year before, with the EBITDA margin coming down 1.2 percentage points to 26.2% mainly as a result of increases in maintenance costs, some of them dollar-linked, and

past due accounts that have risen on the back of the economic recession afflicting the country. Energy costs have also gone up considerably, almost 45% over the year.

We are ready to welcome all the athletes and visitors to the Rio Olympic games. We executed an important project to be the official telecom service provider for the games and all the venues are now connected to Embratel's backbone, which has been enhanced in Rio and surrounding areas to provide very high quality services.

Chile

Our wireless subscriber base ended June with 6.5 million clients, 7.8% more than a year before. Fixed RGUs increased 4.4% relative to 2015, for the most part on account of a 14.5% expansion of broadband accesses.

The quarter's revenues, 186 billion Chilean pesos, were down 3.8% year-on-year. The decline in revenues is linked to a 44.1% drop in equipment revenues, since service revenues actually rose 4.3% over the period, with wireless data revenues rising 10.1%. Fixed-line service revenues, that already account for almost 40% of revenues, expanded 4.4% in the period.

EBITDA came in at 13.9 billion Chilean pesos, 35.6% more than in the year-earlier quarter. The EBITDA margin was 7.5% in the second quarter, 2.2 points higher than a year before.

Colombia

We gained 145 thousand postpaid clients in the second quarter—the highest number in at least ten quarters—and disconnected 225 thousand prepaid subscribers to close the quarter with 28.3 million clients. Our postpaid base, 6.1 million at the end of June, rose 4.7% from the year-earlier quarter. On the fixed-line front, RGUs were up 8.5% over the year to 6.1 million accesses, with voice lines and broadband accesses exhibiting double digit growth rates.

Second quarter revenues of 2.7 trillion Colombian pesos were down 3.9% year-on-year, with service revenues falling 4.3% and equipment revenues declining 2.0%. Fixed-line revenues increased 13% in the period—they now represent 34.8% of our service revenues in the country—on the back of triple play bundles. Wireless service revenues on their part were down 10.5%, as voice prices continued to fall. Wireless data revenues were up 17.2% and already account for nearly half of our wireless service revenues

EBITDA of 957 billion Colombian pesos was 11.4% lower than in 2015 following the revenue contraction. The EBITDA margin for the quarter was 35.6%, three points below that of the prior year.

Ecuador

At the end of June we had 8.9 million wireless subscribers in Ecuador, having added 199 thousand subscribers in the quarter.

Our second quarter revenues totaled 364 million dollars. Service revenues declined 11.9% year on year, partly as a result of new commercial promotions but also on account of a new 15% tax levied on telecommunication services that took effect beginning May 1st, as well as an increase in VAT from 12% to 14%, that have increased the cost of telecom services to our clients and has thereby reduced their consumption.

EBITDA came in at 152 million dollars and was down 12.4% from the prior year, with the EBITDA representing 41.6% of revenues. We made some extraordinary payments of 16 million dollars in the second quarter, all of them tax-related, in absence of which we would have had an expansion of the EBITDA margin.

Peru

We added 23 thousand postpaid subscribers and disconnected 139 thousand prepaid clients to finish the second quarter with nearly 12 million subscribers, 3.4% below the prior year. On the fixed platform we had 1.5 million RGUs, up 14.4% year-on-year.

Our second quarter revenues, 1.3 billion soles, were down 2.0% year on year with service revenues declining 2.6% in the period as voice revenues continued their trend downwards. Wireless data revenues were up 7.4% but failed to compensate for the reduction in voice revenues. On the fixed-line segment, we saw service revenues increase 9.8%, from a small base, driven by broadband and PayTV, whose revenues climbed 12.1% and 14.6%, respectively.

EBITDA dropped 36.2% to 210 million soles, or 16.5% of revenues. The contraction of EBITDA stems from an 80% increase in net interconnection costs, as well as higher subscriber acquisition and retention costs.

In May we acquired in a public auction 30 MHz of spectrum in the 700MHz frequency. The cost of the spectrum was 306 million dollars. Our spectrum holdings will increase with the acquisition of Olo Peru, in the process of being approved by the relevant authorities. This will enable us to improve our 4G-LTE offerings in terms of the overall experience of our subscribers including more competitive prices.

Central America

Our operations in Central America finished June with 15.8 million wireless subscribers, 7.2% more than a year before, with our postpaid base growing almost twice as much as the prepaid one. We added 189 thousand new wireless subscribers in the quarter, primarily from Guatemala and Nicaragua. Fixed RGUs expanded 8.8% compared to a year before and reached 5.2 million. Broadband accesses jumped 18.1% year-on-year, while PayTV units were up 5.7%.

Revenues totaled 564 million dollars and were 5.0% higher than a year before. Service revenues rose 5.1% on the back of data that expanded 15.4% on the mobile platform and 12.7% on the fixed one. PayTV revenues exceeded by

8.3% those of 2015. Voice revenues declined on all platforms, 1.1% on mobile and 7.2% on the fixed.

EBITDA for the quarter came in at 195 million dollars, 7.0% above the precedent year, and was equivalent to 34.6% of revenues.

Caribbean

Our operations in the islands ended the quarter with 5.4 million wireless subscribers, up 3.5% with the postpaid base rising 8.6%. On the fixed division, we registered an increase of 7.0% in the total number of RGUs with PayTV units growing 18.5% and broadband accesses 9.6%.

The quarter's revenues were up 6.8% mostly on account of higher equipment revenues. Service revenues declined slightly, 1.6%, as voice revenues continued to go down on both the mobile and fixed-line platforms.

EBITDA of 157 million dollars was 2.5% lower than a year before. The EBITDA margin stood at 31.6% of revenues.

United States

In the second quarter we added 110 thousand new clients in the U.S.—with June being the strongest month in the past two years—to finish the quarter with 25.3 million subscribers.

The quarter's revenues stood at 1.8 billion dollars and were 5.0% greater than those of a year before, with equipment revenues rising 95.1% and service revenues declining 1.1%. The surge in subscriber growth had a significant impact on EBITDA, which at 77 million dollars was down 61% on subscriber acquisition costs.

Telekom Austria Group

Altogether, our operations in Europe ended June with 20.5 million wireless subscribers, 2.4% higher than in 2015 reflecting the acquisitions in Eastern Europe, in absence of which our subscriber base would have been down 0.4%. Our postpaid base was up 4.2% relative to last year's—2.1% organically—after net additions of 37 thousand in the quarter, most of which came from Austria. We also had 5.6 million fixed RGUs, 24.1% more than in the prior year, 2.7% adjusting for acquisitions.

Total revenues topped one billion euros in the second quarter, reflecting a slight decline of 0.2% year-on-year in a proforma basis. Total reported revenues in Austria rose by 0.4% on the back of higher equipment revenues and other operating income which compensated for the losses in service revenues that derive from the elimination of roaming, beginning April 30th. In Eastern Europe, we saw pressure in revenues stemming from Belarus (mostly FX linked), Macedonia and Slovenia.

The group's EBITDA rose 0.7% to reach 329 million euros in the second quarter due to cost controls and important reductions in restructuring expenses. The EBITDA margin for the period stood at 31.9% of revenues.
