On a regular basis, we evaluate these estimates. These estimates are based on management's historical industry experience and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

Overview

We commenced our principal operations on September 23, 2005, when we issued the initial 486,000 shares of common stock in our initial public offering. Prior to such date, we were considered a development stage company.

We derive a substantial portion of our revenue from our rental income. As a result, our operating results and cash flows are primarily influenced by rental income from our commercial properties and interest expense on our property acquisition indebtedness. Rental income accounted for approximately 99.9% of total revenue during each of the three-month and nine-month periods ended September 30, 2007, respectively. As approximately 99% of the rentable square feet at our properties is under lease, with an average remaining lease term of approximately 13.1 years, we believe our exposure to short-term changes in commercial rental rates on our portfolio is substantially mitigated. As of September 30, 2007, the debt leverage ratio of our portfolio, which is the ratio of mortgage notes payable to total gross real estate assets, was approximately 54%. As discussed in Note 6 to our condensed consolidated unaudited financial statements, we obtained a note payable in connection with the mortgages receivable described in Note 5 to our condensed consolidated unaudited financial statements, of approximately \$36.3 million, subject to variable interest rates. We intend to manage our interest rate risk on our existing real estate portfolio by repaying approximately \$36.3 million, or 100% of our short-term variable rate debt, at or prior to its maturity on March 31, 2008. We expect to fund the repayments with net proceeds from the sale of our common stock. Additionally, as we continue to raise capital from the sale of our common stock in our follow-on offering and invest the proceeds in commercial real estate, we will be subject to changes in real estate prices and changes in interest rates on new indebtedness used to acquire the properties. We may manage our risk of changes in real estate prices on future property acquisitions by entering into purchase agreements and loan commitments simultaneously so that our operating yield is generally determinable at the time we purchase the property, by contracting with developers for future delivery of properties, or by entering into sale-leaseback transactions.

The current mortgage lending and interest rate environment for real estate in general is uncertain. We may experience more stringent lending criteria, which may affect our ability to finance certain property acquisitions. Additionally, for properties in which we are able to obtain acquisition financing, the interest rates on such loans may be unacceptable. We expect to manage the current mortgage lending environment by utilizing fixed rate loans if the terms are acceptable, short-term variable rate loans, assuming existing mortgage loans in connection with property acquisitions, or we may enter into interest rate lock agreements. We may also acquire a much larger percentage of our properties for cash without financing. If we are unable to obtain suitable financing for future acquisitions or we acquire a larger percentage of our properties for cash without financing, our results of operations may be adversely affected. Additionally, if we are unable to identify suitable properties at appropriate prices in the current credit environment, we may have a larger amount of uninvested cash, which may adversely affect our results of operations. We will continue to evaluate alternatives in the current market, including purchasing or originating debt backed by real estate, which could produce attractive yields in the current market environment.

Edgar Filing: Cole Credit Property Trust II Inc - Form 424B3

As of September 30, 2007, we owned 157 single-tenant, freestanding retail properties, 60 single-tenant freestanding commercial properties, and 13 multi-tenant retail properties, all of which were approximately 99% leased. During the three-month period ended September 30, 2007, we acquired 25 single-tenant, freestanding retail properties, 21 single-tenant, freestanding commercial properties and two multi-tenant retail properties. During the nine-month period ended September 30, 2007, we acquired 78 single-tenant, freestanding retail properties, 52 single-tenant, freestanding commercial properties and nine multi-tenant retail properties (See Notes 3 and 4 to the condensed consolidated financial statements included elsewhere in this prospectus supplement). Our results of operations are not indicative of those expected in future periods as we expect that rental income, operating expenses, asset management fees, depreciation expense, interest expense, and net income will each increase in the future as we acquire additional properties and as our current properties are owned for an entire period.

Results of Operations

Three Months Ended September 30, 2007 Compared to the Three Months Ended September 30, 2006

As of September 30, 2007, we owned 230 commercial properties compared to 67 commercial properties at September 30, 2006, which were approximately 99% leased in the aggregate. Accordingly, our results of operations for the three-month period ended September 30, 2007 as compared to the three-month period ended September 30, 2006 reflect significant increases in all categories.

Revenue. Revenue increased approximately \$21.1 million, or 435%, to approximately \$26.0 million for the three-month period ended September 30, 2007, compared to approximately \$4.9 million for the three-month period ended September 30, 2006.

Rental income increased approximately \$18.8 million, or approximately 415%, to approximately \$23.3 million for the three-month period ended September 30, 2007, compared to approximately \$4.5 million for the three-month period ended September 30, 2006. Additionally, tenant reimbursement income increased approximately \$1.8 million, or approximately 555%, to approximately \$2.2 million for the three-month period ended September 30, 2007, compared to approximately \$329,000 for the three-month period ended September 30, 2006. The increases in rental income and tenant reimbursement income were primarily due to the acquisition of 163 new properties after September 30, 2006. Our revenue primarily consists of rental income from net leased commercial properties, which accounted for approximately 90% and approximately 93% of total revenues during the three-month period ended September 30, 2007 and 2006, respectively.

Earned income from direct financing leases was approximately \$481,000 for the three-month period ended September 30, 2007, with no earned income from direct financing leases recorded for the three-month period ended September 30, 2006. See Note 3 to our condensed consolidated unaudited financial statements.

Interest income on mortgages receivable was approximately \$35,000 for the three-month period ended September 30, 2007, with no mortgages receivable interest income recorded for the three-month period ended September 30, 2006. We purchased approximately \$49.5 million of mortgages receivable during the three-month period ended September 30, 2007, as discussed in Note 5 to our condensed consolidated unaudited financial statements.

General and Administrative Expenses. General and administrative expenses increased approximately \$179,000, or approximately 67%, to approximately \$444,000 for the three-month period ended September 30, 2007, compared to approximately \$265,000 for the three-month period ended September 30, 2006. The increase was primarily due to increases in state franchise and income taxes due to the increase in the number of properties owned, from 67 properties at September 30, 2006 to 230 properties at September 30, 2007. The primary general and administrative expense items are legal and accounting fees, organizational costs, state franchise and income taxes, and other licenses and fees.

Property Operating Expenses. Property operating expenses increased approximately \$2.2 million, or approximately 660%, to approximately \$2.5 million for the three-month period ended September 30, 2007, compared to approximately \$333,000 for the three-month period ended September 30, 2006. The increase was primarily due to the ownership of more properties during the three-month period ended September 30, 2007 than in the three-month period ended September 30, 2006 for which we initially pay certain operating expenses and are reimbursed by the tenant in accordance with the respective lease agreements, including 10 additional multi-tenant shopping centers. At September 30, 2007, we owned 13 multi-tenant shopping centers compared to three at September 30, 2006. The primary property operating expense items are repairs and maintenance, property taxes, bad debt expense and insurance.

Property and Asset Management Fees. Pursuant to the advisory agreement with our advisor, we are required to pay to our advisor a monthly asset management fee equal to one-twelfth of 0.25% of the aggregate asset value of our properties determined in accordance with the advisory agreement as of the last day of the preceding month. Pursuant to the property management agreement with our affiliated property manager, during the three-month period ended September 30, 2007, we paid our property manager a property management and leasing fee in an amount equal to 2% of gross revenues. In accordance with the property management agreement, we may pay Cole Realty (i) up to 2.0% of gross revenues from our single-tenant properties and (ii) up to 4% of gross revenues from our multi-tenant properties, as determined pursuant to the agreement, less all payments to third-party management subcontractors.

Property and asset management fees increased approximately \$1.0 million, or approximately 424%, to approximately \$1.2 million for the three-month period ended September 30, 2007, compared to approximately \$238,000 for the three-month period ended September 30, 2006. Property management fees increased approximately \$397,000 to approximately \$485,000 for the three-month period ended September 30, 2007 from approximately \$88,000 for the three-month period ended September 30, 2006. The increase in property management fees was primarily due to an increase in rental income of approximately \$18.8 million for the three-month period ended September 30, 2007 from approximately \$4.5 million for the three-month period ended September 30, 2006. Asset management fees increased approximately \$613,000 to approximately \$763,000 for the three-month period ended September 30, 2007 from approximately \$150,000 for the three-month period ended September 30, 2006. The increase in asset management fees was

Edgar Filing: Cole Credit Property Trust II Inc - Form 424B3

primarily due to an increase in the average aggregate book value of properties owned to approximately \$1.3 billion at September 30, 2007 from approximately \$276.3 million at September 30, 2006.

Depreciation and Amortization Expenses. Depreciation and amortization expenses increased approximately \$7.0 million, or approximately 441%, to approximately \$8.6 million for the three-month period ended September 30, 2007, compared to approximately \$1.6 million for the three-month period ended September 30, 2006. The increase was primarily due to an increase in the average aggregate book value of properties owned to approximately \$1.3 billion at September 30, 2007 from approximately \$276.3 million at September 30, 2006. The increase in aggregate book value is due to the acquisition of 163 new properties subsequent to September 30, 2006.

Interest and Other Income. Interest and other income increased approximately \$890,000, or approximately 953%, to approximately \$983,000 during the three-month period ended September 30, 2007, compared to approximately \$93,000 for the three-month period ended September 30, 2006. Interest income increased approximately \$412,000, or approximately 441%, to approximately \$505,000 during the three-month period ended September 30, 2007, compared to approximately \$93,000 for the three-month period ended September 30, 2006. The increase was primarily due to higher uninvested cash during the three-month period ended September 30, 2007, compared to the three-month period ended September 30, 2006 due to increased proceeds from our initial public offering and follow-on offering. Cash and cash equivalents was approximately \$21.4 million at September 30, 2007, compared to approximately \$9.2 million at September 30, 2006. Other income consists of the net gain on disposal of rate lock, approximately \$478,000 for the three-month period ended September 30, 2007. No other income was recorded for the three-month period ended September 30, 2006. On August 10, 2007, we elected to terminate our rate lock agreement with Bear Stearns, as discussed in Note 8 to our condensed consolidated unaudited financial statements.

Interest Expense. Interest expense increased approximately \$9.4 million, or approximately 439%, to approximately \$11.5 million for the three-month period ended September 30, 2007, compared to approximately \$2.1 million during the three-month period ended September 30, 2006. The increase was primarily due to an increase in the average mortgage notes payable outstanding during the three-month period ended September 30, 2007 to approximately \$741.8 million from approximately \$148.6 million during the three-month period ended September 30, 2006. The increase in average mortgage notes payable was primarily due to the acquisition of 163 new properties subsequent to September 30, 2006.

Our property acquisitions during the three-month period ended September 30, 2007 were financed in part with short-term and long-term notes payable as discussed in Note 6 to our condensed consolidated unaudited financial statements. Our interest expense in future periods will vary based on our level of future borrowings, which will depend on the level of proceeds raised in our follow-on offering, the cost of borrowings, and the opportunity to acquire real estate assets which meet our investment objectives.

Income from Discontinued Operations. Income from discontinued operations increased approximately \$167,000, or approximately 106%, to approximately \$323,000 for the three-month period ended September 30, 2007, compared to approximately \$156,000 for the three month period ended September 30, 2006. The increase was due to a decrease in interest expense of approximately \$176,000, as we repaid the mortgage loan payable for the property classified as held for sale during the three-month period ended March 31, 2007. Income from discontinued operations relates to real estate assets held for sale as discussed in Note 7 to our condensed consolidated unaudited financial statements.

Nine Months Ended September 30, 2007 Compared to the Nine Months Ended September 30, 2006

Funds From Operations

We believe that funds from operations ("FFO") is a beneficial indicator of the performance of a REIT. Because FFO calculations exclude such factors as depreciation and amortization of real estate assets and gains or losses from sales of operating real estate assets (which can vary among owners of identical assets in similar conditions based on historical cost accounting and useful-life estimates), they facilitate comparisons of operating performance between periods and between other REITs. Our management believes that accounting for real estate assets in accordance with generally accepted accounting principles in the United States ("GAAP") implicitly assumes that the value of real estate assets diminishes predictability over time. Since real estate values have historically risen or fallen with market conditions, many industry investors and analysts have considered the presentation of operating results for real estate companies that use historical cost accounting to be insufficient by themselves. As a result, we believe that the use of FFO, together with the required GAAP presentations, provide a more complete understanding of our performance relative to our competitors and a more informed and appropriate basis on which to make decisions involving operating, financing, and investing activities. Other REITs may not define FFO in accordance with the current National Association of Real Estate Investment Trust's ("NAREIT") definition or may interpret the current NAREIT definition differently than we do.

FFO is a non-GAAP financial measure and does not represent net income as defined by GAAP. Net income as defined by GAAP is the most relevant measure in determining our operating performance because FFO includes adjustments that investors may deem subjective, such as adding back expenses such as depreciation and amortization. Accordingly, FFO should not be considered as an alternative to net income as an indicator of our operating performance.

Edgar Filing: Cole Credit Property Trust II Inc - Form 424B3

Our calculation of FFO is presented in the following table for the periods ended as indicated:

| | Three Months Ended | | Nine Months Ended | |
|-------------------------------------|---------------------------|---------------------------|---------------------------|---------------------------|
| | September 30, 2007 | September 30, 2006 | September 30, 2007 | September 30, 2006 |
| Net income | \$ 2,997,849 | \$ 548,942 | \$ 1,315,797 | \$ 184,507 |
| Add: | | | | |
| Depreciation of real estate assets | 5,842,703 | 1,206,287 | 13,302,288 | 2,651,860 |
| Amortization of lease related costs | 2,927,130 | 576,695 | 6,348,399 | 1,239,242 |
| Impairment on real estate assets | — | — | 5,400,00 | — |
| FFO | \$ 11,767,682 | \$ 2,331,924 | \$ 26,366,484 | \$ 4,075,609 |

Set forth below is additional information (often considered in conjunction with FFO) that may be helpful in assessing our operating results:

- In order to recognize revenues on a straight-line basis over the terms of the respective leases, we recognized additional revenue by straight-lining rental revenue of approximately \$1.2 million and approximately \$2.7 million during the three-month and nine-month periods ended September 30, 2007, respectively, and approximately \$217,000 and approximately \$521,000 during the three-month and nine-month periods ended September 30, 2006, respectively.
- Net income includes net gain on disposal of rate lock of approximately \$478,000 for each of the three-month and nine-month periods ended September 30, 2007. No gain on disposal of rate lock was recorded for the three-month or nine-month periods ended September 30, 2006. See note 8 to our condensed consolidated unaudited financial statements accompanying this prospectus supplement.
- Net income includes income from discontinued operations of approximately \$323,000 and approximately \$929,000 during the three-month and nine-month periods ended September 30, 2007, respectively, and approximately \$156,000 and approximately \$265,000 during the three-month and nine-month periods ended September 30, 2006, respectively. See Note 7 to our condensed consolidated unaudited financial statements.
- Amortization of deferred financing costs totaled approximately \$479,000 and approximately \$1.1 million during the three-month and nine-month periods ended September 30, 2007, respectively, and approximately \$161,000 and approximately \$343,000 during the three-month and nine-month periods ended September 30, 2006, respectively.

Liquidity and Capital Resources

We expect to continue to raise capital through the sale of our common stock and to utilize the net proceeds from the sale of our common stock and proceeds from secured or unsecured financings to complete future property acquisitions. As of September 30, 2007, we had received and accepted subscriptions for an aggregate of 76,675,319 shares of common stock in our initial public offering and follow-on offering for gross proceeds of approximately \$765.6 million.

Short-term Liquidity and Capital Resources

We expect to meet our short-term liquidity requirements through net cash provided by property operations and proceeds from the sale of our common stock. We expect our operating cash flows to increase as additional properties are added to our portfolio. We expect that approximately 88.6% of the gross proceeds from the sale of our common stock will be invested in real estate, approximately 9.1% will be used to pay sales commissions, dealer manager fees and offering and organizational costs, with the remaining 2.3% used to pay acquisition and advisory fees and acquisition expenses. The offering and organizational costs associated with the sale of our common stock are initially paid by our advisor and reimbursed by us up to 1.5% of the capital raised by us in connection with our offering of shares of common stock. As of September 30, 2007, Cole Advisors II had paid approximately \$7.4 million of offering and organization costs since the inception of our initial public offering and we had reimbursed our advisor for approximately \$7.4 million of such costs, of which approximately \$7,200 was expensed as organizational costs.

Subsequent to September 30, 2007, we completed the acquisition of nine single-tenant properties and one multi-tenant property for an aggregate purchase price of approximately \$135.8 million, exclusive of closing costs. The acquisitions were funded with proceeds from our initial public offering and follow-on offering and approximately \$68.4 million in aggregate proceeds from three loans.

On October 2, 2007, our board of directors declared a daily distribution of \$0.00191781 per share for stockholders of record as of the close of business on each day of the period commencing on October 1, 2007 and ending on December 31, 2007. The payment date for each record date in October 2007 will be in November 2007, the payment date for each record date in November 2007 will be in December 2007, and the payment date for each record date in December 2007 will be in January 2008.

Long-term Liquidity and Capital Resources

We expect to meet our long-term liquidity requirements through proceeds from the sale of our common stock, proceeds from secured or unsecured financings from banks and other lenders, the selective and strategic sale of properties and net cash flows from operations. We expect that our primary uses of capital will be for property acquisitions, for the payment of tenant improvements, for the payment of offering-related costs, for the payment of operating expenses, including interest expense on any outstanding indebtedness, and for the payment of distributions to our stockholders.

We expect that substantially all net cash generated from operations will be used to pay distributions to our stockholders after certain capital expenditures, including tenant improvements and leasing commissions, are paid with respect to the properties; however, we may use other sources to fund distributions as necessary. To the extent that cash flows from operations are lower due to fewer properties being acquired or lower returns on the properties, distributions paid to our stockholders may be lower. We expect that

7

Edgar Filing: Cole Credit Property Trust II Inc - Form 424B3

substantially all net cash resulting from equity or debt financing will be used to fund acquisitions, certain capital expenditures identified at acquisition, repayments of outstanding debt, or distributions to our stockholders.

As of September 30, 2007, we had cash and cash equivalents of approximately \$21.4 million, which we expect to be used primarily to invest in additional real estate, pay operating expenses and pay stockholder distributions.

Our contractual obligations as of September 30, 2007, are as follows:

| | Payments due by period | | | | |
|--|-------------------------|----------------------|-----------------------|-----------------------|-----------------------|
| | Total | Less Than 1 Year | 1-3 Years | 4-5 Years | More Than 5 Years |
| Principal payments – fixed rate debt | \$ 806,616,598 | \$ 9,831,739 | \$ 52,488,521 | \$ 48,726,531 | \$ 695,569,807 |
| Interest payments – fixed rate debt | 407,375,464 | 48,024,096 | 136,593,652 | 82,713,631 | 140,044,085 |
| Principal payments – variable rate debt | 36,290,338 | 36,290,338 | — | — | — |
| Interest payments – variable rate debt (1) | 1,301,475 | 1,301,475 | — | — | — |

(1) A rate of 7.09% was used to calculate the variable debt payment obligations in future periods. This was the rate effective as of September 30, 2007.

Cash Flow Analysis

Nine Months Ended September 30, 2007 Compared to the Nine Months Ended September 30, 2006

Operating Activities

Net cash provided by operating activities increased approximately \$23.9 million, or approximately 591%, to approximately \$28.0 million for the nine-month period ended September 30, 2007, compared to approximately \$4.1 million for the nine-month period ended September 30, 2006. The increase was primarily due to increases in depreciation and amortization expenses totaling approximately \$16.0 million, an impairment of real estate assets of \$5.4 million, an increase in net income of approximately \$1.1 million and an increase in accounts payable and accrued expenses of approximately \$3.8 million, offset by an increase in rents and tenant receivables of approximately \$2.9 million for the nine-month period ended September 30, 2007. See “Results of Operations” for a more complete discussion of the factors impacting our operating performance.

Investing Activities

Net cash used in investing activities increased approximately \$819.8 million, or approximately 406%, to approximately \$1.0 billion for the nine-month period ended September 30, 2007, compared to approximately \$202.1 million for the nine-month period ended September 30, 2006. The increase was primarily due to the acquisition of 139 real estate properties during the nine-month period ended September 30, 2007, compared to the acquisition of 53 properties during the nine-month period ended September 30, 2006 and an approximately \$2.9 million increase in restricted cash due to an increase in cash held in escrow pending the issuance of shares to investors.

Financing Activities

Net cash provided by financing activities increased approximately \$775.0 million, or approximately 382%, to approximately \$977.7 million for the nine-month period ended September 30, 2007, compared to approximately \$202.7 million for the nine-month period ended September 30, 2006. The increase was primarily due to an increase in proceeds from the issuance of common stock in our initial public offering and our follow-on offering of approximately \$287.2 million, a decrease in repayment of mortgages and notes payable of approximately \$5.1 million, and an increase in proceeds from the issuance of mortgage and affiliate notes of approximately \$522.5 million, offset by an increase in offering costs on the issuance of common stock of approximately \$26.4 million and an increase in deferred financing costs paid of approximately \$12.9 million. The increase in proceeds from issuance of mortgage and affiliate notes payable was due to the issuance of 99 new mortgage notes during the nine-month period ended September 30, 2007, compared to the issuance of 44 new mortgage notes during the nine-month period ended September 30, 2006.

Election as a REIT

We elected to be taxed as a REIT under Sections 856 through 860 of the Internal Revenue Code commencing with our taxable year ended December 31, 2005. If we qualify for taxation as a REIT, we generally will not be subject to federal corporate income tax to the extent we distribute our REIT taxable income to our stockholders, and so long as we distribute at least 90% of our REIT taxable income. REITs are subject to a number of other organizational and operational requirements. Even if we qualify for taxation as a REIT, we may be subject to certain state and local taxes on our income and property, and federal income and excise taxes on our undistributed income. We believe we are organized and operating in such a manner as to qualify to be taxed as a REIT for the taxable year ended December 31, 2007.

Inflation

The real estate market has not been affected significantly by inflation in the past several years due to the relatively low inflation rate. However, in the event inflation does become a factor, the leases on the real estate we may acquire may not include provisions that would protect us from the impact of inflation.

Critical Accounting Policies and Estimates

Our accounting policies have been established to conform to GAAP. The preparation of financial statements in conformity with GAAP requires us to use judgment in the application of accounting policies, including making estimates and assumptions. These judgments affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the reporting periods. If our judgment or interpretation of the facts and circumstances relating to the various transactions had been different, it is possible that different accounting policies would have been applied, thus resulting in a different presentation of the financial statements. Additionally, other companies may utilize different estimates that may impact comparability of our results of operations to those of companies in similar businesses. We consider our critical accounting policies to be the following:

- Investment in Real Estate Assets;
- Allocation of Purchase Price of Acquired Assets;
- Valuation of Real Estate Assets;
- Revenue Recognition, and
- Income Taxes.

A complete description of such policies and our considerations is contained in our Annual Report on Form 10-K for the year ended December 31, 2006. The information included in this prospectus supplement should be read in conjunction with our audited consolidated financial statements as of and for the year ended December 31, 2006, and related notes thereto.

The Registration Statement also covered up to 5,000,000 shares available pursuant to a distribution reinvestment plan (the “DRIP”) under which our stockholders may elect to have their distributions reinvested in additional shares of the Company’s common stock at the greater of \$9.50 per share or 95% of the estimated value of a share of common stock. On November 13, 2006, the Company increased the aggregate amount of the public offering to 49,390,000 shares for the primary offering and 5,952,000 shares pursuant to the DRIP in a related Registration Statement on Form S-11. Note 2 — Summary of Significant Accounting Policies

Basis of Presentation

The condensed consolidated financial statements of the Company have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission, including the instructions to Form 10-Q and Article 10 of Regulation S-X, and do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, the statements for the unaudited interim periods presented include all adjustments, which are of a normal and recurring nature, necessary to present a fair presentation of the results for such periods. Results for these interim periods are not necessarily indicative of full year results. The information included herein should be read in conjunction with the Company's audited consolidated financial statements as of and for the year ended December 31, 2006, and related notes thereto.

Certain reclassifications of prior period amounts, relating to the discontinued operations presentation in the statement of income as required by Statement of Financial Accounting Standards ("SFAS") No. 144, "*Accounting for the Impairment or Disposal of Long-Lived Assets*," have been made in the financial statements in order to conform to the 2007 presentation.

Principles of Consolidation and Basis of Presentation

The accompanying condensed consolidated unaudited financial statements include the accounts of the Company and its wholly-owned subsidiaries. All inter-company accounts and transactions have been eliminated in consolidation.

Restricted Cash and Escrowed Investor Proceeds

The Company is currently engaged in a public offering of its common stock. Included in restricted cash and escrowed investor proceeds is approximately \$12.8 million and approximately \$5.7 million of offering proceeds for which shares of common stock had not been issued as of September 30, 2007 and December 31, 2006, respectively.

Redeemable Common Stock

Edgar Filing: Cole Credit Property Trust II Inc - Form 424B3

The Company's share redemption program provides that all redemptions during any calendar year, including those upon death or qualifying disability, are limited to those that can be funded with proceeds from the Company's DRIP. In accordance with Accounting Series Release No. 268, "*Presentation in Financial Statements of Redeemable Preferred Stock*," the Company accounts for proceeds received from its DRIP as redeemable common stock, outside of permanent equity. As of September 30, 2007 and December 31, 2006, the Company had issued approximately 1.7 million and approximately 371,000 shares of common stock under the DRIP, respectively, for cumulative proceeds of approximately \$16.3 million and approximately \$3.5 million under its DRIP, respectively, which have been recorded as redeemable common stock in the respective condensed consolidated balance sheets. As of September 30, 2007, the Company had redeemed approximately 132,000 shares of common stock for a cost of approximately \$1.3 million. As of December 31, 2006, no shares of common stock had been redeemed by the Company.

Reportable Segments

The Financial Accounting Standards Board ("FASB") issued SFAS No. 131, "*Disclosures about Segments of an Enterprise and Related Information*," which establishes standards for reporting financial and descriptive information about an enterprise's reportable segments. The Company determined that it has two operating segments, (i) commercial properties and (ii) mortgage loans. Commercial properties consist of activities related to investing in real estate including retail, office, and distribution properties. The Company's commercial properties generate rental revenue and other income through the leasing of the properties, which comprised 99.9% and 100% of the Company's total consolidated revenues for each of the three-month and nine-month periods ended September 30, 2007 and 2006, respectively. Although the Company's commercial properties are geographically diversified throughout the United States, management evaluates operating performance on an individual property level, therefore the Company's properties have been aggregated into one reportable segment. In addition, the Company has not presented separate financial information for the investment in mortgages receivable because its results of operations are not material to the Company's consolidated financial statements as a whole. For each of the three-month and nine-month periods ended September 30, 2007, the interest income from investment in mortgages receivable accounted for 0.1% of the consolidated revenue. For the three-month and nine-month periods ended September 30, 2007 interest income from investment mortgages receivable accounted for 1% and 3% of consolidated net income, respectively. Mortgages receivable, net of related note payable accounted for less than 1% of consolidated assets as of September 30, 2007.

COLE CREDIT PROPERTY TRUST II, INC.

NOTES TO CONDENSED CONSOLIDATED UNAUDITED FINANCIAL STATEMENTS

September 30, 2007

Investment in Real Estate Assets

The Company continually monitors events and changes in circumstances that could indicate that the carrying amounts of its real estate and related intangible assets may not be recoverable. When indicators of potential impairment are present that indicate that the carrying amounts of real estate and related intangible assets may not be recoverable, the Company assesses the recoverability of the assets by determining whether the carrying value of the assets will be recovered through the undiscounted future operating cash flows expected from the use of the assets and their eventual disposition. In the event that such expected undiscounted future cash flows do not exceed the carrying value, the Company will adjust the real estate and related intangible assets to their fair value and recognize an impairment loss.

The Company has identified one property with impairment indicators for which the undiscounted future operating cash flows expected from the use of the property and related intangible assets and their eventual disposition was less than the carrying value of the assets. As a result, the Company reduced the carrying value of the real estate and related intangible assets to their estimated fair value and recorded an impairment loss of \$5.4 million during the nine-month period ended September 30, 2007. No additional impairment loss was recorded during the three-month period ended September 30, 2007. No impairment losses were recorded for the three-month and nine-month periods ended September 30, 2006.

Note 3 – Investment in Direct Financing Leases

The Company evaluates the leases associated with its real estate properties in accordance with SFAS No. 13, “Accounting for Leases.” For the real estate property leases classified as direct financing leases, the building portion of the property leases are accounted for as direct financing leases while the land portion of these leases are accounted for as operating leases. For the direct financing leases, we record an asset (net investment) representing the aggregate future minimum lease payments, estimated residual value of the leased property and deferred incremental direct costs less unearned income. Income is recognized over the life of the lease to approximate a level rate of return on the net investment. Residual values, which are reviewed quarterly, represent the estimated amount we expect to receive at lease termination from the disposition of leased property. Actual residual values realized could differ from these estimates. Write-downs of estimated residual value are recognized as permanent impairments in the current period.

The components of investment in direct financing leases at September 30, 2007 were as follows:

| | |
|---|---------------|
| Minimum lease payments receivable | \$ 27,586,638 |
| Estimated residual value of leased assets | 29,695,733 |
| Unearned income | (17,888,034) |
| Total | \$ 39,394,337 |

Note 4 — Real Estate Acquisitions

During the nine-month period ended September 30, 2007, the Company acquired a 100% interest in 139 commercial properties for an aggregate purchase price of approximately \$975.7 million. The Company financed the acquisitions with approximately \$613.4 million of mortgage loans generally secured by the individual property on which the loan was made. The Company allocated the purchase price of these properties, including aggregate acquisition costs of approximately \$25.4 million, to the fair market value of the assets acquired and liabilities assumed. The Company allocated approximately \$248.3 million to land, approximately \$627.8 million to building and improvements, approximately \$99.0 million to acquired in-place leases, approximately \$39.5 million to investment in deferred financing leases, approximately \$29.0 million to acquired below-market leases, and approximately \$15.5 million to acquired above-market leases during the nine-month period ended September 30, 2007.

Note 5 – Mortgages Receivable Acquisitions

During the nine-month period ended September 30, 2007 the Company acquired a portfolio of 23 mortgage loans with an aggregate face value of approximately \$45.3 million, which are secured by 23 commercial properties. The receivable balance of approximately \$49.5 million as of September 30, 2007 consists of the face value of the notes of approximately \$45.3 million, an approximately \$3.1 million premium, and approximately \$1.1 million of acquisition costs. The premium and acquisition costs will be amortized over the terms of the loans using the effective interest rate method. The notes were acquired from GE Capital Franchise Finance Corporation, an unrelated third party, and mature on August 1, 2020.

NOTES TO CONDENSED CONSOLIDATED UNAUDITED FINANCIAL STATEMENTS

September 30, 2007

Interest and principal is due each month at an interest rate of 9.84% per annum. See Note 6 for a description of the note payable obtained from General Electric Capital Corporation (“GECC”) related to this transaction.

Note 6 — Notes Payable

During the nine-month period ended September 30, 2007, the Company obtained 99 mortgage notes payable in connection with the real estate acquisitions described in Note 4 above, totaling approximately \$613.4 million, of which approximately \$596.5 million was fixed rate debt which bears interest at rates ranging from 5.21% to 6.62% and a weighted average interest rate of 5.46% (the “Fixed Rate Debt”) and approximately \$16.9 million was short-term variable rate debt which bears interest at the one-month LIBOR rate plus 200 basis points (the “Variable Rate Debt”). The Fixed Rate Debt matures on various dates from July 2008 to October 2018. The Variable Rate Debt generally matures 90 days from issuance.

During the nine-month period ended September 30, 2007, the Company obtained a note payable from GECC in connection with the mortgages receivable acquisition described in Note 5 above, totaling approximately \$36.3 million, which bears interest at the one-month LIBOR rate plus 200 basis points and matures on March 31, 2008.

During the nine-month period ended September 30, 2007, the Company borrowed and subsequently repaid an aggregate of approximately \$22.2 million on two revolving mortgage notes payable to partially fund certain of the real estate acquisitions described in Note 4. The revolving notes payable bear interest at a variable rate equal to the one-month LIBOR plus 200 basis points.

On March 2, 2007, the Company repaid a fixed rate mortgage note of approximately \$5.2 million that was due on October 1, 2016. As a result, approximately \$113,000 of unamortized deferred financing costs was expensed and included in interest expense in the condensed consolidated unaudited financial statements for the nine-month period ended September 30, 2007.

Note 7 – Discontinued Operations

SFAS No. 144 “*Accounting for the Impairment or Disposal of Long-Lived Assets*”, requires discontinued operations presentation for disposals of a “component” of an entity, for all periods presented. During the three-month and nine-month periods ended September 30, 2007, the Company classified one single-tenant commercial property as held for sale. Therefore, the Company reclassified its consolidated statements of operations to reflect income and expenses for the property held for sale as discontinued operations and reclassified its consolidated balance sheets to reflect assets related to such property as held for sale. At September 30, 2007, non-real estate assets held for sale consist of straight line rent receivable of approximately \$593,000. At September 30, 2007, there were no liabilities associated with discontinued operations. The book value of the property held for sale did not exceed its estimated fair values. As a result, no adjustment of property carrying value has been recorded.

Edgar Filing: Cole Credit Property Trust II Inc - Form 424B3

The results of operations relating to assets held for sale for the three and nine-month periods ended September 30, 2007 and 2006 are shown below. These include results of operations for the applicable period for those assets classified as held for sale as of September 30, 2007:

Note 8 – Extended Rate Lock Agreement

During the nine-month period ended September 30, 2007, the Company entered into rate lock agreements with Bear Stearns Commercial Mortgage (“Bear Stearns”) and JP Morgan Chase Bank, N.A. (“JP Morgan”) (the “Rate Locks”) to lock interest rates ranging from 5.49% to 6.22% for up to approximately \$451.6 million in borrowings. Under the terms of the Rate Locks, the Company made rate lock deposits totaling approximately \$9.6 million.

COLE CREDIT PROPERTY TRUST II, INC.

NOTES TO CONDENSED CONSOLIDATED UNAUDITED FINANCIAL STATEMENTS

September 30, 2007

The deposits are refundable to the Company in amounts generally equal to 2% of any loans funded under the agreements. The Rate Locks expire 60 days from execution. The Bear Stearns and JP Morgan agreements may be extended by 30 days for a rate lock fee of 0.25% of the loan amount or, at the Company's election, by converting the fee into interest rate spread. Either party may terminate the agreement upon notice to the other party at any time prior to the determination of the rate and the loan amount in accordance with the terms of the agreement. In the event the Company wishes to terminate and cancel the Bear Stearns agreement and the Company has satisfied all of the obligations set forth in the agreement and Bear Stearns has realized a net gain on any hedges entered into by Bear Stearns relating to the Rate Lock, then Bear Stearns will remit one-half of such net gain to the Company. The Company will be liable to both Bear Stearns or JP Morgan for 100% of any net hedge break loss incurred by Bear Stearns or JP Morgan on terminated rate locks. The Company is not aware of any material swap loss positions as of September 30, 2007 nor does it have any immediate plans to terminate any Rate Locks.

On August 10, 2007, the Company elected to terminate its rate lock agreement with Bear Stearns, which fixed interest rates for the remaining unallocated borrowings of up to approximately \$275.8 million. As a result, approximately \$5.7 million in rate lock deposits was refunded to the Company. In accordance with the terms of the rate lock agreements, the Company earned a rate lock breakage gain of approximately \$2.2 million. In addition, the Company expensed previously deferred financing costs of approximately \$1.7 million relating to the remaining unallocated borrowings. The net gain of approximately \$478,000 is included in interest and other income on the condensed consolidated statements of operations. As of September 30, 2007, the Company had available total borrowings of approximately \$25.0 million under the Rate Locks and approximately \$500,000 in rate lock deposits outstanding.

Note 9 — Commitments and Contingencies

In the ordinary course of business, the Company may become subject to litigation or claims. There are no material legal proceedings pending or known to be contemplated against us.

Environmental Matters

In connection with the ownership and operation of real estate, the Company potentially may be liable for costs and damages related to environmental matters. The Company has not been notified by any governmental authority of any non-compliance, liability or other claim, and the Company is not aware of any other environmental condition that it believes will have a material adverse effect on its consolidated results of operations.

Note 10 — Related-Party Transactions and Arrangements

Certain affiliates of the Company receive, and will continue to receive fees and compensation in connection with the sale of the Company's common stock, and the acquisition, management and sale of the assets of the Company. In addition, Cole Capital received up to 1.5% of the gross proceeds from the Initial Offering and will receive up to 2.0% of gross offering proceeds from the Follow-on Offering, before reallowance to participating broker-dealers, as a dealer-manager fee. Cole Capital, in its sole discretion, may reallow all or a portion of its dealer-manager fee to such participating broker-dealers as a marketing and due diligence expense reimbursement, based on such factors as the volume of shares sold by, and marketing support received from, such participating broker-dealers as compared to those of other participating broker-dealers. No selling commissions or dealer-manager fees are paid to Cole Capital in respect of shares sold under the DRIP. During the three-month and nine-month periods ended September 30, 2007, the Company paid approximately \$14.6 million and approximately \$38.6 million, respectively, to Cole Capital for commissions and dealer manager fees, of which approximately

COLE CREDIT PROPERTY TRUST II, INC.

NOTES TO CONDENSED CONSOLIDATED UNAUDITED FINANCIAL STATEMENTS

September 30, 2007

All organization and offering expenses associated with the sale of the Company's common stock (excluding selling commissions and the dealer-manager fee) are paid for by Cole Advisors II or its affiliates and are reimbursed by the Company up to 1.5% of gross offering proceeds. Cole Advisors II or its affiliates also receive acquisition and advisory fees of up to 2% of the contract purchase price of each asset for the acquisition, development or construction of real property and will be reimbursed for acquisition costs incurred in the process of acquiring properties, but such amounts shall not exceed 2.0% of the contract purchase price. The Company expects the acquisition expenses to be approximately 0.5% of the purchase price of each property. During the three-month and nine-month periods ended September 30, 2007, the Company reimbursed Cole Advisors II approximately \$1.8 million and approximately \$3.7 million, respectively, for organization and offering expenses. At September 30, 2007, approximately \$4,000 of such costs had been incurred by Cole Advisors II but had not been reimbursed by the Company or accrued, as such costs were in excess of 1.5% of gross offering proceeds on the Follow-on Offering. During the three-month and nine-month periods ended September 30, 2007, the Company paid an affiliate of Cole Advisors II approximately \$8.1 million and approximately \$20.5 million for acquisition fees, respectively. During the three-month and nine-month periods ended September 30, 2006, the Company paid an affiliate of Cole Advisors II approximately \$1.3 million and approximately \$3.4 million for acquisition fees, respectively.

If Cole Advisors II provides substantial services, as determined by the Company's independent directors, in connection with the origination or refinancing of any debt financing obtained by the Company that is used to acquire properties or to make other permitted investments, or that is assumed, directly or indirectly, in connection with the acquisition of properties, the Company will pay Cole Advisors II a financing coordination fee equal to 1% of the amount available under such financing; provided, however, that Cole Advisors II shall not be entitled to a financing coordination fee in connection with the refinancing of any loan secured by any particular property that was previously subject to a refinancing in which Cole Advisors II received such a fee. Financing coordination fees payable from loan proceeds from permanent financing will be paid to Cole Advisors II as the Company acquires such permanent financing. However, no fees will be paid on loan proceeds from any line of credit until such time as all net offering proceeds have been invested by the Company. During the three-month and nine-month periods ended September 30, 2007, the Company paid Cole Advisors II approximately \$2.1 million and approximately \$6.3 million for finance coordination fees, respectively. During the three-month and nine-month period ended September 30, 2006, the Company paid Cole Advisors II approximately \$562,000 and approximately \$1.3 million, for finance coordination fees, respectively.

The Company pays, and expects to continue to pay, Cole Realty Advisors, Inc. ("Cole Realty"), its affiliated property manager, fees for the management and leasing of the Company's properties. Such fees equaled 2% of gross revenues plus leasing commissions at prevailing market rates during the nine-month period ended September 30, 2007. In accordance with the property management agreement, the Company may pay Cole Realty up to (i) 2% of gross revenues from the Company's single tenant properties and (ii) 4% of gross revenues from the Company's multi-tenant properties, plus leasing commissions at prevailing market rates; provided however, that the aggregate of all property management and leasing fees paid to affiliates plus all payments to third parties will not exceed the amount that other nonaffiliated management and leasing companies generally charge for similar services in the same geographic location. Cole Realty may subcontract its duties for a fee that may be less than the fee provided for in the property management agreement. During the three-month and nine-month periods ended September 30, 2007, the Company paid Cole Realty approximately \$494,000 and approximately \$1.0 million for property management fees, respectively. NOTES TO CONDENSED CONSOLIDATED UNAUDITED FINANCIAL STATEMENTS

September 30, 2007

The exercise price for the options granted under the IDSOP was \$9.15 per share for 2005 and 2006 and \$9.10 per share for 2007. It is intended that the exercise price for future options granted under the IDSOP will be at least 100% of the fair market value of the Company's common stock as of the date the option is granted. As of September 30, 2007 and December 31, 2006, the Company had granted options to purchase 30,000 and 20,000 shares, respectively. The 10,000 options granted during the three-month period ended September 30, 2007 have a vesting period of approximately nine months. The remaining 20,000 options have a one year vesting period. A total of 1,000,000 shares have been authorized and reserved for issuance under the IDSOP. On January 1, 2006, we adopted SFAS No. 123 (revised 2004), "*Share-Based Payment*" ("SFAS 123R"), which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors, including stock options related to the IDSOP, based on estimated fair values. The Company adopted SFAS 123R using the modified prospective application. Accordingly, prior period amounts were not restated.

During the three-month and nine-month periods ended September 30, 2007, the Company recorded stock-based compensation charges of approximately \$9,000 and approximately \$31,000, respectively. During the three-month and nine-month periods ended September 30, 2006, the adoption of SFAS 123R resulted in stock-based compensation charges of approximately \$14,000 and approximately \$40,000, respectively. Stock-based compensation expense is based on awards ultimately expected to vest and reduced for estimated forfeitures. SFAS 123R requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. The Company's calculations do not assume any forfeitures.

During the three-month period ended September 30, 2006, no options to purchase shares were granted, no share options became vested, and no options were forfeited or exercised. During the nine-month period ended September 30, 2006, options to purchase 10,000 shares at \$9.15 per share were granted, 10,000 share options became vested, and no options were forfeited or exercised. During the three-month period ended September 30, 2007, 10,000 options were granted at \$9.10 per share, and no options became vested, were forfeited, or were exercised. During the nine-month period ended September 30, 2007, 10,000 share options became vested, 10,000 options were granted at \$9.10 per share, and no options were forfeited or exercised. As of September 30, 2007, options to purchase 30,000 shares at a weighted average exercise price of \$9.13 per share remained outstanding with a weighted average contractual remaining life of approximately nine years. As of September 30, 2007, there was approximately \$48,000 of total unrecognized compensation cost related to unvested share-based compensation awards granted under the IDSOP. That cost is expected to be recognized through the quarter ended June 30, 2008.
