

Flagstone Reinsurance Holdings Ltd
Form 10-Q
May 05, 2010

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 10-Q

☐ Quarterly Report Pursuant to Section 13 or 15(d)
of the Securities Exchange Act of 1934
For the quarterly period ended March 31, 2010

OR

☐ Transition Report Pursuant to Section 13 or 15(d)
of the Securities Exchange Act of 1934
For the transition period from _____ to _____

Commission file number 001-33364

Flagstone Reinsurance Holdings Limited
(Exact name of registrant as specified in its charter)

Bermuda
(State or other jurisdiction of
incorporation or organization)

98-0481623
(I.R.S. Employer
Identification No.)

Crawford House
23 Church Street
Hamilton HM 11
Bermuda
(Address of principal executive offices)

(441) 278-4300
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:
Common Shares, par value 1 cent per share
Name of exchange on which registered:

Edgar Filing: Flagstone Reinsurance Holdings Ltd - Form 10-Q

New York Stock Exchange
Bermuda Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of “accelerated filer”, “large accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of May 5, 2010 the Registrant had 80,001,073 common voting shares outstanding, net of treasury shares with a par value of \$0.01 per share.

FLAGSTONE REINSURANCE HOLDINGS LIMITED
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in tables expressed in thousands of U.S dollars, except for ratios, share and per share amounts)

Index

1. ORGANIZATION

On March 22, 2010, Flagstone Reinsurance Holdings Limited (“Flagstone” or the “Company”) announced that its Board of Directors approved a proposal for a redomestication to move Flagstone’s place of incorporation from Bermuda to Luxembourg. Flagstone has chosen to redomesticate to Luxembourg because the Company believes it will increase its strategic and capital flexibility while maintaining its operating model and long-term strategy. The redomestication proposal is subject to approval by Flagstone’s shareholders and certain regulatory approvals. Flagstone does not expect the redomestication to have a material impact on the way the Company operates or on its financial condition or results of operations. Investors are urged to read the proxy statement/prospectus on Form S-4 filed April 9, 2010 (the “Proxy Statement”), and any other relevant documents filed or to be filed by Flagstone because they contain or will contain important information about the proposed redomestication. In particular, investors should carefully consider the “Risk Factors” section of the Proxy Statement for a discussion of risks related to the redomestication. The Proxy Statement and other documents filed or to be filed by Flagstone with the SEC are or will be available free of charge at the SEC’s website (www.sec.gov).

2. BASIS OF PRESENTATION AND CONSOLIDATION

These unaudited condensed consolidated financial statements include the accounts of Flagstone and its wholly owned subsidiaries, including Flagstone Réassurance Suisse SA (“Flagstone Suisse”) and have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. References in this Form 10-Q to “dollars” or “\$” are to the lawful currency of the United States of America, unless the context otherwise requires. All amounts in the following tables are expressed in thousands of U.S. dollars, except share amounts, per share amounts and percentages. These unaudited condensed consolidated financial statements include the accounts of the Company and its subsidiaries, including those that meet the consolidation requirements of variable interest entities (“VIEs”). The Company assesses the consolidation of VIEs based on whether the Company is the primary beneficiary of the entity in accordance with the Consolidation Topic of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”). Entities in which the Company has an ownership of more than 20% and less than 50% of the voting shares are accounted for using the equity method. All inter-company accounts and transactions have been eliminated on consolidation.

The preparation of these unaudited condensed consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the disclosed amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Company’s principal estimates are for loss and loss adjustment expenses (“LAE”), estimates of premiums written, premiums earned, acquisition costs, fair value of investments and share based compensation. The Company reviews and revises these estimates as appropriate based on current information. Any adjustments made to these estimates are reflected in the period the estimates are revised.

In the opinion of management, these unaudited condensed consolidated financial statements reflect all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of the Company’s financial position and results of operations as at the end of and for the periods presented. The results of operations and cash

flows for any interim period will not necessarily be indicative of the results of operations and cash flows for the full fiscal year or subsequent quarters. This Quarterly Report on Form 10-Q should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2009, filed with the Securities and Exchange Commission (the "SEC") on March 1, 2010.

3. NEW ACCOUNTING PRONOUNCEMENTS

Adoption of new accounting pronouncements

During the first quarter of 2010, the Company adopted the FASB amendments to ASC Topic 860, "Transfers and Servicing," ("ASC 860") which codified FASB Statement No. 166, "Accounting for Transfers of Financial Assets" and was amended in December 2009. ASC 860 requires that a transferor recognize and initially measure at fair value all assets obtained (including a transferor's beneficial interest) and liabilities incurred as a result of financial assets accounted for as a sale. It is a revision to FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," and requires more information about transfers of financial assets, including securitization transactions, and where entities have continuing exposure to the risks related to transferred financial assets. The effect of adopting ASC 860 did not have a material impact on the consolidated results of operations and financial condition.

FLAGSTONE REINSURANCE HOLDINGS LIMITED
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in tables expressed in thousands of U.S dollars, except for ratios, share and per share amounts)

Index

During the first quarter of 2010, the Company adopted the amendments to the FASB ASC Topic 810, "Consolidation" ("ASC 810") which codified FASB Statement No. 167, "Amendments to FASB Interpretation No. 46(R)". ASC 810 amends FASB Statement No. 46 (revised December 2003), "Consolidation of Variable Interest Entities," to require an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. It determines whether a reporting entity is required to consolidate another entity based on, among other things, the other entity's purpose and design and the reporting entity's ability to direct the activities of the other entity that most significantly impact the other entity's economic performance. The effect of adopting the amendments to ASC 810 did not have a material impact on the consolidated results of operations and financial condition.

In January 2010, the FASB issued Accounting Standards Update No. 2010-06, "Fair Value Measurements and Disclosures (Topic 820) - Improving Disclosures about Fair Value Measurements" ("ASU 2010-06"). This update requires new disclosures about fair value measurement as set forth in the Fair Value Measurements and Disclosures – Overall Subtopic of the FASB ASC. Specifically, this update requires disclosing (1) the amounts of significant transfers in and out of Level 1 and 2 fair value measurements and the reasons for the transfers, and (2) information about purchases, sales, issuances, and settlements separately in the reconciliation for fair value measurements using significant unobservable inputs. The ASU 2010-06 was effective for interim and annual periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The Company adopted the relevant portions of ASU 2010-06 and the effect of adopting the amendments did not have a material impact on the consolidated results of operations and financial condition.

4. INVESTMENTS

Fair value disclosure

The valuation technique used to determine the fair value of the financial instruments is the market approach which uses prices and other relevant information generated by market transactions involving identical or comparable assets.

In accordance with the Fair Value Measurements and Disclosures Topic of the FASB ASC, the Company determined that its investments in U.S. government treasury securities, listed equity securities and exchange traded funds are stated at Level 1 fair value as determined by the quoted market price of these securities, as provided either by independent pricing services or exchange market prices.

Investments in U.S. government agency securities, corporate bonds, mortgage-backed securities, foreign government bonds and asset-backed securities are stated at Level 2. The fair value of these securities is derived from broker quotes based on inputs that are observable for the asset, either directly or indirectly, such as yield curves and transactional history. Catastrophe bonds are stated at fair value as determined by reference to broker indications. Those indications are based on current market conditions, including liquidity and transactional history, recent issue price of similar catastrophe bonds and seasonality of the underlying risks.

The Company has reviewed its Level 3 investments, and the valuation methods are as follows: The fair value of the investment funds, being private equity funds, is determined by the investment fund managers using the net asset value provided by the general partners of the funds on a quarterly basis. These valuations are then adjusted by the investment fund managers for cash flows since the most recent valuation. The valuation methodology used for the investment funds is consistent with the methodology that is generally employed in the investment industry.

FLAGSTONE REINSURANCE HOLDINGS LIMITED
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in tables expressed in thousands of U.S dollars, except for ratios, share and per share amounts)

Index

As at March 31, 2010 and December 31, 2009, the Company's investments are allocated between levels as follows:

	Fair Value Measurement at March 31, 2010, using:			
	Fair value measurements	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
Fixed maturity investments				
U.S. government and agency securities	\$427,731	\$387,286	\$40,445	\$ -
U.S. states and political subdivisions	2,206	-	2,206	-
Other foreign government	58,296	-	58,296	-
Corporates	469,900	-	469,900	-
Mortgage-backed securities	179,296	-	179,296	-
Asset-backed securities	62,148	-	62,148	-
	1,199,577	387,286	812,291	-
Equity investments				
Financial services	212	212	-	-
	212	212	-	-
Short term investments				
U.S. government and agency securities	239,195	227,347	11,848	-
Other foreign government	8,099	-	8,099	-
Corporates	61,792	-	61,792	-
Asset-backed securities	975	-	975	-
	310,061	227,347	82,714	-
Other Investments				
Investment funds	5,734	-	-	5,734
Catastrophe bonds	46,600	-	46,600	-
	52,334	-	46,600	5,734
Totals	\$1,562,184	\$614,845	\$941,605	\$ 5,734

For reconciliation purposes, the table above does not include an equity investment of \$4.1 million in which the Company is deemed to have a significant influence and is accounted for under the equity method and as such, is not accounted for at fair value under the FASB ASC guidance for financial instruments.

Edgar Filing: Flagstone Reinsurance Holdings Ltd - Form 10-Q

For the Level 3 items still held as of March 31, 2010, the total change in fair value for the three months ended March 31, 2010 is \$0.1 million. Transfers between levels, if necessary, are done as of the actual date of the event or change in circumstance that caused the transfer. There were no transfers between levels during the period.

For reconciliation purposes, the table above does not include an equity investment of \$4.3 million in which the Company is deemed to have a significant influence and is accounted for under the equity method and as such, is not accounted for at fair value under the FASB ASC guidance for financial instruments.

The reconciliation of the fair value for the Level 3 investments for the three months ended March 31, 2010 and December 31, 2009, including net purchases and sales and change in unrealized gains, is set out below:

Edgar Filing: Flagstone Reinsurance Holdings Ltd - Form 10-Q

Description	For the three months ended March 31, 2010		
	Fixed Maturities	Investment funds	Total
Fair value, December 31, 2009	\$2,298	\$5,486	\$7,784

Commitments

As at March 31, 2010, and December 31, 2009, the Company had total outstanding investment commitments of \$15.2 million and \$3.4 million, respectively.

5. DERIVATIVES

The Company accounts for its derivative instruments using the Derivatives and Hedging Topic of the FASB ASC, which requires an entity to recognize all derivative instruments as either assets or liabilities in the balance sheet and measure those instruments at fair value, with the fair value recorded in other assets or liabilities. The accounting for realized and unrealized gains and losses associated with changes in the fair value of derivatives depends on the hedge designation, and if designated as a hedging instrument, whether the hedge is effective in achieving offsetting changes in the fair value of the asset or liability being hedged. The realized and unrealized gains and losses on derivatives not designated as hedging instruments are included in net realized and unrealized gains and losses in the consolidated financial statements. Gains and losses associated with changes in fair value of the designated hedge instruments are recorded with the gains and losses on the hedged items, to the extent that the hedge is effective.

The Company enters into derivative instruments such as interest rate futures contracts, foreign currency forward contracts and foreign currency swaps in order to manage portfolio duration and interest rate risk, borrowing costs and foreign currency exposure. The Company enters into index futures contracts and total return swaps to increase or reduce its exposure to the underlying asset or index. The Company also purchases “to be announced” mortgage-backed securities (“TBAs”) as part of its investing activities. The Company manages the exposure to these instruments based on guidelines established by management and approved by the Board of Directors.

The Company has entered into certain foreign currency forward contracts that it has designated as hedges in order to hedge its net investments in foreign subsidiaries. These foreign currency forward contracts are carried at fair value and the gains and losses associated with changes in fair value of the designated hedge instruments are recorded in other comprehensive income as part of the cumulative translation adjustment, to the extent that these are effective as hedges. All other derivatives are not designated as hedges, and accordingly, these instruments are carried at fair value, with the fair value recorded in other assets or liabilities with the corresponding realized and unrealized gains and losses included in net realized and unrealized gains and losses.

The details of the derivatives held by the Company as of March 31, 2010 and December 31, 2009 are as follows:

The non-designated derivatives are carried at fair value, with the fair value recorded in other assets or liabilities and the corresponding realized and unrealized gains and losses included in net realized and unrealized gains and losses.

Foreign currency forward contracts

The Company has entered into certain foreign currency forward contracts that it has designated as hedges in order to hedge its net investments in foreign subsidiaries. These foreign currency forward contracts are carried at fair value and the gains and losses associated with changes in fair value of the designated hedge instruments are recorded in other comprehensive income as part of the cumulative translation adjustment, to the extent that these are effective as hedges, with the ineffective portion recorded in realized and unrealized gains and losses included in the income statement. All other foreign currency forward contracts are not designated as hedges, and are also carried at fair value, with the fair value recorded in other assets or liabilities with the corresponding realized and unrealized gains and losses included in net realized and unrealized gains and losses.

Futures contracts

The Company uses futures contracts to gain exposure to certain markets or indexes. The Company has entered into equity index, commodity index and bond index futures as part of its investment strategy.

Total return swaps

The Company uses total return swaps to gain exposure to a global inflation linked bond index and a global equity index. The total return swaps allow the Company to earn the return of the underlying index while paying floating interest plus a spread to the counterparty.

Currency swaps

The Company uses currency swaps to minimize the effect of fluctuating foreign currencies. The currency swaps relate to the Company's Euro denominated debentures.

To be announced mortgage-backed securities

The Company also purchases "to be announced" mortgage-backed securities ("TBAs") as part of its investing activities. By acquiring a TBA, the Company makes a commitment to purchase a future issuance of mortgage-backed securities.

Other reinsurance derivatives

The Company writes certain reinsurance contracts that are classified as derivatives in accordance with the FASB ASC Topic for Derivatives and Hedging. The Company has entered into industry loss warranty ("ILW") transactions that may be structured as reinsurance or derivatives.

Fair value disclosure

In accordance with the Fair Value Measurements and Disclosures Topic of the FASB ASC, the fair value of derivative instruments held as of March 31, 2010 and December 31, 2009 is allocated between levels as follows:

Description	Fair Value Measurement at March 31, 2010, using:			
	Fair value measurements	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
Futures contracts	\$1,520	\$1,520	\$-	\$ -
Swaps	35	-	35	-
Foreign currency forward contracts	11,354	-	11,354	-
Mortgage-backed securities TBA	(37)	-	(37)	-
Other reinsurance derivatives	(1,204)	-	-	(1,204)
Total derivatives	\$11,668	\$1,520	\$11,352	\$ (1,204)

For the Level 3 items still held as of March 31, 2010, the total change in fair value recorded in net realized and unrealized gains (losses) – investments for the three months ended March 31, 2010 is a gain of \$0.4 million.

Description	Fair Value Measurement at December 31, 2009, using:			
	Fair value measurements	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
Futures contracts	\$3,847	\$3,847	\$-	\$ -
Swaps	233	-	233	-
Foreign currency forward contracts	5,782	-	5,782	-
Mortgage-backed securities TBA	(399)	-	(399)	-
Other reinsurance derivatives	(1,596)	-	-	(1,596)
Total derivatives	\$7,867	\$3,847	\$5,616	\$ (1,596)

The reconciliation of the fair value for the Level 3 derivative instruments, including net purchases and sales, realized gains and changes in unrealized gains, is as follows:

	For the three months ended March 31, 2010
Other reinsurance derivatives	
Fair value, December 31, 2009	\$ (1,596)
Total premium earned included in earnings	642
Purchases	(250)
Sales	-
Fair value, March 31, 2010	\$ (1,204)

Transfers between levels, if necessary, are done as of the actual date of the event or change in circumstance that caused the transfer. There were no transfers between levels during these periods.

	2010	\$ 850
	2011	821
	2012	794
	2013	770
	2014	749

(1) Accumulated amortization is converted at the end of period foreign exchange rate and amortization expense is converted at an average foreign exchange rate for the period.

7. DEBT AND FINANCING ARRANGEMENTS

Long term debt

Interest expense includes interest payable and amortization of debt offering expenses. The debt offering expenses are amortized over the period from the issuance of the Deferrable Interest Debentures to the earliest date that they may be called by the Company. For the three months ended March 31, 2010, the Company incurred interest expense of \$2.5 million on the Deferrable Interest Debentures compared to \$3.6 million for the same period in 2009. Also, at March 31, 2010 and December 31, 2009, the Company had \$0.8 million and \$0.8 million, respectively, of interest payable included in other liabilities.

The Company does not carry its long term debt at fair value on its consolidated balance sheets. At March 31, 2010, the Company estimated the fair value of its long term debt to be approximately \$221.8 million compared to \$203.9 million at December 31, 2009.

Letter of credit facilities

On June 5, 2009, Flagstone Suisse entered into a secured \$50.0 million standby letter of credit facility with BNP Paribas (the “BNP Facility”). The BNP Facility will be used to support the reinsurance obligations of the Company and its subsidiaries. As at March 31, 2010, no letters of credit have been issued under the BNP Facility.

On March 5, 2009, Flagstone Suisse entered into a \$200.0 million secured committed letter of credit facility with Barclays Bank Plc (the “Barclays Facility”). The Barclays Facility will be used to support the reinsurance obligations of the Company and its subsidiaries. As at March 31, 2010, \$32.3 million had been drawn under the Barclays Facility, and the drawn amount was secured by \$35.9 million of fixed maturity securities from the Company’s investment portfolio.

On January 22, 2009, Flagstone Suisse entered into a secured \$450.0 million standby letter of credit facility with Citibank Europe Plc (the “Citi Facility”). The Citi Facility comprises a \$225.0 million facility for letters of credit with a maximum tenor of 15 months, to be used to support reinsurance obligations of the Company and its subsidiaries, and a \$225.0 million facility for letters of credit drawn in respect of Funds at Lloyd’s with a maximum tenor of 60 months. As at March 31, 2010, \$394.5 million had been drawn under the Citi Facility, and the drawn amount of the facility was secured by \$438.4 million of fixed maturity securities from the Company’s investment portfolio.

These facilities are used to provide security to reinsureds and are collateralized by the Company, at least to the extent of the letters of credit outstanding at any given time.

8. SHARE BASED COMPENSATION

The Company accounts for share based compensation in accordance with the Compensation – Stock Compensation Topic of the FASB ASC which requires entities to measure the cost of services received from employees and directors in exchange for an award of equity instruments based on the grant date fair value of the award. The cost of such services will be recognized as compensation expense over the period during which an employee or director is required to provide service in exchange for the award. The Company’s share based compensation plans consist of performance share units (“PSUs”) and restricted share units (“RSUs”).

Performance Share Units

The PSU Plan is the Company’s shareholder approved primary executive long-term incentive scheme. Pursuant to the terms of the PSU Plan, at the discretion of the Compensation Committee of the Board of Directors, PSUs may be granted to executive officers and certain other key employees and vesting is contingent upon the Company meeting certain diluted return-on-equity (“DROE”) goals.

A summary of the activity under the PSU Plan as at March 31, 2010, and changes during the three months ended March 31, 2010 is as follows:

Edgar Filing: Flagstone Reinsurance Holdings Ltd - Form 10-Q

For the three months ended March 31,
2010

	Number expected to vest	Weighted average grant date fair value	Weighted average remaining contractual term
--	----------------------------	---	---

Outstanding at beginning of period	3,305,713	\$10.04	1.6
Granted	824,500	10.94	
Outstanding at end of period	4,130,213	10.22	1.6

FLAGSTONE REINSURANCE HOLDINGS LIMITED
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in tables expressed in thousands of U.S dollars, except for ratios, share and per share amounts)

Index

The Company reviews its assumptions in relation to the PSUs on a quarterly basis. For the three months ended March 31, 2010, \$4.1 million of compensation expense has been recorded in general and administrative expenses in relation to the PSU Plan compared to \$2.7 million for the same period in 2009. The issuance of shares with respect to the PSUs is contingent upon the attainment of certain levels of average DROE over a two or three year period. As at March 31, 2010 and December 31, 2009, there was a total of \$24.4 million and \$19.4 million, respectively, of unrecognized compensation cost related to non-vested PSUs; that cost is expected to be recognized over a period of approximately 1.9 years and 1.6 years, respectively.

Since the inception of the PSU Plan, 60,000 PSUs have vested and 2,368,658 PSUs have been cancelled.

Restricted Share Units

The purpose of the RSU Plan is to encourage certain employees and directors of the Company to further the development of the Company and to attract and retain key employees for the Company's long-term success. The RSUs granted to employees vest over a period of approximately two years while RSUs granted to directors vest on the grant date.

A summary of the activity under the RSU Plan as at March 31, 2010 and changes during the three months ended March 31, 2010, are as follows:

	For the three months ended March 31, 2010		Weighted average remaining contractual term
	Number expected to vest	Weighted average grant date fair value	
Outstanding at beginning of period	373,157	\$10.89	0.5
Granted	226,321	11.05	
Forfeited	(9,465)	9.89	
Outstanding at end of period	590,013	10.97	0.7

As at March 31, 2010 and December 31, 2009, there was a total of \$2.2 million and \$0.9 million, respectively, of unrecognized compensation cost related to non-vested RSUs; that cost is expected to be recognized over a period of approximately 1.5 years and 1.0 year, respectively. A compensation expense of \$1.1 million and \$1.2 million has been recorded in general and administrative expenses for the three months ended March 31, 2010 and 2009, respectively, in relation to the RSU Plan.

Since the inception of the RSU Plan in July 2006, 400,842 RSUs granted to employees have vested and no RSUs granted to employees have been cancelled. During the three months ended March 31, 2010 and 2009, 64,896 and 72,666 RSUs, respectively, were granted to the directors. During the three months ended March 31, 2010 and 2009,

nil and 2,985 RSUs, respectively, granted to directors were converted into common shares of the Company as elected by the directors.

The company uses a nil forfeiture assumption for its PSUs and RSUs. The intrinsic value of the PSUs and RSUs outstanding as of March 31, 2010 was \$47.3 million and \$6.8 million, respectively.

Index

9. EARNINGS PER COMMON SHARE

The computation of basic and diluted earnings per common share for the three months ended March 31, 2010 and 2009 is as follows:

	For the three months ended March 31,	
	2010	2009
Basic earnings per common share		
Net income attributable to Flagstone	\$31,504	\$35,743
Weighted average common shares outstanding	82,288,918	84,862,555
Weighted average vested restricted share units	270,053	207,446
Weighted average common shares outstanding—Basic	82,558,971	85,070,001
Basic earnings per common share	\$0.38	\$0.42
Diluted earnings per common share		
Net income attributable to Flagstone	\$31,504	\$35,743
Weighted average common shares outstanding	82,288,918	84,862,555
Weighted average vested restricted share units outstanding	270,053	207,446
	82,558,971	85,070,001
Share equivalents:		
Weighted average unvested restricted share units	182,609	138,293
Weighted average common shares outstanding—Diluted	82,741,580	85,208,294
Diluted earnings per common share	\$0.38	\$0.42

At March 31, 2010 and 2009, there was a warrant outstanding which would result in the issuance of 8,585,747 common shares that were excluded from the computation of diluted earnings per common share because the effect would be anti-dilutive. Because the number of shares contingently issuable under the PSU Plan depends on the average DROE over a two or three year period, the PSUs are excluded from the calculation of diluted earnings per common share until the end of the performance period, at which time the number of shares issuable under the PSU Plan will be known. As at March 31, 2010, and 2009, there were 4,130,213 and 2,871,703 PSUs expected to vest, respectively. The maximum number of common shares that could be issued under the PSU Plan at March 31, 2010 and 2009 were 5,457,105 and 4,307,555, respectively.

10. COMMON SHARES

Common shares

At March 31, 2010, the total authorized common voting shares of the Company were 300,000,000, with a par value of \$0.01 per common share (December 31, 2009 – 300,000,000).

For the periods ended

	March 31, 2010	December 31, 2009
Common voting shares:		
Balance at beginning of period	82,985,219	84,801,732
Conversion of performance share units (1)	-	42,000
Conversion of restricted share units (1)	-	141,487
Shares repurchased and held in treasury	(2,984,146)	(2,000,000)
Balance at end of period	80,001,073	82,985,219

(1) Conversion of performance share units and restricted share units are net of shares withheld for the payment of tax on the employees' behalf.

Share buyback

On September 22, 2008, the Company announced that its Board of Directors had approved the potential repurchase of company stock. The buyback program allows the Company to purchase, from time to time, its outstanding stock up to a value of \$60.0 million. As of December 31, 2009, approximately \$33.6 million of repurchases remained available under the buyback program.

On March 11, 2010, the Company entered into a private purchase agreement to repurchase 2,984,146 common shares pursuant to its buyback program at a total cost of \$33.6 million. All repurchases have now been made under the terms of the September 22, 2008, buyback program.

11. LEGAL PROCEEDINGS

In the normal course of business, the Company may become involved in various claims litigation and legal proceedings. As at March 31, 2010, the Company was not a party to any material litigation or arbitration proceedings.

12. SEGMENT REPORTING

The Company reports its results to the chief operating decision maker based on three reportable segments: Reinsurance, Lloyd's and Island Heritage (previously referred to as the Insurance segment). The Company regularly reviews its financial results and assesses performance on the basis of these three reportable segments.

The following tables provide a summary of gross and net written and earned premiums, underwriting results, a reconciliation of underwriting income to income before income taxes and interest in earnings of equity investments, total assets, and ratios for each reportable segment for the three months ended March 31, 2010 and 2009:

	For the three months ended March 31, 2010

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is a discussion and analysis of our financial condition as at March 31, 2010 and December 31, 2009, and our results of operations for the three months ended March 31, 2010 and 2009. This discussion should be read in conjunction with our unaudited condensed consolidated financial statements and related notes included in Part 1, Item 1 of this Form 10-Q and with "Management's Discussion and Analysis of Financial Condition and Results of Operations", and the audited consolidated financial statements and notes thereto, presented under Item 7 and Item 8, respectively, of the Company's Annual Report on Form 10-K for the year ended December 31, 2009. Some of the information contained in this discussion and analysis is included elsewhere in this document, including information with respect to our plans and strategy for our business, and includes forward-looking statements that involve risks and uncertainties. Please see the "Cautionary Statement Regarding Forward-Looking Statements" for more information. You should review Item 1A, "Risk Factors" contained in our Form 10-K, filed with the SEC on March 1, 2010, for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements.

References in this Quarterly Report on Form 10-Q to the "Company", "Flagstone", "we", "us", and "our" refer to Flagstone Reinsurance Holdings Limited and/or its subsidiaries, including Flagstone Réassurance Suisse SA, its wholly-owned Switzerland reinsurance company, Marlborough Underwriting Agency Limited, its United Kingdom Lloyd's managing agency, Island Heritage Holdings Ltd., its Cayman Islands based insurance holding company, Flagstone Reinsurance Africa Limited, its South African reinsurance company, Mont Fort Re Ltd., its wholly-owned Bermuda reinsurance company, and any other direct or indirect wholly-owned subsidiary, unless the context suggests otherwise. References to "Flagstone Suisse" refer to Flagstone Réassurance Suisse SA, its wholly-owned subsidiaries and its Bermuda branch. References to "Marlborough" refer to Marlborough Underwriting Agency Limited, its wholly-owned subsidiaries and Syndicate 1861. References to "Island Heritage" refer to Island Heritage Holdings Ltd. and its subsidiaries. References to "Flagstone Alliance" refer to Flagstone Alliance Insurance & Reinsurance PLC and its subsidiaries. References to "Flagstone Africa" refer to Flagstone Reinsurance Africa Limited. References to "Mont Fort" refer to Mont Fort Re Ltd. References in this Form 10-Q to "dollars" or "\$" are to the lawful currency of the United States of America, unless the context otherwise requires. All amounts in the following tables are expressed in thousands of U.S. dollars, except share amounts, per share amounts and percentages.

Executive Overview

We are a global reinsurance and insurance company. Management views the Company as being organized into three reporting segments: Reinsurance, Lloyd's and Island Heritage (previously referred to as our Insurance segment). Through our Reinsurance segment, we write primarily property, property catastrophe and short-tail specialty and casualty insurance and reinsurance. Through our Lloyd's segment, we write primarily property and short-tail specialty and casualty insurance and reinsurance focused on the energy, hull and cargo, marine liability, engineering and aviation business sectors. Through our Island Heritage segment, we primarily write property insurance for homes, condominiums and office buildings in the Caribbean region.

Because we have a limited operating history, period to period comparisons of our results of operations are limited and may not be meaningful in the near future. Our financial statements are prepared in accordance with U.S. GAAP and our fiscal year ends on December 31. Since a substantial portion of the reinsurance we write provides protection from

damages relating to natural and man-made catastrophes, our results depend to a large extent on the frequency and severity of such catastrophic events, and the specific insurance coverages we offer to clients affected by these events. This may result in volatility in our results of operations and financial condition. In addition, the amount of premiums written with respect to any particular line of business may vary from quarter to quarter and year to year as a result of changes in market conditions.

We measure our financial success through long term growth in diluted book value per share plus accumulated dividends measured over intervals of three years, which we believe is the most appropriate measure of the performance of the Company, a measure that focuses on the return provided to the Company's common shareholders. Diluted book value per share is obtained by dividing shareholders' equity by the number of common shares and common share equivalents outstanding including all potentially dilutive securities such as the warrant, performance share units and restricted share units.

We derive our revenues primarily from net premiums earned from the reinsurance and insurance policies we write, net of any retrocessional or reinsurance coverage purchased, net investment income from our investment portfolio, and fees for services provided. Premiums are generally a function of the number and type of contracts we write, as well as prevailing market prices. Premiums are normally due in installments and earned over the contract term, which ordinarily is twelve or twenty-four months.

Index

Our expenses consist primarily of the following types: loss and loss adjustment expenses (“LAE”) incurred on the policies of reinsurance and insurance that we sell; acquisition costs which typically represent a percentage of the premiums that we write and can include brokerage, gross commission costs, profit commission and premium taxes; general and administrative expenses which primarily consist of salaries, benefits and related costs, including costs associated with awards under our Performance Share Unit (“PSU”) and Restricted Share Unit (“RSU”) Plans, and other general operating expenses; interest expenses related to our debt obligations; and noncontrolling interest, which represents the interest of external parties with respect to the net income of Mont Fort, Island Heritage, and Flagstone Africa. We are also subject to taxes in certain jurisdictions in which we operate; however, since the majority of our income to date has been earned in Bermuda, a non-taxable jurisdiction, the tax impact on our operations has historically been minimal.

On March 22, 2010, Flagstone Reinsurance Holdings Limited (“Flagstone” or the “Company”) announced that its Board of Directors approved a proposal for a redomestication to move Flagstone’s place of incorporation from Bermuda to Luxembourg. Flagstone has chosen to redomesticate to Luxembourg because the Company believes it will increase its strategic and capital flexibility while maintaining its operating model and long-term strategy. The redomestication proposal is subject to approval by Flagstone’s shareholders and certain regulatory approvals. Flagstone does not expect the redomestication to have a material impact on the way the Company operates or on its financial condition or results of operations. Investors are urged to read the Proxy Statement, and any other relevant documents filed or to be filed by Flagstone because they contain or will contain important information about the proposed redomestication. In particular, investors should carefully consider the “Risk Factors” section of the Proxy Statement for a discussion of risks related to the Redomestication. The Proxy Statement and other documents filed or to be filed by Flagstone with the SEC are or will be available free of charge at the SEC’s website (www.sec.gov).

The Company reports its results to the chief operating decision maker based on three reportable segments: Reinsurance, Lloyd’s and Island Heritage. The Company regularly reviews its financial results and assesses performance on the basis of these three reportable segments.

Those segments are more fully described as follows:

Reinsurance

Our Reinsurance segment has three main units:

- (1) **Property Catastrophe Reinsurance.** Property catastrophe reinsurance contracts are typically “all risk” in nature, meaning that they protect against losses from earthquakes and hurricanes, as well as other natural and man-made catastrophes such as tornados, wind, fires, winter storms, and floods (where the contract specifically provides for coverage). Losses on these contracts typically stem from direct property damage and business interruption. To date, property catastrophe reinsurance has been our most important product. We write property catastrophe reinsurance primarily on an excess of loss basis. In the event of a loss, most contracts of this type require us to cover a subsequent event and generally provide for a premium to reinstate the coverage under the contract, which is referred to as a “reinstatement premium”. These contracts typically cover only specific regions or geographical areas, but may be on a worldwide basis.

- (2) Property Reinsurance. We also provide reinsurance on a pro rata share basis and per risk excess of loss basis. Per risk reinsurance protects insurance companies on their primary insurance risks on a single risk basis, for example, covering a single large building. Generally, our property per risk and pro rata business is written with loss limitation provisions, such as per occurrence or per event caps, which serve to limit exposure to catastrophic events.
- (3) Short-tail Specialty and Casualty Reinsurance. We also provide short-tail specialty and casualty reinsurance for risks such as aviation, energy, accident and health, satellite, marine and workers' compensation catastrophe. Generally, our short-tail specialty and casualty reinsurance is written with loss limitation provisions.

Lloyd's

Our Lloyd's segment includes the business generated through the Lloyd's Syndicate 1861 and Marlborough. Syndicate 1861 primarily provides property and short-tail specialty and casualty insurance and reinsurance for risks such as energy, hull and cargo, marine liability, engineering and aviation. Marlborough generates fee income from the provision of services to syndicates and third parties.

Index

Island Heritage

Island Heritage is a property insurer based in the Cayman Islands which is primarily in the business of insuring homes, condominiums and office buildings in the Caribbean region.

Critical Accounting Policies

Critical accounting policies at March 31, 2010, have not changed compared to December 31, 2009. The Company's critical accounting policies are discussed in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Item 7 of the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

It is important to understand the Company's accounting policies in order to understand its financial position and results of operations. The Company's unaudited condensed consolidated financial statements contain certain amounts that are inherently subjective in nature and have required management to make assumptions and best estimates to determine the reported values. If events or other factors, including those described in Item 1A, "Risk Factors," of the Company's Form 10-K, cause actual events or results to differ materially from management's underlying assumptions or estimates, there could be a material adverse effect on the Company's results of operations, financial condition and liquidity.

New Accounting Pronouncements

Adoption of new accounting pronouncements

During the first quarter of 2010, the Company adopted the FASB amendments to ASC Topic 860, "Transfers and Servicing," ("ASC 860") which codified FASB Statement No. 166, "Accounting for Transfers of Financial Assets" and was amended in December 2009. ASC 860 requires that a transferor recognize and initially measure at fair value all assets obtained (including a transferor's beneficial interest) and liabilities incurred as a result of financial assets accounted for as a sale. It is a revision to FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," and requires more information about transfers of financial assets, including securitization transactions, and where entities have continuing exposure to the risks related to transferred financial assets. The effect of adopting ASC 860 did not have a material impact on the consolidated results of operations and financial condition.

During the first quarter of 2010, the Company adopted the amendments to the FASB ASC Topic 810, "Consolidation" ("ASC 810") which codified FASB Statement No. 167, "Amendments to FASB Interpretation No. 46(R)". ASC 810 amends FASB Statement No. 46 (revised December 2003), "Consolidation of Variable Interest Entities," to require an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. It determines whether a reporting entity is required to consolidate another entity based on, among other things, the other entity's purpose and design and the reporting entity's ability to direct the activities of the other entity that most significantly impact the other entity's economic performance. The effect of adopting the amendments to ASC 810 did not have a material impact on the consolidated results of operations and financial condition.

In January 2010, the FASB issued Accounting Standards Update No. 2010-06, "Fair Value Measurements and Disclosures (Topic 820) - Improving Disclosures about Fair Value Measurements" ("ASU 2010-06"). This update requires new disclosures about fair value measurement as set forth in the Fair Value Measurements and Disclosures –

Overall Subtopic of the FASB ASC. Specifically, this update requires disclosing (1) the amounts of significant transfers in and out of Level 1 and 2 fair value measurements and the reasons for the transfers, and (2) information about purchases, sales, issuances, and settlements separately in the reconciliation for fair value measurements using significant unobservable inputs. The ASU 2010-06 was effective for interim and annual periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The Company adopted the relevant portions of ASU 2010-06 and the effect of adopting the amendments did not have a material impact on the consolidated results of operations and financial condition.

Index

Results of Operations - For the Three Months Ended March 31, 2010 and 2009

The Company's reporting currency is the U.S. dollar. The Company's subsidiaries have one of the following functional currencies: U.S. dollar, Swiss franc, Euro, British pound, Canadian dollar, Indian rupee, South African rand. As a significant portion of the Company's operations are transacted in foreign currencies, fluctuations in foreign exchange rates may affect period-to-period comparisons. To the extent that fluctuations in foreign currency exchange rates affect comparisons, their impact has been quantified, when possible, and discussed in each of the relevant sections. See Note 2 "Significant Accounting Policies" to the consolidated financial statements in Item 8, "Financial Statements and Supplementary Data", in the Company's Annual Report on Form 10-K filed with the SEC on March 1, 2010, for a discussion on translation of foreign currencies.

	For the three months ended March 31, 2010
U.S. dollar (weakened) strengthened against:	
Canadian dollar	(3.2)%
Swiss franc	2.0%
Euro	5.9%
British pound	6.0%
Indian rupee	(3.7)%
South African rand	(1.1)%

Summary Overview

We generated net income attributable to Flagstone of \$31.5 million and \$35.7 million for the three months ended March 31, 2010 and 2009, respectively. The decrease in net income attributable to Flagstone for the three months ended March 31, 2010 of \$4.2 million as compared to the same period in 2009 is primarily due to:

	For the three months ended March 31, 2010 (Expressed in millions of U.S. dollars)
Change in underwriting income of:	\$ (22.7)
Change in investment income of:	\$ 9.0
Change in net realized and unrealized gains on investments and other derivative instruments and foreign exchange gains of:	\$ 15.0
Change in income attributable to noncontrolling interest of:	\$ (3.3)
Change in interest expense of:	\$ (1.0)

The decreases in underwriting income in the three months ended March 31, 2010, are primarily due to significant catastrophe losses in the current quarter compared to the same period last year. The increase in the net realized and unrealized gains on investment for the three months ended March 31, 2010, were due to the positive performance on our corporate bond portfolios and Inflation Protected Securities.

These items are discussed in more detail in the following sections.

As a result of our net income attributable to Flagstone for the three months ended March 31, 2010, our diluted book value per share increased to \$14.67 compared to \$14.37 at December 31, 2009, representing an increase of 2.1%, inclusive of dividends declared during the period.

Index

Combined ratio	97.6	% 80.4	%	

Outlook and Trends

North America

Demand for North American catastrophe reinsurance was largely met by available capacity, resulting in orderly and disciplined renewals with approximately 8% average price reductions on the first quarter business. Based on numerous client and broker meetings, it is expected that a similar level of rate changes in the U.S. catastrophe market is expected to continue into the hurricane driven June and July renewals. This will be moderated by new demand arising from the Florida Hurricane Cat Fund's further \$2 billion reduction of the Temporary Increase in Coverage Limits ("TICL") layer as well as a renewed interest in frequency loss-driven coverage such as proportional cover, purchased mainly for necessary surplus relief.

Specialty Lines

Global Specialty lines continue to be mixed, with some lines offering attractive risk-adjusted pricing while conversely some areas are under pressure. Softening rates in the energy sector and both commercial aviation and workers compensation catastrophe lines of business continue to provide inadequate returns for the associated risk. However, we approach the specialty lines tactically, and continue to search for attractive transactions that help achieve the highest risk adjusted margins.

International

The International reinsurance market has remained disciplined with modest price easing during the first quarter resulting in rate levels remaining flat to down 5%. Japan business, both wind and earthquake, followed and renewed at similar levels in April. We have seen significant amount of catastrophic events in the first quarter including wind storm Xynthia in Europe, Australian Hailstorms, with the most notable being the Chilean earthquake. If the Chile earthquake ends up causing a high amount of industry losses, then it would be a significant loss to the reinsurance market and could stop the softening in property reinsurance rates.

Index

Underwriting Results by Segment

The Company is organized into three reportable segments, Reinsurance, Lloyd's and Island Heritage. Our Reinsurance segment provides reinsurance through our property, property catastrophe and short-tail specialty and casualty reinsurance business units. Our Lloyd's segment primarily provides property and short-tail specialty and casualty insurance and reinsurance for risks such as energy, hull and cargo, marine liability, engineering and aviation. Our Island Heritage segment includes insurance business generated through Island Heritage, a property insurer based in the Cayman Islands which is primarily in the business of insuring homes, condominiums and office buildings in the Caribbean region.

The following tables provide a summary of gross and net written and earned premiums, underwriting results, total assets and ratios for each of our business segments for the three months ended March 31, 2010 and 2009:

Income before income taxes and interest in earnings of equity investments	\$ 38,197

(1) Inter-segment eliminations relate to Flagstone Suisse quota share arrangements with Island Heritage and Lloyd's.

(2) For Island Heritage segment all ratios calculated using expenses divided by net premiums earned plus other related income.

Index

Gross Premiums Written

Details of consolidated gross premiums written by line of business and geographic area of risk insured are provided below:

Line of business (1)	For the three months ended March 31,					
	2010 Gross premiums written	Percentage of total		2009 Gross premiums written	Percentage of total	
Reinsurance and Lloyd's						
Property catastrophe	\$ 208,256	52.1	%	\$ 200,740	55.5	%
Property	71,586	17.9	%	51,861	14.3	%
Short-tail specialty and casualty	102,598	25.6	%	92,162	25.6	%
Island Heritage						
Insurance	17,762	4.4	%	16,722	4.6	%
Total	\$ 400,202	100.0	%	\$ 361,485	100.0	%

Geographic area of risk insured (2)	For the three months ended March 31,					
	2010 Gross premiums written	Percentage of total		2009 Gross premiums written	Percentage of total	
Caribbean (3)	\$ 22,111	5.5	%	\$ 21,089	5.8	%
Europe	77,082	19.3	%	70,628	19.6	%
Japan and Australasia	20,007	5.0	%	11,918	3.3	%
North America	139,087	34.8	%	125,736	34.8	%
Worldwide risks (4)	119,021	29.7	%	111,147	30.7	%
Other	22,894	5.7	%	20,967	5.8	%
Total	\$ 400,202	100.0	%	\$ 361,485	100.0	%

- (1) Gross premiums written relating to Lloyd's segment are primarily included in short-tail specialty and casualty and property.
- (2) Except as otherwise noted, each of these categories includes contracts that cover risks located primarily in the designated geographic area.
- (3) Gross written premiums related to the Island Heritage segment are included in the Caribbean geographic area.
- (4) This geographic area includes contracts that cover risks in two or more geographic zones.

Reinsurance Segment

Overview

The net underwriting income for the Reinsurance segment for the three months ended March 31, 2010 amounted to \$14.1 million compared to \$41.0 million for the three months ended March 31, 2009, respectively. The decrease in net underwriting results is primarily related to incurred losses on more significant catastrophic events in 2010 as compared to the same period in 2009.

Gross premiums written for our Reinsurance segment in the three months ended March 31, 2010 were \$342.7 million compared to \$303.8 million for the same period in 2009, an increase in gross premiums written of \$38.9 million or 12.8%. The increase in the three months ended March 31, 2010, was mainly due to increased signings on our property and specialty treaties in our Swiss and Bermuda platforms, partially offset by rate level reductions.

Index

Our Reinsurance segment comprises the three lines of business outlined below.

Gross Premiums Written

a. Property catastrophe reinsurance

Gross property catastrophe premiums written for the three months ended March 31, 2010, were \$215.4 million, compared to \$208.7 million for the three months ended March 31, 2009. The increase of \$6.7 million, or 3.2%, in property catastrophe premiums written is primarily due to increased level of business and increased signed share with existing clients, partially offset by the non-renewal of a significant proportional contract.

During the three months ended March 31, 2010, we recorded \$3.8 million of gross reinstatement premiums compared to \$2.1 million recorded for the three months ended March 31, 2009.

b. Property reinsurance

Gross property premiums written for the three months ended March 31, 2010, were \$52.1 million, compared to \$42.8 million for the three months ended March 31, 2009, representing an increase of \$9.3 million, or 21.7%. The increase is primarily due to increased business with existing clients.

During the three months ended March 31, 2010, we recorded \$0.4 million gross reinstatement premiums compared to \$0.7 million recorded for the three months ended March 31, 2009.

c. Short tail specialty and casualty reinsurance

Short-tail specialty and casualty reinsurance premiums were \$75.2 million for the three months ended March 31, 2010, compared to \$52.3 million for the three months ended March 31, 2009, representing an increase of \$22.9 million, or 43.8 %. The increase is primarily driven by increased business with existing clients and the addition of new clients.

During the three months ended March 31, 2010, we recorded (0.4) million of gross reinstatement premiums compared to \$1.3 million in the three months ended March 31, 2009.

Premiums Ceded

In the normal course of its business, the Company purchases reinsurance in order to manage its exposures. The amount and type of reinsurance that it enters into is dependent on a variety of factors, including the cost of a particular reinsurance cover and the nature of its gross premiums written during a particular period.

Reinsurance purchases to date have represented prospective cover; that is, ceded reinsurance purchased to protect it against the risk of future losses as opposed to covering losses that have already been incurred but have not been paid. The majority of these contracts are excess-of-loss contracts covering one or more lines of business. To a lesser extent we have also purchased quota share reinsurance with respect to specific lines of business. We also purchase protection through catastrophe bond structures, Valais Re and Montana Re, and industry loss warrant ("ILW") policies which provide coverage for certain losses provided they are triggered by events exceeding a specified industry loss

size.

Reinsurance premiums ceded for the three months ended March 31, 2010 and 2009, were \$66.9 million and \$67.6 million (19.5% and 22.3% of gross reinsurance premiums written), respectively, representing a decrease of \$0.7 million.

Various factors will continue to affect our appetite and capacity to write and retain risk. These include the impact of changes in frequency and severity assumptions used in our models and the corresponding pricing required to meet our return targets, evolving industry-wide capital requirements, increased competition, and other considerations.

27

Index

Net Premiums Earned

Reinsurance net premiums earned were \$179.0 million for the three months ended March 31, 2010, compared to \$166.6 million for the three months ended March 31, 2009, representing an increase of \$12.4 million, or 7.4%. The increase for the three months ended March 31, 2010, is primarily due to the growth in premium writings.

Underwriting Expenses

a. Loss and loss adjustment expenses

Loss and loss adjustment expenses for the three months ended March 31, 2010, were \$97.6 million, or 54.5% of net premiums earned, compared to \$71.2 million, or 42.8% of net premiums earned, for the three months ended March 31, 2009. The increase in the loss ratio compared to the first quarter of 2009 was primarily due to more significant losses in the current quarter, in which we incurred losses due to more catastrophic events compared to the same period last year, including gross losses related to the Chile earthquake of \$59.7 million. Each quarter we revisit our loss estimates for previous loss events. During the quarter, we recorded net favorable developments for prior catastrophe events of \$7.6 million based on updated estimates provided by clients and brokers. In addition, we undertook our scheduled first quarter review of actuarial assumptions to take into account our loss development experience since inception. As a result of revised initial expected loss ratios and loss development factors coming in better than expected based on actual experience, we recorded \$17.1 million of favorable reserves development. As we move forward, we will place more emphasis on our own internal claims emergence experience and perform such reviews in the first quarter of each year. During the first quarter of 2009, the net favorable developments for prior catastrophe events were \$5.4 million.

b. Acquisition costs

Acquisition costs for the three months ended March 31, 2010, were \$33.7 million compared to \$27.4 million for the three months ended March 31, 2009. The acquisition cost ratio, which is equal to acquisition cost expenses over net premiums earned, for the three months ended March 31, 2010, was 18.8% compared to 16.4% for the three months ended March 31, 2009. The increase in the acquisition cost ratio in the three months ended March 31, 2010, compared to the same period in 2009 is primarily related to higher levels of proportional treaties in our net premiums earned which have higher acquisition cost ratios than non proportional treaties.

c. General and administrative expenses

General and administrative expenses for the three months ended March 31, 2010, were \$34.1 million compared to \$28.0 million in the three months ended March 31, 2009. The increase in the general and administrative expenses for the three months ended March 31, 2010, is mainly a proportional increase related to higher staffing and stock compensation costs in the quarter compared to the same period in 2009.

Lloyd's Segment

Overview

As a result of the acquisition of Marlborough, the managing agency for Lloyd's Syndicate 1861, in November 2008, the Company established a new reporting segment. Syndicate 1861 began writing business for the benefit of Flagstone effective January 1, 2009. The net underwriting income (loss) for the Lloyd's segment for the three months ended March 31, 2010 and 2009 amounted to \$1.0 million and \$(1.7) million, respectively. Due to the start up nature of the 2009 year of account for Syndicate 1861, the level of earned premium income is gradually ramping up with new business writings, placing strain on the underwriting results as we have incurred expenses for the full periods. In addition, due to the start up nature there is a very limited level of funds available and therefore minimal investment income has been earned to date.

Gross Premiums Written

Gross premiums written were \$52.2 million and \$49.0 million for the three months ended March 31, 2010 and 2009, respectively, and consist primarily of property and specialty lines. For the three months ended March 31, 2010, the property line gross premiums written were \$19.5 million and the specialty lines were \$32.7 million, compared to \$9.1 million and \$39.9 million, respectively, for the same period in 2009.

Index

Premiums Ceded

Premiums ceded for the three months ended March 31, 2010 and 2009, were \$11.6 million and \$5.1 million (22.2% and 10.5% of gross premiums written), respectively. In the normal course of its business, the Company purchases reinsurance in order to manage its exposures. Premiums ceded to Flagstone Suisse under our intercompany reinsurance programs were \$5.3 million and \$nil for the three months ended March 31, 2010 and 2009, respectively. The amount and type of reinsurance that it enters into is dependent on a variety of factors, including the cost of a particular reinsurance cover and the nature of its gross premiums written during a particular period.

Net Premiums Earned

Net premiums earned totaled \$35.7 million and \$6.4 million, respectively, for the three months ended March 31, 2010 and 2009. The increase in the net premiums earned is due to the ramp up of premiums earnings from the start up phase in 2009.

Other Related Income

Other related income, derived from services provided to syndicates and third parties, totaled \$8.6 million and \$2.0 million, respectively, for the three months ended March 31, 2010 and 2009. The increase in the three months ended March 31, 2010 compared to the same period last year is primarily as a result of the recognition of profit commission from Syndicate 1861's 2007 year of account.

Underwriting Expenses

a. Loss and loss adjustment expenses

Loss and loss adjustment expenses amounted to \$29.4 million and \$5.3 million, respectively, for the three months ended March 31, 2010 and 2009. Loss events recorded during the three months ended March 31, 2010, include gross losses of \$2.5 million related to the Chile earthquake.

b. Acquisition costs

Acquisition costs totaled \$9.0 million and \$1.0 million, respectively, for the three months ended March 31, 2010 and 2009. The acquisition cost ratio, which is equal to acquisition cost expenses over net premiums earned, for the three months ended March 31, 2010 and 2009 was 25.2% and 16.1%, respectively. The increase in acquisition cost ratio is primarily attributable to changes in the business mix. Acquisition costs include brokerage, gross commission costs, profit commission and premium taxes.

c. General and administrative expenses

General and administrative expenses for the three months ended March 31, 2010 and 2009 were \$4.9 million and \$3.8 million, respectively. General and administrative expenses include staff and salary related costs, administration expenses and Lloyd's specific costs such as syndicate expenses. The increase in general and administrative expenses in the first quarter of 2010 as compared to the same period in 2009, is primarily related to the increase in underwriting staff, which occurred after the first quarter of 2009.

Island Heritage Segment

Overview

The net underwriting income (loss) for the three months ended March 31, 2010, amounted to \$1.2 million compared to \$(0.3) million for the three months ended March 31, 2009.

Gross Premiums Written

Gross premiums written were \$17.8 million for the three months ended March 31, 2010, compared to \$16.7 million for the three months ended March 31, 2009. The increase is primarily related to continued growth in the Cayman Islands, Bahamas, British Virgin Islands and Turks and Caicos. Contracts are written on a per risk basis and consist primarily of property lines. Seasonality is inherent for most Caribbean insurers given that the storm season begins June 1 and concludes November 30.

Index

Premiums Ceded

Premiums ceded for the three months ended March 31, 2010, were \$10.4 million (58.6% of gross premiums written) compared to \$10.9 million (65.1% of gross premiums written) for the three months ended March 31, 2009. Premiums ceded to Flagstone Suisse under our intercompany reinsurance programs were \$7.1 million and \$8.0 million for the three months ended March 31, 2010 and 2009, respectively.

Net Premiums Earned

Net premiums earned totaled \$2.2 million for the three months ended March 31, 2010, compared to \$(0.2) million for the three months ended March 31, 2009. The increase in net premiums earned is primarily due to the increase in gross premiums written and reduced premium ceded.

Other Related Income

Other related income, primarily quota share reinsurance ceding commissions, totaled \$5.6 million for the three months ended March 31, 2010, compared to \$5.6 million for the three months ended March 31, 2009. The other related income includes \$3.9 million for the three months ended March 31, 2010 related to the quota share arrangement between Island Heritage and Flagstone Suisse, compared to \$3.6 million for the three months ended March 31, 2009. This amount is fully eliminated upon consolidation.

Underwriting Expenses

a. Loss and loss adjustment expenses

Loss and loss adjustment expenses amounted to \$0.4 million for the three months ended March 31, 2010, compared to \$0.1 million for the three months ended March 31, 2009.

b. Acquisition costs

Acquisition costs totaled \$4.0 million for the three months ended March 31, 2010, compared to \$3.3 million for the three months ended March 31, 2009. Acquisition costs include gross commission costs, profit commission, premium taxes, and the change in deferred acquisition costs.

c. General and administrative expenses

General and administrative expenses for the three months ended March 31, 2010 were \$2.2 million compared to \$2.4 million in the three months ended March 31, 2009.

Investment Results

The total return on our investment portfolio, excluding noncontrolling interests in the investment portfolio, comprises investment income and realized and unrealized gains and losses on investments. For the three months ended March 31, 2010, the total return on invested assets was 0.8% compared to (0.1)% for the three months ended March 31,

2009. The change in the return on invested assets of 0.9% during the three months ended March 31, 2010, compared to the same period in 2009 is primarily due to the positive performance on our corporate bond portfolios and Inflation Protected Securities.

a. Net investment income

Net investment income (loss) for the three months ended March 31, 2010 was \$7.3 million compared to \$(1.8) million for the same period in 2009, an increase of \$9.1 million. The increase is principally due to the sharp decrease in inflation in the 2009 period which caused the Treasury Inflation Protected Securities to generate negative amortization during that period.

Index

Investment income is principally derived from interest and dividends earned on investments, partially offset by investment management and custody fees. The components are set forth in the table below:

	For the three months ended	
	March 31, 2010	March 31, 2009
Interest and dividend income (expense)		
Cash and cash equivalents	\$51	\$745
Fixed maturities	8,006	7,383
Short term	829	93
Equity investments	-	32
Other investments	46	(36)
Amortization income (expense)		
Fixed maturities	(547)	(8,673)
Short term	(452)	29
Other investments	304	(82)
Investment expenses	(952)	(1,244)
Net investment income (loss)	\$7,285	\$(1,753)

Substantially all of our fixed maturity investments consisted of investment grade securities. As at March 31, 2010, the average credit rating provided by a recognized national rating agency of our fixed maturity portfolio was AA+ with an average duration of 2.5 years.

b. Net realized and unrealized gains and losses – investments

Our investment portfolio is structured to preserve capital and provide us with a high level of liquidity and is managed to produce a total return. In assessing returns under this approach, we include investment income and realized and unrealized gains and losses generated by the investment portfolio.

Net realized and unrealized gains on our investment portfolio amounted to \$9.8 million for the three months ended March 31, 2010, compared to losses of \$1.9 million for the three months ended March 31, 2009.

The following table is the breakdown of net realized and unrealized gains (losses) - investments in the unaudited condensed consolidated statements of operations into its various components:

	For the three months ended	
	March 31, 2010	March 31, 2009
Net realized gains (losses) on fixed maturities	\$2,587	\$(244)
Net unrealized (losses) gains on fixed maturities	(13,248)	14,187
Net realized (losses) on equities	-	(2,628)
Net unrealized (losses) gains on equities	(63)	2,580

Edgar Filing: Flagstone Reinsurance Holdings Ltd - Form 10-Q

Net realized and unrealized gains (losses) on derivative instruments - investments	19,756	(15,096)
Net realized and unrealized gains (losses) on other investments	779	(698)
Total net realized and unrealized gains (losses) - investments	\$9,811	\$(1,899)

Net realized and unrealized losses on the fixed maturities of \$10.7 million for the three months ended March 31, 2010, were primarily due to unrealized losses on our non-U.S. dollar bonds due to the strengthening of the U.S. dollar. Foreign exchange losses were offset by gains on derivatives used for foreign exchange hedging, as described in the note above.

Net realized and unrealized gains on other investments of \$0.8 million during the three months ended March 31, 2010 were due to \$0.7 million of gains on the Catastrophe Bond portfolio and \$0.1 million of gains on the investment funds held.

Index

The following table is a breakdown of the net realized and unrealized gains (losses) on derivatives included in the table above:

	For the three months ended	
	March 31, 2010	March 31, 2009
Futures contracts	\$396	\$(4,153)
Total return swaps	1,244	(8,735)
Foreign currency forward contracts	17,462	(3,166)
Mortgage-backed securities TBA	654	958
Net realized and unrealized gains (losses) on derivatives - investments	\$19,756	\$(15,096)

Net realized and unrealized gains on futures contracts of \$0.4 million for the three months ended March 31, 2010, were primarily due to \$1.4 million of gains on U.S. and global equity index futures offset by \$1.0 million of losses on commodity index futures.

Net realized and unrealized gains on swap contracts of \$1.2 million during the three months ended March 31, 2010, were primarily due to \$0.5 million of gains on U.S. equity exposure and \$0.7 million of gains on global inflation bond exposure.

Net realized and unrealized gains on foreign currency forward contracts of \$17.5 million during the three months ended March 31, 2010 are related to currency hedges on non-U.S. dollar investment assets and are offset by net realized and unrealized losses on the fixed maturities as described above.

Treasury Hedging and Other

Net realized and unrealized gains and losses – other

The Company's policy is to hedge the majority of its non-investment currency exposure with derivative instruments such as foreign currency swaps and foreign currency forward contracts.

Currency swaps and foreign currency forward contracts are used to hedge the economic currency exposure of the Company's investment in foreign subsidiaries and to hedge operational balances such as premiums receivable, loss reserves and the portion of our long term debt issued in Euros.

The following table is the breakdown of net realized and unrealized gains - other in the consolidated statements of operations into its various components:

	For the three months ended	
	March 31, 2010	March 31, 2009
Currency swaps	\$(1,087)	\$(785)
Foreign currency forward contracts	6,190	7,675

Edgar Filing: Flagstone Reinsurance Holdings Ltd - Form 10-Q

Reinsurance derivatives	555	540
Net realized and unrealized gains - other	\$5,658	\$7,430

Index

For the three months ended March 31, 2010, we recorded \$6.2 million of net realized and unrealized gains on foreign currency forward contracts on Flagstone Suisse's net assets (undesignated hedge) and on operational hedges on reinsurance balances versus \$7.7 million in gains for the same period in 2009.

Reinsurance derivatives relate to ILWs that are structured as derivative transactions. The Company recorded premiums earned on ILWs determined to be derivatives of \$0.6 million for the three months ended March 31, 2010 versus \$0.5 million for the same period in 2009.

Interest Expense

Interest expense was \$2.5 million for the three months ended March 31, 2010 compared to \$3.6 million for the three months ended March 31, 2009. Interest expense consists of interest due on outstanding debt securities and the amortization of debt offering expenses. The decrease in interest expense for the three months ended March 31, 2010, compared to the same period in 2009 is primarily related to the decrease in short term interest rates from period to period.

Foreign Exchange

For the three months ended March 31, 2010, we experienced net foreign exchange gains of \$4.0 million compared to losses of \$1.1 million for the three months ended March 31, 2009. Net foreign exchange gains were principally experienced on the net monetary asset and liability balances denominated in foreign currencies. The Company's policy is to hedge the majority of its foreign currency exposures with derivative instruments such as foreign currency swaps and foreign currency forward contracts. Net realized and unrealized gains and losses on derivatives used to hedge those balances are included in "Net realized and unrealized gains— other" in the unaudited consolidated financial statements.

Income Tax Expense

The Company has subsidiaries that operate in various other jurisdictions around the world that are subject to tax in the jurisdictions in which they operate. The significant jurisdictions in which the Company's subsidiaries are subject to tax are Canada, Cyprus, India, Luxembourg, South Africa, Switzerland, U.S. Virgin Islands ("USVI") and the United Kingdom. However, since the majority of our income to date has been earned in Bermuda where we are exempt from income tax, the Company's tax impact to date has been minimal. During the three months ended March 31, 2010, income tax expense was \$2.9 million compared to an income tax recovery of \$0.7 million for the three months ended March 31, 2009.

Noncontrolling Interest

The results of Mont Fort have been included in the Company's unaudited condensed consolidated financial statements, with the portions of Mont Fort's net income and shareholders' equity attributable to the preferred shareholders recorded as noncontrolling interest since January 12, 2007, in accordance with the FASB ASC Topic on Consolidation. In relation to Mont Fort, the Company recorded income attributable to noncontrolling interest of \$5.5 million for the three months ended March 31, 2010, compared to income attributable to noncontrolling interest of \$2.9 million for the same period in 2009.

The results of operations of Island Heritage have been included in the Company's unaudited condensed consolidated financial statements from July 1, 2007 onwards, with the portions of Island Heritage's net income and shareholders' equity attributable to minority shareholders recorded as noncontrolling interest. The Company recorded income attributable to noncontrolling interest of \$0.6 million for the three months ended March 31, 2010, compared to a loss attributable to noncontrolling interest of \$0.1 million for the three months ended March 31, 2009.

On November 10, 2009, Flagstone Suisse became the sole shareholder of Flagstone Africa by acquiring the remaining 35% of shares owned by Imperial Holdings Limited for a purchase price of \$11.4 million. The Company recorded a loss attributable to noncontrolling interest of \$0.1 million for the three months ended March 31, 2009.

Index

Comprehensive Income

Comprehensive income attributable to Flagstone for the three months ended March 31, 2010 was \$28.3 million compared to \$37.6 million for the same period in 2009. For the three months ended March 31, 2010, comprehensive income attributable to Flagstone included \$37.6 million of net income, \$(3.7) million for the change in the currency translation adjustment, \$0.5 million for the change in the defined benefit pension plan obligation and \$(6.0) million related to comprehensive income attributable to noncontrolling interest in subsidiaries, compared to \$38.5 million of net income, \$1.9 million for the change in the currency translation adjustment, \$(0.2) million for the change in the defined benefit pension plan obligation and \$(2.6) million related to comprehensive income attributable to noncontrolling interest in subsidiaries for the three months ended March 31, 2009.

The currency translation adjustment is as a result of the translation of our foreign subsidiaries into U.S. dollars, net of transactions designated as hedges of net foreign investments. The Company has entered into certain foreign currency forward contracts that it has designated as hedges in order to hedge its net investment in foreign subsidiaries. To the extent that the contract is effective as a hedge, both the realized and unrealized gains and losses associated with the designated hedge instruments are recorded in other comprehensive income as part of the cumulative translation adjustment. The Company designated \$60.6 million and \$162.0 million of foreign currency forwards contractual value as hedge instruments, which had fair values of \$(0.3) million and \$(0.4) million, at March 31, 2010 and December 31, 2009, respectively. The Company recorded \$0.6 million of realized and unrealized foreign exchange gains on these hedges during the three months ended March 31, 2010 and \$6.8 million of realized and unrealized foreign exchange gains on these hedges during the three months ended March 31, 2009.

Financial Condition, Liquidity and Capital Resources

Financial Condition

Our investment portfolio on a risk basis, at March 31, 2010, comprised 88.8% fixed maturities, short term investments and cash and cash equivalents, 4.9% equities and the balance in other investments. We believe our investments can be liquidated and converted into cash within a very short period of time. However, our investments in investment funds, which represent 0.2% of our total investments and cash and cash equivalents at March 31, 2010, do not trade in active markets and are subject to redemption provisions that prevent us from converting them into cash immediately.

At March 31, 2010, all of our fixed maturity securities were rated investment-grade (BBB- or higher) by Standard & Poor's (or an equivalent rating by another rating agency) with an average rating of AA+. At December 31, 2009, all of our fixed maturity securities, with the exception of \$0.5 million, were rated investment-grade (BBB- or higher) by Standard & Poor's (or estimated equivalent) with an average rating of AA+.

At March 31, 2010, and December 31, 2009, the average duration of the Company's investment portfolio was 2.5 years and 2.3 years, respectively. The duration decreased mostly due to a change in asset allocation during the period.

At March 31, 2010 and December 31, 2009, we had no exposure to sub-prime backed investments or collateralized debt obligations ("CDOs") of sub-prime backed investments. At March 31, 2010 we had no exposure to Alt-A securities and at December 31, 2009, our holdings were \$0.8 million with an average rating of AAA. Alt-A securities are defined as a classification of mortgages where the risk profile falls between prime and sub-prime. The borrowers behind these mortgages will typically have clean credit histories, but the mortgage itself will generally have some

features that increase its risk profile compared to prime securities, but less risky than sub-prime backed investments. These features include higher loan-to-value and debt-to-income ratios or inadequate documentation of the borrower's income. The Company's exposure to traditional monoline insurers emanates from our non sub-prime asset-backed holdings. We did not hold securities with credit enhancement from the traditional monoline insurers at March 31, 2010 and December 31, 2009. We do not have any collateralized loan obligations or CDO exposures in our portfolio.

Index

At March 31, 2010, our total of investments, cash and cash equivalents, and restricted cash was \$2.0 billion, compared to \$1.9 billion at December 31, 2009.

The major factors influencing the increase in the three month period ended March 31, 2010, were as follows:

- Cash from operations of \$67.5 million
- Net investment income of \$7.3 million
- Total net realized and unrealized gains on investments and other of \$15.5 million
 - Dividends paid of \$3.3 million

Other investments as at March 31, 2010, amounted to \$56.4 million compared to \$45.9 million at December 31, 2009. At March 31, 2010, the other investments comprised our investment in catastrophe bonds of \$46.6 million, in private equity and hedge funds of \$5.7 million and the Company's \$4.1 million equity investment. The increase in other investments during the first three months of 2010 is principally related to an increase of \$10.0 million in the principal amount of the catastrophe bonds resulting from a purchase. Other investments are recorded at fair value with the exception of our equity investment which is accounted for under the equity method.

The net payable for investments purchased at March 31, 2010, was \$27.4 million, compared to a net payable for investments purchased of \$6.3 million at December 31, 2009. Net payables and receivables for investments are a result of timing differences only, as investments are accounted for on a trade date basis.

Liquidity

Cash flows from operations for the three months ended March 31, 2010 decreased to \$67.5 million from \$73.1 million as compared to the same period in 2009. This decrease in cash flows from operations was primarily related to increased premium balances receivable and unearned premium ceded balances partially offset by increased loss and loss adjustment expense reserves and unearned premium balances. Because a large portion of the coverages we provide typically can produce losses of high severity and low frequency, it is not possible to accurately predict our future cash flows from operating activities. As a consequence, cash flows from operating activities may fluctuate, perhaps significantly, between individual quarters and years.

Cash flows relating to financing activities include the payment of dividends, share related transactions and the issuance or repayment of debt. During the three months ended March 31, 2010, net cash of \$36.7 million was used in financing activities, compared to \$3.9 million for the three months ended March 31, 2009. In the first three months of 2010, the net cash used in financing activities related principally to the payment of dividends and the repurchase of common shares held in treasury. In the first three months of 2009, the net cash used by financing activities related principally to the payment of dividends and the redemption of preferred shares in Mont Fort ILW 2.

We may incur additional indebtedness in the future if we determine that it would be an efficient part of our capital structure.

Generally, positive cash flows from our operating and financing activities are invested in the Company's investment portfolio.

Index

For the period from October 2005 until March 31, 2010, we have had sufficient cash flows from operations to meet our liquidity requirements. We expect that our operational needs for liquidity for at least the next twelve months will be met by our balance of cash, funds generated from underwriting activities, investment income and the proceeds from sales and maturities of our investment portfolio. The Company may require additional capital in the near term, whether through letters of credit or otherwise. In the current financial environment, it may be difficult for the insurance industry generally, and the Company in particular, to raise additional capital when required, on acceptable terms or at all. Cash and cash equivalents were \$412.4 million at March 31, 2010.

Capital Resources

Our total capital resources at March 31, 2010 and December 31, 2009 were as follows:

	As at	
	March 31, 2010	December 31, 2009
Long term debt	\$251,309	\$252,402
Common shares	850	850
Common shares held in treasury	(50)	(20)
Additional paid-in capital	864,708	892,817
Accumulated other comprehensive income	(10,173)	(6,976)
Retained earnings	352,266	324,347
Total capitalization	\$1,458,910	\$1,463,420

The movement in additional paid-in capital for the three months ended March 31, 2010, primarily arises from \$33.6 million for the repurchase of common stock held in treasury, offset by \$5.5 million of stock based compensation.

The movement in accumulated other comprehensive income arises from the currency translation adjustment of \$(3.7) million and the defined benefit pension plan obligation of \$0.5 million.

Letter of Credit Facilities

Under the terms of certain reinsurance contracts, our reinsurance subsidiaries may be required to provide letters of credit to reinsureds in respect of reported claims and/or unearned premiums.

On June 5, 2009, Flagstone Suisse entered into a secured \$50.0 million standby letter of credit facility with BNP Paribas (the "BNP Facility"). The BNP Facility will be used to support the reinsurance obligations of the Company and its subsidiaries. As at March 31, 2010, no letters of credit have been issued under the BNP Facility.

On March 5, 2009, Flagstone Suisse entered into a \$200.0 million secured committed letter of credit facility with Barclays Bank Plc (the "Barclays Facility"). The Barclays Facility will be used to support the reinsurance obligations of the Company and its subsidiaries. As at March 31, 2010, \$32.3 million had been drawn under the Barclays Facility, and the drawn amount was secured by \$35.9 million of fixed maturity securities from the Company's investment portfolio.

On January 22, 2009, Flagstone Suisse entered into a secured \$450.0 million standby letter of credit facility with Citibank Europe Plc (the "Citi Facility"). The Citi Facility comprises a \$225.0 million facility for letters of credit with a maximum tenor of 15 months, to be used to support reinsurance obligations of the Company and its subsidiaries, and a \$225.0 million facility for letters of credit drawn in respect of Funds at Lloyd's with a maximum tenor of 60 months. As at March 31, 2010, \$394.5 million had been drawn under the Citi Facility, and the drawn amount of the facility was secured by \$438.4 million of fixed maturity securities from the Company's investment portfolio.

These facilities are used to provide security to reinsureds and are collateralized by the Company, at least to the extent of the letters of credit outstanding at any given time.

Index

Restrictions and Specific Requirements

Flagstone Suisse is licensed to operate as a reinsurer in Switzerland and is also licensed in Bermuda through the Flagstone Suisse branch office and is not licensed in any other jurisdictions. Because many jurisdictions do not permit insurance companies to take credit for reinsurance obtained from unlicensed or non-admitted insurers on their statutory financial statements unless appropriate security mechanisms are in place, we anticipate that our reinsurance clients will typically require Flagstone Suisse to post a letter of credit or other collateral.

Swiss law permits dividends to be declared only after profits have been allocated to the reserves required by law and to any reserves required by the articles of incorporation. The articles of incorporation of Flagstone Suisse do not require any specific reserves. Therefore, Flagstone Suisse must allocate any profits first to the reserve required by Swiss law generally, and may pay as dividends only the balance of the profits remaining after that allocation. In the case of Flagstone Suisse, Swiss law requires that 20% of the company's profits be allocated to a "general reserve" until the reserve reaches 50% of its paid-in share capital.

In addition, a Swiss reinsurance company may pay a dividend only if, after payment of the dividend, it will continue to comply with regulatory requirements regarding minimum capital, special reserves and solvency requirements.

The Bermuda Insurance Act requires Flagstone Suisse to maintain a minimum solvency margin (being the minimum amount that the statutory assets must exceed the statutory liabilities as required by the Bermuda Insurance Act) equal to the greatest of (i) \$100 million, (ii) 50% of net premiums written or (iii) 15% of the reserve for losses and loss adjustment expenses. Bermuda law limits the maximum amount of annual dividends or distributions payable by Flagstone Suisse to the Company and in certain cases requires the prior notification to, or the approval of, the Bermuda Monetary Authority ("BMA"). As a Bermuda Class 4 reinsurer, Flagstone Suisse may not pay dividends in any financial year which would exceed 25% of its total statutory capital and surplus unless at least seven days before payment of those dividends it files an affidavit with the BMA signed by at least two directors and Flagstone Suisse's principal representative, which states that in their opinion, declaration of those dividends will not cause Flagstone Suisse to fail to meet its prescribed solvency margin and liquidity ratio. Further, Flagstone Suisse may not reduce by 15% or more its total statutory capital as set out in its previous year's statements, without the prior approval of the BMA. Flagstone Suisse must also maintain, as a Class 4 Bermuda reinsurer, paid-up share capital of \$1 million.

Island Heritage is domiciled in the Cayman Islands and maintains a Class A Domestic Insurance License issued in accordance with the terms of the Insurance Law (as revised) of the Cayman Islands, or the Law, and is subject to regulation by the Cayman Islands Monetary Authority ("CIMA") in terms of the Law. Island Heritage is required to maintain a net worth (defined in the Law as the excess of assets, including any contingent or reserve fund secured to the satisfaction of CIMA, over liabilities other than liabilities to partners or shareholders) of at least 100,000 Cayman Islands dollars (which is equal to approximately U.S. \$120,000), subject to increase by CIMA depending on the type of business undertaken. In addition Island Heritage may not issue any dividends without prior approval from the Cayman Islands Monetary Authority. In order to obtain approval Island Heritage must demonstrate that the issuing of dividends would not render Island Heritage insolvent or affect its ability to pay any future claims.

Flagstone Africa is licensed to operate as a reinsurer in South Africa and is subject to statutory minimum capital requirements under applicable legislation. In addition, a South African reinsurance company may pay a dividend only if, after payment of the dividend, it will continue to comply with regulatory requirements regarding minimum capital, special reserves and solvency requirements.

Flagstone Alliance operates under license issued by the Cyprus Insurance Superintendent to conduct general reinsurance and insurance business. Cyprus Companies Law permits dividends to be declared only if there are available sufficient distributable reserves after profits have been allocated to the reserves required by law and to any reserves required by the articles of incorporation. The articles of incorporation of Flagstone Alliance do not require any specific reserves. Irrespective of the Cyprus Companies Law, Cap 113 requirements and the Flagstone Alliance's articles of association, Flagstone Alliance should maintain at any time, reserves and assets that meet the Solvency criteria and Orders of the Cyprus Insurance Superintendent. Flagstone Alliance complies and reports to the Superintendent of Insurance under Solvency I requirements and the Solvency II requirements will be adopted in 2012. Revenue reserves are distributable to the extent permitted by the Companies Law, and Flagstone Alliance's Articles of Association. The share premium account cannot be used for the distribution of dividends but can be used to issue bonus shares. The reserve arising on the conversion of share capital to Euro may be capitalized by way of a future capital increase; alternatively, Flagstone Alliance may decide at a shareholders' general meeting to distribute the decrease by way of a dividend.

Index

Marlborough and Syndicate 1861 are regulated by the Financial Services Authority (“FSA”) in the United Kingdom. The FSA is an independent non-governmental body, given statutory powers by the Financial Services and Markets Act 2000. Although accountable to treasury ministers and through them to Parliament, it is funded entirely by the firms it regulates. The FSA has wide ranging powers in relation to rule-making, investigation and enforcement to enable it to meet its four statutory objectives, which are summarized as one overall aim: “to promote efficient, orderly and fair markets and to help retail consumers achieve a fair deal”.

In relation to insurance business, the FSA regulates insurers, insurance intermediaries and Lloyd’s itself. The FSA and Lloyd’s have common objectives in ensuring that Lloyd’s market is appropriately regulated and, to minimize duplication, the FSA has agreed arrangements with Lloyd’s for cooperation on supervision and enforcement.

Marlborough’s underwriting activities are therefore regulated by the FSA as well as being subject to the Lloyd’s “franchise”. Both FSA and Lloyd’s have powers to remove their respective authorization to manage Lloyd’s syndicates. Lloyd’s approves annually Syndicate 1861’s business plan and any subsequent material changes, and the amount of capital required to support that plan. Lloyd’s may require changes to any business plan presented to it or additional capital to be provided to support the underwriting (known as Funds at Lloyd’s).

Off Balance Sheet Arrangements

Valais Re is a special purpose Cayman Islands exempted company licensed as a restricted Class B reinsurer in the Cayman Islands and formed solely for the purpose of entering into certain reinsurance agreements and other risk transfer agreements with subsidiaries of Flagstone Suisse. We have entered into a reinsurance agreement with Valais Re that provides us with \$104.0 million of aggregate indemnity protection for certain losses from global catastrophe events.

The Company has determined that Valais Re has the characteristics of a variable interest entity that are addressed by the Consolidation Topic of the FASB ASC. In accordance with the Consolidation Topic, Valais Re is not consolidated because the Company does not hold a variable interest and as such is not the primary beneficiary.

Montana Re is a special purpose reinsurer established in the Cayman Islands and was formed as a program structure enabling further issuance of additional series of notes in the future. We have entered into a reinsurance agreement with Montana Re that provides us with \$175.0 million of protection for certain losses from global catastrophe events.

The Company has determined that Montana Re has the characteristics of a variable interest entity that are addressed by the Consolidation Topic of the FASB ASC. In accordance with the Consolidation Topic, Montana Re is not consolidated because the Company does not hold a variable interest and as such is not the primary beneficiary.

We are not party to any transaction, agreement or other contractual arrangement to which an affiliated entity unconsolidated with us is a party, other than that noted above with Valais Re and Montana Re, that management believes is reasonably likely to have a current or future effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

For details relating to our letter of credit facilities see “Financial Condition, Liquidity and Capital Resources - Financial Condition – Letter of Credit Facilities”.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We measure and manage market risks and other risks as part of an enterprise-wide risk management process. The market risks described in this section relate to financial instruments, primarily in our investment portfolio, that are sensitive to changes in interest rates, credit risk premiums or spreads, foreign exchange rates and equity prices.

We believe that we are currently principally exposed to four types of market risk: interest rate risk, equity price risk, credit risk and foreign currency risk.

Interest Rate Risk

Our primary market risk exposure is to changes in interest rates. Fluctuations in interest rates have a direct impact on the market valuation of our fixed maturity portfolio. As interest rates rise, the market value of our fixed maturity portfolio falls and we have the risk that cash outflows will have to be funded by selling assets, which will be trading at depreciated values. As interest rates decline, the market value of our fixed maturity portfolio increases and we have reinvestment risk since funds reinvested will earn less than is necessary to match anticipated liabilities. We expect to manage interest rate risk by selecting investments with characteristics such as duration, yield, currency and liquidity which can be tailored to the anticipated cash outflow characteristics of the reinsurance liabilities of the Company. In addition, from time-to-time, the Company may enter into interest rate swap contracts as protection against unexpected shifts in interest rates, which would affect the fair value of the fixed maturity portfolio. By using swaps in the portfolio, the overall duration or interest rate sensitivity of the portfolio can be altered.

As at March 31, 2010, the impact on our fixed maturity securities and cash and cash equivalents, from an immediate 100 basis point increase in market interest rates would have resulted in an estimated decrease in market value of 2.5%, or approximately \$44.7 million. As at March 31, 2010, the impact on our fixed maturity securities and cash and cash equivalents, from an immediate 100 basis point decrease in market interest rates would have resulted in an estimated increase in market value of 2.7%, or approximately \$47.4 million.

As at March 31, 2010, we held \$242.4 million, or 16.1%, of our fixed maturity portfolio in asset-backed and mortgage-backed securities. We did not hold any sub-prime securities at March 31, 2010. These assets are exposed to prepayment risk, which occurs when holders of underlying loans increase the frequency with which they prepay the outstanding principal before the maturity date and refinance at a lower interest rate cost. The adverse impact of prepayment is more evident in a declining interest rate environment. As a result, the Company would also be exposed to reinvestment risk, as cash flows received by the Company could be accelerated and would be reinvested at the prevailing interest rates.

Equity Price Risk

We gain exposure to the equity, commodities and real estate markets through the use of various equity securities, index-linked futures, exchange traded funds and investment funds. The total of such exposure as of March 31, 2010 was \$164.3 million. However, from a fair value perspective, futures are valued for only the unrealized gains and losses, but not for the exposure. As a result, the fair value of these positions as at March 31, 2010 amounted to \$1.8 million and was recorded in both equities and other investments with net realized and unrealized gains of \$0.8 million for the three months ended March 31, 2010, recorded in net realized and unrealized gains (losses) - investments. The total exposure of the index-linked futures was \$164.1 million as at March 31, 2010.

Credit Risk

The Company has exposure to credit risk primarily as a holder of fixed maturity securities. Our risk management strategy and investment guidelines have been defined to ensure we invest in debt instruments of high credit quality issuers and to limit the amount of credit exposure with respect to particular ratings categories and any one issuer. As at March 31, 2010, the majority of our fixed maturity investments consisted of investment grade securities with an average rating of AA+. The Company believes this high-quality portfolio reduces its exposure to credit risk on fixed income investments to an acceptable level.

The Company does not allow sub-prime investments by any investment manager and therefore does not have any exposure to credit risk associated with these types of securities. At March 31, 2010, we did not hold any Alt –A securities.

Index

To a lesser extent, the Company also has credit risk exposure as a party to over-the-counter derivative instruments. These derivative instruments include foreign currency forwards contracts, currency swaps, interest rate swaps, total return swaps, and reinsurance derivatives. To mitigate this risk, we monitor our exposure by counterparty and ensure that counterparties to these contracts are high-credit-quality international banks or counterparties.

In addition, the Company has exposure to credit risk as it relates to its trade balances receivable, namely insurance and reinsurance balances receivable. Insurance and reinsurance balances receivable from the Company's clients at March 31, 2010 and December 31, 2009, were \$386.8 million and \$279.0 million, respectively, including balances both currently due and accrued. The Company believes that credit risk exposure related to these balances is mitigated by several factors, including but not limited to credit checks performed as part of the underwriting process, monitoring of aged receivable balances, our right to cancel the cover for non-payment of premiums, and our right to offset premiums yet to be paid against losses due to the cedent. Since our inception in October 2005, we have recorded \$3.5 million in bad debt expenses related to its insurance and reinsurance balances receivable.

The Company purchases retrocessional reinsurance and we require our reinsurers to have adequate financial strength. The Company evaluates the financial condition of its reinsurers and monitors its concentration of credit risk on an ongoing basis.

In addition, consistent with industry practice, we assume a degree of credit risk associated with reinsurance and insurance brokers. We frequently pay amounts owed on claims under our policies to reinsurance brokers, and these brokers, in turn, pay these amounts to the ceding insurers that have reinsured a portion of their liabilities with us. In some jurisdictions, if a broker fails to make such a payment, we may remain liable to the ceding insurer for the deficiency. Conversely, in certain jurisdictions, when the ceding insurer pays premiums to reinsurance brokers for payment to us, these premiums are considered to have been paid and the ceding insurer will no longer be liable to us for those amounts, regardless of whether we have received the premiums.

For risk management purposes, we use catastrophe bonds to manage our reinsurance risk and treat the catastrophe risks related to catastrophe bonds as part of the underwriting risks of the Company. Catastrophe bonds are selected by our reinsurance underwriters however they are held in our investment portfolio as low risk floating rate bonds. We believe that amalgamating the catastrophe risk in the catastrophe bonds with our other reinsurance risks produces more meaningful risk management reporting.

Foreign Currency Risk

The Company and its subsidiaries use foreign currency forward currency contracts and currency swaps to manage currency exposure. The contractual amount of foreign currency forward contracts as at March 31, 2010 and December 31, 2009 was \$684.8 million and \$678.5 million, respectively, and these contracts had a fair value of \$11.4 million and \$5.8 million, respectively. During the three months ended March 31, 2010, the Company recorded net realized and unrealized gains of \$23.7 million on foreign currency forward contracts and for the three months ended March 31, 2009, the Company recorded net realized and unrealized gains of \$4.5 million on foreign currency forward contracts.

Premiums, Reserves, and Claims

The U.S. dollar is our principal reporting currency and the functional currencies of our operating subsidiaries are generally their national currencies, except for our Bermuda, Cayman Islands, Luxembourg, Gibraltar, Marlborough subsidiaries and Flagstone Suisse, whose functional currency is the U.S. dollar. We enter into reinsurance contracts where the premiums receivable and losses payable are denominated in currencies other than the U.S. dollar. When we incur a loss in a non-U.S. dollar currency, we carry the liability on our books in the original currency. As a result, we have an exposure to foreign currency risk resulting from fluctuations in exchange rates between the time premiums are collected and converted to the functional currency (either U.S. dollars, Euro, Great Britain pound or South African rand), and the time claims are paid.

Index

With respect to loss reserves denominated in non-U.S. dollar currencies, our policy is to hedge our non-U.S. dollar foreign currency exposure with forward foreign exchange purchases. Expected losses means incurred and reported losses and incurred but not reported losses. We do not hedge future catastrophe events. However, upon the occurrence of a catastrophe loss and when the actuarial department has estimated the loss to the Company, we purchase foreign currency promptly on a forward basis. When we pay claims in non-base currencies, we either use the proceeds of a foreign currency forward contract to do so, or buy spot foreign exchange to pay the claim and simultaneously adjust the hedge balance to the new lower exposure.

Investments

The majority of the securities held in our investment portfolios are measured in U.S. dollars, with a portion of our fixed maturities portfolio invested in non-U.S. dollar currencies. At the time of purchase, each investment is identified as either a hedged investment, to be maintained with an appropriate currency hedge to U.S. dollars or an unhedged investment, one not to be maintained with a hedge. Generally, fixed income investments will be hedged, listed equity investments may or may not be hedged, and other investments such as real estate and commodities will not be hedged.

Financing

When the Company or its subsidiaries issues a debt or equity financing in a currency other than the functional currency of that company, our practice is to hedge that exposure and designate the foreign currency contracts as hedging instruments. The contractual amount of these contracts as at March 31, 2010 and December 31, 2009 was \$60.6 million and \$162.0 million, respectively, and the contracts had a fair value of \$(0.3) million and \$(0.4) million, respectively. During the three months ended March 31, 2010, the Company recorded \$0.6 million of realized and unrealized losses directly into comprehensive income as part of the cumulative translation adjustment for the effective portion of the hedge. During the three months ended March 31, 2009, the Company recorded \$6.8 million of realized and unrealized gains directly into comprehensive income as part of the cumulative translation adjustment for the effective portion of the hedge.

The Company entered into a currency swap agreement to hedge the Euro-denominated Deferrable Interest Debentures recorded as long term debt. Under the terms of the foreign currency swap, the Company exchanged €13.0 million for \$18.4 million, will receive Euribor plus 354 basis points and pay LIBOR plus 367 basis points. The swap expires on September 15, 2011 and had a fair value of \$(0.8) million as at March 31, 2010.

Foreign currency exchange contracts will not eliminate fluctuations in the value of our assets and liabilities denominated in foreign currencies but rather allow us to establish a rate of exchange for a future point in time. Of our business written in the three month periods ended March 31, 2010 and 2009, approximately 40.8% and 38.0%, respectively, was written in currencies other than the U.S. dollar. For the three months ended March 31, 2010, we had net realized and unrealized foreign exchange gains of \$4.0 million compared to foreign exchange losses of \$1.1 million for the same period in 2009.

The Company does not hedge currencies for which its asset or liability exposures are not material or where it is unable or impractical to do so. In such cases, the Company is exposed to foreign currency risk. However, the Company does not believe that the foreign currency risks corresponding to these unhedged positions are material.

Effects of Inflation

We do not believe that inflation has had a material effect on our combined results of operations, except insofar as inflation may affect interest rates.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This Form 10-Q contains, and the Company may from time to time make, written or oral “forward-looking statements” within the meaning of the U.S. federal securities laws, which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. All forward-looking statements rely on a number of assumptions concerning future events and are subject to a number of uncertainties and other factors, many of which are outside the Company’s control, that could cause actual results to differ materially from such statements. In particular, statements using words such as “may”, “should”, “estimate”, “expect”, “anticipate”, “intend”, “believe”, “predict”, “potential”, or word import generally involve forward-looking statements.

Important events and uncertainties that could cause the actual results to differ include, but are not necessarily limited to: market conditions affecting the Company’s common share price; the impact of the volatility in the financial markets, including the duration of the economic crisis and the effectiveness of governmental solutions; the weakening economy, including the impact on our consumers’ businesses; fluctuations in interest rates; the effects of corporate bankruptcies on capital markets; the possibility of severe or unanticipated losses from natural or man-made catastrophes; the effectiveness of our loss limitation methods; our dependence on principal employees; the cyclical nature of the insurance and reinsurance business; the levels of new and renewal business achieved; opportunities to increase writings in our core property and specialty reinsurance and insurance lines of business and in specific areas of the casualty reinsurance market; the sensitivity of our business to financial strength ratings established by independent rating agencies; the estimates reported by cedents and brokers on pro-rata contracts and certain excess of loss contracts where the deposit premium is not specified in the contract; the inherent uncertainties of establishing reserves for loss and loss adjustment expenses, our reliance on industry loss estimates and those generated by modeling techniques; unanticipated adjustments to premium estimates; changes in the availability, cost or quality of reinsurance or retrocessional coverage; changes in general economic conditions; changes in governmental regulation or tax laws in the jurisdictions where we conduct business; the amount and timing of reinsurance recoverables and reimbursements we actually receive from our reinsurers; the overall level of competition, and the related demand and supply dynamics in our markets relating to growing capital levels in the insurance and reinsurance industries; declining demand due to increased retentions by cedents and other factors; the impact of terrorist activities on the economy; and rating agency policies and practices.

These and other events that could cause actual results to differ are discussed in more detail from time to time in our filings with the SEC. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by U.S. federal securities laws. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this report, our management has performed an evaluation pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 (the “Exchange Act”), with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act). Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by SEC rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, to allow for timely decisions regarding required disclosures. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered in this report, our company’s disclosure controls and procedures were effective.

Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during our first fiscal quarter of 2010 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
