KIMCO REALTY CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED

CONSOLIDATED FINANCIAL STATEMENTS

1. Interim Financial Statements

Principles of Consolidation -

The accompanying Condensed Consolidated Financial Statements include the accounts of Kimco Realty Corporation and subsidiaries, (the “Company”). The Company’s subsidiaries include subsidiaries which are wholly-owned and all entities in which the Company has a controlling financial interest, including where the Company has been determined to be a primary beneficiary of a variable interest entity (“VIE”) in accordance with the Consolidation guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”). All inter-company balances and transactions have been eliminated in consolidation. The information presented in the accompanying Condensed Consolidated Financial Statements is unaudited and reflects all adjustments which are, in the opinion of management, necessary to reflect a fair statement of the results for the interim periods presented, and all such adjustments are of a normal recurring nature. These Condensed Consolidated Financial Statements should be read in conjunction with the Company's 2015 Annual Report on Form 10-K for the year ended December 31, 2015 (the “10-K”), as certain disclosures in this Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2016, that would duplicate those included in the 10-K are not included in these Condensed Consolidated Financial Statements.

Subsequent Events -

The Company has evaluated subsequent events and transactions for potential recognition or disclosure in the condensed consolidated financial statements.

Income Taxes -

The Company elected status as a Real Estate Investment Trust (a “REIT”) for federal income tax purposes beginning in its taxable year ended December 31, 1991 and operates in a manner that enables the Company to maintain its status as a REIT. As a REIT, with respect to each taxable year, the Company must distribute at least 90 percent of its taxable income (excluding capital gain) and will not pay federal income taxes on the amount distributed to its shareholders. The Company is not generally subject to federal income taxes if it distributes 100 percent of its taxable income. Most states, where the Company holds investments in real estate, conform to the federal rules recognizing REITs. Certain subsidiaries have made a joint election with the Company to be treated as taxable REIT subsidiaries (“TRSs”), which permit the Company to engage in certain business activities which the REIT may not conduct directly. A TRS is subject to federal and state income taxes on its income, and the Company includes a provision for taxes in its condensed consolidated financial statements. The Company is subject to and also includes in its tax provision non-U.S. income taxes on certain investments located in jurisdictions outside the U.S. These investments are held by the Company at the REIT level and not in the Company’s taxable REIT subsidiaries. Accordingly, the Company does not expect a U.S. income tax impact associated with the repatriation of undistributed earnings from the Company’s foreign subsidiaries.

Effective August 1, 2016, the Company merged Kimco Realty Services Inc. (“KRS”), a TRS, into a wholly-owned Limited Liability Company (“LLC”) of the Company and no longer operates as a TRS (the “Merger”). The Company analyzed the individual assets of KRS and determined that substantially all of KRS’s assets constitute real estate assets and investments that can be directly owned by the Company without adversely affecting the Company’s status as a REIT. Any non-REIT qualifying assets or activities were transferred to a newly formed TRS (see Footnote 15).

For the three and nine months ended September 30, 2016 and 2015, the effect of certain convertible units would have an anti-dilutive effect upon the calculation of Income/(loss) from continuing operations per (a)share. Accordingly, the impact of such conversion has not been included in the determination of diluted earnings per share calculations. At September 30, 2016 and 2015, the Company had outstanding stock options that were not dilutive of 3,545,000 and 5,963,010, respectively.

The Company's unvested restricted share awards and convertible units (the "Participating securities") contain non-forfeitable rights to distributions or distribution equivalents. The impact of the Participating securities on earnings per share has been calculated using the two-class method whereby earnings are allocated to the Participating securities based on dividends declared and the Participating securities rights in undistributed earnings.

New Accounting Pronouncements –

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230), a consensus of the FASB's Emerging Issues Task Force ("ASU 2016-15"). The new guidance addresses eight specific cash flow issues with the

objective of reducing the existing diversity in practice. One identified cash flow issue relates to distributions received from equity method investees whereby the reporting entity should make an accounting policy election to classify distributions received from equity method investees using either the cumulative earnings approach or the nature of the distribution approach. Another issue relates to the classification of cash payments for debt prepayment or debt extinguishment costs. The standard is retrospectively effective for public companies on January 1, 2018, with early adoption permitted. The Company elected to early adopt ASU 2016-15 beginning in its quarter ended September 30, 2016. In connection with the adoption of ASU 2016-15 the Company made a policy election to classify distributions received from equity method investees using the cumulative earnings approach. This election did not have a material impact on the presentation in the Company's Condensed Consolidated Statements of Cash Flows. During the quarter ended September 30, 2016, the Company incurred early extinguishment of debt charges and in accordance with the adoption of ASU 2016-15 has included these charges in cash flows used for financing activities on the Company's Condensed Consolidated Statements of Cash Flows. The adoption of the remaining cash flow issues addressed in ASU 2016-15 did not have a material impact on the Company's Condensed Consolidated Statements of Cash Flows.

Table Of Contents

In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting ("ASU 2016-09"). The update simplifies several aspects of accounting for employee share-based payment transactions for both public and nonpublic entities, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. The ASU is effective for annual reporting periods beginning after December 15, 2016, including interim periods within those annual reporting periods, early adoption is permitted. The adoption of ASU 2016-09 is not expected to have a material effect on the Company's financial position and/or results of operations.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842) ("ASU 2016-02"), which sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract (i.e. lessees and lessors). The new standard requires lessees to apply a dual approach, classifying leases as either finance or operating leases based on the principle of whether or not the lease is effectively a financed purchase by the lessee. This classification will determine whether lease expense is recognized based on an effective interest method or on a straight-line basis over the term of the lease. A lessee is also required to record a right-of-use asset and a lease liability for all leases with a term of greater than 12 months regardless of their classification. Leases with a term of 12 months or less will be accounted for similar to existing guidance for operating leases today. The new standard requires lessors to account for leases using an approach that is substantially equivalent to existing guidance for sales-type leases, direct financing leases and operating leases. ASU 2016-02 supersedes the previous leases standard, Leases (Topic 840). The standard is effective for the Company on January 1, 2019, with early adoption permitted. The Company is currently in the process of evaluating the impact the adoption of ASU 2016-02 will have on the Company's financial position and/or results of operations.

In February 2015, the FASB issued ASU 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis ("ASU 2015-02"). ASU 2015-02 focuses to minimize situations under previously existing guidance in which a reporting entity was required to consolidate another legal entity in which that reporting entity did not have: (1) the ability through contractual rights to act primarily on its own behalf; (2) ownership of the majority of the legal entity's voting rights; or (3) the exposure to a majority of the legal entity's economic benefits. ASU 2015-02 affects reporting entities that are required to evaluate whether they should consolidate certain legal entities. Legal entities are subject to reevaluation under the revised consolidation model. ASU 2015-02 is effective for periods beginning after December 15, 2015. The adoption of ASU 2015-02 did not have a material effect on the Company's financial position or results of operations.

In August 2014, the FASB issued ASU 2014-15, Presentation of Financial Statements - Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern ("ASU 2014-15"), which requires management to evaluate, at each annual and interim reporting period, whether there are conditions or events that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date the financial statements are issued and provide related disclosures. ASU 2014-15 is effective for annual periods ending after December 15, 2016 and interim periods thereafter, early adoption is permitted. The Company does not expect the adoption of ASU 2014-15 to have a material effect on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606) ("ASU 2014-09"). ASU 2014-09 is a comprehensive new revenue recognition model requiring a company to recognize revenue to depict the transfer of goods or services to a customer at an amount reflecting the consideration it expects to receive in exchange for those goods or services. In adopting ASU 2014-09, companies may use either a full retrospective or a modified retrospective approach. ASU 2014-09 was anticipated to be effective for the first interim period within annual reporting periods beginning after December 15, 2016, and early adoption was not permitted. In August 2015, the FASB issued ASU 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date ("ASU 2015-14"), which delayed the effective date of ASU 2014-09 by one year making it effective for the first interim period within annual reporting periods beginning after December 15, 2017. Subsequently, in March 2016, the FASB issued ASU 2016-08, "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations", which further clarifies the implementation guidance on principal versus agent considerations", and in April 2016, the FASB issued ASU 2016-10, "Revenue from contracts with customers (Topic 606): Identifying performance obligations and licensing", an update on identifying performance obligations and accounting for licenses of intellectual property. Additionally, in May 2016, the FASB issued ASU 2016-12, "Revenue from contracts with customers (Topic 606): Narrow-scope improvements and practical expedients", which includes amendments for enhanced clarification of the guidance. Early adoption is permitted as of the original effective date. The Company is currently in the process of evaluating the impact the adoption of ASU 2014-09 will have on the Company's financial position and/or results of operations.

Revisions –

In the fourth quarter of 2015, the Company changed the classification within the Company's cash flow statement for certain transactions that occurred in the nine months ended September 30, 2015, involving the sale of equity interests in entities owning real estate. This change of \$54.6 million was reclassified for the nine months ended September 30, 2015, for purposes of reflecting comparative periods. The Company believes the new classification is a more meaningful reflection of these transactions and changed the Company's cash flow from the initially reported amounts to reduce Distributions from joint ventures and other real estate investments within its cash flow from operating activities and increase Distributions from liquidation of real estate joint ventures within its cash flow from investing activities by \$54.6 million for the nine months ended September 30, 2015.

At September 30, 2016, the Company had three properties classified as held-for-sale at a carrying amount of \$13.4 million, net of accumulated depreciation of \$11.8 million, which are included in Other assets on the Company's Condensed Consolidated Balance Sheets. Impairments –

During the nine months ended September 30, 2016, the Company recognized aggregate impairment charges of \$68.1 million. The Company's estimated fair values for these properties were based on third party offers through signed contracts, third party appraisals or discounted cash flow models. Based upon the Company's intent to develop the property, the Company allocated the gross purchase price to Real estate under development on the Company's Condensed Consolidated Balance Sheets.

Consolidated Operating Properties

Included within the Company's consolidated operating properties at September 30, 2016, are 19 consolidated entities that are VIEs, for which the Company is the primary beneficiary. These entities have been established to own and operate real estate property. The Company's involvement with these entities is through its majority ownership and management of the properties. The entities were deemed VIEs primarily based on the fact that the unrelated investors do not have substantial kick-out rights to remove the general or managing partner by a vote of a simple majority or less and their participating rights are not substantive. The Company determined that it was the primary beneficiary of these VIEs as a result of its controlling financial interest.

Table Of Contents

At September 30, 2016, total assets of these VIEs were \$640.8 million and total liabilities were \$36.8 million. The classification of these assets are primarily within operating real estate and accounts and notes receivable and the classification of these liabilities are primarily within other liabilities and mortgages payable.

The majority of the operations of these VIEs are funded with cash flows generated from the properties. The Company has not provided financial support to any of these VIEs that it was not previously contractually required to provide, which consists primarily of funding any capital expenditures, including tenant improvements, which are deemed necessary to continue to operate the entity and any operating cash shortfalls that the entity may experience.

Consolidated Real Estate Under Development Projects

Included within the Company's real estate under development projects at September 30, 2016, are two consolidated entities that are VIEs, for which the Company is the primary beneficiary. These entities have been established to develop real estate properties to hold as long-term investments. The Company's involvement with these entities is through its majority ownership and management of the properties. These entities were deemed VIEs primarily based on the fact that the equity investments at risk are not sufficient to permit the entities to finance their activities without additional financial support. The initial equity contributed to these entities was not sufficient to fully finance the real estate construction as development costs are funded by the partners throughout the construction period. The Company determined that it was the primary beneficiary of these VIEs as a result of its controlling financial interest.

At September 30, 2016, total assets of these real estate under development VIEs were \$173.7 million and total liabilities were \$3.9 million. The classification of these assets is primarily within Real estate under development and the classification of the liabilities is primarily within accounts payable and accrued expenses, which is included in Other liabilities in the Company's Condensed Consolidated Balance Sheets.

Substantially all of the projected development costs to be funded for these development projects, aggregating \$77.6 million, will be funded with capital contributions from the Company, when contractually obligated. The Company has not provided financial support to these VIEs that it was not previously contractually required to provide.

Unconsolidated Redevelopment Investment

Included in the Company's joint venture investments at September 30, 2016, is an unconsolidated joint venture, which is a VIE for which the Company is not the primary beneficiary. This joint venture was primarily established to

develop real estate property for long-term investment and was deemed a VIE primarily based on the fact that the equity investment at risk was not sufficient to permit the entity to finance its activities without additional financial support. The initial equity contributed to this entity was not sufficient to fully finance the real estate construction as development costs are funded by the partners throughout the construction period. The Company determined that it was not the primary beneficiary of this VIE based on the fact that the Company has shared control of this entity along with the entity's partners and therefore does not have a controlling financial interest.

As of September 30, 2016, the Company's investment in this VIE was a negative \$7.4 million, due to the fact that the Company had a remaining capital commitment obligation, which is included in Other liabilities in the Company's Condensed Consolidated Balance Sheets. The Company's maximum exposure to loss as a result of its involvement with this VIE is estimated to be \$7.4 million, which is the remaining capital commitment obligation. The Company has not provided financial support to this VIE that it was not previously contractually required to provide. All future costs of development will be funded with capital contributions from the Company and the outside partner in accordance with their respective ownership percentages.

9. Redeemable Noncontrolling Interests

Redeemable noncontrolling interests includes amounts related to partnership units issued by consolidated subsidiaries of the Company in connection with certain property acquisitions. Partnership units which are determined to be

mandatorily redeemable under the FASB's Distinguishing Liabilities from Equity guidance are classified as Redeemable noncontrolling interests and presented in the mezzanine section between Total liabilities and Stockholder's equity on the Company's Condensed Consolidated Balance Sheets. The amounts of consolidated net income attributable to the Company and to the noncontrolling interests are presented on the Company's Condensed Consolidated Statements of Operations.

The following table presents the change in the redemption value of the Redeemable noncontrolling interests for the nine months ended September 30, 2016 and 2015 (amounts in thousands):

- (1) Includes \$1.2 million in fair market value remeasurement for the nine months ended September 30, 2015.

10. Fair Value Measurements

All financial instruments of the Company are reflected in the accompanying Condensed Consolidated Balance Sheets at amounts which, in management's estimation, based upon an interpretation of available market information and valuation methodologies, reasonably approximate their fair values except those listed below, for which fair values are disclosed. The valuation method used to estimate fair value for fixed-rate and variable-rate debt is based on discounted cash flow analyses, with assumptions that include credit spreads, market yield curves, trading activity, loan amounts and debt maturities. The fair values for marketable securities are based on published values, securities dealers' estimated market values or comparable market sales. Such fair value estimates are not necessarily indicative of the amounts that would be realized upon disposition.

As a basis for considering market participant assumptions in fair value measurements, the FASB's Fair Value Measurements and Disclosures guidance establishes a fair value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

Table Of Contents

The following are financial instruments for which the Company's estimate of fair value differs from the carrying amounts (in thousands):

	September 30, 2016		December 31, 2015	
	Carrying	Estimated	Carrying	Estimated

Mortgages payable (3)	\$1,213,120	\$1,229,655	\$1,614,982	\$1,629,760

- As of September 30, 2016 and December 31, 2015, the Company determined that \$6.5 million and \$5.9 million, respectively, of the Marketable securities estimated fair value were classified within Level 1 of the fair value hierarchy and the remaining \$1.6 million and \$1.7 million, respectively, were classified within Level 3 of the fair value hierarchy.
- (2) The Company determined that its valuation of Notes payable was classified within Level 2 of the fair value hierarchy.
- (3) The Company determined that its valuation of Mortgages payable was classified within Level 3 of the fair value hierarchy.

The Company has certain financial instruments that must be measured under the FASB's Fair Value Measurements and Disclosures guidance, including available for sale securities. The Company currently does not have non-financial assets and non-financial liabilities that are required to be measured at fair value on a recurring basis.

The tables below present the Company's financial assets and liabilities measured at fair value on a recurring basis as of September 30, 2016 and December 31, 2015, aggregated by the level in the fair value hierarchy within which those measurements fall (in thousands):

Table Of Contents

The Company's estimated fair values were primarily based upon estimated sales prices from third party offers that were based on signed contracts, appraisals or letters of intent for which the Company does not have access to the unobservable inputs used to determine these estimated fair values. For the appraisals, the capitalization rates primarily range from 6.50% to 7.75% and discount rates primarily range from 9.25% to 10.80% which were utilized in the models were based upon observable rates that the Company believes to be within a reasonable range of current market rates for each respective investment. Based on these inputs the Company determined that its valuation of these investments was classified within Level 3 of the fair value hierarchy. (See Footnote 2 for additional discussion regarding impairment charges).

13. Incentive Plans

The Company maintains two equity participation plans, the Second Amended and Restated 1998 Equity Participation Plan (the “Prior Plan”) and the 2010 Equity Participation Plan (the “2010 Plan”) (collectively, the “Plans”). The Prior Plan provides for a maximum of 47,000,000 shares of the Company’s common stock to be issued for qualified and non-qualified stock options and restricted stock grants. Effective May 1, 2012, the 2010 Plan provides for a maximum of 10,000,000 shares of the Company’s common stock to be issued for qualified and non-qualified stock options and other awards, plus the number of shares of common stock which are or become available for issuance under the Prior Plan and which are not thereafter issued under the Prior Plan, subject to certain conditions. Unless otherwise determined by the Board of Directors at its sole discretion, stock options granted under the Plans generally vest ratably over a range of three to five years, expire ten years from the date of grant and are exercisable at the market price on the date of grant. Restricted stock grants generally vest (i) 100% on the fourth or fifth anniversary of the grant, (ii) ratably over three, four and five years or (iii) over ten years at 20% per year commencing after the fifth year. Performance share awards, which vest over a period of one to three years, may provide a right to receive shares of the Company’s common stock or restricted stock based on the Company’s performance relative to its peers, as defined, or based on other performance criteria as determined by the Board of Directors. In addition, the Plans provide for the granting of certain stock options and restricted stock to each of the Company’s non-employee directors (the “Independent Directors”) and permit such Independent Directors to elect to receive deferred stock awards in lieu of directors’ fees.

Table Of Contents

The Company recognized expenses associated with its equity awards of \$15.3 million for the nine months ended September 30, 2016 and 2015. As of September 30, 2016, the Company had \$34.9 million of total unrecognized compensation cost related to unvested stock compensation granted under the Plans. That cost is expected to be recognized over a weighted average period of approximately 3.4 years.

14. Accumulated Other Comprehensive Income (“AOCI”)

The following tables display the change in the components of accumulated other comprehensive income for the nine months ended September 30, 2016 and 2015:

(1) Amounts reclassified to Interest, dividends and other investment income on the Company's Condensed Consolidated Statements of Operations.

At September 30, 2016, the Company had a net \$7.6 million of unrealized cumulative foreign currency translation adjustment ("CTA") gains relating to its foreign entity investments in Canada. CTA results from currency fluctuations between local currency and the U.S. dollar during the period in which the Company held its investment. CTA amounts are subject to future changes resulting from ongoing fluctuations in the respective foreign currency exchange rates. Under generally accepted accounting principles in the United States ("GAAP"), the Company is required to release CTA balances into earnings when the Company has substantially liquidated its investment in a foreign entity. During 2015, the Company began selling properties within its Canadian portfolio and as such, the Company may, in the near term, substantially liquidate its remaining investment in Canada, which will require the then unrealized gain on foreign currency translation to be recognized as a benefit to earnings.

15. Income Taxes

The Merger-

Prior to the Merger, the Company's TRSs included KRS, FNC Realty Corporation, Kimco Insurance Company and the consolidated entity, Blue Ridge Real Estate Company/Big Boulder Corporation. As part of the Company's overall strategy to simplify its business model and transfer ownership of desirable long-term shopping center assets as well as the Company's investment in Albertsons to the REIT, the Company, effective August 1, 2016, completed the Merger, whereby KRS was merged into a wholly-owned Limited Liability Company ("LLC") of the Company and no longer operates as a TRS. Additionally, the Company established a new TRS, Kimco Realty Services II.

Under GAAP a reduction of the carrying amounts of deferred tax assets by a valuation allowance is required, if, based on the evidence available, it is more likely than not (a likelihood of more than 50 percent) that some portion or all of the deferred tax assets will not be realized. The valuation allowance should be sufficient to reduce the deferred tax asset to the amount that is more likely than not to be realized. As a result of the Merger, the Company determined that the realization of \$63.5 million of its net deferred tax assets was not deemed likely and as such, the Company recorded a valuation allowance against these net deferred tax assets that existed at the time of the Merger.

Table Of Contents

In connection with the Merger, the Company prepared an analysis of the estimated built-in tax gains and built-in tax losses inherent in each asset. Property that becomes REIT property in a merger transaction is subject to tax during a recognition period, and, as a result, the Company is subject to corporate-level taxation up to the net built-in gain amount resulting from the sale of KRS investments within five years from the merger date (the recognition period). The Company compared estimated fair values to tax basis for each property to determine the built-in tax gain (value over basis) or the built-in tax loss (basis over value) and determined KRS's share based on its ownership percentage, which could be subject to corporate level taxes if the Company disposes of any assets previously held by KRS during the five years following the Merger date.

Uncertain Tax Positions -

The Company is subject to income tax in certain jurisdictions outside the U.S., principally Canada and Mexico. The statute of limitations on assessment of tax varies from three to seven years depending on the jurisdiction and tax issue. Tax returns filed in each jurisdiction are subject to examination by local tax authorities. The Company is currently under audit by the Canadian Revenue Agency and Mexican Tax Authority.

The Company and its subsidiaries had been under audit by the U.S. Internal Revenue Service ("IRS") with respect to taxable years 2004-2009. The IRS proposed, pursuant to Section 482 of the Code, to disallow a capital loss claimed by KRS on the disposition of common shares of Valad Property Ltd., an Australian publicly listed company, and to assert a 100 percent "penalty" tax on the Company pursuant to Section 857(b)(7) of the Code in the amount of \$40.9 million with respect to its 2009 taxable year. The Company has favorably settled all matters relating to the audit, agreeing to a net refund of \$0.1 million. In connection with this favorable settlement, the Company released its uncertain tax position liability of \$2.0 million.

In August 2016, the Mexican Tax Authority issued tax assessments for various wholly-owned entities of the Company that had previously held interests in operating properties in Mexico. These assessments relate to certain interest expense and withholding tax items under the Mexico – U.S. Tax Treaty (the "Treaty"). The assessments are for the 2010 tax year and include amounts for taxes aggregating \$33.7 million, interest aggregating \$16.6 million and penalties aggregating \$11.4 million. The Company believes that it has operated in accordance with the Treaty provisions and has therefore concluded that no amounts are payable with respect to this matter. The Company has submitted appeals for these assessments and the U.S. Treasury's Office of Competent Authority is representing the Company regarding this matter. The Company intends to vigorously defend its position and believes it will prevail, however this outcome cannot be assured.

Accordingly, there is no assurance that the Company's expectations will be realized. The Company disclaims any intention or obligation to update the forward-looking statements, whether as a result of new information, future events or otherwise. The following discussion should be read in conjunction with the accompanying Condensed Consolidated Financial Statements and Notes thereto. These unaudited financial statements include all adjustments which are, in the opinion of management, necessary to reflect a fair statement of the results for the interim periods presented, and all such adjustments are of a normal recurring nature.

Executive Summary

Kimco Realty Corporation is one of the nation's largest publicly-traded owners and operators of open-air shopping centers. As of September 30, 2016, the Company had interests in 534 shopping center properties (the "Combined Shopping Center Portfolio"), aggregating 86.3 million square feet of gross leasable area ("GLA"), located in 35 states and Puerto Rico. In addition, the Company had 390 other property interests, primarily through the Company's preferred equity investments and other real estate investments, totaling 6.8 million square feet of GLA.

The executive officers are engaged in the day-to-day management and operation of real estate exclusively with the Company, with nearly all operating functions, including leasing, asset management, maintenance, construction, legal, finance and accounting, administered by the Company.

The Company's strategy is to be the premier owner and operator of open-air shopping centers through investments primarily in the U.S. To achieve this strategy the Company is (i) continuing to transform the quality of its portfolio by disposing of lesser quality assets and acquiring larger higher quality properties in key markets identified by the Company, (ii) simplifying its business by (a) reducing the number of joint venture investments and (b) exiting Mexico, South America and Canada, for which the exit of South America has been completed and Mexico has been substantially completed, (iii) pursuing redevelopment opportunities within its portfolio to increase overall value and (iv) selectively acquiring land parcels in our key markets for real estate under development projects, consisting of retail and/or mixed use centers, for long-term investment. In addition, the Company may consider other opportunistic investments related to retailer controlled real estate such as, repositioning underperforming retail locations, retail real estate financing and bankruptcy transaction support. The Company has an active capital recycling program which provides for the disposition of certain U.S. properties. If the Company accepts sales prices for any of these assets that are less than their net carrying values, the Company would be required to take impairment charges and such amounts could be material. In order to execute the Company's strategy, the Company intends to continue to strengthen its balance sheet by pursuing deleveraging efforts over time, providing it the necessary flexibility to invest opportunistically and selectively, primarily focusing on U.S. open-air shopping centers.

The Company has a \$1.75 billion unsecured revolving credit facility (the “Credit Facility”) with a group of banks, which is scheduled to expire in March 2018 with two additional six month options to extend the maturity date, at the Company’s discretion, to March 2019. The Credit Facility, which can be increased to \$2.25 billion through an accordion feature, accrues interest at a rate of LIBOR plus 92.5 basis points (1.45% as of September 30, 2016) on drawn funds. In addition, the Credit Facility includes a \$500 million sub-limit which provides the Company the opportunity to borrow in alternative currencies including Canadian Dollars, British Pounds Sterling, Japanese Yen or Euros. Pursuant to the terms of the Credit Facility, the Company, among other things, is subject to covenants requiring the maintenance of (i) maximum leverage ratios on both unsecured and secured debt and (ii) minimum interest and fixed coverage ratios. As of September 30, 2016, the Credit Facility had a balance of \$225.0 million outstanding and \$0.7 million appropriated for letters of credit.

Pursuant to the terms of the Credit Facility, the Company, among other things, is subject to maintenance of various covenants. The Company is currently in compliance with these covenants. The financial covenants for the Credit Facility are as follows:

Covenant	Must Be	As of 9/30/16
Total Indebtedness to Gross Asset Value (“GAV”)	<60%	40%
Total Priority Indebtedness to GAV	<35%	8%
Unencumbered Asset Net Operating Income to Total Unsecured Interest Expense	>1.75x	4.82x
Fixed Charge Total Adjusted EBITDA to Total Debt Service	>1.50x	2.73x

For a full description of the Credit Facility’s covenants refer to the Credit Agreement dated as of March 17, 2014, filed as Exhibit 10.1 to the Company’s Current Report on Form 8-K dated March 20, 2014.

Term Loan –

The Company has a \$650.0 million unsecured term loan (“Term Loan”) which is scheduled to mature in January 2017, with three one-year extension options at the Company’s discretion, and accrues interest at a spread (currently 95 basis points) to LIBOR or at the Company’s option at a base rate as defined per the agreement (1.47% at September 30, 2016). Pursuant to the terms of the credit agreement for the Term Loan, the Company, among other things, is subject to covenants requiring the maintenance of (i) maximum indebtedness ratios and (ii) minimum interest and fixed charge coverage ratios. The term loan covenants are similar to the Credit Facility covenants described above.

Mortgages Payable –

During the nine months ended September 30, 2016, the Company (i) assumed \$231.5 million of individual non-recourse mortgage debt relating to the acquisition of seven properties, including \$3.8 million associated with fair value debt adjustments and (ii) paid off \$603.7 million of mortgage debt (including fair market value adjustment of \$1.6 million) that encumbered 41 operating properties. In connection with the early prepayment of certain of these mortgage debts, the Company recorded an early extinguishment of debt charge of \$9.2 million.

In addition to the public equity and debt markets as capital sources, the Company may, from time-to-time, obtain mortgage financing on selected properties and construction loans to partially fund the capital needs of its real estate under development projects. As of September 30, 2016, the Company had over 360 unencumbered property interests in its portfolio.

Other –

In connection with its intention to continue to qualify as a REIT for federal income tax purposes, the Company expects to continue paying regular dividends to its stockholders. These dividends will be paid from operating cash flows. The Company’s Board of Directors will continue to evaluate the Company’s dividend policy on a quarterly basis as the Board of Directors monitors sources of capital and evaluates the impact of the economy and capital markets availability on operating fundamentals. Since cash used to pay dividends reduces amounts available for capital investment, the Company generally intends to maintain a conservative dividend payout ratio, reserving such amounts as it considers necessary for the expansion and renovation of shopping centers in its portfolio, debt reduction, the acquisition of interests in new properties and other investments as suitable opportunities arise and such other factors as the Board of Directors considers appropriate. Cash dividends paid for the nine months ended September 30, 2016 and 2015 were \$354.1 million and \$340.7 million, respectively.

Table Of Contents

Although the Company receives substantially all of its rental payments on a monthly basis, it generally intends to continue paying dividends quarterly. Amounts accumulated in advance of each quarterly distribution will be invested by the Company in short-term money market or other suitable instruments. On July 26, 2016, the Company's Board of Directors declared a quarterly cash dividend of \$0.255 per common share payable to shareholders of record on October 5, 2016, which was paid on October 17, 2016. Additionally, on October 25, 2016, the Company's Board of Directors declared an increased quarterly cash dividend of \$0.27 per common share, an annualized increase of 5.9%, payable to shareholders of record on January 3, 2017, which is scheduled to be paid on January 17, 2017.

Funds From Operations

Funds from operations is a supplemental non-GAAP measure utilized to evaluate the operating performance of real estate companies. The National Association of Real Estate Investment Trusts ("NAREIT") defines funds from operations as net income/(loss) attributable to common shareholders computed in accordance with generally accepted accounting principles in the United States ("GAAP"), excluding (i) gains or losses from sales of operating real estate assets and change in control of interests, plus (ii) depreciation and amortization of operating properties and (iii) impairment of depreciable real estate and in substance real estate equity investments and (iv) after adjustments for unconsolidated partnerships and joint ventures calculated to reflect funds from operations on the same basis.

The Company presents funds from operations available to common shareholders ("FFO") as it considers it an important supplemental measure of our operating performance and believes it is frequently used by securities analysts, investors and other interested parties in the evaluation of REITs, many of which present FFO when reporting results. Comparison of our presentation of FFO to similarly titled measures for other REITs may not necessarily be meaningful due to possible differences in the application of the NAREIT definition used by such REITs.

The Company also presents FFO available to common shareholders as adjusted ("FFO as adjusted") as an additional supplemental measure as it believes it is more reflective of the Company's core operating performance. The Company believes FFO as adjusted provides investors and analysts an additional measure in comparing the Company's performance across reporting periods on a consistent basis by excluding items that we do not believe are indicative of our core operating performance. FFO as adjusted is generally calculated by the Company as FFO excluding certain transactional income and expenses and non-operating impairments which management believes are not reflective of the results within the Company's operating real estate portfolio.

FFO is a supplemental non-GAAP financial measure of real estate companies' operating performances, which does not represent cash generated from operating activities in accordance with GAAP and therefore should not be considered an alternative for net income as a measure of liquidity. Our method of calculating FFO and FFO as adjusted may be different from methods used by other REITs and, accordingly, may not be comparable to such other REITs.

U.S. Same Property Net Operating Income (“U.S. same property NOI”)

U.S. same property NOI is a supplemental non-GAAP financial measure of real estate companies’ operating performance and should not be considered an alternative to net income in accordance with GAAP or as a measure of liquidity. U.S. same property NOI is considered by management to be an important performance measure of the Company’s operations and management believes that it is frequently used by securities analysts and investors as a measure of the Company’s operating performance because it includes only the net operating income of U.S. properties that have been owned for the entire current and prior year reporting periods including those properties under redevelopment and excludes properties under development and pending stabilization. Properties are deemed stabilized at the earlier of (i) reaching 90% leased or (ii) one year following a projects inclusion in operating real estate. U.S. same property NOI assists in eliminating disparities in net income due to the development, acquisition or disposition of properties during the particular period presented, and thus provides a more consistent performance measure for the comparison of the Company's properties.

U.S. same property NOI is calculated using revenues from rental properties (excluding straight-line rent adjustments, lease termination fees, amortization of above/below market rents and includes charges for bad debt) less operating and maintenance expense, real estate taxes and rent expense plus the Company’s proportionate share of U.S. same property NOI from U.S. unconsolidated real estate joint ventures, calculated on the same basis. The Company’s method of calculating U.S. same property NOI may differ from methods used by other REITs and, accordingly, may not be comparable to such other REITs.

The following is a reconciliation of the Company’s Income/(loss) from continuing operations to U.S. same property NOI (in thousands):

U.S. same property NOI increased by \$7.4 million or 3.3% for the three months ended September 30, 2016, as compared to the corresponding period in 2015. This increase is primarily the result of (i) an increase of \$2.9 million related to lease-up and rent commencements in the portfolio and (ii) a decrease of \$1.6 million of credit losses and (iii) an increase in other property income of \$2.9 million.

U.S. same property NOI increased by \$19.4 million or 2.9% for the nine months ended September 30, 2016, as compared to the corresponding period in 2015. This increase is primarily the result of (i) an increase of \$12.5 million related to lease-up and rent commencements in the portfolio, (ii) an increase in other property income of \$6.3 million and (iii) a decrease of \$0.6 million of credit losses.

Leasing Activity

During the nine months ended September 30, 2016, the Company executed 710 leases totaling over 4.6 million square feet in the Company's consolidated operating portfolio comprised of 251 new leases and 459 renewals and options. The leasing costs associated with new leases are estimated to aggregate \$37.9 million or \$30.20 per square foot. These costs include \$30.4 million of tenant improvements and \$7.5 million of external leasing commissions. The average rent per square foot on new leases was \$19.33 and on renewals and options was \$16.20.

Tenant Lease Expirations

The following table sets forth the aggregate lease expirations for each of the next ten years, assuming no renewal options are exercised. For purposes of the table, the Total Annual Base Rent Expiring represents annualized rental revenue, for each lease that expires during the respective year. Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's primary market risk exposures are interest rate risk and foreign currency exchange rate risk. The following table presents the Company's aggregate fixed rate and variable rate debt obligations outstanding, including fair market value adjustments and unamortized deferred financing costs, as of September 30, 2016, with corresponding weighted-average interest rates sorted by maturity date. The table does not include extension options where available. The instruments' actual cash flow amounts are in millions.

Average Interest Rate	-	1.47 %	1.45 %	-	-	-	1.47 %	

Table Of Contents

Based on the Company's variable-rate debt balances, interest expense would have increased by \$7.4 million for the nine months ended September 30, 2016, if short-term interest rates were 1% higher.

The following table presents the Company's foreign investments and respective cumulated translation adjustments ("CTA") as of September 30, 2016. Investment amounts are shown in their respective local currencies and the U.S. dollar equivalents, CTA balances are shown in U.S. dollars:

Foreign Investment (in millions)

Country	Local Currency	U.S.	CTA
		Dollars	Gain
Mexican real estate investments (MXN)	228.6	\$ 18.7	\$ -
Canadian real estate investments (CAD)	47.7	\$ 36.4	\$ 7.6

The foreign currency exchange risk has been partially mitigated, but not eliminated, through the use of local currency denominated debt. The Company has not, and does not plan to, enter into any derivative financial instruments for trading or speculative purposes.

Currency fluctuations between local currency and the U.S. dollar, for investments for which the Company has determined that the local currency is the functional currency, for the period in which the Company held its investment result in a CTA. This CTA is recorded as a component of Accumulated other comprehensive income ("AOCI") on the Company's Consolidated Balance Sheets. The CTA amounts are subject to future changes resulting from ongoing fluctuations in the respective foreign currency exchange rates. Changes in exchange rates are impacted by many factors that cannot be forecasted with reliable accuracy. Any change could have a favorable or unfavorable impact on the Company's CTA balance. The Company's aggregate CTA gain balance at September 30, 2016, is \$7.6 million.

Under GAAP, the Company is required to release CTA balances into earnings when the Company has substantially liquidated its investment in a foreign entity. The Company may, in the near term, substantially liquidate its investment in Canada, which will require the then unrealized gain on foreign currency translation to be recognized as earnings.

Item 4. Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined

in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this report. Based on such evaluation, the Company’s Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company’s disclosure controls and procedures are effective.

There have not been any changes in the Company’s internal control over financial reporting during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.
