

SANGUI BIOTECH INTERNATIONAL INC
Form 424B3
October 13, 2016

SANGUI BIOTECH INTERNATIONAL, INC.

Prospectus Supplement No. 6

(to the Prospectus dated August 7, 2015)

This Prospectus Supplement No. 6 dated October 12, 2016, contains information that supplements and updates our Prospectus dated August 10, 2015, Prospectus Supplement No. 1 dated August 14, 2015, Prospectus Supplement No. 2 dated October 5, 2015, Prospectus Supplement No. 3 dated November 23, 2015, Prospectus Supplement No. 4 dated February 24, 2016, and Prospectus Supplement No. 5, dated May 23, 2016. Since it contains only the most recent developments, this supplement should be read in conjunction with such prospectus.

This prospectus relates to the offer and resale of up to 30,000,000 shares of Sangui Biotech International, Inc. (“Sangui” or the “Company”) common stock, no par value per share, by the selling security holder, Tarpon Bay Partners, LLC, a Florida limited liability company (“Tarpon”). All of such shares represent shares that Tarpon has agreed to purchase if put to it by us pursuant to the terms of the Equity Purchase Agreement we entered into with them on May 11, 2015, subject to the volume limitations and other limitations in the Equity Purchase Agreement. Subject to the terms and conditions of the Equity Purchase Agreement, we have the right to “put,” or sell, up to \$5,000,000 worth of shares of our common stock to Tarpon.

Annual Report on Form 10-K

Attached hereto and incorporated by reference herein is our Annual Report on Form 10-K for the period ended June 30, 2016, which we filed with the Securities and Exchange Commission on October 12, 2016. The information set forth in the attached Periodic Report supplements and amends the information contained in the Prospectus.

This Prospectus Supplement No. 6 should be read in conjunction with, and delivered with, the Prospectus and all and Prospectus Supplements and is qualified by reference to the Prospectus except to the extent that the information in this Prospectus Supplement No. 6 supersedes the information contained in the Prospectus or Prospectus Supplements.

Unregistered Sale of Equity Securities and Use of Proceeds

Recent Sales of Unregistered Securities

On April 28, 2016, the Company issued 2,576,000 restricted shares of its common stock upon receipt of a capital contribution of approx. \$37,350 in cash to two individuals. No underwriters were used. The securities were sold pursuant to an exemption from registration provided by Regulation S and Section 4(2) of the Securities Act of 1933. The certificate representing the shares contained a restricted legend.

On May 12, 2016, the Company issued 3,575,000 restricted shares of its common stock upon receipt of capital contributions of approx. \$58,990 in cash to one individual. No underwriters were used. The securities were sold pursuant to an exemption from registration provided by Regulation S and Section 4(2) of the Securities Act of 1933. The certificate representing the shares contained a restricted legend.

Sales of Unregistered Securities Subsequent to the Period Covered by the Form 10-K

Subsequent to the year ended June 30, 2016, the Company issued 9,149,000 shares of its common stock for cash to three (3) individuals at a stock price of approximately \$0.012. No underwriters were used. The securities were sold pursuant to an exemption from registration provided by Regulation S and Section 4(2) of the Securities Act of 1933. The certificate representing the shares contained a restricted legend.

Investing in our common stock involves a high degree of risk.

See “Risk Factors” beginning on page 4 of the Prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined that the Prospectus or this Prospectus Supplement No. 6 is truthful or complete. A representation to the contrary is a criminal offense.

The date of this Prospectus Supplement No. 6 is October 12, 2016.

CAUTIONARY STATEMENT

Some of the statements contained in this Form 10-K for Sangui Biotech International, Inc. (the “Company” or “SGBI”) discuss future expectations, contain projections of results of operations or financial condition or state other “forward-looking” information. These statements are subject to known and unknown risks, uncertainties, and other factors that could cause the actual results to differ materially from those contemplated by the statements. The forward-looking information is based on various factors and is derived using numerous assumptions. Important factors that may cause actual results to differ from projections include, for example:

- .
- the success or failure of management's efforts to implement their business strategy;
- .
- the ability of the Company to raise sufficient capital to meet operating requirements;
- .
- the uncertainty of consumer demand for our products;
- .
- the ability of the Company to protect its intellectual property rights;
- .
- the ability of the Company to compete with major established companies;
- .
- the effect of changing economic conditions;
- .
- the ability of the Company to attract and retain quality employees; and
- .
- other risks which may be described in future filings with the SEC.

Words such as “anticipates,” “expects,” “intends,” “plans,” “believes,” “seeks,” “estimates,” and variations of such words and expressions are intended to identify such forward-looking statements. These statements are not guarantees of future

performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict. Therefore, actual results and outcomes may differ materially from what is expressed or forecasted in any such forward-looking statements. Such risks and uncertainties include those set forth herein under “Risk Factors” as well as those noted in the documents incorporated herein by reference. Unless required by law, the Company undertakes no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

PART I

ITEM 1.

BUSINESS

General Development of Business

Sangui BioTech, Inc. ("SBT") was incorporated in Delaware on August 2, 1996, and began operations in October 1996. Shortly after the formation of SBT, the shareholders of SanguiBioTech AG ("Sangui GmbH") and GlukoMediTech AG ("Gluko AG") agreed to a share swap in which all of the outstanding shares held by the shareholders would be exchanged for shares of SBT, thereby making Sangui GmbH and Gluko AG wholly owned subsidiaries of SBT. In August 1997, a publicly held company, Citadel Investment System, Inc., a Colorado corporation ("Citadel"), acquired one hundred percent (100%) of the outstanding common shares of Sangui BioTech, Inc., and as a result, Sangui BioTech, Inc. became a wholly owned subsidiary of Citadel. Thereafter, Citadel changed its name to Sangui BioTech International, Inc. (the "Company" or "SGBI").

Until the end of its fiscal year 2003, SGBI's business operations were conducted through wholly owned subsidiaries. During the first quarter of the 2003 fiscal year, SBT sold its assets, and commenced a wind-down of its U.S. business operations. SBT was merged with and into SGBI effective December 31, 2002. Gluko AG was merged with Sangui GmbH effective June 30, 2003.

Sangui BioTech GmbH, the only remaining subsidiary of SGBI, develops hemoglobin-based artificial oxygen carriers for use as blood additives, blood volume substitutes and variant products thereof. Sangui GmbH has also developed an anti-aging cosmetic and a number of related products aimed at improving oxygen supply to the skin. Enhanced oxygen supply is the key to improved wound healing; therefore the Company has extended its product portfolio to contain wound pads and other wound management products. The facilities of Sangui GmbH are located on the premises of the Forschungs- und Entwicklungszentrum of the University of Witten/Herdecke, Witten, Germany.

To date, neither SGBI nor its subsidiary has had profitable operations. The Company has never been profitable, and through June 30, 2016, SGBI's accumulated deficit has exceeded \$36,6 million. The Company may continue to incur substantial losses over the next several years as it pursues its development, marketing and market entry efforts, testing activities and other growth operations.

We have adopted the strategy to license our marketable products or such products that are close to market entry to industry partners. In the pursuit of this strategy we have licensed the most promising product, a hemoglobin based wound spray technology to Sastomend GmbH, a former joint venture company for distribution in several European and Latin American countries. In addition, we are entering the preclinical testing of hemoglobin based artificial oxygen carriers aiming at the remediation of ischemic conditions in human patients.

No assurance can be given that our program will be successful.

Business of the Company

Our mission is the development of novel and proprietary pharmaceutical, medical and cosmetic products. We develop our products through our German subsidiary, Sangui GmbH. Currently, we are seeking to market and sell our products through partnerships with industry partners worldwide.

Our focus has been the development of oxygen carriers capable of providing oxygen transport in humans in the event of acute and/or chronic lack of oxygen due to arterial occlusion, anemia or blood loss whether due to surgery, trauma, or other causes, as well as in the case of chronic wounds.

We have thus far focused our development and commercialization efforts on such artificial oxygen carriers by reproducing and synthesizing polymers out of native hemoglobin of defined molecular sizes.

In addition, we have developed external applications of oxygen transporters in the medical and cosmetic fields in the form of sprays for the healing of chronic wounds and of gels and emulsions for the regeneration of the skin. A wound dressing that shows outstanding properties in the support of wound healing is distributed by SastoMed GmbH, as global licensee under the Granulox brand name. Sastomed GmbH was a joint venture company in which we held 25%. Our stake was sold to the joint venture partner effective December 31, 2015.

We also market a wound dressing that shows outstanding properties in the support of wound healing, which we call Chitoskin. SanguiBioTech GmbH holds distribution rights for these Chitoskin wound pads for the European Union and various other countries. A European patent has been granted for the production and use of Chitoskin wound pads.

Our current key business focuses are: (a) selling our existing cosmetics and wound management products through distribution partners, or by way of direct sale, to end users; (b) identifying additional industrial and distribution partners for our patents, production techniques, and products; and, (c) obtaining the additional certifications on our products in development.

SanguiBioTech GmbH is ISO 9001:2000 (General Quality Management System) and ISO 13485:2003 (Quality Management System Medical Products) certified, and is subject to audits on a regular basis.

Products of the Company

Artificial Oxygen Carriers

We develop several products based on polymers of purified natural porcine hemoglobin with oxygen carrying abilities that are similar to those of native hemoglobin. These are (1) oxygen carrying blood additives, and (2) oxygen carrying blood volume substitutes.

In December 1997, we decided that porcine hemoglobin should be used as the basic material for artificial oxygen carriers. In March 1999, we decided which hemoglobin hyperpolymer would go into preclinical investigation, that glutaraldehyde would be utilized as a cross linker, and further that the polymer hemoglobin be chemically masked to prevent protein interaction in blood plasma. The fine adjustment of the molecular formula of the artificial oxygen

carriers - optimized for laboratory scale production - was finalized in the summer of 2000.

The experiments completed in our laboratories demonstrated that it is possible to polymerize hemoglobins isolated from porcine blood resulting in huge soluble molecules, so-called hyperpolymers. In August 2000, we finalized our work on the pharmaceutical formulation of the oxygen carrier for laboratory scale. In February 2001 a pilot production in a laboratory scale was carried out in our clean room. The resulting product was successfully applied in animal tests, moreover, single volunteers underwent pilot self-experiments.

The blood additives and blood substitute projects were halted in 2003 due to the lack of financing for the pre-clinical test phase.

During the first quarter of our 2013 financial year the European Patent Office granted a patent based on Sangui's application (1299457) "Mammalian hemoglobin compatible with blood plasma, cross-linked and conjugated with polyalkylene oxides as artificial medical oxygen carriers, production and use thereof."

During the third quarter of our 2013 financial year the company had a feasibility study prepared by external experts inquiring into market potentials and further preclinical and clinical development requirements. The study came to the conclusion that an approval of Sangui's hemoglobin hyperpolymers as a blood additive appears possible, expedient and promising.

During the fourth quarter of our 2014 financial year the company filed a patent application aimed at significantly expanding the protection of our hemoglobin formulations. It will encompass a greater array of ischemic conditions of the human body, for instance in the case of severe dysfunctions of the lung.

During the first quarter of our 2015 financial year, we began together with Excellence Cluster Cardio-Pulmonary System (ECCPS) and TransMIT Gesellschaft für Technologietransfer mbH (TransMIT) to investigate therapeutic approaches to treating septic shock and acute respiratory distress syndrome (ARDS). The approach adopted here by Sangui, ECCPS and TransMIT presupposes that self-perpetuating septic shock, that has so far been highly resistant to treatment, can be interrupted by Sangui's artificial haemoglobin-based oxygen carrier, which would ultimately lower mortality rates. The preclinical trials commenced at ECCPS investigate the effect of various haemoglobin preparations on the oxygen supply of a number of organs in septic shock models and ARDS.

Also during the first quarter of our 2015 financial year we were notified that the period for objection against European Patent EP 2550973, ("Wound Spray") elapsed without any objection being raised. The patent, therefore, has become effective and legally binding.

During the second quarter of our 2015 financial year the first phase of preclinical trials was concluded successfully. It could be demonstrated that applying an oxygen-carrying liquid (the hemoglobin hyperpolymer formulation SBT102) in the abdomen did significantly improve the oxygen supply to the intestines. The restoration of intestinal oxygenation will have an impact on tissue integrity and ultimately on patient survival.

During the third quarter of our 2015 financial year the preclinical trials were concluded successfully, the final results did fully confirm the interim results obtained in the second quarter.

According to regulatory requirements, all drugs must complete preclinical and clinical trials before approval (Government Regulation; No Assurance of Product Approval, see Certain Business Risks below) and market launch. Our management believes that the European and United States FDA approval process will take at a minimum several years to complete.

Our most promising potential product in the area of artificial oxygen carriers, the blood additive is still in an early development stage. In the pursuit of these projects we will need to obtain substantial additional capital to continue their development.

The blood additives project was halted in the second quarter of our financial year 2016 due to the lack of financing the further authorization.

Nano Formulations for the Regeneration of the Skin

Healthy skin is supplied with oxygen both from the inside, by way of the blood circulation, as well as through diffusion from the outside. A lack of oxygen will cause degenerative alterations, ranging from premature aging, to surface damage, and even as extensive as causing open wounds. The cause for the lack of oxygen may be a part of the normal aging process, but it may also be caused by burns, radiation, trauma, or a medical condition. Impairment of the blood flow, for example caused by diabetes mellitus or by chronic venous insufficiency, can also lead to insufficient oxygen supply and the resulting skin damage.

Our nano-emulsion-based preparations have been designed to support the regeneration of the skin by improving its oxygen supply. The products were thoroughly tested by an independent research institute and received top marks for skin moisturization, and enhanced skin elasticity, respectively.

Sales of this series remained at a low level across the years. After the end of the 2015 fiscal year we decided to discontinue our operations in this particular segment and to abandon the patent protection for this range of products.

Chitoskin Wound Pads

Usually, normal (“primary”) wounds tend to heal over a couple of days without leaving scars following a certain sequence of phases. Burns and certain diseases impede the normal wound healing process, resulting in large, hardly healing (“secondary”) wounds which only close by growing new tissue from the bottom. Wound dressings serve to safeguard the wound with its highly sensitive new granulation tissue from mechanical damage as well as from infection. Using the natural polymer chitosan, our Chitoskin wound dressings show outstanding properties in supporting wound healing.

It is our strategy to find industry partners ready to acquire or license this product range as a whole.

Hemoglobin Based Wound Spray Technology

SanguiBioTech GmbH has developed a novel medical product aimed at the healing of chronic wounds. Chronic wounds are a medical problem of increasing importance as they originate from widespread risk factors such as diabetes, obesity, smoking etc. Lack of oxygen supply to the cells in the wound ground is the main reason why those wounds lose their genuine healing power. Based on its concept of artificial oxygen carriers, our Hemospray wound spray product bridges the watery wound surface and permits an enhanced afflux of oxygen to the wound ground.

In December 2010, SanguiBioTech GmbH established a joint venture company with SanderStrothmann GmbH of Georgsmarienhütte, Germany. Under the name of SastoMed GmbH this enterprise is in charge of obtaining the CE mark certification authorizing the distribution of the Hemospray wound spray in the member states of the European Union. SanguiBioTech GmbH has granted SastoMed GmbH global distribution rights. The basic terms of the pertinent licensing contract agreement are as follows:

As licensor SanguiBioTech GmbH is awarded a fixed licensing fee as a percentage of each and every external revenues incurred by SastoMed from sales of the Granulox product (based on SastoMed selling prices). The percentage ranges in the uppermost zone of what is usually granted in the pharmaceutical and medical products industries and thus well above the average licensing rate of 7.5% of sales revenues as calculated by market analysts. In addition and complementing this basic agreement the percentage will be permanently increased by one fourth of the current rate as soon as cumulated sales revenues at SastoMed will have exceeded the total of €50,000,000.

In September 2011, the Mexican Health Authorities registered the entire current range of Sangui developed wound management products and thus granted the authorization to apply and sell these products on a nationwide level.

On April 5, 2012, SastoMed GmbH notified SanguiBioTech GmbH that the wound spray product was granted a certification as class III medical product. The CE mark according to sections 6

and 7 of the German Medical Devices Act authorizes production, distribution and sales of the product in all member countries of the European Union. According to SastoMed GmbH, sales of the product under the brand name “Granulox” started in Germany on April 16, 2012, other markets will be addressed in due course.

In August, 2012, Sangui BioTech GmbH and SastoMed GmbH cordially adjusted the existing sales strategy. In consideration of corresponding contributions the existing licensing contract was partially complemented resulting in the following conditions: As licensor SanguiBioTech GmbH is awarded a fixed licensing fee as a percentage of each and every external revenues incurred by SastoMed from sales of the Granulox product (based on SastoMed selling prices). The percentage ranges in the uppermost zone of what is usually granted in the pharmaceutical and medical products industries. In addition and complementing this basic agreement the percentage will be permanently increased by one fourth of the current rate as soon as cumulated sales revenues at SastoMed will have exceeded the total of €50,000,000.

In December, 2012, actual distribution of the product was initiated in Mexico under the management of SastoMed GmbH and their local distribution partner Bio-Mac Pharma. International distribution has been expanded since then through cooperation agreements with local distribution partners in the Benelux countries and South Eastern Europe.

In May, 2013, the Company declared in the course of the filing of its nine month report on form 10-QSB that according to information provided by SastoMed GmbH it now expects the Granulox market entry phase to last longer than initially expected. No assurance can be given that based on royalty revenues the Company may reach break-even in the course of its current financial year.

Since December 2013, international distribution outside Germany was initiated in collaboration with local partners in more than 40 countries in Europe and Latin American.

Effective December 31, 2015 Sangui BioTech GmbH sold its stake in Sastomed GmbH of 25% to SanderStrohmann GmbH . Also effective December 31, 2015 SanderStrohmann GmbH increased the nominal capital of Sastomed GmbH for an amount of Euro 500,000 to strengthen the capital base of Sastomed GmbH.

It has to be noted, however, that Granulox sales by our distribution partner SastoMed GmbH have become more volatile and declining from time to time.. We remain confident, however, that SastoMed will be able to considerably increase its sales along with more international markets entering actual distribution of the product.

Patents and Proprietary Rights

The Company seeks patent protection for all of its research and development, and all the most important modifications and improvements thereto. As of June 30, 2016 SanguiBioTech GmbH had been granted patents from 7 patent families, furthermore, it has applied for additional patents. Most of the patents have been filed in the United States of America (US), and as international patent applications with the European Patent Office (EP). Validation of EP patents in all cases includes Germany, France, Great Britain, Italy, and Spain. Below are listed the most important of the rights held by the Company.

1. Hemoglobin-Hyperpolymers

US 5,985,332	“Hemoglobins provided with ligands protecting the oxygen binding sites for use as artificial oxygen carriers for direct application in medicine and biology, and method for the preparation thereof” (patent granted, end of duration 2017)
US 6,956,025	“Mammalian hemoglobin compatible with blood plasma, cross-linked and conjugated with polyalkylene oxides as artificial medical oxygen carriers, production and use thereof” (patents granted, end of duration 2020)
EP 1 299 457	
EP 1 249 385	“Method for the production of artificial oxygen carriers from covalently cross linking hemoglobin with improved functional properties of hemoglobin by cross-linking in the presence of chemically non-reacting effectors of the oxygen affinity of the hemoglobin” (patent granted, end of duration 2020)
US 7,005,414	“Synthetic oxygen transport made from cross-linked modified human or porcine hemoglobin with improved properties, method for a preparation thereof from purified material and use thereof” (patents granted, end of duration 2020)
EP 1 294 386	
US 7,598,220	“Use of hyperpolymeric hemoglobin for treating a pulmonary edema” (patent granted, end of duration 2021)
DE 10 2013 014 651	“Compositions for Improved Tissue Oxygenation by Peritoneal Ventilation” (patents pending)
EP 14758344	
US SN 14 569,846	

2. Wound Management

EP 1 485 120	“Use of one or more natural or modified oxygen carriers, devoid of plasma and cellular membrane constituents, for externally treating open, in particular chronic
--------------	---

wounds” (patent granted, end of duration 2022)

EP 1 696 971 “Therapeutically active wound dressings, production thereof, and use of the same”
(patent granted, end of duration 2023)

Manufacturing, Marketing and Distribution

Manufacturing, marketing and distribution are not core competencies of the company. It is our strategy, therefore to outsource such business processes to external partners. In selecting and mandating them special attention is being paid to their experience, reputation and standing including the required quality management systems and certifications.

Research and Development

Research and development are charged to operations as they are incurred. Legal fees and other direct costs incurred in obtaining and protecting patents are expensed as incurred. Research and development costs totaled \$37,780 and \$204,987 during the fiscal years ended June 30, 2016 and 2015, respectively.

Government Regulation

Sangui BioTech International, Inc. and its former United States subsidiaries are and were subject to governmental regulation under the Occupational Safety and Health Act, the Environmental

Protection Act, the Toxic Substances Control Act, and other similar laws of general application, as to all of which we believe we and our subsidiaries were in material compliance.

Although it is believed that we and our former United States subsidiaries have been in material compliance with all applicable governmental and environmental laws, rules, regulations and policies, and although no government concerns were put forward during the operation of or after the closing of the US operations, there can be no assurance that the business, financial condition, and our results of operations of and those of our subsidiaries will not be materially adversely affected by future government claims with regard to unlikely, but not impossible, infringements on these or other laws resulting from our former United States operations.

Additionally, the clinical testing, manufacture, promotion and sale of a significant majority of the products and technologies, if those products and technologies are to be offered and sold in the United States, are subject to extensive regulation by numerous governmental authorities in the United States, principally the Federal Drug Administration (FDA), and corresponding state regulatory agencies. To the extent those products and technologies are to be offered and sold in markets other than the United States, the clinical testing, manufacture, promotion and sale of those products and technologies will be subject to similar regulation by corresponding foreign regulatory agencies. In general, the regulatory framework for biological health care products is more rigorous than for non-biological health care products. Generally, biological health care products must be shown to be safe, pure, potent and effective. There are numerous state and federal, foreign and international statutes and regulations that govern or influence the testing, manufacture, safety, effectiveness, labeling, storage, record keeping, approval, advertising, distribution and promotion of biological health care products. Non-compliance with applicable requirements can result in, among other things, fines, injunctions, seizures of products, total or partial suspension of product marketing, and failure of the government to grant pre-market approval, withdrawal of marketing approvals, product recall and criminal prosecution.

Competition

The market for our products and technologies is highly competitive, and we expect competition to increase. Experiments and clinical testing in the field of artificial oxygen carriers are being carried out by Alliance Pharmaceutical Corp. of San Diego, California. In the fields of anti-aging and anti-cellulite cosmetics, all major cosmetic vendors are actively marketing proprietary formulations. Leading wound management product providers include Johnson & Johnson, Bristol-Myers Squibb, Coloplast A/S of Denmark as well as BSNmedical, a former part of Beiersdorf AG.

Dependence on Major Customers

As of June 30, 2016 and June 30, 2015, the majority of revenues and trade receivables were generated and due by SastoMed GmbH as licensee of the global distribution rights of the Sangui developed wound spray technology.

Human Resources

We consider our relations with our employees to be favorable. As of June 30, 2016 the Company, and our subsidiary, had one fulltime employee, who was not involved in research and development. For management, research and development purposes, the Company has consulting arrangements with five individuals and one related entity.

Dividends

We anticipate that we will use any funds available to finance our growth and that we will not pay cash dividends to stockholders in the foreseeable future.

Reports to Security Holders

Copies of our reports, as filed with the Securities and Exchange Commission, are available and may be viewed as filed at the SEC's Public Reference Room at 450 Fifth Street, N.W., Washington D.C. 20549 or by calling 1-800-SEC-0330. Additionally they can be accessed and downloaded via the internet at <http://www.sec.gov/cgi-bin/srch-edgar> by simply typing in "Sangui Biotech International" or via the web links at the corporate website <http://www.sanguibiotech.com>.

ITEM 1A.

RISK FACTORS

Investment in our common stock involves significant risk. You should carefully consider the information described in the following risk factors, together with the other information appearing elsewhere in this report, before making an investment decision regarding our common stock. If any of the events or circumstances described in these risks actually occur, our business, financial conditions, results of operations and future growth prospects would likely be materially and adversely affected. In these circumstances, the market price of our common stock could decline, and you may lose all or a part of your investment in our common stock.

The risks and uncertainties described below are not the only ones facing the company, and there may be additional risks that are not presently known or are currently deemed immaterial. All of these risks may impair business operations.

The Company's present and proposed business operations will be highly speculative and subject to the same types of risks inherent in any new or unproven venture, as well as risk factors particular to the industries in which it will operate, as well as other significant risks not normally associated with investing in equity securities of United States companies, among other things, those types of risk factors outlined below.

Risks Related to Our Business

Global economic crisis could result in decreases in customer spending

We operate in competitive and evolving markets locally, nationally and globally. These markets are subject to rapid technological change and changes in demand. In seeking market acceptance, we will encounter competition from many sources, including other well-established and dominant larger providers. Many of these competitors have substantially greater financial, marketing and other resources than does Sangui. Our revenue could be materially adversely affected if we are unable to compete successfully with these other providers. The current economic climate has resulted in a decrease in customer spending.

There is uncertainty relating to the ability of the Company to enforce its rights under agreements

Many of our agreements are with foreign entities and are governed by the laws of foreign jurisdictions. If a partner breaches an agreement, then we will incur the additional costs of determining our rights and obligations under the agreement, under applicable foreign laws, and enforcing the agreement in a foreign jurisdiction. We also may face practical difficulties in enforcing any of our rights in such jurisdictions. We may not be able to enforce such rights or in the alternative may determine that it would be too costly to enforce such rights.

The Company may be subject to other third-party intellectual property rights claims

Companies in our industry often own large numbers of patents, copyrights, trademarks and trade secrets and frequently enter into litigation based on allegations of infringement or other violations of intellectual property rights. As we face increasing competition, the possibility of intellectual property rights claims against us grows. Our technologies may not be able to withstand third-party claims or rights against their use. Intellectual property claims, whether having merit or otherwise, could be time consuming and expensive to litigate or settle and could divert management resources and attention. If litigation is successfully brought by a third party against the Company in respect of intellectual property, we may be required to cease distributing or marketing certain products or obtain licenses from the holders of the intellectual property at material cost, redesign affected products in such a way as to avoid infringing intellectual property rights, any or all of which could materially adversely affect our business, financial condition and results of operations. If those

intellectual property rights are held by a competitor, we may be unable to obtain the intellectual property at any price, which could also adversely affect our competitive position. An adverse determination could also prevent us from offering its products. Any of these results could harm the Company's business, financial condition and results of operations.

Licenses and Consents

The utilization or other exploitation of the products and services developed by our Company or its subsidiary may require us to obtain licenses or consents from the producers or other holders of patents, trademarks, copyrights or other similar rights (Intellectual Property). In the event we are unable, if so required, to obtain any necessary license or consent on terms which we consider to be reasonable, we may be required to cease developing, utilizing, or exploiting products or technologies affected by those Intellectual Property rights. In the event we are challenged by the holders of such Intellectual Property rights, there can be no assurance that we will have the financial or other resources to defend any resulting legal action, which could be significant.

Technological Factors

The market for our products and technology is characterized by rapidly changing technology, which could result in product obsolescence or short product life cycles. Similarly, the industry is characterized by continuous development and introduction of new products and technology to replace outdated products and technology. Accordingly, the ability of us to compete will be dependent upon the ability to provide new and innovative products and technology. There can be no assurance that competitors will not develop technologies or products that render the proposed products and technology obsolete or less marketable. We will be required to adapt to technological changes in the industry and develop products and technology to satisfy evolving industry or customer requirements, any of which could require the expenditure of significant funds and resources, and we do not have a source or commitment for any such funds and resources. Development efforts relating to the technological aspects of the various products and technologies to be developed are not substantially completed. Accordingly, we will continue to refine and improve those products and technologies. Continued refinement and improvement efforts remain subject to the risks inherent in new product development, including unanticipated technical or other problems, which could result in material delays in product commercialization or significantly increased costs. In addition, there can be no assurance that those products and technologies will prove to be sufficiently reliable or durable in wide spread commercial application. The products or technologies to be developed will be the result of significant efforts, which may result in errors that become apparent subsequent to widespread commercial utilization. In such event, we would be required to modify such products or technologies and continue with additional research and development, which could delay our plans and cause us to incur additional cost.

The Company is subject to foreign business, political and economic disruption risks

We contract with various entities around the world. As a result, we are exposed to foreign business, political and economic risks, which could adversely affect our financial position and results of operations, including:

.

difficulties in managing relationships from abroad;

.

political and economic instability;

.

less developed infrastructures in some emerging economies and countries;

.

susceptibility to business interruption in foreign areas due to war, terrorist attacks, medical epidemics, changes in political regimes, and general interest rate and currency instability;

.

.

exposure to possible litigation or claims in foreign jurisdictions; and,

competition from foreign-based providers and the existence of protectionist laws and business practices that favor such providers.

Early stage of the Company and its products

We have generated limited revenue from operations, and may not generate any significant or sufficient revenue from its current operations to continue future operations. A very limited number of products are currently in the marketplace. However, to achieve profitable operations, either alone or with others, we must successfully initiate and maintain sales and distribution of our products. The time frame necessary to achieve market success for any individual product is uncertain. There can be no assurance that our efforts will be successful, or that any of our products will prove to meet the anticipated levels of approval or effectiveness, or that we will be able to obtain and sustain customer as well as distribution approval.

Our results can also be affected by the ability of competition to introduce new products that have advantages over our own, or the competition's ability to adjust its pricing to reduce any competitive advantage we may have. Results will also be affected by strategic decisions made by the management regarding product volume, mix, and timing of orders received during operations. See "Description of Business."

Uncertainty of future profitability

We will require the commitment of substantial resources to increase its advertising, marketing and distribution of its existing products. While we believe that the additional advertising, marketing and distribution will further enhance our profitability, there can be no assurance our products will meet the expectations and effectiveness required to be competitive in the market place, and that we will enter into arrangements for commercialization, market our products successfully, or achieve customer acceptance.

Future capital requirements; uncertainty of future funding

Substantial expenditures will be required to enable us to conduct existing product research, manufacturing, marketing and distribution of our products and Intellectual Property. We may need to raise additional capital to facilitate growth and support its longterm manufacturing, and marketing programs. We have no established bank-financing

arrangements and until we have sufficient assets, capital, and inventory or accounts receivable, it is not anticipated that we will secure any bank financing in the near future. Therefore, it is likely that we may need to seek additional financing through subsequent future public or private sales of its securities, including equity securities. We may also seek funding for the manufacturing, and marketing of its products through strategic partnerships and other arrangements with corporate partners. There can be no assurance, however, that such collaborative arrangements or additional funds will be available when needed, or on terms acceptable to the Company, if at all. Any such additional financing may result in significant dilution to existing stockholders. If adequate funds are not available, we may be required to curtail one or more of our programs. Our future cash requirements will be affected by the revenue generated from the sale of our products, the costs of production and marketing, as well as relationships with corporate partners, changes in the focus and direction of our programs, competitive and technological advances, and other factors.

Substantial Doubt that the Company Can Continue as a Going Concern

We expect to continue to incur significant capital expenses in pursuing our business plan to market our products and expand our product line, while obtaining additional financing through stock offerings or other feasible financing alternatives. In order for us to continue its operations at its existing levels, we will require significant additional funds over the next twelve months. Therefore,

we are dependent on funds raised through equity or debt offerings. Additional financing may not be available on terms favorable to the Company, or at all. If these funds are not available, we may not be able to execute our business plan or take advantage of business opportunities. The ability to obtain such additional financing and to achieve our operating goals is uncertain. In the event that we cannot obtain additional capital or are not able to increase cash flow through the increase of sales, there is a substantial doubt of our being able to continue as a going concern.

Future Capital Needs and Uncertainty of Additional Funding

We believe that our cash position is insufficient to cover its financing requirements for the current fiscal year, and anticipate that substantial funds will be required in order to enact our development plans. We will require additional cash for: (i) payment of increased operating expenses; (ii) payment of development expenses; and (iii) further implementation of its business strategies. Such additional capital may be raised by additional public or private financing, as well as borrowings and other resources. To the extent that additional capital is received by the sale of equity or equity-related securities, the issuance of such securities will result in dilution to our shareholders. There can be no assurance that additional funding will be available on favorable terms, if at all. We may also seek arrangements with collaborative partners in order to gain additional funding, marketing assistance or other contributions. However, such arrangements may require us to relinquish rights or reduce its interests in certain of our technologies or product candidates. The inability to access the capital markets or obtain acceptable financing could have a material adverse effect on the results of operations and financial condition of the Company. Moreover, if funds are not available from any sources, we may not be able to continue to operate.

Dependence on others; manufacturing capabilities and limited distribution capabilities

An important element of our strategy for the marketing and release of its products is to enter into various arrangements with distribution and retail partners. The success and commercialization of our products will be dependent, in part, upon our ability to enter into such arrangements and upon the ability of these third parties to perform their responsibilities. Although we believe that parties to any such arrangements would have an economic motivation to succeed in performing their contractual responsibilities, the amount and timing of resources to be devoted to these activities may not be within the control of the Company. There can be no assurance that any such arrangements will be available on terms acceptable to us, if any at all, and that such parties will perform their obligations as expected, or that any revenue will be derived from such arrangements. If we are not able to enter into such arrangements, we could encounter delays in introducing our products into the market. See “Business.”

We may be dependent on other manufacturers for the production and manufacturing of certain products. In the event that we are unable to obtain or retain the necessary manufacturer’s products on acceptable terms, we may not be able to continue to commercialize and market our products as planned. The manufacture of our products will be subject to current good manufacturing practices (“GMP”) requirements prescribed by the Company in order to meet the specifications and other standards prescribed by us to satisfy the anticipated and appropriate levels of effectiveness when in use. There can be no assurance that we will be able to i) obtain adequate supplies of its products in a timely

fashion at acceptable quality and prices, ii) enter into arrangements for the manufacture of its products with manufacturers whose facilities and procedures comply with our GMP or other regulatory requirements, iii) or that manufacturers will continue to comply with such standards, or iv) that such manufacturers will be able to adequately supply us with our product needs. Our dependence upon others for the manufacture of its proposed products may adversely affect the Company's ability to develop and deliver products on a timely and competitive basis.

In addition, we do not now have, nor do we have current plans to acquire or obtain, the facilities, or personnel necessary to conduct our own full-scale distribution of its products. Consequently, we will have to rely on existing commercial distribution channels for the sale of our

products. There can be no assurance that we will be able to secure sufficient distribution of any of its products on acceptable terms.

Changes of prices for products

While the prices of our products are projected to be in line with those from market competitors, there can be no assurance that they will not decrease in the future. Competition may cause us to lower prices in the future. Moreover, it is difficult to raise prices even if internal costs increase.

Creditworthiness of distributors is an ongoing concern

We may not always be able to collect all of the funds owed to us by our distributors. Some distributors may experience financial difficulties which may adversely impact our collection of accounts receivable.

C Corporation tax status

We are presently a C Corporation under the Internal Revenue Code of 1986. All items of income and loss of the Company are taxed first at the corporate level and any dividends distributed to shareholders are taxed at the shareholder level as well.

Limited current sales and marketing capability

Though we have key personnel with experience in sales, marketing and distribution to market its products, we must either retain and hire the necessary personnel to distribute and market our products or enter into collaborative arrangements or distribution agreements with third parties who will market such products or develop their own marketing and sales force with technical expertise and supporting distribution capability. There can be no assurance that we will be able to retain or hire the personnel with sufficient experience and knowledge to distribute and market our products or be able to enter into collaborative or distribution arrangements or develop our own sales force, or that such sales and marketing efforts, including the efforts of the companies with which we have entered into collaborative agreements, will be successful.

We incur significant costs as a result of our operating as a public company and our management is required to devote substantial time to new compliance initiatives.

As a public company with substantial operations, we incur increased legal, accounting and other expenses. The costs of preparing and filing annual, quarterly and current reports, proxy statements and other information with the SEC and furnishing audited reports to shareholders is time-consuming and costly.

It will also be time-consuming, difficult and costly for us to develop and implement the internal controls and reporting procedures required by the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act. Certain members of our management have limited or no experience operating a company whose securities are listed on a national securities exchange or with the rules and reporting practices required by the federal securities laws and applicable to a publicly traded company. We will need to recruit, hire, train and retain additional financial reporting, internal control and other personnel in order to develop and implement appropriate internal controls and reporting procedures. If we are unable to comply with the internal controls requirements of the Sarbanes-Oxley Act, we may not be able to obtain the independent accountant certifications required by the Sarbanes-Oxley Act.

If we fail to establish and maintain an effective system of internal controls, we may not be able to report our financial results accurately. Any inability to report and file our financial

results accurately and timely could harm our business and adversely affect the trading price of our common stock.

We are required to establish and maintain internal controls over financial reporting and disclosure controls and procedures and to comply with other requirements of the Sarbanes-Oxley Act and the rules promulgated by the SEC. At present, we have instituted internal controls, but it may take time to implement them fully as a newly public company. Our management, including our Chief Executive Officer and Chief Financial Officer, cannot guarantee that our internal controls and disclosure controls and procedures will prevent all possible errors. Because of the inherent limitations in all control systems, no system of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the possibility that judgments in decision-making can be faulty and subject to simple error or mistake. Furthermore, controls can be circumvented by individual acts of some persons, by collusion of two or more persons, or by management override of the controls. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, a control may become inadequate because of changes in conditions or the degree of compliance with policies or procedures may deteriorate. Because of inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

Dependence on Key Personnel

Our future success will depend on the service of our key scientific personnel and, additionally, our ability to identify, hire and retain additional qualified personnel. There is intense competition for qualified personnel in this industry and there can be no assurance that we will be able to attract and retain personnel necessary for the development of the business. Because of the intense competition, there can be no assurance that we will be successful in adding technical personnel if needed to satisfy our staffing requirements. Failure to attract and retain key personnel could have a material adverse effect on the Company.

The Company and its subsidiary are dependent on the efforts and abilities of their senior management. The loss of various members from management could have a material adverse effect on the business and our prospects. There can be no assurance that upon the departure of key personnel from our business, or that of our subsidiary, that a suitable replacement will be available.

Conflicts of Interest; Related Party Transactions

The possibility exists that we may acquire or merge with a business or company in which the Company's executive officers, directors, beneficial owners or their affiliates may have an ownership interest. Although there is no formal bylaw, stockholder resolution or agreement authorizing any such transaction, corporate policy does not forbid it and

such a transaction may occur if management deems it to be in the best interests of the Company and its stockholders, after consideration of all factors. A transaction of this nature would present a conflict of interest to those parties with a managerial position and/or an ownership interest in both the Company and the acquired entity, and may compromise management's fiduciary duties to the Company's stockholders. An independent appraisal of the acquired company may or may not be obtained in the event a related party transaction is contemplated. Furthermore, because management and/or beneficial owners of the Company's common stock may be eligible for finder's fees or other compensation related to potential acquisitions by the Company, such compensation may become a factor in negotiations regarding such potential acquisitions. It is the Company's intention that all future transactions be entered into on such terms as if negotiated at arm's length, unless the Company is able to receive more favorable terms from a related party.

Market Acceptance

There can be no assurance that our products and technologies will achieve a significant degree of market acceptance, and that acceptance, if achieved, will be sustained for any significant period or that product life cycles will be sufficient (or substitute products developed) to permit us to achieve or sustain market acceptance which could have a material adverse effect on the business, financial condition, and results of operations.

Government Regulation; No Assurance of Product Approval

The clinical testing, manufacture, promotion, and sale of biotechnology and pharmaceutical products are subject to extensive regulation by numerous governmental authorities in the United States, principally the Federal Drug Administration (FDA), and corresponding state and foreign regulatory agencies prior to the introduction of those products. Management believes that many of the potential products will be regulated by the FDA, subject to the then current regulations of the FDA. Other federal and state statutes and regulations may govern or influence the testing, manufacture, safety, effectiveness, labeling, storage, record-keeping, approval, advertising, distribution and promotion of certain products developed. Non-compliance with applicable requirements can result in, among other things, fines, injunctions, seizure of products, suspensions of regulatory approvals, product recalls, operating restrictions, re-labeling costs, delays in sales, cessation of manufacture of products, the imposition of civil or criminal sanctions, total or partial suspension of product marketing, failure of the government to grant pre-market approval, withdrawal of marketing approvals and criminal prosecution.

The FDA's requirements include lengthy and detailed laboratory and clinical testing procedures, sampling activities and other costly and time-consuming procedures. In particular, human therapeutic products are subject to rigorous pre-clinical and clinical testing and other approval requirements by the FDA, and corresponding agencies in other countries. Although the time required for completing such testing and obtaining such approvals is uncertain, satisfaction of these requirements typically takes a number of years and varies substantially based on the type, complexity and novelty of each product. Neither us nor our subsidiary can accurately predict when product applications or submissions for FDA or other regulatory review may be submitted. Management has no experience in obtaining regulatory clearance on these types of products. The lengthy process of obtaining regulatory approval and ensuring compliance with applicable law requires the expenditure of substantial resources. Any delays or failure by us or our subsidiary to obtain regulatory approval and ensure compliance with appropriate standards could adversely affect the commercialization of such products, the ability of us to earn product or royalty revenue, and our results of operations, liquidity and capital resources.

Pre-clinical testing is generally conducted in laboratory animals to evaluate the potential safety and effectiveness of a drug. The results of these studies are submitted to the FDA, which must be approved before clinical trials can begin. Typically, clinical evaluation involves a time consuming and costly three-phase process. In Phase I, clinical trials are conducted with a small number of subjects to determine the early safety profile, the pattern of drug distribution and metabolism. In Phase II, clinical trials are conducted with groups of patients afflicted with a specific disease in order

to determine preliminary efficacy, optimal dosages and expanded evidence of safety. In Phase III, large-scale, multi-center, comparative trials are conducted with patients afflicted with a target disease in order to provide enough data to demonstrate the efficacy and safety required by the FDA. The FDA closely monitors the progress of each of the three phases of clinical trials and may, at its discretion, re-evaluate, alter, suspend or terminate the testing based upon the data which have been accumulated to that point and its assessment of the risk/benefit ratio to the patient.

Clinical trials and the marketing and manufacturing of products are subject to the rigorous testing and approval processes of the FDA and foreign regulatory authorities. The process of obtaining FDA and other required regulatory approvals is lengthy and expensive. There can be no

assurance we will be able to obtain the necessary approvals to conduct clinical trials for the manufacturing and marketing of products, that all necessary clearances will be granted to us or one of our licensors for future products on a timely basis, or at all, or that FDA review or other actions will not involve delays adversely affecting the marketing and sale of the products. In addition, the testing and approval process with respect to certain new products which we may seek to introduce is likely to take a substantial number of years and involve the expenditure of substantial resources. There can be no assurance that pharmaceutical products currently in development will be cleared for marketing by the FDA. Failure to obtain any necessary approvals or failure to comply with applicable regulatory requirements could have a material adverse effect on the business, financial condition or results of operations. Further, future government regulation could prevent or delay regulatory approval of the products.

There can be no assurance as to the length of the clinical trial period or the number of patients the FDA will require to be enrolled in the clinical trials in order to establish the safety and effectiveness of the products. We may encounter significant delays or excessive costs in our efforts to secure necessary approvals, and regulatory requirements are evolving and uncertain. Future United States or foreign legislative or administrative acts could also prevent or delay regulatory approval of the products. If commercial regulatory approvals are obtained, they may include significant limitations on the indicated uses for which a product may be marketed. In addition, a marketed product is subject to continual FDA review. Later discovery of previously unknown problems or the failure to comply with the applicable regulatory requirements may result in restrictions on the marketing of a product, or even the removal of the product from the market, as well as possible civil or criminal sanctions. Failure to obtain marketing approval for any of our products under development on a timely basis, or FDA withdrawal of marketing approval once obtained, could have a material adverse effect on the business, financial condition and results of operations.

Any party that manufactures therapeutic or pharmaceutical products is required to adhere to applicable standards for manufacturing practices and to engage in extensive record keeping and reporting. Any of the manufacturing facilities are subject to periodic inspection by state and federal agencies, including the FDA and comparable agencies in foreign countries.

The effect of governmental regulation may be to delay the marketing of new products for a considerable period of time, to impose costly requirements on the activities or to provide a competitive advantage to other companies that compete with us. There can be no assurance that FDA or other regulatory approval for any products developed by us will be granted on a timely basis, if at all or, if granted, that compliance with regulatory standards will be maintained. Adverse clinical results by our products could have a negative impact on the regulatory process and timing. A delay in obtaining, or failure to obtain, regulatory approvals could preclude or adversely affect the marketing of products and the liquidity and capital resources. The extent of potentially adverse governmental regulation that might result from future legislation or administrative action cannot be predicted.

Additionally, we will be subject to regulatory authorities in Germany and other countries governing clinical trials and product sales. Even if FDA approval is obtained, approval of a product by the comparable regulatory authorities of other countries must be obtained prior to the commencement of marketing the product in those countries. The approval process varies from country to country and the time required may be longer or shorter than that required for FDA approval. The foreign regulatory approval process includes all of the risks associated with obtaining FDA

approval set forth above, and approval by the FDA does not ensure approval by the health authorities of any other country. There can be no assurance that any foreign regulatory agency will approve any product submitted for review.

We are subject to various federal, state and local laws, regulations and recommendations relating to safe working conditions, laboratory and manufacturing practices, the experimental use of animals and the use and disposal of hazardous or potentially hazardous substances, including radioactive compounds and infectious disease agents, used in connection with its research work. The

extent and character of governmental regulation that might result from future legislation or administrative action cannot be accurately predicted.

Intense Competition

Competition in the biotechnology, pharmaceutical and cosmetic industries is intense and is expected to increase. In the field of medical and cosmetic products we, and our subsidiary, compete directly with the research departments of biotechnology and pharmaceutical companies, chemical companies and, possibly, joint collaborations between chemical companies and research and academic institutions. Management is aware that other companies and businesses have developed and are in the process of developing technologies and products, which may be competitive with the products and technologies developed and offered by us. Eventually, this might include the field of blood additives where there is no known direct competition at present. The biotechnology and pharmaceutical industries continue to undergo rapid change. There can be no assurance that competitors have not or will not succeed in developing technologies and products that are more effective than any which have been or are being developed by us or which would render our technology and products obsolete. Many of our competitors have substantially greater experience, financial and technical resources and production, marketing and development capabilities than us. Accordingly, certain of those competitors may succeed in obtaining regulatory approval for products more rapidly or effectively.

Uncertainties Associated With Patents and Proprietary Rights

Our success may depend in part on the ability to obtain patents for our technologies and products, if any, resulting from the application of such technologies, to defend patents once obtained and to maintain trade secrets, both in the United States and in foreign countries.

Our success will also depend on avoiding the infringement of patents issued to competitors. There can be no assurance that we will be able to obtain patent protection for products based upon the technology. Moreover, there can be no assurance that any patents issued will not be challenged, invalidated or circumvented or that the rights granted there under would provide competitive advantages to us. Litigation, which could result in substantial cost may be necessary to enforce the patent and license rights or to determine the scope and validity of our and others' proprietary rights.

Due to the length of time and expense associated with bringing new products through development and the length of time required for the governmental approval process, the biotechnology and pharmaceutical industries have traditionally placed considerable importance on obtaining and maintaining patent and trade secret protection for significant new technologies, products and processes. The enforceability of patents issued to biotechnology and pharmaceutical firms can be highly uncertain. U.S. Federal court decisions establishing legal standards for determining the validity and scope of patents in the field are in transition. In addition, there can be no assurance that

patents will be issued or, if issued, any such patents will afford us protection from infringing patents granted to others.

A number of biotechnology and pharmaceutical companies, and research and academic institutions, have developed technologies, filed patent applications or received patents on various technologies that may be related to our business. Some of these technologies, applications or patents may conflict with our technologies. Such conflicts could also limit the scope of the patents, if any, that we may be able to obtain or result in the denial of our patent applications.

Many of our competitors are, have, or are affiliated with companies having, substantially greater resources than us, and such competitors may be able to sustain the costs of complex patent litigation to a greater degree and for longer periods of time than us. Uncertainties resulting from the initiation and continuation of any patent or related litigation could have a material adverse effect on the ability of us to compete in the marketplace pending resolution of the disputed matters. Moreover, an adverse outcome could subject us to significant liabilities to third parties and require us to license

disputed rights from third parties or cease using the technology. In the event that third parties have or obtain rights to intellectual property or technology used or needed by us, there can be no assurance that any licenses would be available or would be available on terms reasonably acceptable to us.

We may rely on certain proprietary technologies, trade secrets, and know-how that are not patentable. Although we have taken steps to protect their unpatented trade secrets and technology, in part through the use of confidentiality agreements with their employees, consultants and certain of its contractors, there can be no assurance that: (i) these agreements will not be breached; (ii) we would have adequate remedies for any breach; or (iii) our proprietary trade secrets and know-how will not otherwise become known or be independently developed or discovered by competitors.

Risk of Product Liability; Potential Unavailability of Insurance

Our business will expose it to potential product liability risks that are inherent in the testing, manufacturing and marketing of human pharmaceutical and therapeutic products. We do not currently have product liability insurance, and there can be no assurance that we will be able to obtain or maintain such insurance on acceptable terms or, if obtained, that such insurance will be adequate to cover potential product liability claims or that a loss of insurance coverage or the assertion of a product liability claim or claims would not materially adversely affect the business, financial condition and results of operations. We face an inherent business risk of exposure to product liability and other claims in the event that the development or use of its technology or products is alleged to have resulted in adverse effects. Such risk exists even with respect to those products that are manufactured in licensed and regulated facilities or that otherwise possess regulatory approval for commercial sale. There can be no assurance that we will avoid significant product liability exposure.

While we have taken, and will continue to take, what it believes are appropriate precautions, there can be no assurance that it will avoid significant liability exposure. An inability to obtain product liability insurance at acceptable cost or to otherwise protect against potential product liability claims could prevent or inhibit the commercialization of products developed. A product liability claim could have a material adverse effect on the business, financial condition and results of operations.

Uncertainties Relating to Pricing and Third-Party Reimbursement

Our operating results may depend in part on the availability of adequate reimbursement for our products from third-party payers, such as government entities, private health insurers and managed care organizations. Third-party payers are increasingly seeking to negotiate the pricing of medical services and products. In some cases, third-party payers will pay or reimburse a user or supplier of a product for only a portion of the purchase price of the product. In the case of the products, payment or reimbursement by third-party payers of only a portion of the cost of such products could make such products less attractive, from a cost perspective, to users, suppliers and physicians. There

can be no assurance that reimbursement, if available, will be adequate. Moreover, certain of the products may not be of the type generally eligible for third-party reimbursement. If adequate reimbursement levels are not provided by government entities or other third-party payers for the products, the business, financial condition and results of operations would be materially adversely affected. A number of legislative and regulatory proposals aimed at changing the United States' health care system have been proposed in recent years. While we cannot predict whether any such proposals will be adopted, or the effect that any such proposal may have on its business, such proposals, if enacted, could have a material adverse effect on the business, financial condition or results of operations.

Risk of Product Recall; Product Returns

Product recalls may be issued at our discretion, the FDA or other government agencies having regulatory authority for product sales and may occur due to disputed labeling claims, manufacturing issues, quality defects or other reasons. No assurance can be given that product recalls will not occur

in the future. Any product recall could materially adversely affect the business, financial condition or results of operations. There can be no assurance that future recalls or returns would not have a material adverse effect upon the business, financial condition and results of operations.

Risks of International Sales and Operations

Our results of operations are subject to fluctuations in the value of the Euro against the U.S. Dollar due to our German subsidiary. Although management will monitor exposure to currency fluctuations, there can be no assurance that exchange rate fluctuations will not have a material adverse effect on the results of operations or financial condition. In the future, we could be required to sell its products in other currencies, which would make the management of currency fluctuations more difficult and expose us to greater risks in this regard.

Our products will be subject to numerous foreign government standards and regulations that are continually being amended. Although we will endeavor to satisfy foreign technical and regulatory standards, there can be no assurance that our products will comply with foreign government standards and regulations, or changes thereto, or that it will be cost effective for us to redesign its products to comply with such standards or regulations. The inability of us to design or redesign products to comply with foreign standards could have a material adverse effect on our business, financial condition and results of operations.

Lack of Commercial Manufacturing and Marketing Experience

We have not yet manufactured products in commercial quantities. The Company and its manufacturing contractors and partners will be engaged in manufacturing pharmaceutical products which will be subject to stringent regulatory requirements. No assurance can be given that we, on a timely basis, will be able to make the transition from manufacturing clinical trial quantities to commercial production quantities successfully or be able to arrange for contract manufacturing. The Company and our subsidiary have no experience in the sales, marketing and distribution of products. There can be no assurance that we will be able to establish sales, marketing and distribution capabilities or make arrangements with collaborators, licensees or others to perform such activities or that such effort will be successful.

The manufacture of the products involves a number of steps and requires compliance with stringent quality control specifications imposed by us and by the FDA or similar regulatory bodies under the law of the respective countries. Moreover, our products can only be manufactured in a facility that has undergone a satisfactory inspection by the FDA. For these reasons, we would not be able to quickly replace its manufacturing capacity if one of our manufacturing contractors or partners were unable to use their manufacturing facilities as a result of a fire, natural disaster, equipment failure or other difficulty, or if such facilities are deemed not in compliance with the FDA's Good Manufacturing Practice ("GMP") requirements and the non-compliance could not be rapidly rectified. The inability or

reduced capacity to manufacture their products would have a material adverse effect on our business and results of operations.

We have entered and may enter into arrangements with contract manufacturing companies to expand its production capacities in order to satisfy requirements for its products, or to attempt to improve manufacturing efficiency. If we choose to contract for manufacturing services and encounters delays or difficulties in establishing relationships with manufacturers to produce, package and distribute its finished products, clinical trials, market introduction and subsequent sales of such products would be adversely affected. Further, contract manufacturers must also operate in compliance with the FDA's GMP requirements; failure to do so could result in, among other things, the disruption of product supplies.

Currently, we have our products manufactured by contract manufacturers in Germany. No assurance can be given, that the vendors will be willing or able to produce the products in the required

quality or quantities or at prices which will enable us to sell the end products as requested by its customers.

Risks resulting from investing and financing activities

We may from time to time in the ordinary course of business carry out certain investing or financing transactions including extending loans to non-related third parties or the purchase of treasury stocks. Such transactions are subject to certain risks including but not limited to the inability of borrowers to redeem interest and principal of such loans, the inability of the company to capitalize on collaterals provided by the borrowers if any, or the devaluation of the treasury stock. In the event that one or more of these risks actually occur, the company may be confronted with the situation that it in turn may not be able to refinance its ongoing operations.

Hazardous Materials and Environmental Matters

Our research and development processes involve the controlled storage, use and disposal of hazardous materials. We are subject to federal, state and local laws and regulations governing the use, generation, manufacturing, storage, handling, and disposal of such materials and certain waste products. Although we do not currently manufacture commercial quantities of its product candidates, we produce limited quantities of such products for our clinical trials or comparable testing and we may eventually intend to manufacture commercial quantities of our products. Although we have passed the ISO 9001:2000 (General Quality Management System) and ISO 13485:2003 (Quality Management System Medical Products) audits, and obtained the respective certifications, and although we believe that our safety procedures for handling and disposing of such materials comply with the standards prescribed by such laws and regulations, the risk of accidental contamination or injury from these materials cannot be completely eliminated. In the event of such an accident, we could be held liable for any damages that result, and any such liability could exceed our resources. There can be no assurance that we will not be required to incur significant costs to comply with current or future environmental laws and regulations nor that the operations, business or assets will not be materially or adversely affected by current or future environmental laws or regulations.

Fluctuations in Foreign Currency Exchange Rates could have an Adverse Impact.

Because a portion of our total income is derived from international operations that are conducted in foreign currencies, changes in value of these foreign currencies relative to the US dollar may affect our results of operation and financial position. If for any reason exchange or price controls or other restriction on the conversion of foreign currencies were imposed, our business could be adversely affected.

Risks Related to Our Securities

Trading and limited market

At the present time, the Company's common stock is traded on the OTCQB under the symbol SGBI. There is currently a limited public market for the Common Stock and there can be no assurance that an active trading market will develop or, if one does develop, that it will be maintained. However, should such a market arise, the possibility or actual sale into the market of shares of the Company's Common Stock as permitted under Rule 144 of the Securities Act of 1933 may adversely affect prevailing market prices, if any, for the Company's Common Stock and could impair the Company's ability to raise capital through the sale of its equity securities. In order to qualify for unrestricted resale of Common Stock under Rule 144, certain holding periods must be met and a legal opinion setting forth the exemption from registration must be provided. Further, there is no assurance that Rule 144 will be applicable to the Company and investors may not be able to rely on its provisions now or in the future. In addition, sales of significant amounts of Common Stock by the Company

subsequent to this offering could have an adverse effect on the market price, if any, for the Company's securities.

No dividends

No cash dividends have been paid. Payment of dividends on the Common Stock is within the discretion of the Board of Directors, is subject to state law, and will depend upon the Company's earnings, if any, its capital requirements, financial condition and other relevant factors.

Possible volatility of stock price

The market price of the Company's securities is likely to be highly volatile. Factors such as the market acceptance of the Company's products, success of distribution channels or its competitors, announcements of technological innovations or new commercial products by the Company or its competitors, developments in trademark, patent or other proprietary rights of the Company or its competitors, and fluctuations in the Company's operating results may have a significant effect on the market price of the Common Stock. In addition, the stock market has experienced and continues to experience extreme price and volume fluctuations which have affected the market price of many companies and which have often been unrelated to the operating performance of these companies. These broad market fluctuations, as well as general economic and political conditions, may adversely affect the market price, if a market develops, of the Common Stock. See "Description of Capital Stock."

We are subject to the periodic reporting requirements of the Securities Exchange Act of 1934 which require us to incur audit fees and legal fees in connection with the preparation of such reports. These additional costs could reduce or eliminate our ability to earn a profit.

We are required to file periodic reports with the Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934 and the rules and regulations promulgated thereunder. In order to comply with these requirements, our independent registered public accounting firm has to review our financial statements on a quarterly basis and audit our financial statements on an annual basis. Moreover, our legal counsel will have to review and assist in the preparation of such reports. The costs charged by these professionals for such services cannot be accurately predicted at this time because factors such as the number and type of transactions that we engage in and the complexity of our reports cannot be determined at this time and will have a major effect on the amount of time to be spent by our auditors and attorneys. However, the incurrence of such costs will obviously be an expense to our operations and thus have a negative effect on our ability to meet our overhead requirements and earn a profit. We may be exposed to potential risks resulting from new requirements under Section 404 of the Sarbanes-Oxley Act of 2002. If we cannot provide reliable financial reports or prevent fraud, our business and operating results could be harmed, investors could lose confidence in our reported financial information, and the trading price of our common stock, if a market ever develops, could drop significantly.

We do not have a sufficient number of employees to segregate responsibilities and may be unable to afford increasing our staff or engaging outside consultants or professionals to overcome our lack of employees. During the course of our testing, we may identify other deficiencies that we may not be able to remediate in time to meet the deadline imposed by the Sarbanes-Oxley Act for compliance with the requirements of Section 404. In addition, if we fail to achieve and maintain the adequacy of our internal controls, as such standards are modified, supplemented or amended from time to time, we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal controls over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act. Moreover, effective internal controls, particularly those related to revenue recognition, are necessary for us to produce reliable financial reports and are important to help prevent financial fraud. If we cannot provide reliable financial reports or prevent fraud, our business and operating results

could be harmed, investors could lose confidence in our reported financial information, and the trading price of our common stock, if a market ever develops, could drop significantly.

Management believes that these reporting obligations will increase the Company's annual legal and accounting costs by an estimated \$25,000 and \$30,000, respectively.

Penny stock regulations

If the Company's stock is below \$5.00 per share, or the Company does not have \$2,000,000 in net tangible assets, or is not listed on an exchange or on the NASDAQ National Market System, among other conditions, the Company's shares may be subject to a rule promulgated by the Securities and Exchange Commission (the "SEC") that imposes additional sales practice requirements on brokerdealers who sell such securities to persons other than established customers and institutional accredited investors. For transactions covered by the rule, the brokerdealer must make a special suitability determination for the purchaser and receive the purchaser's written consent to the transaction prior to the sale. Furthermore, if the price of the Company's stock is below \$5.00, and does not meet the conditions set forth above, sales of the Company's stock in the secondary market will be subject to certain additional new rules promulgated by the SEC. These rules generally require, among other things, that brokers engaged in secondary trading of stock provide customers with written disclosure documents, monthly statements of the market value of penny stocks, disclosure of the bid and asked prices, and disclosure of the compensation to the brokerdealer and disclosure of the sales person working for the brokerdealer. These rules and regulations may affect the ability of brokerdealers to sell the Company's securities, thereby limiting the liquidity of the Company's securities. They may also affect the ability of shareholders to resell their securities in the secondary market.

Future sales of shares of our common stock by our shareholders could cause our stock price to decline.

Future sales of shares of our common stock could adversely affect the prevailing market price of our stock. If our significant shareholders sell a large number of shares, or if we issue a large number of shares, the market price of our stock could decline. Moreover, the perception in the public market that shareholders might sell shares of our stock could depress the market for our shares. If such shareholders sell substantial amounts of our common stock in the public market, such sales could create a circumstance commonly referred to as an "overhang," in anticipation of which the market price of our common stock could fall. The existence of an overhang, whether or not sales have occurred or are occurring, also could make it more difficult for us to raise additional financing through the sale of equity or equity-related securities in the future at a time and price we deem reasonable or appropriate.

We may issue additional shares of our common stock or debt securities to raise capital or complete acquisitions, which would reduce the equity interest of our shareholders.

Although we have no commitments as of the date of this prospectus to issue our securities, we may issue a substantial number of additional shares of our common stock or debt securities to complete a business combination or to raise capital. The issuance of additional shares of our common stock may significantly reduce the equity interest of our existing shareholders and adversely affect prevailing market prices for our common stock.

ITEM 2.

PROPERTIES

The Company leases its office on a month to month basis and laboratory facilities and is housed in approximately 8,600 square feet based in the Forschungs und Entwicklungszentrum of the University Witten/Herdecke, Germany. Rent expense was approximately \$53,927 and \$66,186 during the years ended June 30, 2016 and 2015, respectively.

ITEM 3.

LEGAL PROCEEDINGS

We are not a party to any pending legal proceeding. No federal, state or local governmental agency is presently contemplating any proceeding against the Company. No director, executive officer or affiliate of the Company or owner of record or beneficially of more than five percent of the Company's common stock is a party adverse to the Company or has a material interest adverse to the Company in any proceeding.

PART II**ITEM 5.****MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market Information**

As of June 30, 2016, our common stock was traded on the OTCQB Venture Marketplace under the symbol SGBI as well as on the OTC markets of the Berlin and Hamburg-Hanover stock exchanges in Germany.

The following table sets forth the high and low closing prices for shares of SGBI common stock for the fiscal periods noted, as reported by OTCQB. Quotations reflect inter-dealer prices, without retail mark-up, markdown or commissions and may not represent actual transactions.

	Common Stock Closing Prices (US\$)	
	High	Low
<u>2016</u>	\$	\$
Quarter ended September 2015	0.09	0.035
Quarter ended December 2015	0.035	0.02
Quarter ended March 2016	0.018	0.002
Quarter ended June 2016	0.004	0.0027
<u>2015</u>	\$	\$
Quarter ended September 2014	0.14	0.05
Quarter ended December 2014	0.15	0.03
Quarter ended March 2015	0.08	0.03
Quarter ended 2015	0.11	0.05

In addition to freely tradable shares, SGBI has numerous shares of common stock outstanding that could be sold pursuant to Rule 144. In general, under Rule 144, subject to the satisfaction of certain other conditions, a person, including one of our affiliates, who has beneficially owned restricted shares of common stock for at least one year is entitled to sell, in certain brokerage transactions, within any three-month period, a number of shares that does not exceed the greater of 1% of the total number of outstanding shares of the same class, or the average weekly trading volume during the four calendar weeks immediately preceding the sale. A person who presently is not and who has not been an affiliate for at least three months immediately preceding the sale and who has beneficially owned the shares of common stock for at least six months is entitled to sell such shares under Rule 144 without regard to any of

the volume limitations described above.

Holders

At June 30, 2016, the number of record holders of the Company's common stock was approximately 894.

Dividends

The company did not pay any cash dividends during the past two fiscal years and does not contemplate paying dividends in the foreseeable future.

Securities Authorized For Issuance Under Equity Compensation Plans

The following table sets forth information as of June 30, 2016, with respect to our equity compensation plans previously approved by stockholders and equity compensation plans not previously approved by stockholders.

Equity Compensation Plan Information			Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted average exercise price of outstanding options, warrants and rights	
	(a)	(b)	(c)
Equity compensation plans approved by stockholders	0 ^[1]	\$ 0.00	0
Equity compensation plans not approved by stockholders	0	0.00	0
Total	0	\$ 0.00	0

^[1] On October 22, 2008 the Company adopted the 2008 Amended and Restated Long-Term Equity Incentive Plan, whereby the Board was authorized to issue up to 10,000,000 shares of common stock (including incentive stock options) to certain eligible employees, directors, and consultants of the Company or its subsidiaries.

By the end of our 2013 financial year all shares available under the Plan had been issued.

Issuer Purchases of Equity Securities

The Company holds 53,756 shares of its common stock. The treasury stock is valued using the Treasury Stock Method at \$19,387.

Recent Sales of Unregistered Securities

On April 28, 2016, the Company issued 2,576,000 restricted shares of its common stock upon receipt of a capital contribution of approx. \$ 39,473 in cash to two individuals. No underwriters were used. The securities were sold pursuant to an exemption from registration provided by Regulation S and Section 4(2) of the Securities Act of 1933. The certificate representing the shares contained a restricted legend.

On May 12, 2016, the Company issued 3,575,000 restricted shares of its common stock upon receipt of capital contributions of approx. \$57,003 in cash to a Company Director. No underwriters were used. The securities were sold pursuant to an exemption from registration provided by Regulation S and Section 4(2) of the Securities Act of 1933. The certificate representing the shares contained a restricted legend.

Sales of Unregistered Securities Subsequent to the Period Covered by this Report

Subsequent to the year ended June 30, 2016, the Company issued 9,149,000 shares of its common stock for cash to three (3) individuals at a stock price ranging from \$0.09 to \$0.012. No underwriters were used. The securities were sold pursuant to an exemption from registration provided

by Regulation S and Section 4(2) of the Securities Act of 1933. The certificate representing the shares contained a restricted legend.

ITEM 6.

SELECTED FINANCIAL DATA

As a “smaller reporting company” (as defined by §229.10(f)(1)), we are not required to provide the information required by this Item.

ITEM 7.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue, expenses, and related disclosure of contingent assets and liabilities. We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements. Actual results may differ from these estimates under different assumptions or conditions.

CRITICAL ACCOUNTING POLICIES: Our significant accounting policies are described in Note 1 to the consolidated financial statements for the year ended June 30, 2016. The following are our critical accounting policies:

Revenue Recognition

The Company derives revenue primarily from licensing fees on sales of its wound spray product as well as from the sale of its cosmetics products.

The wound spray technology is licensed to an entity in which the Company held a 25 percent equity interest. Effective December 31, 2016 the company sold their stake. The Company is presently entitled to royalties on net sales of the wound spray product. The licensing fees are invoiced on a quarterly basis and are recognized as revenues as per the quarter for which the sales were reported by the licensee.

The majority of the Company's sales of cosmetics products are generated via online orders, with credit card payment. The Company recognizes revenues when: (i) persuasive evidence of a sales arrangement exists, (ii) the sales terms are fixed and determinable, (iii) title and risk of loss have transferred, and (iv) collectability is reasonably assured — generally when products are shipped to the customer, except in situations in which title passes upon receipt of the products by the customer. In this case, revenues are recognized upon notification that customer receipt has occurred. The Company does not have customer acceptance provisions, but it does provide its customers a limited right of return. As warranted the Company accrues an estimated amount for sales returns and allowances at the time of sale based on its ability to estimate sales returns and allowances using historical information. Shipping and handling fees are included as part of net sales. The related freight costs and supplies associated with shipping products to customers are included as a component of cost of goods sold.

Research and Development

Research and development costs are charged to operations as they are incurred. Legal fees and other direct costs incurred in obtaining and protecting patents are expensed as incurred. Research and development costs totaled \$37,780 and \$204,987 during the fiscal years ended June 30, 2016 and 2015, respectively.

Foreign Currency Translation

The functional currency of the Company's Sangui GmbH subsidiary is the local currency, the Euro. Accordingly, assets and liabilities of the subsidiary are translated into U.S. dollars at period-end exchange rates. Sales and expenses are translated at the average exchange rates in effect for the period. The resulting translation gains or losses are recorded as a component of accumulated other comprehensive income in the consolidated statement of stockholders' equity (deficit). For the periods ending June 30, 2016 and 2015, the Company recognized foreign currency translation loss of \$(46,800) and gain of \$39,373.

The exchange rates used to calculate values and results for the years ended June 30, 2016 and 2015 were as follows (USD):

	Year-end Rates	Average Period Rates
June 30, 2016	0.90104	0.9005
June 30, 2015	0.9014	0.8312

FINANCIAL POSITION

Our current assets increased by \$38,320, or 53.1%, from \$72,009 at June 30, 2015 to \$110,419 at June 30, 2016. The increase is primarily attributable to an increase in cash.

Our net property and equipment \$-0- at June 30, 2016 and at June 30, 2015. There were no investments in net property and equipment during the 2016 fiscal year.

Our other assets decreased \$50,000 to \$ 0 on June 30, 2016 as compared to June 30, 2015. The decrease is attributable to deferred finance costs related to the issuance of a \$50,000 note payable in connection with an equity purchase agreement.

We funded our operations primarily through sales of unregistered securities. The Company's stockholders' deficit was reduced from \$339,834 at June 30, 2015 to \$110,419 as of June 30, 2016. The primary reason for the decrease in the deficit was issuance of common stock totaling approximately \$460 thousand, sale of Treasury Stock of \$320 thousand offset by the net loss of \$446 thousand and the, loss on foreign currency translation of \$46 thousand

REVENUES. Revenues decreased 62.2% to \$48,009 during the year ended June 30, 2016 from \$127,469 in the previous fiscal year. This decrease is due primarily to a sharp decline in income from royalties due from sales of the wound spray product. We incurred Cost of Sales totaling \$293 during the 2016 fiscal year, a 44.9% decrease from the prior year.

RESEARCH AND DEVELOPMENT. Research and development expenses decreased to \$37,780 during the year ended June 30, 2016 from \$204,987 during the 2015 fiscal year. This decrease is due to the fact that the company stopped research activities for the artificial oxygen carriers during the 2016 fiscal year. R&D expense in the 2015 fiscal year was mainly dedicated to the animal tests aimed at preclinical results for the internal use of our artificial oxygen carriers.

OTHER OPERATING EXPENSES. Professional fees for 2016 decreased to \$145,619 from \$419,494 in 2015 due to savings within management. General and administrative expenses decreased by \$29,570. Overall Total Operating Expenses decreased by \$470,652 or 53.5%.

OTHER INCOME (EXPENSE). Other expense increased by \$79,383 from 2015 to \$85,456 in 2016. The increase relates to interest expense of \$69,835, amortization of the debt discount of \$50,000, and gain on the derivative valuation and approximately a \$7,000 gain on the sale of the JV interest.

NET LOSS. As a result of the above and other factors, the Company's consolidated net loss attributable to common stockholders was \$ 422,271 or \$0.00 per common share in 2016, as compared to \$704,703 or \$0.01 per common share in 2015.

LIQUIDITY AND CAPITAL RESOURCES

For the year ended June 30, 2016, net cash used in operating activities decreased to \$ 394,757 from \$602,291 for the year ended June 30, 2015, primarily related to the reduced net loss for the year offset by loss on equity investment and note receivable.

For the year ended June 30, 2015, net cash provided by investing activities amounted to \$30,078. In the 2016 fiscal year investing activities provided cash in the amount of \$ 6,941. The reduction in proceeds arising from investing activities is due to a one year collection of notes receivable in 2015 compared to the proceeds received in 2016 from the Company's interest in a joint venture..

For the year ended June 30, 2016, net cash provided by financing activities decreased from \$460,967 received during the fiscal year 2015 to net proceeds of \$428,866 received in fiscal year 2016. The decrease came about due to a reduction of proceeds arising from collection of notes payable from a related party.

We had net working capital deficit of \$ 247,566 at June 30, 2016, compared to a deficit of \$339,834 at June 30, 2015.

The Company had an increase in cash, prepaid expenses and accounts receivable when compared to prior year.

While accounts payable and accrued expensed increased from prior year, there was an overall decrease in related party payables, note payables and notes payables related parties when compared to prior year.

On May 11, 2015, we entered into an "Equity Purchase Agreement" with Tarpon Bay Partners, LLC, a Florida limited liability company ("Tarpon"). Subject to the terms and conditions of the Equity Purchase Agreement we have the right to "put," or sell, up to \$5,000,000 worth of shares of our common stock to Tarpon. The terms of this financing agreement are discussed in an S-1 registration statement which can be downloaded from the www.sec.gov website.

The Company incurred a net loss applicable to common stockholders of \$ 422,271 and used cash in operating activities of \$ 394,757 for the year ended June 30, 2016. These and other conditions raise substantial doubt about the Company's ability to continue as a going concern. The Company expects to continue to incur significant capital expenses in pursuing its business plan to market its products and expand its product line, while obtaining additional financing through stock offerings or other feasible financing alternatives. In order for the Company to continue its operations at its existing levels, the Company will require significant additional funds over the next twelve months. Therefore, the Company is dependent on funds raised through equity or debt offerings. Additional financing may not be available on terms favorable to the Company, or at all. If these funds are not available the Company may not be able to execute its business plan or take advantage of business opportunities. The ability of the Company to obtain such additional financing and to achieve its operating goals is uncertain. In the event that the Company does not obtain additional capital or is not able to increase cash flow through the increase of sales, there is a substantial doubt of its being able to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

While sales of our cosmetics products has been discontinued during the fiscal year 2016, it is the core strategy of the Company to license its technologies to industry partners. The current state of the sales efforts, in particular with regard to the Granulox product, distributed by our former joint venture partner, SastoMed, GmbH, has induced management to believe that income from these agreements can reasonably be anticipated to begin during the 2017 fiscal year. The Company will

need substantial additional funding to fulfill its business plan. The Company intends to explore financing sources for its future development activities. No assurance can be given that these efforts will be successful.

ITEM 7A.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a “smaller reporting company” (as defined by §229.10(f)(1)), we are not required to provide the information required by this item.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Sangui Biotech International, Inc.

We have audited the accompanying consolidated balance sheets of Sangui Biotech International, Inc. ("The Company") as of June 30, 2016 and 2015, and the related consolidated statements of operations and comprehensive income (loss), stockholders' deficit, and cash flows for each of the years in the two year period ended June 30, 2016. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Sangui Biotech International, Inc. as of June 30, 2016 and 2015, and the results of its operations and its cash flows for each of the years in the two year period ended June 30, 2016, in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the consolidated financial statements, the Company has incurred accumulated losses and a working capital deficit as of June 30, 2016 which raises substantial doubt about its ability to continue as a going concern. Management's plans concerning these matters are also described in the footnotes to the consolidated financial statements. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

NOTE 1 – ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business

Sangui Biotech International, Inc. (“the Company”) was incorporated in Colorado in 1995. Since 2003 when a comprehensive restructuring of the group was completed, all operations have been carried out by Sangui BioTech GmbH, its ninety percent owned subsidiary which is headquartered in Witten, Germany. Sangui Biotech International, Inc., (“the Parent Company”) acts as a holding company whose purpose it is to secure financing and access to the capital markets.

SanguiBioTech GmbH is engaged in the development of technologies aimed at improved supply of oxygen to the human body such as wound management products in particular a wound spray based on natural hemoglobin, wound dressings based on Chitosan (a natural polymer), artificial oxygen carriers (external applications of hemoglobin, blood substitutes and blood additives) and cosmetics. The cosmetics products are currently being sold via the Company’s internet shop, yielding a small amount of revenues. Otherwise, the Company does not produce nor market its products. It has adopted the strategy to license its technologies to industry partners in exchange for royalties. In the pursuit of this strategy, the Company established a joint venture company in December 2010 for the purposes of marketing and selling the wound spray product in Germany and of preparing its market entry in several other European countries and Mexico. As consideration for the license, the Company is paid royalties on all sales of this product and is entitled to a 25 percent share of all future profits of the joint venture. Effective December 31, 2016 the Company sold its 25% share of the joint venture to its co-partner.

Going Concern

The Company incurred a net loss attributable to common stockholders of \$422,271 and used cash in operating activities of 384,757 for the year ended June 30, 2016. These and other conditions raise substantial doubt about the Company's ability to continue as a going concern. The Company expects to continue to incur significant capital expenses in pursuing its business plan to market its products and expand its product line; however, obtaining additional financing through stock offerings or other feasible financing alternatives may be difficult or even impossible. In order for the Company to continue operating at its existing levels, it will require significant additional funds over the next twelve months. Therefore, the Company is dependent on funds raised through equity or debt offerings. The Company plans to continue to raise necessary capital through both notes payable, as well as stock sales.

Additional financing may not be available on terms favorable to the Company or at all. If these funds are not available the Company may not be able to execute its business plan or take advantage of business opportunities. The Company's ability to obtain such additional financing and to achieve its operating goals is uncertain. In the event that the Company does not obtain additional capital or is not able to increase cash flow through the increase of sales, there is a substantial doubt of its being able to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Principles of Consolidation

The consolidated financial statements include the accounts of Sangui BioTech International, Inc. and its ninety percent owned foreign subsidiary, Sangui BioTech GmbH. All intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the respective reporting period. As future events and their effects cannot be determined with precision, actual results could differ from those estimates. Significant estimates made by

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

management are, among others, the realization of receivables, inventories, long-lived assets, and valuation allowance on deferred tax assets.

F-6

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

**NOTE 1 – ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
(CONTINUED)**

Risks and Uncertainties

The Company's line of future pharmaceutical and cosmetic products (artificial oxygen carriers or blood substitute and additives) as well as other medical products being developed by Sangui BitTech GmbH, are deemed as medical devices or biologics, and as such are governed by the Federal Food and Drug and Cosmetics Act and by the regulations of state agencies and various foreign government agencies. The pharmaceutical products will be subject to stringent regulatory requirements because they are in vivo products for humans. The Company and its subsidiaries have limited experience in obtaining regulatory clearance on these types of products. Therefore, the Company could be subject to risks of delays in obtaining or failing to obtain regulatory clearance.

Financial Instruments

Pursuant to ASC 820, *Fair Value Measurements and Disclosures*, an entity is required to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 establishes a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. ASC 820 prioritizes the inputs into three levels that may be used to measure fair value:

Level 1

Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2

Level 2 applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3

Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

The following table summarizes the derivative liability activity for the period June 30, 2015 through June 30, 2016:

Description:

	<u>Derivative Liability</u>
Fair value at June 30, 2015	\$ -
Change due to Issuances	(74,650)
Change in Fair Value	52,707

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

**NOTE 1 – ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
(CONTINUED)**

Financial Instruments (Continued)

The Company's financial instruments consist principally of cash, accounts and notes receivable, accounts payable and accrued liabilities, notes payable and amounts due to related parties. We believe that the recorded values of all of our other financial instruments approximate their current fair values because of their nature and respective maturity dates or durations.

Foreign Currency Translation

The functional currency of the Company's Sangui GmbH subsidiary is the local currency, the Euro. Accordingly, assets and liabilities of the subsidiary are translated into U.S. dollars at period-end exchange rates. Revenues and expenses are translated at the average exchange rates in effect for the period. The resulting translation gains or losses are recorded as a component of accumulated other comprehensive income in the consolidated statement of stockholders' equity. For the years ended June 30, 2016 and 2015, the Company recognized a loss on translation adjustment in the amount of \$46,800 and a gain of \$39,373, respectively. There were no gains or losses resulting from foreign currency transactions as of June 30, 2016 and 2015.

The exchange rates used to calculate values and results of operations for the years ended June 30, 2016 and 2015, were as follows:

	Year-end Rates	Average Period Rates
June 30, 2016	0.90219	0.90122
June 30, 2015	0.9014	0.8312

During the years ended June 30, 2016 and 2015, the Company has transacted the majority of its business activities in Germany, and the transactions have been primarily consummated in the Euro currency. Due to the fact that the Company's functional currency is the Euro and its reporting currency is the U.S. dollar, the Company must recognize

the effects of variations in foreign currency exchange rates as gains and losses as a component of other comprehensive income (loss), pursuant to ASC 830 "Foreign Currency Translation." To calculate this other comprehensive income and loss, the Company utilizes the "current method," whereby assets and liabilities of the German subsidiary are translated from Euro into U.S. dollars at the exchange rate at the balance sheet date.

All equity items, other than retained earnings, are specifically identified where possible and exchange rates on transaction dates are implemented. Profit and loss accounts are translated using an average rate for the period. During the years ended June 30, 2016 and 2015, the Company recognized other comprehensive loss of \$46,800 and a gain of \$39,373, respectively. Such other comprehensive income and losses had no effect on liquidity.

Pursuant to ASC 830-20-35, *Foreign Currency Matters*, the Company accounts for the translation of transactions denominated in foreign currencies in the Parent Company's books as transaction gains (losses) recognized in General & Administrative expenses.

Cash and Cash Equivalents

The Company considers highly liquid investments with insignificant interest rate risk and original maturities to the Company of three months or less to be cash equivalents. The Company maintains its cash in uninsured bank accounts in Germany. Cash and cash equivalents include time deposits for which the Company has no requirements for compensating balances. The Company has not experienced any losses in its uninsured bank accounts. The Company had no cash equivalents outstanding as of June 30, 2016 and 2015.

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

**NOTE 1 – ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
(CONTINUED)**

Derivative Liabilities

The Company accounts for derivative instruments in accordance with ASC Topic 815, “*Derivatives and Hedging*” and all derivative instruments are reflected as either assets or liabilities at fair value in the balance sheet. The Company uses estimates of fair value to value its derivative instruments. Fair value is defined as the price to sell an asset or transfer a liability in an orderly transaction between willing and able market participants. In general, the Company’s policy in estimating fair values is to first look at observable market prices for identical assets and liabilities in active markets, where available. When these are not available, other inputs are used to model fair value such as prices of similar instruments, yield curves, volatilities, prepayment speeds, default rates and credit spreads, relying first on observable data from active markets. Depending on the availability of observable inputs and prices, different valuation models could produce materially different fair value estimates. The values presented may not represent future fair values and may not be realizable. The Company categorizes its fair value estimates in accordance with ASC 820 based on the hierarchical framework associated with the three levels of price transparency utilized in measuring financial instruments at fair value as discussed above. As at June 30, 2016 and 2015, the Company had a \$0 and \$0 derivative liability, respectively.

Property and Equipment

Property and equipment are recorded at cost and are depreciated or amortized using the straight-line method over the expected useful lives, which range from three to five years. Leasehold improvements are amortized using the straight-line method over the lesser of the estimated useful lives of the assets or the related lease terms. Depreciation expense for the years ended June 30, 2016 and 2015 was \$-0- and \$0, respectively. Expenditures for normal maintenance and routine repairs are charged to expense, and significant improvements are capitalized. The cost and related accumulated depreciation of assets are removed from the accounts upon retirement or other disposition; any resulting gain or loss is reflected in the statement of operations.

Impairment of Long-Lived Assets

Long-lived assets, including property and equipment and certain identifiable intangibles to be held and used are reviewed by the management of the Company for impairment whenever events or changes in circumstances indicate that the carrying value of an asset or asset group may not be recoverable. On a regular basis and at least annually, the Company evaluates whether events and circumstances have occurred that indicate possible impairment and relies on a number of factors, including business plans, economic projections, and anticipated future cash flows. Measurement of the amount of impairment, if any, is based upon the difference between the asset's carrying value and estimated fair value. As of June 30, 2016 and 2015, management of the Company believes that no impairment has been indicated. There can be no assurance, however, that market conditions will not change or demand for the Company's products will continue which could result in impairment of long-lived assets in the future.

Revenue Recognition

The Company derives revenue primarily from licensing fees on sales of its wound spray product as well as from the sale of its cosmetics products.

The wound spray technology is licensed to an entity, in which the Company held a 25 percent equity interest, as a Joint Venture (See Note 2). Effective December 31, 2015 the Company sold its 25 % share of the joint venture to its co-partner. The Company presently is entitled to royalties on net sales of the wound spray product. Licensing fees are invoiced on a quarterly basis and are recognized as revenue during the quarter that the sales were reported by the licensee.

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

**NOTE 1 – ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
(CONTINUED)**

The Company's product sales (amounting to less than 10% of total revenues in the current year) are generated via online orders, with credit card payment. The Company recognizes revenues when: (i) persuasive evidence of a sales arrangement exists, (ii) the sales terms are fixed and determinable, (iii) title and risk of loss have transferred, and (iv) collectability is reasonably assured — generally when products are shipped to the customer, except in situations in which title passes upon receipt of the products by the customer. In this case, revenues are recognized upon notification that customer receipt has occurred. The Company does not have customer acceptance provisions, but it does provide its customers a limited right of return. The Company accrues an estimated amount for sales returns and allowances at the time of sale, based on its ability to estimate sales returns and allowances using historical information. Shipping and handling fees are included as part of net sales. The related freight costs and supplies associated with shipping products to customers are included as a component of cost of goods sold.

Trade Accounts Receivable

Accounts receivable are reflected at estimated net realizable value, do not bear interest and generally require collateral. The Company maintains an allowance for doubtful accounts based upon a variety of factors. The Company reviews all open accounts and provides specific reserves for customer collection issues when it believes a loss is probable.. The reserve estimate includes consideration of such factors as the length of time receivables are past due, the financial condition of the customer, and historical experience. The Company also records a reserve for all customers, excluding those that have been specifically reserved for, based upon evaluation of historical losses which exceeded the specific reserves the Company had established. For the years ended June 30, 2016 and 2015, the Company recognized bad debt expense in the amounts of \$0 and \$1,144, respectively.

Inventory

Inventory is stated at the lower of cost (computed on a first-in, first-out basis) or market value. Provisions to value the inventory at the lower of the actual cost to purchase or manufacture the inventory, or the current estimated market value of the inventory, are based upon assumptions about future demand and market conditions. The Company also performs evaluations of inventory and records a provision or impairment for estimated excess and obsolete items based upon demand, and any other known factors at the time. As of June 30, 2016 and 2015, all inventory balances had been reserved against in full.

Sales Tax Collected from Customers

As a part of the Company's normal course of business, sales taxes are collected from customers. Sales taxes collected are remitted, in a timely manner, to the appropriate governmental tax authority on behalf of the customer. The Company's policy is to present revenue and costs net of sales taxes.

Income Taxes

The Company accounts for income taxes in accordance with ASC 740. Deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be realized or settled. The effect on deferred income tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred income tax assets are reviewed for recoverability and the Company records a valuation allowance to reduce deferred income tax assets when it is more likely than not that such deferred tax assets will not be realized.

The Company has a foreign subsidiary formed or acquired to conduct or support its business outside the United States. The Company provides for income taxes, net of applicable foreign tax credits, on temporary differences in its investment in foreign subsidiaries which are not considered to be permanently invested outside of the United States.

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

**NOTE 1 – ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
(CONTINUED)**

The Company adopted ASC 740 which defines the threshold for recognizing the benefits of tax return positions in the financial statements as “more-likely-than-not” to be sustained by the taxing authority. A tax position that meets the “more-likely-than-not” criterion shall be measured at the largest amount of benefit that is more than 50 percent likely of being realized upon ultimate settlement. ASC 740 also provides guidance on derecognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures. ASC 740 applies to all tax positions accounted for under ASC 740. Estimated interest and penalties related to the underpayment of income taxes are recorded as a component of provision for income taxes in the consolidated statements of operations. For the years ended June 30, 2016 and 2015, the Company did not recognize any such interest or penalties, nor were any interest fees or penalties accrued as of June 30, 2016 and 2016.

Research and Development

Research and development costs are charged to operations as they are incurred. Legal fees and other direct costs incurred in obtaining and protecting patents are also expensed as incurred, due to the uncertainty with respect to future cash flows resulting from the patents. Research and development costs totaled \$37,780 and \$204,987 during the fiscal years ended June 30, 2016 and 2015, respectively.

Research and development costs are charged to operations as they are incurred. Legal fees and other direct costs incurred in obtaining and protecting patents are expensed as incurred. Research and development costs totaled \$37,780 and \$204,987 during the fiscal years ended June 30, 2016 and 2015, respectively

Basic and Diluted Loss per Common Share

Basic loss per common share excludes dilution and is computed by dividing loss available to common stockholders by the weighted average number of common shares outstanding during the period of computation. Diluted loss per share gives effect to all potential dilutive common shares outstanding during the period of compensation. The computation of diluted loss per share does not assume conversion, exercise or contingent exercise of securities that would have an antidilutive effect on earnings. As of June 30, 2016 and 2015, the Company had no potentially dilutive securities that

would affect the loss per share if they were to be included in the loss per share.

Comprehensive Loss

Total comprehensive loss represents the net change in stockholders' equity during a period from sources other than transactions with stockholders and as such, includes net loss. For the Company, the components of other comprehensive loss are the changes in the cumulative foreign currency translation adjustments.

Segments of an Enterprise and Related Information

The Company adopted ASC 280, "Disclosures about Segments of an Enterprise and Related Information." ASC 280 establishes standards for the way public companies report information about segments of their business in their annual financial statements and requires them to report selected segment information in their quarterly reports issued to stockholders. It also requires entity-wide disclosures about the products and services an entity provides, the material countries in which it holds assets and reports revenues and its major customers, if any. As of June 30, 2016 and 2015, the Company has one business segment, which includes the manufacturing and sales of its wound treatment and cosmetic products as well as the licensing of business partners to do the same.

Non-controlling Interests

On June 11, 2008, the Company's wholly-owned German subsidiary, Sangui Biotech GmbH ("GmbH") issued 11,400 shares of its previously unissued common stock for cash proceeds of \$1,140,759. These shares amount to 10 percent of the GmbH's total outstanding common stock, which totaled 113,800 shares of as June 30, 2016 and 2015,

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

respectively. The Company accounts for these non-controlling interests pursuant to ASC 810 whereby gains or losses in a subsidiary with a non-controlling interest are allocated to the non-controlling interest based on the ownership percentage of the non-controlling interest, even if that allocation results in a deficit non-controlling interest balance.

F-11

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

**NOTE 1 – ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
(CONTINUED)**

Recent Accounting Pronouncements

The Company has evaluated recent accounting pronouncements and their adoption has not had or is not expected to have a material impact on the Company's financial position, or statements.

Financial Statement Reclassifications

The Company has reclassified certain prior-year account balances in order to comply with current-period classifications and increase comparability.

NOTE 2 – INVESTMENT IN JOINT VENTURE

During December 2010, the Company's subsidiary Sangui BioTech GmbH established a joint venture company with SanderStrothmann GmbH, under the name of SastoMed GmbH ("the Joint Venture"). The Company owned 25 percent of the Joint Venture and accounted for its interest in the Joint Venture using the equity method of accounting. The Company invested \$8,508 in the Joint Venture during the year ended June 30, 2011. The Company has written the investment down to \$0 for its share of the Joint Venture's losses, amounting to \$112,819 during the calendar year ending December 31, 2014.

The Company has entered into an agreement which is cancellable by either party, with 14 days written notice. The agreement includes payments to its joint venture partner (SastoMed GmbH) by the Company of \$7,760 per month for research and development consulting services. The agreement was terminated September 30, 2016. The balance owing under this agreement recorded in accounts payable and accrued expenses, is approximately \$20,000 as of June 30, 2016.

On June 9, 2015, the Company entered into a note payable with the Joint Venture for \$38,154. The note payable accrues interest at 4% annum and is due June 30, 2017.

Effective December 31, 2016 the company sold its interest in the SastoMed joint venture for Euro 6,250, resulting in a gain reported in Other Income of \$6,936. The sale of the joint venture terminated the relationship with SastoMed. Accordingly the note payable of \$38,154 which was previously recorded as a related party note payable, is now reclassified as non-related party note payable.

NOTE 3 – PROPERTY AND EQUIPMENT

Property and equipment consists of the following at June 30, 2016 and 2015:

	June 30,	
	2016	2015
Technical and laboratory equipment	\$ 641,326	\$ 641,326

Less accumulated depreciation and amortization	(1,237,886)	(1,237,886)
Total property and equipment, net	\$ -	\$ -

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

NOTE 4 – RELATED PARTY TRANSACTIONS

The Company has an agreement with the Company's former President and CEO, pursuant to which, he is entitled to three percent royalties based upon the gross revenues earned from the sale of any product of his invention. No royalties were outstanding, paid or earned in fiscal years 2016 and 2015.

As of June 30, 2016 and 2015, the Company has recorded \$8,445 and \$121,637, respectively, in accounts payable to related parties for services performed by Company officers and directors.

Related Party Loans Payable

On March 6, 2015, the Company entered into a note payable with a family member of a Company Director for \$108,500. On May 31, 2016 the note payable and accrued interest were transferred to the Company Director. The note payable accrues interest at 5 percent per annum, is due on March 31, 2017 and is unsecured. The balance of this note is \$110,940, (translated into US dollars as of June 30, 2016).

NOTE 5 – STOCKHOLDERS' EQUITY

Preferred Stock

The Company is authorized to issue 10,000,000 shares of preferred stock. The authorized preferred shares are non-voting and the Board of Directors has not designated any liquidation value or dividend rates. During the financial years ended June 30, 2016 and 2015 no shares of preferred stock were issued or outstanding.

Common Stock

The Company is authorized to issue 250,000,000 shares of common stock with no par value. The holders of the Company's common stock are entitled to one vote for each share held of record on all matters to be voted on by those stockholders.

Common Stock Issuances

During the year ended June 30, 2015 the Company issued 752,800 shares of common stock for services at an average of \$0.07 per share for a total cost of \$52,422. In addition, the Company issued 5,050,000 shares of common stock for cash at an average of \$0.06 per share, yielding total cash proceeds of \$319,503. The shares issued for services were valued at the trading price of the common stock on the date the shares were issued.

During the year ended June 30, 2016 the Company issued 15,061,000 shares of common stock for cash at an average of \$0.03 per share, yielding total cash proceeds of \$431,456. In addition, the company issued 1,975,030 shares of common stock for the conversion of an interest-bearing payable (\$23,700) and 190,228 shares of common stock for interest (\$3.275) on the payable.

On May 11, 2015, the Company entered into an equity purchase agreement (the "EPA") with an unrelated investor ("the Investor"). The EPA is a put option contract wherein, at the Company's sole discretion, up to \$5,000,000 of common stock may be sold to the Investor for a period of 3 years ending May 2018. A note payable was entered into as consideration to the Investor for execution of the EPA (see Note 9).

On August 14, 2015, the company issued 43,189 shares of common stock to the investor in pursuit of the EPA yielding total cash proceeds of \$1,500 which was received by the company on September 15, 2015.

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

NOTE 5 – STOCKHOLDERS' EQUITY (CONTINUED)

Treasury Stock

During the year ended June 30, 2012, the Company repurchased 53,756 shares of its common stock for cash. During the year ended June 30, 2013, the Company received 1,000,000 shares of its common stock as a partial redemption of a loan to a non-related third party. The treasury stock was valued using the Treasury Method at \$339,387. This value was based on the trading price of the Company's common stock on the date of acquisition. In addition, during the year ended June 30, 2016, 1 million treasury shares were sold for 20,000 Euros.

Stock Options

From time to time, the Company may issue stock options pursuant to various agreements and other contemporary agreements. At June 30, 2016 and 2015, and during the years ended June 30, 2016 and 2015, no options were issued or outstanding.

NOTE 6 - INCOME TAX PROVISION

The Company's provision for income taxes was \$-0- and \$-0- for the years ended June 30, 2016 and 2015 respectively, since the Company incurred net operating losses through June 30, 2016.

Income tax expense for the years ended June 30, 2016 and 2015 differed from the amounts computed by applying the U.S. federal income tax rate of 34 percent as follows:

		June 30, 2016		June 30, 2015
Income tax benefit at U.S. federal statutory rates	\$	(143,572)	\$	(239,599)

Effect of:

Common stock issued for services	-	17,823
Debt issued for financing costs	-	17,000
Change in derivative liability	9,539	-
Loss on sale of asset	2,358	-
Increase (decrease) in valuation allowance	131,675	204,776
Provision for income taxes	\$ -	\$ -

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets at June 30, 2016 and 2015 are presented below:

	June 30, 2016	June 30, 2015
Deferred tax assets		
Net operating losses	\$ (12,438,182)	\$ (12,294,620)
Common stock issued for services	210,918	210,918
Debt issued for financing costs	17,000	17,000
Impairment of related party receivables	436,399	436,399
Change in derivative liability	9,539	-
	2,358	-
Increase (decrease) in valuation allowance	11,761,978	11,630,303
Net deferred taxes	\$ -	\$ -

As of June 30, 2016, the Company had net operating loss carryforwards of approximately \$12.4 million which is available to offset future taxable federal, state and foreign income. The federal and state carryforward amounts

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

expire in varying amounts between 2016 and 2035. The foreign net operating loss carryforwards do not have an expiration period.

F-14

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

NOTE 6 - INCOME TAX PROVISION (CONTINUED)

The Company has evaluated its uncertain tax positions and determined that any required adjustments for unrecognized tax benefits would not have a material impact on the Company's balance sheet, income statement, or statement of cash flows.

The Company's tax filings for 2011 through 2015 remain subject to examination by tax authorities for federal income tax purposes and by other major taxing jurisdictions to which we are subject. The Company has identified potential penalties for the late filing of reports to taxing authorities. The Company believes that it is more likely than not the penalties will be waived and accordingly has not accrued the penalties in the financial statements.

NOTE 7 – COMMITMENTS AND CONTINGENCIES

Indemnities and Guarantees

During the normal course of business, the Company has made certain indemnities and guarantees under which it may be required to make payments in relation to certain transactions. These indemnities include certain agreements with the Company's officers, under which the Company may be required to indemnify such person for liabilities arising out of their employment relationship. The duration of these indemnities and guarantees varies and, in certain cases, is indefinite. The majority of these indemnities and guarantees do not provide for any limitation of the maximum potential future payments the Company could be obligated to make. Historically, the Company has not been obligated to make significant payments for these obligations. The Company has recorded a reserve for indemnities and guarantees of \$-0- as of June 30, 2016 and 2015.

Leases

The Company leases office facilities from an unrelated third party at \$4,110 per month. The office lease contract is maintained on a month-to-month basis.

The Company also leases an automobile under an operating lease. The lease provides for a lease payment of \$742 per month beginning August 2015 expiring August 2018.

NOTE 8 – STOCK-BASED COMPENSATION

The Company has applied the disclosure provisions of ASC 718 for the years ended June 30, 2016 and 2015. There were no common shares or stock options outstanding, issued or granted to employees during these reporting periods.

On April 28, 2004, the Company adopted the 2004 Employee Stock Incentive Plan (“the Plan”). Under the terms of this plan the Board was authorized to issue up to 1,000,000 shares of common stock to certain eligible employees of the Company or its subsidiaries. All of these shares were issued pursuant to the plan prior to June 30, 2007. On September 22, 2008 the Company adopted the 2008 Amended and Restated Long-Term Equity Incentive Plan, whereby the Board was authorized to issue up to 10,000,000 shares of common stock (including incentive stock options) to certain eligible employees, directors, and/or consultants of the Company or its subsidiaries. During the years ended June 30, 2016 and 2015, respectively, the Company issued no shares pursuant to this Plan. All shares available under the 2008 Long-Term Equity Incentive Plan had been issued as of June 30, 2016.

NOTE 9 – NOTE PAYABLE

On May 11, 2015, the Company entered into an unsecured note payable for \$50,000 (related to the EPA previously disclosed in note 5) due on November 30, 2015 with interest accruing at 10% annually. During the year end June 30, 2016 the investor converted \$23,700 of the note into 1,975,030 shares. The remaining amount of \$26,300 was paid back in March 2016.

SANGUI BIOTECH INTERNATIONAL, INC.

Notes to Consolidated Financial Statements

June 30, 2016 and 2015

NOTE 10 – SUBSEQUENT EVENTS

Subsequent to the year ended June 30, 2016, the Company issued 9,149,000 shares of common stock for cash at \$0.012 per share to three unrelated investors, yielding total cash proceeds of \$109,870. Additionally, the Company issued 444,000 shares of common stock for services at an average of \$0.014 per share for a total cost of \$6,083.

ITEM 9.

CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A.

CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of the date of the end of the period covered by this report, our Chief Executive Officer and Chief Financial Officer conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as required by Exchange Act Rule 13a-15. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were not effective as of the end of the period covered by this report to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and our Chief Financial Officer, to allow timely decisions regarding required disclosure.

Management's Annual Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Exchange Act Rule 13a-15(f). Management conducted an evaluation of the effectiveness of the internal control over financial reporting as of June 30, 2016, using the criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also,

projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a control deficiency, or combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. Based on the evaluation of the effectiveness of the internal controls over financial reporting as of June 30, 2016, management has concluded that our internal controls over financial reporting were not effective as of the end of the period covered by this report.

As a result of management's assessment, management has determined that there is a material weakness due to the lack of segregation of duties. In order to address and resolve this weakness we will endeavor to locate and appoint additional qualified personnel to the board of directors and pertinent officer positions as our financial means allow. To date, our limited financial resources have not allowed us to hire the additional personnel necessary to address this material weakness.

Additionally, as a result of management's assessment, management has determined that there is a significant deficiency with regard to the lack of a backup process for electronic financial information. There is no stored backup offsite or in a media safe, and as such, there are no regularly run test restorations of said financial information. In order to address and resolve this deficiency we are currently

researching the options available given our financial means to have a regularly scheduled and dependable offsite backup of our Company records.

Lastly, the Company has not instituted specific anti-fraud controls. While management found no evidence of fraudulent activity, the chief accounting officer has access to both accounting records and corporate assets, principally the operating bank account. Management believes this exposure to potential fraudulent activity is not significant either to the operations of the company or to the financial reporting; however, management is in the process of instituting controls specifically designed to address this material weakness, so as to prevent and detect—on a timely basis—any potential loss due to fraudulent activity.

This Annual Report does not include an attestation report of the company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the company to provide only management's report in this annual report.

Changes in Internal Control Over Financial Reporting

There has been no change in our internal control over financial reporting that occurred during our last fiscal quarter (our fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

The term “internal control over financial reporting” is defined as a process designed by, or under the supervision of, the registrant’s principal executive and principal financial officers, or persons performing similar functions, and effected by the registrant’s board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- (a) Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the registrant;
- (b) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the registrant are being made only in accordance with authorizations of management and directors of the registrant; and

(c) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the registrant's assets that could have a material effect on the financial statements.

ITEM 9B.

OTHER INFORMATION

None.

PART III

ITEM 10.

DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Identity of directors and executive officers

The following table sets forth the names and ages of the current directors and executive officers of Sangui BioTech International, Inc., their principal offices and positions and the date each such person became a director or executive officer. Our executive officers are elected annually by the Board of Directors. Our directors serve one-year terms or until their successors are elected. The executive officers serve terms of one year or until their death, resignation or removal by the Board of Directors. There are no family relationships between any of the directors and executive officers. In addition, there was no arrangement or understanding between any executive officer and any other person pursuant to which any person was selected as an executive officer.

The directors as of June 30, 2016 were as follows:

Name	Age	Position with the Company	Director Since
Hubertus Schmelz	60	Non-Executive Director	Dec 18, 2008
Thomas Striepe	54	CEO	Feb 7, 2005

None of the Directors are related to one another. None of the independent Directors has a business or professional relationship with SGBI and/or the other Directors and substantial shareholders of SGBI, except as follows:

Since January 2004, the subsidiary of the Company has an agreement with Hubertus Schmelz under which the latter serves as a Managing Director on an hourly basis.

The day-to-day operations of SGBI are entrusted to the Executive Directors of SGBI.

The business and working experience of the Directors and key Executive Officers of SGBI as of June 30, 2016, are set out below:

THOMAS STRIEPE, is Vice President Accounting and Controlling at Treukonzept Finance GmbH, Hamburg, Germany, a financial services company. Prior to joining Treukonezpt Finance GmbH in 2004, he held management positions in the accounting departments of several German and international corporations. He holds an MBA of Hamburg University.

HUBERTUS SCHMELZ, is the General Manager of SanguiBioTech GmbH. He was appointed to this position effective December 16, 2003. Prior to joining Sangui he acted as a legal and business consultant. During the last decade prior to 2000 he was entrusted with numerous business development projects by the German Treuhandanstalt in restructuring the economy of Eastern Germany. After having studied law he acted as legal counsel in several positions.

There are no arrangements or understandings between any of the directors or executive officers, or any other person or person pursuant to which they were selected as directors and/or officers.

Significant Employees

All but one individuals serving as scientific or administrative staff have been engaged on the basis of consulting agreements. They include non-disclosure and exclusivity sections and secure the ongoing cooperation. Key personnel the expertise and abilities of which would be difficult to replace includes Dr. Harald Poetzschke.

Directorships

No Director of the Company or person nominated or chosen to become a Director holds any other directorship in any company with a class of securities registered pursuant to section 12 of the Exchange Act or subject to the requirements of section 15(d) of such Act or any other company registered as an investment company under the Investment Company Act of 1940.

Family Relationships

There are no family relationships between any of the directors, officers or employees of the Company.

Involvement in Certain Legal Proceedings

During the past ten years, no present director, executive officer or person nominated to become a director or an executive officer of the Company has been or filed:

1.

A petition under the Federal bankruptcy laws or any state insolvency law was filed by or against, or a receiver, fiscal agent or similar officer was appointed by a court for the business or property of such person, or any partnership in which he was a general partner at or within two years before the time of such filing, or any corporation or business association of which he was an executive officer at or within two years before the time of such filing;

2.

Such person was convicted in a criminal proceeding or is a named subject of a pending criminal proceeding (excluding traffic violations and other minor offenses);

3.

Such person was the subject of any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, permanently or temporarily enjoining him from, or otherwise limiting, the following activities:

i.

Acting as a futures commission merchant, introducing broker, commodity trading advisor, commodity pool operator, floor broker, leverage transaction merchant, any other person regulated by the Commodity Futures Trading Commission, or an associated person of any of the foregoing, or as an investment adviser, underwriter, broker or dealer in securities, or as an affiliated person, director or employee of any investment company, bank, savings and loan association or

insurance company, or engaging in or continuing any conduct or practice in connection with such activity;

ii.

Engaging in any type of business practice; or

iii.

Engaging in any activity in connection with the purchase or sale of any security or commodity or in connection with any violation of Federal or State securities laws or Federal commodities laws;

4.

Such person was the subject of any order, judgment or decree, not subsequently reversed, suspended or vacated, of any Federal or State authority barring, suspending or otherwise limiting for more than 60 days the right of such person to engage in any activity described in paragraph (f)(3)(i) of this section, or to be associated with persons engaged in any such activity;

5.

Such person was found by a court of competent jurisdiction in a civil action or by the Commission to have violated any Federal or State securities law, and the judgment in such civil action or finding by the Commission has not been subsequently reversed, suspended, or vacated;

6.

Such person was found by a court of competent jurisdiction in a civil action or by the Commodity Futures Trading Commission to have violated any Federal commodities law, and the judgment in such civil action or finding by the Commodity Futures Trading Commission has not been subsequently reversed, suspended or vacated;

7.

Such person was the subject of, or a party to, any Federal or State judicial or administrative order, judgment, decree, or finding, not subsequently reversed, suspended or vacated, relating to an alleged violation of:

i.

Any Federal or State securities or commodities law or regulation; or

ii.

Any law or regulation respecting financial institutions or insurance companies including, but not limited to, a temporary or permanent injunction, order of disgorgement or restitution, civil money penalty or temporary or permanent cease-and-desist order, or removal or prohibition order; or

iii.

Any law or regulation prohibiting mail or wire fraud or fraud in connection with any business entity; or

8.

Such person was the subject of, or a party to, any sanction or order, not subsequently reversed, suspended or vacated, of any self-regulatory organization (as defined in Section 3(a)(26) of the Exchange Act (15 U.S.C. 78c(a)(26))), any registered entity (as defined in Section 1(a)(29) of the Commodity Exchange Act (7 U.S.C. 1(a)(29))), or any equivalent exchange, association, entity or organization that has disciplinary authority over its members or persons associated with a member.

Promoters and Control Persons

None.

Audit Committee and Audit Committee Financial Expert

The Company has no separately designated standing audit committee or another committee performing similar functions. The Board of Directors acts as the audit committee. None of the directors qualifies as an Audit Committee Financial Expert.

Material Changes to the Method by Which the Shareholders May Recommend Nominees to the Board of Directors

None.

Section 16 (a) Beneficial Ownership Compliance

Section 16(a) of the Securities Exchange Act of 1934 requires the Company's executive officers, directors and persons who own more than ten percent of the Company's Common Stock, to file initial reports of beneficial ownership on Form 3, changes in beneficial ownership on Form 4 and an annual statement of beneficial ownership on Form 5, with the SEC. Such executive officers, directors and greater than ten percent shareholders are required by SEC rules to furnish the Company with copies of all such forms that they have filed.

Based solely upon a review of copies of the reports filed, we believe that during the year ended June 30, 2016, all executive officers, directors and persons who own more than ten percent of the Company's Common Stock are in compliance with such regulations.

Code of Ethics

As of the date of this report the Company has not adopted a code of ethics.

Audit Committee and Audit Committee Financial Expert

Our board of directors is comprised of two directors, none of which is an outside independent director, and as of the date hereof we have not established an audit committee. Accordingly, our board of directors presently performs the functions that would customarily be undertaken by an audit committee.

ITEM 11.**EXECUTIVE COMPENSATION AND OTHER INFORMATION****Summary Compensation Table**

The table below summarizes all compensation awarded to, earned by, or paid to our Officers for all services rendered in all capacities to us for the fiscal periods indicated.

Name and Principal Position	Year	Salary (\$)⁽¹⁾	Bonus (\$)	Stock Awards (\$)	Option Awards (\$)	Total (\$)
Dr. Joachim Fleing ⁽²⁾	2016	11,441	-	-	-	11,441
Chief Financial Officer	2015	41,181	-	-	-	41,181
Thomas Striepe	2016	0	-	-	-	0
Chief Executive Officer	2015	0	-	-	-	0
Hubertus Schmelz ⁽³⁾	2016	0	-	-	-	0
	2015	144,370	-	-	-	144,370

⁽¹⁾ All figures are expressed in United States Dollars (“USD”); for the German management personnel, the EURO or DM was converted to USD using the average exchange rate of the period July 1 through June 30 for each year.

⁽²⁾ Dr. Joachim Fleing stepped down from his positions as a Director and Officer of the Company on October 27, 2015. Compensation for Dr. Fleing resulted from a communications service agreement, and a remuneration agreement. See Item 13, below.

⁽³⁾ Hubertus Schmelz serves as the Chief Executive Officer of the Company’s 90% owned subsidiary, Sangui Biotech, GMBH.

Narrative Disclosure to Summary Compensation Table

There are no other employment contracts, compensatory plans or arrangements, including payments to be received from the Company with respect to any executive officer, that would result in payments to such person because of his or her resignation, retirement or other termination of employment with the Company, or its subsidiary, any change in control, or a change in the person’s responsibilities following a change in control of the Company.

There are no agreements or understandings for any executive officer to resign at the request of another person. None of our executive officers acts or will act on behalf of or at the direction of any other person.

Outstanding Equity Awards at Fiscal Year-End Table and Narrative

The Company had no outstanding equity awards at fiscal year-end.

Compensation of Directors

The table below summarizes all compensation awarded to, earned by, or paid to our Directors for all services rendered in all capacities to us for the fiscal periods indicated.

Name	Fees Earned or Paid in Cash (\$)	Stock Awards (\$)	Option Awards (\$)	Total (\$)
Thomas Striepe	\$ -	\$ -	\$ -	-
Hubertus Schmelz	\$ -	\$ -	\$ -	-
Joachim Fleing	\$ -	\$ -	\$ -	-

Narrative to Director Compensation Table

Directors serve in this position without compensation and there are no standard or other arrangements for their compensation. There are no employment contracts, compensatory plans or arrangements, including payments to be received from the Company with respect to any Director that would result in payments to such person because of his or her resignation with the Company, or its subsidiary, in the event of any change in control of the Company. There are no agreements or understandings for any Director to resign at the request of another person. None of our Directors or executive officers acts or will act on behalf of or at the direction of any other person.

Other Contracts

None.

ITEM 12.**SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS****Securities Authorized for Issuance under Equity Compensation Plans**

No securities have been authorized for issuance as part of any Equity Compensation Plan.

2004 Stock Incentive Plan

On April 28, 2004, the Company adopted the 2004 Employee Stock Incentive Plan. Under the terms of this plan the Board was authorized to issue up to 1,000,000 shares of common stock to certain eligible employees of the company or its subsidiary. All 1,000,000 shares of common stock were issued under the plan in Sangui's 2005 and 2006 financial years.

2008 Amended and Restated Long-Term Equity Incentive Plan

On October 22, 2008, the Company adopted the 2008 Amended and Restated Long-Term Equity Incentive Plan, whereby the Board was authorized to issue up to 10,000,000 shares of common stock (including incentive stock options) to certain eligible employees, directors, and consultants of the Company or its subsidiaries. All shares available under the 2008 Long-Term Equity Incentive Plan had been issued by June 30, 2013.

Security Ownership of Certain Beneficial Owners

The following table sets forth, as of June 30, 2016, certain information concerning ownership of shares of Common Stock by any person who is the beneficial owner of more than 5% of the issued and outstanding Common Stock of the Company.

Title of Class	Name and Address of Beneficial Owner	Amount and Nature of Beneficial Owner	Percent of Class
Common Stock	Wolfgang Jensen		
	Am Berge 9		
	21376 Eyendorf	11,608,273	7.0%

Changes in Control

To the best of the Company's knowledge there are no present arrangements or pledges of the Company's securities, which may result in a change in control of the Company.

ITEM 13.

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Transactions with related persons

Except as otherwise disclosed below, no Director, substantial shareholder or Executive Officer of SGBI was or is an interested party in any transaction undertaken by SGBI or its subsidiary within the last two years.

The Company has an agreement with the Company's former President and CEO, pursuant to which he is entitled to three percent royalties of gross revenues earned with any product based on his inventions. No royalties were outstanding, paid or earned in fiscal years 2016 and 2015.

As of June 30, 2016 and 2015, the Company has recorded \$8,445 and \$121,637, respectively, in accounts payable to related parties for services performed by Company officers and directors.

Related Party Loans Payable

On March 6, 2015, the Company entered into a note payable with a family member of a Company Director for \$108,500. On May 31, 2016 the note payable and accrued interest were transferred to the Company Director. The note payable accrues interest at 5 percent per annum, is due on March 31, 2017 and is unsecured. The balance of this note is \$110,940

Consulting Contract with Joachim Fleing, PhD.

The Company signed a consulting contract with Joachim Fleing, PhD, covering certain investor relations services on July 17, 2002. When the latter was appointed a director of the company effective December 16, 2003, the Board of Directors unanimously agreed that this contract should persist. This agreement was cancelled effective February 24, 2012, and replaced by a remuneration agreement under which his services as an executive of the company will be remunerated on an hourly basis.

Dr. Joachim Fleing stepped down from his positions as a Director and Officer of the Company effective October 27, 2015.
