Common stock to be outstanding after this offering: 14,453,578 shares, treating all shares of Series A Convertible Preferred Stock and Warrants issued in this offering on an as-converted basis, but without giving effect to the exercise of any over-allotment option.

As of the date of this free writing prospectus, we cannot predict with certainty all of the particular uses for the net proceeds to be received upon the closing of this offering or the amounts that we will actually spend on the uses set forth above. The amounts and timing of our actual expenditures may vary significantly depending on numerous factors. As a result, our management will retain broad discretion over the allocation of the net proceeds from this offering.

Dilution:

After giving effect to the sale of the Units in this offering (including shares of Common Stock included in the Class A Units and the Common Stock issuable upon exercise of the Series A Preferred), excluding the proceeds if any from the exercise of the Warrants included in the Units, at an offering price of \$0.75 per Class A Unit, and \$1,000 per Class B Unit in connection with this offering and after deducting the estimated underwriting discounts, commissions and offering expenses, our pro forma net tangible book value as of December 31, 2016 would have been approximately \$5,977,166 or approximately \$0.66 per share. This represents an immediate increase in net tangible book value of approximately \$0.01 per share to our existing stockholders and an immediate dilution in pro forma net tangible book value of approximately \$0.09 per share to purchasers of Units in this offering, as illustrated by the following table:
