Form 10-Q
November 14, 2016

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended September 30, 2016

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period _____ to _____

Commission file number 001-08675

UNITED STATES ANTIMONY CORPORATION
(Exact name of registrant as specified in its charter)

Montana 81-0305822
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

P.O. Box 643, Thompson Falls, Montana 59873
(Address of principal executive offices) (Zip code)

Registrant's telephone number, including area code: (406) 827-3523

Indicate by check mark whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a shell company as defined by Rule 12b-2 of the Exchange Act. Yes No

At November 14, 2016, the registrant had outstanding 66,866,278 shares of par value \$0.01 common stock.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Common stock issued to directors	\$137,500	\$125,000

The accompanying notes are an integral part of the consolidated financial statements.

PART I - FINANCIAL INFORMATION, CONTINUED:

United States Antimony Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

1. Basis of Presentation:

The unaudited consolidated financial statements have been prepared by the Company in accordance with accounting principles generally accepted in the United States of America for interim financial information, as well as the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required for complete financial statements. In the opinion of the Company's management, all adjustments (consisting of only normal recurring accruals) considered necessary for a fair presentation of the interim financial statements have been included. Operating results for the three and nine month periods ended September 30, 2016, are not necessarily indicative of the results that may be expected for the full year ending December 31, 2016.

Certain consolidated financial statement amounts for the three and nine month periods ended June 30, 2015, have been reclassified to conform to the 2016 presentation. These reclassifications had no effect on the net income (loss) or cash flows or accumulated deficit as previously reported.

For further information refer to the financial statements and footnotes thereto in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

During the nine months ended September 30, 2016 and 2015, the Company incurred interest expense of \$96,479 and \$25,295, respectively, of which \$39,276, and \$25,113, respectively, has been capitalized as part of the cost of construction projects in Mexico.

2. Income (Loss) Per Common Share:

Basic earnings per share is calculated by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share is calculated based on the weighted average number of common shares outstanding during the period plus the effect of potentially dilutive common stock equivalents, including warrants to purchase the Company's common stock and convertible preferred stock. Warrants equal to common stock equivalents of 169,872 shares have been added to the weighted average shares of outstanding common stock of 66,130,650 at September 30, 2015, to determine the diluted income per share for the nine months ended September 30, 2015. Management has determined that the calculation of diluted earnings per share for the nine months ended September 30, 2016, is not applicable since any additions to outstanding shares related to common stock equivalents would be anti-dilutive.

As of September 30, 2016 and 2015, the potentially dilutive common stock equivalents not included in the calculation of diluted earnings per share as their effect would have been anti-dilutive are as follows:

	September 30, 2016	September 30, 2015
Warrants	250,000	-
Convertible preferred stock	1,751,005	1,751,005
Total possible dilution	2,001,005	1,751,005

PART I - FINANCIAL INFORMATION, CONTINUED:

United States Antimony Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited), Continued:

3. Inventories:

Inventories at September 30, 2016 and December 31, 2015, consisted primarily of finished antimony products, antimony metal, antimony ore, and finished zeolite products that are stated at the lower of first-in, first-out cost or estimated net realizable value. Finished antimony products, antimony metal and finished zeolite products costs include raw materials, direct labor and processing facility overhead costs and freight. Inventory at September 30, 2016 and December 31, 2015, is as follows:

	September 30, 2016	December 31, 2015
Antimony Metal	\$60,491	\$102,207
Antimony Oxide	253,110	332,068
Antimony Concentrates	48,785	133,954
Antimony Ore	151,841	319,631
Total antimony	514,227	887,860
Zeolite	223,891	206,378
	\$738,118	\$1,094,238

During the first quarter of 2015 the Company discovered it had been overcharged for raw material purchases from a vendor. The Company brought the matter to the vendor's attention and received a \$914,967 credit to accounts payable due the vendor that was recorded as a gain on liability adjustment during the nine months ended September 30, 2015.

4. Accounts Receivable and Due to Factor:

The Company factors designated trade receivables pursuant to a factoring agreement with LSQ Funding Group L.C., an unrelated factor (the "Factor"). The agreement specifies that eligible trade receivables are factored with recourse. We submit selected trade receivables to the factor, and receive 83% of the face value of the receivable by wire transfer. The Factor withholds 15% as retainage, and 2% as a servicing fee. Upon payment by the customer, we receive the remainder of the amount due from the factor. The 2% servicing fee is recorded on the consolidated statement of operations in the period of sale to the factor. John Lawrence, CEO, is a personal guarantor of the amount due to Factor.

Trade receivables assigned to the Factor are carried at the original invoice amount less an estimate made for doubtful accounts. Under the terms of the recourse provision, the Company is required to reimburse the Factor, upon demand, for factored receivables that are not paid on time. Accordingly, these receivables are accounted for as a secured financing arrangement and not as a sale of financial assets. The allowance for doubtful accounts is based on management's regular evaluation of individual customer's receivables and consideration of a customer's financial condition and credit history. Trade receivables are written off when deemed uncollectible. Recoveries of trade receivables previously written off are recorded when received. Interest is not charged on past due accounts.

PART I - FINANCIAL INFORMATION, CONTINUED:

United States Antimony Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited), Continued:

4. Accounts Receivable and Due to Factor, Continued:

We present the receivables, net of allowances, as current assets and we present the amount potentially due to the Factor as a secured financing in current liabilities.

Accounts Receivable	September 30, 2016	December 31, 2015
Accounts receivable - non factored	\$391,255	\$412,922
Accounts receivable - factored with recourse	132,893	13,782
less allowance for doubtful accounts	(4,031)	(4,031)
Accounts receivable - net	\$520,117	\$422,673

5. Properties, Plants, and Equipment - Mineral Properties:

Guadalupe

On March 7, 2012 and on April 4, 2012 the Company entered into a supply agreement and a loan agreement, respectively, (“the Agreements”) with several individuals collectively referred to as ‘Grupo Roga’ or ‘Guadalupe.’ During the term of the supply agreement the Company funded certain of Guadalupe’s equipment purchases, tax payments, labor costs, milling and trucking costs, and other expenses incurred in the Guadalupe mining operations for approximately \$112,000. In addition to the advances for mining costs, the Company purchased antimony ore from Guadalupe that failed to meet agreed upon antimony metal recoveries and resulted in approximately \$475,000 of excess advances paid to Guadalupe.

The Agreements with Guadalupe (Grupo Roga) granted the Company an option to purchase the concessions outright for \$2,000,000. On September 29, 2015, the Company notified the owners of Guadalupe that it was exercising the option to purchase the Guadalupe property. The option exercise agreement allowed the Company to apply all amounts previously due the Company by Grupo Roga of \$586,892 to the purchase price consideration, resulting in a net obligation for the purchase of the Guadalupe mine of \$1,413,107. The Company is obligated to make annual payments that vary from \$60,000 to \$149,077 annually through 2026. The debt payments are non-interest bearing. The Company recorded \$972,722 as the cost of the concessions and the debt payable equal to total payments due of \$1,413,107 less a discount of \$440,385. The discount is being amortized to interest expense using the effective interest method over the life of the debt. During the nine months ended September 30, 2016, the Company made \$45,000 in payments toward this debt and amortized \$43,735 of discount as interest expense. The net balance of the debt at September 30, 2016 was \$971,085.

PART I - FINANCIAL INFORMATION, CONTINUED:

United States Antimony Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited), Continued:

6. Commitments and Contingencies:

In 2005, Antimonio de Mexico S.A. de C.V. (“AM”) signed an option agreement that gives AM the exclusive right to explore and develop the San Miguel I and San Miguel II concessions for annual payments. Total payments will not exceed \$1,430,344, reduced by taxes paid. During the year ended December 31, 2015, and the nine months ended September 30, 2016, \$100,000 and \$67,608, respectively, was paid and capitalized as mineral rights in accordance with the Company’s accounting policies. At March 31, 2016, a final payment of \$11,739 was made.

In June of 2013, the Company entered into a lease to mine antimony ore from concessions located in the Wadley Mining district in Mexico. The lease calls for a mandatory term of one year and, as of September 30, 2016, requires payments of \$10,000 plus a tax of \$1,600, per month. The lease is renewable each year with a 15 day notice to the lessor, and agreement of terms. The lease was renewed in June of 2016.

From time to time, the Company is assessed fines and penalties by the Mine Safety and Health Administration (“MSHA”). As of September 30, 2016, and December 31, 2015, respectively, the Company had no liabilities due to MSHA.

During the first quarter of 2015, the Company discovered that we did not have IMMEX certification and that the Company would be required to obtain it. Without the IMMEX certification, the Company was required to pay the national sales tax of 16% on all items that the Company imports into Mexico, including capital items and the concentrates from Hillgrove of Australia. IMMEX requires that the Company export a minimum of 60% of everything that is imported into Mexico. The Company has met this requirement at this time. At September 30, 2016, and December 31, 2015, the Company had approximately \$146,500 and \$167,000, respectively, included in other current assets, on deposit with the Mexican tax authorities. The Company believes that this will either ultimately be refunded, or applied to reduce other tax liabilities.

In prior years, the Company utilized Providence Capital, Inc., a Delaware corporation (“Providence”), and Herbert A. Denton to provide investor relations services. On April 1, 2015, we entered into an agreement with Providence to provide us services as our Investor Relations Representative. We terminated this agreement in May 2015, and signed a Settlement Agreement dated July 27, 2015, and a Supplemental Settlement Agreement dated August 1, 2015. These agreements provided for a payment to Mr. Denton of 100,000 shares of the Company’s common stock and \$25,000 to be paid in five equal installments. On August 31, 2015, we issued 100,000 shares of common stock valued at \$0.55 per share or \$55,000 to Mr. Denton. On October 12, 2015, we served Mr. Denton with a notice of material breach of the termination agreements and suspended the remaining payments of \$15,000. We have subsequently filed an action in federal court to force Mr. Denton to comply with the terms of the termination agreements and for damages related to his non-compliance. Subsequent to the Company’s filing, Mr. Denton filed a counterclaim against the Company seeking an award for damages for breach of contract, conversion, defamation of character, failure to exercise business judgement and intentional infliction of emotional duress and damage to reputation. During the second quarter 2016, the Company settled with Mr. Denton with a payment of \$10,000. All claims and counterclaims have been dismissed.

At September 30, 2016, principal payments on debt are due as follows:

Year Ending June 30,

2017	\$368,563
2018	236,822
2019	304,169
2020	217,748
2021	128,742
2022	111,467
2023	118,155
2024	125,244
2025	132,759
2026	139,212
	\$1,882,881

9. Hillgrove Advances Payable

On November 7, 2014, the Company entered into a loan and processing agreement with Hillgrove Mines Pty Ltd of Australia (Hillgrove) by which Hillgrove will advance the Company funds to be used to expand their smelter in Madero, Mexico, and in Thompson Falls, Montana, so that they may process antimony and gold concentrates produced by Hillgrove's mine in Australia. The agreement requires that the Company construct equipment so that it can process approximately 200 metric tons of concentrate per month, with a provision so that the Company may expand to process more than that. The parties agreed that the equipment will be owned by USAC and USAMSA. The final terms of when the repayment takes place have not yet been agreed on. The agreement called for the Company to sell the final product for Hillgrove, and Hillgrove to have approval rights of the customers for their products. The agreement allows the Company to recover its operating costs as approved by Hillgrove, and to charge a 7.5% processing fee and a 2.0% sales commission. The initial term of the agreement was five years, and that agreement was amended later to be eight years; however, Hillgrove may suspend or terminate the agreement at its discretion. The Company may terminate the agreement and begin using the furnaces for their own production if Hillgrove fails to recommence shipments within 365 days of a suspension notice. If a stop notice is issued between one year and two years, there is a formula to prorate the repayment amount from 50% to 81.25%. If a stop order is issued after two years, the repayment obligation is 81.25% of the funds advanced at that point. At December 31, 2015, management determined that it is likely that the Company's repayment obligation will be 81.25% of the total amounts advanced. As of September 30, 2016, Hillgrove had advanced the Company approximately \$1.4 million. Of this amount, \$262,500 was recorded as deferred earned credit and is being recognized ratably through the period ending November 7, 2016 which is when the 81.25% repayment terms of the agreement is applicable. During the nine months ended September 30, 2016 and 2015, \$109,392 and \$58,139, respectively, of the deferred earned credit was recognized with \$10,937 to be recognized in the remainder of 2016. At September 30, 2016, the amount due to Hillgrove for advances was \$1,134,221 which is approximately 81.25% of the total amount advanced.

11. Related Party Transactions:

During the three and nine months ended September 30, 2016 and 2015, the Chairman of the audit and compensation committee received \$9,000 and \$27,000, respectively, for services performed.

During the three and nine months ended September 30, 2016 and 2015, the Company paid \$6,387 and \$9,443, and \$12,099 and \$28,865, respectively, to John Lawrence, our President and Chief Executive Officer, as reimbursement for equipment used by the Company.

12. Income Taxes:

United States

During the nine months ended September 30, 2016, it was determined that, after utilization of the Company's net operating loss carry forwards, a tax liability of \$12,979 was due for income taxes in the United States.

Management estimates the effective tax rate in the United States at 0% for the current year.

Mexico

On October 25, 2016, the national tax authority ("SAT") in Mexico notified us that they had completed its audit of our 2013 tax filing and have determined that we owe \$781,947 in income taxes and penalties. We are required to respond to SAT of our intentions by December 6, 2016. We plan to enter into negotiation with the authorities and have engaged legal and tax counsel in Mexico to guide us through our options. Based on preliminary discussions, we believe that it is probable that we will pay at least some type of assessment and have determined a most likely estimate of our ultimate liability will be \$410,510. Accordingly, we have recorded a tax provision and a corresponding liability for this amount as of September 30, 2016. We hope to be able to pay the amount over a period of 24 months. At this time, however, there can be no assurance as to whether SAT will accept this settlement and we may need to pay the entire assessed amount.

PART I - FINANCIAL INFORMATION, CONTINUED:

United States Antimony Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited), Continued:

12. Income Taxes, Continued:

We anticipate that our assessment can be partially settled by applying our IVA tax (a national sales type tax) refund against the settlement amount. At September 30, 2016, we have approximately \$140,000 of IVA tax on deposit with the SAT which is currently a current asset as of September 30, 2016.

The assessment relates to our 2013 tax filing in Mexico. SAT has not notified us whether other tax filings for the year 2011, 2012, 2014 or 2015 will also be examined. We could be assessed additional amounts if this occurs.

Because of taxable operating losses in early years and the potential for offset of operating income in later years, management has not yet determined the impact of these open years as of September 30, 2016 and has not recorded any liability that may result if there are additional audits by SAT. Management will continue to assess the situation.

13. Stockholder's Equity:

Issuance of Common Stock for Payable to Board of Directors

During the nine months ended September 30, 2016, the Board of Directors was issued a total of 550,000 shares of common stock for \$137,500 in directors' fees that were payable at December 31, 2015. In addition, during the nine months ended September 30, 2016, the Company accrued \$112,500 in directors' fees payable that will be paid in common stock.

During the nine months ended September 30, 2015, the Board of Directors was issued a total of 183,825 shares of common stock for \$125,000 in director's fees that were payable at December 31, 2014. In addition, during the nine months ended September 30, 2015, the Company accrued \$112,500 in directors' fees that was paid in common stock.

Issuance of Common Stock for Services

During the nine months ended September 30, 2015, 105,000 shares were issued to for investor relation services totaling \$57,950.

14. Business Segments:

The Company is currently organized by four segments which represent our operating units: United States antimony operations, Mexican antimony operations, precious metals recovery and United States zeolite operations.

The Madero smelter and Puerto Blanco mill at the Company's Mexico operation brings antimony up to an intermediate stage, which can be sold directly or shipped to the United States operation for finishing and sales at the Thompson Falls, Montana plant. The precious metals recovery plant is operated in conjunction with the antimony processing plant at Thompson Falls, Montana. The Zeolite operation produces Zeolite near Preston, Idaho. Almost all of the sales of products from the United States antimony and Zeolite operations are to customers in the United States.

PART I - FINANCIAL INFORMATION, CONTINUED:

United States Antimony Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited), Continued:

14. Business Segments, Continued:

Disclosure of the activity relating to our precious metals recovery requires that it be reported as a separate business segment. The prior period comparative information has been reclassified to reflect this change.

Segment disclosure regarding sales to major customers is located in Note 10.

ITEM 2. Management's Discussion and Analysis of Results of Operations and Financial Condition

General

Certain matters discussed are forward-looking statements that involve risks and uncertainties, including the impact of antimony prices and production volatility, changing market conditions and the regulatory environment and other risks. Actual results may differ materially from those projected. These forward-looking statements represent our judgment as of the date of this filing. We disclaim, however, any intent or obligation to update these forward-looking statements.

PART I - FINANCIAL INFORMATION, CONTINUED:

ITEM 2. Management's Discussion and Analysis of Results of Operations and Financial Condition, continued:

Antimony

Our antimony sales were 658,915 pounds for Q3 of 2016, a decrease of 16,116 pounds (8.9%) from sales of 675,031 pounds in Q3 of 2015.

Our revenues for Q3 of 2016 were less than our revenues in Q3 of 2015, primarily due to the decrease in the price of antimony. Gross antimony revenue net of discount was \$2,025,755 for Q3 of 2016, down \$716,091 (26.1%) from Q3 of 2015. The decrease in revenues was due to the decrease in the price of antimony metal from \$4.06 during the third quarter of 2015 to \$3.07 in the third quarter of 2016, a decrease of \$0.99 per pound (24.4%).

The amount of metal sold from Mexico was approximately 411,000 pounds for the third quarter of 2016 compared to approximately 345,000 pounds sold for the third quarter of 2015. The increased sales from Mexico for Q3 of 2016 versus Q3 of 2015 was primarily because all furnaces at Madero were processing Australian concentrates in 2016, and the Madero smelter was in a transition phase from Mexico raw material to the Hillgrove raw material from Australia during 2015. We anticipate continuing processing Australian concentrates through the end of 2016.

Our cost per pound of antimony production has fallen in 2016 compared to 2105 due to the following factors:

1.
The cost of raw materials has dropped significantly because the price is indexed to the sale price
2.
Realized savings from natural gas instead of more expensive propane in Mexico
3.
Sharply reduced propane costs in Montana
4.
Lower costs of operating in Mexico

The largest reduction in cost per pound will result when all Mexican operations are on stream, and the holding costs are spread over real production. The holding costs for Los Juarez, Wadley, Guadalupe, and Soyatal have been substantial to date.

The antimony business will realize higher production and potentially better operating margins as Mexican operations are brought up to planned capacity.

The cost of Mexican production in the first six months and the second quarter of 2016 included all the holding costs for Los Juarez, 80% of the holding costs for the Puerto Blanco mill, and the care and maintenance costs for Wadley and Guadalupe whose product could not be smelted due to lack of furnace capacity at Madero.

Precious Metals

For the first nine months of 2016, USAC shipped \$914,837 of gold and silver compared to \$365,388 for the same period of 2015, an increase of 163%. This included gross revenue of \$414,312 for Hillgrove gold, of which \$350,256 was paid to Hillgrove, for a net precious metals revenue of \$564,581 for the first nine months of 2016.

The production of gold and silver from the Los Juarez deposit in Queretaro, Mexico is awaiting two leach circuit additions. The addition at Madero is completed, and the equipment is built and installed. It is expected to result in

higher metallurgical recoveries of gold and silver from the flotation concentrates. The second addition will involve a cyanide leach circuit at the flotation mill at Puerto Blanco in Guanajuato to recover the remaining gold and silver from the floatation tailings. The application for this permit is in progress, and commencement of Los Juarez production could proceed during the second half of 2017. The Company does not claim any ore reserves for Los Juarez by definition of the SEC standards.

PART I - FINANCIAL INFORMATION, CONTINUED:

ITEM 2. Management's Discussion and Analysis of Results of Operations and Financial Condition, continued:

We have vast experience mining and processing precious metals and we believe that we are ready to embark on a very substantial mining program at Los Juarez, Coahuila, Mexico.

For most of 2015, and until the end of the first quarter of 2016, the 15 small rotating furnaces at Madero have been used to process Australian concentrates and almost all of our Mexican production was put in inventory. The start up of the large rotating furnace during November of 2015 has allowed us to process most of the Hillgrove concentrates using that furnace, and starting in Q2 of 2016 our Mexican mine subsidiary started processing Mexican raw material sourced from leased mines.

The Australian concentrates contain gold in the slag remaining after the concentrates have been processed. We are presently processing this slag and recovering a gold dore (a mix of precious metals). At this time, the gold dore is taken to a third party refiner, and we receive a processing fee and a 7.5% sales commission on the recovered precious metals value.

The same process being used to recover the gold from the Hillgrove slag will be used to recover the precious metals from our Los Juarez ore.

ZEOLITE

Edgar Filing: UNITED STATES ANTIMONY CORP - Form 10-Q

During Q3 of 2016, BRZ sold 3,375 tons of zeolite, a decrease of 153 tons (4.3%) from the same period in 2015.

During the first nine months of 2016, BRZ sold 7,315 tons of zeolite, an increase of 199 tons (1.9%) from the same period in 2015.

During Q3 of 2016, BRZ realized net income of \$105,604 compared to a net income of \$132,058 for Q3 of 2015, a decrease of \$26,454.

BRZ realized a net income of \$235,912 for the first nine months of 2016 compared to \$267,309 for the same period of 2015.

PART I - FINANCIAL INFORMATION, CONTINUED:

ITEM 2. Management's Discussion and Analysis of Results of Operations and Financial Condition, continued:

For BRZ, EBITDA was \$395,912 for the first nine months of 2016 compared to \$435,309 for the same period in 2015.

BRZ has embarked on a sales program with field representatives that have years of experience in the agricultural field, which has resulted in new orders. We believe that this is the most cost effective and fastest way to increase revenues and profits for BRZ.

Company-Wide

For the third quarter of 2016, we recognized a net loss of \$385,567 on sales of \$2,846,699, compared to a net loss of \$135,890 in the third quarter of 2015 on sales of \$3,505,452. The profit of \$106,376 for the first nine months of 2015 was primarily due to a negotiated adjustment of \$914,967 to the Company's cost of raw materials. The gain from the price adjustment has been reported as other operating income in 2015. The loss in the third quarter of 2016 was primarily due to a decrease in the price of antimony, from \$4.06 in Q2 of 2015 to \$3.07 in Q3 of 2016, a decrease in the price of \$0.99 per pound. Although the 2016 prices are the lowest they have been in 7 years, our average sale price of \$3.07 for Q3 of 2016 was an increase of \$0.26 over the average sales price of \$2.81 for Q2 of 2016.

For the first nine months of 2016, we reported a net loss of \$1,142,333. For the same period of 2015, we reported a net income of \$106,376, primarily due to a negotiated adjustment of \$914,967 to the Company's cost of raw materials

For the third quarter of 2016, EBITDA was a negative \$175,292, compared to EBITDA of \$86,485 for the same period of 2015.

For the third quarter of 2016, the non-operating general and administrative expenses were \$344,539 compared to \$413,786 for the same period of 2015.

The largest impediments to profitability have been the decline in the price of antimony from \$8.11 per pound in April of 2011 to \$2.27 per pound in January of 2016, a 72% decrease, and "non-production costs" in Mexico of \$514,400 for the nine months ended September 30, 2016. In the third quarter of 2016, the non-production costs were \$156,849 and included the costs of mines and mills in Mexico that have been idle due to a lack of furnaces at the Madero smelter and the metallurgical problems with the Los Juarez ore.

The metallurgical problems with the Los Juarez ore have been solved, and we will process the ore presently in inventory as soon as we are permitted and can complete construction of our leach circuit at the Puerto Blanco mill. It appears that we may have reached the end of the price declines in antimony.

Hillgrove has suspended mining and operations in Australia, but they may restart operations. We estimate that we have enough antimony concentrates from Hillgrove to run our large rotating furnace through the end of 2016. Hillgrove has given us permission to use the large rotating furnaces and other furnaces built for their use for our own production if they are unable to supply us with concentrates.

The Mexico non-production costs for the three and nine months ending September 30, 2016, are primarily due to holding costs from inactivity at the Los Juarez and Wadley mines and the Puerto Blanco mill. The loss of production at the Madero smelter from metallurgical testing and experimenting with various production methods and formulas contributed to non-production costs during the first quarter of 2015.

PART I - FINANCIAL INFORMATION, CONTINUED:

ITEM 2. Management's Discussion and Analysis of Results of Operations and Financial Condition, continued:

Other Items:

1.
Our net loss for the third quarter of 2016 was \$386,547, which includes \$210,275 for depreciation and amortization, and \$37,500 for directors' compensation to be paid in stock.
2.
USAC's precious metals net revenue in the first nine months of 2016 was \$564,581 which was equivalent to approximately \$0.25 per pound of antimony sold.
3.
During the first six months of 2016, the board of directors were issued shares of common stock with a value of \$137,500 for their services in 2015, and an accrual of \$112,500 for compensation to board members through September 30, 2016 was recorded.

Los Juarez

Our Los Juarez property in Queretaro, Mexico exposes mineralization for approximately 3.5 kilometers and for widths up to 1 kilometer. Previously, the deposit had been reported as a layered deposit (manto) up to 6 meters thick with silver and antimony. The property has been abandoned by major mining companies unable to solve the metallurgical problems. After 11 years and many millions of dollars, USAC has reported that:

1.
The property is predominantly a gold property with substantial credits in silver and minor credits in antimony.
2.
The property is not a manto deposit but a series of deep-seated silica-rich pipes that carry the mineralization vertically for many meters and has not been fully delineated along strike and at depth.
3.
The Company has pilot tested every aspect of the project including the mining, milling, and smelting, and believes it has solved the metallurgical problems to produce a gold-silver-antimony concentrate. The Company will bring its Puerto Blanco 100 ton per day pilot mill on stream after permitting a cyanide leach plant at Puerto Blanco. The leach plant at our Madero smelter is permitted, and is completed.
4.
We claim no reserves for the mining property at Los Juarez per SEC rules.

ITEM 2. Management's Discussion and Analysis of Results of Operations and Financial Condition, continued:

Financial Position

Financial Condition and Liquidity

	September 30, 2016	September 30, 2015
Current Assets	\$1,717,878	\$3,734,961
Current liabilities	(3,214,473)	(3,092,124)
Net Working Capital	\$(1,496,595)	\$642,837
Cash provided (used) by operations	\$412,162	\$6,567
Cash used for capital outlay	(459,969)	(1,344,034)
Cash provided (used) by financing:		
Net proceeds from (payments) to factor	119,111	259,575
Proceeds from notes payable to bank	-	92,502
Payment of notes payable to bank	(30,672)	-
Principal paid on long-term debt	(130,857)	(69,381)
Proceeds from Hillgrove	-	1,014,412
Sale of Stock	-	120,000
Net change in cash	\$(90,225)	\$79,641

Our net working capital decreased by approximately \$1.2M from December 31, 2015. Our cash decreased by approximately \$90,000 during the same period. The decrease in our net working capital was primarily due to an increase in the current portion of long-term debt, the accrual of the liability for Mexican income tax, and expenditures of approximately \$460,000 for capital outlay. We have estimated commitments for construction and improvements, including the final expenditures to finish building and installing the Hillgrove furnaces and equipment at Madero, Mexico, of approximately \$150,000 over the next twelve months. The cash for the Hillgrove capital improvements will come from the expected refund of IVA taxes presently deposited with the Mexican tax authorities, and from our internally generated sources. We believe that with our current cash balance, along with the future cash flow from operations, we have adequate liquid assets to meet these commitments and service our debt for the next twelve months. We have lines of credit of \$202,000 which have been drawn down by \$100,000 at September 30, 2016.

ITEM 3.

None

ITEM 4. Controls and Procedures

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, as appropriate, to allow timely decisions regarding required disclosure. Our chief financial officer conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)) as of September 30, 2016. It was determined that there were material weaknesses affecting our disclosure controls and procedures and, as a result of those weaknesses, our disclosure controls and procedures were not effective as of September 30, 2016. These material weaknesses are as follows:

20

The Company lacks proper segregation of duties. As with any company the size of ours, the lack of segregation of duties is due to limited resources. The president authorizes the majority of the expenditures and signs checks.

During our year-end audit, our independent registered accountants discovered material misstatements in our financial statements that required audit adjustments.

MANAGEMENT'S REMEDIATION INITIATIVES

We are aware of these material weaknesses and have procedures to ensure that independent review of material transactions is performed. We have internal control measures to mitigate the lack of segregation of duties as follows:

The CFO reviews all bank reconciliations

The CFO reviews all material transactions for capital expenditures

The CFO reviews all period ending entries for preparation of financial statements, including the calculation of inventory, depreciation, and amortization

The CFO reviews all material entries for compliance with generally accepted accounting principles prior to the annual audit and 10Q filings

The Company has a formal capitalization policy

In addition, we consult with independent experts when complex transactions are entered into.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no significant changes made to internal controls over financial reporting for the quarter ended September 30, 2016.

PART II - OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

On October 21, 2015 United States Antimony Corporation filed a complaint against Herbert A. Denton and Providence Capital, Inc., in the United States District Court for the District of Montana, Missoula Division, alleging the following: (i) noncompliance, violation and breach of a Consulting Agreement, Settlement Agreement and Supplemental Settlement Agreement, (ii) communications with shareholders of United States Antimony Corporation, by Mr. Denton and Providence Capital, Inc., and solicitation of proxies from shareholders, in violation of reporting and disclosure requirements of federal securities laws. As of the date of this report, this lawsuit has been settled in our favor.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None

Item 3. DEFAULTS UPON SENIOR SECURITIES

The registrant has no outstanding senior securities.

Item 4. MINE SAFETY DISCLOSURES

The information concerning mine safety violations or other regulatory matters required by Section 1503 (a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K is included in Exhibit 95 to this Annual Report.

Item 5. OTHER INFORMATION

None

Item 6. EXHIBITS AND REPORTS ON FORM 8-K

Certifications

Certifications Pursuant to the Sarbanes-Oxley Act

Reports on Form 8-K None

SIGNATURES

Pursuant to the requirements of Section 13 or 15(b) of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
